Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Albany	C. of Cohoes Vliet Street Water Line Replacement	$600,000	CDBG	
Albany	ActionAlbany	$400,000	CDBG	Pre-Apprenticeship and Neighborhood Revitalization Project Participants: Workforce Development Institute (WDI) St. JosephÆs Housing (SJH) ActionAlbany - Minority Contractor Network (AA) Needs: ò SJH has 175 old buildings, some of them are vacant many are
Albany	YWCA Troy-Cohoes	$266,900	CDBG	Project will improve the buildings' handicapped accessibility and improve overall safety for our aging, handicapped residents and day care children. The upgrades include: adding ADA functionality to three existing bathrooms, installing 4 electronic handicapped accessible doors, replacing gym flooring, re-paving and re-striping the existing parking lot area surface, new fencing around the parking lot and playground, new parking lot lighting, improvements to the playground area, replacing deteriorated sidewalks and curbs, and masonry piers for new fencing.
Albany	Berne Fire station Addition	$200,000	DASNY	Add to the existing station a bay, additional meeting and Office space.
Albany	Albany Medical Center	$360,000,000	DASNY	Project #1- 325,000 square foot hospital expansion project
Albany	Albany Medical Center	$14,000,000	DASNY	Project #2 - 25,000 square foot research facility
Albany	Albany Medical Center Hospital Expansion	$50,000,000	DASNY	325,000 sq. foot expansion of only academic medical center serving 23 counties in NYS is necessary to meet growth in demand for high end medical services, including transfers from other hospitals; will create at least 500 construction-related jobs and 650 permanent jobs (representing full range of job opportunities including support staff, technicians, physicians, therapists, licensed and practical nurses) and support a facility with a more than $1 billion annual economic impact; project already has CONapproval, validating the need for 83 additional beds, 20 new and 12 renovated operating rooms and a new Neonatal Intensive Care Unit.
Albany	Albany Medical College Simulation Center	$10,000,000	DASNY	Albany Medical College seeks funding to support construction of a new two-story, 25,000 square foot building to house research facilities and its Clinical Competency and Patient Safety Center. The Medical College?s current facilities are outdated and inadequate to meet the demands of scientists who receive $12-$14 million annually in sponsored research support. Since the facilities house heavily-regulated animal research subjects, modernization is necessary to ensure continued accreditation. Equipment for the Clinical Competency and Patient Safety Center has been purchased and is used by students of the medical college and other trainees, but will be put to broader community use for training of medical professionals serving rural areas, as well as first responders, when housed in the new facility. At least 200 construction jobs would be created; the Animal Facility supports 15 jobs and serves 60 Ph.D. researchers, supported by 50 research and administrative staff; these positions are jeopardized by th
Albany	Albany Medical Center Parking Garage	$20,000,000	DASNY	280,000 sq ft, 7-story garage to accommodate 1,500 cars, supporting employees, students, patients and visitors to the medical center; current garage is over capacity and additional space is needed to support expansion project.
Albany	Albertus Hall Phase 3 Renovation	$1,500,000	DASNY	The project will conclude the renovation to the main classroom building on campus. Three floors of the building were previously renovated. The project includes the gut renovation to the lower level which requires new mechanical system, and renovation to classrooms to include several new science laboratories. The renovation also includes new flooring, ceiling, lighting and painting.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Albany	Center for Communications and Interative Media	$6,000,000	DASNY	This project includes the renovation of the building that previously held the entire music program at the College. After the constructio of a new Center for the Arts, the music education program relocated to the new building. The anticipated renovationbrings the public comunications program together with music industry. A few of the spaces to be renovated are: TV studio, radio station, music studios and control rooms, live recording lab, MIDI lab, and 2 multi-media labs, upgrade and relocation of mechanical and electrical equipment and plumbing upgrades.
Albany	Hellman Library Renovation	$14,000,000	DASNY	Rennovation and addition to include modernization and renovation to the original strucure (1950) and subsequent addtion (1980). The project includes full mechanical, electrical and plumbing upgrades, asbestos abatement and other code required upgrades.The building addtion will include 24 hour student computer lab/study area relocated from the first floor of a freshman resident facility. The addition of the approx. 4500 square feet, brings the project closer to the programmatic goals.
Albany	Renovation to 1006 Madison	$1,500,000	DASNY	1006 Madison Avenue is a 3 story house the College purchased several years ago. The project includes full meachnical, electrical and plumbing upgrades, asbestos abatement and other code required upgrades. The renovation will include faculty office forthe music faculty who teach in the new adjacent Center for the Art. The Dean of Arts and Humanities will also relocate to the renovated dean's suite on the first floor of the building.
Albany	General Updates and Repairs	$0	DASNY	General Updates and Repairs
Albany	Library Expansion	$0	DASNY	Library Expansion
Albany	CFTD Facility Improvement Project	$35,500,000	DASNY	Construction of an 88,000 square foot building to replace the inadequate facilities that currently exist. The new school would service 168 students and create 10 new positions. The first phase is to construct the new facility and the second phase is to create a residential component for 18-24 children which would enable the return to the State of children currently being served out of State. This project advances critical New York State policy goals both in improving the availablity and quality of education to an underserved population while at the same time providing a significant and immediate economic benefit to the local community. The Center services approximately 15,000 individuals each year at 70 locations in eight counties.
Albany	McKnownville Fire District	$890,000	DASNY	McKnownville Fire District - Station 1 - renovation and upgrades - new roof; replace existing bathrooms with fully-accessible facilities; replace exterior and truck bay doors and windows replace kitchen area; reconfigure office, meeting and storage space; and exterior lighting upgrades.
Albany	McKnownville Fire District	$1,000,000	DASNY	McKnownville Fire District - Station 2 - a full ""gut"" rehabilitation of the facility and its conversion into a training center and community meeting faci
Albany	McKnownville Fire District	$1,500,000	DASNY	McKnownville Fire District - New Station 2 - Construction of a new facility to house one or more District trucks currently housed elsewhere, along with other District equipment.
Albany	Town Of Knox Town Hall	$1,356,000	DASNY	This project includes the renovation and expansion of the current Town Hall to increase the size from 3,296 sq ft to 8.281 sq ft. The renovation and expnasion will address accessability issues and multi-use assembly space as well as provide adequate space for both the Tax and Building Depts.

County	Project	Requested $	State Agency	Additional Detail
Albany	The YMCAs of New York State Inc.	$0	DASNY	There are currently many shovel ready YMCA projects throughout the state of New York. These projects would contribute to restoration of the state's economy through not only generating jobs in the construction and operational phases, but also by providing an effective way to increase community health and wellness and reduce the burden caused by chronic diseases and Medicaid use. The completion of new YMCA facilities projects will provide a tremendous benefit to the community. According to a study by the Centers for Disease Control and Prevention, community-based physical activity interventions designed to promote more active lifestyles among adults are cost-effective in reducing heart disease, stroke, colorectal and breast cancers, and type 2 diabetes. A list of shovel-ready YMCA Projects that are in need of funding: Green County YMCA, Schenectady YMCA, YMCA of Greater Syracuse, Frost Valley YMCA in Sullivan County, Middletown & Sullivan County YMCA, YMCA Summer Camp in Orange County, YMCA of Long
Albany	Albany Medical Center	$10,000,000	DASNY	Construction of a new two-story, 25,000 sf. Building to house research facilities and its Clinical Competency and Patient Safety Center.

County	Project	Requested $	State Agency	Additional Detail
Albany	Five Green Libraries in Albany	$4,000,000	DASNY	The Albany Public Library is constructing five (5) new urban libraries in the city of Albany due to aging and insufficient buildings and an exponential increase in library usage by the public (813,000 visits in 2008). All five of the library renovationsare now under construction and are expected to be completed in Fall ?09 and summer of 2010. All five libraries will be ?green? buildings with LEED Certification, two libraries will have geothermal heating and cooling and four libraries will maximize daylight with atriums, monitors and skylights. W/MBE goals are at 20% (we?re currently realizing 27%) and EEO goals are at 17% (we?re currently realizing 16% before the majority of labor is on site). The benefits to the Albany Public Library and to the taxpayers in the City of Albany are immense over the expected 50-100 year life of these new neighborhood libraries. They include: low operating cost; low energy demand - level seasonal electric usage; long life expectancy of the heating and cooling system; siction of five of Albany?s neighborhood libraries has begun with a paramount commitment to build energy efficient and LEED certifiable ?green? buildings. In 2007, city residents approved a bond act to renovate and build five (5) branch libraries in ArborSouth End, and the New Scotland, Delaware and Pine Hills neighborhoods, serving neighborhoods identified as low-income and often underserved. All the libraries in the APL systems serve the unemployed, aged, teens and youth.

County	Project	Requested $	State Agency	Additional Detail
Albany	Glass Works Village Town Center	$10,000,000	DEC	Hello, My name is Dominick John Ranieri and I am an Architect, a New Urban Land Planner as well as a Developer in the Albany area and Capital region of upstate New York. The particular Project that my partners and I are requesting assistance on is a 58 acre ?Green Field Infill Project? that will create a viable and sustainable village down town for a suburban community that presently has none. It will create a walk able community center in a commercial and residential area on a parcel of land that has been vacant for years while the community grew around it. These types of Smart Growth projects keep sprawl from continuing out into the peripheral country side and subsequently consume natural areas and farm lands. This project is designed to be environmentally conscious with nature preserved areas as well as manicured green spaces for social interaction and enjoyment. The project will have a Bus station with state of the art GPS tracking of the busses as they approach this town?s center and an enunciatiwill incorporate the towns existing community assets such as the Town Library with over 20,000 members, the YMCA with over 15,000 members, the Elementary school, the local Price Chopper grocery store, as well as over 1,000 existing residential rental uning distance to each other and focused around this ?New Urban? designed ""New Town Center"". The Project includes the expansion of the town?s existing sewer system (over 2,000 lin.ft.), water system (over 2,000 lin.ft.), walking and bike path network (ove
Albany	Albany International Airport- Glycol Deicing Stormwater Storage Tank (1.7 M	$2,296,000	DEC	Albany International Airport- Glycol Deicing Stormwater Storage Tank (1.7 MG Capacity) SPDES Water Quality Permit Compliance
Albany	Curry Road Extension Drainage	$2,185,000	DEC	Installation of a stormwater detention and transmission system that will eliminate recurring flooding in a residential neighborhood.
Albany	CD Habitat ReStore	$200,000	DHCR	Habitat ReStore will expand operation hours and available inventory and display of new and used building materials and home renovation items available for sale to the low income residents of the Capital District, landlords, and other idndividuals and businesses.
Albany	South End Neighborhood Stabilization Program	$400,000	DHCR	Habitat will acquire 4 vacant buildings and rehabilitate them for homeownership opportunities for low income families in the South End of the City of Albany. Habitat will hire 3 additional FTE construction assistants and support through subcontracts multiple construction trade businesses
Albany	Vacant Building Targeted Stabilization Program	$4,000,000	DHCR	Vacant Building Targeted Stabilization Program - This program has been developed to target one third of the vacant and abandoned properties in the City of Albany (300 buildings). These buildings have a blighting effect on neighborhoods, promote crime, and drastically reduce nearby property values. However, the majority of these buildings are located in designated historic districts with many of them built prior to the 20th century. These buildings are unique and valuable assets that should be preservedfor their aesthetic and economic benefits. The intent of this program is to stabilize or ?mothball? properties for future rehabilitation. Teams of professional roofers, plumbers, carpenters and other general contractors will address all basic and structural deficiencies and stabilize buildings for future productive residential and commercial reuse of stabilization.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Albany	St. Joseph's Academy Artist's Loft Conversion	$10,500,000	DHCR	This project proposes adaptive reuse of the St. Joseph Academy at the corner Second and North Swan Streets in the Arbor Hill neighborhood. Located in an economically distressed area, the 25 studio and 1-bedroom apartments would be offered at affordable rents and provide 12,000 square foot arts and culture center for the purpose of developing the artistic talents of community residents. Currently, the North Swan Street is undergoing reinvestment in the amount of $6.1M in the form of new storefronts withresidences above. Academy Lofts would continue the investment along North Swan Street and rehabilitate and occupy a vacant building. This project has been subject of a completed market assessment and is a landmark building in a redeveloping neighborhoodin Albany?s low-income Arbor Hill neighborhood. This project would convert an existing vacant school into artists' loft housing and community space. It will leverage additional investment and residency along the North Swan Street corridor.
Albany	Vacant Building Green Rehab Grant Program	$4,000,000	DHCR	The City of Albany has approximately 800 vacant buildings and this program has been developed to provide forgivable grants and low-interest loans to individuals who purchase vacant buildings in targeted neighborhoods and rehabilitate them to green building standards. Buildings are predominately located in low-income neighborhoods and must remain owner-occupied for five (5) years. This project will not only spur considerable reinvestment in Albany?s inner-city neighborhoods through the active reclamationof vital housing stock, but will greatly assist the local economy and the development of the green jobs sector by utilizing green building and rehabilitation methods.
Albany	Ezra Prentice Homes	$21,378,339	DHCR	LIHTC 9%
Albany	Van Rensselaer Village	$18,300,755	DHCR	LIHTC 9%
Albany	Downtown Residential Construction & Adaptive Re-Use Program	$10,000,000	DHCR	Downtown Residential Construction & Adaptive Re-Use Program
Albany	Strategic Neighborhood Redevelopment	$20,000,000	DHCR	Strategic Neighborhood Redevelopment
Albany	Vacant Building Targeted Stabilization Program	$4,500,000	DHCR	Vacant Building Targeted Stabilization Program
Albany	Emergency Home Repair Program	$20,000	DHCR	In an attempt to comply with the Anti-Predatory Lending Initiative implemented by the Secretary of HUD, the Albany County Rural Housing Alliance [ACRHA] is requesting a contribution toward our privately funded Emergency Home Repair Program. The ACRHA isa private not-for-profit, incorporated in 1982 with the assistance and encouragement of Erastus Corning and George Hecht of the Albany County Cornell Cooperative Extension to develop, rehabilitate, and restore buildings and residences in Albany County inan effort to increase the quantity and quality of housing available to households of very low to moderate-income. The ACRHA is the only New York State Rural Preservation Company serving the rural area of Albany County consisting of the Towns of Berne, Knox, Westerlo, Rensselaerville, Coeymans, New Scotland, and the small city of Cohoes. However, the Emergency Home Repair Program serves all of Albany County. Through partnership efforts with the Albany County Cornell Cooperative Extension, the United Tenome population with vital emergency home repairs. This proposal requests $10,000 toward expenses incurred during the housing rehabilitation of the ACRHA Emergency Home Repair Program - used in conjunction with other program grant funds, when available. Tpair Program is designed to assist low-income homeowners with emergency home repairs. This is the result of a Legislative Local Initiative received from former Assemblyman John Faso in 2002. Additional funding has been received from Key Bank, M & T Bank,

County	Project	Requested $	State Agency	Additional Detail
Albany	RANGR	$2,000,000	DHCR	Revitalize Albany?s Neighborhoods with Green Retrofits (RANGR) Project In Partnership with Councilman and Mayoral Candidate Corey Ellis Project Concept: The proposed project to Revitalize Albany?s Neighborhoods with Green Retrofits (RANGR) is a communityresponse that would have a win-win-win effect on the area. Vacant housing stock would be converted to affordable living stock. The rehabilitated housing would be energy efficient, reducing energy consumption and high energy costs. Many low-income peoplewill be trained to perform work that would help them achieve sustainable, living wages in the construction field. There are presently over 1000 vacant or abandoned homes in the City of Albany. Capital Region Workforce Development Center has a pre-apprentice training program that could use old vacant homes for venues to practice their hands-on skills (masonry, carpentry, plumbing, framing, electrical etc.). The Minority Contractor Network and Landmark Construction and Development is working to develop aogram. Minority Contractor?s Network, will provide a repository of quality contractors which would increase the quality of work and advance the network. There would be a centralized marketing of the network and, possibly, centralized administration savins overhead. An increased profile will provide larger jobs and grow the workforce. Retrofit the homes to be environmentally certified, qualifying for additional NYSERDA funding, in addition, this would provide training ?labs? for the green jobs initiative
Albany	Albany County, Vacant Building Green Rehab Grant Program	$4,000,000	DHCR	Albany County, Vacant Building Green Rehab Grant Program Program has been developed to provide forgivable grants and low-interest loans to individuals who purchase vacant buildings in targeted neighborhoods and rehabilitate them to green building standards. Project will not only spur considerable reinvestment in Albany's inner-city neighborhoods through the active reclamation of vital housing stock, but will greatly assist the local economy and the development of green jobs sector by utilizing green building and rehabilitation methods.
Albany	Albany County, Downtown Residential Construction & Adaptive Re-use Pro	$10,000,000	DHCR	Albany County, Downtown Residential Construction & Adaptive Re-use Program Construction of new or rehabilitation of older, underutilized buildings for conversion to downtown quality housing. Projects will utilize green technology and help promote the development of the green job sector Diversify downtown to include a more vibrant mix of businesses, residential, retail, cultural, and waterfront recreation. Albany must build the 24-hour/7-day-a-week vitality that cities need if they expect to attract diverse businesses and people to their urban cores.
Albany	Albany County, Vacant Building Targeted Stabilization Program	$4,000,000	DHCR	Albany County, Vacant Building Targeted Stabilization Program Stabilize or ""mothball"" one third of the vacant and abandoned properties in the City of Albany (300 buildings) for future productive residential and commercial reuse. Remove the blight effect on neighborhoods, reduce crime, and drastically increase nearby property val
Albany	Albany County, Academy Lofts: St. Joseph's Academy	$10,500,000	DHCR	Albany County, Academy Lofts: St. Joseph's Academy Located in an economically distressed area, the 25 studio and 1-bedroom apartments would be offered at affordable rents and provide 12,000 square foot arts and culture center for the purpose of developing the artistic talents of the community residents. North Swan Street is undergoing reinvestment in the amount of $6.1M in the form of new storefronts with residences above. County	Project	Requested $	State Agency	Additional Detail
Albany	Public Housing Retrofitting	$1,000,000,000	DHCR	President Barack Obama is planning to provide 800 billion dollars to boost the American economy. In our own state of New York, we will be receiving 24.6 billion dollars to help locally. There are many places in which this money should be spread to manufacture its greatest way to benefit or economy. One place in which we believe is important to repair is within public housing retrofits. It is important that we modernize areas that are in desperate need of repair. We are unable to produce a sturdy community without strong buildings. Within these improved buildings we must acquire new utilities and foundations. With these improvements we would be able to provide homes for the homeless and people that are currently unavailable to afford it and make sure that these homes are safe, fix unsafe public buildings, create several jobs, and create more visibly appealing towns and cities. With all this work that is to be done, many jobs must be created. With the current economic situation, creating jobs like thisrs, carpenters, and much more.
Albany	Implementation of Electronic Health records in Hospital and Faculty Practic	$24,000,000	DOH	Albany Medical Center has initiated a multi-year plan to implement electronic health records and patient care management systems in its hospital and faculty practice. The systems will enhance quality of care and, eventually, enable the medical center andfaculty practice physicians to participate in health data exchange efforts. Planned capital investment in health care information technology total nearly $24 million for 2009-2010. Nearly $10 million was invested in these efforts in 2008 alone. Timeline: Certain lements of the hospital based electronic systems have gone into effect annually since 2006. This request includes many new capabilities. Further, the practice based EHR is to go live in April 2009. This request is to support continued buildoutof high end capabilities across all clinics for two years,
Albany	Albany Medical Center	$12,000,000	DOH	Implementation of Electronic Health records in Hospital and Faculty Practice
Albany	Whitney M. Young, Jr. Health Center	$487,500	DOH	Renovate New Facility in Arbor Hill Community
Albany	Expansion of NYS genetics programs	$1,500,000	DOH	New York State Genetic Services Program (NYS DOH- Wadsworth Center) must expand to assure that New York State residents have access to trained genetic counselors. ?Personalized medicine is poised to transform healthcare over the next several decades? (PMC2007). The era of generalized medicine will be replaced by coordinated use of family health history and a person?s genetic profile to design personalized health care plan. A successful transformation requires a solid infrastructure in access to trainedgenetic professionals, specifically genetic counselors. The medical community must be supported as our genetics knowledge increases exponentially. Resources must be available to accommodate the needs of New York State patients and their medical practitioner in utilizing personalized medicine concepts for everyday patient care.
Albany	Capital District Adult Genetics Program	$100,000	DOH	Community based genetic services is an innovative service delivery model that integrates access to trained genetic professionals, genetic education and genetic counseling into daily medical practice. Genetic information and genetic testing is no longer limited to specialty medical practices. The era of personalized medicine has unfolded and Capital District community physician recognize the need to adapt and use advances in medical genetics knowledge. New genetic tests provide options for adults to impact their risk and burden of chronic illness through family history risk assessment and predisposition genetic testing cancer, heart disease, dementia). Genetic counselors must be available to respond to the requests of Capital District patients and theirmedical practitioner in utilizing personalized medicine concepts for wellness. The collaborative relationship between trained genetic counselor and community physician has been initiated in the Capital District through the Community Based Genetics Progr

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Albany	Children's Mental Health Family Resource and Support Center	$250,000	DOH	The Colonie Outreach Center provides family support to the Children's Mental Health System of Care in Albany by providing information, advocacy, referrals and cross-systems colaboration to families of children with serious emotional difficulties. We particularly partner with the Juvenile Justice System for correct identification and support of mental health needs and the Educational System for information and family and youth support. We have a peer to peer concept of empowerment for both parents and youth by employing families and youth with previous or current mental health involvement. Our projected outcomes is to keep children in the community with proper supports and out of mental hospitals or juvenile detention facilities. Our center has also become a community information center for general information about the county and services provided in other systems (Developmental disabilities, Early Intervention, Social Services etc.) We are currently funded under a grant from the federal govt. which h
Albany	Job Creation Through Nursing Homes	$100,000,000	DOL	The state needs to plan for the increase in attendance at nursing homes, due to the fact that Baby Boomers are reaching an age where they can no longer live at home independently. With the need to create new nursing homes, many job types will be available. For example, this proposal would create potential jobs for nurses, nutritionists, supervisors, cleaning staff, speech pathologists, occupational and physical therapists. Not only would the state gain revenue from the assisted living programs, but theywould also gain money by expanding the current ?Meals on Wheels? program for seniors who are not yet comfortable leaving their homes. Occupational therapists who work in nursing care facilities earn an average salary of $65,540 per year. The average forphysical therapists is $69,788, the average for a RN is $41,642, and Registered Dieticians working full time in nursing homes in NY have an annual salary of $41,000. By creating more of these well paying jobs, people will begin to feel confident enough

County	Project	Requested $	State Agency	Additional Detail
Albany	State Street Rehabilitation & Streetscape Project	$4,000,000	DOT	State Street is the main gateway through downtown Albany and has the historic State Capitol as its terminal vista. The project limit is State Street from Eagle Street to Broadway and the proposed improvements include new sidewalks and granite curbing including the installation of drop curbing as necessary, rehabilitation of State Street pavement, new street trees along with decorative tree grating, enhancement of an existing planted areas and medians, new streetscape pedestrian crossing(s) and striping,new amenities including benches, wall, bike racks, civic art, bollards, signage, and garbage receptacles. Green technologies will be used throughout the project.
Albany	North Swan Street Rehabilitaton, Streetscape & Park Project	$2,500,000	DOT	This project will balance the needs of all transportation modes while enhancing the appearance of North Swan Street to help continue the investment in the Arbor Hill neighborhood and attract people to the redeveloped commercial/cultural corridor. The project includes street resurfacing and striping of traffic and parking lanes, partial concrete sidewalk installation and curb replacement, pedestrian crossing improvements, landscaped medians at selected intersections, public park rehabilitation, additional street trees, bicycle facilities, traditional street lighting, and traffic signalization upgrades. While the immediate project goals may be to replace the deteriorated sidewalks and roadway, and to clean up the street, the long-term intent is that thiswill help to spur further growth and development on a wider scale. The Arbor Hill Neighborhood Plan identified North Swan Street as a key priority and the North Swam Multimodal Study provided a cost estimate for this project. Planning & preliminary desi

County	Project	Requested $	State Agency	Additional Detail
Albany	Albany County, Fuller Road/Washington Avenue Extension Reconstruction	$16,000,000	DOT	Albany County, Fuller Road/Washington Avenue Extension Reconstruction, Albany -- This project will reconstruct Fuller Road including an intersection improvement project at Washington Avenue and free up 11.3 acres of prime property immediately adjacent tothe CNSE Albany NanoTech Complex for future development. The intersection is currently failing to handle the ever increasing traffic volume, and an unacceptable number of accidents occur there each year. Project objectives are to improve traffic flows,promote economic development, enhance air quality, reduce noise, and ensure safety for vehicles, pedestrians, and bicycles. The estimated total cost of the project is $30,000,000. Albany County has $15,000,000 in bond funding, CDTC has $2,000,000 in federal funding, leaving a gap of $16,000,000. Availability of 11.3 acres for CNSE to implement its next phase of buildings, facilities, and infrastructure will result in the creation of 1000 new high tech jobs and over $1 billion in private investments wi
Albany	Albany County, Albany Port Wharf Replacement, Rail and Stabilization Proj	$1,000,000	DOT	Albany County, Albany Port Wharf Replacement, Rail and Stabilization Project -- A complete modernization of the facility including replacement of 1000 feet of existing wharf and construction of 700 feet of additional rail road. The project is estimatedto cost $8,800,000 and the Port Commission has committed $800,000 in its own funds toward that total. A financing gap of $8,000,000 remains. The original wharf facility was built prior to WWII and is antiquated. The improvements will allow the Port to better support modern maritime cargo needs and provide better global access for upstate New York. The project will retain 120 jobs at the Port and create an additional 15 positions

Albany	Menands Water/Sewer	$8,500,000	EFC	The Village of Menands, NY has been engaged in accessing, prioritizing and designating a substantial amount of water, sanitary sewer and storm water sewer needs since 2002. In 2004 and again in 2006, the Village was cited by NYS DEC as needing to address
Albany	CSBPP - Combined Sewage Backup Prevention Plan	$3,500,000	EFC	Submission* No* Bradford*Burns*City of Albany*Assistant Corporation Counsel*24 Eagle Street*Albany*New York*12207*518-434-5050* burnsb@ci.albany.ny.us*CSBPP - Combined Sewage Backup Prevention Plan*Infrastructure*Infrastructure General/Other* Additional
Albany	Residential Backflow Prevention Valve Installation	$4,000,000	EFC	The City of Albany has had an increase in the number of heavy storms, which overwhelm its existing storm sewer capacity. Backwater valves have been recommended by both independently-contracted and City-employed engineers as a solution to help prevent sewer and storm water back-ups in residential areas. This program provides grants to residents for the installation of backwater valves to prevent sewer backups into residences. Grants range from $1,000 to $1,500 for qualified residents.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Albany	Loudonville Reservoir LT2ESWTR	$950,000	EFC	The Loudonville Reservoir project is designed to expand the amount of water available to the City during emergencies. Although the reservoir holds 210 million gallons of water, only 27 million gallons would be able to meet the new Federal quality standards for open basins. With this additional project, another 180 million gallons of water would be available to the City in the event of an emergency - a full 10 day supply
Albany	Municipal Water/Wastewater System Infrastructure Projects	$25,514,000	EFC	With 55 miles of the City's water mains from the 19th century, and some sewer lines dating before the Civil War, a number of infrastructure projects will provide a much-needed update and upgrade for many of the City's most-taxed lines.

County	Project	Requested $	State Agency	Additional Detail
Albany	Water Security-Stony Creek Reservoir	$0	EFC	Water Security-Stony Creek Reservoir
Albany	City of Watervliet	$400,000	EFC	Filtration Plan Aluminum Sludge Lagoon Reconstruction
Albany	City of Watervliet	$15,000,000	EFC	Normanskill Water Treatment Facility
Albany	Cohoes (180 days)	$200,000	EFC	Pump Station upgrades
Albany	Cohoes (180 days)	$750,000	EFC	Vliet St waterline
Albany	Albany County - Sewer District	$1,100,000	EFC	North & South Plant Fine Screen Replacement
Albany	City of Watervliet	$85,000	EFC	Pressure Regulation for Emergency Interconnect
Albany	City of Watervliet	$50,000	EFC	Water Storage Tank Repair and Upgrade
Albany	City of Watervliet	$400,000	EFC	Water Main Replacement
Albany	Albany County - Sewer District	$9,400,000	EFC	North & South Plant Sewer Disinfection
Albany	Water Distribution upgrades	$1,200,000	EFC	Water Distribution upgrades
Albany	Storm water seperation projects	$700,000	EFC	Storm water seperation projects
Albany	Sewer pump station upgrade	$900,000	EFC	Sewer pump station upgrade
Albany	Effluent Disinfection Project	$150,000	EFC	The State Pollutant Discharge Elimination System has required the implenation of effluent disinfection of sewage emptying into a tributary of the Hudson River as per the Hudson River Estuary Action Plan 2005 -2009 required by the NYS Dept. of Environmental Conservation.
Albany	South Albany Sewer District - Sand Filter Replacement	$435,000	EFC	Construction of a new sand filter wastewater treatment system to replace the actively failing wastewater treatement system. Sewer district under an order on consent with DEC to replace the filter. Sewer district contains 23 homes with low to moderate household income. The sewer district can't support of debt service for this project on top of operating expenses. Design could be fast-tracked to be ready to bid in 45 days.
Albany	Bethlehem Sewer Pump Station Improvements	$1,250,000	EFC	Replacement of 4 existing sanitary sewer pumping stations at various locations in the Town of Bethlehem. New stations will replace older failing infrastructure, some of which dates back to the 1930's. New pump stations will be more reliable and an improve energy efficiency through the use of variable frequency drives, efficient pump motors, and forcemain improvements. Design and permitting are complete, and the project is currently out for bid.
Albany	Pump Station SCADA Implementation	$1,400,000	EFC	Implementation of a supervisory control and data acquisition system for 37 sewer pumping stations throughout the Town of Bethlehem. This new computer system will allow the Town to monitor and control all pump stations from a central office location and improve operational efficiency in the field. Design report for this project has been completed and Town is in the process of awarding design to an engineering consultant.
Albany	Bethlehem Wastewater Treatment Plant Upgrade	$15,000,000	EFC	The town's wastewater treatment plant is over 35 years old and is approaching its design capacity of 4.9 MGD. Given the age of the plant and potential future growth the town has begun a master planning study for significant upgrades to the WWTP to add capacity, improve reliability and treatment levels, and improve the plant's energy efficiency. The cost of a significant WWTP at this site is approximately $15M.
Albany	Sewer Improvements to Delaware Avenue Pump Station and Sewer Re-rou	$2,500,000	EFC	The project includes re-routing and upsizing approximately 8,000 linear feet of gravity and pressure sewers and renewing a 1.5 MGD pumping station to address existing capacity constraints and accomodate proposed additional flows from future development projects, including the Vista Technology Campus.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Albany	Water Tank Replacement - South Albany Water District	$250,000	EFC	Replacement of an existing 10,000 gallon underground water storage tank, associated storage facility improvements, and well security improvements. A comprehensive tank inspection has been completed and identified that the tank is beyond its service lifeand requires replacement. The existing water district includes approximately 20 homes of low to moderate household income. This district can not support the cost of this capital project and maintain service costs below the target service charge in the DWSRF IUP. Outside funding is needed to subsidize the costs.
Albany	Water Tank Improvements - Water District No. 1	$2,000,000	EFC	The Town has completed a comprehensive inspection of all water tanks in our water system. This project would address the recoating and rehabilitation needs of 7 water tanks (approximately 10 MG of storage) in the water system based on the findings of these inspections.
Albany	Columbia County, Construction of needed water tank in the Columbia Coun	$500,000	EFC	Columbia County, Construction of needed water tank in the Columbia County -owned Gerald Simons Commerce Park Columbia County is having difficulty selling lots in the Commerce Park due to insufficient water flow for fire protection within the park. The lack of water tower is also limiting the County's ability to add 33 additional acres to the park.
Albany	Albany County, Backwater Valve Grant Program	$4,000,000	EFC	Albany County, Backwater Valve Grant Program Heavy storms overwhelm its existing storm sewer capacity. Installation of backwater valves help prevent sewer and storm water back-ups in residential areas.
Albany	Minority Contractor Network	$100,000	ESD	Project will centralized and standardize administration, marketing and quality of local contractors to enable, primarily minorities, to develop high level construction skills, competitive bidding, increased stability and quality of work, and lower overhe
Albany	Creating Jobs for Municipal Public Works	$150,000	ESD	Creating Jobs for Municipal Public Works The economic impact of this project creates jobs for data collection activities on roadways and system operator personnel for MUNICIPALITIES across NYS. Following the latest FHWA standard, the project will collect
Albany	Waterfront Square	$40,000,000	ESD	Rehabilatation of a 500,000 sq ft 11 story buildiung in downtown Albany. The building was purchased 2 years ago and we have plans to convert to mixed use. Retail, office and residental with the possibility of a hotel.
Albany	Arsenal Green Cogen Project	$25,000,000	ESD	This project will create a new ""green"" cogeneration power plant at Watervliet Arsenal. It will (1) lower power abnd steam costs signficantly (20%) for the Arsenal facility and for its commercial and government tenants; (2) create 250 construction jobsand 21 management and maintenance jobs, and help secure more than 800 defense jobs at the Arsenal; and (3) it will help attract even more high tech companies to the Arsenal technology campus. Finally, it will kick-start the development of 62 new acres tobe leased to the Partnership for developme
Albany	Downtown Residential Construction & Adaptive Re-use Program	$10,000,000	ESD	Downtown Residential Construction & Adaptive Re-use Program - Program funding would enable construction of new or rehabilitation of older, underutilized buildings for conversion to downtown quality housing. Downtown has 800,000 square feet of vacant or underused space that is ideal for adaptive re-use. Recent market study shows demand for downtown housing. This program provides financial incentives to developers in the form of low interest revolving loans and grants. Numerous projects have been identified and have received municipal approval and will be ready to proceed within 30 to 90 days. Projects will utilize green technology and help promote the development of the green job sector. Diversify downtown to include a more vibrant mix of businesses, residential, retail, cultural, and waterfront recreation. Adaptively reusing underutilized buildings to create more modern space is necessary to achieve this goal. One of the most important strategic initiatives involves diversifying the mix of businesses

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Albany	Strategic Neighborhood Redevelopment	$20,000,000	ESD	This project intends to provide funding for acquisition, demolition, rehabilitation, and infill development in districts that are presently blighted with vacant and underutilized structures. Vacant buildings and underutilized lots have been identified for rehabilitation and/or infill development. This is key to reversing disinvestment in Albany because rundown properties lower values for neighbors, attract criminal activity, pose a physical threat to the community and discourage private investment. Thecity must make it easier for potential homeowners and landlords to buy property, invest in buildings, preserve their personal investments, and even earn a return. This initiative is projected to leverage an estimated $60 million in additional investmentin Albany's most distressed neighborhoods.
Albany	Port of Albany Wharf Replacement/Stabilization & Rail Expansion Project	$1,000,000	ESD	The Port of Albany is a word-class facility, economic engine for the region and employs hundreds of people. Funding is currently needed to completely renovate the dock and wharf at the Albany Port District Commission would enable the facility to continueto be a maritime hub for the Northeastern portion of the United States. In the maritime industry, vessels are becoming larger as well as cargo handled. These improvements will enable the Port to handle the larger vessels for the 21st century. The project is currently underway, but stimulus funds are needed to close funding gap.
Albany	Convention Center	$230,000,000	ESD	The Albany Convention Center Authority (ACCA) has developed a Convention Center Project concept plan to build a 266,000 square foot green facility. The plan current plan separates the convention facility, parking garage and hotel into three distinct elements, with the parking garage and hotel to be built by private developers. The project is expected to attract 100,000 to 185,000 people to Albany annually, thereby contributing to economic activity and job growth. The State of New York has committed $75Mto the project. The ACCA has completed the following for this major civic infrastructure project: final planning and design documents, EIS, market study, archaeological, infrastructure mapping and analysis. A new convention center in downtown Albany isexpected to spur significant additional investment and development.
Albany	Vista Technology Park	$6,300,000	ESD	Approximately 5,000 lf of road, sewer and water necessary to access 1.4 million square feet of approved technology and office space in the County of Albany. In addition several upgrades will have to be made to the municipalities? sewer, water and storm systems (offsite). Area power supply upgrades are also necessary (transmission level service).
Albany	Intelligent Transfer Station/Clean Energy for Cement Plants	$15,000,000	ESD	We plan to build an Intelligent Transfer Station? (ITS) to recycle, through its natural bio-drying system, solid municipal waste into clean, odorless, dry, renewable fuel called Amabilis?. This sustainable technology was developed by ECODECO, a subsidiary of A2A, Italy?s largest environmentally-friendly energy-producing company. The ITS system has been successfully implemented throughout Europe. This proven clean-energy technology is the answer to transform obsolete waste into energy structures. It takes 14 days for the ITS to transform solid waste into Amabilis?, a stable and efficient fuel. Amabilis? can then be used to provide clean renewable energy from dedicated combustion plants (thermal & electrical); in bioreactors to produce biogas, in industrial plants (such as cement plants), as an alternative to coal. The current proposal is to produce Amabilis? as a clean alternative fuel source for local cement plants. ITS facilities currently operate in England (a major ITS is located in the heart of Look forward to introducing the next age of green renewable energy and waste treatment to the United States and are excited to begin in New York

Increasing University ""tech"" presence on the campus is basic element of plans for private sector development p
Albany	Albany County, Albany Convention Center Authority - Development of a 266	$225,000,000	ESD	Albany County, Albany Convention Center Authority - Development of a 266,000 square foot convention center in the City of Albany To meet an immediate need for convention space within the capital of New York and to fulfill the mission of a State Authority. Project authorized in 2006-2007 NYS budget. Economic development of an urban center. Economic stimulus for the Capital Region.
Albany	Community Economic Development Lending in the Capital Region	$1,000,000	ESD	The Capital District Community Loan Fund, Inc. (CDCLF) is a nonprofit financial institution with a community economic development mission. We are certified by the U.S. Department of Treasury as a Community Development Financial Institution (CDFI). Since1985, we have pooled capital from socially concerned individual and institutional donors and investors to stimulate positive economic growth in the Capital Region of New York State. Our financial institution is well-established and currently poised for substantial growth to meet growing economic development needs. As you will see below, funding from NYS at this pivotal time will produce immediate economic and social dividends and leverage additional private and public resources to meet today?s economicchallenges. We have a proven track record of managing private and public funds in a highly efficient, productive and accountable manner. We are driven by our desire to make capital accessible to people and communities in need, we have a deep understandintotaling over $21 million, and resulting in over 135 small businesses/micro enterprises started or expanded, over 800 jobs created or retained, over 110 commercial facilities purchased or renovated, and over 680 units of affordable housing created or preomplements its lending activities with training and technical assistance services that include classroom training, specialized trainings, financial literacy and matched savings programs, one-on-one consultations, legal clinics, networking, and referrals.
Albany	Project Modern Enterprise	$100,000,000	ESD	Good Afternoon Might I suggest a project focused toward small start up business owner in the capital region area. Target women of color,minorities,startup companies who need computer equipment,printer,desk,chairs and high speed internet access. This canbe given or credited to the startup business through voucher at dept stores. Staples,Best,buy,Overstock,Amazon,ect.

Albany	National Grid Natural Gas Distribution	$22,300,000	NYPA	Shovel ready projects to improve natural gas distribution in New York State.
Albany	City of Watervliet	$12,500,000	NYPA	Delta Dam Hydorelectric Project
Albany	Albany	$2,000,000	NYPA	Times Union Center - NYPA energy conservation program
Albany	Albany County, PERC Project No. 13, Green Island Expansion of Hydroelec	$50,000,000	NYPA	Albany County, PERC Project No. 13, Green Island Expansion of Hydroelectric Station The existing facility is equipped with an operating capacity of six megawatts (MW). The expansion of this site to a total capacity of 32 MW will more than triple annualproduction from the current level of 45,000,000 kilowatt-hours (kWh) to approximately 150,000,000 kWh. Green Island Power Authority will use this renewable power to foster additional economic development opportunities in and around the Green Island Community.
Albany	Ultracompact low cost membraneless fuel cell engine chips	$5,000,000	NYSERDA	Fuel cells still hold the potential to offer a good alternative to backup power, remote installations and battery based portable applications due to the high density of energy stored in most of the common fuels. Unfortunately, this alone is not enough to
Albany	Habitat SIPS	$500,000	NYSERDA	Habitat will develop a Structurally Insulated Panel Systems line of business to reduce our own construction costs for energy efficient and sustainable wall and roof panels, as well as market the product to other Habitat affiliates throughout the State ofNY and small housing construction developers
Albany	Municipal Building & Infrastructure: Alternative Energy Retrofits	$8,000,000	NYSERDA	This comprehensive energy program will increase the energy efficiency of 18 municipal buildings through such measures as: chiller replacement, installation of energy efficient windows & lighting, installation of increased insulation, and HVAC updates and replacement. Additionally, alternative energy technology will be installed on selected municipal buildings to generate energy via solar thermal and solar electrical means. An energy audit was completed in January 2009 and this project will generate a tremendous number of green jobs, as well as reduce municipal greenhouse gas emissions and save considerable tax dollars in energy costs.
Albany	Muncicipal Fleet Diesel Retrofits & Upgrade	$1,000,000	NYSERDA	The city fleet is one of the largest sectors of municipal operations and is therefore a significant user of energy. As a result, the city fleet is one of the largest emitters of greenhouse gases. The Municipal Fleet Diesel Retrofits & Upgrade Program hasbeen developed to systematically retrofit all city diesel vehicles with the latest technology in order to maintain the most energy efficient fleet possible, while at the same time reducing the emissions of carbon dioxide and other greenhouse gases.
Albany	Energy Audit Upgrade Implementation	$0	NYSERDA	Energy Audit Upgrade Implementation
Albany	Town Hall Improvements	$0	NYSERDA	Town Hall Improvements
Albany	Heating System - Youth Bureau	$0	NYSERDA	Heating System - Youth Bureau

Albany	Construction of Cogeneration Power Plant	$0	NYSERDA	This project will create a new steam and electric power plant at the US Army's Watervliet Arsenal. It will replace an inefficient oil-fueled steam boiler system. The project will build a new natural gas and bio-mass fueled cogeneration steam and electricity plant. Lower by at least 20 cents the cost of electricity to the mility missions, commercial/gov't tenants and employ more than 1250 people on site.
Albany	FERC Project No. 13 Green Island Expansion of Hydroelectric Station	$0	NYSERDA	This is a project to expand the existing Green Island Hyroelectric Station
Albany	Green"" Cogeneration Power Pla	$0	NYSERDA	Create a new steam and electric power plant at the Watervliet Arsenal
Albany	Albany County, Municipal Fleet Diesel Retrofits & Upgrade Program -	$1,000,000	NYSERDA	Albany County, Municipal Fleet Diesel Retrofits & Upgrade Program - Systematically retrofit all city diesel vehicles with the latest technology in order to maintain the most energy efficient fleet possible, while at the same time reducing the emissionsof carbon dioxide ando ther greenhouse gases.
Albany	Albany County, Municipal Buildings and Infrastructure: Energy Efficiency an	$8,000,000	NYSERDA	Albany County, Municipal Buildings and Infrastructure: Energy Efficiency and Alternative Energy Retrofits This comprehensive energy program will increase the energy efficiency of 18 municipal buildings. Additionally, alternative energy technology will be installed on selected municipal buildings to generate energy via colar thermal and solar electrical means. Project will generate a tremendous number of green jobs, as well as reduce municipal greenhouse gas emissions and save considerable tax dollarsin energy costs.
Albany	Canaday Hill Road Renewable Energy	$100,000	NYSERDA	My husband and I have 40 acres of unused farmland in the town of Berne. The land is very windy and would be ideal for a windfarm. We would like to begin by building a small windfarm that would supply sustainable lowcost energy to the town with enough energy to sell energy to the national grid. We envision the benefits to ourselves and our town as being long term lowcost sustainable energy. We anticipate the sale of energy would pay the salary of the people needed to maintain the machinery.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Albany	Families Together in Albany County	$200,000	OCFS	In short, the child and family-serving system in New York State is in crisis and in urgent need of reform. Children at risk are not being adequately protected, and they and their families are not receiving services that they need. One way to address these issues is by providing affected families with a ?veteran parent? or ?Parent Partner?. In 2004 Albany County received a grant from SAMSHA to develop a family-driven system of care for children with social, emotional and behavioral challenges. Albany County contracted with Families Together in New York State to create the Families Together in Albany County program and hire parent partners who had experienced raising children with special needs. These parents were trained in the Family Support principlesof strength-based, culturally competent, individualized planning to assist youth, children and their families. Early data shows* ? 72% of families served are at or below the poverty line. ? Parents involved in Family Support report a reduction in financd experiencing financial strain. After 12 months in the program, only 23% parents reported experiencing financial strain. ? 97% of families labeled by child welfare, probation and schools as ?un-engageable? became engaged with a Parent Partner and playedheir child?s service planning and delivery process. ? Ongoing relationships between families and their Parent Partners promotes trust and increases the likelihood that offers of support will be accepted. ? Parent Partners offer parents a positive source

Albany	Whitney M. Young, Jr. Health Center	$150,000	OFT	New Telephone System
Albany	Library to Double Public Computing	$500,000	OFT	Support is needed for wireless service, Internet access with ample bandwidth, computers, servers, routers, and modems for each of the five (5) new libraries under construction in Albany, New York. The Albany Public Library (APL) is the primary destination in the city for free computer and Internet access with over 138,500 users of public Internet computers in 2008. We currently have 71 public computers at five (5) open libraries. By the summer of 2010 expect to more than double that with 160 public computers available to adults, teens and children at seven (7) open libraries. The Albany Public Library is constructing five (5) new urban libraries in the city of Albany due to aging and insufficient buildings and an exponential increase in library usage by the public (813,000 visits in 2008). In 2007, city residents approved a bond act to renovate and build five (5) branch libraries in Arbor Hill/West Hill, the South End, and the New Scotland, Delaware and Pine Hills neighborhoods, serving neighborhoods10. All five libraries will be ?green? buildings with LEED Certification, two libraries will have geothermal heating and cooling and four libraries will maximize daylight with atriums, monitors and skylights. W/MBE goals are at 20% (we?re currently realials are at 17% (we?re currently realizing 16% before the majority of labor is on site).

County	Project	Requested $	State Agency	Additional Detail
Albany	East Berne Fire Station	$1,500,000	OHS	Replace a aging and out dated fire station. The current station does not meet current standards, and because of the tax base the district can not afford to build a updated station.
Albany	Schuyler Heights Fire Station	$3,000,000	OHS	Current fire station has seen it's life expectancy and the cost of heating is astronomical and it does have the room for newer stykle fire apparatus and the curremnt station is land locked which leave no available parking. We working working with NYSDECto cleanup land we had purrchase in a brownfield environment when the funding dried up, this put the project on hold.
Albany	City of Watervliet	$5,000,000	OHS	Arsental Joint Public Safety Facility
Albany	Albany - Sheriff's Office	$3,800,000	OHS	Rice Building
Albany	Albany - Sheriff's Office	$6,200,000	OHS	Emergency service building
Albany	Coeymans Hollow Fire House Project	$3,950,000	OHS	Our shovel ready project consist of the demolition of an existing old, unsafe and outdated fire station, portions of which date back to the 1800?s and the construction of a brand new one that is in compliance with all Federal & State laws and regulations. The floor plan for our new station is 15,720 gross square feet. We will demolish the existing station starting with the removal of the hazardous materials that are in it. A modern five bay two story brick-and-mortar station with a community/ training /emergency shelter room will be built on the same site replacing the existing cramped four bay station. Hazards threading the lives of our volunteer members will be removed - asbestos in the structure and carcinogenic fumes emitting from the emergency vehicles will no longer be present. The station will be handicapped accessible and have a kitchen, bathrooms and other necessities to comfortable house the taxpaying public during times of disaster. The station used as a polling place will be better equipp
Albany	Professional Fire Fighters Association	$0	OHS	Is requesting that sufficient funds be put aside to provide for the cities, villages and fire districts that can demonstrate a need for additional monies to maintain the standards of health, safety and security that the citizens of New York expect and deserve
Albany	St. Margaret's Center Expansion Project	$1,700,000	OMR	This project consists of the construction of a two-story expansion of the St. Margaret's Center by 20,000 quare feet. St. Margaret's Center is operated by the Center for Disability Services and is the only free-standing, long-term care facility in New York State dedicated to caring for the neurologically impaired and medically fragile infants, childre, and young adults. The project will increase the number of children served from 58 to 94. The new beds will meet both a community and statewide need for such specialty care. The project is shovel ready and will have a beneficial impact on the economy, job creation, healthcare and the advancement of health information technology which is consistent with the intent of the stimulus package.
Albany	Center for Disability Services expanded facility	$2,500,000	OMR	Build a new 88,000 sq ft building to repace the current inadequate facilities. A second phase would create a residential school.
Albany	JB Thacher SP - Water Storage Area Rehabilitation	$300,000	OPRHP	
Albany	JB Thacher SP - Rehabilitate Water Supply Filter	$250,000	OPRHP

County	Project	Requested $	State Agency	Additional Detail
Albany	USS SLATER Permanent Mooring	$400,000	OPRHP	A critical requirement for the permanent preservation of the USS SLATER is construction of a permanent mooring and ice protection system on the Albany side of the Hudson River at the Steamboat Square. We have received a 300K matching grant from NYS OPRHPwhich is about half the funds we need. The mooring portion of the project calls for the design, permitting and construction of a permanent mooring for the USS SLATER as part of the Corning Preserve riverfront development in Albany, New York. Presently the vessel is moored seasonally off Steamboat Square at the foot of Madison Avenue in Albany, New York. The temporary mooring of the USS SLATER consists of sixteen four-ton deteriorating waterlogged camels (rafts) that are shackled together to hold the ship in deep water off the seawall. These must be lifted onto the river and shackled together each spring, and removed by crane each fall, in an operation that is very hazardous to SLATER?s elderly volunteers. The ship itself is held in place by mooring liand an additional hazard to the ship and the crew. The construction of the permanent mooring and ice protection system will solve the following problems: Current Mooring System Failure ? The SLATER requires the new system due to the rapid deteriorationng system. The SLATER is held away from the sea wall by 16 mooring ?camels,? each weighing four tons. The camels are shackled together to form two 24ft.x20ft. rafts that hold the ship off the wall and keep it in sufficiently deep water. During the first
Albany	Corning Preserve Phase 2: Ampitheater & Festival Space	$6,500,000	OPRHP	The Corning Preserve is the jewel of downtown Albany and completion of this project will provide a significantly expanded preserve that provides extensive community and recreational space that enhances the environmental quality of the Hudson River and further advances the continued redevelopment of Downtown Albany. The project also includes the restoration of an ecologically vital wetland park located in the low-income Arbor Hill neighborhood, which will expand recreational and educational opportunitiesfor inner-city residents. The project will promote green jobs, as the park will be designed in accordance with American Society of Landscape Architects Sustainable Site Initiatives.
Albany	Hoffman Park Development	$2,000,000	OPRHP	Hoffman Park is a 26-acre park located in South Albany that is home to numerous sports leagues. Plans have been developed to transform the existing underutilized parkland into state of the art athletic facilities for collegiate and public use, includingbaseball, softball, and soccer fields, as well as other leisure facilities. This is a true public-private partnership with the City of Albany partnering with the College of St. Rose on this project. The project will not only allow the College and City tobenefit from these new collegiate quality facilities, but will allow all citizens of Albany to utilize and benefit from these amenities as well.
Albany	Bleecker Stadium Renovation Project	$4,250,000	OPRHP	This stadium is a multi-purpose sports complex of ten acres. It includes a professional size baseball diamond, a football-soccer field, a softball field and a large field house, which is also used as the City's summer youth employment office in the spring and summer months. Several youth and adult leagues, as well as area highschools and colleges, utilize this facility for their home games. Seating 7,000 people for football and soccer and 2,000 for baseball, it also offers lockers, showers, press boxesand a public address system to accommodate all particpants. The stadium has recently undergone partial renovation. This project, phase two of the renovation would install synthetic turf for the fields and erect new stadium lighting. These improvements will not only benefit direct users of the stadium, but will renovate the most important community asset in one of the City's most distressed neighborhoods.

County	Project	Requested $	State Agency	Additional Detail
Albany	Arbor Hill Outdoor Innovation Camp	$250,000	SED	From July 6th-22nd (tentative date), Arbor Hill community 3rd-8th graders will engage in local outdoor exploration and enrichment activities. The two and a half week session will build on scientific enrichment and community exposure- in addition to individual and group skill motivational training, the program bridges together: parents, area volunteers, local environmentalist groups and community organizations. Local private partnerships are invited to expand the support and scope of the program mission.The theme of Responsibility, Awareness, Research and Recreation (RARe) allows participants to visit parks, lakes and technology facilities exploring how the world we all live in works. As a community volunteer and educator, there is desire from our youth to understand the world outside of their city streets. New York State is known for its green and resourceful landscapes, participants can visit places like Thatcher Park, Taconic Crest trail, college and university labs, NYSERDA facilities, and the Fivgrade students, parents would be encouraged to participate in some creative writing and team building activities. I believe that parents are a key component to the success of our children, and their engagement and exposure increases parental involvementThe final layout will include environmentalist and community input, however the current plan involves: creative writing, fishing and trail exploration, outdoor fitness, scientific research, capacity building and non-violent solutions. The overall vision
Albany	Training program for undergraduate teaching of science.	$130,000	SED	The overall goal of the proposal would be to improve our ability to teach physiology labs by 1) Working with a ""teaching"" post-doctoral fellow and six summer interns to build a suite of labs, and to train a post-doc to work to build an active undergraduate level research program; 2) Investing in digital physiographs. Traditional Post-doctoral experiences are research centered, and generally do not train post-docs in developing and conducting research at the undergraduate level. Our proposed program will aim to better prepare a post-doctoral fellow to teach at an undergraduate institute. Although traditional labs are useful, flexibility and introduction of student driven lab design enhance effectiveness of laboratory exercises Digital physiographs, provide a relatively inexpensive way to measure many physiological parameters -- essential to building flexibility lab design. Building a suite of laboratory exercises is time consuming, but allows a fall-back position or more hopefully a starting point fo,000 7 Laptop computers $5,000 Laboratory Equipment $5,000 Travel Funds Over two yea
Albany	Wellness Center Project	$12,000,000	SED	The Sidney Albert Albany Jewish Community Center has been a steadfast community institution, serving those in the greater Capital District for over 85 years and providing an inclusive and nurturing environment for all who step through our doors. We operate the largest early childhood center in the Capital District with programs for children from eight weeks to first grade. We provide programs for school age children Kindergarten through sixth grade, both onsite and at two satellite sites, the Albany School for Humanities and the Montessori Magnet School. We provide a variety of programs for seniors in our community including kosher meals and discussion groups. We also provide a fitness center with one indoor pool, two outdoor pools and state of the artexercise equipment as well as operating Camp Olam at Ce-Da-Ca for campers entering grades one through six. We are poised to make a number of improvements to our facility to create a world-class wellness center for the Capital District area that will incere wellness is incorporated into all aspects of the programs we offer so they?re not existing as organizational silos

County	Project	Requested $	State Agency	Additional Detail
Albany	Fair Trade School Days	$20,000	SED	To expand the highly successful Fair Trade Project, which is a partnership between New York State United Teachers and the NYS Labor-Religion Coalition. Fair Trade School Days will provide an engaging, educational experience that teaches social studies, math, consumer responsibility, science and human rights. Students are constantly appalled to discover the bitter truth that tens of thousands of children work in horrendous conditions in West Africa's cocoa industry ? to produce sweet chocolate. Studentsare then happy to learn about how certified Fair Trade products, such as chocolate, pays workers a living wage and uses environmentally sustaining practices that preserve biodiversity and eliminates pesticides. By writing letters to local business ownersurging them to increase their offering of Fair Trade products, students strengthen many skills. The New York State Labor Religion Coalition, a non-profit corporation, is seeking to maintain its Fair Trade Director and hire three coordinators who can trageneration learns how to create a win-win-win situation for businesses, consumers and the earth. This project will become self sustaining as revenue from Fair Trade sales are used to fund the Fair Trade Project.
Albany	Environmental Educational Video	$20,000	SED	To expand the highly successful Fair Trade Project with the New York State United Teachers? 600,000 members and thousands of New York State elementary and high school students through education and outreach. The New York State Labor Religion Coalition will create an educational video that illustrates the environmental destruction of forests, habitats, and increased pesticide pollution caused by ?technified agriculture?. This video will then portray how Fair Trade cooperatives practice sustainable agriculture, by eliminating pesticides, increasing composting, maintaining bio-diversity and promoting ?shade-grown? certified coffee. Students will also learn about the serious health risks linked to pesticides such as cancer, contrary to organic produce which contains more minerals and vitamins necessary for healthy development. The Fair Trade Project will specifically outreach to science and health educators and encourage them to use the video in their classes. However, Fair Trade also exemplifies the valuthe value of being a responsible consumer demanding more humane and more environmentally sensitive products.
Albany	Education for Homeless Children and Youth	$7,000	SED	Largely due to the economic and housing crisis, several school Districts across the country report increases in the number of homeless students in the classroom. Our president gave out $70 million for the Education of Homeless Children & Youth; there is$7 million available in the state of New York. Although $7 million seems to be not enough money so I would say there need?s to be more money to help the homeless children so that they can get a better education that will help our economy in the future. This plan consists of helping out the McKinney-Vento Act which ensures homeless children transportation to and from school free of charge, with their choice of what school they want to attend regardless of what district the family resides in. In our plan,we believe that these children need more than just a way to get to school. They also need proper clothing, nutrition, health care, school supplies, tutoring and psychological help. This plan will not only benefit these homeless children, but it will als
Albany	SPOTS	$70,000	SED	The economic crisis is causing many problems, one in which is the lack of education that is given to homeless children. To solve this problem we came up with a program called SPOTS. With this program we would like to have Schools Provide Our Teens with Success throughout their education. To do this SPOTS will provide teens with what they need to get a descent education for example clothes, school supplies, free or reduced breakfast and lunch, a after school program may also be created.

County	Project	Requested $	State Agency	Additional Detail
Albany	Fitness Center	$1,000,000	SED	Our proposal claims not only benefits to rebuild our powerhouse economy but also has its own health benefits. Another major issue the United States faces is obesity and poor health. Our bad food choice and lack our exercise are the main forces to this epidemic. It all can start in New York State with the construction of several new fitness centers available for public use. There are 55 counties in New York State. Each county will acquire at least one fitness/recreational center with regard to the county's population size. The project design will be energy efficient, environmentally sensitive, and be as natural or a green as possible to keep up with the ongoing green revolution. The facility will be approximately 60,000 square feet and depending on thepopulation some counties will have more than one. Counties with a small population will obviously have one fitness center located at the heart of each location while larger, more urban, counties will have 2-3 facilities. The new recreation center will alof opportunity for the taxpayers. There is intent of two gymnasiums, basketball court, 6-lane pool, indoor track, play area, lobby, an aerobics center, workout center with machinery, spa room, locker rooms, and utilities. Because of the amount of opporter will provide, there will be a great increase in job availability. Such jobs that will be created are construction workers, lifeguards to watch the pool, secretaries in main lobby, personal trainers to be certified, babysitters to assist child's play a
Albany	education for homeless children	$70,000	SED	My proposal is to help the homeless children with the education that they need. For the national cost it will cost $70,000 and for New York it will be costing $7,000. No child left behind?. This act means that every school need to take every child that wants to go to that certain schools. The homeless children are still going to school and don?t drop out the government will be paying for their school. This will include college. Each year 1.4 million children are homeless each year. There are 12% of children who are homeless that are not enrolled in school and 45% don?t attend school regularly. There are highlights the need for intervention to ensure that homeless students receive adequate educational opportunities. Homeless children should not be penalized simply for being late to school. This is because they may have to accommodate complicated bus schedule with several transfer to get to school. The topic I choose was education for homeless children. I think that this is a big problem in our society.

Bronx	Family Day Care Expansion	$150,000	CDBG	As a veteran in the education field but a newbie to day care I'm looking to expand my daycare provider services to a group day care. I currently educate my little ones in my charge. Expanding my business will allow for hiring at least 2 nurses, a few tea
Bronx	Adult Education and Training Program	$500,000	CUNY	to provide comprehensive services to the community that will include English as a Second Language classes, Pre-GED and GED classes, computer training, job readiness skills, job placements, counseling, and community outreach'
Bronx	Bronx Community College - North Instructional Building	$102,300,000	CUNY	Construct a new 96,000sf instructional building with state-of-the-art classrooms and a library. New building will be LEED certified Silver.
Bronx	Bronx Community College - North Instructional Building	$102,300,000	CUNY_CC	Construct a new, 98,000 sf instructional building with state-of-the-art classrooms and new library which will replace existing classrooms that are ill-suited for instruction. This new building will be LEED-certified Silver.
Bronx	Bronx Community College - Campus-wide Utility Upgrades	$64,000,000	CUNY_CC	This three-phased project will make critical upgrades to the existing campus central plant and all cooling, heating and electrical infrastructure as well as provide capacity for future growth.
Bronx	Hostos Community College - 500 Grand Concourse Building	$20,000,000	CUNY_CC	This project will upgrade the mechanical and telecommunications infrastructure and finishes, bathrooms, etc of three floors and the sub-basement of the 500 GC Building. In addition, 110 windows will be replaced.
Bronx	chemistry laboratory renovation	$5,300,000	DASNY	The project will comprehensively renovate all chemistry laboratories housed in a 1953 building. These laboratories support a strong, well enrolled and well-equipped major program in chemistry and biochemistry, a nationally recognized and large major program in nursing, and Core curriculum chemistry courses required of all undergraduate students. The gut renovation is comparable to all-new construction and meeting contemporary hvac and ventilation standards. The renovation will also assist in a transition to green chemistry pedagogy.
Bronx	parking structure	$14,500,000	DASNY	In addition to the chemistry laboratory renovation already submitted, we have a shovel- ready parking structure for 340 cars.
Bronx	Campus Center Facility	$115,000,000	DASNY	This Project will involve the construction of a 160,000 g.s.f central campus center facility at Fordham's Rose Hill Campus in the Bronx. The Center will be a critical part of the campus infrastructure and will consist of assembly and activity space, including performance, lecture and meeting spaces, student activity and club spaces, student, faculty and staff dining and food service facilities, space for Fordham's theater program, a Campus U.S. Postal Substation and mail system, commuter student services, Disabibled Student Services, and some recreational space. It will also be available for use by the outside Bronx & NYC Community, for Public Meeting activities and social events. It will, as all Fordham Projects, be built to a LEEDS Silver standardat a minimum.

County	Project	Requested $	State Agency	Additional Detail
Bronx	Tri Co-Gen Plant Facility	$16,000,000	DASNY	Fordham's completely designed and ready-to-go natural gas fired Co-Gen (Co-Generational Power & HVAC Plant)facility will actually constitute an ultimate Green, Tri- Modal, Co-Generational, HVAC Power Plant Facility to support Fordham's academic Campus infrastructure -- including classrooms, laboratories and libraries - that will not only produce and provide 100% of the Unversity's steam heat, for the 44 of its building's at the Rose Hill Campus in the Bronx that are on the steam distribution network, but it will also produce self -generated power to meet the entire base level load of the Campus electrical demand, equivalent to 50% of the total campus annual power demand. Additionally it will provide Air Conditioning (AC)to two major academic buildings(consisting of classrooms, laboratories , advanced learning and IT computer science technology, the Public Radio Station and other academic spaces). The system will be physically housed in, and run between, Thebaud Hall, where the current antiquated ancilities, audio-visual spaces, the Public Radio Station, language and technology learning labs, and other interelated learning spaces). A steam energy transfer exchanger in JMH will act to change steam into power for chillers supplying the Air Conditionthese two specific buildings. This project will enable the University to meet its goal under the Mayor's Bloomberg's ""Year 2017 Challenge"", by which Fordham committed to reduce it's carbon footprint 30% by the year 2017. This project is essential to m
Bronx	Bronx Community Health Network	$475,000	DASNY	Expansion of Internal Medicine Practice at Comprehensive Health Care Center
Bronx	Children's Health Fund	$1,800,000	DASNY	Expansion of the South Bronx Health Center

Bronx	Urban Health Plan	$40,000,000	DASNY	Expansion of Urban Health Plan South Bronx Health Center - Multiple Site Project
Bronx	Secure Second Gate	$663,106	DASNY	Reconstruct a second access to the facility will allow participants in special programs easier entrance and will secure the entrance, Road repaving
Bronx	Lehman College	$20,000,000	DASNY	New Science Facility (Phase 2), Central Plant Upgrades
Bronx	Hebrew Home at Riverdale	$500,000	DASNY	Starr Center for Alzheimer's patients
Bronx	Montefiore Medical Center	$3,700,000	DASNY	Liver/Abdominal Organ Transplant Outpatient Center
Bronx	Parking Garage	$32,800,000	DASNY	Construct a 615 parking garage and 15,000 SF Information Technology Center on hospital campus. This project is necessary for recruitment and retention of employees and physicians. It will also provide much needed parking for patients and visitors to thehospital.
Bronx	Intermodal Parking Garage	$20,000,000	DASNY	We have already acquired the site, completed site clearing engaged a construction manager. This will be an 825 vehile parking garage for visitors to the Gardens. The garage will also be available for metro-north riders and community people. Shoppers on Webster av and Fordham road could also utilize the facility. We are shovel ready.,
Bronx	Office Furniture	$220,000	DASNY	Catholic Guardian Society and Home Bureau operates two satellite offices that require new modular office funiture for work areas and conference rooms. The current furniture is old, in need of repair, and not space efficient. This project will result in the purchase of modular workstations for 40 staff, and conference room furniture for 60 people. This will include: 40 modular workstations, 80 file cabinets, 40 ergonomic chairs, 14 conference room tables, and 60 conference room chairs. It will create immediate jobs for manufacturers, architects, space designers, vendors, and installers.

County	Project	Requested $	State Agency	Additional Detail
Bronx	Capital Improvements - MRDD Services	$195,000	DASNY	Catholic Guardian Society and Home Bureau operates 30 residential facilities for people who are mentally ertarded and developmentally disabled. 6 of these facilities require immediate renovations to address safety and energy efficency issues. Funding for this project will result in 2 new handicap accessible bathrroms, 3 new kitchens with cabinets and appliances, 1 new roof, 4000 sq.ft of new floor tiles, 2 new drainage systems, 1 new boiler, landscaping of 2 backyards, 3 new sidewalks, new masonry andre-pointing, and 2 new fences. This project will create immediate jobs for manufacturers, skilled laborers, architects, and installers.
Bronx	Capital Improvements - Homeless Shelters	$196,000	DASNY	Catholic Guardian Society and Home Bureau operates 2 homeless shelters which require capital improvements to address safety and energy efficiency issues. This project involves the creation of new masonry and repointing; electrical system upgrades in bothresidences; 2 new boilers; 1 new roof; 2 security camera systems; 5 new bathrooms; 48 new windows; plumbing system upgrade; 1 new sidewalk; etc. This project will result in immediate jobs for manufacturers; architects; skilled laborers; installers; electricians; plumbers; masons, etc.
Bronx	Human Services	$400,000	DCJS	Bronx TASC and Mental Health TASC are alternatives to incarceration programs serving 1,000 offenders annually. Funding is sought to enhance employability and total numbers of clients served.
Bronx	Abraham House Renovation and Expansion Project	$900,000	DCJS	Abraham House is a 501(c)(3) not for profit organization located at 340 Willis Avenue in the Mott Haven area of the South Bronx. Abraham House offers an Alternative to Incarceration Program and related services to strengthen families of the incarcerated.These services include a year round After School Program, a Family Center and a Community Outreach Program. Abraham House is applying for funding for its Capital Renovation and Expansion Project, Phase II. The total cost of phase II is $1.5 million, ofwhich $600,000 has been secured and was used to purchase an adjacent building which requires extensive renovation. Abraham House requests funding for the remaining $900,000 of phase II. The project is the second and final phase of construction completedin 2006 after a successful $3.5 million capital campaign. The $1.5 million second phase was begun in 2008 but put on hold because of the downturn in the economy. Phase II is ?shovel-ready? and could begin within 90 days or earlier once funding is securedograms will directly address the high unemployment rate and growing loss of jobs in the South Bronx and will focus on helping the incarcerated and formerly incarcerated, and families affected by incarceration, find employment. It is estimated that this pat least 14 full-time and part-time jobs over the ten month period of the project, as well as 5 permanent full-time and part-time positions at Abraham House related to the program activities once the new building is completed. The services made possible
Bronx	Bronx Zoo Projects	$52,400,000	DEC	Bronx Zoo Projects

County	Project	Requested $	State Agency	Additional Detail
Bronx	Homeless Assistance Finding Permanent Housing	$201,600	DHCR	Catholic Guardian Society and Home Bureau operates two homeless shelters for women and children. We propose to hire 4 housing specialists to help expedite the locating of affordable and safe permanent housing for these families. This project will help 30families to find housing in a mroe timely manner, thus saving money on shelter care and allwoign them to move to permanent housing where they can purchase additional household items and raise mroe healthy and vibrant children. This will produce immediate jobs for 4 BA-level educated people.
Bronx	MERM	$2,000,000	DHCR	Over 30 years Mount Eden Resuce Mission[MERM] has provided food and shelter to people in need. Our organization is a not for profit entity, in need of funding to develop the facility in order to accommodate housing for 100-150 units. We want to continueserving the community by providing jobs and shelter. The size of the lot is 190 ft. by 60 ft. and it's zoned for a five story dwelling.
Bronx	NYC Hous. Auth. - Throggs Neck Houses	$1,000,000	DHCR	Repairs water damage in a few of the many damaged T-N Houses
Bronx	Helping Hand	$500,000	DHCR	For more than 2 years I've lived in the Bronx and have never heard of the available weatherization program available for seniors and the poor. I intend to go door to door to qualify seniors and poor and help them wqeatherize their homes. I anticipate tooffer assistance to a mnimum of 1000 households. I will need to train people from the neighborhood which will create approximately 50 jobs.
Bronx	West Kingsbridge Apartments Co. Window Replacement	$1,000,000	DHCR	West Kingsbridge Apartments Co (A.K.A Kittay House) is a 295-unit Mitchell Lama housing development located at 2550 Webb Ave. in the Bronx and operated by Jewish Home Lifecare. Kittay opened its doors in 1970, and as the building approaches its 40th yearit is urgently in need of upgrades and repairs in order to maintain the safety and independence of its elder tenants. Kittay House is an ?independent? living facility whose tenants are offered many supports such as 24/7 security, art classes and off-campus trips, access to an on-site medical office, rehabilitation services, and homecare services. The current windows in Kittay House are over twenty years old. Due to their age and extensive usage they have become very difficult for our frail elderly tenants to open and close. The existing windows frames are so worn that even when the windows are closed, wind and drafts still come into the apartment. Based on typical high efficiency window U-value, and tightness, Kittay House should expect to save about
Bronx	3. ArchCare Program of All-Inclusive Care for the Elderly	$20,000,000	DOH	Create 5 Program of All-Inclusive Care for the Elderly (PACE) Centers in the Bronx, and Manhattan which would serve 1,500 frail elderly who are eligible for nursing home care but could remain in their homes with PACE services. These individuals are eligible for both Medicaid and Medicare and are among the poorest and vulnerable elderly with complex, chronic conditions. Sites have already been identified. These PACE Centers will create jobs, meet the needs of a growing elderly population in New York (which is projected to grow by 23% between 2010 and 2020), and provide cost effective alternatives to nursing home care, and assist the State in moderating the rate of growth in its Medicaid costs.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Bronx	Nutrition for Seniors	$100,000	DOH	The current economic climate can place seniors, who in previous years did not have difficulty eating well, at risk for poor nutrition and the health risks associated with eating poorly. Because fixed incomes may have decreased, seniors do not have adequate resources to pay bills, purchase medication and buy food. If the purchase of food is sacrificed to allow for the purchase of medication, seniors could go hungry. This project proposes the provision of one hot meal a day, five days a week, to any senior who demonstrates an inability to purchase adequate food to maintain health. The Riverdale YM-YWHA Senior Center has more that 1000 seniors registered. These seniors will be contacted and informed of this program. The seniors will be encouraged to physically come to the Y for their meal, but when this is not possible, arrangements will be made for the meal to be delivered. The Senior Center currently serves 180 meals a day. With this new program, it is projected that 250-300 meals will be provided each
Bronx	Improving Health Literacy to Reduce Costs and Improve Outcomes	$1,000,000	DOH	Approximately 36% of American adults (87 million people) have difficulty understanding and acting upon health information (Institute of Medicine of the National Academies, 2004). These individuals with low health literacy fail to access preventive services, are less able to adhere to medication instructions, have a greater tendency to use emergency rooms as a regular source of healthcare and have poorer health outcomes (Journal of General Internal Medicine, August, 2006). It is estimated that annually US businesses lose over $60 billion and the healthcare system incurs $73 billion in unnecessary costs due to low health literacy (National Institute for Literacy and the American Medical Association). Improved health literacy enables people to become informed consumers, take responsibility for their health and enjoy gainful employment. F·E·G·S proposes to develop and integrate a health literacy curriculum into our educational, employment, health education, clinician training and ESL programs to raise the
Bronx	Medalliance Medical Health Services, Inc.	$10,000,000	DOH	Expansion of primary, preventive, and social support services to an underserved population
Bronx	AHRC Health Care, Inc.	$200,000	DOH	AHRC Health Care, Inc. - expansion of specialty out-patient chemical dependency services to individuals with traumatic brain injury and intellectual disabilities in the Bronx
Bronx	Bronx Community Health Network	$3,932,500	DOH	EMR Implementation at Multiple Centers
Bronx	Children's Health Fund	$250,000	DOH	Equipment, software, and training for EHRs at South Bronx Health Center
Bronx	The Henery & Jeanette Weinberg Center for Elder Abuse Prevention, Interv	$385,160	DOH	Construction of classrooms will facilitate onsite training, expand its outreach and to train others to replicate the model in nursing home facilitites
Bronx	Aging in America Comm Services	$160,000	DOH	Renovations to Senior Ctr, Adult Day Care, Cafeteria
Bronx	Albert Einstein College of Medicine	$4,000,000	DOH	Renovations, MRI machines
Bronx	Beth Abraham Health Services	$30,000,000	DOH	New Senior Facility
Bronx	Comprehensive Community Development Corp	$15,361,977	DOH	Construction of new building for diagnostic & treatment ctr
Bronx	Electronic Medical Records - Nursing Homes	$2,000,000	DOH	The objective is to implement an Electronic Medical Record system to replace paper medical records in a Nursing Home environment whose management processes are primarily paper based. An EMR would lead to improved patient care and better outcomes, as theEMR would greatly reduce paperwork, reduce errors, improve access to information and relieve care workers from the time-consuming burdens of locating and analyzing quality indicators that are on paper.
Bronx	Osteoporosis Prevention and Care	$70,000	DOH	In view of the large number of pre, peri and postmenopausal women seen in our medical practice, we need to early diagnose osteoporosis, prevent its development and progression, and/or provide appropriate treatment. We need to acquire a spine bone densitometer, a Lite Gait machine and hire more staff.

County	Project	Requested $	State Agency	Additional Detail
Bronx	Services For Poor, Disabled Elderly in Bronx County	$1,500,000	DOH	As part of the South Bronx revitalization efforts, St. Vincent de Paul residence (SVDP) was established to provide long term care services. Its current 24-registrant Adult Day Health Care Program (ADHCP) located on the nursing home will be expanded to a48-registrant program to address the pressing need for such services. Historically, the program has been operating at capacity and has a waiting list. Architectural plans have been developed.
Bronx	Bronx Job Retraining Program	$84,000	DOL	Through its School of Professional and Continuing Studies, the College of Mount Saint Vincent has since 2005 offered a series of non-degree certificate programs targeted to serve unemployed Bronx residents seeking job retraining. In the three years of op
Bronx	CEO Prep	$100,000	DOL	CEO Prep's foreclosure prevention, recovery & rebuilding / public education program will help adults rebuild their personal lives and careers, starting with Queens county.
Bronx	Childcare Job Training Center	$700,000	DOL	WHEDCo seeks to create a new job training center for its childcare micro enterprise job program which helps women start their own home based child care businesses. This program currently helps hundreds of women a year start and maintain their businesses,and provides working parents with quality day care. The new center will enable us to help an additional 300 women per year start these successful home businesses.
Bronx	Bronx Fitness Instructor Training Program (BronxFIT)	$266,000	DOL	The Bronx Fitness Instructor Training (BronxFIT) Program of Montefiore Medical Center?s Department of Family and Social Medicine, Bronx, NY aims to demonstrate a replicable model of fitness resource and personnel development for use in communities wheretraditional avenues for fitness (gyms, paid classes, open space for jogging/walking/cycling) are either inaccessible or unaffordable. BronxFIT proposes to train 24-30 urban, primarily minority underserved community residents, to become certified group fitness instructors by utilizing and expanding upon an established curriculum developed by the program?s collaborating partner, the American Council on Exercise (ACE). The unique aspect of this training program is its requirement that each trainee completea practical experience organizing and leading fitness classes that are offered free of charge to 240-300 community residents. This model accomplishes several purposes, it: (1) builds a permanent workforce which empowers the community to better manage itby requiring a hands on experience supervised by an exercise professional, (5) trains physicians (>= 5 workshops) to counsel patients about exercise. The monetary request above is the total for a 2-year period. The 50 ""jobs created"" represents the trails who, at the conclusion of the project, will be certified as group fitness instructors and eligible to work in that capacity. The budget represents 1.1 FTEs. Fitness classes for BronxFIT can be targeted at separate populations (i.e. seniors, children,
Bronx	Network	$500,000	DOL	Network is a comprehensive re-entry program for ex-offenders, located primarily in the South Bronx and East New York communities. Through job development, counseling, group self-empowerment, and linkages to related agencies, it has a recidivism record of12%, far lower than state and national averages.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Bronx	Bridges to Work	$475,000	DOL	Episcopal Social Services will introduce the world of work to older teens and young adults between the ages of 16-24 years who are known to the agency through our child welfare programs, young parents with children enrolled in our day care centers, and ex-offenders in our Network re-entry program. By implementing a three step approach, we will assist participants with pre-employment, employment and post-employment issues. Upon concluding this program, they will be employable and/or employed. When entering the program, the participants will be assessed to evaluate their proficiencies and job readiness. The participants will be slated for pre-employment skills development: job search skills, interviewing, positive work habits, etc. Other participants, who have been dislocated in the job market or who present with a greater level of job readiness, will be serviced through a ?Fast Track? process. These individuals will receive job referrals upon completion of assessments and counseling. All participants w
Bronx	The Academy	$3,850,000	DOL	There are 17,000 young people in the New York City child welfare system, and each year, 1,000 of them age out of foster care with no family support, attempting to live independently. Most youth aging out of care have no high school diploma, low levels ofliteracy, and limited work experience. Fewer than 40% are employed 12-18 months after leaving the system. In response to this crisis, F·E·G·S collaborated with five New York City foster care agencies to design The Academy, a unique, flexible program that provides comprehensive services including a range of wrap around support services to help young adults in care to prepare for adult independence. Launched in 2007, The Academy has achieved unprecedented educational and employment outcomes for youth infoster care. The proposed project will expand Academy services to 700 NYC foster care youth to improve their levels of literacy, gain career readiness skills, connect to meaningful employment, and build a successful future.
Bronx	Wage Subsidy for Cash Assistance Clients	$2,500,000	DOL	F?E?G?S serves over 20,000 cash assistance clients per year who are pursuing employment. These clients have multiple barriers to obtaining employment including disabilities, which often require reasonable accommodations to perform work; language barriers; limited work experience; low reading levels; and limited educational achievement. Given the current unemployment levels, it is increasing challenging to find jobs for our clients as well as employers who are willing to provide accommodations so that our clients can overcome their barriers to employment. Additionally, as jobs become scarcer, our clients must compete with people who do not have barriers to employment and who are often overqualified for the entry-level jobs that are generally the most appropriate for our clients. F?E?G?S proposes implementing a wage subsidy program to overcome these barriers. Our proposal is to pay employers 50% of each client?s wages for 90 days. This proven methodology provides incentives for employers to hire our cli

Bronx	Intermodal Transportation Facility (including new parking garage)	$20,000,000	DOT	We have already acquired the site; completed site clearing and demolition; engaged a construction manager; and are preparing construction bids. This project will provide for a new off site parking structure for 825 vehicles, critically needed to accommodate the increased attendance at the Garden. The garage will be an open-air pre-cast concrete structure with one basement and seven floors of parking. This project will be a highly visible, off-campus infrastructure project that will serve as a cornerstone of redevelopment along the Webster Avenue corridor and a project to be proud of as a demonstrable public investment in the City?s future even in difficult times. On our end, we could start construction today if we had the money. We are creating a special garden membership for monthly parking users ? both commuters and community. ? Jobs created: 426 construction jobs projected by our construction manager, plus 10-12 subsequent permanent operation/maintenance, security, horticultural and visitor servic

Bronx		$5,500,000	ESD	Addition of a 12,000sf gymnasium and a child care center to the 5 acre YMCA campus in the southeast Bronx. The facility will be added to the 21,000 to complete a child care and community health center to this low income neighborhood.
Bronx	Mother Theresa Civic Center	$5,000,000	ESD	Job training center; Day-care; Small business development ctr
Bronx	Grounds Maintenance, Inventory Control, and Secure Documents Services	$4,000,000	ESD	F·E·G·S has identified several major economic and workforce development projects in the areas of grounds maintenance, inventory control and secure document destruction services, which are shovel ready but were put on the hold due to budgetary constraints. These projects will create employment for under employed groups including individuals with disabilities, veterans and other economically disadvantaged citizens. Through this initiative, F·E·G·S will work in partnership with three major companies, Landtek Group, R and W Inventory, and American Document Security Corporation (all NY City metropolitan area-based companies) to seek work with school districts, towns, counties and cities to provide grounds maintenance, inventory control, or document destruction services (including paper and electronic media materials). F·E·G·S and all of these three companies are members of New York State Industries for the Disabled (NYSID) and currently provide services to dozens of municipal and state government agencies.
Bronx	South Bronx Development Initiative	$0	ESD	Waterfront project featuring: Full service film and television studios (creates 250 permanent jobs); 350 key hotel (4-star) with conference space and health spa (creating 350 permanent jobs); 50 Residential condominiums including penthouses; Artist Lofts(work/live open design) - 22 units with individual terraces; Office complex (50,000 square feet - Class A space); Restaurants & retail space within the complex will include upscale and family fare; Film-themed restaurant near the studios (accessible from the street); Amphitheatre providing an indoor/outdoor concert stage; Ferry terminal and private boat docks on the Harlem River; Shuttle Train providing access to new Yankee Stadium Metro-North Station; Elevated gardens including and cascade fountains;and, 450 parking spaces.
Bronx	New Fulton Fish Market Cooperative at Hunts Point - Construction of a new	$60,000,000	ESD	This project would enable the Fish Market to vertically integrate these operations, allowing ships to dock directly at the market and sell the fish to be either distributed as fresh, or processed and frozen directly on site. In addition to creating morethan one hundreds skilled-labor jobs, the project would significantly reduce the negative environmental impacts associated with the high traffic of refrigerated delivery trucks coming to and from the market The facility would be at the same location asthe current market, the Food Distribution Center in Hunts Point.
Bronx	Hunts Point Terminal Produce Market - expand refrigeration and storage ca	$270,000,000	ESD	The new facililty would increase warehouse space, improve the movement of produce and increase the rail use, resulting in a significant reduction in truck emissions. The new facility will also be LEED certified and would incorporate a number of featuresto make the facility more energy self-sufficient. This facility houses over 115 firms and employs approximately 8,500 people.

Bronx	Morrisania Revitalization Project	$435,000	MAIN_ST	
Bronx	Neighborhood Commercial District Revitilization Project	$5,000,000	MAIN_ST	This Program would continue funding for successful initiative that provides matching funds to support small scale locally owned neighborhood businesses throughout the City's commercial corridors. Neighborhood Commercial Districts are vital contributors to the health of the city?s overall economy, traditionally, made up of local entrepreneurs who operate restaurants, taverns, coffee houses, movie theaters, pharmacies, and other vital services. These business districts are deemed relatively stable in terms of neighborhood amenity, surrounding community, and in instances where public improvement could form the basis for further commercial and residential investment. Improvements made in these areas will have the most marked results in terms of increased quality of life for neighborhood residents as well as spurring additional economic development. Funds for this project will be programmed to promote the needs and character of the commercial district and will result in retaining and attracting new residen

County	Project	Requested $	State Agency	Additional Detail
Bronx	Hybrid Vehicles	$720,000	NYSERDA	Catholic Guardian Socity and Home Bureau has a fleet of 60 vehicles, none of which are hybrid vehicles. Twenty of those vehicles are due to be replaced in the near future. We will replace them with hybrid vans and cars in order to save on gas and emissions into the enviornment. This project will save jobs for local auto dealers.
Bronx	Bronx Community College - Utility Upgrades	$66,000,000	NYSERDA	Critical upgrades to the existing campus central plant and all cooling, heating and electrical infrastructure as well as provide capacity for future growth. The completed project will realize energy savings of $1 million per year.
Bronx	Pelham Bay Windpower	$55,000	NYSERDA	Gather and analyse wind data at and near Pelham Bay Park (NYC). Possible turbine locations: A. inside the Park itself, B. on the southern tip of Hart Island C. atop the Pelham landfill. Loads to be targeted: A. all of the Park's usage (800 KW rating), B.all of the Park, plus an on-island air-compression plant (9 MW), C. 10% of Coop City's load (12MW). Significant CO2 mitigation, a dozen or more permanent jobs.
Bronx	Air Conditioning System Installation	$110,000	NYSERDA	Catholic Guardian Society and Home Bureau operates two satellite offices in the Bronx which require installation of new HVAC systems with new duct work. The total square footage for the 2 office spaces is 35,000. This project will create immediate jobs for manufacturers, HVAC technicians, and contractors. It will improve the infrastructure of these offices, improve air quality and be more energy efficient than the current obsolete HVAC systems that require constant repair.
Bronx	Domestic Violence Prevention	$25,000	OCFS	Catholic Guardian Society and Home Bureau operates two homeless shelters that serve about 100 mothers and their babies annually. Many of these women are victimes of domestic violence. We wish to install security cameras within the shelters as a means toensure that their spouses/significant others do not gain entry to the facilties in roder to perpetrate additional violence. The agency will install Brinks Security Systems with multiple cameras and monitoring screens. This project will save jobs for manufacturers, installers, and vendors
Bronx	Support for Children and Families with Special Needs	$100,000	OCFS	Staff in the Riverdale Y?s educational programs observe a marked increase in the number of children with Special Needs in pre-school, after school and camp programs. Anecdotal accounts indicate that 10% - 15% of families served require specialized assistance. With additional resources, the services offered by the Y will be enhances by an ability to recognize and serve families with special needs. We will be able to engage new families who have avoided using the Riverdale Y programs because of a concernthat their child who is differently-abled will not be accepted, or ?fit? into existing programs as well as to better serve families already connected to the Y. Program activities will include: staff training, early childhood playgroups for children withspecial needs and their families, social skills groups for school aged children and their parents and caregivers, advocacy for families, community education forums, better inclusion in the nursery school program, the after school program and the summer c
Bronx	After School	$500,000	OCFS	After School programs that extend and enrich the school day are of vital importance in the neediest areas of the city. These programs start with the fundamental issue of keeping children safe, and then provide academic, cultural, and recreational opportunities that expand their horizons and equip them for the educational and life challenges that await them.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Bronx	F·E·G·S Homeless Prevention Team	$1,250,000	OCFS	F·E·G·S proposes to operate homeless assistance outreach teams to provide rapid re-housing assistance and other services to prevent homelessness. The teams would serve high-need areas in the Bronx and Manhattan. Examples of some of the services that would be provided include housing relocation and stabilization services; short- and medium- term rental assistance with case management services up to 6 months; linkages to permanent housing; and assistance in securing benefits / entitlements and negotiatingwith landlords. The project?s expected outcome is to keep individuals in housing and prevent homelessness. F·E·G·S?s approach maximizes the strengths of the individual living in the community while fostering self-sufficiency. F·E·G·S has an extensive history in providing services to the homeless and to individuals at-risk of homelessness.
Bronx	UBA Supporting Healthy Marriage program	$1,000,000	OCFS	The University Behavioral Associates Supporting Healthy Marriage program at Montefiore Medical Center provides relationship & parenting education and case management services to low-income couples with children residing in Bronx. The aim of the program is to build a solid foundation for marriage and family through communication, managing stress, conflict resolution, and other skills for coping with the everyday worries that can create pressure in a marriage.
Bronx	Missing Children Project	$118,000	OCFS	Catholic Guardian Society and Home Bureau (CGSHB) operates the second largest foster care program in New York City. Each year, 100 children go missing from care. Many are located, but some are not located as they may be the victims of child prostitutionrings, gang affiliated, or are smuggled across US borders by family or stangers. Two trained investigators will be either retained or hired to located these missing children and return them to safety.
Bronx	Getting Foster Care Youth to Graduate From High School	$394,000	OCFS	Catholic Guardian Society and Home Bureau (CGSHB) operates the second largest foster care program in New York City. Approximately 80% of inner-city youth fail to complete school with their incoming freshman class. CGSHB will target 100 youth in need of educational coaching, peer mentoring, tutoring, etc. to ensure improved educational achievement. This will result in immediate jobs for 6 Education Coaches.
Bronx	Mount Hope Housing Co. will expand existing network infrastructure intende	$525,313	OFT	
Bronx	Enhancement of F.E.G.S.'s Broadband Network	$750,000	OFT	F·E·G·S Health and Human Services System has built a major technology-based infrastructure system, which supports the delivery of services for over 100,000 New Yorkers a year at more than 350 facilities, residences and offsite locations across New York City and Long Island. This technology infrastructure network links all F·E·G·S services and locations and depends on the speed and capacity of its broadband system to share data and resources to efficiently deliver services. The proposed project will enable F·E·G·S to enhance its broadband network infrastructure equipment including servers, switches and routers so it can take advantage of the operational efficiencies and cost savings available from the latest technology, and to increase and expand its service delivery capacity for the community. These broadband enhancements will improve F·E·G·S?s ability to interconnect across its service delivery system and with other service providers in the community. The ability to efficiently share and transmit cli

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Bronx	Hughes Ave.	$12,500,000	OMH	Bonds + LIHTC 4%
Bronx	Cerebral Palsy relocation of Bronx diagnostic and treatment center.	$8,300,000	OMR	This project includes relocation of the current Bronx facilty to 1880 Boaton Road. This relocation and revovation is expected to involve 48,000 sq ft. the more centralized location will provide full accomodation in waiting and traetment rooms. The project also includes the development of a 120 unit residential tower that will provide low income, specialized housing for individuals with disabilities.
Bronx	Cerebral Palsy Association of NYS capital construction and facility improver	$8,300,000	OMR	Relocation of the Diagnostic and Treatment Center currently at East 149th St in the Bronx to a more centrally located and accessible site at 1880 Boston Road in the Bronx. This facility provides comprehensive health care to people with diabilities. Additionally, the project will include the development of an 8 story 120-unit residential tower over the health center, providing specialized, low-income housing and community living programs for individuals with disabilities.
Bronx	Project Hope	$489,080	OMR	Create two new classrooms through the renovation of space currently used by its parmacy and laboratory services, which would be relocated from Resnick to Reingold
Bronx	VIP Community Services	$500,000	OMR	NYC Local Law 11 façade work for chemical dependence facility
Bronx	Sustaining Excellence: The Renovation of Wave Hill House	$1,500,000	OPRHP	Wave Hill is a world-renowned 28-acre public garden and cultural center in the northwest Bronx that attracts 130,000 annual visitors. Its buildings and grounds are publicly owned by the City of New York. Funding of $1.5 million is requested to repair, restore and improve Wave Hill House, our most heavily used building. Housing the Kerlin Learning Center (home of stellar school education programs and our celebrated Family Art Project), Armor Hall (home to concerts and public programs) and the Wave Hill Café, the 1843 structure has space for education, visitor services and security staff. The renovation is a $10.1 million public-private partnership to address urgent infrastructure needs and insure ADA compliance. The City has committed $6.6 million. $2 million has been raised from private sources. We hoped to have the remaining $1.5 million in hand, but the economic downturn has hindered private fundraising. The design is complete, community and landmark approvals are in place, bidding is imminent and p

County	Project	Requested $	State Agency	Additional Detail
Bronx	Training to Empower Young Women	$21,500	SED	This estimate is for 100 women. The bigger the budget the more I can train. I teach women how to run an afterschool program for girls 10 years old and up. I give them the materials. The Young Woman's Empowerment Program is a structured journal writing and girl talk/career goal empowerment program for young girls to plan their careers. I teach them the information they will be passing on to the student. Continuing education will be available to them. I am a final year Master's student in Professional Counseling and The Young Woman's Empowerment Journal, which I created, has been approved by the Board of Education and was my class workbook for the classes I taught through the College Now program and No Child Left Behind in the Bronx. I returned to schoolto earn a Master's degree with the plan to train women in a two day program so they can run their own program out of their home, or any appropriate location. They have the potential to earn $25 to $50 per student for 5 days or Saturday classes. 15 stude
Bronx	College-Readiness Support	$380,000	SED	Urban Assembly manages 20 NYC public schools dedicated to preparing students from under-resourced neighborhoods for success in colleges, thereby impacting the cycle of poverty. 95% of UA students are minorities and enter our schools not meeting minimum educational standards. Despite this, our high school graduation rate is 83% (citywide rate is 58%) and the college acceptance rate is 83.5%. Last year we hired four Achievement Coaches to assist the principals and teachers in these 20 schools with bettering these high marks. Because most of our funding comes from foundations that rely upon their investments to make grants to us, our funding is down substantially and these positions are at risk. The Achievement Coaches are needed to help improve and implement a unique and promising instructional program that could impact teaching in public schools grade 6 to 12 statewide and nationwide. They are in the middle of this program with the Center for Education Policy Research and their continued participation
Bronx	Educational Achievement for Foster Care Youth	$50,000	SED	Catholic Guardian Society and Home Bureau operates the largest group home program in the NYC foster care system. Most of the 114 youth in this program function well-below expected educational achievement levels, with many not graduating from school. We will provide 3 computers and printers per facility at a cost of $1200 per computer and printer. We will purchase a fully-equipped Smart Board system at approx. $10,000 for centralized tutoring classes. This will result in immediate jobs for manufacturers,vendors, installers, and teachers.
Bronx	CareerFirsts Data Management System	$1,500,000	SED	An estimated 200,000 young adults in New York City, ages 16-24, are neither in school nor employed, which has a profound economic impact. F·E·G·S partners with the NYC Department of Education in operating programs that engage young adults who might otherwise drop-out to instead earn a diploma, pursue college, and enter the workforce. The model?s core strategy is connecting academic instruction to real-world work experience by engaging students in professional internships in a range of industries. In partnership with AllSector Technology, an F·E·G·S affiliate, F·E·G·S developed CareerFirsts, a leading-edge, web-based system that manages all aspects of student internship program operations in a single platform, including site development, placement, payroll, and performance evaluation. F·E·G·S proposes to provide the CareerFirsts platform to 25 New York City schools that implement student internship programs, creating administrative efficiencies and enabling the rigorous use of data to drive student ach

County	Project	Requested $	State Agency	Additional Detail
Bronx	In-School Dance Residency Programs at PS 78 Bronx	$10,000	SED	Notes in Motion Outreach Dance Theatre offers a wide array of residency, professional development, interactive performance, and after-school programs that teach technical and creative dance skills, choreography, improvisation, dance literacy, and arts appreciation to New York City public schools. We are a vendor of the Department of Education and all programs teach the five strands of dance learning as outlined in the Blueprint for Teaching and Learning in the Arts. Programs foster self-discovery, risk-taking, and making connections between different topics, themes, and areas of learning. We aim to provide access to the art form of dance to inspire the next generation of dance appreciators. In our second year of partnership with PS 78 in the Bronx, weare bringing dance residency programs to 15 classes of students in this school year. Residency program titles include ""Thinking with Our Bodies"" and ""Poetry and
Bronx	Next Step Program	$2,500,000	SED	One million six thousand people in New York City are over 15 years of age, are out of school, and lack a high school diploma. This significant population without a high school credential results in serious economic and social implications as there are increasingly fewer employment opportunities for these individuals (Our Chance for Change: A Four-year Initiative for GED Testing in NYC, Cook, Jacqueline (2008)) In order to better prepare this group to compete in the increasingly competitive economy, F·E·G·S seeks to expand the opportunity for New Yorkers to obtain their GED by offering GED preparation programming for 600 individuals. In addition to educational services, the program will leverage its extensive network of volunteers to support participants with individual career development and exploration activities.
Bronx	Trailblazers program	$100,000	SED	Urban Trailblazers, Inc., provides a multi-year program of travel and volunteer service for economically disadvantaged NYC teens. The highlight of the program is a fully-funded four week tour of the United States which includes experiential learning, team building, cultural activities, journal writing and pure fun. About 25% of the tour is spent performing volunteer services. During the academic year, participating students (called ""Trailblazers"") perform volunteer service in NYC. The underlying premise of Urban Trailblazers is simple: travel provides opportunities to experience people, cultures and social systems beyond one?s own limited world. For economically challenged adolescents living in New York?s toughest neighborhoods, these opportunities for personal and intellectual growth can provide the platform for a more successful future. Volunteer service similarly provides an opportunity for personal growth and self-discove
Bronx	Mental Health in Schools	$4,500,000	SED	F·E·G·S is proposing to launch mental health programs in 15 High Schools in the Bronx, a region with high needs, particularly for adolescents. Often without mental health services that are on site and accessible, school personnel deal with teenagers whoact out and are doing poorly in their studies. On-site mental health services are crucial to enhance academic outcomes and help high-risk teenagers through the difficult developmental processes of adolescence. The project includes a broad-based public health screening that would identify adolescents in emotional trouble, provide mental health treatment to students and families (individually and in groups), and provide community resilience-building for the school community. Leveraging Medicaid and othermedical insurance where possible, the programs would also provide a wide array of services for faculty and parents.

County	Project	Requested $	State Agency	Additional Detail
Bronx	New Settlement Community Campus	$4,000,000	SED	New Settlement Community Campus is a pre-k through grade 12 new public school, funded by New York City, attached to a community center and swimming facility to be funded privately by Settlement Housing Fund.Settlement Housing Fund worked with the SCA toobtain the site and design the school, which was bid and ready to start in 4-8 weeks. Settlement Housing Fund is using public and private sources for the community center and pool, in a very poor area.Our subsidiary will manage both the school, pool andcenter, fostering the continuation of a public-private partnership in this very poor community, a block from where we now house 995 families in a revitalized housing development, integrating 268 formerly homeless families with low and moderate income working families.We have a loan to get construction started, but have a gap of about $4 million to pay it back, assuming our other requests come through. There is widespread community support for this project. The outcome will be a community-managed 172,000
Bronx	Elder Abuse Prevention and Shelter/Project Hope	$1,500,000	SED	The project being proposed by Hebrew Home envisions the relocating, equipping, and refurnishing of Hebrew Home?s medical laboratory and pharmacy to create space for the construction of 1200 square feet of multi-use classroom/conference space. This classroom space will be utilized by both Project Hope, an alternative high school program for special education students to prepare them for healthcare related employment, and by the Weinberg Center for Elder Abuse Prevention. As part of the project, a secondentry/exit gate, providing security access and control will be constructed.
Bronx	Bronx MS 45 Beacon Program	$200,000	SED	This funding would support Good Shepherd Services? MS 45 Beacon in Bronx, New York. In 2008, the Beacon provided comprehensive after-school and summer day camp programs to almost 1,100 at-risk Red Hook youth, while its Family Support Component provided 100 familiesinformation and referral, family, group, and individual counseling, case management , family trips, and support to help them stay together, and keep children out of foster care.
Bronx	Youth New Media Education	$2,000,000	SED	The Tribeca Film Institute proposes to expand Tribeca Teaches: Films in Motion, a media-based curriculum designed to enrich the educational experiences of students at schools in outlying communities. Tribeca Teaches is organized around giving students filmmaking tools with which to identify and better understand themes of identity, community and tolerance. Classroom curriculum activities include writing exercises, basic hands-on filmmaking training, and in-class visits from Tribeca Film Festival filmmakers. Students learn how to be dynamic media producers, and important skill set in the new economies. The program currently operates at Bronx Preparatory Charter School. Tribeca Film Institute was recently selected by the NYC DOE to develop the Blueprintfor the Moving Image, and federal funds will be used to enhance this curriculum and expand our existing program to all five boroughs of the City, and to explore partnerships throughout the state. Tribeca Teaches gives new education tools to students and

County	Project	Requested $	State Agency	Additional Detail
Bronx	Symphonic Youth Program	$75,000	SED	The Symphonic Youth Program (SYP)provides after school music programs to students in grades 6th to 14th (middle school to 2nd year in college). The main purposes of the program is to prepare students to be admitted in specialized music programs at 4 years colleges and to provide instruction and support in the following areas: homework assistance, physical education, counseling & conflict resolution, technology, and arts instruction. The SYP has been providing these services since 1996. Unfortunately with the recent budget cuts we will have to reduce our services this and next year to more than half of our current size. With the support of the American recovery and Reinvestment Act we may be able to maintain some of the jobs that we will have to terminate by the end of May 2009.
Bronx	Brown Place Project	$22,230,000	SED	The Foundling's new Bronx Community Center will stand as a visible testament to our commitment to a community that we have served for over forty years. By integrating all needed social service supports with an excellent academic program we believe we canclose the academic achievement gap that plagues children living in poverty and, in particular, those in the child welfare system. Upon completion, 170 Brown Place will consist of a 53,000 sf, 8-story complex that will include The Foundling's Bronx Community Services Center and Mott Haven Academy Charter School. The goal is to give students & families a seamless continuum of care, all within one building, that will enable our children to reach their fullest academic and personal potential in spite of the difficult life circumstances they face. This project has the potential of being a national educational model. Research shows that the achievement gap between children in the child welfare system and their peers in the general community has obvious & di

County	Project	Requested $	State Agency	Additional Detail
Broome	Growing Spaces, Improving Lives Rehabilitation and Expansion Project	$2,000,000	DASNY	Since its inception in 1952, ACHIEVE has served as a valuable resource to thousands of Broome and Tioga County residents. As society has become more accepting of individuals with intellectual and other developmental disabilities, and federal and state resources have supported programs to serve the population, ACHIEVE has been responsive to the call of the community, creating residential, day, family support, and employment opportunities for those in need. For more than half a century, ACHIEVE has servedBroome and Tioga Counties as a leader in the field of intellectual and other developmental disabilities. Last modified with an addition of 10,642 square feet in 1988, ACHIEVE?s Cutler Pond Road site is faced with the urgent need to rehabilitate and expand its Cutler Pond Facility to address program expansion and growth opportunities, health and safety considerations, and a critical need for additional space for operations, training and future growth.

Broome	Landscape Renovations	$60,000	DASNY	Upgrade exterior student areas per master plan
Broome	Natural Gas pipeline replace	$500,000	DASNY	Repalce 50 year old corroded and/or failing pipelines
Broome	Quadrangle enhancements	$850,000	DASNY	Establish student congregation areas addressing needs, security and minimizing risks associated with existing conditions
Broome	Sidewalk, lot and roadway upgrades	$100,000	DASNY	Continue effort to maintain and improve surfaces and appertenances of pedestrian and vehicle wayfinding
Broome	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for roof/structural repairs at their Binghamton residence.
Broome	Broome County, The Broome County Forum.	$1,500,000	DHCR	Broome County, The Broome County Forum. A major center of cultural activity in the Greater Binghamton region. Need: a full face lift both interior and exterior. The Forum Theatre Fatade Restoration project will provide the opportunity for this Performing Arts Complex to increase its user-base and bring regional attention to the capital campaign that will be necessary to solicit other public and private investment for the complete restoration of the interior. This project request could be the all important and extremely visible catalyst needed to begin that effort and lead the commitment to full restoration of this important landmark. Important regional cultural tourist attraction
Broome	Lourdes Youth Service	$1,818,963	DOH	Due to grant funding losses, Lourdes Youth Services needs funding in order to hire staff and support related costs that will reestablish critical evidence-based prevention and healthcare services for youth and families who have recently lost services inBroome and Tioga Counties. Family Support Program will hire 14 FTEs to work youth and their families providing evidence based programming to 544 participants who are high risk middle school students, teen parents and youth involved in the Juvenile Justice System. Student Assistance Program will hire 3 FTEs to provide alcohol/drug education to 600 local students. Mental Health Juvenile Justice Project will support 3 FTEs to provide therapeutic counseling, life skills and job skills interventions with 80youth and their families in the Juvenile Justice System. PACT home visiting program will hire 6 FTEs to offer supportive and educational services to 175 families from pregnancy until their child reaches age five. HOPE Project Parent Forum will hire 4 FTE

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

The goal: To provide Greater Binghamton with an aesthetically pleasing Gateway into our community. One that can be an economic generator for the entire region. This is ourcommunityÆs major Gateway and right now it is littered with abandoned, run down and less than aesthetically pleasing commercial enterprises. The State Department of Transportation has already agreed to transfer former DOT property to our local IDA to beused for potential development. We need funds to tear down a very large DOT storage facility and public works garage. We also need funds to remediate some potential environmental issues left behind by the DOT property. Major development site with easyaccess to Rte's 81, 88 and 17
Broome	Treatment Plant	$240,000	EFC	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Broome	Village Water System Storage Tank	$800,000	EFC	The project will provide a 250,000 gallon reservoir tank and 10 inch diameter transmission line for service to the Village of Windsor. This will enhance the Village water system with a redundant component and allow it to serve as an important part of theregional disaster relief plan, in addition to improving fire flows throughout the village and balance the overall water system to provide better service to the village.
Broome	Main Street Sanitary Sewage Facility	$3,250,000	EFC	The project will provide a municipal sewage collection/treatment system to the Main Street District of the Village of Windsor. Protection of the village aquifers will be enhanced by this project and economic development within the downtown area will be enhanced. Future growth will also be served by this project.
Broome	Airport Corridor Business Park	$15,000,000	ESD	Greater Binghamton Regional Airport cannot continue to operate without access to public sewer. Also plans have been prepared to construction a new business park adjacent to the airport. Current business that employs 200 people cannot continue to operatewithout public sewer. This project would pay to construct a seven mile sewer line from the Binghamton/Johnson City Sewer Connector at Choconut Center to the Greater Binghamton Airport and provide the infrastructure for the proposed business park. If theairport closes, 300 people will loose their jobs. If the business closes 200 people will loose their jobs. By developing a business park, a minimum of 300 new jobs would be created both during the construction phase and after.
Broome	Plastic Optical Links	$80,000,000	ESD	To finish the development of a plastic optical connector system to be used in avionics and in home' in place of copper. Reducing the weight of the plane therefore using less fuel. Also the will be more secure because the optical is immune to electrostatic discharges.
Broome	Bradywine Marketplace Business Park Development	$1,200,000	ESD	Develop an abandoned manufacturing facility and DOT garage into a construction & demolition debris recycling and reuse and constructs a gasification facility that turns waste into synthetic natural gas. Project would also convert abandoned building intoa year-round farmers market that sells local goods, included food stuffs and other products. This would clean up a blighted area, create jobs and provide ready space for others businesses to locate
Broome	Binghamton Honda Building	$700,000	ESD	Build new energy efficiant Building to expand and retain our store.A portion of our lease is to be terminated.Will keep 12 jobs and add 4 more.
Broome	Town of Union Sprucing Up Washington Avenue	$200,000	MAIN_ST	
Broome	Town of Whitney Point Downtown Revitalization Program	$330,000	MAIN_ST	
Broome	County, Municipal, & State Government Offices, OMRDD BROOME DDSO	$629,924	NYPA	
Broome	EPAC Energy Conservation program	$100,000	NYSERDA	we are looking for grant money to assist us in our energy conservation efforts. The past 2 month's heat and electric bill was over $4,500 each. The EPAC Theater is almost 100 years old and has never been insulated. The ceiling and roof in particular arevery large sources of energy waste. We have been told that insulating the ceiling and roof would save us 20%- 40% in heating and electric bills. We were told that it would cost approximately $100,000 to seal and insulate our roof. The roof's square footage is approximately 10,000. We are one of the very few ""anchors"" left here in the Endicott Washington Avenue Business district. We bring over 22,000 people each year down to the business district for performances, rehearsals, classes and meetings at our theater. Insulating the building would not only help with energy conservation efforts, but would certainly assist us in achieving our mission and helping us to remain a strong anchor for downtown Endicott NY. This project would reduce our ongoing expen
Broome	DDC system backbone	$465,000	NYSERDA	Establish network driven energy management system

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Broome	supplemental energy efficiency fund	$15,000,000	NYSERDA	to create a ôsupplemental energy efficiency fundö to ensure Restore NY projects (new construction/rehabilitation) help meet the GovernorÆs 45x15 goals.
Broome	Conversion of Street Lighting	$80,000	NYSERDA	Convert 457 -175 watt mv lights with 100 watt hps. This will use 30%less energy and provide 63 more lumens. Convert 76 -400 watt mv lights with 250 watt hps. This will use 37% less energy and provide 44% more lumens.
Broome	Energy efficient windows	$284,700	NYSERDA	In 2005, our agency consolidated all of its programs and services that were housed in 5 different locations to our current site situated in the former Johnson City Lincoln Elementary School located at 24 Cherry Street Johnson City, NY. We embarked on a capital campaign to renovate the site but still have a few projects that need to be completed. One of these projects is the replacement of 150 windows. The replacement of these antiquated windows with energy efficient windows will permit us to keep the cold out and heat in during the winter months and allow us to use less energy to heat and cool the building throughout the year. This will result in energy savings and allow us the opportunity to put those dollars back into direct programming for the children and families we serve.
Broome	Hybrid bus	$184,344	NYSERDA	Funds are being requested to purchase one 36 passenger hybrid bus. The purchase of a hybrid diesel electric bus is one of our efforts to become more ?green?. Hybrid technology is proven, clean and efficient. It is economically advantageous and environmentally friendly. The hybrid bus will be used to transport Head Start children attending Head Start programming at Family Enrichment Network which serves 336 children per year providing benefits not only to the environment but to the well-being of the children. The operation of a hybrid bus will reduce our fuel consumption (up to 70%); reduce emissions (up to 70%), and lower operational costs. The cost savings granted via the operation of a hybrid bus will allow us to allocate those dollars to direct programming for the families we serve.
Broome	Broome County, Extending broadband internet access to a large section of	$1,000,000	OFT	Broome County, Extending broadband internet access to a large section of rural Broome County in hopes of making it a model for all of rural Broome County. The primary goal of the Eastern Broome Internet Access Committee is to ensure that every householdand enterprise in eastern Broome have access to broadband service. It also hopes to; provide financial support for low-income households and/or start-up enterprises to utilize broadband; and to encourage and educate those households and enterprises lacking broadband motivation and/or skills to acquire them. No broadband service in parts of County
Broome	The Forum Performing Arts Theatre Historic Renovation Project	$1,500,000	OPRHP	The Forum is a significant and distinctive example of an early twentieth century theatre in the City of Binghamton and Broome County. Built in 1919, the structure is listed as a NYS Historic Building. Because of economic restrictions, the building has not been upgraded in 20 years. This project would restore the Theatre to its 1919 look by restoration of the facade, replacement of the marquis, painting and plaster repair in the main performance center, repairing and reopening of the box seats, replace seating to meet ADA requirements, enhance the sound system to accomodate the hearing impaired and
Broome	Village of Windsor Pool Project	$400,000	OPRHP	The project seeks to replace th 47 year old, presently closed swimming pool at Klumpp Park in the Village of Windsor with a modern and energy efficient facility that will encourage increased use for residents of all ages, support increased use of the park and help revitalize the community.
Broome	Binghamton City Schools, West Middle School	$166,000	SED

March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Broome	Broome County - Greater Binghamton Research and Development and Tec	$8,000,000	Thruway	Broome County - Greater Binghamton Research and Development and Technology Transfer Center...at Huron Campus. In partnership with the private sector, Broome County government, the IDA and Binghamton University, would create a major research and development center where technology transfers would be able to be developed and commercialized. In the 2008 State of Upstate speech, then-Governor Eliot Spitzer emphasized the stateÆs need to turn our institutions of higher education into an economic engine forgrowth. The Governor pointed out that currently BU lacked an incubator, ôwhere spin-off companies can commercialize that research and harness its potential for job creation.ö BU needs a place where emerging technologies can be transferred to the privatesector and further developed. This incubator will also provide space for global technology companies that want work at the BU's (CAMM). Center for Emerging Tech out of Binghamton U and Cornell U

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Cattaraugus	Shared Fuel Depot	$155,000	DASNY	This project entails the contruction of a shared fuel depot for the Hinsdale Highway Department, Hinsdale Fire District and Hinsdale Central School. Currently the town and school district each maintain separate fuel depots. The fire district purchases fuel from the both. The town fuel depot includes (1) 1,000 gallon tank for diesel and (1) 500 gallon tank for gasoline. These tanks and pumps are late 1970's vintage and need to be updated. The school has underground diesel and gasoline tanks installed approximately 9 years ago. On multiple occassions, groundwater has infilltrated the tanks and has caused costly and unecessary repairs to the school buses and some of the fire equipment. This project would include the purchase and installation of (1) 3,500gallon tank for diesel and (1) 500 gallon tank for gasoline. The fuel pumps would be a secure computerized system, maintained at the town highway garage.Each entity would have both vehicle and user cards to account and control fuel usage. Fuel charges wogenerator would be installed to provide the necessary electricity in the event of power outages. Due to the very rural nature of the community the availability of the highway and fire equipment is essential for public safety. The fire district covers oveghways and Interstate 86. The town maintains over 54 miles of town roads. This project could be completed within 6 months and would require local building permits.
Cattaraugus	Addition & Update to Town Hall	$45,000	DASNY	We have an old, small town hall. We are planning to update bathrooms to make them handicapped, add an addition so will have offices, meeting room, records room, new energy efficient heating, insulation, windows and lighting. The approximate addition sizeis 25x 40 feet. We are a small rural community who needs this addition so we can have a community center for towns people and our community to use. It will give us visible hope that our area is giving back to our community by hiring local workers to complete a job that is necessary and a sign of hope and prosparity to the area.
Cattaraugus	Salt/Sand Storage Shed	$19,200	DASNY	The estimated dollars are for profession services necessary for a new salt/sand storage building through completion ready for use.
Cattaraugus	Town Barn Door Replacement	$11,500	DASNY	Replace (5)dilapidated overhead door on Town Equipment building. Severe heat loss. Small Town - unable to add to budget in foreseeable future.
Cattaraugus	Peter Cooper Super fund Reuse Project	$1,850,000	DEC	Remediation and reuse of the Peter Cooper Super Fund Site as Zoar Vally Gateway Park.
Cattaraugus	Five Points Landfill - Leachate Improvements	$800,000	DEC	Develop on-site leachate treatment
Cattaraugus	Maple Street Drainage	$250,000	DEC	Old closed drainage, which includes old hot water tanks for culverts needs replacement. The Village has brought in specific equipment for cleaning closed drainage, which was not successful. During heavy rainstorms, some homeowners experience water ponding on their properties.
Cattaraugus	Installation of fuel depot for use by Town/Fire District	$85,000	DEC	Installation of fuel depot for use by Town/Fire District
Cattaraugus	Step 1 feasibility study to constitution traffic study I-86	$400,000	DEC	Step 1 feasibility study to constitution traffic study I-86
Cattaraugus	Stream bank stabilization	$375,000	DEC	Stream bank stabilization
Cattaraugus	Glacial Aggregates, LLC - Gravel Pit, Town of Yorkshire	$0	DEC	Glacial purchased property in 1999 with the intention of establishing a mining operation to supply sand and gravel to the Western NY market. Subsequently, legal issues have ensued between the Town of Yorkshire, Glacial, et al. Glacial remains committedto this project, and seeks assistance, in light of the stimulus plan, to eliminate roadblocks which are hindering its ability to get its business started.
Cattaraugus	Village of Ellicottville - Stream Stabilization	$250,000	DEC	Stabilize 4500 lf of stream banks along Great Valley Creek and Elk Creek utilizing heavy stone fill
Cattaraugus	Village of Gowanda - Peter Cooper Superfund	$2,200,000	DEC	Remediation and reuse of the Peter Cooper Superfund Site as the Zoar Valley Gateway Park
Cattaraugus	Village of Gowanda - Water Dam Project	$300,000	DEC	Rehabilitation of raw water dam, gate house and spillway

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail

County	Project	Requested $	State Agency	Additional Detail
Cattaraugus	Potable Water Tank Replacement	$500,000	EFC	1935 vintage 200,000 gallon potable water storage tank needs to be replaced. In 2000, the plans were to sandblast the interior of the tank, because the wall was so thin, it was hand scraped instead. Would like to replace the tank with a glass lined 400,500 gallon tank to provide more standby capacity for the community and new industry.
Cattaraugus	Replacement existing wastewater pump station East Olean	$2,800,000	EFC	Replacement existing wastewater pump station East Olean
Cattaraugus	Construct 300 000 gallon tank 3500ft of 10"transmission	$1,500,000	EFC	Construct 300 000 gallon tank 3500ft of 10"transmission
Cattaraugus	Install of treatment facilities & transmission water source	$5,000,000	EFC	Install of treatment facilities & transmission water source
Cattaraugus	Line sewer lines to eliminate infiltration	$1,000,000	EFC	Line sewer lines to eliminate infiltration
Cattaraugus	Replacement wastewater interceptor	$5,500,000	EFC	Replacement wastewater interceptor
Cattaraugus	Reclaim and add to existing road base and stabilize	$1,500,000	EFC	Reclaim and add to existing road base and stabilize
Cattaraugus	Exit 24 Water & Sewer Project	$1,200,000	EFC	The Town of Allegany is trying to provide water and sewer to an area of the Town that is ripe for development. A local developer and our local hospital are proposing the building of an ambulatory health facility at this site - making water and sewer a must. The location is right off Interstate 86. The project calls for approx. 3300' of water lines and the same for sewer lines.
Cattaraugus	Sanitary Sewer Rehabilitation Project	$958,995	EFC	Clean, inspect, repair and line 24,000 linear feet of sewer lines in the Village Waste Water System. Previously the Village had secured a $1,740,000 loan through NYS Environmental Facility Corp. to rehab the first 6,200 ft. of our System.
Cattaraugus	Town of Ashford drinking water project	$3,208,500	EFC	New surface water treatment rule compliance facility, upgrade ground water source
Cattaraugus	Village of Cattaraugus - Water Supply	$1,325,500	EFC	Reconstruction of spring boxes, replacement of pipe, construction of UV Treatment Building
Cattaraugus	Village of Ellicottville - Jefferson Street	$1,000,000	EFC	Line existing sewer lines to eliminate infiltration to free capacity for grown on Jefferson Street
Cattaraugus	Village of Ellicottville - WWTP Nitrification Project	$1,500,000	EFC	Add treatment component to help achieve SPDES permit discharge limits for ammonia in summer
Cattaraugus	Village of Gowanda - Wastewater Treatment	$1,200,000	EFC	Construct a new grit removal system and upgrade the pump controls and digestion mixing system
Cattaraugus	Village of Gowanda - Water System Connection	$1,600,000	EFC	Provide an inter-connection with the Town of Collins and NYS Corrections Facility Water System
Cattaraugus	Village of Gowanda - Water System Improvement	$1,725,000	EFC	15,900 lineal feet of water line replacement and booster pump station construction
Cattaraugus	Village of Gowanda - Water Treatment Improvement	$200,000	EFC	Construct Water Treatment Plant System Improvements to allow for use of the backup wells on Hill Street
Cattaraugus	Village of South Dayton - Laboratory Building	$75,000	EFC	Construction of new WWTP building (20' by 15') inside the fenced compound area with updated electrical panels
Cattaraugus	Sewer and water line extended from Village of Allegany to trailer park on 41	$800,000	EFC	Sewer and water line extended from Village of Allegany to trailer park on 417 A large trailer park (150-200 units) and developable land around Exit 24 make a sewer and water line extension along Route 417 an important tool for further development in this area that is adjacent to the Village of Allegany. Current estimated cost for this project is $700,000 to $800,00
Cattaraugus	Water Main Rehabilitation Project	$2,859,814	EFC	Replace 9,887 feet of 8 inch village water main and service connections (home, business, fire hydrants).
Cattaraugus	dwsrf 17589	$1,000,000	EFC	complet new water system, town will be taking over private wate company that has not had any major repair in over 25 years.
Cattaraugus	Historic Hollywood ADA Compliance Restoration	$300,000	MAIN_ST

Estimated cost: $175,000.00 Solar: Solar panels placed on the roof to generate electricity for outdoor lighting and interior common spaces. Estimated cost: $475,000.00_ Generator: A building gen

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Cattaraugus	Olean Pines - Energy Improvements	$550,000	NYSERDA	Replace ventilation air handling unit with exhaust fans with heat recovery, replace laundry room air handling units with exhaust fans with heat recovery, heat recovery for laundry
Cattaraugus	Olean County Center Office Building	$170,000	NYSERDA	Building envelope improvements and water conservation project and windows
Cattaraugus	Little Valley County Center & Jail Energy Improvements	$50,000	NYSERDA	Building envelope improvements and water conservation project
Cattaraugus	Pines Machias Nursing Facility	$150,000	NYSERDA	Energy recovery unit for B-wing and cooling system for server room and beauty shop
Cattaraugus	City-wide energy project to replace old equipment	$5,300,000	NYSERDA	City-wide energy project to replace old equipment
Cattaraugus	American Recovery and Reinvestment	$175,000	NYSERDA	Energy efficiency: upgraded lighting, roofing and appliances for both the residential and commercial spaces
Cattaraugus	American Recovery and Reinvestment	$475,000	NYSERDA	Solar: Solar panels placed on the roof to generate electricity for outdoor lighting and all interior common spaces
Cattaraugus	Highway Garage Energy Conservation	$75,000	NYSERDA	The Town of Hinsdale maintains a highwaygarage that includes two buildings. One building includes the town offices and two truck bays. The second building has two insulated and heated truck bays and a large uninsulated and unheated garage. The unheated/uninsulated portion stores two of the towns dump trucks, loader and other heavy equipment. In the winter months the dump trucks and loader must utilize block heaters to maintain the proper temperature for the diesel engines. These block heaters use electricity which is costly to the town. The proposal is to insulate the walls, doors and ceiling of the uninsulated portion thus reducing energy consumption. Additionally, energy efficient gas furnaces would be installed. The project would also include replacing 6 windows in the office portion of the building.
Cattaraugus	High Speed Internet Access	$2,000,000	OFT	Cattaraugus County is a rural area. Many of the local municipalities are isolated and lack modern amenities such as access to broadband internet access. If rural areas in Cattaraugus County had broadband internet access it would open up many opportunitie
Cattaraugus	Develop a website for the town and village of Franklinville	$5,000	OFT	Develop a website for the town and village of Franklinville
Cattaraugus	Cattaraugas County, Municipal Wireless setup	$11,030,432	OFT	Cattaraugas County, Municipal Wireless setup and the first years costs. - Providers that received $ from the gov't to extend networks are not extending their high-speed networks. Project would give most residents access to low-cost, high-speed internet and Free Internet Access in town centers, starting in towns needing high-speed internet the most (based on residents, # of businesses and vacant bldgs). In dealing with each town, need to keep zoning costs as low as possible. Benefits: Bring in new businesses; keep existing businesses. More $ would come to local businesses. Municipalities that have 'dead zones' could use towers for other comm. hardware for emergency crews. Would create/retain jobs for an excavation crew of 2-4, 4 concrete workers, and 4construction workers. To set up/support the network at least 3 FT jobs would be created. When project has completed in a town the high-speed internet would act as a catalyst for residents to feel more comfortable and businesses to grow and create/bring

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Cattaraugus	Southern Tier Fiber Build Project	$4,500,000	OFT	Southern Tier West has set up a not for profit, which would own this 115 mile open fiber network that will stretch across our region of Chautauqua, Cattaraugus and Allegany Counties of New York State. The project would create a significant number of spurs or points of presence in order to make broadband a realistic option for the many companies in the rural areas across our region. The partnerships of Southern Tier West, Dunkirk Fredonia Telephone (DFT), Finger Lakes Technology Group, and ION Corporation will enable this fiber to grow in its utilization over a short period of time. This project will create revenue that will be used to expand the project into the rural areas without additional federal or state funds. Allegany, Cattaraugus and ChautauquaCounties of New York State are within a very rural region, these three counties have below-state and below-national per capita income levels, and above-state and above-national unemployment rates. This three county region is under-served by communicatiolate business development of both new and existing businesses. There will be retention and expansion of existing businesses.
Cattaraugus	Hinsdale Fire Hall	$800,000	OHS	This project is to construct a new firehall to replace our fifty year old structure which is costing taxpayers many dollars each year for heating costs and maintenance. This building also serves the community as the local emergency shelter for the town.T

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Cayuga	Police Precincts and Stations	$94,500	NYSERDA	Police Precincts and Stations
Cayuga	Lighting Retrofit, BIPV roof, PV array	$1,018,790	NYSERDA	Replace 30 year old lights with lower energy lighting in Spartan Hall; Replace 50 year old roof with integrated photovaltaic cells; Install photvaltaic cells on Spartan Hall roof
Cayuga	Cayuga County, City of Auburn Anaerobic Digester Energy Facility	$9,300,000	NYSERDA	Cayuga County, City of Auburn Anaerobic Digester Energy Facility -Cayuga County and the City of Auburn are working with a consortium of Cayuga County dairy farms, energy consultants, and the Cayuga County Public Utility Service Agency (CCPUSA) on the development of a coordinated energy development and distribution project that would link site specific methane bio-digester facilities on up to fifteen (15) large dairy operations in central and southern Cayuga County that would produce methane gas and/or generate electricity for distribution to private and/or public consumers within the County through CCPUSA. This project would be a significant step in the CountyÆs strategic plan to utilize CCPUSA and alternative energy sources to drive economic development, support agribusiness and foster environmental stewardship of the CountyÆs natural resources. This project supports a key sector in the regional economy -- renewable energy -- and leverages regional assets in agriculture and technology

County	Project	Requested $	State Agency	Additional Detail
Cayuga	Brister Mills Development	$1,800,000	OPRHP	Brister Mills is intended to be a blend of the new and historic. Located on the northern gateway to Auburn?s Downtown Corridor, Brister Mills is a necessary revitalization of three abandoned and underutilized acres in the city of Auburn. The mixed-use development will be a balance between residential, dining, commercial, and tourism. The four factions of the project will create a diverse community where the people can live, work, tour, and celebrate Auburn. The residential portion of the project is partof the historic rehabilitation of the C.W. Brister and Son Flour Mill. The building is a prime example of the manufacturing history of Auburn, as well as a rich source of architectural uniqueness developed through decades of expansion. C.W. Brister andSon holds a strong connection with residents of the area, as many people have known family and friends who were employed during the company?s decades of business. The rehabilitation of the flourmill will incorporate every structure of the original manufae feet of livable space. The structures manufacturing nature will be preserved to give a true urban loft style, which is rarely associated with the Auburn housing stock. Two of the apartments will have mezzanine designs, which split the living space fromThe three-story brick structure with a walk out basement will have four efficiency apartments each approximately 900 square feet. The original window designs will be reintroduced into the building but with superior thermal and green qualities. Exposed br

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Chautauqua	Cold mill and recycle 7 miles of cty roads	$500,000	DOT	Cold mill and recycle 7 miles of cty roads
Chautauqua	Dunkirk lighthouse reconstruction	$60,000	DOT	Dunkirk lighthouse reconstruction
Chautauqua	Village of Cherry Creek - culvert replacement	$250,000	DOT	Village of Cherry Creek - culvert replacement
Chautauqua	NYDDOT Route 394 Stret Improvements	$1,890,000	DOT	The project consists of complete street reconstruction on the eastbound section of NYSDOT Route 394 (5th Street). This section of roadway is a City owned street which is marked as a State Touring Route. The repair work will occur from the State owned 6thStreet Bridge over the Chadakoin River, to Washington Street. This section of roadway is approximately 0.43 miles long. The majority of the road width is 32?with one block at the bridge transition widening to 40?. The existing condition of the street surface is poor. The estimated cost breakdown for the associated reconstruction is listed below; Pre Construction Cost $ 390,000 Construction cost $1,300,000 Contingency (10%) $ 130,000 Construction Management $ 200,000 Total cost $2,020,000
Chautauqua	NYSDOT Route 394 Westbound	$300,000	DOT	The project consists of street repairs on the westbound section of NYSDOT Route 394 (6th Street). This section of roadway is a City owned street which is marked as a State Touring Route. The repair work will occur from the State owned 6th Street Bridge over the Chadakoin River, to Prendergast Avenue. This section of roadway is approximately 0.75 miles long. The road width varies from 32? to 40?. The condition of the street surface ranges from poor, to very good in the areas that were recently reconstructed. It is the City?s intention to have sections of the curbing that are in poor condition replaced. Upon completion of the curb replacement various full, face of curb to face of curb, width sections of the street will be machine milled, to varying depths as required, and then repaved. The sidewalks are in generally good shape throughout the project. Any bad blocks will be replaced as needed. See the attached Repair Breakdown.
Chautauqua	Cattaraugus County - Otto Bridge #14	$600,000	DOT	Bridge Replacement
Chautauqua	Cattaraugus County - Ashford Bridge #24	$800,000	DOT	Bridge Replacement

This section of Route 394 is the main collectorstreet, handling a majority of eastbound traffic through Jamestown, and is the only section of NYS Route 394 not owned by the Sta Create construction jobs that will lead to a more competitive region
Chautauqua	Jamestown Gateway Station and River Connector Project	$2,887,000	DOT	Jamestown Gateway Station and River Connector Project Rehab the former Erie Railroad Station and construction of an approx. 3156 FT extension and pedestrian bridge to an existing trail. Located in the City's downtown business district, it will serve asan intermodal transportation facility for the Chautauqua Create construction jobs that will lead to a more competitive region by rehabing a historic building in a central area of the city where ESD has already invested resources.
Chautauqua	Town of Ellery Highway Facility	$1,700,000	DOT	Town of Ellery Highway Facility Construction of new highway office building, maintenance shop and storage garage Create construction jobs that will lead to a more competitive region
Chautauqua	Gateway Intermodal Station and Visitors Center	$3,000,000	DOT	Rehab the former Erie Railroad Station and construction of an approx. 3156 FT extension and pedestrian bridge to an existing trail. NEPA Complete August 2008 US Dept of Labor Approval Sept. 2008 Located in the City's downtown business district, it will serve as an intermodal transportation facility for the Chautauqua Area Regional Transit System (CARTS), inter-city buses, bicyclists, pedestrians, and as a tourist welcome center for the Jamestown and Chautauqua Regions. The Gateway Station connect the central business district to the riverfront. The RR station is listed on both the state and national Registers of Historic Places. The City's Urban Design Plan (UDP) focuses on remedying chronic problems that have plagued Jamestown's urban landscape for decades. Project completion will advance a key initiative of the UDP, strengthening the downtown core with new, high quality restoration development, serving as a catalyst for future private investment and a gateway to our riverfront.

Chautauqua	Village of Cherry Creek - upgrade treatment facility	$2,879,304	EFC	Upgrade treatment facility to meet new surface water treatment rules and upgrade distribution system
Chautauqua	Village of Cherry Creek - water well	$3,000,000	EFC	Development of potable water well and transmission facilities
Chautauqua	Village of Forestville - Drinking water	$200,000	EFC	upgrade distribution system
Chautauqua	Village of Forestville - water well	$6,000,000	EFC	Develop additional water source well and transmission main
Chautauqua	Village of Mayville - Drinking Water	$2,884,000	EFC	Upgrade ground water source, transmission, storage, and distribution system
Chautauqua	Village of Mayville - Production Water Well	$800,000	EFC	Development of a potable water well and transmission lines
Chautauqua	Village of Sherman - Water Transmission	$300,000	EFC	Develop 2000+ feet of water transmission mains for village residents
Chautauqua	Village of Sinclairville - drinking water #1	$50,000	EFC	Upgrade ground water source, upgrade pump station
Chautauqua	Village of Sinclairville - drinking water #2	$45,000	EFC	Upgrade distribution system
Chautauqua	Village of Westfield - drinking water Project #1	$54,167	EFC	upgrade distribution system
Chautauqua	Village of Westfield - drinking water Project #2	$90,305	EFC	Oak Street - upgrade distribution system
Chautauqua	Village of Westfield - drinking water Project #3	$1,787,416	EFC	Upgrade water treatment plant
Chautauqua	Village of Westfield - drinking water Project #4	$597,423	EFC	East Main Street, upgrade distribution system
Chautauqua	Village of Westfield - drinking water Project #5	$257,206	EFC	East Main Street and Cass Street, upgrade distribution system
Chautauqua	Village of Westfield - drinking water Project #6	$600,000	EFC	Clean and reconnect waterlines, upgrade distribution system
Chautauqua	Town of North Harmony Sewer Extension	$0	EFC	South Center Sewer Dist. Is willing to extend the sewer along the West side of Chautauqua Lake to connect with the Town of Chautauqua at Prendergast Creek. Town of North Harmony is willing to underwrite the engineering study if funding for the project can be obtained.
Chautauqua	Town of Portland Drinking Water, Route 5 and Walker Road-Water District #	$1,699,500	EFC	Town of Portland Drinking Water, Route 5 and Walker Road-Water District #7 Serve 218 parcels currently on insufficient wells Create construction jobs that will lead to a more competitive region
Chautauqua	Village of Westfield Water Treatment Plant Improvement	$100,000	EFC	Village of Westfield Water Treatment Plant Improvement Replace inefficient filter backwash pumps Create construction jobs that will lead to a more competitive region
Chautauqua	Town of Busti Drinking Water, Water District #7	$750,000	EFC	Town of Busti Drinking Water, Water District #7 Extend distribution system Create construction jobs that will lead to a more competitive region
Chautauqua	Village of Forestville Drinking Water Meters	$720,000	EFC	Village of Forestville Drinking Water Meters Install ~400 water meters and related appurtenances on previously unmetered services Create construction jobs that will lead to a more competitive region
Chautauqua	South & Center Chautauqua Lake Sewer District- Treatment Works Equipm	$2,216,650	EFC	South & Center Chautauqua Lake Sewer District- Treatment Works Equipment Replace mechanized components Create construction jobs that will lead to a more competitive region
Chautauqua	South & Center Chautauqua Lake Sewer District- Sewer Reconstruction	$1,171,040	EFC	South & Center Chautauqua Lake Sewer District- Sewer Reconstruction Repairs & restoration at 130 locations within sewer district Create construction jobs that will lead to a more competitive region
Chautauqua	South & Center Chautauqua Lake Sewer District- SCADA/Backup Power	$630,300	EFC	South & Center Chautauqua Lake Sewer District- SCADA/Backup Power Update SCADA and install generator at major pump station Create construction jobs that will lead to a more competitive region

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Chautauqua	City of Dunkirk Drinking Water Treatment Plant Phase I	$6,762,000	EFC	City of Dunkirk Drinking Water Treatment Plant Phase I Water Treatment Plant Phase I - Water Treatment Plant Physical Improvements û Project to include a complete overhaul of Electrical, HVAC, Roof, Lift Pumps, Valves and electrical controls and ventilation systems.á Existing Tanks to be repaired and tunnel I Create construction jobs that will lead to a more competitive region
Chautauqua	Village of Brocton Water Treatment Plant Maintenance	$114,000	EFC	Village of Brocton Water Treatment Plant Maintenance Replace filter sand and upgrade critical valves in treatment plant Create construction jobs that will lead to a more competitive region
Chautauqua	Village of Sinclairville Water Well Rehabilitation	$75,000	EFC	Village of Sinclairville Water Well Rehabilitation Clean wells, replace failing pumps and upgrade well houses Create construction jobs that will lead to a more competitive region
Chautauqua	Village of Sherman Water Transmission Program	$600,000	EFC	Village of Sherman Water Transmission Program Replace 2000+ feet of water transmission mains that are failing Create construction jobs that will lead to a more competitive region
Chautauqua	City of Dunkirk Waste Water Treatment Project	$3,800,000	EFC	City of Dunkirk Waste Water Treatment Project This project will replace 2 presses at this facility and improve the water quality discharged into Lake Erie as well as the plant capacity to accommodate industrial growth in the City Create construction jobs that will lead to a more competitive region
Chautauqua	City of Dunkirk Water Meter Replacement	$1,375,000	EFC	City of Dunkirk Water Meter Replacement Replace 4,600 old, inaccurate meters with modern, radio read meters Create construction jobs that will lead to a more competitive region
Chautauqua	City of Dunkirk Water Treatment Phase II	$7,894,000	EFC	City of Dunkirk Water Treatment Phase II Distribution System Improvements - Installation of 2 new water towers, Increase the capacity of Booster stations and install new mains serving Vineyard Drive. Replace 1st ward waterline Create construction jobsthat will lead to a more competitive region
Chautauqua	City of Dunkirk Flood Abatement	$500,000	EFC	City of Dunkirk Flood Abatement This project will provide flood protection for this vital pumping station which is responsible for moving sewage from western Dunkirk, the Chautauqua County Home, the Town of Dunkirk across town to the Waste Water Plant.This area flooded in 2008 Create construction jobs that will lead to a more competitive region
Chautauqua	Extension of Public Sewer Service to Ashville	$14,325,000	EFC	Extend sanitary sewer to serve approximately 392 primarily residential structures currently served by onlot septic systems in unsuitable soils on small lots with drinking water wells. Wastewater Treatment would be provided at the South & Center Chautauqua Lake Sewer Districts (S&CCLSD) Water Pollution Control Facility (Wastewater Treatment Plant - WWTP). The project is within existing S&CCLSD boundaries and shall protect human health as well as benefit Chautauqua Lake and thus the Upper Allegeny Watershed with the addition of 49,000 feet of new sewers. Refer to our website http:www.co,chautauqua.ny.us/sewer/scclsd.htm for additional project specifics. The S&CCLSD, a Chautauqua County Sewer Agency, was formed in 1969 to protect public health and the environment. Planning studies had documented the critical need to provide sewer extensions and sophisticated wastewater treatment. Projects addressing a portion of those needs were Federally funded ($40,000,000 Federal Grant Funds represent 80% of total prothe Federally funded Wastewater Treatment Works was sized to be a regional facility at a cost in excess of $20,000,000 (1980 dollars, $80,000,000 now.) There exists 40% unutilized wastewater treatment capacity for this publically funded facility that isay be addressed by the proposed project. THIS PROJECT WILL INITIALLY REQUIRE AN ENGINEERING UPDATE OF THE 1985 ASHVILLE SEWER PLANNING STUDY AND SUCH ARRANGEMENTS ARE IN PROGRESS. IN ORDER TO PROCEED QUICKLY WITH DETAIL PLANNING AND DESIGN, AERIAL MAPPIN
Chautauqua	Gowanda's Historic Hollywood Theater	$4,284,426	ESD	Restoration of a 1926 historic theater

County	Project	Requested $	State Agency	Additional Detail
Chautauqua	Sprng Street Ramp Rehabilitation	$1,700,000	ESD	This is the main parking garage on the city's East end of the Downtown Business District. In excess of 30 years in age, the structure is in dire need of repair and rehabilitation. Many of the businesses in this sector of the CBD rely upon acces to this structure to maintain thier flow of customers. Without repair and rehabilitation the structure could be subject to closure and force businesses that rely upon it to choose whether to stay in the CBD or relocate to the suburbs and cause further decay of our downtown.
Chautauqua	Main Street Sherman	$284,875	MAIN_ST	
Chautauqua	Main Street Westfield	$446,125	MAIN_ST	
Chautauqua	Main St Revival - Social Entrepreneurialism	$141,750	MAIN_ST	
Chautauqua	Jamestown Urban Design Area Revitilization	$500,000	MAIN_ST	
Chautauqua	Village Hall Roof Replacement - Historic Building	$475,000	MAIN_ST	Project is to reconstruct the exterior roof of Village hall and the 1891 Opera House historic building. The project encompasses roof demolition and replacement, yankee gutter reconstruction, upper entablature and cornice replacement, exterior painting an
Chautauqua	Transmission Line	$5,500,000	NYPA	Transmission Line
Chautauqua	City Hall Energy Efficient Program	$2,500,000	NYSERDA	City Hall Energy Efficient Program
Chautauqua	Olean Pines - Energy Improvements	$550,000	NYSERDA	Replace ventilation air handling unit w/exhaust fans w/heat recovery, replace laundry room air handling units w/exhaust fans w/heat recovery, heat recovery for laundry
Chautauqua	Olean Office Building	$170,000	NYSERDA	Building envelope improvements and water conservation project and windows
Chautauqua	L.V. County Center and Jail Energy Improvements	$50,000	NYSERDA	Building envelope improvements and water conservation project
Chautauqua	Pines Machias	$150,000	NYSERDA	Energy recovery unit for B-wing and cooling system for server room and beauty shop
Chautauqua	Building Trades & Sustainability Incubator Center	$1,000,000	NYSERDA	Building Trades & Sustainability Incubator Center - Rehab of existing space in downtown Buffalo to provide short term certificate programs in green technology, HVAC and sustainability with on-the-job training in the community. Will target one of the nation's highest unemployed minority population in the City of Buffalo. This project will create jobs in a highly distressed area. The project will create construction jobs along with creating a pool of of trained workers.
Chautauqua	Dunkirk City Hall Energy Efficiency Program	$2,500,000	NYSERDA	Dunkirk City Hall Energy Efficiency Program Public Infrastructure and Rehab - City Hall has fallen into disrepair and has not been updated to current efficiency standards Create construction jobs that will lead to a more competitive region
Chautauqua	Broadband Fiber Installation	$6,500,000	OFT	Broadband Fiber Installation
Chautauqua	Broadband Fiber Installation Falconer, NY to Whitesville, NY and Jamestow	$6,500,000	OFT	Broadband Fiber Installation Falconer, NY to Whitesville, NY and Jamestown, NY to Warren, PA No cost-competitive broadband fiber exists from Falconer, NY to Whitesville, NY or from Jamestown, NY to Warren, PA leaving the Southern Tier region at a severeeconomic disadvantage. This bi-state initiative would complete the final segments of two fiber networks Create construction jobs that will lead to a more competitive region
Chautauqua	Eastern Chautauqua Wireless Project	$550,000	OFT	This project will utilize the 700 megehertz bandwidth spectrum to provide wireless broadband to an area in eastern Chautauqua and western Cattaraugus counties. This project will serve an area that does not have access to dsl or cable and partners with Dunkirk Fredonia Telephone to this wireless service. The towns servied include Forestville, Cherry Creek, Villenova, South Dayton and portions of others.
Chautauqua	Hose Tower Reconstruction	$150,000	OHS	The hose tower facade continues to leak and has caused considerable damage to the interior of the adjacent spaces of the fire station. This project would replace the entire exterior of the tower and replace all damaged structural and interior finishes.

Chenango	City Administrative Offices	$350,000	DASNY	Completion of Interior Renovation of 3rd fl of Firehouse, enable relocation of city hall offices and permit the sale of the existing city hall.
Chenango	Village of Sherburne - new Electric Dept and Highway Dept Operations Cer	$1,200,000	DASNY	
Chenango	Chase Memorial Green House Project	$4,000,000	DASNY	The Chase Green House project includes construction of 8 self-contained homes designed to accommodate ten elders each requiring skilled nursing care. These homes will replace the existing 80 bed nursing home, which was constructed nearly 40 years ago and is functionally obsolete. Each resident will have his/her own private room and bathroom facilities and each house is equipped with a living room with working fireplace and dining room for the ten people living in that house. Gone will be the long hallways, double rooms, and large dining rooms of the traditional, medical model. In our small community located in Chenango County of about 1,000 people, we have raised $1.2 million, an impressive amount for a rural, depressed community. We have recently been informed by Congressman Arcuri's office of an earmarked amount of $250,000. The project was approved by NYS Department of Health in February 2008 with targeted construction date of August 2008. We were not able to meet this date as the long term indebtfirst nursing home in the country to bring the Eden Alternative to residents living in a nursing home...the integration of children, companion pets and gardens and plant life with the care of the seniors living in the nursing home. This program has growernationally since its inception at Chase in 1992. With the assistance of additional funding and another $500,000 that possibly could be raised locally, Chase Nursing Home hopes to demonstrate that Green House projects can be developed throughout the sta

Chenango, Delaware, Otsego, Schol	CULVERT REPAIR BLOCK	$3,310,000	DOT	CULVERT REPAIR BLOCK Originated from Culvert Block 9TCR10.
Clinton	T. of Schuyler Falls Housing Rehabilitation 2008	$200,000	CDBG	
Clinton	Adirondack Residential Center	$750,000	CDBG	Continued investment in rehabilitation of ajudicated children
Clinton	City of Plattsburgh Public Works Projects	$500,000	CDBG	Other Projects - Downtown Improvements
Clinton	Downtown Improvements	$500,000	CDBG	The City of Plattsburgh's Municipal Parking Lot, which serves the downtown business district and residents with over 400 parking spaces, is in severe disrepair. The City needs an investment to provide the much needed rehabilitation to this important municipal resource.
Clinton	Water Meters with radio controlled billing	$100,000	CDBG	The purchase and installation of 500 new water meters with radio controlled billing information. Will reduce water consumption among users and will improve tracking for better water management by Town. Will reduce fuel consumption by reducing time Town crews take to collect usage data. Project is ready to go.
Clinton	Municipality building for the Village of Dannemora	$3,000,000	DASNY	We have been trying to put a municipality building for the Village of Dannemore. In this building would be the fire department, the village office, town library, State Policy, and village court room. The problem we are having is that yes we have the biggest max prison in the state located here, but the tax base is very low for this village. So what I am asking is if there is any way you could help us with the 3 million dollar bill to put up this municipality building to help ease the tax burden on the people who live in the village.
Clinton	Health Facility Roof Repair	$150,000	DASNY	The roof on this building is in poor repair and needs to be addressed. In doing so, several people will be put to work over an extended period of time in the preparation, repair and covering of this facility.
Clinton	Road work	$75,000	DASNY	Road ways leading into and around the campus are in very bad shape. The road ways need to be resurfaced. The only reason for a 30 day delay is winter. This will keep people busy for months.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Clinton	Town Hall/Highway Garage Project	$500,000	DASNY	The construction project is to consolidate our Town Hall & Highway Garage to replace woefully inadequate existing structures. The current Town Hall cannot be made handicap accessible because of location of surrounding buildings. The circa 1900 Town Hallbuilding lacks insulation and the infrastructure to accommodate town business. The current Highway Garage is housed in 1950 era temporary huts erected by the Department of Defense to house support personnel for the onsite missile silo. The Highway Garagehas no insulation, drainage, and is rapidly becoming a safety hazard for our employees. The new structure will be 120 x 90 feet. The new facility will be centrally located in the town. The town has been saving funds for 20 years for this facility tryingnot to burden the local taxpayers many of whom are elderly. We have already invested approximately $200,000 and are working with an engineer and architect to make this facility as ?green? and multipurpose as possible.
Clinton	Construction of Municipal building in Dannemora, NY	$3,000,000	DASNY	This project is for the construction of a municipal building that will serve as a fire department, village office, town library, state Police and village court room for the Village of Dannemora.
Clinton	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for HVAC upgrades at their Plattsburgh residence.
Clinton	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for residential renovations and expansion of their Plattsburghresidence.
Clinton	emergency shelter/upgrade civic center	$3,200,000	DASNY	two towns and village plan to upgrade present civic center to ensure the citizens of this community have a safe haven in time of disaster. The end result will also be an upgrade of sections of the building. When not used as a shelter, the upgraded sections will be used for public activities from all three municipalties.
Clinton	City of Plattsburgh Public Works Projects	$2,000,000	DEC	Environmental Services Projects - Akey Landfill
Clinton	City of Plattsburgh Public Works Projects	$4,700,000	DEC	Environmental Services Projects - Drinking Water storage Tanks
Clinton	Akey Landfill	$4,500,000	DEC	In the mid 1990's,NYSDEC informed the City of Plattsburgh that it was required to re-close the Akey Landfill using a higher standard of containment. The City was placed on a list for matching funds, and has been waiting since that time. The deadline for re-close is 2010, but there are currently no matching monies available from NYSDEC. The project is completely designed and ready to begin but for funding.
Clinton	Reservoir Dams	$5,500,000	DEC	The source of drinking water for the City of Plattsburgh is three reservoirs, each created by its own dam. All three dams are in need of rehabilitation, and tow require the construction of auxiliary spillways.
Clinton	Mountain Top Senior Housing	$30,000	DHCR	Mountain Top Senior Housing is a federally subsidized senior/handicapped facility. It takes every cent of the rent to keep running. Our water has gone up 550% (times 18 units); our fuel is way up and our sewer is outrageous. Without assistance from outside sources, the facility will be unable to operate and eighteen senior/handicapped residents will be without a home.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
Clinton	Town of Dannemora Fitness Campaign	$125,000	DOH	The Town of Dannemora would like to create a exercise areas for all age groups in existing recreation areas to include the town?s beach and playgrounds. The majority of the funds will be spent on an outdoor fitness system that can be used by teens and adults of all fitness levels. Our goal is to bring the ?gym experience? outside to inspire the local community to move towards better fitness. We envision a nature walking path with fitness stations at regular intervals. The remainder of the funds will beto purchase landscape structure playground equipment to be installed at our parks. This equipment would be safe for ages up to 12 years old and would blend in with the natural setting. Our current playground equipment is decades old and bordering on unsafe. The town currently has no physical fitness opportunities to offer our citizens. These projects would improve the overall well-being of the town residents young and old.

County	Project	Requested $	State Agency	Additional Detail
Clinton	Delaware and Hudson Railway Station Restoration	$660,000	DOT	The D&H Railroad Station in Rouses Point was in continuous use from its construction in 1889 until it was abandoned by the Canadian Pacific Railway in the early 1990s. In 2002, the Village of Rouses Point purchased the property with plans to preserve andrestore the building for use as a historic museum. To increase usage and return the building to its historic role as a rail station, the Village is partnering with Amtrak and Lakes to Locks Passage to create a Visitor Center and Depot. The station, wasconstructed in 1889. The single story brick building features a slate hipped roof with wide bracketed overhanging eaves, a full-length covered passenger platform, and a round tower with round arched windows and conical roof. The interior of the Station,although deteriorated and extensively modified spatially, retains the original paneled doors, door and window trims, and other original finishes. The D&H Station also retains its historic setting, with the tracks still in use. The station is the rail gatto the Empire State and our country; creating a museum to interpret and display the community?s rich history;and returning it to its historic role as a train depot. The Village has also entered into discussion with the Department of Homeland Security toe for the inspectors who meet the twice daily trains. Prior to the station?s abandonment, it housed a Customs and Immigration Office where inspectors could conduct interviews of passengers removed from the train for further processing. Currently, inspect
Clinton	City of Plattsburgh Public Works Projects	$3,000,000	DOT	Other Projects - Bridges
Clinton	City of Plattsburgh Public Works Projects	$10,000,000	DOT	Other Projects - Roads
Clinton	Roads	$10,000,000	DOT	The City of Plattsburgh has 66 miles of public roadway. Under the State Pavement Condition Rating System, 11% of Plattsburgh streets are currently in poor condition. A roadway infrastructure investment is need to restore city streets to acceptable conditions.
Clinton	Plattsburgh International Airport	$2,800,000	DOT	Replace Fire Protection System: Replace old pumping system with a new tank and pumping system
Clinton	Plattsburgh International Airport	$4,500,000	DOT	Expand Outbound Baggage Area Of Terminal Building: Construction addition to terminal building
Clinton	Plattsburgh International Airport	$3,200,000	DOT	Rehabilitation of Nosedock Hangar #6: Complete rehabilitation of hangar building, installation of fire protection, heating system, plumbing, doors, etc.
Clinton	Plattsburgh International Airport	$1,800,000	DOT	Replace Taxiway Lighting: Replace existing taxiway lighting system with updated system
Clinton	Plattsburgh International Airport	$1,000,000	DOT	Runway Joint Resealing: Provide joint repair to approximately 10,000 Linear feet of concrete runway
Clinton	Plattsburgh International Airport	$3,000,000	DOT	International Arrivals Facility: This would allow full time US customs presence at the airport and facilitate international departures and landings

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Clinton	RT.971B, EAST SERVICE RD-RT.9 - RESURFACING	$84,000	DOT	
Clinton	Oak Street, S. Catherine (NYS 22), Plattsburgh - Resurfacing	$500,000	DOT	
Clinton	Narrows Rd. / Chateaugay Narrows - Bridge Replacement	$1,480,000	DOT	
Clinton	I-87 ESSEX CO. - SALMON RIVER - RESURFACING	$5,500,000	DOT	
Clinton	CR 38 ARTHUR RD /I87 (2) - Replace 2 structures	$4,500,000	DOT	
Clinton	Slosson Road Bridge over Little Chazy River BIN 3336170 - Bridge Replac	$655,000	DOT	
Clinton	Plattsburgh International Airport - Replace fire protection system for hanga	$2,800,000	DOT	Plattsburgh International Airport - Replace fire protection system for hangars Current system is antiquated and needs repair/replacement Critical to future growth of this aviation and industrial facility.
Clinton	Plattsburgh International Airport - International Arrivals Facility	$3,000,000	DOT	Plattsburgh International Airport - International Arrivals Facility Development of a stand alone arrivals facility. It plays off of its location and marketing lure as a feeder airport to Montreal. this offers a unique opportunity to expand developmentat the former AF base. Unique opportuntities to attract airlines & supply chain, as well as open area directly to foreign visitors - Plattsburgh is one hour from downtown Montreal.
Clinton	Banker Road Industrial Park Road, Plattsburgh	$2,000,000	DOT	Banker Road Industrial Park Road, Plattsburgh Development of phase 2 of CIP, one of the most successful parks. This will put infrastructure and prepare the park for future development. Plattsburgh is an anchor and magnet for Canadian investment. Many companies are looking for sites and buildings that are comparable to listings in Montreal. Development of this site supports the strong crossborder prospecting and commerce in the area.
Clinton	Champlain Industrial Park Road Construction	$1,200,000	DOT	Champlain Industrial Park Road Construction Development of phase 2 of CIP, one of the most successful border parks. This will put infrastructure and prepare the park for future development. Champlain offers attractive sites that are less than an hour from Montreal/Quebec headquarters. We need to strengthen the buidlings and parks to meet the customers' exspectations. This location also supports our warehouse distribution sector. Many Canadian companies are looking for sites and buildings that are comparable to listings in Montreal. Development of this site supports the strong crossborder prospecting and commerce in the area.
Clinton	PARC - Southerly Extension of Willow Drive	$300,000	DOT	PARC - Southerly Extension of Willow Drive This project completes development of southern end of base and will help support development on the south/west side of the runway. important complement of infrastructure and faciltiies to support development of future aviation/aernautical prospects in the region.
Clinton	PARC - Interior Road & Utilities	$350,000	DOT	PARC - Interior Road & Utilities this project completes site work preparation for future reuse as light industrial or aviation related use this will help to finalize redevelopment/rehab of USAF property for potential sale or reuse.
Clinton	PARC - Loop Road & Utilities	$425,000	DOT	PARC - Loop Road & Utilities this project completes site work preparation for future reuse as commercial or retail site this will help to finalize redevelopment/rehab of USAF property for potential sale or reuse.
Clinton	Treatment Plant Mod./UP	$2,700,000	EFC	
Clinton	Saranac Water Filtration Project	$112,000	EFC	Add cartrage filtration; build 8'x8' building ext.; UV treatment; add pumps; two-stage process 5 micron filter followed by 1 micron absolute filter; complies with surface water treatment requirements
Clinton	Standish Water Project	$78,000	EFC	drill new well, additional storage, controls and piping additions

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Clinton	Combined Saranac/Standish Water Projects	$199,000	EFC	combination of two water projects for two small water systems:add cartrage filtration; bulid 8x8' building ext. UV treatment; add pumps; two-stage process 5 micron filter followed by 1 micron absolute filter;complies with surface water treatment requirements; drill new well, additional storage, controls and piping additions
Clinton	City of Plattsburgh Public Works Projects	$5,500,000	EFC	Environmental Services Projects - Reservoir Dams
Clinton	City of Plattsburgh Public Works Projects	$2,000,000	EFC	Environmental Services Projects - Water Distribution System
Clinton	City of Plattsburgh Public Works Projects	$4,500,000	EFC	Environmental Services Projects - Drinking Water Filtration Plant
Clinton	City of Plattsburgh Public Works Projects	$11,000,000	EFC	Environmental Services Projects - Water Pollution Control Plant
Clinton	City of Plattsburgh Public Works Projects	$9,000,000	EFC	Environmental Services Projects - Combined Sewer Overflows
Clinton	Combined Sewer Overflows	$9,000,000	EFC	The City of Plattsburgh is in the process of improving its sewer collection system to reduce the amount of untreated wastewater that overflows the sewer collection system and discharges to the Saranac River and Lake Champlain.
Clinton	Drinking Water Filtration Plant	$4,500,000	EFC	The City of Plattsburgh's drinking water treatment plant was originally constructed in 1936 and is in need of repair and upgrading.
Clinton	Drinking Water Storage Tanks	$4,700,000	EFC	The City of Plattsburgh is federally mandated to provide new tanks to store its finished drinking water prior to distribution to users. The present system is uncovered and far past its life expectancy.
Clinton	Water Distribution System	$2,000,000	EFC	The City of Plattsburgh's drinking water distribution system is antiquated and needs improvements.
Clinton	Water Pollution Control Plant	$11,000,000	EFC	The City of Plattsburgh's wastewater treatment facility was originally constructed in 1973 and requires upgrades.
Clinton	Water Main Replacement	$425,000	EFC	the water mains are ancient and the 4 inch lines need to be replaced with 8 inch lines. As it stands now the fire department is not able to utilize these lines because the pressure is not enough to operate their equipment. The safety of our citzens and property is at stake. The Town can not afford to upgrad these without help. The road will be opened this year for a state project and if we had the money we could do this work when the road is opened. the project involves about a half mile of mains
Clinton	City of Plattsburgh Water Pollution Control Plant	$11,000,000	EFC	The City's wastewater treatment facility was originally constructed in 1973 and requires upgrades. It is estimated that this project would create 30 jobs over three construction seasons.
Clinton	Sludge Drying Beds	$50,000	EFC	The construction of a waste water sludge storage and drying facility to reduce moisture weight so as to reduce the cost of transportation and disposal. All pre- construction work is complete, this project is ready to go.
Clinton	Waste Water Solids Handling Pumps	$60,000	EFC	The purchase and installation of new sewage grinder pumps. Will decrease energy consumption as old pumps are not efficient and need to run continuously, new ones will run 50% of time. Project is ready to go.
Clinton	Ultraviolet water disinfection	$65,000	EFC	The purchase and installation of an ultraviolet light system for drinking water disinfection. The resulting reduction of chemical chlorine will improve the safety of the Town's water by reducing the possible carcinogens related to the use of chlorine with a surface source. This project is ready to go.
Clinton	The Strand Theater	$2,900,000	ESD	The Strand Theater is a renovation project that calls for the establishment of an Arts & Entertainment District utilizing the restored Strand Theater as the focal point.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Clinton	Strand Restoration Project, Plattsburgh	$2,800,000	ESD	Strand Restoration Project, Plattsburgh The completion of the currently unfolding restoration and redevelopment of the historic Strand Theater in downtown Plattsburgh as a long needed regional performing arts center remains of high importance This suports downtown revitalization, tourism development, and the region's need to have a quality, visible arts center to support the needed recruitment of out-of-area workers and professionals.
Clinton	Plattsburgh Aeronautical Institute (PAI)	$2,000,000	ESD	Plattsburgh Aeronautical Institute (PAI) This project is a collaboration between CV-TEC (BOCES) and Clinton Community College to provide graduates with secondary and post-secondary certificates and degrees for FAA Airframe and Powerplant certification.The project is key to future development of aviation assets at the former Air Force Base and Laurentian Aerospace Corp. Development of this training facility is crticial to the future redevelopment of assets at the former Plattsburgh Air Force Base. Italso supports preparing workforce for new technologies, techniques and job opportunities. This is a key factor in the attraction of aviation related prospects - many require access to a training facility of this king before they will locate to an area.
Clinton	Imperial Industrial Park	$2,500,000	ESD	The Imperial Industrial Park, the site of the former Imperial Wallcoverings factory which in the ?90s employed about 600 workers, is located on 46 acres in the City of Plattsburgh?s Empire Zone. There is approximately 550,000 SF of floor space, under 10acres of roof. The facility?s current tenant occupancy is 35.2%. The Restore NY Grant will be used to rehabilitate the existing site, including: replacing and insulating approximately 200,000 SF roof; restoring two rail spurs to the facility; constructing demising walls; and installing energy efficient lighting to create smaller more efficient manufacturing and warehouse spaces for new tenants. There has been communication with several possible tenants, including Bombardier and vendors for Bombardier and Nova Bus who are very interested in locating in our facility this summer if we can meet their facility needs, potentially adding hundreds of new jobs to the Plattsburgh area. This project is ?Shovel Ready?.
Clinton	Downtown Plattsburgh Renaissance Project	$500,000	MAIN_ST	
Clinton	Schools, Elementary and Secondary, Clinton CSD	$393,972	NYPA	
Clinton	City of Plattsburgh Public Works Projects	$5,000,000	NYPA	MLD Projects - West-end Conversion
Clinton	City of Plattsburgh Public Works Projects	$5,000,000	NYPA	MLD Projects - South-end and Center City Conversion
Clinton	City of Plattsburgh Public Works Projects	$400,000	NYPA	MLD Projects - City Power to Public Works Building
Clinton	City of Plattsburgh Public Works Projects	$350,000	NYPA	MLD Projects - Upgrade Power to lake Country Village
Clinton	City Power to Public Works Building	$400,000	NYPA	The City of Plattsburgh Public Works Complex is located outside the City limits. Because of its location, the monthly energy bill continues to increase which places a financial burden on its budget. To become more energy efficient and substantially reduce power usage, the City is requesting project support to convert from private energy use to its own municipal lighting department power use. This project includes funning 8,500 fee of underground conduit, primary cable, modular switch, and pad mountedtransformers.
Clinton	South-end and Center City Conversion	$5,000,000	NYPA	The City of Plattsburgh is in the process of converting its south-end and center city electric grid from 4160 volts to 12,470 volts in order to connect to a new substation that has been built. The conversion projects requires replacing poles, cross arms, transformers, fuse cutouts, lightning arrestors to meet the new voltage standard.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Clinton	West-end Conversion	$5,000,000	NYPA	The City of Plattsburgh has future plans to connect its west-end electric grid from 4160 volts to 12,470 volts in order to connect to a new substation that has been built. The conversion projects requires replacing poles, cross arms, transformers, fusecutouts, lightning arrestors to meet the new voltage standard.
Clinton	Upgrade Power to Lake Country Village	$350,000	NYPA	Upgrade Power to Lake Country Village
Clinton	Cleanroom Installation	$100,000	NYSERDA	Cleanroom technolgy is a rare technology needed in the pharmaceutical, health care and related areas where micro-organisms must be kept at a minimum. This cleanroom will provide trained individuals for America's workforce since few of these programs exist nationally.
Clinton	Envelope Insulation	$1,000,000	NYSERDA	Building has envelope issues (energy) where the outside can be viewed from the interior of the facilty through the soffit, etc. The building lacks insulation and thus air control is compromised. This is the main science laboratory facility.
Clinton	City of Plattsburgh West-end Conversion	$5,000,000	NYSERDA	The City has future plans to connect its west-end electric grid from 4160 volts to 12,470 volts to connect to a new substation that has been built.
Clinton	City of Plattsburgh South-end and Center City Conversion	$55,000,000	NYSERDA	The City is in the process of converting its south-end and center City electric grid from 4,160 volts to 12,470 volts to connect to a new substation that has been built.
Clinton	City of Plattsburgh City power to Public Works Building	$400,000	NYSERDA	The City is requesting project support to convert from private energy use to its own municipal lighting department power use.
Clinton	City of Plattsburgh Upgrade Power to Lake County Village	$350,000	NYSERDA	Upgrade service in the housing area known as Lake County Village.
Clinton	Emergency Services-Community Building	$6,750,000	OHS	design and construct a 29,000 sq.ft. bldg. to house the Fire Department, state police sub-station, and two rooms for community activities. The fire dept. provides fire, als ems, high and low angle rope rescue, water-swift water-cold water rescue, and land search to a 125 square mile district from a 45 year old building that is suffering from structural problems and is way too small to support the mission of everyone useing it. It serves two entire towns and a village in two counties. It provides space for all three communities to have community meetings, clinics,etc. It is also a shelter-warming place for all three communities in a natural disaster or emergency. The origional building was built by the volunteer fire fighters 45 years ago very cheaply and has been added on to several times over the years by them also. It fails to meet a lot of the current codes and an estimate to renovate the current bldg. and meet the codes is 75% of the cost of an entire new bldg. The proposal is to build the new bld
Clinton	Rouses Point Fire Station Addition and Renovation Project	$2,750,000	OHS	Renovate and expand the existing fire station to meet ADA and OSHA regulations as the bathrooms do not meet ADA regulations and closly spaced vehicle bays create tripping hazards when draining fire tanker trucks. Project includes 2 drive thru vehicle bays, overhead sprinkler system, ADA acccessible bathrooms, adding to the existing plymo-vent vehicle exhaust system, co-ray-vac heating system, commercial quality kitchen, shower/locker room and training room.
Clinton	Restoration of the Strand Theater in Plattsburgh	$2,800,000	OPRHP	Restore the Strand Theater to its 1920's glory to serve as a focal point for an Arts & Entertainment District in downtown Plattsburgh.
Clinton	Northeastern Clinton Central School, Middle High School	$5,382,990	SED	
Clinton	Northeastern Clinton Central School, Rouses Point Elem.	$2,316,609	SED	
Clinton	Northeastern Clinton Central School, Mooers Elementary School	$3,574,835	SED	
Clinton	Northeastern Clinton Central School, Mooers Elementary School	$50,000	SED	
Clinton	Northeastern Clinton Central School, Senior High School	$5,082,490	SED	
Clinton	Northeastern Clinton Central School, Bus Garage	$218,041	SED

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Columbia	Peaceful Valley Road Culvert	$125,260	CDBG	The Town of Canaan needs to replace an old culvert between two wetlands (flat brooks) on a Town road (Peaceful Valley Road) near State Route 22. Replacement would take approximately three months. Coffer dams would be constructed, the old culvert would be
Columbia	Stockport Town Hall	$1,400,000	DASNY	New town hall. ENGINEERING, DESIGN AND PLANS ARE COMPLETED! Current hall is in an old firehouse. Judges chambers and court are in a truck bay. There are no conference rooms for the district attorneys or lawyers to talk privately with their clients. The t
Columbia	Town of Canaan Highway Garage	$35,000	DASNY	Public benefits and Need: The TownÆs sand/salt mixture for winter is currently in the open, partially covered at times by a tarp. The sand/salt mixture is less than 100 feet from a wetland area. NYS DEC has discussed the issue with the Town but has not f
Columbia	Rennovation for community use	$50,000	DASNY	Rennovate an existing historic 1848 timber framed church for reuse as a community center
Columbia	Parking Garage	$3,500,000	DASNY	The County has sent notice to the public that it has plans to move the majority of service related agencies (i.e. Health Dept., Department of Social Services, etc.) outside the City causing about 200+ jobs to leave Hudson. A plan is in place to build a county building in Hudson which will keep this agency in Hudson. However parking is needed and without going to a parking garage, Hudson would not be able to provide enough lands to accomodate the 200+ cars that D.S.S. would need.
Columbia	Police/Court Room Facility	$3,200,000	DASNY	The current police/court room facility is located in a former New York Telephone building and is too small for both the Police and Court Rooms, not to mention in desperate need of very expensive repairs just to bring it up to code.
Columbia	Columbia County Mass Transit Infrastucture improvements	$0	DASNY	repair/replacement of CSX train overpass bridge in City of Hudson and repair of CSX bridge in Town of Stuyvesant
Columbia	Town of Claverack US Post office Improvements	$0	DASNY	construction of new post office
Columbia	Town of Clermont highway garage	$1,410,000	DASNY	construct a highway garage that includes an emergency shelter and storage space for emergency supplies as well as a separate salt/sand storage shed and remediation of brownfield lands surrounding the proposed building
Columbia	Campus Infrastructure Improvements	$2,600,000	DASNY	Improvements to Water and Sewage Treatment plants, energy management upgrades, roof replacements and entrance accessibility upgrades. Outcomes include energy conservation and technology improvements to enhance the lifespan of public infrastructure.
Columbia	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the purchase/renovation of three residences in Ghent, Copake, and Mellenville.
Columbia	Town Highway Garage	$400,000	DASNY	The Town of Ghent is in need of a new highway garage. The current highway garage is old, outdated and insufficient to properly house the Town's vehicles and equipment. All municipal approvals have been obtained and the engineering work completed. The project is shovel ready. There will be many local New York State contractors engaged in the job.
Columbia	Gallatin Highway Garage	$325,000	DASNY	Vacated New York State highway garage will be reused to become the Town Court.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Columbia	Town Park Brownfield Redevelopment	$850,000	DEC	The Town of Clermont entered into a Brownfields Redevelopment Contract and plan with the New York State DEC for the testing, evaluation, and redevelopment of a 20 acre parcel in the town center. The plan for the parcel was to redevelop it for recreationand a town garage. This proposal concerns the required remediation for passive recreation and a small playground as well as parking for a ballfield. The garage will be proposed separately. The investigation phase of the project has been completed, but due to the non-funding of the Brownfields program, the actual remediation has been placed in limbo. This request is based upon the DEC's actual estimated costs for their recommended level of remediation for seven of the acres that are contaminated with arsenic ($600,000), plus $250,000 for the planning and development of the recreational facilities.
Columbia	Robin Rabbit Lane Drainage project	$250,000	DEC	Robin Rabbit Lane Drainage project
Columbia	NYS Wildlife Grants Program	$500,000	DEC	My request is for $500,000 to be allotted to the NYS Wildlife Grants Program to support their present and future projects. They are dedicated to preserving the natural beauty of NY. I am particularly interested in funding their habitat restoration and park management projects. They have done a great deal to improve and maintain our state thus far and I hope they have the chance to continue that work in years to come.
Columbia	Nuclear Waste Cleanup	$100,000	DEC	Possibly one of the most dangerous substances across the nation is nuclear waste, which our society is surrounded by whether we like it or not. Nuclear waste cleanup is critical for society to be safe and pure. I propose that we provide $100,000 to our local D.O.E. facility called the Albany Research Center. Providing the money to this agency would ensure that we are ready during any situation even if caught by surprise. This would provide them with the possibility of purchasing equipment for nuclear waste cleanup and even hiring more workers to decontaminate as much area as possible. There are 108 contaminated and unusable sites across the country and even locally, it is a problem, which is why providing the money to the Albany Research Center would help the local public so much. In conclusion, when thinking about the national problem having to do with nuclear waste cleanup, we?d like to know that it is taken care of. Supplying the center with $100,000 would benefit the local citizens ensuring they a
Columbia	Recycling Proposal- Recycling For All	$1,000,000	DEC	America needs a focus on the environment. We propose that all food production enterprises will be required to stock recycling bins for glass, plastic, and cans. The food enterprises mentioned will include, but not limited to: café?s, restaurants, grocerystores, super centers, and convenience stores. This bill will not only stimulate the conservation of energy plan, but it will also provide many new jobs during this countries time of need. People all across the nation will have to be hired to install and maintain this equipment, process recyclables in factories, and pick-up and transportation of the bins and their contents. This will also stimulate the economy because we will need to produce and sell the equipment, and provide money to unemployed who will then spend their money and refuel it back into the economy. Along with this idea comes with the idea or advertisement. The people of America would not have any idea as to what this program was about or what it intends to do, so therefore an advertisi

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Columbia	Disease Prevention	$1,000,000	DOH	NY State?s Public Health Program needs more state funding to provide the people of NY State with appropriate health care. As times are changing people?s overall health is as well. We need to expand our Public Health Programs to include more prevention programs. New diseases are constantly appearing and the payment for their treatments accounts for over half of the spending. If we put more money into programs that help avoid these diseases it will aid in cutting down the treatments cost. By putting moremoney into the program now it will benefit our state in the future. For an example nutritionists should be available and covered like a medical doctor. Obesity rates are on the rise and the consequences are expensive. With the proper knowledge and assistance we can avoid this epidemic that is taking over our youth. As the Public Health Program expands more job opportunities will become available. Medical professionals will be needed to teach people about how specific health programs. $3.5 billion dollar
Columbia	Workforce Investment Act	$174,000	DOL	The wonderful state of New York has been fortunate enough to receive $24.6 Billion dollars of direct aid to help New Yorkers during this economic crisis. To our benefit, Governor David Patterson has allowed New Yorkers to decide which major funding areas/programs we think most deserve this direct aid. Recently, more and more workers are losing their jobs everyday due to the economic crisis that we are currently facing. Employers are not able to buy the materials vital for their companies because of thiscrisis; therefore, they are forced to lay-off or fire an employee so they are able to have enough money to buy all essentials for their company. Accordingly, the Workforce Investment Act should receive a portion of this direct aid. This act, which was signed by President Bill Clinton on August 7, 1998 increases employment, retention, and earnings of participants, improves the quality of the workforce, sustains economic growth, enhances productivity and competitiveness, and reduces welfare dependency. Ble way for this to happen is if more jobs are created. The Workforce Investment Act not only does this, but takes ?job creating? to a whole new level.

County	Project	Requested $	State Agency	Additional Detail
Columbia	Reconstruction of Hudson Street and Albany Avenue	$1,100,000	DOT	This project is to reconstruct 500 LF of Hudson Street from Sylvester St to Route 9, and 1,600 LF of Albany Avenue from Route 9 to Sunset Ave in the Village of Kinderhook, Columbia County. The project includes resurfacing and some full depth pavement replacement to provide two 10' travel lanes,8' parking lanes in commercial area and 7' parking lanes in residential area, granite curbing, 4' sidewalks, a storm sewer system, an 8"" water main (Albany Avenue. In addition, pedestrian improvements, trafficcalming measures, and landscaping are propose
Columbia	Bridge Rehabilitation: RT 9G / ROELIFF JANSEN KILL	$7,544,000	DOT	
Columbia	Bridge Replacement: Hall Hill Rd. / Jansen Kill 18	$1,680,000	DOT	
Columbia	Bridge Replacement: Empire Rd./Roeliff Jansen Kill 61	$1,030,000	DOT	
Columbia	Project Parkway	$10,000,000	DOT	The Taconic State Parkway is in need of serious repairs to the numerous potholes and cracks in the road. In addition, the segments of the parkway that run through smaller, rural areas need modernization, such as new drainage systems, wake-up-grooves andreflectors on the road. In addition, more off ramps should be added to some of the smaller towns, so that people living in these hamlets can easily commute to and from there homes. Such a project would create many jobs for construction firms.
Columbia	Paving Roads in Cannan, NY	$400,000	DOT	The town of Canaan, NY is a critical linking point of Massachusetts and has very poor dirt roads. The state needs to pave these roads so that travelers can be more confident about driving in the places that link the town to the more important towns. Thiswould allow for more business in local area such as, new housing ideas and more people buying houses in the area because of paved roads, and more business to local restaurants and gas stations. These projects will lead to more consumers? spending moneyon things that are easier to get too, which can lead to a better housing market, and more jobs at nearby gas stations and restaurants. The project will also give jobs to the people who pave the roads in the area which will lead to more people being hiredand more money being spent, lower the unemployment rate. According to the Road Paving SAD (Special Assessment Road Paving Districts) brochure, housing values increase when you live on a paved road; up to six percent. When the housing value increases itefore increasing the number of buyers. Another reason for paved roads is because of the money it saves on gas. According to the CBC article below paved roads lead to better gas mileage and according to scientific studies as much as 30% is saved on pavedcritical in the event where gas prices sky rocketed again. The economy has been at its worse in times when gas was its highest, if we pave roads in the area people will save money and this will prevent them from losing their homes in the future and incr
Columbia	road reconstruction	$1,200,000	DOT	In cloumbia County there are alot of roads that are effected by frost heaves. The county can only get to about half of them. This is because of lack of funding. They can't pay for more empolys. If they get more funding it will create alot of jobs for thepeople in the area. The pot holes are bending the tie rods on local trucks whick is costing those companies money that they just dont have.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Columbia	bridge Repair	$800,000,000	DOT	Looking at information found online, we believe that most of the bridges in Columbia County are in need of major repair. New York State Highway Bridge Data says that a bridge with a rating of five or below a bridge is considered structurally deficient. Quite a few of these bridges have a rating that is below five. Also, many of these bridges were built in the very early 1900?s. We need to make sure that nothing like the bridge collapse in Minneapolis happens in our county, and state. We need to make sure that every bridge, no matter what year it was created, should be checked so it is safe for everyday travel. Everybody walks or drives over a bridge. I know you do. Don?t you want to feel safe the next time you cross one? Don?t you want to know that youdon?t have to worry about falling through? All I am asking for is a little help and money to make sure Columbia County?s bridges are safe.
Columbia	West hill & Dugway Rds	$750,000	DOT	Paving of steep portions of town roads to reduce maintenance and remove dangerous conditions
Columbia	Town Salt Shed	$400,000	DOT	To improve effiencies and protect the environment, the Town needs to construct a salt shed.
Columbia	Stexer hill Road	$500,000	DOT	Reconstruct road to pave with needed drainage and guiderails.
Columbia	More trains, less trucks	$10,000,000	DOT	Nathaniel Boll, 3/13/2009 In these times, the environment should be taken into great consideration. Large trucks that we use to transport goods nation wide emit a large amount of green house gases that in the long run, could be the difference between life and DEATH. But on the contrary, trains could be the answer to a brighter future for the human race. One double stack train locomotive container can carry the volume of 280 tractor trailers. A train is also 2-4 times more fuel efficient and emits one third the amount of NOx per ton mile than those big old trucks. Even know trucks are more convenient than trains, one could incorporate trains to become the main source of transporting goods cross country. If put into action, drastically altering the amount of tractor trailers on the road would reduce greenhouse gas emissions for the better. Another issue I would like to mention is the lack of mass transit transportation in this area of Ny State. Previously to being one of the thousands of banks in Chathagreat means of transportation to the rest of Columbia County to and from this beautiful little town. Just a thought. If some of the extra money being provided to Ny State in a stimulus package could be focused on the development of train transportation,t against tractor trailers could be put into motion, having effects as previously stated.
Columbia	Pump Station Imp., Treatment Plant Imp. (CSO LTCP)	$8,994,000	EFC	
Columbia	Village of Valatie Water and Sewer Improvements	$1,500,000	EFC	Water and sewer line upgrades on Upper Main Street in the village. Completed are water and sewer line drawings for the section, The upgrade of the water line is very important as it currently has a 100 year old 4" water line that is very corroded. Fire p

County	Project	Requested $	State Agency	Additional Detail
Columbia	Green Street Project	$375,000	EFC	Currently there is a 500' stretch of water line that is prone to many breaks and the proposed remedy is the construction of a new 6"" line and the abandonment of the existing 4"" line. Engineering for construction has already been completed and the Citywill be issuing an RFP for construction services during the week of February 16, 2
Columbia	New Sewer Treatment Plant	$6,000,000	EFC	The City of Hudson is under Consent Order from DEC to address the current deficiencies in their sewer plant.
Columbia	Columbia County, Extension of sewer line from the Village of Valatie to the	$1,500,000	EFC	Columbia County, Extension of sewer line from the Village of Valatie to the Village of Kinderhook The Village of Kinderhook has limited expansion of its commercial downtown area due to lack of sewer. By having access to public sewer, failing septic systems will be removed from service and expansion of its commmercial tax base will occur.
Columbia	Germantown Sewer Project	$750,000	EFC	This project will make needed repairs and expand the sewer treatment facility, pump stations and look at the feasibility of adding more users within the township. We will repair an exsisting sludge holding tank after adding a new holding tank to facilitate maintenance of the tanks. We will repair and upgrade a pump station with a broken valve next to Hudson River to prevent overflow into River and adjacent properties from poor original design. Also we will be looking into a feasibility study of adding more users to the sewer district to help with future revenue for ongoing maintenance costs of the sewer district currently at less than 50% capacity.
Columbia	Greene County, Athens Project Solar	$5,000,000	ESD	Greene County, Athens Project Solar -- Project involves installation of Rail, water and sewer/power infrastructure to Photo Photonic manufacturing site in Athens adjacent to Athens Generating Co-gen plant. The proposed site identified as one of top 2 sites for this use in Hudson Valley. This project would target the creation of over 500 new regional jobs in the desired area of solar equipment manufacturing. The connection to solar panels and the move towards energy independence in significant added benefit as future national and state energy priorities become clear.
Columbia	Restoration Of Historic Hudson Opera House	$500,000	MAIN_ST	
Columbia	Weatherization of two town buildings	$35,000	NYSERDA	We propose to install twenty-two double hung wooden storm window/screen combinations on one historic town building (Clermont Academy). We also propose to add insulation in the attics of two town buildings (one of the two is the above building which is also to receive storm windows), as well as to restore one ceiling and and do associated rewiring that needs to be in good repair before it is insulated. Both buildings are on the National and State Registers: one is the Town Hall, the other is an 1834 school building that is now used as a Community Center. These projects were planned for 2009, and are 'shovel ready' even to the extent that bids have been requested and received, and approval from OPRHP has been given. They have been postponed due to the more than 50% drop in our municipal revenue.
Columbia	Town of Clermontenergy weatherization	$50,000	NYSERDA	weatherization of two town owned buildings
Columbia	Town buildings need renov to increase energy efficiency	$100,000	NYSERDA	Town buildings need renov to increase energy efficiency
Columbia	Installation of Solar energy panels on 3 buildings	$100,000	NYSERDA	Installation of Solar energy panels on 3 buildings

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Columbia	Restoration of James Vanderpoel House	$500,000	OPRHP	The restoration of historic James Vanderpoel House will provide space for a history education center, lectures, meetings, receptions, concerts and other tourism activities within the historic structure, promoting awareness among residents and visitors about the region?s cultural heritage. The revitalization of the Vanderpoel House will create a center for the community to share in the preservation of the history and architectural heritage of President Martin Van Buren?s hometown. With the increased capacity CCHS will be able to reach more school students and families provide significant history education resources to county school systems, relieving some burden from strapped school systems. Project budget is $1.2 million. A capital campaign has raisednearly half that amount. A significant grant of $500,000 through the 2009American Recovery and Reinvestment Act will guarantee the completion of the restoration and ensure realization of the economic benefits of the project. The architectural firm of Johcational team. As a rental venue for meetings, weddings, and other events the Vanderpoel House will provide ongoing opportunities for Columbia County businesses and residents. This project will enable Kinderhook to reach its full potential as a tourism dsupport for restaurants, inns, and retail establishments throughout the county.
Columbia	Harrier Hill Park ADA Trail & Pavillion	$280,000	OPRHP	Project includes repairing a 5,830 square foot barn foundation in order to build a 2,050 square foot scenic overlook viewing platform and 1,000 square foot sitting area. The park has spectacular views across the Hudson River to the Catskill Mountains. In addition, a 750 linear foot handicap accessible path will be built to complete a circuit from an existing parking area to a new picnic area. The park will be a needed community recreation area for the residents of Stockport, a destination for people from the nearby City of Hudson, as well as tourists visiting the region.
Columbia	Mount Lebanon Shaker Society National Historic Landmark	$900,000	OPRHP	complete stabilization of the great stone barn; complete restoration of exterior of wash house and interior visitor amenities; as facilities for relocation of shaker museum and library and to open site to public year-round

Columbia	Teacher Tolerance	$294,000	SED	Behavioral Counselors for each school district in Columbia County to teach teachers how to react and respond more effectively to students and co-workers.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Columbia	After School Program	$124,000	SED	The Southside Community Center is a not for profit youth center which provides free after school care to approximately 80-100 youth daily and over 400 families yearly.The majority of our members are from low-income families with limited resources for providing educational and enrichment opportunities for their children. We provide recreational, educational, and enrichment programs to all youth, ages 5-18, during that important time between 2:30PM-8PM. As a Kid?s Café, we also are able to serve a snack immediately after school and also a healthy nutritious meal to all children in need. We are open year round, even during the much needed summer months and school holidays, when the youth are not receiving free and reduced lunches. Given the proposed elimination of the NYS OCFS COPS Preventive Funding that was accessed by the Center through the County Youth Bureau and Department of Social Services, the Center has lost approximately $64,000 dollars in programmatic funding. In addition, the Center is also ese to these developments, our Board of Directors has been forced to take drastic and immediate action by eliminating approximately 38% of our current staffing levels and reducing the daily operating hours of the Center by more than 36%. More importantly,ion oriented programming that has been administered by the Center to help keep our youth from entering the doorways of the juvenile justice and child welfare systems has been eliminated. The Center has been in existence since 1976 and originated in the b
Columbia	Nuclear Waste Cleanup	$100,000	SED	Possibly one of the most dangerous substances across the nation is nuclear waste, which our society is surrounded by whether we like it or not. Nuclear waste cleanup is critical for society to be safe and pure. I propose that we provide $100,000 to our local D.O.E. facility called the Albany Research Center. Providing the money to this agency would ensure that we are ready during any situation even if caught by surprise. This would provide them with the possibility of purchasing equipment for nuclear waste cleanup and even hiring more workers to decontaminate as much area as possible. There are 108 contaminated and unusable sites across the country and even locally, it is a problem, which is why providing the money to the Albany Research Center would help the local public so much. In conclusion, when thinking about the national problem having to do with nuclear waste cleanup, we?d like to know that it is taken care of. Supplying the center with $100,000 would benefit the local citizens ensuring they a

Cortland	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is construction of two residences in Cortland.
Cortland	Cortland County, Downtown parking	$2,000,000	DASNY	Cortland County, Downtown parking - The City is proposing a two-level garage on Orchard Street, which bisects the heart of the business district. The project would also involve the demolition of an apartment house that sits between Orchard Street and Groton Avenue. Downtown central business district parking has been a critical issue for the City of Cortland, and has been identified as a priority for a number of years by city government, SUNY Cortland, economic development groups and local businesses. Lack of central business district parking has been an impediment to the redevelopment of second and third floors downtown for offices and apartments. Necessary upgrades because of existing capacity constraints. Lack of downtown parking is an obstacle toredevelopment and business attraction efforts.
Cortland	Flood Mitigation Project in City Water Works	$100,000	DEC	Construct an earthen berm on City of Cortland Water Works property to mitigate ongoing flooding in the City of Cortland

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Cortland	Cortland County, Building demolition	$250,000	DHCR	Cortland County, Building demolition Demolition of Thayer building The City of Cortland is seeking to demolish an abandoned and blighted building adjacent to the Noss Business Park (a Build Now NY site adjacent to a residential neighborhood) for speculative commercial development. This project was submitted in two successive Restore Rounds, but was not funded because there was not identified developer interest. The building is across the street from a public school, and next to two prime industrial sites (Marietta Corp. and Ames Linen). It currently presents a safety issue. It has been identified in the City's comprehensive plan as a site for redevelopment. The City of Cortland has site control.
Cortland	Better Facilities for Better Care: Cincinnatus, Marathon and DeRuyter	$810,887	DOH	The proposed multi-site capital improvement project includes completing construction projects at the three health center sites. The reconstruction of the Cincinnatus Health Center will reuse the current lot, demolish the existing building, and rebuild th
Cortland	Purchase Software Family Health Network	$249,432	DOH	Purchase Software Family Health Network
Cortland	Cortland Regional Medical Center capital construction and facility improven	$400,000	DOH	Implementation of state of the art health care diagnostic technology, cardiology picture archiving and communications systems
Cortland	Addition to Cortland Regional Medical Center	$0	DOH	Addition to Cortland Regional Medical Center
Cortland	Cortland County, Cortland Regional Medical Center Expansion	$13,000,000	DOH	Cortland County, Cortland Regional Medical Center Expansion - The Medical CenterÆs surgical suites are currently located in a section of the facility built in 1966. They have no capacity to accommodate the transition from an inpatient to outpatient trendin surgical procedures. The facilityÆs maternity and labor/delivery units are housed in the 1911 east wing of the facility. Currently, they are two distinct departments joined by a corridor. No large-scale renovations have occurred in the surgical or maternity services areas in nearly thirty years. The lack of modern facilities and the associated barriers have negatively impacted the region, and the trend is expected to continue. In 2007, more than half of those residents in the Cortland area requiring general and orthopedic surgery, approximately 700 citizens, left the area for care. Approximately 40% of all Cortland area infants born in 2007, nearly 300 infants, were born in hospitals outside Cortland County. Travel outside the area, particularly iessential to ensure high quality surgical and obstetrical care. Specifically, modern surgical and maternity services areas built to accommodate current technology and foster efficient workflow will not only support superior levels of care but also providfor talented physicians to join the Cortland healthcare community. The proposed expansion is part of a larger strategic plan to recruit and retain skilled physicians to the region. Specifically, these include our high need areas of general and orthopedic
Cortland	Cortland County, Cortland Regional Medical Center upgrades	$1,200,000	DOH	Cortland County, Cortland Regional Medical Center upgrades - The current system, installed in the 1950s, is responsible for heating and cooling the entire 282,609 square foot Medical Center complex. It has exceeded its 25-30 year service life. Despite ongoing preventive maintenance, the systemÆs reliability is marginal. The failure potential is high and places the facility at risk; the system currently has limited redundant capacity. The facilityÆs need to replace the system is more urgent based on results of assessments performed during the facilityÆs recent master planning process. These indicate the existing systemÆs inability to support any expansions and renovations planned over the next ten to twenty years. Plant replacement is expected to increase overall efficiency, reducing both operating costs and plant emissions. Cortland County is a medically under-served community. Cortland Regional Medical Center is the largest employer in the county (after SUNY Cortland) and is an engine for economic

County	Project	Requested $	State Agency	Additional Detail
Cortland	Cortland County, Health care centers in Moravia and Cortland	$1,950,000	DOH	Cortland County, Health care centers in Moravia and Cortland - Cortland Regional Medical Center proposes to purchase land and construct the outer shell of expanded primary care health centers in Moravia and Cortland, New York. This project is a joint effort with Family Health Network of Central New York (FHN), a network of federally qualified health centers. The Medical Center will manage and finance construction while FHN will be financially responsible for leasehold improvements. In addition to housing the clinic, the Cortland site will also serve as a medical office building for new primary care (including OB/GYN) physicians recruited to the area. Since 2004, FHNÆs primary care visits increased by over 40%. In 2007, FHN provided 67, 612 encountersto the areaÆs low-income and underserved populations. The Moravia clinic is currently housed in a renovated Victorian-style building that does not promote efficiencies, privacy, or potential for growth. Built in 1984, the Cortland siteÆs limited number
Cortland	Disability Advocacy - Reduce Disability Stigma in Employment	$50,000	DOL	ATI seeks to increase the capacity of its local disability advocacy network by empowering our Systems Advocate to facilitate increased grassroots organizing efforts. These efforts will include increasing training opportunities for our disability advocates and increasing outreach efforts to double the number of disability social activists. ATI would also use funds to support the network?s efforts to increase community awareness of disability issues by way of meetings, events, mailings, distribution of newsletter articles, and dedicated space on the agency?s newly revamped web site. This project will benefit every volunteer by providing them with constructive means to act on their discontent with social discrimination. Furthermore, the project will benefit every individual in Cortland County and beyond who has a disability by working to eradicate the associated stigma. Without the stigma, more people with disabilities will stop hiding their ?disability identity,? employers will be more willing to hire q
Cortland	Peer Mentoring Program - Employment for People With Disabilities	$150,000	DOL	The purpose of ATI?s proposal is to facilitate a collaborative support system for individuals wishing to independently seek, gain, and retain successful community employment. This support system would take advantage of four main ideas: 1) one-on-one peermentoring; 2) monthly support groups; 3) weekly independence & employment related workshop/trainings; and 4) referral to, and utilization of, other community resources and services. ATI would match each consumer (Mentee) with a qualified Mentor taking into account each individual?s goals and interests. The Mentor, having successfully achieved their goals of independence and community employment, would be a guide to the Mentee as he/she works toward their goals. Mentors will stay matched with a Mentee for approximately six months. Each match will be periodically evaluated to ensure a good working relationship. Utilizing an existing six month curriculum, ATI will establish workshops that provide information and education to Mentees on a variety of topicsses. Likewise, ATI has established similar trainings for Mentors that will strengthen their leadership, problem solving, and guidance skills as they continue to work closely with their Mentee.

Cortland	Page Green Phase 3 (CR-122) Road Rehabilitation	$1,837,000	DOT	
Cortland	Cortland County, Cortland Medical Office parking lot	$2,600,000	DOT	Cortland County, Cortland Medical Office parking lot - Currently, the Alvena Avenue lot is gravel and does not meet zoning requirements. Lighting, storm structures, parking space size, and lane widths are inadequate, according to master planning assessments. Although the facilityÆs 2.94 parking spaces per hospital bed approximates zoning specifications, the calculation does not take into account increased ambulatory patient volume related to the new Southeast Addition and expanded FHN Clinic. CortlandRegional Medical Center proposes paving existing gravel parking lot on Alvena Avenue and establishing expanded parking for patients/staff associated with proposed Cortland Medical Office Building and Southeast Addition. Medical center outpatient utilizations are projected to increase by approximately 10,000 visits. FHN Clinic encounters at the medical office building are projected to increase by 4000 per year; this corresponds to an additional 1145 patients yearly.
Cortland	Cortland County, Biofuels Energy Park - Morrisville State College	$2,000,000	DOT	Cortland County, Biofuels Energy Park - Morrisville State College, a research partner with a new company, Empire AgriFuels, LLC, is constructing NYS's first vertically integrated, co-located oilseed crushing and biofuel blending facility in the CortlandCounty Town of Cortlandville. To capitalize upon this activity, the Cortland County Industrial Development Agency is proposing the expansion of the Cortlandville site into a planned biofuel industrial park with the capacity for similar energy-related companies to co-locate in the area. Initial infrastructure improvements call for the expansion of a rail line to the site, which is served by an intermodal facility also owned by the IDA. A $2 million investment in rail infrastructure will help leverage more than $20 million in private investment, as well as advance previous NYS funding to develop a New York State Center for Liquid Biofuels through Morrisville State College. The project will further advance Upstate New York as a leader in the renewable e
Cortland	Cortland County, Cortland Regional Medical Center entrance	$750,000	DOT	Cortland County, Cortland Regional Medical Center entrance Reconfiguration of intersection at Homer Avenue and West Main Street, allowing for a semi-circular driveway. This will accommodate patient drop-off at proposed Southeast Addition. Project siteconsists of .5 +/- acres and includes a small 15+/- space parking lot. Construction of the patient drop-off is possible only if the above-mentioned intersection is ôstraightenedö so that roads are perpendicular to each other. This project includes ôswappingö of property owned by the Medical Center in exchange for highway property owned by the city, state, and county.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Cortland	Robbins Road Bridge Replacement	$100,000	DOT	Built in 1981, the Robbins Road Bridge continues to exhibit serious signs of deterioration and deformation. The bridge consists of three highly deformed steel pipes. The embankments and roadway are shored up with concrete blocks around and over the pipes. Loss of fill material between and under the pipes has caused severe scouring. Only the wedged concrete blocks on top are preventing a cave-in of the shoulder. The hydraulic opening is inadequate due to the nature and condition of the pipe. The structure received a safety flag in 2006 which continued in a recent 2008 inspection. The bridge currently has the lowest rating in New York State and the lowest rating in Cortland County (2.5). A NYSDOT engineer recently stated ""if there ever was one that needed (replacing) it is this one."" The Town has worked with the Cortland County Highway Department in performing a hydraulic study and plans for the replacement of the failing structure. All permits are in place and the proposed structure will consist ofet of the new pipe. The anticipated cost of the project is $100,000.00 and, upon approval, construction would begin immed
Cortland	Waterline Extension to Polkville	$1,500,000	EFC	Extension of 9,000LF of water main to serve 60 commercial and residential users. to be served with water to be provided by the City of Cortland

County	Project	Requested $	State Agency	Additional Detail
Cortland	Cortland County, Fire Station and City Hall	$2,000,000	OHS	Cortland County, Fire Station and City Hall - The displacement of city offices due to the relocation of the Office of Court Administration taking over the second floor of the existing City Hall on Court Street, and the expansion of the police department.The City has been cited by NYS for code violations relating to its existing court and police station space. Includes: The dislocation of city offices and the relocation of City Hall to another building(est purchase cost: $250,000, renovation cost:$250,000.), construction of a new fire station to augment the existing 1914 historic structure which is too small to accommodate modern fire-trucks. This project includes: The fire station has structural issues related to floor strength, and is long and narrow, requiring that the city spend approximately 40% more on each new fire truck, which must be custom-constructed to fit the narrow space. The 1914 fire station is located next door to the existing City Hall on Court Street, Upgrades to Fire Station #2, w
Cortland	Living Well With A Disability	$35,000	OMR	Benefits of participating in the ?Living Well With a Disability? series are numerous, for both consumers and staff. A primary benefit for consumers would be an enhanced knowledge of resources available to them in the community, and acquisition of the skills necessary to take charge of their own health and lifestyle. This sort of self-advocacy is critical if an individual is to be an informed consumer of healthcare services. Despite the best intentions of healthcare providers, the patient who is not well-informed about his or her own condition and needs runs the risk of receiving less than the highest quality care. Only the individual who is an active participant in their own health and wellness will receive the best of care, and fully understand the impact that their lifestyle choices will have on their condition. Along these same lines, helping people to be aware of and to access recreational facilities available to them locally will enhance their general wellness. Physical activity, such as low-impaworkshop. For example, we have already offered programming on healthy eating and yoga to our consumers. In addition, the Cortland campus of the State University of New York has an adaptive physical education program, and the past president of our Boardofessor there.
Cortland	Cortland County, Performing arts center	$1,250,000	OPRHP	Cortland County, Performing arts center - The former Grossman's retail lumber yard and home improvement center, is a gateway building off exit 12 of I-81. It is being acquired by Cortland Repertory Theatre, which has outgrown its current administrative space. CRT is planning to redevelop it as a winter cabaret theatre and film center, and will relocate its year-round corporate offices, ticket office, warehousing, set design and construction, wardrobe and other theatre essentials. CRT would still maintain its summer stock program at the Pavilion at Little York Lake, but expand to year-round programming. CRT is contributing equity, but there is a $1 million funding gap for the extensive adaptive reuse. This project supports the Town of Cortlandville'sLWRP through the NYS DOS, and will help transform a blighted area that is a gateway to the City of Cortland. There is strong community support for this project. Site control is in hand, plans are in place, and it could move quickly.
Cortland	Cincinnatus CSD, Central School	$2,527,700	SED	
Cortland	McGraw Central School District, District Wide	$100,000	SED	
Cortland	Early Grades Reading Intervention	$400,000	SED	This project would fund a temporary increase in staffing to increase reading interventions at the early grade levels in the City of Cortland. A temporary increase in staffing would allow for intensive reading intervention for every child reading below grade level in grades 1 & 2.

County	Project	Requested $	State Agency	Additional Detail
Cortland	Youth Transition	$50,000	SED	Access to Independence of Cortland County, Inc. (ATI) aims to fill the gap that exists for youth with disabilities, between the special education programs at schools and the various vocational programs offered through the New York State Vocational and Educational Services for Individuals with Disabilities (VESID). ATI will work to coordinate existing resources throughout Cortland County to provide information, training, and technical assistance to support school districts (teachers & students), families, and community agencies in the implementation of transition planning and services for youth with disabilities. Specifically, ATI will implement a wide variety of programming for youth throughout the county, including: weekly interactive workshops that aim to develop life skills, self-determination, and goal setting; a youth peer mentoring program; monthly support groups, an annual youth conference; job shadowing and volunteer try-out opportunities; and participation in the area?s only chapter of the NYn vocational training; (6) complete vocational training; (7) complete higher education; (8) secure employment; and (9) maintain employment for more than 90 days. Additional outcome-based performance indicators include: (10) completion of internships; (11essful job shadowing experiences; (12) completion of successful volunteer experiences; (13) securing part-time employment; and (14) maintaining part-time employment.

Cortland, Oswego	Central New York - Broadband deployment in rural counties	$68,800,000	OFT	Central New York - Broadband deployment in rural counties - This project will help close the rural digital divide in Upstate, utilizing existing infrastructure already in place by National Grid. New Visions will use local contractors to deploy the network, and train rural technicians to service the network. Many households in these rural towns have low income and a low level of digital literacy. The project will eliminate dead spots in every county, including municipal radio networks -- enhancing not only access to telecommunications, but improving necessary public safety / emergency communications systems. The counties have passed municipal resolutions supporting the project. New Visions is working with the county legislatures of Schoharie, Cortlandand Oswego Counties to build high-speed broadband networks through rural areas which have no access to advanced telecommunications infrastructure. New Visions has long-term pole attachment agreements with National Grid to deploy the technology using exisconnect to the world. This project would leverage future funding. New Visions is in discussion with six other counties, and intends to apply for funding with the Rural Utility Service through USDA in the next round, September 2009. This three-county pro- 85 permanent jobs.

County	Project	Requested $	State Agency	Additional Detail
Delaware	Renovation of mid 1800 Village Hall to make it Handicapped Accessable an	$219,267	DASNY	This projects is for a Village Hall that was built back in the mid 1800's and it is to make it handicapped accessable and for weatherisation. The foundation needs reinforcement and it needs a fire escape constructed to make it a safe building.
Delaware	Masonville Town Hall Expansion Project	$200,000	DASNY	The Town of Masonville New York, located in Delaware County, is in dire need of updating and expanding our Town Hall. The current facility has not been updated in nearly 50 years. We currently have one small room attached to the highway garage to conductall of of the Town's business, including the Justice Court. This has forced the Supervisor and Town Clerk to operate out of their residences, which is problematic for the public and a violation of privacy for the officers. Moreover, the current Town Hall facility is not ADA compliant and no longer is legal as a polling station for elections. Our project is ""shovel ready"" with engineering and blue prints completed. All we lack is funding. We currently have approximately 75k set aside for the project and need another 200k in funding to get started. Any assistance the State could provide would be more than apprecia

The EMR application is comprised of a clinical data repository, aclinical decision support system, a computerized provider order enter (CPOE) system, a full pharmacy system with an electronic Medication Administration Record (eMar), and a full clinical documentation system. The EMR supports the patient's medical record across inpatient and outpatient encounters, and will meet all interoperability standards, including those defined by the Statewide Health Information Network of New York (SHIN-NY).

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Delaware, Ulster	Preventative Maintenance Resurfacing on Route 28 from Route 375 to Dela	$13,200,000	DOT	Preventative Maintenance Resurfacing on Route 28 from Route 375 to Delaware County Towns of Ulster Kingston Partially Funded
Delaware, Ulster	Health Alliance of the Hudson Valley	$14,000,000	OFT	A complete Electronic Medical Record system for all Hospitals in its network which include: Benedictine Hospital, Margaretville Hospital and The Kingston Hospital.
Dutchess	T. of Fishkill parks Expansion and Greenway Connections	$164,000	CDBG	
Dutchess	Birch Hill Collection System(Upgrade)Source&Treatment Upg	$525,000	CDBG	Birch Hill Collection System(Upgrade)Source&Treatment Upg
Dutchess	Phase One Addition	$200,000	DASNY	Large 4 bay garage with bonus room. Aprox. 40x50. Storage for fire apparatus and equipment. Current Firehouse is unable to store any other equipment or vehicles. This garage will be in addition to the Firehouse.
Dutchess	Hancock Technology Center	$35,500,000	DASNY	The 54,600-square-foot Hancock Technology Center will provide much-needed academic space for the entire Marist College community, and house an important, New York State-supported economic development component that will benefit the entire Hudson River Valley Region. The building will allow both the campus and surrounding business communities to leverage Marist College's advanced technology infrastructure, encouraging the application of innovative technology solutions across all academic disciplines andin the creation of much-needed jobs for the region. The Hancock Center will be home to: the School of Computer Science and Mathematics; the Marist Institute for Public Opinion (MIPO), which is at the forefront in using and testing the most cutting-edgepolling technology available; the International Programs Office; the Marist-IBM Join Study headquarters; and an economic development center focused on technology-oriented job creation, which will include the Center for Collaborative and On-Demand Computiobs and economic growth by working to date with more than 50 new and existing businesses. For example, the CCODC created the Wine Wizard, an online wine recommendation system that drives business to the Dutchess (County) Wine Trail's participating wineriosts an Arizona-based technology firm which has co-located part of its business and workforce here to Poughkeepsie. Among the building's academic resources will be: three computer labs; nine classrooms; six conference/seminar rooms; an executive present
Dutchess	North Campus Parking Lot Expansion	$300,000	DASNY	As part of a campus-wide effort to move parking to the perimeter of the campus and allow for the creation of more pedestrian and bike-friendly green space in the campus core, Marist College plans to expand an existing parking lot at the north end of its180-acre campus on the Hudson River in Poughkeepsie, New York. The project will expand the lot from its current 106 spaces to 163 spaces. However, because the project is aimed not at simply creating more parking, but rather is being done in concert withthe building of the $35.5 million Hancock Technology Center and the related elimination of a parking lot in the campus center to allow for more green space, the actual net increase will be 23 parking spaces.

County	Project	Requested $	State Agency	Additional Detail
Dutchess	Student Center Renovations and Upgrades	$9,500,000	DASNY	As part of both its institutional sustainability initiative and its campus-wide master plan, Marist College plans significant renovations and upgrades to its 129,000-square-foot Student Center to dramatically increase the space and energy efficiency of the largest, most heavily used building on its Poughkeepsie, New York campus. The overall, $9.5 million modernization of the Student Center will be undertaken within the context of the College?s $75 million comprehensive capital campaign, which will channel diverse private and public support to capital, academic and research projects, and scholarships, among other institutional priorities. The Student Center is the physical heart of Marist?s 180-acre Hudson River campus and the social center for the 5,000 undergraduate and graduate students who live and study here. Dating to the 1960s with a significant 1994 addition, the building is home to student social and government groups, the campus book store, dining facilities, student health services, classrofollowing major projects are planned and, once funding is secured, could break ground within 2-3 months: HVAC Upgrade ? Replacement of a heating, ventilating and air conditioning (HVAC) system, parts of which date to the 1960s. This particular system sare-foot area of the student center. Its replacement will produce dramatic increases in energy efficiency and long-term fiscal savings. Main Dining Hall Curtain Wall and Skylight ? In one of the most heavily-utilized spaces on campus, the College plans

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Dutchess	City of Poughkeepsie	$4,410,000	EFC	Letter of support from Senator Stephen Saland for projects in the City of Poughkeepsie - The Wastewater Treatment Plant has a 10-year capital reinvestment plan.
Dutchess	Cost effective industrial gas mixing system	$150,000	ESD	Lorex Industries - www.Lorex.com - has developed a novel system for enerating from a pure bulk gas, or out of a higher concentration gas blend a lower concentration gas mixture with a much improved control over the concentration. This system is expected
Dutchess	From Welfare to Business Startup	$400,000	ESD	GET is embarking on its fourth year of service. GET's free services help minorities and low income families start their own businesses, thus breaking up with the cycle of being part of social services. The program was started in the City of Poughkeepsieand in May of 2008 a second office was opened in the City of Newburgh, with the aim to expand to the cities of Middletown and Kingston. In the last three years, GET is working with 212 entrepreneurial projects with a total of 279 entrepreneurs. Of these212 projects, 93 are already in business. (See breakdown below). Each project is broken down into one of five categories: ? Latino/ Hispanic ? 62 projects ? African American ? 90 projects ? Asian/ Indian ? 12 projects ? White ? 36 projects ? Non profit ?12 projects Of these 212 projects, 93 are already in business. GET?s free, bilingual services are organized around the following elements: ? Free and confidential one on one consultation with a business development specialist to assess the feasibility aneurial, business and managerial skills the new entrepreneurs require to succeed. These include basic concepts like understanding the value and use of credit scores and savings accounts to more complex issues of bookkeeping, personnel practices, taxes anto the many resources available in the region. GET acts as a clearinghouse of information by partnering with existing organizations whose services go mostly unnoticed by new entrepreneurs. They are informed of and encouraged to make use of these services
Dutchess	Long Dock Beacon Park & Public Amenities	$1,500,000	ESD	This is an economic revitalization project and environmental reclamation of a 13-acre parcel on a post-industrial brownfield urban site along the Hudson River in the City of Beacon. Phase 1 of an $88 million dollar hotel-conference center, this projectsfinal environmental impact study has been approved by the city of Beacon. The park will include rehabilitated wetlands, walking trails that connect to nearby riverside trails, areas for picnicking, passive recreation and fishing. An environmental learning area for river-based environmental education for area schoolchildren will include native grasses, shrubs and trees, and connections to Beacon Point--a recently completed site specific art installation created by artist George Trakas, which attracts national and international visitors this economically distressed Hudson Valley city.
Dutchess	Revitalizing Amenia's Historic Gateway	$115,000	MAIN_ST	
Dutchess	City Of Poughkeepsie Main Street Program Iii	$500,000	MAIN_ST	
Dutchess	Poughkeepsie - Academy Street Initiative	$2,950,000	MAIN_ST	Security enhancements
Dutchess	Poughkeepsie Station Building	$10,000,000	MNRR	Construction rehabilitation of windows/doors and other critical repair needs; may include Energy Start lights, glass partitions/walls to utilize daylight, bicycle racks, low volatile coatings, & building management systems to control utilities
Dutchess	Energy Efficiency and Solar Power Demonstration Project	$3,500,000	NYSERDA	The City of Poughkeepsie strives to be the premier manufacturing location for solar panels in the Hudson Valley. The City also believes in energy conservation measures for all major City buildings including a demonstration project for City Hall.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Dutchess	Advanced Solar Thermal Gymnasium	$1,000,000	NYSERDA	The Advanced Solar Thermal (AST) system would optimize the use of solar thermal energy for the campus and would provide domestic hot water, solar space heating and solar cooling as needed. Installation of an AST system in a college setting in an area ofthe country where the solar resource is significant will assist in moving solar thermal distributed systems forward in this country. Currently, solar thermal is the largest renewable resource in use in the world due both to the availability of the sunand the cost-effectiveness of solar thermal; nonetheless, the U.S. is one of the countries with the least number of installations, an oversight that needs to be corrected. A marriage of solar thermal installations with college training and education would significantly boost the visibility and usage of solar thermal in the U.S.
Dutchess	Town of LaGrange town hall energy improvements	$655,000	NYSERDA	Geothermal heating and cooling, green/living roof, solar electric, front and rear vestibules, new windows and insulation.
Dutchess	Town of LaGrange town hall energy improvements	$655,000	NYSERDA	Geothermal heating and cooling, green/living roof, solar electric, front and rear vestibules, new windows and insulation.
Dutchess	Wastewater Treatment Plant Energy Reduction	$50,000	NYSERDA	Install solar panels at wastewater treatment facility. Reduce energy consumption and save taxpayer dollars. Over $40,000 is spent annually to run the plant. Electricity generated at this site could also be used to run additional municipal buildings.
Dutchess	Poughkeepsie - Energy Initiative	$3,500,000	NYSERDA	Actions to reduce energy costs.
Dutchess	City of Poughkeepsie	$3,500,000	NYSERDA	Letter of support from Senator Stephen Saland for projects in the City of Poughkeepsie - Energy Initiative - NYPA to complete a comprehensive energy audit of major buildings. Asking for funds to update buildings as pointed out.
Dutchess	Energy Conservation and Alternative Energy	$300,000	NYSERDA	The Energy Store will be a one stop shop for energy conservation and alternative energy sources for home and business. The showroom will showcase products and services to help consumers conserve energy and produce energy from alternative sources. In addition, an extensive education program will be conducted for consumers utilizing a structured program.
Dutchess	Upgrade HVAC and Electrical Systems for Energy Efficiency	$2,961,000	NYSERDA	This project will update the HVAC and electrical systems at Carmel Richmond Healthcare and Rehabilitation Center (Richmond County), Ferncliff Nursing Home (Dutchess County), Kateri Residence (New York County), and San Vicente de Paul Skilled Nursing andRehabilitation Center (Bronx County). The initiative will reduce fuel consumption and improve energy efficiency, while seeking to incorporate the latest green technology to result in fewer emissions and increased cost savings.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Dutchess	VoIP Technology	$400,000	OFT	Hudson River HealthCare (HRHCare) currently supports over 20 primary care delivery sites. Each of these sites has a legacy PBX system implemented for telecommunications. These legacy PBX systems offer virtually no integration. Technology has matured to the point where it is cost effective to consolidate networking capabilities rather than maintaining separate voice and data networks. In order to create an efficient centralized support system, HRHCare must implement a state of the art, voice, data, and video communications system. Utilizing VoIP technology, HRHCare will be able to implement centralized help desk capabilities, centralized multi-lingual operator capabilities, centralized scheduling, and centralized on-call clinical support systems. The implementation of VoIP technology and the convergence of voice and data communications will have a significant and long-term impact for both the Health Center and the populations served. Completion of the project will ensure reliability for data collectionty for the electronic health record. The implementation and cost savings associated with this project will allow HRHCare to develop a new centralized call center creating new and maintaining existing job opportunities.
Dutchess	Firehouse expansion and upgrade project	$6,000,000	OHS	An expansion/upgrade of the fire districtÆs single facility includes: 10-bay apparatus facility, cardio fitness room, district offices, Board meeting room, department offices, secure storage, expanded kitchen, bathrooms and shower/decon facilities.
Dutchess	Union Vale Station 1 Refirbishment	$150,000	OHS	Union Vale Station #1 is in need of infrastructure repair. The bay floors need to be replaced, as well as the blacktop in and around the firehouse. We have started other aspects of the project, but are in need of additional funds to complete this year. We feel the upgrades to the station, originally build in 1956, are more cost efficient then the building of the new firehouse. Project would also include energy effiecint heating, and all new landscaping.
Dutchess	City of Beacon Fire Dept. Firehouse	$13,000,000	OHS	Construct a central firehouse for the City of Beacon Fire Department in order to combine the Beacon Engine Company, Lewis Tompkins Hose Company, and the W.H. Mase Hook & Ladder Company. Two of the firehouses are over 100 years old and all three buildingsare in desperate need of repairs. A new central firehouse will provide taxpayers with significant savings by combining existing expenses as well as improved safety for firefighters. The project will create well over 100 construction jobs.
Dutchess	City of Poughkeepsie	$2,950,000	OHS	Letter of support from Senator Stephen Saland for projects in the City of Poughkeepsie - Academy Street Initiative - Overall initiative with increased security, public improvements, and public-private investment model
Dutchess	Staatsburg SHS - Roadway Improvements	$600,000	OPRHP	
Dutchess	Bannerman Island Historic Trails Preservation	$310,000	OPRHP	Preserve, stabilize historic trail system and up date water access to Bannerman Island. County	Project	Requested $	State Agency	Additional Detail
Erie	Develop Town Library lower level	$500,000	DASNY	Space for historian, historical exhibits, art & cultural exhibits & programs, class rooms & conference area
Erie	Expand Senior Center	$1,400,000	DASNY	Office space, classrooms, exercise room, kitchen, & general meeting areas
Erie	Brush Mountain Activity Center Master Plan	$18,000,000	DASNY	Senior Center, Recreation Offices & Community Center
Erie	Municipal building improvements	$1,000,000	DASNY	Repalce windows, HVAC & electrical systems
Erie	Town Center	$1,000,000	DASNY	Town service center, public library, archives & records center
Erie	Gym Facility at Kenmore Youth Center	$900,000	DASNY	Gymnasium addition
Erie	Renovation of Parking Pavilion	$5,000,000	DASNY	Canisius College has acquired a 1,350 space parking pavilion as part of the purchase of property that includes a building that will be transformed into the college's interdisciplinary science center. The parking pavilion is a 46 year-old structure thatis need of significant renovation to sustain its useful life. The college intends to make improvements to the decks and other related improvements that will allow full use of the facility for many years into the future.
Erie	ALT Building Renovations and Enhancements	$6,000,000	DASNY	This six-story academic building contains classrooms, laboratories and administrative spaces that remain much the same as built in 1967. Classrooms, labs, HVAC, glazing need to be replaced with stat-of-the-art equipment and space needs redesign to respond to today's needs.
Erie	New Academic Building	$23,000,000	DASNY	Construction and equipping a new six-story 88,000 square foot academic building to accommodate a School of Pharmacy and academic support functions.
Erie	New Athletic Fields	$7,000,000	DASNY	The college is a Division III school with no athletic fields to support required team sports as baseball, softball, soccer. Project would acquire land and construct two (2) soccer fields, a softball and baseball field with associated locker, storage rooms as well as lavatories and snack stand including artificial turf and lighting for night games.
Erie	Remodel and Renovation of Marguerite Hall	$7,000,000	DASNY	This 200 bed, 13-story residence hall provides services as designed for 1969. Today's students demand increased privacy including private or semi-private baths, one and two person rooms and modern lounge, recreation, congregation and study space. Interiors would be remodeled to accommodate new needs.
Erie	Roof Replacements	$420,000	DASNY	Three (3) academic buildings are in need to have 30+ year original roofs removed and replaced.
Erie	Hilbert College Science Laboratories Renovations	$1,000,000	DASNY	Hilbert College will renovate its science laboratories to bring them up to industry standards, an effort that is critical to enhancing the teaching of chemistry and biology necessary for today?s college students. Scientific literacy of all Hilbert students will be strengthened with the addition of cutting-edge science laboratories at the college. Along with being educated in biology and chemistry, Hilbert students will practice and hone their critical-thinking, teamwork and problem-solving skills. By using the renovated labs, the goal is for Hilbert students to be better prepared and more productive in their professional fields and/or graduate studies.
Erie	Community Health Center of Buffalo	$1,100,000	DASNY	Increasing Access to Primary Care in Buffalo, NY
Erie	Facilities Building, Town Hall Campus	$1,750,000	DASNY	New construction of office and garage

County	Project	Requested $	State Agency	Additional Detail
Erie	Boys & Girls Club Renovations	$500,000	DASNY	Repair a 1920 former elementary school for continued use as WNY largest teen center with new windows, HVAC, roof repairs, and outdoor grounds improvements
Erie	ECMC Renovation Project	$8,000,000	DASNY	This project includes an expansion to the emergency department and surgical suite as well as the addition of eight new treatment stations and two new operating rooms. It will create numerous jobs during the construction phase and may result in as many as300 permanent new staff positions at ECMC.
Erie	ECMC Health Information Technology Project	$2,700,000	DASNY	This project includes an ambulatory electronic medical record system which will enhance data connectivity from the main hospital to off-site locations; physician portal implementation to provide physicians with access to critical information with the useof mailings or faxes; medication reconciliation software to improve the quality of data that is being recorded; mobile phlebotemy solution to improve patient safety and eliminate labeling errors; radiology voice recognition solution; hospital wireless network upgrade; opertiang room and emergency room automation; as will as automated prescription writing and patient discharge among other improvements.
Erie	Bornhava Children's Evaluation Center - Construction Project	$30,000	DASNY	Bornhava will use these funds to create a children's evaluation center and family/parent room on its main floor. Space for this evaluation center and family meeting room will be achieved by moving most of the administrative staff to the existing second floor, which will have to be renovated and expanded in order to accommodate office and administrative functions.
Erie	Renovation of School Parking Lots and Driveways	$25,000	DASNY	Bornhava will use these funds to repair and repave its school parking lots and driveways. Currently, potholes and varying levels in the parking lots and approaches to the school building pose safety issues for school busses, staff and parents as they drop off and pick up their children at Bornhava. Additionally, the parking lots are used for large outdoor events, i.e. summer time carnivals, United Way Day of Caring program, visiting petting zoo, end-of-school year family picnic,etc.
Erie	Renovation of DEC Campus- Restoration of current Buffalo residential eyes	$1,500,000	DASNY	
Erie	Huber Hall Expansion / Renovation Project	$1,600,000	DASNY	The Huber Hall Expansion/Renovation Project, housing Medaille College's new Student Success Center, is a 'shovel ready project' that the College plans to construct as soon as documents are complete and funding is received. The project cost is $1.6 million and incorporates 8,000 square feet of new construction, that includes the following components: ? Student Success Center ? addition that focuses on key services critical to today?s students, including an Academic Skills Center that houses our federally-funded TRIO/SSS program, Academic Advisement, Career Counseling, and Disability Services programs ? Library ? renovation/addition that enhances tutoring, instructional and student group/individual study and learning areas To date, we have completed thefollowing tasks: ? Geotechnical Investigation ? Underground Utility Investigation ? Site Survey We will complete construction documents and anticipate receiving our building permit within the next 30 days, bid the project immediately thereafter, and look
Erie	Erie County Medical Center - renovations	$8,000,000	DASNY	Expansion of the emergency dept. and surgical suite as well as the addition of eight new treatment stations and two new operating rooms.
Erie	Erie County, City of Buffalo, Ralph Wilson Stadium	$5,800,000	DASNY	Erie County, City of Buffalo, Ralph Wilson Stadium Lease agreement between County and Buffalo Bills requires that the County provide annual Capital infrastructure improvements in order to preserve longevity of the Stadium. Create Costruction Jobs and maintain a sports venue that brings in people from other cities and countries

Erie	Gunshot detection locator enhancement	$425,000	DCJS	
Erie	Protecting Buildings from BioTerrorist Attacks	$1,000,000	DCJS	The BioBlower is a patented device that instantaneously sterilizes air using compressive heating to provide a continuous supply of sterile air to military, government and healthcare facilities and commercial buildings. Air is continuously compressed in amechanical pump uniformly increasing the temperature of the entire volume of air to the sterilization temperature, approximately 465 degrees Fahrenheit. Upon leaving the pump, most of the heat used to sterlize the air is recovered to conserve energy asit flows into the building's normal air handling system. As independently verifed by third party testing at Research Triangle Institute for DOD, the BioBlower KILLS 99.9999% (the limit of detection) of all airborne biological threats (viruses, spores, bacteria) in the treated air. The BioBlower represents a major step forward from current technology, High-Efficiency Particulate Air (HEPA) filters. HEPA filters trap 99.97% of most airborne particles, but recent Air Force Research Laboratory research showelectricity. A FY06 congressional appropriation provided BioBlower needed funding to reduce the power consumption, weight and footprint of the BioBlower and develop and test a 300 CFM (cubic feet per minute) prototype for portable military shelters. A FYropriation is allowing us to better understand the biokill mechanisms, scale-up (1,000 CFM) and scale -down (100 CFM) the technology, and improve blower technology. FY10 funding will enable us to employ the improved blower technology to further scale up

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail

Erie	Eighteen Mile Creek Emergency Watershed Protection Program	$1,500,000	DEC	The Town of Boston respectfully requests assistance in securing federal aid aimed at restoring damages sustained in Erie County by the recent rain and subsequent snow melt event that occurred on December 26-28, 2008. This event has caused significant erosion damage throughout the watershed and specifically, within the Town of Boston. This erosion jeopardizes homes, roads and bridges, which individually and collectively, pose an immediate threat to human safety. In partnership with the Erie County Soil and Water Conservation District, a local partner agency of the USDA Natural Resource Conservation Service, the Boston Town Board and its constituents encourage your support of this federal assistance request. The Eighteen Mile Creek Watershed is a critical resource in the Town of Boston. The Town of Boston has been actively working with the Erie County Soil and Water Conservation District for the last four years to mitigate erosion concerns stemming from severe damage in 1998. The Town has also been succ

Erie	Bioinfomatics Center of Excellence / CTG Statewide value-based medical ti	$5,000,000	DOH	
Erie	Red Door Pilot Program	$275,000	DOH	This is a pilot program. Funds would support professional and administrative staffing for an outreach program that would enable Gilda's programming, networking and educational support to become accessible to persons living with cancer in an expanded geography. Over a 12 month period, programming potential for growth of 50% (from current 1000 members to 1500 members).
Erie	Prostate Cancer Prevention	$2,000,000	DOH	AndroBioSys is requesting funding for a project whose goal is to develop a therapy to cure the lethal form of Prostate Cancer. In 2008, over 186,000 individuals in the US were diagnosed with prostate cancer and over 28,600 died of this disease. It is thesecond leading cause of cancer-related death in males, with African-Americans having almost a two-fold greater risk of death. The project will directly benefit those individuals who are experiencing recurrence of prostate cancer, the general populationwho is at risk as well as the estimated 2 million individuals in the US currently living with Prostate Cancer. The approach developed will also be applicable to other prevalent, challenging cancer types such as breast and ovarian which remain debilitating diseases as well. The funding request will cover hiring research personnel, laboratory supplies and equipment. This will be a one time expense as personnel hired for this project will be funded through contract research projects and pharmaceutical compd creates employment opportunities for locally trained scientists in the commercial biotechnology sector.
Erie	Increasing Access to Primary Care in Buffalo, NY	$1,600,000	DOH	The Community Health Center of Buffalo (CHCB) is requesting $1.6 million from the Economic Recovery and Reinvestment Act to underwrite our Health Information Technology (HIT) system and part of the cost of constructing a new 30,000 sq. ft. building to allow the CHCB to increase access to care for underserved populations. Construction of the new primary care supper center and the HIT will improve access to care, quality of care, health outcomes, patient satisfaction and use of primary and hospital services. The CHCB will act as the ?hub? or entry point to the healthcare delivery system. The CHCB will be the core of a new integrated network that is strategically positioned to work with all of the major hospital systems. To achieve this objective, collaborative agreements link CHCB to hospitals and specialists into a mutually beneficial network that reduce barriers to accessing care. The goal is to work towards an integrated healthcare delivery system designed to improve the effectiveness of primary care
Erie	Cancer center infrastructure improvement program	$103,000,000	DOH	ROSWELL PARK CANCER INSTITUTE Hospital and Ambulatory Facililty Expansion. To replace expired finding that was included in The Medicare and Medicaid Modernization Act of 2003

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Erie	Community Health Center of Buffalo	$500,000	DOH	Health Information Technology
Erie	EHR Network Infrastructure	$250,000	DOH	We are an IT Group for Healthcare. We help Medical Practices get ready for EHR. We become their IT Department and help them assess, evaluate and purchase an EMR. We build the infrastructure and negotiate the price.
Erie	Health Care Criminal Background Checking	$650,000	DOH	We would like to start up a program for health care organizations much the same as the one that we have developed through private funds and is currently running successfully in Monroe County. The program is administered by the Foundation for Quality CareUpstate for the benefit of health care facilities. The program is possible through collaboration with the local Sheriff?s Department. This program differs from mandatory FBI background checks in several ways. First, the benchmark turnaround time for thecounty reports is a week, with some taking significantly less time. The mandated FBI checks can take up to three months or longer for results. Second, the check is pre-employment. Facilities using the program in this manner have the ability to make informed hiring decisions. Applicants with disqualifying histories are never employed. Third, all employees are checked through the system, not just the unlicensed direct patient care staff that is mandated in New York State regulation. Many licensed profess
Erie	Community Early Detection Center	$750,000	DOH	Community Early Detection Center for the underserved inner city population. The primary purpose of the center is to detect diseases that affect the minority inner city community at the earliest stages. Doing so will in a long and short run reduce the overall health care cost. The center will combine the most recent technology with care and education. The uniqueness of the center is not to simply screen and treat but also to educate in a manner that is more effective for the population served. This callsfor going above and beyond providing literature to read and comprehend, which is a challenge to many within the communityl (which accounts for much of the non-compliance of the patient in medical care). The education will also include family members ina effort to make an impact on future generations. The initial disease of the Detection Center will be colon cancer. Expansion of diseases will include Breast Cancer, Heart Disease, and Prostate Cancer. An Additional goal would be to include nurse & residantages of participation in clinical trials and to provide the grounds for new researcher development. The center will collobrate with other health care professionals as well as educational institutions in an effort to make an positive impact on encouragn"" and ""specialized nursing"". The creation of jobs and medical advancement derived from this unique Detection Center will be an monumental benefit to the co

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Erie	Red Oak Drive	$535,000	EFC	Replacement of watermain
Erie	Foxcroft Lane	$200,000	EFC	Replacement of watermain
Erie	Sprucewood Terrace - Maple Rd. to Brian Ave.	$150,000	EFC	Replacement of watermain
Erie	Old Niagara Falls Blvd	$435,000	EFC	Replacement of watermain
Erie	Ponderosa Drive - Clearfield Dr. to Red Oak Dr.	$335,000	EFC	Replacement of watermain
Erie	Tonawanda Creek Road - Address #1900 to Orbit Dr.	$1,200,000	EFC	Replacement of watermain
Erie	Country Parkway	$570,000	EFC	Replacement of watermain
Erie	Mahogany Drive	$240,000	EFC	Replacement of watermain
Erie	Bauman Road	$100,000	EFC	Replacement of watermain
Erie	Stahl Road	$225,000	EFC	Replacement of watermain
Erie	North French Rd - Sweet Home Rd. to Niagara Falls Blvd.	$900,000	EFC	Replacement of watermain
Erie	Dodge Road - Hopkins Rd. to North French Rd.	$1,000,000	EFC	Replacement of watermain
Erie	Cindy Drive	$300,000	EFC	Replacement of watermain
Erie	Edgewater Drive	$400,000	EFC	Replacement of watermain
Erie	Jeanmoor Drive and Court	$265,000	EFC	Replacement of watermain
Erie	Kaymar Drive	$785,000	EFC	Replacement of watermain
Erie	South Ellicott Creek Road - Sweet Home Rd. to Honeybee Dr.	$550,000	EFC	Replacement of watermain
Erie	North Ellicott Creek Road - Sweet Home Rd. to Niagara Falls Blvd.	$920,000	EFC	Replacement of watermain
Erie	Sweetwood Drive	$350,000	EFC	Replacement of watermain
Erie	Dalewood Drive	$375,000	EFC	Replacement of watermain
Erie	Sandhurst Lane	$175,000	EFC	Replacement of watermain
Erie	Brooklane Drive	$265,000	EFC	Replacement of watermain
Erie	Eggerstville Sanitary Sewer Trunk Replacement & Overflow Abatement Pro	$1,930,000	EFC	Replacement of sanitary sewers
Erie	Eggert Rd./Lebrun Sanitary Sewer Trunk Replacement & Overflow Abateme	$1,084,380	EFC	Replacement of sanitary sewers
Erie	Snyder Sanitary Sewer Trunk Replacement & Overflow Abatement Project	$1,782,000	EFC	Infrastructure improvements
Erie	Callodine/Carmen Sanitary Sewer Replacement Project	$240,000	EFC	Infrastructure improvements
Erie	Callodine Sanitary Sewer Replacement - Phase II	$1,782,000	EFC	Infrastructure improvements
Erie	Snyder Sanitary Sewer Trunk Replacement & Overflow Abatement Project	$325,000	EFC	Infrastructure improvements
Erie	Millersport Highway Sanitary Sewer Replacement	$310,000	EFC	Replacement of sewer
Erie	Clarifier Drive Unit Replacements	$600,000	EFC	Replacement of five obsolete drive units with new energy efficient units
Erie	Main Sewage Pumps Replacement	$2,000,000	EFC	Replacement of three main sewage pumps and associated electrical equipment
Erie	Oxygen Deck Rehabilitation - Stage II	$650,000	EFC	Complete structural repairs to the existing concrete deck
Erie	Andritz Solids Handling System Improvements	$975,000	EFC	Repairs and replacements of critical system components which are severely eroded and/or corroded
Erie	Plant-wide Automation System Improvements	$2,000,000	EFC	Energy and cost efficient controls system improvemnts on a facility-wide basis
Erie	Polymer System Replacement	$210,000	EFC	Replacement of the existing failing, unsafe and energy inefficient system
Erie	Redundant Gravity Belt Thickener	$750,000	EFC	Procurement of a redundant belt thickener to improve solids handling process efficiencies
Erie	Ultraviolet Disinfection System	$4,500,000	EFC	Replacement of the existing operationally hazardous process system with saver UV disinfection system
Erie	Grit System and Sluice Gate Replacement	$1,750,000	EFC	Replacement of existing system
Erie	Grit Chamber Moto Control Center (Bldg No. 2)	$100,000	EFC	Replacement of existing critical electrical equipment
Erie	Digesters Compressors Replacement	$150,000	EFC	Replacement of existing critical equipment

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Erie	Oxygen Generation Plant Replacement	$170,000	EFC	Replacement of existing critical equipment
Erie	Intermediate Liftstation Pump Rehabilitation	$220,000	EFC	Infrastructure improvements
Erie	Harding, McKinley Storm Sewer Imrprovements	$800,000	EFC	Installation and/or replacement of the storm sewer.
Erie	South Main Street/Goya Distribution Center Waterline	$300,000	EFC	Replace deficient waterline with new waterline required by Phase II and Phase III of Goya Foods Plant expansion.
Erie	Water Tower	$500,000	EFC	Infrastructure improvements for additional water pressure needed to increase water system pressures
Erie	South Main Street Waterline	$360,000	EFC	Replace deficient waterline with new waterline.
Erie	Lake Street Waterline	$3,100,000	EFC	Replace 2.7 miles of deficient and aging waterline to improve water quality and service.
Erie	Water Improvement District	$3,400,000	EFC	for Glenridge, Castle Hill, Main, Cook, Lapham S Park, Victoria Height, Wellington, Morningside
Erie	Water District No. 2 Extension	$2,050,000	EFC	
Erie	Water District No. 2 Extension Number 3	$400,000	EFC	
Erie	East Hill Water District No. 3	$3,250,000	EFC	
Erie	South West Erie County Regional water project: Town of Brant	$7,100,000	EFC	New construction & revamp & upgrade of 100 year old Village of North Collins system that will supply water to Brant and eliminate serious environmental problems.
Erie	Town Hall Campus	$1,450,000	EFC	Infrastructure improvemetns (road, sewer, waterline, hydrants)
Erie	Meadowlawn Phase II Sanitary Overflow Relief Project	$250,000	EFC	Install a sanitary relief to eliminate overflow/bypass pumping and reduce/eliminate basement flooding
Erie	North Creek Interceptor Sewer	$1,400,000	EFC	Install a trunk sanitary sewer and life station to eliminate overflow/bypass pumping to reduce/eliminate basement flooding
Erie	Winston-Vegola Incerceptor sewer	$3,500,000	EFC	Install a sanitary trunk relief sewer to eliminate overflow/bypass pumping at two locations and reduce/eliminate basement flooding
Erie	Roycroft Pump Station Trunk Sewer	$2,000,000	EFC	Install a sanitary trunk rewer to eliminate storm bypass pumping from the Roycroft Sanitary Pump Station & reduce/elminate basement flooding
Erie	Sanitary Sewer Lining Project	$2,500,000	EFC	Line sanitary sewers at all NYS Thruway, Kensington Exprswy, State/County Highways, easements and storm crossings to eliminate/reduce infiltration of storm waters into the sanitary sewer system
Erie	George Urban Pump Station Trunk Sewer	$1,500,000	EFC	Install sanitary trunk sewer to eliminate storm bypass pumping from the Roycroft Sanitary Pump Station and reduce/eliminate basement flooding
Erie	Vern Lane Trunk Sewer	$3,000,000	EFC	Install sanitary trunk sewer remedial work to eliminate gravity overflow/bypassing to reduce/eliminate basement flooding
Erie	Aero Drive Industrial Sewer & Water Extension	$1,750,000	EFC	Infrastructure improvements
Erie	Sanitary Sewer Remedial Project	$8,000,000	EFC	Infrastructure work to existing sewer system to reduce inflow and infiltration into the sanitary sewer system from the direct/indirect connection and to reduce/eliminate basement flooding
Erie	Cayuga Interceptor Sewer	$1,250,000	EFC	Install sanitary trunk sewer to relieve overloaded Maryvale sewer system and direct flows to NE Interceptor to reduce/eliminate basement flooding
Erie	Town of Colden Water District No. 2	$6,440,000	EFC	Installation of PVC water main; 240K gallon elevated water storage tank; 120K gallon elevated water storage tank; pumping stations
Erie	Town of Colden Water District No. 3	$2,280,000	EFC	Water main; pumping stations; 120K gallon grade level storage tank
Erie	Town of Colden Water District No. 4	$3,500,000	EFC	Water main; 120K gallon elevated water storage tank; pump station
Erie	Water Line Replacement	$8,300,000	EFC	Aging water lines
Erie	Water SCADA	$90,000	EFC	Instrumentation for water system controls
Erie	Water System Booster Pump	$200,000	EFC	Install new construction

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Erie	Upgrade Pump Station	$1,500,000	EFC	For ability to supply water to Collins Correctional facility
Erie	Automation of SSO Control Valves & Remote Monitoring of Sites	$750,000	EFC	Installation of Motor Operators & SCADA System
Erie	Sanitary Sewer Overflow Abatemetn, SSO 007	$120,000	EFC	at Village Dept. of Public Works Site
Erie	SSO Force Main Improvements	$200,000	EFC	
Erie	2009 Sanitary Sewer Lining & Manhole Rehabilitation Project	$35,000	EFC	Local Share
Erie	Main Street Water Infrastructure Replacement	$3,200,000	EFC	Water betterments in the NYSDOT Main Street reconstruction project - replacement of waterline, hydrants, curboxes laterals, etc.
Erie	Increase & improvement of facilities for Consolidated Water District & Wate	$5,280,000	EFC	Construction of new water transmission line along Shadagee Road & new pump station
Erie	Hemlock Road Water Improvement project	$570,000	EFC	Replacement of failing existing waterlines; reconnection of existing hydrants
Erie	Jerge Sewer District #4	$450,000	EFC	Replacement of sewer lines & plant for entire system
Erie	Elma Meadows Sewer District #5	$275,000	EFC	Replacement of sewer lines
Erie	Geyer Rd. Water Line Replacement	$165,000	EFC	Replacement of aged water lines
Erie	Replacement of water line - Girdle Rd. between Clinton & Chair Factory	$750,000	EFC	Water main w/ fire hydrants & house service
Erie	Water District Improvement for Town-Wide Service	$2,075,000	EFC	Install larger pump at Transit shop w/ variable frequency drive in conjunction w/ 1M gallon additional storage tank at Jamison Rd. shop
Erie	Tube Settler Upgrades	$2,303,000	EFC	Install tube settlers at Water Treatment Plant
Erie	Sand Filters & High Service Pump Station Upgrades	$3,130,000	EFC	Upgrade existing sand filters at the Water Treatment Plant & install large & more energy efficient high lift pumps to boost supply and pressure throughout the system
Erie	Staley Road Transmission Line	$500,000	EFC	Install PVC transmission line
Erie	Baseline Road Transmission Line	$1,250,000	EFC	Install PVC transmission line to boost supply & pressure
Erie	South End ORF	$0	EFC	Construct 6M gallon ORF at South End of Island to retain wastewater during periods of high flows until WWTP can accept the flow for treatment & eliminate SSOs
Erie	New Interceptor	$0	EFC	Approx. 1 mile to transmit more flow to WWTP & eliminate SSOs
Erie	New Primary Clarifiers	$0	EFC	Two new clarifiers to handle increased flow to WWTP
Erie	New Final Clarifier	$0	EFC	To handle increased flow to WWTP
Erie	New Thickener	$0	EFC	To handle increased flow to WWTP
Erie	WWTP Influence & Effluent Modfiications	$0	EFC	Modifications such as pumping, equipment, piping & channels to handle increased flow to WWTP
Erie	Sewer Rehabilitation of Existing System	$0	EFC	Modify or repair wastewater acceptance & conveyance systems to eliminate stormwater & reduce volume of wastewater in systems
Erie	Town Wide Water Line Project	$2,300,000	EFC	Replacement of deteriorated water lines
Erie	Creation of Water District No. 5	$1,500,000	EFC	Homes in need of water due to poor quality wells
Erie	Expansion of Water District No. 10, Phase 4	$1,400,000	EFC	Waterline to residents, increasing water pressure
Erie	Burnside Dr. & Edgewood Ave. Waterlines	$1,000,000	EFC	Repalce existing antiquated residential waterlines
Erie	Greenfield Water Tank	$1,000,000	EFC	Structural modifications, cleaning & painting
Erie	Chelsea, Irving Terr, Argonne & Kenmore Waterlines	$1,486,000	EFC	Replace existing antiquated residential waterlines
Erie	Delaware Rd, Lumney, Cleveland, Paramount & Colvin Waterlines	$2,688,000	EFC	Replace existing antiquated residential waterlines
Erie	Louvaine, Hartford, Wendover, Deumant, Fayett & Fairbanks Wanterlines	$2,688,000	EFC	Replace existing antiquated residential waterlines
Erie	McConkey, Cleveland, Orchard, Northwood & Southwood Waterlines	$2,400,000	EFC	Replace existing antiquated residential waterlines
Erie	Riverview, Dupont, Desmond, Mapleview & Elmview Waterlines	$2,688,000	EFC	Replace existing antiquated residential waterlines
Erie	North Youngmann Commerce Center	$4,400,000	EFC	Access road, bridge of Two Mile Creek, waterlines, sewers, drainage and relocate existing waterline
Erie	East & West Rd. Watermain Replacement (OP Rd. to Union Rd.)	$500,000	EFC

County	Project	Requested $	State Agency	Additional Detail
Erie	East & West Rd. Watermain Replacement (Mill Rd. to Angle Rd.)	$400,000	EFC	
Erie	2009 Sanitary Sewer Rehabilitation Project	$400,000	EFC	
Erie	Waterline Improvements	$1,000,000	EFC	Upgrading lines for residents & firefighters
Erie	Sanitary Sewer Pump Station Rehab&Elimin	$1,600,000	EFC	Sanitary Sewer Pump Station Rehab&Elimin
Erie	Sanitary Sewer Line Rehab through out the Village	$1,800,000	EFC	Sanitary Sewer Line Rehab through out the Village
Erie	Lombary Ln Woodview Ct Hillview Pl S lake St Woodview A	$560,000	EFC	Lombary Ln Woodview Ct Hillview Pl S lake St Woodview A
Erie	Central Ave & Center St Dead End Water Main Replacement	$227,500	EFC	Central Ave & Center St Dead End Water Main Replacement
Erie	Crescent Ave Maple Ave Rosendale Ave Water Main Replace	$980,000	EFC	Crescent Ave Maple Ave Rosendale Ave Water Main Replace
Erie	Victory Ave Idlewood Ave Hawkins Ave Pleasant Ave Water	$752,500	EFC	Victory Ave Idlewood Ave Hawkins Ave Pleasant Ave Water
Erie	Windover Dr Long Ave Brendel Ave Hunt Ave Colvin Ave	$927,500	EFC	Windover Dr Long Ave Brendel Ave Hunt Ave Colvin Ave
Erie	Henderson Pl Oliver Pl Anderson Pl Donald Pl Oakland Pl	$682,500	EFC	Henderson Pl Oliver Pl Anderson Pl Donald Pl Oakland Pl
Erie	Huntington Ct Marengo St Salisbury Pl Wright Pl Water Main	$420,000	EFC	Huntington Ct Marengo St Salisbury Pl Wright Pl Water Main
Erie	Sickmon Av George St Martha Pl Water Main Replacement	$245,000	EFC	Sickmon Av George St Martha Pl Water Main Replacement
Erie	Village of North Collins	$0	EFC	Crisis with their 1916 water distribution systems - needs to be replaced
Erie	Crittendon Road Water Line Replacement	$9,000	EFC	Replacement of existing undersized water line in village of Akron
Erie	Change from Chlorine Gas Disinfection to Chlorine Dioxide at Water Plant	$50,000	EFC	Due to higher standards required by new Chlorine Disinfection By-product Laws
Erie	Sewer Plant Project	$750,000	EFC	To bring 1960 sewer to today's standards
Erie	Klein Road	$950,000	EFC	Infrastructure improvements - Replacement of Water main
Erie	Transit Rd. -Wolcott Rd. to Address #10870	$450,000	EFC	Infrastructure improvements - Replacement of Water main
Erie	Hillcrest Dr.-Emerson Dr. to Homecrest DR.	$160,000	EFC	Infrastructure improvements - Replacement of Water main
Erie	Tonawanda Creek Rd.-Address #1900 to Orbit Dr.	$1,200,000	EFC	Infrastructure improvements - Replacement of Water main
Erie	Country Parkway	$570,000	EFC	Infrastructure improvements - Replacement of Water main
Erie	Dodge Rd. - Hopkins Rd. to North French Road	$1,000,000	EFC	Infrastructure improvements - Replacement of Water main
Erie	Glenbourne Court	$60,000	EFC	Infrastructure improvements - Replacement of Water main
Erie	Main Sewage Pumps Replacement	$2,000,000	EFC	Replacement of 3 main sewage pumps and associated electrical equipment
Erie	Plant-Wide Automation System Improvements	$2,000,000	EFC	Energy and cost efficient controls system improvements on a facility-wide basis
Erie	Redundant Gravity Belt Thickener	$750,000	EFC	Procurement of a redundant belt thickener to improve solids handling process efficiencies
Erie	Grit System and Sluice Gate Replacement	$1,750,000	EFC	Replacement of existing system
Erie	Sodium Hypochlorite Tank Replacement	$50,000	EFC	Replacement of existing chemical storage tank
Erie	Village of Angola - Water Tower	$500,000	EFC	Infrastructure improvements
Erie	Village of Angola - Lake St. Waterline	$3,100,000	EFC	Replace deficient waterline
Erie	Village of Angola - Entire Village Storm Drains	$3,000,000	EFC	Infrastructure improvement
Erie	South West Erie Co. Regional Water Project	$7,100,000	EFC	Town of Brant - New construction, revamp and upgrade village of North Collins system
Erie	Winston-Vegola Interceptor Sewer	$3,500,000	EFC	Install sanitary sewer trunk relief
Erie	George Urban Pump Station Trunk Sewer	$1,500,000	EFC	Install sanitary trunk sewer to eliminate storm bypass
Erie	Pump Station Remote Telemetry Project	$750,000	EFC	Install telemetry at all outlying pump station locations
Erie	Town of Colden Water District No. 4	$3,500,000	EFC	Installation of water main, water storage tank, pumping stations
Erie	Upgrade Pump Station	$1,500,000	EFC	For ability to supply water to Collins Correctional Facility
Erie	Automation of SSO Control Valves and Remote Monitoring of the SSO Site	$750,000	EFC	Installation of Motor Operators and SCADA System
Erie	Jerge Sewer District #4	$450,000	EFC	Replacement of sewer lines and plant for entire system. DEC violations.
Erie	Water Tank Restoration	$600,000	EFC	Repairing & refurbish water tank
Erie	Replacement Water Line - Girdle Rd. between Clinton and Chairfactory	$750,000	EFC	Water main with fire hydrants and house service

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Erie	Staley Road Transmission Line	$500,000	EFC	Install transmission line to better serve industrial clients
Erie	Water Storage Upgrade	$2,100,000	EFC	Install an elevated storage tank to boost supply and pressure in industrial corridor
Erie	South End ORF	$0	EFC	Construct a 6 million gallon capacity ORF at the South End of the Island to retain wastewater
Erie	New Interceptor	$0	EFC	Construct a new interceptor to transmit more flow to the WWTP
Erie	New Primary Clarifiers	$0	EFC	Construct two new primary clarifiers to handle increased flow to WWTP
Erie	New Final Clarifier	$0	EFC	Construct one new final clarifier to handle increased flow to the WWTP
Erie	New Thickener	$0	EFC	Construct one new thickener to handle increased flow to the WWTP
Erie	WWTP Influent & Effluent Modifications	$0	EFC	Modify influent & effluent processes such as pumping, equipment, piping, channels to handle increased flow to WWTP
Erie	Sewer Rehabilitation of Existing System	$0	EFC	Modify or repair wastewater acceptance and conveyance system to eliminate stormwater and reduce volume of wastewater in the systems
Erie	Town of Hamburg Water System Improvement Project	$5,229,000	EFC	Erie Co. Water Authority has agreed to take over ownership & maintenance responsibility of the town's water system facilities - ECWA is requiring the town first undertake replacement of existing substandard or deficient waterlines and various water system improvement
Erie	Expansion of Water District #10 - Phase 4	$1,400,000	EFC	Provide waterline to residents on Scotland Rd., Knapp Rd., Indian Falls Rd. and increase water pressure to many other residents of town
Erie	Expansion of Water District #10 - Phase 5	$2,100,000	EFC	Provide waterline to residents on Tonawanda Creek Rd., Burdick Rd., Koepsel Rd., Maple Rd., Nice Rd., and Cedar St.
Erie	Parker/Fries Sanitary Sewer Interceptor	$30,000,000	EFC	Replacement and capacity improvement of major sanitary sewer through built up neighborhood
Erie	Greenfield Water Tank	$1,000,000	EFC	Structural modifications, cleaning and painting
Erie	East & West Rd. Watermain Replacements	$500,000	EFC	OP Rd. to Union Rd.
Erie	Waterline Improvements	$1,000,000	EFC	Upgrade lines to improve the infrastructure for residents and firefighters
Erie	Town of Eden Water Projects	$6,000,000	EFC	New pump station, water main, etc.
Erie	Town of Grand Island	$5,433,000	EFC	Grand Island Tube Settler, Sandfilter and High Lift Pump Upgrades
Erie	Town of Grand Island	$3,000,000	EFC	Sewer Rehabilitation of Existing System
Erie	Former City of Tonawanda Pumping and Treatment Plant Environmental Re	$575,000	EFC	
Erie	Grand Island Drinking Water: Tube Settler, Sandfilter and High Lift Pump Up	$5,433,000	EFC	
Erie	Grand Island Waste Water treatment: Sewer Rehabilitation of Existing Syste	$3,000,000	EFC	
Erie	Sewer Infrastructure: Walbridge Drive, NYS Route 5 (MH 4659) to Mount Ve	$265,000	EFC	Letter of Support from Assemblyman Jack Quinn for the Mount Vernon Sewer District's proposed shovel-ready project: Replacement of existing sanitary sewer, manholes, and service laterals to alleviate sanitary sewer overfolows and the back-up of sewage into residences pursuant to NYSDEC Order on Consent No. R9-10011102-75 and NYSDEC approved Sewer System Evaluation Survey.
Erie	Sewer Infrastructure: Clifton Parkway North, West Side, MH 4855 to Roano	$300,000	EFC	Letter of Support from Assemblyman Jack Quinn for the Mount Vernon Sewer District's proposed shovel-ready project: Replacement of existing sanitary sewer, manholes, and service laterals to alleviate sanitary sewer overfolows and the back-up of sewage into residences pursuant to NYSDEC Order on Consent No. R9-10011102-75 and NYSDEC approved Sewer System Evaluation Survey.

Erie	Village of Blasdell / Town of Hamburg Sanitary Sewer Rehabilitation Project	$3,500,000	EFC	Village of Blasdell / Town of Hamburg Sanitary Sewer Rehabilitation Project: rehabilitation/replacement of sanitary sewers and manholes tributary to the Blasdell WWTP and the Windom trunk sewer Create Costruction Jobs

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Erie	Bethlehem Park Sanitary Sewer Rehabilitation Phase III:	$830,000	EFC	Bethlehem Park Sanitary Sewer Rehabilitation Phase III: rehabilitation of approximately 7,800 linear feet of 8-inch and 10-inch gravity sanitary sewer pipe utilizing CIPP, along with associated manholes and all appurtenances. Create Costruction Jobs
Erie	Village of Hamburg Pumping Station Elimination Project:	$1,000,000	EFC	Village of Hamburg Pumping Station Elimination Project: installation of approximately 4,500 linear feet of gravity sanitary sewer pipe and manholes to eliminate the pumping stations at McKinley, Charlotte and Sherburne. Create Costruction Jobs
Erie	Southtowns AWTF Solids Handling Improvements: .	$14,000,000	EFC	Southtowns AWTF Solids Handling Improvements: . construct two new thickeners tanks, install a third sludge dewatering press, replace the sludge incinerators feed pumps, rehabilitate the existing incinerators, install odor control system for the influentbuilding and the solids handling areas, and install a new pumping station at the headworks of the treatment plant. Create Costruction Jobs
Erie	Southtowns ORF Chlorine Contact Improvements :	$2,000,000	EFC	Southtowns ORF Chlorine Contact Improvements : retrofitting a 60,000 cf chlorine contact tank inside the existing ORF, relocate the chlorine application point which will provide 15 minutes contact time prior to combing with the Treatment Plants effluent. Create Costruction Jobs
Erie	North Youngman Commerce Center Industrial Park:	$4,000,000	EFC	North Youngman Commerce Center Industrial Park: Develop common stormwater drainage and retention system for the entire 90 acre town-owned industrial park site, avoiding construction of individual retention systems. Create Costruction Jobs
Erie	Lake Street & Point Breeze Pumping Stations:	$5,000,000	EFC	Lake Street & Point Breeze Pumping Stations: 2 new upgraded pumping stations at the Lake Street and Point Breeze sites and a new diversion chamber and ORF Modifications at the Big Sister Creek WWTP. Create Costruction Jobs
Erie	Lake Street & Point Breeze Force Mains:	$4,000,000	EFC	Lake Street & Point Breeze Force Mains: 11,700 linear feet of 20-inch diameter force main, 4,500 linear feet of 24-inch diameter force main, 335 linear feet of 24-inch diameter gravity sanitary sewer, air release chambers and all appurtenances. CreateCostruction Jobs
Erie	Greenmeadow Sanitary Sewer Subtrunk:	$531,000	EFC	Greenmeadow Sanitary Sewer Subtrunk: 3,600 linear feet of 8-inch diameter gravity sanitary sewer pipe and associated manholes to abandon low pressure grinder pumps and the Greenmeadow pumping station and force main. Create Costruction Jobs
Erie	Rush Creek Interceptor Project:	$7,000,000	EFC	Rush Creek Interceptor Project: construction of a new interceptor sewer to eliminate the Blasdell WWTP, several pumping stations, and SSO's; includes wet weather relief provisions Create Costruction Jobs
Erie	East Hill Water District No. 3	$3,006,223	EFC	East Hill Water District No. 3 encompasses approximately 5,051 acres, servicing 156 parcels, which presently lack access to public water, in the Town of Boston. The facilities improvement for this district includes the construction of 35,200 linear feetof water main, 33 hydrants, and three pressure regulating valves. This district already has a 38-year USDA/Rural Development loan at a 4.125% interest rate with a debt balance of $2,547,700. A BAN at market rate interest with a balance of $229,200 is also part of this district?s indebtedness. The total estimated cost for this project is $3,006,223. The purpose of this project is to provide a safe, potable source of drinking water for residents in Boston. Poor water quality and inadequate water quantityissues face Boston residents each day. Federal and state governments share responsibility for administering and funding drinking water programs and so, should cost share in the provision of this basic human need. Federal funds should be spent to provide

County	Project	Requested $	State Agency	Additional Detail
Erie	Water District No. 2 Extension No. 3	$353,711	EFC	Water District No. 2 Extension No. 3 includes the installation of 3,400 linear feet of 8-inch PVC water line and appurtenances along Hillcroft Drive and the Deer Run Road right-of-way. A pump station and inter-connection to existing facilities is also included in this project. The total estimated cost for this extension is $353,711. This area consists of 13 large, single-family residential parcels and eight vacant parcels, for a total of 21 parcels. The total land area within this proposed extension isapproximately 225 acres. Since the proposed extension area is bordered by the Route 219 right-of-way, the water supply area is effectively isolated geographically by the 219 Expressway and hydraulically by elevation. As a result, extraordinary effort andcost are required to overcome both boundary conditions. Residents now rely on private wells for water supply. The closest fire hydrant is 1,100 linear feet west of Back Creek Road or a nearby pond. Water quality and quantity have deteriorated to the poi
Erie	Water District No. 2 Extension No. 2	$2,078,000	EFC	The Water District No. 2 Extension No. 2 was designed in response to the growing public demand for water south of District No. 2. Water District No. 2 Extension includes the construction of 19,520 linear feet of 8-inch water line and appurtenances, 18 fire hydrants and 70 service connections, with a total estimated cost of $1,813,200. This component of the overall project will benefit an estimated 241 parcels. The purpose of this project is to provide a safe, potable source of drinking water for residents in Boston. Poor water quality and inadequate water quantity issues face Boston residents each day. Residents now rely on private wells for water supply. Water quality and quantity have deteriorated to the point of public health and safety concerns forresidents. This concern has driven residents to petition the Town Board for the extension of public water supply facilities.
Erie	Burnside Dr. & Edgewood Ave. Waterlines	$1,000,000	EFC	The Town of Tonawanda will retain a contractor to replace 5,300 linear feet of existing antiquated 8"" waterlines serving a residential area. The project is ready to go. All necessary permits have been secured and the construction contract has been awarde
Erie	Riverview, Dupont, Desmond, Mapleview & Elmview Waterlines	$2,688,000	EFC	The Town of Tonawanda will retain a contractor to replace existing antiquated waterlines serving a residential area of the Town. 17,600 lf of 8? waterline and 2,500 lf of 12? waterline will be replaced.
Erie	Town Wide Water Line Project	$2,500,000	EFC	The Town of Lancaster will retain a contractor to install approximately 18,076 l.f. of 8"" waterlines throughout the Town. The waterlines will replace existing deteriorated waterline
Erie	Johnny B. Wiley Sports Complex roof & structural repairs	$66,250	ESD	
Erie	Buffalo historic structure stabilization and redevelopment: 10 most endange	$12,000,000	ESD	
Erie	Grand Island Gateway	$7,381,500	ESD	infrastructure, including streets, water lines, sewer lines and storm sewers for an industrial park adjacent to a Thruway Interchange

County	Project	Requested $	State Agency	Additional Detail
Erie	Providing Sterile Air Flow for Hospitals and Healthcare Services	$1,000,000	ESD	We are seeking funding to commercialize the BioBlower device for the healthcare market. The BioBlower was created to rapidly and continuously cycle and ste-rilize large quantities of air (or aerosolized liquid). The BioBlower destroys ALL biologi-cal pathogens within a continuous air flow, including bacteria, spores, viruses (including all flu viruses such as avian flu), pollen and molds; all of which are harmful to humans. The BioBlower accomplishes this complete bio-kill through the novel approach ofcom-pressive heating. The contaminated air stream is quickly cycled and compressed through a standard electrically powered rotary blower, providing breathable, disinfected air back into an enclosed room or an entire building. This project proposal is directed at extending the current proven BioBlower technology to now sterilize air within the healthcare arena. It is intended to adapt the technology being developed for military collective protection systems to apply to isolation rooms and eventually to ehe market, the BioBlower can deliver large continuous flows of sterile air more reliably and more cheaply then any other product. The BioBlower can be small enough to act as a portable unit to turn a single hospital room into an isolation ward. In contras extremely scalable and so can be easily integrated as a permanent fixed unit in the HVAC system, to treat the entire building. It is anticipated that expansion into the healthcare market will lead to an entire new division of the company partner, B3.
Erie	Helping Hands - Hiring Valuable Resources	$150,000	ESD	This project would hire, train and supervise individuals to work in needs-based areas including early chilldhood, after school, senior adults programs and building and grounds. The JCC would match individuals to areas which would best suit that person'sskills, level of interest and ability to learn. Indivduals working with children would assist in helping with basic learning skills, provide supervision, assist with projects and related skills necessary to provide a safe after school and pre-school environment. Those working with building and grounds would assist in cleaning facilities, repair, paint, maintain grounds and other tasks essential to keeping a multi-purpose organization operational.
Erie	Body and Mind - Keeping WNY Healthy	$95,000	ESD	This project will provide training, transportation and employment for approximately 25 individuals. The program will teach wellness/fitness modules to these individuals who will then be able to contract out their skills to area businesses. The componentswill include: desk exercises, basic stress management, basic time management, healthy back and related programs. By providing learning opportunities and training sites, we will prepare the person for potential continued employment.
Erie	Riverview Commerce Center Industrial Park	$3,000,000	ESD	Construction of Industrial Park roadway
Erie	North Youngman Commerce Center Industrial Park	$4,000,000	ESD	Develop common stormwater drainage and retention system for the entire 90 acre town-owned industrial park site, avoiding construction of individual retention systems
Erie	Tri-County Industrial Park	$5,000,000	ESD	Infrastructure improvements
Erie	Angola Airport Industrial Park	$3,000,000	ESD	Infrastructure improvements
Erie	Elk Street Corridor Redevelopment - Phase I	$10,000,000	ESD	Infrastructure improvements
Erie	River Wright/Buffalo River	$4,000,000	ESD	Infrastructure improvements
Erie	Clarence Industrial Park	$3,000,000	ESD	Develop roadway and install sewer improvements
Erie	Colvin Estates Industrial Park	$3,000,000	ESD	Infrastructure improvements
Erie	Chestnut Ridge Park Casino	$750,000	ESD	
Erie	Ralph Wilson Stadium	$5,800,000	ESD	Lease agreement between County and Buffalo Bills requires that the County provide annual Capital Infrastructure Improvements in order to preserve longevity in the Stadium

County	Project	Requested $	State Agency	Additional Detail
Erie	Town of Amherst Power Distribution System	$100,000,000	NYPA	Underground installation of 100 miles of electrical distribution lines to avoid power outages.
Erie	Campus Electrical Service Upgrade	$2,000,000	NYPA	With added facilities under construction, electrical service must be upgraded from 4160V to 23 KVA.
Erie	Service Entrance Substation-Upgrade	$1,706,235	NYPA	D?Youville College is currently constructing a 6-story academic building located on its main campus located at 320 Porter Avenue on the City of Buffalo?s west side. Electric demand load for the new academic building project will put the electric load above the campus limit of the current electric utility service. The existing service is a 4.16kV, 4-wire 60Hz system supplied by a National Grid owned overhead primary service line and distributed via a College owned 15kV Medium Voltage switchgear. There are no available spare cubicles within the switchgear and no opportunity to add on to the existing gear. In addition, National Grid ESB-753 limits the load capacity of a 4.16kV electrical service to not exceed 1,000KW to any single user off the same meterand allows for only one service rated at their standard utility voltages. Based on historical load analysis of the existing service plus the load of the academic building, the 1,000KW limit would be exceeded. Therefore, the College is seeking funding to

Erie	Breakthrough technology for clean energy generation	$4,500,000	NYSERDA	This project will develop technology for the clean generation of electricity from mechanical energy (that associated with deformation due to the movement of people, fluids, cars and windmill blades) and thermal energy (that associated with exhaust gas from house furnaces, chimneys and aircraft). The technology is based on recent scientific breakthroughs of Professor Deborah Chung (Ph.D.) at University at Buffalo. The phenomena behind the breakthroughs relate to piezoelectricity, pyroelectricity and thermoelectricity that have been rendered to carbon composites through nanostructuring. The project will result in significant, untapped and inexpensive sources of clean energy, thereby alleviating the energy crisis and improving the environment. The impactwill be in NYS, USA and the world. A new national and international industry that is based in NYS will start, thus creating 350 jobs in NYS and providing a new source of income for NYS. The project will also involve the training of students (including un
Erie	The University at Buffalo (UB) Multidisciplinary Center for Earthquake Engir	$1,300,000	NYSERDA	We are writing with regard to the University at Buffalo Multidisciplinary Center for Earthquake Engineering Research (MCEER), which has been slated to absorb a 50% reduction (from $1,866,600 to $933,300) in Governor Paterson's FY2009-2010 proposed Executive budget. This action would immediately eliminate 10 jobs in Western New York, significantly reduce the Center's impact on the Upstate economy, and place in serious peril, plans for expansion through an unparalleled new partnership with Buffalo's Calspan Corporation.
Erie	Village of Williamsville Infrastructure	$100,000	NYSERDA	Gernerator & Electrical work at Fire Dept SUPPORT LETTER

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Erie	Civil infrastructure monitoring technology	$4,500,000	OFT	This project will develop technology for nondestructive, nonintrusive, sensitive, automatic, real-time, fast and cost-effective monitoring of the condition of bridges and highways. The method is innovatively based on the effect of damage (including earlydamage) on the electrical resistance or impedance of critical components (including subsurface components) of a structure. A field-deployable monitoring system will be developed, involving wireless technology and the combined use of various sensors andsensor powering methods, for the monitoring of complete bridges and highways, including decks, beams, retrofits, pavements and bases. Attention will be given to concrete, steel, concrete-steel interfaces, joints, soil, composites and smart cement. The project will result in a technology that can be implemented in NYS, USA and the world, thus providing a new national and international industry that is based in NYS, creating 350 jobs in NYS and providing a new source of income for NYS. The project will al
Erie	Erie County Medical Center - Information technology	$2,700,000	OFT	Installation of a health information technology system.
Erie	Web-based Elementary School Supplemental Education (WESSE)	$420,000	OFT	A Girl Named Pants, Inc has invested 4 years and thousands of hours in the Western New York elementary education system with its reading program and Girl Scout patch program. During that time, we have employed students and contractors, and provided programs to over 70 WNY elementary schools, as well as more than a dozen Girl Scout troops. Now, we intend to build a website for online distribution of supplemental elementary education to elementary school students (with an emphasis on lower income schools). In building and launching this program, we will immediately employ 10 local residents including programmers, education experts, a university professor, students, and product/program managers. Importantly, 1) these jobs will outlast the stimulus dollars, 2) this will be a national program (which means we will bring revenue into WNY from outside WNY, as opposed to passing money from one local resident to another), and 3) this program will turn into dozens of good local jobs over the next 2-3 years. Simp
Erie	Carpentry Dust Collection System	$75,000	OGS	Facilities Improvments
Erie	Police & Court building, Town Hall campus	$14,000,000	OHS	New additions and renovations
Erie	Fire Hall Roof Replacement	$80,000	OHS	
Erie	New Central Fire Station	$8,000,000	OHS	Construction of new station to provide needed space for fire apparatus, indoor & outdoor training facilities
Erie	Town Police & Court Public Safety Building Construction	$10,000,000	OHS	Renovation of town building for Public Safety uses
Erie	Tonawanda Fire Headquarters Construction	$3,600,000	OHS	Addition to fire hall structure, additional space for volunteers
Erie	Tonawanda Fire District construction	$1,300,000	OHS	Construction of new fire hall to accommodate newer/larger trucks, classroom, storage, upgrade of facilities.
Erie	Village of North Collins	$0	OHS	In need of a new fire fighting department (newest truck is a 1993)
Erie	Wastewater Facility Security Improvements	$750,000	OHS	Installation of video surveillance and security system
Erie	Canine Rescue Training	$500,000	OHS	This project would involve buying or building a dog kennel with training facilities. The purpose of which would be for training dogs for search and rescue, recovery and cadaver dogs. These teams could then be used by law enforcement and civilian missingperson cases.
Erie	Town Police & Court Public Safety Building	$10,000,000	OHS	The Town of Lancaster purchased an existing building for renovation to be used as a police and court building. Renovation of the 77,000 sq. ft. building will include construction of interior office utility, and public spaces.

Erie	Replacement of Fallen Wall in Glen Park	$200,000	OPRHP	Section of retaining wall needs replacement
Erie	Update climate control in National Historic Landmark Pan-American Exposi	$1,800,000	OPRHP	The project will complete restoration and protection of this 108 y.o. national historic landmark. The building houses a museum, research library, important archives and artifacts, public meeting spaces, administrative offices for the Historical Society,and many accoutrements original to the building. In recent years the building has received a new roof, electrical service, and boilers, and undergone correction of serious water incursion. Funds have been allocated for final correction of drainage problems, HVAC in one renovated portion (10% of the bldg.), and replacement of original 1901 wiring. Funds requested here will provide modern climate control for the remainder of the building (approximately 85% of the total space) done in accordance with the standards for landmark structures. Completion of the project will assure provision of historical society?s public service and educational missions to 75,000 New Yorkers per year.

County	Project	Requested $	State Agency	Additional Detail
Erie	Witnessing History	$250,000	OPRHP	This ongoing project provides stimulating, growth-provoking educational experiences for inner city middle and high school students, using web access as a learning tool, and meeting learning styles and needs of Buffalo public school students. ?Witnesses?comprises original theatrical presentation of scripts derived from primary source documents in the Historical Society?s library, depicting real individuals responding to real events throughout Buffalo?s history. Students, mentored by drama and dance students from Buffalo State College, will be the actors. Historic events and personalities will be interwoven with current themes to provide new insights into life decisions that every generation faces. The program deliberately focuses on students with unconventional learning styles who find ordinary classroom work unfathomable. The second part of the project is the web-based ?History Inside Out? which will provide superior interactive ways to present standards-based social studies lessons. The program will
Erie	Robert O. Smith Park	$500,000	OPRHP	Bridge over Ellicott Creek to access unaccessible park land

County	Project	Requested $	State Agency	Additional Detail
Erie	Kleinhans Music Hall Revitalization Plan	$2,500,000	OPRHP	Kleinhans Music Hall is a federally designated National Historic Landmark building built in 1940, in part with WPA funds. The venue serves as the home of the Buffalo Philharmonic Orchestra. 172,000 people attend more than 300 events annually. The building is in need of a variety of important mechanical, engineering and acoustical upgrades which have not been addressed for 20 years. New HVAC, plumbing and electrical work will make the building more efficient and cheaper to operate. Roofing and masonry work are needed to prevent further deterioration. Acoustic upgrades are needed to further enhance customer experiences. Kleinhans Music Hall will serve as one of the venues for the 2011 National Trust conference.
Erie	Village of Williamsville Infrastructure	$2,000,000	OPRHP	Restoration of Historic Willaimsville Water Mill SUPPORT LETTER

Erie	Yes We Can Math	$100,000	SED	?Yes We Can Math? is a proposed Saturday School and subsequent summer math program that will target promising high school students in the Buffalo school system and sixth grade summer day campers. The high school students will work as tutors at a summer camp after receiving job training at the Saturday School during the school year. Sixth grade campers will be instructed in fundamentals and uses of mathematics in daily living and to describe natural phenomena. Goals of the program include: (1) Provide campers and tutors with the confidence, desire, knowledge, and skills to excel in their future study of mathematics; (2) Instill logical thinking and reasoning ability to facilitate future learning and decision making in all aspects of life; and (3) Contribute to the development of a generation of citizens with skills and ability to participate in the economic regeneration of Buffalo. An estimated 18 new jobs will be created by this program; a half-time program director, three program instructors, and 15

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Erie	Food Technology Program	$150,000	SED	Western New York is one of the largest food processing areas in the Eastern region of the Unites States. According to the WNY Food Manufacturers Association, there are over 300 food processing and manufacturing companies in the region with 25,000 employees in the greater Buffalo/Rochester metropolitan area. Experts project that the industry will demand 20,000 more workers in the next few decades. The industry has suffered from a shortage of well-educated and trained workers with a BS degree in food technology and practical work experience. Though the current downturn economic trends are having a negative impact on the more elastic sectors of the food industry, the long-term projection is bright. The food industry is an essential catalyst for the regional economy. The Western New York States? food industry generates billions of dollars in regional, national, and international commerce. In order to preserve this industry and to sustain competitiveness in the global market, it is crucial to provide the hcts, both domestically and internationally, due to changing demographic trends and developing economies. Consumers are buying more ready-to-eat meals instead of doing their own cooking. Companies of packaged foods are less impacted by raw material priceor is their largest cost component. The industry representatives estimate that the industry can hire or retain four to six hundred graduates from the program for the next ten years. The ripple effects of the productive new work force can be explosive.
Erie	Athletic Storage/Maintenance Building	$200,000	SED	Completion of the Athletic Storage/Maintenance Facility project which was begun with local funds in the amount of $300,000 and the work of local students from the Ormsby Vocational Education Center in East Aurora. The $200,000 in funding would allow us to employ constructions workers to complete the building and allow for purchase of needed equipment.
Erie	Concession Stand/Band Shell Construction at HS Football Field	$250,000	SED	Currently there is no concession stand/bandshell/lavatories at our High School Football/Track site. Construction of this facility would provide students/parents/community members with a facility which would make athletic events much more enjoyable to participate and view. Currently there are no handicapped accessible lavatories at/near the athletic fields. Construction of this facility would provide for individuals with special needs to have access.

County	Project	Requested $	State Agency	Additional Detail
Erie	Undergraduate Statistics Education	$1,200,000	SUNY	The Department of Biostatistics would like to develop a bachelor's degree program in statistics. There are several motivations for our department to activate the undergraduate statistics major: 1. Feed Graduate Program: An undergraduate major would be another source of applicants for our graduate program at UB. We currently get more than 100 applications per year for the graduate program and have high quality enrollees. Unfortunately, only a small proportion is from Western New York. The BA program would be a natural lead-in to the MA program and we envision creating a 3/2 BA/MA program within UB. Currently we are arranging such a 3/2 program with Canisius College. Canisius organized its BS statistics program after the original UB statistics program folded in the 1990s. 2. Join National Trend: AP introduced its Statistics Exam in 1997 and after a decade of record growth it is the 9th most taken exam (108,000 students). Many more high school students are now aware of statistics and would consider it fosociation, has created guidelines for the undergraduate statistics degree. 3. Service to Students and to Profession: An undergraduate education in statistics expands opportunities in many career fields. A non-exhaustive list is actuarial science, agriculess, chemistry, economics, education, engineering, epidemiology, environmental science, finance, marketing, pharmacology, public health and medicine, law, quality control and improvement, risk assessment. Many of these fields have positions for statistic
Erie	Training Grant in Biostatistics	$500,000	SUNY	Demets et al. (2006) notes recently, ?The current demand for biostatisticians in the U.S. far exceeds the supply and the gap is expected to continue to widen.? This supply and demand problem is especially acute in cancer biostatistics. The rapidly expanding Department of Biostatistics at the University at Buffalo (UB) is one of only three programs in New York State, and one of only two dozen programs in the United States offering a Ph.D. in Biostatistics, trying to meet this demand. The Department of Biostatistics at UB is well-positioned to provide outstanding training opportunities for pre-doctoral trainees in cancer biostatistics given its unique relationship with two organizations: Roswell Park Cancer Institute (RPCI) and the Gynecologic Oncology Group (GOG) Statistical and Data Coordinating Center. Several UB faculty our jointly appointed at RPCI, with the PI of this grant serving as Chair of both UB and RPCI Biostatistics, and Director of the Cancer Center Support Grant (CCSG) Biostatistics Resoion, Statistical Genetics and Statistical Bioinformatics. The coursework and training experience is geared to the particular track of interest. Our goal is to train the next generation of biostatisticians through practical training, relevant coursework aWe would request funding for support pre-doctoral training in biostatistics.

Erie	Bioinformatics and Life Sciences	$3,000,000	SUNY	The goal of the Center of Excellence in Bioinformatics and Life Sciences Collaborative Resource in Bioinformatics, Biostatistics and Computational Biology (CoE-CRB) is to establish an infrastructure that will promote collaborative research in the biological, medical, behavioral, and health sciences. These collaborations will be interdisciplinary (e.g., Structural Biology, Comparative Genomics, Computational Science, and Biostatistics) and have the potential to span several institutions (e.g., UB, RPCI,and HWI). This resource will provide researchers at UB and other regional institutions the opportunity to assemble investigative teams which include highly qualified and specialized collaborative research scientists. Research in the Genomic Era requiresthe coordinated involvement of such investigative teams; especially in research areas involving the study of complex diseases and pathogens. The CoE-CRB will address gaps which exist in 1) specialized collaborative research areas which fall within and acive projects. A CoE-CRB management team will implement a proposal development model which borrows from the NIH Roadmap, which are designed to facilitate the practice of team science in other collaborative contexts. The CoE-CRB will fund staff (e.g., resessors, post-docs, masters and bachelor level research scientists, and graduate students) to support UB faculty in making meaningful contributions to the CoE-CRB at minimal expense to their own research efforts. Additionally, the CoE-CRB will fund non-ten
Erie	Public Health Informatics Infrastructure Expansion in Western New York	$1,200,000	SUNY	Seed funding will be used to expand the Population Health Observatory (PHO), a public health informatics and research center at the University at Buffalo. The 7 new hires and existing PHO staff will build health informatics infrastructure required to winexternal awards and contracts for public health and health care research and related informatics services. With this infrastructure in place, we expect to generate permanent funding for the 7 new positions, and more, in collaboration with the School ofPublic and Health Professions, the School of Medicine and Biomedical Sciences, Roswell Park Cancer Institute, the Center of Excellence in Bioinformatics and Life Sciences, the NYS Department of Health, and the Western New York Public Health Alliance, Inc.. In total we expect that the expansion of the PHO to contribute directly to the creation of 70 permanent jobs in Western New York

County	Project	Requested $	State Agency	Additional Detail
Erie	Solar Energy Integration at Various NYS Thruway Rest Areas	$5,000,000	Thruway	Let various rest areas along the I-90 (15+) become a showcase for solar energy use in NYS. The solar energy systems will be integrated into the existing grid powered parking area lighting to operate the the lights at night from energy produced and storedduring the day by the solar panels. Energy efficient and long lasting LED parking lot fixtures can also be integrated in replacement of existing fixtures. Grid power can be used as a backup source to the solar power. Reduce energy consumption from the grid and power costs, reduce carbon footprint, and showcase solar energy use in NYS to all who drive the I-90. This concept can then be utilized in other states which will create more jobs to New Yorkers here at our company in Depew, NY. It is something that can be ongoing and sustainable as far as job growth.

County	Project	Requested $	State Agency	Additional Detail
Essex	T. of St. Armand Bloomingdale Sewer Collection Completion	$600,000	CDBG	
Essex	Smith House Health Center Heating and Cooling Project	$360,000	CDBG	In 2007, Smith House Health Center was cited by NYSDOH for an inadequate heating and cooling system. The 1990 facility owned by Smith House is aged and substandard. Besides the heating and cooling system, the 19 year old building in need of door and threshold replacements, new insulation in the ceilings and other minor repairs that will help with energy efficiency. The Smith House plans to replace the existing system with Green Building Technology applications that are desired to address energy efficiency and operating costs. The outcome will be less operational cost, especially electricity which currently is the main source of heat for our building. It will also allow us to preserve the building for a longer useful life. Smith House is a FQHCLA. We donot yet receive the federal grant money that offsets the funding deficits that are created when you provide services to all individuals regardless of their ability to pay. Thus, funding the $360,000.00 repairs and upgrades without grant money would crea
Essex	Slow Sand Filtration System Pilot Study	$100,000	CDBG	The village must complete a NYSDOH mandated pilot study as soon as poissble to determine wheter a slow sand filtration system will properly treat surface water from McKenzie Pond. The study must be completed before work can begin on the water filtrationplant.
Essex	SCADA System	$700,000	CDBG	The village will install a Supervisory Control and Data Acquisition (SCADA) system that will allow remote, electronic monitoring and operation of the entire water system. All design and engineering work has been completed.
Essex	Water Meters	$500,000	CDBG	The village plans on installing water meters for all users in order to conserve water and reduce treatment costs.
Essex	Renovations to Cornell Cooperative Extension Building	$1,680,000	DASNY	We propose the renovation of the 1919 county-owned Extension Building. It is critical for Westport's economy and the Essex County Agricultural Economy that the Cooperative Extension Association, Soil and Water District, Adirondack Harvest and Fair Society as well as other organizations that use the CCE Building have a usable home that meets modern codes. This project will accomplish the comprehensive renovation of the CCE Building, including construction of a new foundation and full basement, creation of an energy efficient building envelope, installation of energy efficient heating and lighting systems, provision of a ?20 C?-approved kitchen, and the addition of a 3-stop elevator to provide handicap access. The project will create a virtually new building, with a rejuvenated useful life of many decades, within the envelope of the existing, historic building, thus maintaining the historic integrity of the Essex County Fairgrounds and preserving the beauty of Westport village. The project architect and, bidding and construction contract award. This project could be done in segments if full funding is not available.
Essex	Fire Station 2010	$2,500,000	DASNY	We have a Fire Station that is located in an old school building that was converted many years ago into our Fire Station. Over the years as our Community that we serve expanded so did the Fire Departments response areas. We added trucks to meet these needs of our expanded Community. Due to this we have simply outgrown the present station. Our trucks are parked dangerously close together and we have experience several accidents due to this and we also have little storage space for supplies & misc equipment. The District has determined that a modern Fire Station to meet the present & future needs of our Community is warranted. Our Community does not have the funds to support this project therefore we are turning to you for help. Please consider us for this project. Thank you on behalf of the Community of Au Sable Forks, Lou Garso

County	Project	Requested $	State Agency	Additional Detail
Essex	Town of Schroon Library/Court Expansion Project	$3,094,267	DASNY	This project consists of a new Addition & Renovations to the present Town Hall/Library. The important specifics worth noting: this project addresses federal required security issues in this new court with segregation of individuals based on security concerns. The Court and community spaces will function as a multi-purpose room for greater community functions. The expansion for the Library which is woefully undersized is for current & near future community needs. This is especially important in the winder months. This facility is used for many members year round & seasonal visitors. The energy upgrades and life cycle (operating) costs would be greatly enhanced by the allowance to improve the heating/cooling ""plants"" to current codes & standards. The implementation of a building sprinkler system for the required areas will improve building & life safety issues fire prevent
Essex	Adirondack Medical Home Pilot Project	$4,550,000	DASNY	Replacement of current healthcare information operating system. Acquisition of an electronic medical records system. Development and implementation of a chemotherapy telemedicine project.
Essex	Willsboro Stream Bank Stabilization and Tertiary Wastewater Treatment sys	$126,349	DEC	The stream bank of the Boquet River in this area has been designated a Brownfield and requires stabilization measures to allow the Town to install a tertiary wastewater treatment system utilizing a constructed wetland technology previously demonstrated by the town and Cornell University to dramatically lower Phosphorous discharges. the technology uses a locally mined mineral - Wallostonite to adsorb phosphorous from the waste stream, providing a new market for the mined product and improving water quality in the Lake Champlain Basin
Essex	Streambank Stabilization and Constructed Wetland Wastewater Treatment	$126,349	DEC	The Boquet River Streambank is a designated brownfield which requires stabilization inorder to safeguard a proposed tertiary wastewater treatment constructed wetland system utilizing Wollostonite to adsorb phosphorous from discharged effluent. This project reclaimes approximately 3 acres of a 16 acre Brownfield, promotes ""green"" no-energy technology utilizing gravity and locally mined mineral for waste treatment. This is a full scale ramp-up of a prototype completed several years earlier with CornellU. and Lake Champlain Basin Program fundi
Essex	Willsboro Brownfield Restoration	$5,063,900	DEC	This 16 acre Brownfield site located on the banks of the Boquest river has been adversely impacting water quality and salmonid restoration efforts in Lake Champlain. A favorite fishing area the 2,500 feet of streambank is eroding soil and heavy metal contaminated balck ash into the river and Lake Champlain. Restoration of this site into a planned public afiching access area will improve fisheries and wildlife habitat while isolating an environmentally un-friendly waste product.
Essex	The Historic Willsboro School Senior Home	$2,500,000	DHCR	The 1927 42,000sf 3-story Historic Willsboro School was purchased in October 2008 with plans for its conversion into a senior housing community for low to moderate income residents. The project is located in the heart of Downtown Willsboro and is walkingdistance many local businesses and services. The School has been vacant for 8 years and needs a full systems and interior renovation. The project is ""rehabilitation ready"" and has an approved site plan, strong market study, environmental, architectural, financial, and infrastructure due diligence complete. The project expects to create 28 FT jobs, contribute $111,000/year to the local tax base, support core business in a low income census tract, save a culturally historic building, and serve seniors.The property is part of the Willsboro revitalization pl
Essex	Bring Affordable Dental Care to the Adirondacks	$32,000	DOH	We would like to add a dental operatory, hire a hygienest, begin exploring the addition of a Children's Dentist to joint the practice-all to be able to treat more Child Health Plus, Medicaid and Family Health Plus patients

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Essex	Lake Flower Avenue (NYS Route 86)	$5,000,000	DOT	The village requests funding assistance and legislative assitance to accelerate the planning for and reconstruction of NYS Route 86, known as Lake Flower Avenue in the village. There are major stormwater drainage issues that need to be addressed and sidewalks are in disrepair and dangerous. The village has aging water and sewer lines underneth the road that are constatnly breaking and nned to be replaced. According to NYSDOT regulations, the village, at its own expense, must reconstruct the roadway to STate Highway standards after it disturbs the roadway to reconstruct utility lines. To save taxpayer money, the Village has been waiting to replace its utility lines in conjunctyion with the highway reconstruction, only to see the project repeatedly pushed back. At the present time, NYSDOT will not commit to rebuilding the hightway sooner than 2016. We also request lobbying assistance to urge DOT to secure funding and include the project in its design and construction schedule.
Essex	Essex Sewer System Improvements	$7,019,168	EFC	Sewgae Collection and Wastewater Treatment System to serice an unsewered community on Lake Champlain. Reduceced discharge of untreated sewage and nutrients will improve the water quality of Lake Champlain and provide for a sustainable community.
Essex	Elizabethtown Sewer Collection and Wastewater Treatment Plant	$8,550,000	EFC	Elizabethtown is the Essex County Seat and supports numerous public facilities including a K-12 school,, Hospital, Nursing Home, social services, public works, court system and ancillary retail, commercial, and other public services. Development of a municipal sewerage system is needed to sustain area business and governmental services. Residentialdevelopment is also restricted to limit density increasing resulting infrastructure costs. failing septic systems threaten water quality resources and the ability to maintain services in the community.
Essex	Schroon Sewer System Improvements	$4,401,433	EFC	The town of Schroon recently (2008) completed a major $7,500,000 upgrade to its wastewater treatment plant to help protect the town's primary assest -Schroon Lake which provides a quality destination for the tourism based economy of this small AdirondackPark Community. The treatment plant wqould like to install a UV disenfection process to save energy and improve water quality in the Lake and rehabilitate several severely deteriorated collection system components including the area along Main Street where the business ssector is in danger of condemnation as a result of the sewage collection system location in Rogers Brook a main tributary of Schroon Lake.
Essex	Newcomb Wastewater Treatment Plant Improvements	$1,517,286	EFC	Thw Newcomb Sewage Treatment Plant serving Winebrrok Hills does not meet its' effluent discharge limits consistently due in part to the age of the existing equipment meetings its' design life limits. The Town would like to renovate the existing facilityto improve the treatment plant efficiency by installing a UV disinfection system and an open sand filter treatment system. This would improve water quality to the headwaters of the Hudson River, reduce energy use and improve operating defficiencies

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Essex	Lake Placid Sewer Trunk Line Replacement	$3,000,000	EFC	All sewage from the 2,011 businesses and residences served by Lake Placid?s Wastewater Treatment plant runs through two trunk lines, aged 78 and 97 years, lying in the Chubb River, a tributary of the Au Sable River. Under a DEC Consent Order due to a 2003 blockage of one line that caused raw sewage to flow into the river, Lake Placid completed all necessary engineering and permitting to re-route and replace these lines with larger capacity lines. The Village has incurred approximately $155,086 in designand planning costs to date. The cost of the entire project is estimated at an additional $4,090,514. Lake Placid is the engine that drives the North Country?s tourism industry. It ?Hosts the World? with national and international athletic events and a four-season tourist influx of thousands of visitors annually, yet the costs of providing municipal services lies with its 2,638 residents. The Village receives no sales tax and little state aid to provide these services and upgrade infrastructure. Lake Plshops due to lack of sewer service and the loss of these services to our residents. In the big picture, the costs of a sewer line failure would be a catastrophe for the entire state of New York, as the national reputation of Lake Placid as a bustling reon is seriously marred. Construction on this project would create about 60 immediate jobs. Increased trunk line capacity will enable additional businesses to start-up. Averting the failure of the sewer lines will protect hundreds of jobs in this rural ar
Essex	Keene valley Water System Improvements	$4,554,839	EFC	Keene Valley Water District requires a new 500,000 gallon Water Storage Tank and 23,000 feet of new water distribution piping to resolve Safe Drinking Water Act deficiencies. The leaking water works are barely adequate to maintain existing water servicefrom the new wells previously installed. The system loses approximately 50% to 80% of water utilized by the community due to leaks. Repairs as noted will decrease energy and chemical use through improved efficiency and provide fire protection to all users.
Essex	Chesterfield-Port Kent Water District Improvements	$3,891,192	EFC	The Port Kent water District requires a new 150,000 gallon water storage tank, 13,000 feet of new water disribution mains, a new water filtration plant, intake structure, control building and related hydrants, valves, laterals etc. to replace existing substandard facilities to meet Safe Drinking Water Act Standards. The new water system will provide safe potable water supply and fire protection for area users.
Essex	Moriah Waterline Replacement	$4,100,000	EFC	Replacement of 4.7 miles of asbestos cement lined watermain. The existing watermain was installed in 1964 and serves approximately 500 people and the school.
Essex	Mineville/Witherbee Sewer	$4,100,000	EFC	Approximately 4.7 miles of clay tile and orangeberg sewer pipe and manholes would be replaced. The clay tile pipe and laid up brick manholes were installed in 1948. This Sewer District serves approximately 750 people and a school. There is constant seweroverflows due to ground water infiltration, roots,collapsed pipe and being undersized.
Essex	Water Project	$1,582,000	EFC	Water System Improvements- Distribution Mains
Essex	Water Supply	$14,000,000	EFC	The village will construct a municipal well and water filtration plan to create a dual-source water supply system. Preliminary engineering design is underway and final design will begin as soon as a Slow Sand Filtration System Pilot Study is complete.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Essex	Ray Brook water Line	$2,000,000	EFC	The village recently completed a feasibility study of providing municipal water to the hamlet of Ray Brook and the NYS Adirondack Correctional Facility and the FCI Facility. The correctional facilities are currently served by an undersized and untreatedsurface water reservoir that is difficult to access for maintenance. The facilities have expressed interested in accessing municipal water. Providing water to the facilities could provide a revenue source for the village. In addition to funding assistance, the village seeks legislative assistance to secure committments from both facilities to use village water if provided.
Essex	Water Tank	$2,500,000	EFC	In order to improve pressure through parts of the system and provide adequate emergency supply, the Village seeks to construct an additional water tank on Mt. Pisgah.
Essex	Lake Placid Sewage System Improvements	$3,300,000	EFC	Lake Placid Sewage System Improvements The sewage of each of the 2011 businesses and residences served by this system runs through two trunk lines that lie in a tributary of the Au Sable River. These lines are 78 and 97 years old. A 2003 blockage of oneof the lines caused raw sewage to flow into the river, the short term solution is that the two lines are now connected so that one line is carrying the capacity for both. The Village has limited avenues for revenue generation besides property taxes. The impact of the imminent failure of these sewer lines is catastrophic not only for the Village of Lake Placid, but the entire Northern New York economy, reputation and environmental health (extending to Lake Champlain). Lake Placid ôhosts the Worldö withnational and international athletic events and a four-season tourist influx.
Essex	Town of Chesterfield Business Park	$10,000,000	ESD	This project will build out a NYS shovel ready and APA pre-permitted Business Park which will house two existing Essex County businesses planning on expansion.
Essex	New Hiring Proposal	$35,000	ESD	We are a Technology/IT Business located in Upstate NY (Willsboro), and I would like to hire 2 additional employees in the near future. We are currently understaffed (because of the economic downturn), but see the need to hire two additional employees tokeep up with demand and to foster the growth of our business. We currently don't have the necessary capital to spend on the two additional hires, yet feel that adding two additional employees would foster economic growth in our community and add jobs. Iknow we are a small business, but this would greatly help in our community. I sincerely hope that our request is met with the utmost sincerity and that we don't get lost in the shuffle. Thank You, William J. Morgan President North Country Technology, Inc. Willsboro, NY
Essex	Mt. Pisgah Ski Center Chairlift	$750,000	ESD	The current chairlift was purchased used in 1958. It is slow and requires too much maintenance. Installation of a faster, low-maintenance chairlift would allow skiers to have more runs and encourage additional clubs and schools to use the facility on a regular basis. This would result in greater revenues to the Village and decrease required taxpayer support for the operation of the ski center.
Essex	Town of Chesterfield - Business Park	$0	ESD	This project will build out a NYS shovel ready and APA pre-permitted Business Park which will house two existing Essex County businesses planning on expansion. LETTER OF SUPPORT
Essex	Olympic Center Conference Center Modernization (ORDA)	$8,000,000	ESD	Olympic Center Conference Center Modernization (ORDA) Without this facility that is engineered for today and future visitors and athletes, there will be serious erosion of the region's largest sector. Lake Placid is the engine that drives the North Country's tourism. This is a transformational project in that it is addressing future needs and is catalyzing the development of Lake Placid for the next level of tourism and Olympic sports development.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Essex	Mount VanHoevenberg Infrastructure	$3,000,000	ESD	The existing roadways at Mount Van Hoevenberg are in critical need of paving. The existing pavement on the lower sections of roadways are deteriorated. The pavement on the upper roadways is incomplete causing conditions which contribute negatively to erosion and vehicle safety. The insulation system of the Bobsled Track constructed in 2000 is incomplete. The insulation system needs to be completed to reduce electrical usage and to protect the short and long term operational efficiency of the Track.
Essex	Whiteface Mt. Electrical Infrastructure	$500,000	ESD	Main electrical service feed modernization for the Whiteface Mt. Ski Center. Existing service feed is in need of upgrades to ensure operational performance.
Essex	Veteran Memorial Highway	$3,000,000	ESD	The Veteran Memorial Highway was constructed under the leadership of Franklin Delano Roosevelt. The highway and the highway support buildings are in need of repair and rehabilitation. The highway is located on Whiteface Mt. and is visited by thousands ofpeople each year. The harsh mountain environment has taken its toll on the roadway pavement, retaining walls, castle and the elevator system. Funding is needed to ensure the survival of this historic facility.
Essex	Ticonderoga Main Street Program 2008	$185,000	MAIN_ST	
Essex	Au Sable Forks Main Street Program Phase Ii	$200,000	MAIN_ST	
Essex	Village Of Keeseville Main Street Program	$264,325	MAIN_ST	
Essex	Arenas, Exhibit Halls, Museums, Performance Halls, ORDA - ARENA	$526,921	NYPA	
Essex	The Smith House Health Care Center	$355,000	NYSERDA	The Smith House Health Care Center is a not for profit Health Care facility in a rural setting where the nearest Hospital is 35 miles away. The heating & cooling system is in dire need of replacement and the NYS DOH has given them five (5) years to replace for this inspection violation, they are in the 2nd year.
Essex	Highway Garage Energy Project	$350,000	NYSERDA	To insulate the Highway Garage that was built in 1970. Also replace the overhead doors, lighting, and heat furnaces (6) that burn #2 oil at 20,000 gallons per year. Would like to install a woodchip Furnace or other energy efficent heat source.
Essex	Fort Ticonderoga Mars Education Center	$400,000	NYSERDA	The $23 million building was primarily financed through private donations with the assistance of state grants from OPRHP and NYSERDA. $400,000 is still needed to be raised to completely pay for the building.
Essex	Olympic Center Conference Center Modernization	$8,000,000	NYSERDA	The modernization of the Olympic Center Conference Center facilities is required to ensure the region can regain and develop greater market share of conference business. The current facilities are antiquated and in need of repair and expansion. The majority of the Olympic Center?s infrastructure is antiquated and inefficient. The modernization of the facility will include LEED rated conference center facilities and will improve the venues overall energy efficiency.
Essex	Town-Wide Broadband Project	$100,000	OFT	The goal is to build about 30 miles of fiber optic broadband to-the-home in our rural town. We expect to attract familes with internet-based jobs and school age children to boost the student population at our award-winning school. Underway for 2 years weare $100,000 short of our budget. We have a $100,000 NYS Economic Dev grant in process that this could be added to. The rest of the funds have been raised from local individual donors and our locally owned ISP. With these funds we could finish this in 1year.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Essex	P25 Digital Multicast Public Safety Radio System	$10,000,000	OFT	This project is a P25 Digital Multicast VHF Conventional Radio Communications System for a total replacement of the Essex County Public Safety Communications System. The system is designed as a multicast to overcome geographic and terrain difficulties. The system will consist of 5 sites of three digital conventional stations. Alcatel Lucent microwave networking is proposed to linking 9 sites. The systems will require the purchase of 4 VHF frequency pairs that do not require Canadian Coordination. For the proposed Multicast system, there will be three radio channels located at five (5) transmitter sites required to meet the coverage goal of 95% Area Reliability for mobile talkout. The five sites operate together in a multicast configuration. The prime site in Lewis NY which is the location of our 911 Dispatcher center, will house a 6 position MCC 5500 console with talk and listen features to comply with the ID displays for Emergencies on the P 25 Digital design. The new system will be compliant to the
Essex	Health care information operating system upgrade	$4,000,000	OFT	Replacement of current health care information operating system. The replacement system will be used primarily for inpatient purposes and will include software, training, implementation and hardware.
Essex	Primary care clinic electronic medical record	$250,000	OFT	Acquisition of an electronic medical records system which will utilize state of the art health care information technology in the operation of the ECH primary care clinics. This project is consistent with recent nationwide efforts to promote the expandeduse of an electronic medical record.
Essex	Adirondack Medical Home Pilot Project	$4,000,000	OFT	Replacement of current health care information operating system. Including software, training, implementation and hardware.
Essex	Adirondack Medical Home Pilot Project	$250,000	OFT	Acquisition of an electronic medical records system in the operation of the ECH primary care clinics.
Essex	Thompson-Pell Research Center Roof	$45,000	OPRHP	The Fort Ticonderoga museum has been open to the public since July 1909. Over the past century the Fort has expanded in museum exhibition space and the core collection. In 1992 the Fort Ticonderoga took a huge step forward in creating an appropriate climate controlled environment for the most sensitive part of the collection. The building was named after the founders of the museum and is aptly named the ?Thompson-Pell Research Center. This building also houses the Curatorial center for the Fort as wellas administrative offices. The building continues to serve the intended purpose well, and is a vital support to our overall operation. However, the EPDM roof is failing in several areas. Here in the northeast we are always subject to severe winters and flat roofs are certainly stressed to the limit. The leaking roof is a grave concern because the collection will be put at risk unless something is done to restore the roof back into its original condition. The ballasted EPDM system is still at a point wheroject should be undertaken this spring and would be ready to go to bid within 30 days.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Essex	Barracks Restoration Project	$562,400	OPRHP	The Fort Ticonderoga Museum has been open to the public since July 1909. The effects of time and severe winters here in the North Country have combined to pose a threat to the physical survival of this important site. Construction of the Fort began withthe French in 1755 and continued through the Revolutionary War. The Fort has been attacked six times and twice destroyed and rebuilt. The current restoration began in 1908. The South and West Barracks house museum gallery spaces and are showing their age. The doors, windows and shutters in these 90 year old buildings are all in need of replacement to ensure structural integrity and visitor safety. This project will return the barracks building to its historical appearance and make it safe and weather tight for years to come. It will also provide better climate control for both visitor and artifact comfort, decrease heating and cooling costs and provide a safer environment for the collections. No impact to historic or archaeological resources would occu
Essex	Fort Ticonderoga Mars Education Center	$400,000	OPRHP	Funding of the Mars Education Center. The Center is open and has been financed by private donations for all but $400,000.
Essex	Athletic Fields	$250,000	OPRHP	The village is partnering with the Saranac Lake Central School District and North Country Community College to plan and construct an athletic field complex on the Village's closed landfill. Currently, there are not enough athletic fields available for normal school and athletic league use. In addition, there are opportunities to draw additional visitors to the area for special athletic events such as the Can-Am Rugby Tournament and similar soccer and lacrosse events that are held in Lake Placid. These events have the potential to expand if there are adequate facilities available. These special events are an important and growing component of the area's tourism economy.
Essex	Northwest Bastion Restoration Project	$650,000	OPRHP	The Fort Ticonderoga Museum has been open to the public since July 1909. The effects of time and severe winters here in the North Country have combined to pose a threat to the physical survival of this important site. Construction of the Fort began withthe French in 1755 and continued through the Revolutionary War. The Fort has been attacked six times and twice destroyed and rebuilt. The current restoration began in 1908. It has become apparent that those early construction techniques were inadequate.The freeze and thaw action on the clay and masonry have caused a number of wall collapses over the years and will continue to threaten the physical integrity of the Fort if measures are not taken to repair them. If a wall failure were to occur, which islikely in the near future, we would be forced to close at least part of the Fort affecting jobs and visitation. This restoration would assure the safety of our visitors and add to the historic and aesthetic value of Fort Ticonderoga. An engineering planrom SHPO and anticipate the project could go to bid within two months.
Essex	SNHHS Museum Addition & Upgrade	$70,000	SED	A new foundation for the Schroon-North Hudson Historical Society (SNHHS) Museum and for an addition to the Museum was completed two months ago. We are actively seeking funds for an addition (24' x 24' - two stories) on what will be a workable foundation. The addition will house meeting rooms, provide new technolgy, preserve the HS's valuable artifacts, promote the value of our history to children (especially those whose curriculum is local history) , the community and the its many visitors to our tourist town. It will allow for research on educational/ personal projects. It will be used as a venue for talented individuals in the area to come to the HS and share their knowledge and their crafts of New York State history to the public. Our goal: ""Preserve the past for the Children of Tomorrow

Essex	jobs for chesterfield	$10,000,000	SED	To construct a new manufacturing building in our Commerce Park that is shovel ready, also to include all machinery that is required for production purposes. The existing business will double or triple their production and add the same amount of employees. Hard copy has been sent to Mr. Michael A. Skrebutens. If you are looking for a model project to boost New York State's use of stimulus money this is the one!!!
Essex	Guide to Green Travel	$33,000	Unassigned	I am a travel writer (USA Today, NY Times, NY Daily News,etc.) and I am on a mission to get people to visit state parks across the country. I have created www.guidetogreentravel.com, currently under construction, toward that end. I'm looking for public-private partnerships to help me highlight the treasures of the system, from Adirondack State Park to Harriman. This is an great opportunity to publicize the ""I Love NY"" campaign or other state travel initiatives. I am looking to cover the expenses of research and writing this. I have promoted NY State parks in my travel stories and can send you lin
Essex Warren	Replacement of Rustic Guiderail Various Locations SFY 09/10.	$3,300,000	DOT	Replacement of Rustic Guiderail Various Locations SFY 09/10.
Essex, Franklin	Adirondack Rail Corridor: Upgrades/Infrastructure Project; Utica-Lake Plac	$12,400,000	DOT	Adirondack Rail Corridor: Upgrades/Infrastructure Project; Utica-Lake Placid Corridor $20 million would make a substantial difference, including rebuilding the high priority segment between Saranac Lake and Tupper Lake, but the pending proposals presenta number of options in various combinations. This has been identified as the #1 rail infrastructure priority in northern New York by a broad coalition of business, community, environmental and economic development leaders in the Adirondacks, and has the added attraction of being a very ""green"" investment -- preserving and securing future opportunities for moving people and goods into and out of the central Adirondacks by some means other than cars and tru

Franklin	Renovate Medical Research Laboratories for New Scientists	$1,924,640	DASNY	The funds will renovate 7,230 sq.ft. of old medical research laboratories for new scientists who are relocating to Saranac Lake from outside New York. Asbestos will be mitigated
Franklin	Nursing Home Facility	$10,000,000	DASNY	Construction of a new nursing home to replace Franklin co nursing home and AHMC's facility.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Franklin	Acquisition and Rehabilitation of Municipal Building	$6,000,000	DASNY	Franklin County proposes to purchase and rehabilitate the current office building of the Village of Saranac Lake. The Village of Saranac lake has indicated they wish to consolidate operations with the Town of Harrietstown and would be anxious to sell their building to the County. Franklin County is a large land mass county and satellite offices outside of the county seat are necessary for operations. County operations currently lease space from a variety of landlords, including the Village of Saranaclake. County departments are cramped and disjointed because of the conditions of the leased space and the different locations. The ability to acquire and substantially rehabilitate this building with federal stimulus money would better serve county residents, avoid debt service payment and put contractors to work and have vendors selling goods and materials for the project.
Franklin	Municipal Building Renovations	$600,000	DASNY	Rehabilitation/expansion of the existing Town of Waverly Municipal Building. Project includes expansion of fire and rescue departments, expasion of the medical clinic, construction of a town court room and ADA accessibility improvements. The municipal facility is used as the Town emergency shelter.
Franklin	Acquisition and Rehabilitation of Municipal Building	$6,000,000	DASNY	Franklin County proposes to purchase and rehabilitate the current office building of the Village of Saranac Lake. The Village of Saranac lake has indicated they wish to consolidate operations with the Town of Harrietstown and would be anxious to sell their building to the County. Franklin County is a large land mass county and satellite offices outside of the county seat are necessary for operations. County operations currently lease space from a variety of landlords, including the Village of Saranaclake. County departments are cramped and disjointed because of the conditions of the leased space and the different locations. The ability to acquire and substantially rehabilitate this building with federal stimulus money would better serve county residents, avoid debt service payment and put contractors to work and have vendors selling goods and materials for the project.
Franklin	Alice Hyde Medical Center	$10,000,000	DASNY	Construction of a new state of the art nursing home facility on the AHMC campus to replace the Franklin County Nursing Home and AHMC's existing facility. AJMC will also construct new assisted living program beds in order to provide Franklin County and other Northern NY residents with a cost effective alternative to nursing home care.
Franklin	Alice Hyde Medical Center	$2,700,000	DASNY	Replacement of a mobile MRI with a fixed unit to accommodate the increasing needs of AHMC patients. A new fixed GE 1.5T MRI machine and the construction of a new 2800 sf building to house the unit.
Franklin	Alice Hyde Medical Center	$2,000,000	DASNY	Continuation of AHMC's ongoing capital construction weatherization and energy conservation project. Replace existing windows and installation of energy efficient windows and building paneling. An upgrade to the existing temperature control system and replacement of the existing chiller system.
Franklin	Trudeau Institute, Emergency Back-Up Power	$500,000	DASNY	Trudeau Institute, Emergency Back-Up Power The Institute houses numerous animals in several locations. In addition, there are many refrigerators and freezers that store valuable samples used in the scientific research. The ability to preserve these tools is vital. While the Institute does maintain two emergency generator systems, there is currently inadequate back?up for the actual need. Trudeau is the major node in the Adirondack/Tri-Lakes biomedical research cluster. Employees are among the highestpaid in the region and with highest skill levels. This will help stabilize and develop what is appears to be a recession proof cluster.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Franklin	Nursing Home Facility Construction	$10,000,000	DASNY	Construction of a new state of the art nursing home facility on the AHMC campus to replace the Franklin County Nursing Home and AHMC?s existing facility. As part of this innovative rightsizing project AHMC, in close collaboration with Franklin County, will also construct new assisted living program beds in order to provide Franklin County and other Northern New York residents with a cost effective alternative to nursing home care. Undertaking this project will not only improve the long term care systemin Franklin County but will also result in the creation of a substantial number of new jobs both during the construction phase of the project and in the new facility.
Franklin	Town of Franklin - garage renovation	$800,000	DEC	Garage Renovation - conformance to Environmental Conservation, proper ventilation, storage and electrical wiring, easy access, minimization of heat loss, structural changes for safety
Franklin	Green Technology Project: Infrastructure Project, Town of Franklin, Vermor	$1,400,000	DEC	Green Technology Project: Infrastructure Project, Town of Franklin, Vermontville This Town facility is currently operating under a consent order from the DEC, and the property needs to be cleaned up. The Town does not have the resources to clean this site up. This will help a distressed community to turn an environmentally taighted building into a clean green building.
Franklin	affordable housing for seniors	$2,000,000	DHCR	I would like to build a 24 unit, fully handicap accessible affordable housing complex for seniors and the disabled. I have the property but need the funding for development. I currently manage 3 affordable housing units. I need to raze two houses which currently stand on the property and build the units. The property is within the village and an ideal location for the elderly or disabled.
Franklin	MRI & Faxcility	$2,692,236	DOH	Purchase of a new MRI fixed unit and the construction of a 2800 sq foot building to house the unit.
Franklin	Bar Code Medication Administration System	$1,800,000	DOH	Implementation of a new Bar Code Medication Administration system which brings modern bar code technology to the bedside of the patient to help eliminate patient medication errors. The bar coding project is part of a joint initiative being undertaken bythe members of the North Country Healthcare Providers ERF - consisting of Canton-Potsdam Hospital, Alice Hyde Medical Center, Claxton-Hepburn Medical Center and Massena Memorial Hospital.
Franklin	Alice Hyde Medical Center	$450,000	DOH	Implementation of a new Bar Code Medication Administration System for the North Country Healthcare Providers Educational and Research Fund, Inc. which is made up of four North Country Hospitals - Alice Hyde Medical Center, Canton-Potsdam Hospital, Claxton-Hepburn Medical Center and Massena Memorial Hospital
Franklin	Mobile MRI Replacement	$2,700,000	DOH	Replacement of a mobile MRI with a fixed unit to accommodate the increasing needs of AHMC patients. This project is ready for immediate implementation and would incorporate the acquisition of a new critically needed fixed GE 1.5T MRI machine and the construction of a new 2800 square foot building to house the unit. The cost of this project is approximately $2.7 million broken down as follows: $1,125,488 for construction, $168,822 for contingency, $1,200,000 for moveable equipment, $112,548 for architectand engineering fees, and $66,128 for construction manager fees. In light of interim financing and the application fee this project will cost $2,692,236 in total.

County	Project	Requested $	State Agency	Additional Detail
Franklin	Daton Environmental	$2,000,000	DOL	Daton Environmental Workforce Development and Energy Efficiency Program In Partership with Councilman and Mayoral Candidate Corey Ellis Project Concept: The proposed project will partner with Councilman Ellis, the Workforce Development Institute, City ofAlbany EEOC office, the Albany County EEOC office and local workforce development organizations. Daton Environmental is a for profit entity which gives back to the community. All aspects of the company are green and community minded. Daton is working with WDI to train under-employed and unemployed individuals, a high percentage of which are minorities, in first, energy auditing, and then asbestos removal, lead abatement, alternative energy, retrofitting other environmentally focused programs. In each county, first in Albany, then in Franklin and potentially replicated throughout the state, will provide energy audits to residents, help them with re-imbursements for retrofits, if necessary, and employ up to 20 employees per county. Each vehicle will beefficient, reducing energy consumption and high energy costs. Many low-income people will be trained to perform work that would help them achieve sustainable, living wages in the energy field. Advantages: ? This is a good model for opening up green jobso work immediately. ? This will help cut the cost of our soaring energy prices ? There is a three year waiting list for energy audits in the North County, this can be an immediate success with strong funding. ? With Albany and Franklin county?s aging hou

County	Project	Requested $	State Agency	Additional Detail
Franklin	Pulp Mill Rd. / Chateaugay River - Bridge Replacement	$1,311,000	DOT	
Franklin	Natural Gas Pipeline for Franklin County	$3,700,000	DPS	Project is the development of a 40 mile long natural gas pipeline. Governor Patterson - in his letter to the Obamma Transition Team - singled out the Franklin County Pipeline by name.
Franklin	Chateaugay Business Park	$2,700,000	ESD	Chateaugay Park is a greenfield with NYS ESDC "Build Now" shovel ready" designation. All permits are in place now to begin construction of road, water, sewer, electric, etc. inside the business park
Franklin	Adirondack Park Welcome Center and General Store	$350,000	ESD	Our Mission is to provide an information / welcome center for those traveling to the Adirondack park for vacation / business purposes along our scenic byway which is a main artery in to the Adirondack Park from Canada. Along with the mission, we intend to build a vibrant communication center of Duane life with an Adirondack flair, a welcoming rest stop for weary travelers, a convenient place for locals and vacationers to find needed essentials and services. Our Passion is, first and foremost, to help our local, and greater Adirondack community by providing jobs, a local venue for local agricultural producers and artisans to sell their goods, and providing much needed essentials and services at a convenient location for our community. Supporting the infrastructure of industry by providing a place of service enroute to place of work or close to home for residents of Duane who work in those jobs that Industry provides.. . Our secondary goals are to provide information, services and needed supplies and reunity as well through a yearly donation of a percentage of our operating profit to community causes and events.
Franklin	Trudeau Institute, Molecular Biology Core Facility Expansion	$626,000	ESD	Trudeau Institute, Molecular Biology Core Facility Expansion This project will develop new revenue streams and new collaborative research venues for this world class medical research institution. This will develop a busienss model that can be used by other area biotech and medical institutions. Trudeau is the major node in the Adirondack/Tri-Lakes biomedical research cluster. Employees are among the highest paid in the region and with highest skill levels. This will help stabilize and develop what isappears to be a recession proof cluster.
Franklin	Trudeau Institute, Confocal Microscopy	$575,000	ESD	Trudeau Institute, Confocal Microscopy Trudeau is changing its approach to collaborative and applied research. This equipment will allow the Institute to move into research/ business that it presently cannot access. Trudeau is the major node in the Adirondack/Tri-Lakes biomedical research cluster. Employees are among the highest paid in the region and with highest skill levels. This will help stabilize and develop what is appears to be a recession proof cluster.
Franklin	Trudeau Institute, New Entryway & Driveway to Route 3	$600,000	ESD	Trudeau Institute, New Entryway & Driveway to Route 3 Initial project in preparation and development of conference center for 250+ scientists and lecturers. This is the 1st project in the development of a research conference center for scientists fromaround the world. This unique opportunities to move this institution and the region into a global framework for tourism and next generation research.
Franklin	Asept Pak, Inc. Phase II, Malone	$475,000	ESD	Asept Pak, Inc. Phase II, Malone this aspetic packaging operation is growing, and on the cusp of their second phase growth. the growth potential for this business is significant, including doubling of current employment - it offers unusual opportunities for supplying medical and pharmaceutical busineses. And offers Franklin County a unique growth opportrunity.
Franklin	Chateaugay Industrial Park	$1,300,000	ESD	Chateaugay Industrial Park Franklin is one of the poorest counties in our region. There is a shortage of available developed, good industrial space in the County. The current depression calls for need to strategic thinking. Lack of well planned, shovelready sites & buildings is key to the attraction of Canadian and wood products industries - North Country niches.

County	Project	Requested $	State Agency	Additional Detail
Franklin	Trudeau Institute, Laboratory Equipment & Renovation for 3 New Faculty P	$1,857,250	ESD	Trudeau Institute, Laboratory Equipment & Renovation for 3 New Faculty Positions The Trudeau Institute is requesting funds to renovate antiquated laboratories in need of asbestos mitigation and office space that will be provided to these scientists andtheir research groups. This will expand Trudeau's research capacity and will help attract new scientists to support and expand their core mission. Trudeau is the major node in the Adirondack/Tri-Lakes biomedical research cluster. Employees are among thehighest paid in the region and with highest skill levels. This will help stabilize and develop what is appears to be a recession proof cluster.
Franklin	Malone Main Street Revitalization	$400,000	MAIN_ST	
Franklin	Hospitals, Health, Downstate Medical Centers, SUNMOUNT DDSO	$913,750	NYPA	
Franklin	St. Lawrence Gas Extesion - Franklin County	$5,500,000	NYPA	This is a 48 mile natural gas line extension. St. Lawrence County (SLC) beneficiaries include 354 Residential and 56 Commercial/Industrial locations. Savings to these SLC locations along the 16 mile portion of this extension is projected to be $980,000 per year. Franklin County savings would be far greater over the 32 mile portion that includes 4 state prisons, schools, Commercial/Industrial sites as well as Residential locations along the route and in 7 populated areas. We don?t have total employment figures at this time, but is estimated at over 4,000 current employees with over 300 in jeopardy if the companies can?t stabilize fuel costs. An economic Impact Study by CGR estimates 83 New Jobs and a 20 year customer savings of nearly $60,000,000 whichwill generate an additional $32,000,000 spending in the communities.
Franklin	Flanagan Hotel	$750,000	NYSERDA	Solar power for Hotel project
Franklin	Weatherization and Energy Conservation Project	$2,000,000	NYSERDA	Replacement of windows and installation of buildidng paneling. Upgrade existing chiller system.
Franklin	Weatherization and Conservation Project	$2,000,000	NYSERDA	Continuation of AHMC?s ongoing capital construction weatherization and energy conservation project. This capital project includes the replacement of existing windows and facades and the installation of new energy efficient windows and building paneling.The project also incorporates an upgrade to the existing temperature control system and replacement of the existing chiller system. .
Franklin	Darlene's Second Project	$50,000	OCFS	A project to fight poverty.
Franklin	SLYC Growth & Development	$465,000	OCFS	The Saranac Lake Youth Center would like to buy a 2,000-3,000 sq ft. commercial building and have it renovated to enhance the neighborhood and meet the growing needs for at-risk youth in our community. The renovation of this building would also create much-needed jobs in Saranac Lake. A new spacious building would help us provide ample space for our increased youth attendance. This would allow the SLYC to provide a healthy, substance free, supervised environment for teenagers while offering programs which develop social skills, personal growth and responsibility in a fun and supportive atmosphere.
Franklin	Bar Code Medication Administration System	$450,000	OFT	Implementation of a Bar Code Medication Administration System. Purchase software and hardware
Franklin	New Firehouse project	$100,000	OHS	We have did the ground work to start construction in the spring of a new modern fire station. We have outgrown our present building and have two trucks that sit outside and get taken out of service for the winter. We will have a Banquet hall also in the

County	Project	Requested $	State Agency	Additional Detail
Franklin	Duane Volunteer Fire Dept & Municipal / Community Building	$850,000	OHS	Includes demolition of the existing FD structure; reuse of approx. 3000 sq. feet of floor and foundation; add approx. 3000 sq. feet (6,000 Sq Ft) - doubling of the building footprint with an additional approx 2800 sq feet of second floor. The building will provide space for the Fire Dept. and related activities, but also office space for the Town Justice, Town Supervisor / Clerk, conference room, space for the area food pantry serving 3 towns, open meeting space, assembly room, and a kitchen for community functions & qualifying as a disaster center for T/Duane & parts of two adjacent towns, 5 hamlets, Serving 1000 winter residents & 5000 summer residents. All with handicapped access. NOTE: The Town of Duane DOES NOT HAVE its own ZIP CODE and utilizes the adjoining Town of Malone Zip code of 12953
Franklin	Town of Franklin - Recreation park	$0	OPRHP	Kate Mountain recreation Park - serves as 6-week children's rec program among other things - No sanitary facility is available - no central service for water - no facility to prepare food - only shelter is 2-sided pavilion
Franklin	Molecular Biology Core Facility Expansion and Renovation at Trudeau Insti	$250,000	Thruway	
Franklin	Emergency Back-Up Power for Trudeau Institute	$500,000	Thruway	
Franklin	Laboratory equipment and renovation for three new faculty positions at Truc	$1,857,250	Thruway	
Franklin, St. Lawrence	Natural Gas Pipeline: Franklin/St. Lawrence	$3,000,000	DEC	Natural Gas Pipeline: Franklin/St. Lawrence The lack of natural gas, places this County, one with highest poverty levels in our region, and its manufacturers and major employers at a distinct disadvantage - forcing use of higher priced propane. The lackalso precludes the attraction of certain industries and the retention/expansion of exising manufacturers due to cost or need for high heat fuel. This is a crucial economic development project in the region. Completion of this infrastructure will allowESD to target businesses that need natural gas to operate and to retain major employers who need to cut costs of high priced propane.This area has potential to attract Quebec manufacturers, but not without this reasonably priced fuel option.
Franklin, St. Lawrence	Implementation of New Bar Code Medication Administration System	$1,800,000	DOH	This is a health information technology project for the North Country Healthcare Providers Education and Research Fund, Inc (NCHPERF). This will cover four hospitals -Alice Hyde Medical Center, Canton-Potsdam Hospital, Claxton-Hepburn Medical Center, and Massena Memorial Hospital, and involves software and hardware costs for each.
Franklin, St. Lawrence	Franklin County Natural Gas Expansion	$3,700,000	Other Energy	
Fulton	C. of Johnstown Housing Rehabilitation Program	$400,000	CDBG	
Fulton	Horseshoe Drive Water Extension	$25,000	CDBG	Horseshoe Drive Water Extension
Fulton	FIRE STATION	$850,000	DASNY	The current station is a two bay station with a second floor meeting room. The current station is thirty foot by fifty foot, with a forty foot by twenty foot addition on the rear for additional storage and function area. The main portion of the buildingwas built circa 1960 by the membership using local resources and donations. The foundation has become questionable. We outgrew this station may years ago. Housing four apparatus leaves no room for expansion or functionality. The current station is approximately 1,100 Sq. Ft. A proposed station would increase the square footage to 11,200 of space for apparatus storage, meeting facilities for the Fire Company, training center for all emergency services in the western area of Fulton County, as well as a meeting room for the community, which is currently unavailable. Office space for the Corporate Officers and Firematic Officers would be possible, as well as kitchen facilities currently unavailable. A portion of the existing station would be utilized in th

March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Fulton	Town Office Building	$0	DASNY	Town Office Building
Fulton	Joint Highway Garage	$0	DASNY	Joint Highway Garage
Fulton	Intercommunity Salt Storage Facility	$350,000	DASNY	Construct a modern centralized salt storage building co-located with Fulton County's existing inter-community central fuel depot.
Fulton	Basement Moisture Remediation	$50,000	DASNY	The Gloversville Public Library building is over 100 years old and on the National Register of Historic Places. Its basement has been leaking for several years. This project will install a foot drain around the perimeter and seal the foundation walls. Library use has increased with the economic downturn and this is phase one in stablizing the building for projects to serve our patrons.
Fulton	Remediation Town Office Building	$850,000	DASNY	Repair or replace present town municipal office building that was built in three parts 1900, 1956, & 1985. In 1990 the schoolhouse building occupancy approval from the State of New York Education Department was denied due to structural deficiencies withthe building. The facility was subsequently given to the Town of Caroga and has been used as municipal office building. The two newer sections of the building have been used for offices, town court, large meetings and is 12,700 sq. ft. The building is used monthly by the local seniors, community youth recreation programs are held daily during summer, boat safety course are instructed each summer, meeting of Town Board, Planning Board, Zoning Board of Appeals are held each month. Local architecture & building system engineering C.T. Male have reviewed and evaluated the following building issues: water infiltration at masonry walls-foundation / crawlspace locations, roof leaks & roof insulation, structural roof/floor joist deterioration, foundation walland provide a safe, healthy environment for public use it is estimated the cost would be $1,126,101. As an alternative to providing costly repairs and upgrades, it is estimated that a new building of 6,000sq. ft. could be built for $850,000. Preliminaryn be finalized by C T Male within a month, and necessary approvals from Fulton County, NYS Highway Dept., and APA could be obtained within 90 days.

County	Project	Requested $	State Agency	Additional Detail
Fulton	Aviation Fuel Dispensing system, Fulton County	$600,000	NYSERDA	Aviation Fuel Dispensing system, Fulton County replace obsolete manual pump Will increase air traffic, tourism and business development
Fulton	alternative energy	$100,000	NYSERDA	our school is trying to set up alternative energy/solar system to help with energy costs as well as develop an educational program around the photovoltaic system.
Fulton	Fire Station	$1,300,000	OHS	PLANNED USE It is the object of the Sir William Johnson Volunteer Fire Co to replace our outdated and structural deficient wood frame Fire Station that was constructed in 1951 with a new environmentally friendly and energy efficient building that will meet all New York State Building Codes. Furthermore, the station will be one floor that meets the ADA requirements and will serve as a facility that can be used for housing local residents in the event of an emergency. It would be expected that the new building would have a life expectancy of over 60 years. To achieve our objective, the company has set the following as critical component objectives: The demolition of the current fire station structure that currently is exhibiting structural failure of thefoundation on one side. Our present station is a two and half story wood structure that does not meet ADA requirements, and currently has limited room to support personnel in the event of an emergency. The new building would be constructed in the same aive it a high energy efficiency rating. It would provide minor additional space in the truck bay, with a meeting room, kitchen and restroom facilities to house local residents in the event of an emergency and to provide space for meetings. PROJECT BUDGETt we can replace our present fire station for about $1,350,000. This cost represents an improvement to our current structure that does not meet many State Building Code requirements.
Fulton	Firehouse	$1,000,000	OHS	We are attempting to fund the construction of a new Firehouse. The current firehouse has become outdated and too small for today's fire department needs as well as built on a lot that is too small for expansion. We have developed plans and acquired a site, we have not been able to obtain funding. Due to the financial situation, it is extremely difficult for a small town to afford such a facility that it is in desparate need of.
Fulton	Berkshire Fire District New Fire Station	$2,000,000	OHS	Construct a new energy efficient, sprinkled 12,000 sq. ft. fire station to replace a delapatated one that is neither energy efficient nor safe. The original building was built in the late 1950's and has become unsafe and not practical for our fire district. This project will insure safe housing of district equipment and personnel into the future. We are currently looking for funding sources but as you all know that is a difficult road. We are a small district with limited resoruses, so any funding thatmy be available would be appreciated.

Genesee	Harvester Building Redevelopment, Genesee County, City of Batavia	$700,000	DHCR	Harvester Building Redevelopment, Genesee County, City of Batavia: The project will include rehabilitation and demolition of parts of the Harvester Building in downtown Batavia. This is a large private incubator building in the City that needs significant improvements, including demolition and site improvements to part of it. These improvements will revitalize this portion of the City and make it more appealing to private start-up companies desiring to locate here. Help restore blighted area in downtown Batavia. Provide facilities for new businesses to grow. The Harvester Building is a large complex in the center of the City of Batavia that has been in decay for years. While it is a private incubator, it is too expensive to make the improvement thatare needed. The project will revitalize this portion of the City and also provide low cost incubator space to start-up companies. The project is ready to go.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Genesee	Genesee Valley Agri-Business Park, Genesee County, Town of Batavia	$8,000,000	DOT	Genesee Valley Agri-Business Park, Genesee County, Town of Batavia: The Genesee Valley Agri-Business Park is a new industrial facility being developed by the Genesee County Economic Development Center to take advantage of the significant agriculture production (dairy, vegetables, fruit, etc.) and ag-business operations in the Region. The O-AT-KA Milk Products Coopertive is located adjacent to the Park. While some funding has been provided by the sponsor and the State there are still infrastructure needssuch as: the access road extension, water and sewer lines, electric, natural gas, telecommunications and rail line extension. A key piece of infrastructure supporting the regionÆs (Buffalo to Rochester) focus on building on our agricultural assets andstrengthening and offering more opportunities to our production agricultural community by bringing the markets (food processors) closer to the production source. Supports the major commitments the state has made to agriculture as a key industry cluster hod processors closer to the supply source which further enhances food safety for our nation in the post-911 world. The Genesee Valley Agri-Business Park has immediate access to one of the largest ag production areas in the state and nation. While ag-busis a key industry in the Region, there are only a few industrial parks with the infrastructure capable of supporting these companies. Food processing companies such as Kraft, Birds Eye, Barilla, several large dairy operations are found here. Additionall
Genesee	Buffalo East Technology Park	$15,000,000	DOT	Buffalo East Technology Park - Construct access roads, a new interchange approach at the Thruway, water/sewer lines, sewer plant improvements, natural gas line and dual 115 kv electric transmission lines and substation. This site has recently been strongly considered a prime candidate for 4 photovoltaic (PV)/solar facilities. Investment that has been considered ranges from $500 million to over $1 Billion and from 500 to 3,500 permanent jobs in these alternative energy industries. The site, at build out, could create nearly $100 millioni in new annual property taxes and $175 million in annual wages and benefits for the Rochester and Buffalo Regions. However, infrastructure is needed to make this site shovel ready and truly appealing to companies such as those that have been looking at the area. Despite being a strong consideration for 4 PV companies (ESD has supported two of these w/financing and incentive offers). However, the companies have been reluctant to pursue the site due to the lack of infracess to a large, skilled and educated workforce in both regions. Given the company interest in recent months, this a true opportunity for the local community, the regions, the state and the federal government to revitalize this older industrial area withy industry.
Genesee	Farnsworth Avenue Reconstruction	$988,000	DOT	1. Reconstruction of 1,850 of deterioriated roadway. 2. Replacement of 1,850 linear feet of deteriorated sanitary sewer system and laterals. 3. Replacement of 1,850 linear feet of deteriorated water main and laterals. 4. Replacement of deteriorated stormwater collection system.
Genesee	Pump Station, STM Sewer (Streambank Mod. & Storm Water Treatment)	$189,670	EFC	
Genesee	Wastewater System Improvements	$600,000	EFC	The Town of Batavia is applying for funding to increase the reliability and operating efficiency of Sewer District No. 1 and reduce the potential for leaks or spills of untreated wastewater. Funding is needed to restructure the existing wastewater system

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Genesee	Peachey Road Water District	$830,000	EFC	This water district will connect with the Monroe Water Authority's 12"" ductile iron water main opposite the Bergen Meadows apartments. The proposed improvements will consist of installing approximately 12,600linear ft. of 12"" main along North Lake Rd and 3,200linear feet of 8"" main along Peachy Rd. of class 51 ductile iron water main, valves, hydrants, services and appurtenances . The water system will be designed to provide 100 gallons of water per person per day for domestic and commercial uses andto provide fire protection meeting insurance services office (ISO) standards. This system will deliver fire flows in excess of 750gpm with a residual pressure above
Genesee	Water Storage Replacement Project	$600,000	EFC	The Village of Oakfield is applying for funding to construct a new water storage tank to replace the Village?s existing water tower which serves Village and Town of Oakfield water customers. The new water storage tank is needed due to the poor conditionof the existing water tank which is nearly 100 years old and is severely deteriorated. The existing tank has been developing leaks and is in such bad condition that it can no longer be repaired. If not soon replaced, the elevated water tank is liable tofail completely leaving the Village?s and Town?s water systems without water storage capacity.
Genesee	County waterproject Phase IIA dailly water flow	$0	EFC	County waterproject Phase IIA dailly water flow
Genesee	Water Tower/Transmission Line Replacement	$2,672,900	EFC	1. Replace 94 year-old 125,000 gallon water storage tank with new 400,000 gallon water storage tank to better meet local, state and federal standards, and ISO recommendations, and to provide for expansion of the water system into the Town. 2. Replace 12,900 linear feet of 6 to 10 inch deteriorated water transmission main with new 12 inch transmission main.
Genesee	Agri/Business Park E main St engineering and infras	$0	ESD	Agri/Business Park E main St engineering and infras
Genesee	Upstate Med and Tech Park, Genesee County, Town of Batavia	$2,500,000	ESD	Upstate Med and Tech Park, Genesee County, Town of Batavia: The Upstate Med Tech Park will be home to the Upstate Med Tech Centre and also provide shovel-ready locations for emerging life sciences companies in the Finger Lakes and Western New York Regions. There will be active collaboration with the University of Buffalo Center of Excellence in Bio-Infomatics and Life Sciences, as well as the University of Rochester. The Park will allow these life sciences companies to commercialize their new ventures.The project includes: the expansion of the Commercialization Centre (13,000 sq. ft), electric upgrades to the Centre, as well as other infrastructure to the Park as a whole (e.g. water, sewer, electric, etc.). A key piece of infrastructure supporting the regionÆs focus on advancing the growth and success of life sciences. Supports the major commitments the state has made to advancing life sciences as a key industry cluster here in Western New York. Commercialization of life sciences innovations in Westcal Center and Center of Excellence in Bio-Infomatics and Life Sciences, as well as the University of Rochester's Medical Center and associated centers. It is improtant to use such resources to spin-off private life sciences and medical businesses (commeentre and Tech Park will leverage these resources and promote the commercialization. It is a key industry cluster for both regions. However, the Park and Centre need these infrastructure upgrades to become truly functional and operational. The project is

County	Project	Requested $	State Agency	Additional Detail
Genesee	New Window Installation	$4,000	NYSERDA	Install 12 new, energy efficient windows in an 1889's built house. Existing window are extremely old and of very poor quality. These windows result in an excess heat loss which in turn results in the use of an excessive amount of natural gas to heat thehouse. Residents of said house include husband, wife and two daughters. The husband works two jobs and the wife one job in order to make ends meet. The husband's primary job is in the construction business and very often he only works 2 weeks in any given month during the winter. The high utility bills resulting from the heat loss due to the poor quality windows causes a significant hardship on the family budget. The new windows will not only help save energy but help the family survive financially. Sofar they have been able to keep current on their mortgage payments.

Herkimer	Capital Project 1307 New Highway Facility	$3,000,000	DASNY	Capital Project 1307 New Highway Facility
Herkimer	Country Manor - Capital Improvements	$1,200,000	DASNY	Heating, cooling, roof, septic
Herkimer	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the purchase/renovation of one residence in Mohawk.
Herkimer	City Hall - Energy efficient replacement windows	$0	DASNY	This building, erected in 1916, is extremely deficient in the area of energy efficiency. Last year the payment for gas and electric to National Grid was $47,004. The need is for energy efficient replacement windows throughout the building. Also, the boilers (which are always being cited for deficiencies) are in need of replacement.
Herkimer	City of Oneonta - Town Court OR Town Highway buildings	$1,750,000	DASNY	(a) Construction of a building that would house the Town Court as well as offices for the judge, court clerk, state police, town supervisor and town clerk OR (b) construction of a new building attached to the Town highway garage would house the Town Court as well as offices for the jude, court clerk, state police, town supervisor and town clerk.
Herkimer	Herkimer County Manor (Adult Care Facility)	$1,200,000	DASNY	This project involves heating, cooling, roof and septic system work on the County Manor
Herkimer	Herkimer County Jail - New Facility	$35,000,000	DCJS	
Herkimer	Rehabilitate Reservoir Number 2 Dam	$1,500,000	DEC	This project will bring Reservoir Number 2 Dam into compliance with current NYE Department of Conservation Safety Standards in accordance with a DEC Consent Order. This rehabilitation will continue the use of a key part of the Village's water treatment f

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Herkimer	New Horizons	$2,000,000	DEC	Demolition of former Univac-Duafold buildings on Spruce Street in Ilion, NY. Remove ""brownfield"" problems and make 20 acre site ready for either industrial or commercial development. Water, sewer and cheap electric power are at the doorstep and available. Project submitted by two former Mayors; Jim Garnsey, 1971-1981 and John Gilmartin, 2000-
Herkimer	Gravesville Reservois repairs and bypass line	$300,000	DEC	Gravesville Reservois repairs and bypass line
Herkimer	Quackenbush plant cleanup	$500,000	DEC	Quackenbush plant cleanup
Herkimer	Beaver Dam/King Springs Repairs	$195,945	DEC	Renovations work required by the NYS DEC at the Beaver Reservoir and King Springs in the City of Little Falls watershed located in the Town of Salisbury.
Herkimer	Flood Control Projects - Fulmer Steele Moyer Creeks	$0	DEC	Flood Control Projects - Fulmer Steele Moyer Creeks
Herkimer	Brownfield ReDevelopment	$0	DEC	Brownfield ReDevelopment
Herkimer	Duofold Property Remediation	$750,000	DEC	Duofold Property Remediation
Herkimer	Duofold Cleanup/Redevelopment	$0	DEC	Duofold Cleanup/Redevelopment
Herkimer	V of Herkimer Hydraulic Canal project	$0	DEC	V of Herkimer Hydraulic Canal project
Herkimer	V of Herkimer Quackenbush plant cleanup	$0	DEC	V of Herkimer Quackenbush plant cleanup
Herkimer	V of Herkimer Gravesville reservoir repairs and bypass line	$0	DEC	V of Herkimer Gravesville reservoir repairs and bypass line
Herkimer	C of Little Falls dam repairs Beaver Reservoir King Springs	$0	DEC	C of Little Falls dam repairs Beaver Reservoir King Springs
Herkimer	Village of Herkimer - Hydraulic Canal Project	$1,200,000	DEC	
Herkimer	Material conservation program	$0	DEC	The city is in the initial stages of developing Municipal Pick-up of Recyclables. Present this service is being provided by an independent contractor. The City proposes, if feasible, to continue to contract out for the Pick-up of Garbage and Trash, while doing the recyclable pick-up with City crews. A perceived advantage would be a decrease in the cost of the present contract, ($444,000 for 2009); better control and enforcement of the recycling program, and retention of city employees.
Herkimer	Bellinger Brook retaining wall repair & reinforcement, Village of Herkimer	$300,000	DEC	Bellinger Brook retaining wall repair & reinforcement, Village of Herkimer Flood hazard retaining wall, culvert, & open ditch repair Flood control, protect public & property
Herkimer	Fill in unused Hydraulic Canal w/ proper flood control design & material, Vill	$650	DEC	Fill in unused Hydraulic Canal w/ proper flood control design & material, Village of Herkimer Eliminate blighted, insect and rodent infested, potential disease breeding, former barge canal, while maintaining flood control Installation of culverts and proper fill to eliminate blighted environmental hazard, protect public safety, maintain proper flood control, & provide useful property for parking and other commerce activities
Herkimer	Affordable Housing Construction	$500,000	DHCR	Affordable Housing Construction
Herkimer	Pavement Rehabilitation Local FA Routes - Herkimer County	$1,920,000	DOT	Pavement Rehabilitation Local FA Routes - Herkimer County
Herkimer	RT 28:Middleville-Newport SVL & Newport NVL-Poland	$3,992,114	DOT	
Herkimer	RT 169 / CSX RR & Erie Canal	$2,201,000	DOT	
Herkimer	Culvert Repair and Replacement: RT 5, 5S, 80 & 168	$935,000	DOT	
Herkimer	Rt 29: Middleville - Rt 170	$420,000	DOT

County	Project	Requested $	State Agency	Additional Detail
Herkimer	TOWN -VILLAGE OF HERKIMER SANITRY SEWER UPGRADE AND EXF	$3,400,000	EFC	THE AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009 Potential New York State Economic Development Projects TOWN OF HERKIMER, NEW YORK VILLAGE OF HERKIMER, NEW YORK SANITRY SEWER PROJECT $3,358,000 Commerce, Justice, Science: Economic Assistance Program Agricultural, Nutrition, & Rural Development- Rural Water & Disposal Program The following project, which is a joint Town and Village project will upgrade and expand the capacity of the existing sewer treatment plant, rectify a long standing health hazardand create an opportunity for the reinvent of an existing warehouse distribution/manufacturing facility that once employed 1,400 people into a new Green Technology Campus. Based on the treatment unit evaluations, upgrades to the grit collector, aerationsystem and clarifiers are recommended at the main sewage treatment plant (WWTP). The existing mechanical surface aerators are just able to supply enough oxygen to treat the maximum month BOD loading. This leaves no reserve air to treat increased loadingsariable frequency drives would be used so that the blower output could be set to match the desired dissolved oxygen content in the aeration basin, thus saving energy costs. According to current standards, the existing final settling tanks are sized to tr.5 mgd. The peak flow that the plant received during the past three years was 4.86 mgd. In order to properly treat flows above 2.5 mgd and avoid having to utilize the ORF, additional clarifier capacity is needed. A new circular clarifier that is sized to
Herkimer	City of Little Falls water main repair	$60,000	EFC	Funding for the repair of the waterline at Lock Street, under the CSX railroad line. Flush and clean out present pipe and repair it by slip lining, as CSX does not allow the city to dig under its lines.

County	Project	Requested $	State Agency	Additional Detail
Herkimer	Schuyler Business Park Extend sewer service from the City of Utica to the I	$2,250,000	EFC	Schuyler Business Park Extend sewer service from the City of Utica to the IDA owned Schuyler Business Park. Herkimer County Bring sewer service to a 90 acre busiess park which currently has approximately 40 developable acres but has a option on a additional 150 acres where the extension of sewer service is essential for future development. The extension of the sewer service will allow the IDA to exercise the existing option to purchase the property and then will have site control of a very marketableNYS Build Now Shovel Ready site in the heart of Central New York. Expected job creation of approximately 500
Herkimer	Gravesville reservoir repairs & bypass line, Village of Herkimer	$300,000	EFC	Gravesville reservoir repairs & bypass line, Village of Herkimer Repair & improve village water source Efficiently provide safe and adequate water supply to residents and businesses in the village & surrounding water districts
Herkimer	Frankfort 5 S South Business Park	$3,000,000	ESD	The Herkimer County IDA owned 200 acre business park is located in Frankfort, Herkimer County, New York. The site is a a NYS Build Now location and also is designated as a empire zone. Herkimer County has invested and is continuning to invest over $3,00,000 in acquistion and infrastructure improvemnets We alsoeceived $1.6 million in federal EDA monies. These monies are currently being used to extend water and sewer lines on site as well as installing the new road. Electrical service entensions and upgrades are necessary to complete the full build out. This is expected to cost approximately $3,000,000 for the approximately 3.5 miles. The project would begin within 120 days and be completed within this construction season. The timing is perfect as the road is roughed in and putting in the utilities at this time just plain makes sense. If we are successful with this application we expect that 300 new jobs is a conservative estimate. This is in addition to new investments that will occur and will certainl

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Herkimer	Balloon Farm Exterior Restoration	$82,000	OPRHP	The Balloon Farm Mansion is a Victorian Second Empire House with Eastlake Trim built in 1878. Due to the fact that the orginal and second owner of the house made several contributions to the growth and development of our country, the house was placed onboth the State and Federal Register for Historical Places. Currently, the house is now serving as both a private home as well as a growing Bed and Breakfast business, promoting tourism to the area and growth in the local economy as well as jobs. As to date, the 2 wraped around porches and the Mansard roof of the house has been restored to thier former granduer; what is left is for the house to be resided to fit the style of the era and the ornate window trim to be restored to its former glory. The househas no insulation and was poorly sided by the state in the 1960's when it was operated as a group home by NYS, thus marring the orginal beauty of the house. By securing the funding, we will be able to insulate, reside the house to match the orginal archgateways to the Mohawk Valley. The Balloon Farm has been a well known, well loved place for generations and deseverd to be preserved for generations to come. As one local historian once coined, ""she is a shabbily-dressed queen who is long due to have hee

Herkimer, Oneida	New Trail Construction Erie Canal R2	$4,100,000	Thruway	New Trail Construction Erie Canal R2
Jefferson	T. of Lorraine Wastewater & Housing Rehab Project	$400,000	CDBG	
Jefferson	City of Little Falls	$42,699	CDBG	SOLAR BEE SB50000V12 Water Circulator for algae, odor and vegetation-stagnation control at upper reservoir on Top Notch Road, Little Falls. Includes transportation, installation and training. Solar powered, helps decrease the cost fo chemical additives.
Jefferson	drinking water upgrade	$20,000	CDBG	I am pesident of tylerville water works located in the hamlet of tylerville town of rutland jefferson county. we are being mandated by doh to put a choloranter in our water line.we will have to also supply electric to the site also. now it is gravity fed.we also will have to make improvements to our springs and build a shed for chlornater to be protected.right now we service 10 homes at around 2,000 gals water a day.this would satify the dept of health and also make drinking better for everyone on water line.thank you for your time.
Jefferson	Rutland Fire Dept. - New firehouse	$850,000	DASNY	The Rutland Volunteer Fire Department is located near the eastern boundary of Jefferson County, New York, 2 miles east of the City of Watertown and bordering the Fort Drum Military Installation on its south side. The Rutland Fire Department is proposing
Jefferson	Samaritan Medical Center	$75,000,000	DASNY	Samaritan Medical Ctr Expansion/Facility Renovations. .
Jefferson	Watertown Municipal Arena Rehabilitation	$1,750,000	DASNY	The Arena borders the Black River and Bicentennial Park, a current Local Waterfront Revitalization Project. The Municipal Arena when combined with the Fairgrounds is the most utilized facility in the City of Watertown. The proposed project encompasses providing needed improvements to improve safety, parking, traffic flow, dressing rooms, bleacher replacement, roof replacement and floor replacement. The goal of the project is to provide a safe facility that will be able to be used for another 30+ years.The Arena is the only year round facility that provides for recreation use and community functions, such as special events and community concerts. The project will provide continued use of a community facility which includes infrastructure that has exceeded its? life expectancy. It will also provide a better flow of traffic and additional parking which is badly needed as the current parking area is remote and hidden from the entrance to the facility. Another critical component is providing adequate dreseas for females that are on the same teams as males. In addition, the bleachers have served their purpose and are failing, while parts are difficult to get for repairs. A few sections have had to be decommissioned.
Jefferson	Community Health Improvement Project	$16,200,000	DASNY	Samaritan has undertaken a $75 million capital project which clearly fulfills unmet health care needs in the Watertown community.The project includes repositioning of the parking garage;relocation and expansion of the emergency room;construction of additional larger and more modern operating rooms; construction of a new intensive care unit;construction of a new medical/surgery unit;the expansion of the maternity floor, the conversion of semi-private rooms to private rooms and the expansion of the hospital imaging capabilities, and cancer care services; and improvement of the hospital?s healthcare information technology system.

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Jefferson	RT.3, CARTHAGE W. LN. - RT.126 - RESURFACING	$274,000	DOT	
Jefferson	BORDER CROSSING - TI BRIDGE - Jefferson County	$5,000,000	DOT	
Jefferson	I-81 OSWEGO CO. - S.B. COMFORT STA. - RESURFACING	$5,500,000	DOT	
Jefferson	CR 192 / Jewett Creek - Bridge Replacement	$828,000	DOT	
Jefferson	Village of Adams-Sandy Creek Bridge Project	$500,000	DOT	Village of Adams-Sandy Creek Bridge Project This will improve traffic flow in the village. This will help with imporatant infrastructure issues that affect its businesses.
Jefferson	JB Wise Revitalization Project - Watertown	$1,269,600	DOT	JB Wise Revitalization Project - Watertown The goal of the project is to provide a connection between Public Square and the Riverwalk. This will connect downtown with the parks along the Black River, and enhance the usage of both the downtown business area and the parks. This project was identified in our Local Waterfront Revitalization Program as the #1 priority project for the City. Another critical component is the upgrade of utilities, both water and sewer under the lot, some of which are more than100 years old. The proposed project will eliminate raw sewage from flowing into the Black River. This project will help leverage ESD's money to projects we have supported in the Public Square by improving access to the business district.
Jefferson	Treatment Plant Repl.	$6,900,000	EFC	
Jefferson	Collector/Sanitary Sewer	$1,200,000	EFC	
Jefferson	Collector/Sanitary Sewer, Treatment Plant Mod.	$1,400,000	EFC	
Jefferson	North Side Trunk Sewer Lining	$450,000	EFC	This project involves the installation of a liner for approximately 1200 LF of North Side Trunk Sewer in the channel of Kelsey Creek. This project will eliminate large amounts of infiltration from entering the sewer and reduce CSO events. This project also supports housing to be constructed on the City?s north side to address the growth at Fort Drum.
Jefferson	Butterfield-Barben-Chestnut Sewer Upgrade & Landfill Drainage	$685,000	EFC	Upgrade approximately 1400 LF of the Western Outfall Trunk Sewer. The project will help relieve surcharging of the sewer in the project area during rainfall events. Also included in the scope is a small drainage repair at the city?s closed and capped landfill. This project will also address growing demands on the City?s sanitary sewer system to support growth associated to Fort Drum. 200 new units of housing are being built that will connect to an already overtaxed sewer system.
Jefferson	Water Treatment Plant Dosing Station Dam Repair	$352,000	EFC	Perform repairs to the Water Plant Dosing Station Dam to reduce infiltration into the impoundment area. Work includes structural concrete repair to the dam, scour repair, and filling the unused portion of the former dosing station with concrete. This project will reduce ongoing operating costs for the City and the surrounding communities support by the City?s water system, including Fort Drum.
Jefferson	Riggs Ave. Sewer Upgrade	$575,000	EFC	Reconstruction of approximately 550 LF of street, to include sidewalk, curbs, water main, storm and sanitary sewer. The project is required to remove large amounts of stormwater infiltration into the sanitary sewer. The storm sewer is located directly above the sanitary sewer.
Jefferson	Greensview-Ives Phase 1 & 2 Sewer Upgrade	$465,000	EFC	Phase I of this project involves the upgrade of approximately 940 LF of an existing 8? sanitary sewer to 10?. The project area is comprised of Kieff Dr., Weldon Dr., and portions of the Ives Hill Golf Course. This project will increase sanitary capacitybut also re-direct flows to enter the WOTS at point further downstream where greater receiving capacity exists in the WOTS. Phase II of this project involves the replacement in-kind of 700 LF of existing 10? sanitary sewer along Massey Street downstreamof Phase I.
Jefferson	Brownville	$300,000	EFC	Sewer repairs
Jefferson	Cape Vincent	$3,200,000	EFC	Wastewater collection and treatment plant.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Jefferson	City of Watertown	$575,000	EFC	Riggs Ave Sewer Upgrade
Jefferson	Village of Adams Water System Project	$1,600,000	EFC	Village of Adams Water System Project This is an important water project for the Village This will help with imporatant infrastructure issues that affect its businesses.
Jefferson	Trunk Sewer Replacements - Watertown	$1,200,000	EFC	Trunk Sewer Replacements - Watertown This project is a key infrastructure project for the city which is needed to help solve the housing crisis createdby Fort Drum's expansion. This project will supply water and sewer to two 200 unit develop0ment. Without this assistance the projects won't go forward. Providing assistance that will help stabalize Fort Drum is a major goal for ESD.
Jefferson	Woolworth Hotel Project - City of Watertown	$2,500,000	ESD	Woolworth Hotel Project - City of Watertown This project involves the renovation of a historic building in Downtown Watertown which will turn a vacant building into a mixed used boutique hotel and comercial space on the 1st floor. It will help to capitalize on the $7 million investment into the cities streetscape project which was completed in 10/08. This project will restore a building onto the tax roles, create employment opportunities and be the catalyst to revitalizing Downtown Watertown.
Jefferson	Carthage Downtown Revitalization Program	$424,075	MAIN_ST	
Jefferson	Black River Downtown Anchor Project- Village of LeRay	$102,000	MAIN_ST	
Jefferson	Schools, Elementary and Secondary, BOCES - Jefferson/Lewis	$627,505	NYPA	
Jefferson	Fiber Network Installation	$0	OFT	Fiber Network Installation
Jefferson	Fiber Network Installation	$500,000	OFT	This project will complete the final piece of an fiber network within the City of Watertown. It will also support providing much needed redundant internet and telephone service to the Joint County/City Public Safety Building. Connection would be from Washington Street, along Stone Street to Massey Street.
Jefferson	Disaster Recovery System	$250,000	OFT	Purchase of an enterprise-wide backup solution and the development of additional storage space for it
Jefferson	Business Continuity System	$200,000	OFT	Secondary computer room built in an off-site clinic. This necessitate the replication of a server environment in the event of a disaster or extended disruption
Jefferson	Nursing Home Electronic Medical Record	$200,000	OFT	Completely digitize our resident record of care, nutrition, rehab and personal finances
Jefferson	Telephony Upgrades	$775,000	OFT	Upgrade 20 year old infrastructure with voice over internet protocol. Purchase of new telephone sets and implementation of mobile communications system
Jefferson	Physician Care Manager Application	$250,000	OFT	Implementation of the Physician Care Manager application
Jefferson	Wireless Infrastructure Expansion and Upgrades	$150,000	OFT	Expand existing wireless network to over entire plant. The upgrade in technology will serve as the building block for advanced telephone, mobile solutions, including RFID, VOIP technology, wireless communication for the nurses.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Jefferson	Mobile Phlebotomy Solution	$125,000	OFT	Purchase of a Mobile Phlebotomy Solution. Allowing lab orders, vacutainer requirements and collection times to be delivered to the phlebotomists.
Jefferson	Single Sign On	$100,000	OFT	A solution that aggregates employees' passwords in disparate systems into one management application.
Jefferson	Community Health Record Initiative	$1,500,000	OFT	Develop a strategy to implement a community helath record solution that will allow multiple information systems to integrate the entire continuum of a patient's care within a community into one community health record.
Jefferson	City of Watertown	$0	OFT	Completion of final piece of Watertown fiber-optic network
Jefferson	Health Information Technology Plan	$3,650,000	OFT	Comprehensive health information technology project which uses modern healthcare information technology to improve the quality and accessibility and quality of health services care available to the Watertown community. Project includes among other components a disaster recovery system, wireless infrastructure upgrades, nursing home electronic medical record, telephone upgrades and a community health record initiative.
Jefferson	Fire Station number 3	$1,000,000	OHS	A new Fire Station is needed for a section of the Town of Watertown that has expanded with new business and industry because of the federal Army base, Fort Drum. This new station will replace a 25 year old station that was built before the expansion andis currently too small to house our 100 foot ladder truck. We would also like to add bunking rooms in the new station that would house volunteer fire fighters and also future paid fire fighters. Our current specifications are for an 11,00 square foot building.
Jefferson	Watertown Airport	$0	OHS	Refurbish Airport Rescue & Fire Fighting Building
Jefferson	Wellesley Island SP - Park Roadway Improvements	$1,000,000	OPRHP	
Jefferson	Sackets Harbor State Historic Site - Union Hotel Rehabilitation	$200,000	OPRHP	This Transportation Enhancement Project is supported by NYSDDOT Commissioner Glynn. The project involves the rehabilitation of the Union Hotel within Sackets Harbor State Historic Site. This is an historically significant structure located on Lake Ontario. The project will help prepare for the 200th anniverssary celebration of the War of 1812.

County	Project	Requested $	State Agency	Additional Detail
Jefferson, St. Lawrence	BRIDGE PAINTING (8 BRIDGES)	$4,098,000	DOT	
Kings	Masbia Soup Kitchen	$500,000	CDBG	In the last 4 years we gave out close to 200,000 ready to eat hot meals, for NYC'S hungry out of one branch. We are the only kosher soup kitchen in NYC. Due in the increase in demand, with help of foundations and government we are in the process of openi
Kings	Housing refurbishment and restoration	$150,000	CDBG	Refurbish and renovate multi-family home. Repair exterior brick, replace windows and doors, re-insulate, replace boiler with high efficiency self-modulating boiler, replace steam radiators with higher efficiency hot water radiators, install low flow tapsand toilets, replace lighting with low energy LED fixtures.
Kings	Louis Pink Senior Center Expansion	$4,200,000	CDBG	Construct 2nd floor at East New York Council for the Aging, Louis Pink Center
Kings	New York City College of Technology - Academic Building I	$148,000,000	CUNY	This project will address the College's acute space deficit and shortfall of quality classroom and lab space, as identified in its 2000 Master Plan Amendment. The new 350,000 GSF Academic Building I will be built on the site of the existing Klitgord Buil
Kings	New York City College of Technology - Voorhees Fatade	$18,000,000	CUNY	Replace the entire fatade with glass curtain wall. The existing facade is composed of a brick skin with masonry back-up and has begun to separate from the masonry, creating a health and safety issue.
Kings	Towards a 21st Century Medical Home in Central Brooklyn	$1,800,000	DASNY	The Brownsville Community Development Corporation proposes to increase primary care capacity in the high need communities of Central Brooklyn. The goal is to improve access to and utilization of high quality primary and preventative health care service for and among the residents of these communities, leading to measurably improved short-term and long-term health outcomes for approximately 14,000 new and 25,000 existing users of our clinical services. The proposed expansion project includes: a) openingand operating two new, federally-approved, Article 28 compliant, Joint Commission accredited, comprehensive health centers (one medical, one dental) in East New York; b) renovating and refurbishing our main clinical site and corporate headquarters in Brownsville to optimize site capacity, provider productivity, patient care and patient flow, and maximize revenue; and c) augmenting and training clinical and support staff. We calculate that the overall total cost to achieve all stated goals is 16,221,536
Kings	Eileen C. Dugan Life Sciences Center	$8,000,000	DASNY	The Eileen C. Dugan Life Sciences Center will be a state of the art instruction and research facility designed to prepare young men and women for careers in high growth fields ranging from biotechnology to nursing. The project requires extensive renovations to modernize existing College laboratories for biology, chemistry, psychology and physics/earth science. Labs for faculty directed research projects and ancillary facilities such as a ""cold room"" and tissue culture room will also be included. In addition to creating a cutting-edge learning environment that is devoted to high demand professions, the College is also committed to achieving a greener campus that reduces its carbon footprint. Therefore this project will also include the installation ofa more energy efficient chiller, as well as environmentally friendly lighting and air conditioning systems that will reduce the campus's energy consumption. New green spaces will be added to the College's urban camp
Kings	Materials Resource Library	$1,250,000	DASNY	Pratt is poised to create the first national comprehensive Design Materials Resource Library dedicated to the education of designers of the built environment: a free resource to further the spirit of education first. The current growth in materials technology, including digital, organic, and nanotechnologies is creating an explosion in performance and visual properties which demand reconsideration as resources for modern designers.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Kings	Comprehensive Campus Energy Efficiency Project	$25,000,000	DASNY	This project will include the installation of a cogeneration system with heat recovery, electical distribution, and air conditioning. It will also include state-of-the-art lighting and lighting controls tied to a building management system with HVAC controls. in addition a geothermal system will supplement heating and cooling from the cogeneration system
Kings	Campus Smart Grid	$1,000,000	DASNY	This project will install a state-of-the-art smart grid on the 27 acre Pratt campus to control electrical; usage and coordinate the ConEd neighborhood infrastructure.
Kings	Coney Island YMCA	$13,000,000	DASNY	Construction of a new YMCA facility including pools, gymnasium, all purpose child care areas, and exercise areas. The building will serve as a child care and health center for this low income neighborhood.
Kings	Prospect Park Vault	$1,100,000	DASNY	Replacement of 3,500sf sidewalk vault with new steel frame, concrete walk, new slab, water membrane and new sidewalk.
Kings	Rogers Hall Renovation	$0	DASNY	Rogers Hall is the academic hub and research facility of Polytechnic Institute of New York University, one of the nation?s oldest private engineering schools founded in 1854 in Brooklyn, New York. The 250,000 SF building constructed in 1920 has had limited renovation since its opening. As a research center, the building has many working laboratories that have not been brought up to current building codes. The building has no HVAC system and most of the windows are from the original construction as arethe bathrooms. Rogers Hall is the heart of i2e (invention, innovation and entrepreneurship) at Polytechnic and serves as the home base for academic entrepreneurs seeking to create new products, services and business ventures for the 21st century economy.
Kings	Wunsch Windows	$1,000,000	DASNY	Wunsch is an historic building that currently serves as the office of Undergraduate Admissions at the Polytechnic Institute of NYU. The Wunsch building was renovated in 1998; however due to limited resources the windows were not replaced. Old windows make temperature control costly, unpredictable and result in poor use of resources. The windows are in such disrepair that they cannot be opened and are not insulated creating a more difficult temperature control situation.
Kings	Campus Expansion	$0	DASNY	For 150 years, St. Francis College?s mission has been devoted to provide a means of economic and social ascent to New Yorkers from underrepresented communities. Over the course of many generations the names and faces of these students have changed, however they have shared an intense desire to achieve a brighter future for themselves and their families through a college education.
Kings	Community Center Improvements	$7,000,000	DASNY	St. Francis College is committed to making a sustained and meaningful contribution to the quality of life for its neighbors in Brooklyn. To this end, the College provides a variety of educational and cultural enrichment programs that serve Brooklynites of all ages and interests. The College also permits local non-profit organizations to use campus facilities free of charge. The College?s campus, which is located within minutes of major highways and mass transit lines that reach the entire New York metropolitan area, makes it a popular venue for community group events. As a result, the St. Francis College campus is an important community asset to Brooklyn. Due to the extensive use by the Community, certain capital improvements need to be made to the public spaces of the College including improvements to the pool.

County	Project	Requested $	State Agency	Additional Detail
Kings	Eileen C. Dugan Life Science Center: A Technology Rich Green Science ar	$35,000,000	DASNY	The Dugan Life Sciences Center will be a state-of-the-art instruction and research facility designed to prepare young men and women for careers in fields ranging from biotechnology to nursing. These fields are not only vital to the health of all New Yorkers, they are also essential to our city?s continued economic competitiveness. Federal support will be leveraged with significant state and private sector contributions to enable St. Francis College achieve the highest standards of excellence in the science and health professions. To realize this goal, the College has developed a plan that calls for extensive renovations to each of its existing laboratories. The existing science center, a six-story structure that houses four floors of laboratories forbiology, chemistry, psychology and physics/earth science, will be virtually gutted, enabling the creation of comfortable and well-designed new labs featuring the latest technology. Labs for faculty-directed student research projects and ancillary facilihieving a greener campus that reduces its carbon footprint. Therefore this project also includes the installation of a more energy efficient chiller, as well as environmentally friendly lighting and air conditioning systems that will reduce energy consumew green spaces will also be added to the College?s urban campus.
Kings	Community Healthcare Network	$464,354	DASNY	Renovations and Expansion to Caribbean House Center
Kings	Community Healthcare Network	$290,654	DASNY	Renovation and IT Enhancement CABS Health Center
Kings	Community Healthcare Network	$841,354	DASNY	Renovation of Dr. Betty Shabazz Center
Kings	Sunset Park Family Health Center	$5,800,000	DASNY	Dental, Women's Health, and Mammography Expansion
Kings	NYC College of Technology	$148,000,000	DASNY	New building for labs, classrooms, space
Kings	Housing Works	$550,000	DASNY	Renovation of 743 E. 9th clinic (3 exam/therapy rooms)
Kings	Brookdale University Hospital Medical Center	$417	DASNY	4 new ultrasound machines
Kings	Interfaith Medical Center	$2,214,638	DASNY	Various equipment upgrades and purchases
Kings	Interfaith Medical Center	$11,159,000	DASNY	3-year HVAC infrastructure upgrade
Kings	Interfaith Medical Center	$2,311,000	DASNY	Engineering capital needs
Kings	Interfaith Medical Center	$2,300,000	DASNY	Engineering capital needs - new heat exchanger
Kings	Interfaith Medical Center	$6,048,000	DASNY	More HVAC needs
Kings	Interfaith Medical Center	$5,000,000	DASNY	Modernizing Acute Psychiatric Care unit
Kings	Kingsbrook Jewish Medical Center	$1,500,000	DASNY	Expansion of Emergency Department
Kings	SUNY Downstate	$250,000	DASNY	Renovating the Dr. Begleiter neuroscience library/initiative
Kings	Green Careers and Business Center	$2,600,000	DASNY	This will establish a green careers and Business trainning center storefront with certificate programs and workshops for retrainning professionals and technicians for careers in renewable energy technologies, green infrastructure. systems and informationmanagement for health care. Included for example would be energy and green house gas audits, smart grid design and management, solar and geothermal systems, and computer software trainning for the above.

County	Project	Requested $	State Agency	Additional Detail
Kings	Sunset Park/Lutheran Family Health Centers FQHC Construction Project	$20,000,000	DASNY	Lutheran Family Health Centers (LFHC), the largest FQHC in NYS, proposes to construct a two-story, 30,000 sq. ft. addition to a new ambulatory care facility whose 1st floor is currently under construction adjacent to LFHC?s existing main site, the SunsetPark Family Health Center (SPFHC). The 2nd and 3rd floors will house expanded dental, women?s health, mammography, and specialty services and yield immediate improvements in timely access to care; currently, wait times for appointments can range from 4-8 weeks. The Project will create 75 permanent and 50 short-term jobs, and enable LFHC to serve an additional 25,000 residents of underserved Brooklyn communities. Ultimately, the Project will dramatically enhance the quality, efficiency, accessibility, and cost-effectiveness of health care ? outcomes that align the Project with NYS and federal health care reform priorities. LFHC anticipates significant improvements in health outcomes for its patient population, particularly patients with chronic disease
Kings	Campus Townhouse Gut Green Renovation (LEED Silver)	$10,000,000	DASNY	The Pratt Townhouses are needed for student housing to alleviate community housing stress. The Townhouses will be renovated to LEED Silver and will reduce energy consuption and will utilizes local materials and labor.
Kings	Design Center Renovation (LEED Silver)	$2,500,000	DASNY	Pratt Institute Design Center Approx 100sft will be renovated to a LEED silver level to accomodate design studios for interior, industrial, graphic and fashon Design Departments. The Studios will incorporate IT access for all students.
Kings	Science Laboratory Upgrade	$1,000,000	DASNY	This project would renovate the science and math labs for Pratt's School of Libral Arts & Sciences. These labs have become the foundation for our new focus on teaching sustainable design throughout the campus and within Pratt's curriculum
Kings	Campus Studio Renovations	$5,000,000	DASNY	This Project would renovate 100,000sft of studio space to become the core spaces for our ""Campus as a Living Lab"" for sustainabi
Kings	Campus Classroom Upgrades	$5,000,000	DASNY	This Project will renovate 100,000sft of classroom space to reduce energy consumption and add IT infrastructure for all students
Kings	Green Roof and Structure for School of Achitecture Building	$500,000	DASNY	This Project will create a green roof and structural support in a highly visable location for architecture faculty and students. the project will include an educational display as a teching tool. the Green roof will reduce energy consumption and storm-water run-off and also reduce the heat island effect.
Kings	Sustainable Landscape Upgrades	$2,000,000	DASNY	this Project will upgrade the roads, paths and campus grounds to increase permeability and reduce stormwater run-off and Heat island effect by reducing the amount of back-top surfaces and adding permeable pavers and planting native species.
Kings	Unity Plaza Dome - Construction	$800,000	DASNY	
Kings	Brooklyn bridge park - Piers 1-6	$150,000,000	DEC	Preliminary Study & then moving aging piles

County	Project	Requested $	State Agency	Additional Detail
Kings	2 or 3 Affordable Housing for Veterans	$7,000,000	DHCR	We are a minority women owned nonprofit who has been in existance since 1994. We have worked on several affordable housing projects which have included homeownership and rehabb with sale to low-to-moderate income families. We have trecently targeted a parcel of vacant land and request funding to develop afordable ""green sustainable"" housing for returning veterans and their families. This project would also include additional units for low-to-moderate income families. We would also develop a communitycenter for the youths in the neighborhood and surrounding. We are already in possession of the architectural drawings and have done a feasibility study.We could commence this new contruction project within 30 days . This would be Leeds /and or EnterpriseCommunities certified. We also have a great development team and architects and will be using NYSERDA for additonal funds for our energy placements. We would also like to hae a greenroof for the youths to grow organic vegetables and learn culinary arts.
Kings	Sugar Hill Apartments	$12,000,000	DHCR	The Sugar Hill Project will transform a underutilized gray field site into a vibrantly green model of urban revitalization integrating affordable housing, education and cultural resources to benefit the community. The project provides 124 apartments, a licensed child care center for 100 infants, toddlers and pre-school children, nonprofit rental space, and the Faith Ringgold Children's Museum of Art & Storytelling. Support letters are available from every elected official in the district, the CommunityPlanning Board, and neighborhood leaders. The nonprofit sponsor, Broadway Housing Communities has a stellar 25-year track record of with success with assest under management in excess of $30 million.
Kings	HOUSING RESCUE	$250,000	DHCR	DEMOLISH OLD BUILDING AND BUILD NEW HOUSING FOR LOW AND AFFORDABLE INCOME HOUSING
Kings	Affordable Housing	$50,000,000	DHCR	Creation of affordable Housing through the rehabilitation, development and Management of new and existing housing stock; foreclosed properties and multi family units. Provide approximately 500 units of affordable housing to the areas population who havebeen impacted by the current economic crisis and existing financial hardships.
Kings	Affordable Energy Star New Construction for Returning Veterans	$7,000,000	DHCR	We have already identified a vacant set of lots in Brooklyn, NY. Our nonprofit organization also has prelimnary architectural plans, and the site has already been zoned residential. We would be building with a federal influence of Universal Design that would enhance the Rehabilitation Act of 1973.This ""green sustainable"" project would be taregeted towards specific activities for returning disabled and veterans It would also compose of a community center that would provide support services and other needs. This new construction would have 100% disability accessible ground level affordable 2-bedroom apartments with the remaining apartments available for returning veterans and their families. The total amount of units would be 12 untis that is located accessible to trains with accessible elevators, Prospect Park for recreation and buses that are located 1 block from the developm
Kings	Coretta Scott King Senior Houses - Construction	$6,389,000	DHCR	
Kings	MONITORING REHABILITATION	$75,000	DOH	Consultant service agency to provide advisory and oversight to clients who pursue claims and programs in the developmental disability and nursing homecare fields.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Kings	Strength-Health and Wellness Center	$65,000	DOH	The Kings Bay Y ""Strength? Health and Wellness program will offer physical education, supportive and educational programs to the members of the community. The programs will include specialized exercise and swimming classes, nutrition, weight loss, and healthy living workshops and supportive group counseling sessions. The goal of the project is to assist the community members in retaining employment and financial self sufficiency by staying healthy and avoiding disabilit
Kings	Independent Living & Aging in Place	$75,000	DOH	Met Council will develop a program which provides frail elderly living within NYC with support and services to remain independent in their homes and active members of the community. This will be accomplished through initiatives to decrease social isolation, increase compliance with medical/health regiments and safety education/services. The expected outcome is that at least 85% of recipients of service will remain in their own homes, and not end up in an aging facility.
Kings	Rutland Electronic Medical Record and Computerized Physician Order Entr	$1,800,000	DOH	Rutland Nursing Home (RNH), 538-bed skilled nursing facility affiliated with Kingsbrook Jewish Medical Center (KJMC), has high acuity specialty care units requiring a skilled clinical team. To meet the complex clinical needs of its diverse resident population and ensure a seamless continuum of care with KJMC?s acute and clinic sites, RNH requires a Long Term Care Electronic Medical Record System (EMR). An EMR will enhance the health & safety of residents by improving patient outcomes through preventionof drug reactions & errors; integrating clinical guidelines with patient diagnosis optimizing disease management; and identifying outcome metrics for institutional quality improvement. Medical record documentation is critical to maintain clinical communication, develop a resident-centered plan of care, and ensure clinical team recommendations are followed. Manual charting reduces clinical time with residents and can contribute to potential medical errors as there is no automatic auditing of medication o
Kings	Sunset Park Family Health Center	$950,000	DOH	School-based and Behavioral Health EMR Implementation
Kings	Kings County Hospital Center	$1,000,000	DOH	HIT program - implementation, education, application
Kings	School-Based Health and Behavioral Heath EMR Implementation	$950,000	DOH	Lutheran Family Health Centers (LFHC) proposes to complete the implementation of Electronic Medical Records (EMR) at its behavioral health (BH) center and its 14 school-based health centers (SBHCs). LFHC will develop a BH EMR module, implement the moduleat the identified sites, and integrate the module with LFHC?s existing primary care (PC) EMR. The proposed project is aligned with NYS and federal HIT adoption agendas which are based on growing evidence that EMRs improve care coordination and health outcomes, enhance efficiency, and reduce medical errors and health care costs. The implementation of a BH EMR will impact 7,000 adult LFHC patients. Further, integration of PC and BH EMR modules will facilitate LFHC?s overall efforts to integrate BH care delivery into the PC setting, a model that tends to improve status indicators in both health areas. Integration of the two EMR modules will have particular impact in the school setting, where PC providers increasingly rely upon BH providers to assist in t

County	Project	Requested $	State Agency	Additional Detail
Kings	Emergency Medicine Information System	$1,200,000	DOH	The goal of this project is to provide the Emergency Department of New York Methodist Hospital (NYM) with an information system (EMIS) that will improve workflow in the department from triage to discharge. The system will also improve patient safety anddecrease patient waiting time. The EMIS will be integrated with NYM's computerized physician order entry system, which was initiated in 2002. Acquisition of the EMIS will allow this vital technology to be extended to the Hospital's Emergency Department,where over 70,000 patient visits are logged annually. NYM serves a diverse socioeconomic populatiojn that includes significant representation from every neighborhood of Brooklyn and from Staten Island. This project will improve the health status and access to care of a significant percentage of New Yorkers.
Kings	Digital Mammography System	$600,000	DOH	The acquisition and installation of a digital mammography system at New York Methodist Hospital (NYM) would allow the Hospital to provide members of our Brooklyn community (population: 2.7 million) with the highest quality diagnostic procedure for the detection of breast cancer and, because digital mammography is a faster, as well as a more accurate modality, it would allow the Hospital to increase the number of patients for whom we provide this vital service. In particular, digital mammograms are knownto be more accurate in detecting breast cancer in women under the age of 50, those who are pre-menopausal and those with dense breasts. Studies have shown that digital mammography reveals cancers that conventional mammograms have been missed. Specifically, digital mammography offers: improved contrast between dense and non-dense breast tissue, less need to repeat studies which means a reduction in the amount of radiation to which the patient is exposed, the ability to allow the physician to manipulate
Kings	Barcode Point of Care Tecnology Project	$500,000	DOH	Having successfully implemented a computerized physician order entry system, a partial solution to the problem of medication errors, New York Methodist Hospital (NYM) is now eager to complete this solution with the implementation and integration of barcode point-of-care (BPOC) technology. BPOC focuses on the elimination of medication administration errors by verifying five ?rights? related to medication management. Using a hand-held device to scan the patient?s wristband as well as the medication label,nurses are able to verify the right medication, right dose, right route, right patient and right time. Such a system meets Joint Commission on the Accreditation of Healthcare standards for patient identification, medication use, error reporting and process improvement. Government regulations and agencies as well as professional healthcare organizations promoting quality care and reduction of medical errors have strongly advocated for implementation of electronic information systems in all hospitals. Ahealth information systems, and has specifically mentioned BPOC systems. The proposed pilot project, to be implemented by an institution with a proven track record in electronic health systems, would initially benefit 14,000 inpatients annually and wouldded to serve all 35,000 inpatients discharged annually from NYM. In addition, it would provide a model for other institutions in Brooklyn, New York City and New York State.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
Kings	Cancer Screening in the Chinese	$1,000,000	DOH	Cancer screening in the Chinese is woefully low as compared to similar cohorts in other ethnicities. They are at high risk for Hepatocellular carcinoma, colon, stomach, esophageal, nasopharyngeal carcinoma, breast/prostate cancer, etc. We hope to includeKoreans, Phillipinos, Vietnamese, Japanese groups as well in the screening project. We will need at least 3 people in each boro for implementation. Create durable materials in multiple languages, produce PSA's to encourage, educate these groups to get cancer screening. We will recruit physicians and community, religious groups to become partners in this. We will create a website in a culturallly competent manner, mindful of LEP and varying levels of education. We will recruit an EMR company, laboratories, pharmacies and other stakeholders in assisting us in funding and data collection. Research will be generated as well from data collected.
Kings	Nurse Call System	$400,000	DOH	A modern nurse call system will eliminate much wasted time and effort, while providing greater comfort and responsiveness for patients. Calls from a patient can be relayed directly to the nurse's wireless phone or pager (currently they are heard overheadby all patients and staff). If the nurse cannot answer immediately, the call is automatically routed to the next appropriate caregiver. Nurses can consult with physcians in real-time, preventing errors in care. The system can be integrated with the Hospital's other technologies (like pagers) and other areas (such as environmental services, pharmacy, food service). The system also integrates with the Hospital's data network to create an up-to-date, real-time electronic census that shows patient information, room status and services needed in a quick easy layout.
Kings	Kings Bay Y Carrer Counseling Center	$120,000	DOL	Kings Bay YM-YWHA will open a Career Counseling center to serve the South Brooklyn community. The center will provide career and employment counseling, job readiness, resume and interview preparation, job placement, and education guidance and informationand referral services. 150 unemployed people will be served at center and will obtain employment during the program year.
Kings	Mobile Community Employment Outreach Program	$200,000	DOL	Mobile Community Employment Outreach Program is a business concept for which financing and funding is required to complete feasibility research and set up of the business proper. However, on outcome MCEOP will create job opportunities for Seniors, YoungAdults and individuals who are displaced by the current economic system. Mobile Community Outreach Program will need funding to purchase mobile van and have it customize to facilitate five staff, computers, office furniture. Since MCEOP is a small business concept feasibility studies needs to be done for marketing, advertising, product positioning and researching. However, MCEOP will create job both for seniors and young adults for the five boroughs. Unemployed seniors who are skilled and who are able to offer job coach information will have the opportunity to be matched with young adults who could benefit from their mentorship. Unemployed individuals will have the opprotunity to sign up for employment referrals and other apprentice training job opportEOP will offer nevertheless the striking difference is that MCEOP will travel to communities and it will be in the postion to reach individuals who are standing at street corners, unable to travel to workforce centers or other programs of MCEOP kind. MCEively seek out employers and build job bank relationship with employers who are will to hire young individual and seniors. MCEOP is expecting to hire 5 full-time staffs who will work as employment counselors/specialist, community outreach coordinators, a

County	Project	Requested $	State Agency	Additional Detail
Kings	Pre-Employment Services for Special Populations	$750,000	DOL	This project will provide counseling, job readiness training and skill training in high demand employment areas to individuals facing multiple barriers to employment such as language, basic skills, and lack of training. Upon completion of training participants will be assisted to find and retain employment.
Kings	Vocational Cultural Recreation Center	$2,000,000	DOL	This is a cultural center for youths and adults. We will be offering vocational training skills such as automobile mechanics, HVAC Green sustainable training, carpentry, homeimprovement licensure training. We will also include literacy GED courses with cultural arts such as dance, thearte, and computer skills and training courses. This will assist the underserved unemployed more employable and also ready with self-esteem training for employment presentations. It will be located in a warehouse that willbe converted to energy efficiency to save on energy costs. This will provide 50-60 permamnent jobs as well as thousands being trained in the future. This is a great opportunity to train vocational skills to many underserved youths and adults.
Kings	Workforce Advocacy and Support Initiative	$500,000	DOL	Community Service Society?s Workforce Advocacy and Support Initiative, a 3-year pilot, addresses the case management needs of disconnected youth enrolled in workforce development programs while testing a new approach to service delivery. CSS developed partnerships with CBOs that operate workforce programs. Highly trained CSS case managers are placed in the partner CBO and work with youth up to 18 months, helping to eliminate barriers to employment and employment retention. Case managers assist participants in eliminating and preventing crises that impact on successful program completion. It is our goal to improve CBO outcomes of program retention, education/GED attainment, internship completion, securing employment and retaining employment. Intensive case management services provided include connection to government benefits and child care, referrals to other CBOs for health and mental health services, escorting clients to appointments for support and advocacy, cash assistance for emergencies or fees/
Kings	NYC Sea Change: Blue Waters, Green Jobs	$50,000	DOL	Urban Ecotourism as an ongoing opportunity to conserve biological and social diversity, create new jobs and improve the quality of life in New York City. Ecotourism can prove important in facilitating cultural exchange, environmental conservation, sustainable and equitable development. Going Coastal's project to create green jobs includes the following: 1. Create GIS of existing urban ecotourism programs and areas for expansion. 2. In partnership with community college, recruit and train at least 25 youth in the field of eco-tourism. 3. Develop and coordinate a one-day conference on eco-tourism opportunities in New York City. 4. Establish Waterfront Information Center to promote ecotourism in NYC. 5. Study and report on potential for green infrastructure to facilitate urban eco-tourism. There are numerous small efforts in ecotourism taking place throughout New York City. We propose to facilitate these efforts and expand them, to create an economically viable eco-tourism industry encompassing everythinue Waters, Green Jobs takes the next step.
Kings	Growing Success program	$150,000	DOL	Growing Success Program promotes youth employment and green jobs and is designed grow food and empower community resident to fight hunger and poverty. We would also do anti-crime and anti-volience among youth of Central Brooklyn projects thru youth organizing.

County	Project	Requested $	State Agency	Additional Detail
Kings	BUILD Green Career Ladders	$1,500,000	DOL	Our initiative will provide information, education and training that leads to certification for jobs in the photovoltaic systems installation industry, the solar thermal industry, the energy efficiency auditing industry and other careers in the field alternative energy, often referred to as ?Green Collar Jobs? and the ?Green Industry.? Our initiative capitalizes on the opportunities in this crisis to combat unemployment and poverty in our community by: (1) Facilitating entry into green collar jobs and helping industry employees identify and move up industry career ladders; (2) Supporting construction trades business owners in their ability to grow their businesses into the ?Green Industry?; and (3) Cultivate entrepreneurial efforts to create new businesses in the ?Green Industry. A total of three hundred sixty people will be trained during two years. Three hundred of enrolled trainees will complete their course and earn the entry level certification from the North American Board of Certified Energy Prand state alternative energy tax credits.
Kings	Employment Initiatives Program	$800,000	DOL	According to the DOL, NYC has 290,600 unemployed New Yorkers in January 2009. In Kings County, the situation is worse for Asians. Over 80% of these unemployed Asian cannot conduct normal English communication. In addition, the growth in the immigrant population has created another wave of available workers who lack necessary language skills. Both groups require relevant job and language skills to secure employment in such tough times. This involves initiatives such as new job skills training, knowledgeand techniques updates, and literacy improvement as well as employment services. Many of these initiatives require classroom teaching and workshops. Others require role play practice and case management method to achieve the goal. BCA has been conductingtraining program since 1992 but was interrupted due to reduction of Government funding. This project has two main goals: 1) to start up training courses to train dislocated workers on new sets of job skills which will prepare them for high demand jobs,
Kings	Employment Application and Interview Skills	$1,000,000	DOL	With nation?s unemployment rate rising to 8.1% in March, more New Yorkers line up for job fairs and hope to get back to work soon. However, in this severe competitive environment, a successful job application requires specific skills. Apart from having updated relevant job knowledge and techniques, they need help from the application skills and interview training too. These job seekers need to know what makes their application successful and what the ingredients of success are. Our organization has beenoperating the training program for job seekers and was interrupted this training due to reduction of Government funding few years ago. BCA has constant contact with the local job market and know what are needed for a successful application. This programoffers workshops to participants on job application practices and sessions in interview training, including role play activities. Program members learn to write up well presented cover letters and technically sound resumes. They will go through successi

Kings	One Stop Social Service Center	$500,000	DOL	According to the Community Needs Survey 2006, 76% of the Asian immigrants in Sunset Park demonstrated some kind of social service need. It?s often difficult for immigrants to directly obtain much-needed government assistance due to a variety of reasons,most notably including language barriers, distrust of government, lack of knowledge about how to receive assistance, and the myth that receiving benefits would affect their immigration or visa status. Also, due of the recent economic recession, even morefamilies come seeking assistance. BCA One Stop Social Service Center is dedicated to help households with multiple needs. On a daily basis, BCA provides the much needed bilingual access services to well over 250 clients. This program will enable BCA toprovide access services to an additional 600 clients daily. BCA?s well-trained and multilingual staff offer walk-in services as well as address telephone inquiries from clients seeking various social services. The services provided include: entitlement a

County	Project	Requested $	State Agency	Additional Detail
Kings	Prospect Park Alliance Lincoln Road Project	$4,500,000	DOT	The Prospect Park Alliance Lincoln Road project widens what is currently an automotive exit from the Park into two lanes, creating an entrance/exit that will improve the management of car and truck traffic within the Park. The new Lincoln Road entrance will function as the primary entrance through which millions of Park users each year will access the Lakeside Center, the Concert Grove, and the foot paths and bicycle lanes that provide contiguous routes from there to other activity hubs in the Park. Current conditions in the Park create dangerous intersections and shared use situations that will be alleviated or completely removed with this new design. With separate sidewalks, bicycle lanes, and roadways, means of entry to the Park will be more clearlydelineated across user groups. This will greatly increase the safety of both cyclists and pedestrians inside the Park. By facilitating safe and contiguous access to the Lakeside Center, the new Lincoln Road Entrance will also help promote an economic anf foot paths and bicycle lanes within the Park, pedestrians and cyclists coming through the Park from other areas can exit safely at this location and reach nearby retail corridors, cultural institutions, and public transportation.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Kings	Water Supply & Sewage Treatment Facilities, ADG UPGRADE (Red Hook,	$250,000	NYPA	
Kings	Subway Platform, Track Signals and Tunnel Lighting, NYCT Station Platforr	$273,800	NYPA	
Kings	Colleges and Universities, SUNY DOWNSTATE - BOILER UPGRADE	$300,000	NYPA	
Kings	Transit Terminals, Bus and Train Depots, Airports, Garages, NYCT - East N	$530,877	NYPA	
Kings	Water Supply & Sewage Treatment Facilities, NYC DEP - OWL'S HEAD W	$1,325,974	NYPA	
Kings	Water Supply & Sewage Treatment Facilities, NYC DEP - Owl's Head WWT	$1,400,000	NYPA	
Kings	Water Supply & Sewage Treatment Facilities, NYC DEP - ADG UPGRADE	$1,443,285	NYPA	
Kings	Libraries, BROOKLYN PUBLIC LIBRARY - CHILLER	$1,614,151	NYPA	
Kings	Public Housing Projects, NYCHA HWH - RELEASE 10	$2,500,000	NYPA	
Kings	Colleges and Universities, CUNY NAMM COMPLEX & KILTGORD - EXPAN	$12,748,187	NYPA	
Kings	Solar Power Education Resource	$70,000	NYSERDA	I have identified a need for education in the energy sector, specifically, to give contractors, building and dwelling owners, business people and the like the basic education and hands on experience required to understand the different types of energy available to them. Currently, if a builder or electrical specialist is asked about the different options available there is confusion and misinformation. Solar power is a mystery to many. Wind power is easier to grasp but hard to realize as an option. Geothermal is even less understood. I propose to create a moving display vehicle that can showcase alternative forms of energy. I imagine pulling up to a school, building agency or contractor office, neighborhood or business and giving talks, demonstrationsand answering questions directly about Solar, Wind, Geothermal, Biomass, Nuclear and Coal, Gasoline and Electric. I can have a typical solar panel or wind turbine make energy in front of people while explaining the process. I can model a geothermal systeconcept that is vital to reducing atmospheric CO2. All in one vehicle, one neighborhood and business at a time.
Kings	The green Community/College internship program	$2,300,000	NYSERDA	This program will establish joint internships between the community and pratt students to develop an awareness and understanding of sustainability and envirnomental issues within the community. The program will include greening the pratt America Reads program and will expand to include an urban agriculture program and a sustainability assessment program for local public schools. In addition it will contain a teach the teacher series to leverage knowledge gained in this programs.
Kings	Pratt Center for Renewable Energy	$10,000,000	NYSERDA	This project will establish a renewable energy teaching center at the pratt campus in Brooklyn. renewable energy systems i.e., solar,wind, geothermal, cogeneration, smart grid, andcomputer interfaces will allow students to virually access and view systems and their performance via live data.
Kings	hi efficiency room air conditioner replacement project	$2,500,000	NYSERDA	Replace old, inefficent, poorly installed wall sleeve or window room air conditioners with new high efficeincy air conditioners. The units will be professionally installed and weather sealed keeping out cold in winter and heat in Summer. We have the ability to promote the program and monitor the eligibility of the unit to be replaced. We will explain the process and handle the entire project from appointment through the installation. We can provide a breakdown of cost per air conditioner provided and estimate the number of jobs created or retained per air conditioner as well. The project is ready to go and can be adjusted larger if desired.
Kings	524 Myrtle Avenue Building Construction (LEEDs Gold)	$4,500,000	NYSERDA	Pratt Institute is constructing 100,000 sft building on Myrtle Avenue that will be LEED Gold the requested funds would be used for the construction/installation of ""green"" building components, i.e. solar PV, green roof etc..

Kings	Youth Development	$175,000	OCFS	The Youth Development and Service Center (YDSC), located in Southest Broolyn, will work with adolescentsÆ ages 11 to 17 (in two age divisions 11 to 12 and 14 to 17) to promote pro-social behaviors, positive life choices, conflict resolution and to reduce
Kings	HOMEBOUND AND EMERGENCY FEEDING SERVICES	$100,000	OCFS	Mission Statement Miller Avenue Community Block Association Miller Avenue Community Block Association was established in 1979 by the late James Saunders and the present Congressman Edolphus ?Ed? Towns. The purpose was to maintain and improve the psychological and social well-being of older persons in East New York. Miller Avenue is a multi-purpose community-based organization (501C3 not-for- profit) providing a wide range of social services to primarily the senior population,. However, anyone who crosses the thresholds will receive some type of assistance, be it through the food pantry, emergency clothing, transportation or referrals for Social service agencies. The Director over the years has set up over 70 soup kitchens and several food pantries throughout the five (5) boroughs. The center focuses on the enhancement, growth and welfare of all clients who walk through the door. This is an organization dedicated to helping older residents recognize and resolve individual, family and community problemsthe social and emotional support. We complete applications and write letters on their behalf to such places as social services, Medicaid and Medicare, as well as Social Security offices. We have a telephone reassurance program where we call the seniorss to ensure their well-being. We provide an errand and shopping program for the handicapped and senior population. We make referrals which assist in Meals-on-Wheels, New York City Housing, Senior Housing Programs, Food and Hunger Hotline, Domestic Violen

County	Project	Requested $	State Agency	Additional Detail
Kings	Intensive In-Home Services	$10,950,000	OCFS	Across the country, youth are placed in costly, often inappropriate out-of-home facilities or other placements because they have committed crimes or struggle with mental illness. Often, they have been removed for abuse or neglect; they live in these settings because their parents can?t care for them. In some cases, not surprisingly, isolated from their families and surrounded by other troubled children, their disruptive behaviors worsen, their trust erodes, and their ability to maintain healthy relationships dissipates. Youth Villages? intensive in-home services are able to divert youth from high-end residential placements and to reunify those youth already removed from their families. Youth Villages has served over 14,000 youth in 14 years, and we have discharged over 80% of youth to their own homes and seen them remain successful two years post-discharge. These youth on the brink of spending periods of time wrapped up in the child welfare, juvenile justice, and/or mental health systems can be servedserving 240 kids on any given day across NY; initial assessments indicate need in the Albany area and in each of NYC?s 5 boroughs.
Kings	Project U-Turn	$2,000,000	OCFS	Project to assist in preventing child abuse by assisting parents with obtaining the assistance they need to meet basic needs. To employ young adults and adults in various areas and to discourage teen pregnacy. Program will offer parents assistance in thehome, employ home care workers, delivery staff and offer services to needy households after other service agencies are closed for the day/weekend and on holidays
Kings	supporting mothers building families	$250,000	OCFS	To develop a a) Community-Based Doula Service (CBDS) and b) to expand current pre-school programming to include infant care.a)Teenage moms are less likely to gain adequate weight during pregnancy, take recommended daily vitamins, have good eating habits,and seek prenatal care. A CBDS will assist young pregnant moms during pregnancy and childbirth by providing education, information and linkages to health care. Research shows that having a doula present during birth has many benefits to the mother, suchas shorter, less complicated labors and fewer cesareans. Studies also show that ?parents who receive support can feel more secure and cared for, are more successful in adapting to new family dynamics, have great success with breastfeeding, have lower postpartum depression and have lower incidence of abuse.? We want to provide support that young women in this neighborhood would not otherwise have -- help them to be aware of what?s going on in their bodies during pregnancy and how they can best take carewill be able to receive childbirth education classes, birth doula services, and/or post-partum parenting workshops and breastfeeding support. Objectives In our first year, we hope to accomplish the following: ? To provide birth doula services to 6-8 wome? To provide childbirth education workshop series to 6-8 pregnant women per series. Each series will meet for the standard 12 hours. We will offer four series in the first year, reaching a total of 24 ? 32 women. ? To provide post-partum parenting works
Kings	food for the children	$175,000	OCFS	food for needed children in our community is imperative. seeking a location and equipment adequate for the food service.
Kings	Linden Houses Youth Center	$18,000,000	OCFS	Construction of a new youth/senior recreation center

County	Project	Requested $	State Agency	Additional Detail
Kings	Kosher Food Pantry	$100,000	OFT	The Metropolitan Council on Jewish Poverty (Met Council) is NYC's leading agency in providing kosher food through a pantry system. We are seeking funding to automate and electronically connect our 35 pantry sites across the five boroughs. This will enable our Kosher Food Network the ability to provide client choice services, as well as reduce wait time for pantry packages. Additionally, an automated system will allow Met Council staff to identify no-shows for follow-up, ease certification and re-certification procedures and identify clients for other necessary services. Met Council currently serves approximately 17,000 households/per from the food pantries. We expect to increase this number by 10% with automation.
Kings	VOIP 2 GO 2009	$100,000,000	OFT	PROVIDE CHEAPEST WAY OF COMMUNICATION NEEDS FOR OUR FELLOW NEW YORKERS THROUGH OUR IP CONVERGENCE BROADBAND WIRELESS INFRASTRUCTURE
Kings	Campus IT Backbone	$1,200,000	OFT	This Project will install high speed/high capacity bandwith throughout the campus to link the IT center with classrooms, studios, and dormitories.this will allow art and design students and faculty to communicate and transfer digital information.
Kings	Digital Components for Classroom and Offices for Virtual Infrastruc	$1,250,000	OFT	This Project will provide virtual servers and desktops to reduce energy consumption. it will also provide a digital messenging system for offices and classrooms resulting in more efficient communication and less transportation.
Kings	AAPI Health Network	$250,000	OFT	There is presently no one website that integrates Risk Management, Benchmarks, Health Statistics, Consent Forms, Patient information, Medication information, etc. In multiple asian languages. Providers of healthcare have no place to go when patient information is needed in different languages. Informed Consent forms, procedure information, etc. We want to create durable materials for a website that will serve as the reference site for all medical specialties and multiple medical conditions, etc. We willneed many translators for about 3-6 month blocks for translation, after the materials are gathered. Website design and Webmaster will need to be maintained. Updates every 3 to 6 months as needed for medications as they are created is likely. This will reduce medication errors, medical/surgical consent misunderstandings, improve the care received by patients even if the provider does not speak the language. An illustrator will need to be obtained on an ongoing consultant basis, because many of the mater

County	Project	Requested $	State Agency	Additional Detail
Kings	Green Visitor Center	$5,000,000	OPRHP	We are writing on behalf of the Brooklyn Botanic Garden (BBG) to request a $5 million capital appropriation to support the construction of a new green Visitor?s Center. We made a similar request in FY 2008-09. While we recognize that the State is facingan unprecedented fiscal crisis, providing capital support to the Brooklyn Botanic Garden is a smart investment. By assisting BBG, we are supporting an institution that is dedicated to education about the environment, and one that forms a strong economicengine in a densely populated urban community. Brooklyn Botanic Garden has an ambitious centennial campaign goal of $100 million. It is anticipated that approximately half of this amount will come from public sources and half from private donors; to date, nearly $60 million has been secured, much of this from the City of New York. The Garden is asking that the State become an active partner in this effort. The centerpiece of BBG?s centennial campaign is the new Visitor Center, a ?shovel ready? project sment and excellence in sustainable design. The Center?s design incorporates numerous ?green? solutions, including the use of recycled building materials, passive solar principles, geothermal heating and cooling, and a living roof that will improve stormrelieve the burden on the municipal sewer system. It is estimated that the Visitor Center construction will create 280 construction jobs per year and an additional 163 supporting industry jobs per year. Post-occupancy jobs created are estimated at 13 pe
Kings	Prospect Park (Top Priority of Propsect)	$4,500,000	OPRHP	Lakeside Center - parking lot; new entrance
Kings	Propect Park	$3,000,000	OPRHP	Flatbush Ave sidewalk
Kings	Prospect Park	$2,500,000	OPRHP	Lookout Hill paths and staircases
Kings	Propect Park	$1,000,000	OPRHP	Reconstruct Lakes Paths in Prospect Park
Kings	Prospect Park	$1,000,000	OPRHP	Reconstruct path from Park Circle to Parkside/Ocean Ave
Kings	Propect Park	$1,000,000	OPRHP	Reconstruct Long Meadow Paths
Kings	Prospect Park	$1,500,000	OPRHP	Litchfield Villa - parking lot and drive
Kings	Propect Park	$1,500,000	OPRHP	Reconstruct Bridle paths
Kings	Food Stamp Administration	$350,000	OTDA	In the past years, BCA has been carrying out a Food Stamps Assistance program that mainly targets low-income Asian-American population in Brooklyn. Over the past year, BCA has successfully assisted over 1,000 new households to receive Food Stamp benefits, which brought in over $5 million into New York?s local communities. Due to the recent U.S. financial crisis, many double-income families have suddenly become single-income families. Families? food purchasing power drastically diminished and they are not receiving proper nutrition. Many families are unaware of Food Stamp eligibilities and are left without help. From our past experience, our current contract levels for Food Stamps are quite insufficient (our actual service level nearly doubled contractlevel last year). This project aims to serve an additional 3000 households in the application for Food Stamps so many families can get through these tough times. The funding will enable our Food Stamp Specialists to prescreen additional families for food
Kings	Early Head Start at HES	$477,000	SED	The propose Early Head Start program is community-based for low-income families with infants and toddlers and pregnant women. Its mission is to promote healthy prenatal outcomes for pregnant women, enhance the development of very young children, and to p

Kings	Brooklyn Historical Society	$400,000	SED	New curriculum kit ($150K), Building upgrades ($250K)
Kings	Hope Project	$80,000	SED	The Hope Project is a literacy base outreach Project that will reach 515 children in disadvantaged/Low income communities in Brooklyn, NY. Change 1 Child has partnered with 3 public Schools in New York that are ""need improvement,"" as per the Board of Education. On a monthly base, we will read to all children in early childhood grades and distribute free books to every student in hopes to make reading books more accessible to these children and help them to improve their reading/literacy skills. At theend of the school year, 100% of all students will own 12 literatures in their ?at-home library.? 80% of all students will show improvement in their reading scores/skil
Kings	Good Shepherd Services School-based Beacon and After-School Network	$200,000	SED	This funding would support Good Shepherd Services? PS 15 Beacon in Red Hook, Brooklyn. In 2008, the Beacon provided comprehensive after-school and summer day camp programs to almost 1,000 at-risk Red Hook youth, while its Family Support Component provided 165 families with information and referral, family, group, and individual counseling, case management , family trips, and support to help them stay together, and keep children out of foster care. Funds will be utilized to ensure staffing to meet mandated staff: participant ratios and needed program supplies. The current economic climate has placed this much- needed program, which along with our two other Red Hook programs, employs the largest number of youth in the community, in jeopardy! For many ofthese young people participating in the Beacon, and then getting a job there is a pivotal experience that changes the direction of their lives and leads to continued employment, career and educational attainment. Red Hook is largely comprised of low-incooung people through our programs.
Kings	Building Sustainability for Brooklyn's Youth: Program Management Strategy	$30,000	SED	Young Dancers in Repertory (YDR) is requesting critical support for our initiative to grow youth enrollment: 1) to sustain existing jobs in administering educational activities, and 2) to create a new position to oversee its implementation and success. YDR is a Brooklyn-based, nonprofit organization that has provided underserved youth enriching arts education programs for over 23 years. Today our operations span many working class neighborhoods reaching nearly 10,000 residents each year. Several alumnaeof our programs graduate within the top percentiles of their high school class, take on higher education, and become community leaders. Unfortunately, Brooklyn Community Boards have stated increases in youth without activities are placing heavy burdenson working families living below poverty level. YDR aims to engage more youth in educational activities who might otherwise be idle an involved in illegal behavior. We are embarking on a two-year initiative to grow youth enrollment in our Center for Danc
Kings	Coney Goes Green	$496,000	SED	To continue to provide after school educational and academic enrichment services and summer learning for 100 students in grades 5-8, who attend Title I schools. To provide summer youth employment and training for at risk youth in grades 9-12 for the months of July and August in the areas of renewal energy.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Lewis	RT.26, VIL. OF TURIN - HOUSEVILLE - RESURFACING	$1,840,000	DOT	
Lewis	CR 48 / Sugar River - Bridge Replacement	$1,555,000	DOT	
Lewis	Treatment Plant Mod.	$4,200,000	EFC	
Lewis	Lyons Falls Pulp & Paper Site Redevelopment	$2,000,000	ESD	Lyons Falls Pulp & Paper Site Redevelopment This will convert an adandon paper mill and turn it into a Shovel Ready Green industrial park. Assisting organizations develop industrial parks is a core component of ESD and helps us to recruit companies aswell as grow businesses.
Lewis	Lyons Falls Main Street Program	$434,945	MAIN_ST	
Lewis	Lewis County Municipal Power and Renewable Energy	$45,000,000	NYPA	Existing and ongoing wind development projects in the North Country are experiencing interconnection issues because developers must construct transmission lines that run many miles to connect to the existing electrical grid. Lewis County, aware of the issue of interconnection, is looking to be proactive by developing a transmission line across the Tug Hill Plateau that will tie in with the existing Niagara Mohawk 230 kV Adirondack Line in Watson, NY. The construction of the Lewis County Transmission Line will invite future development to the area and those developers will then lease transmission space from Lewis County, rather than construct their own lines. This project will be developed over a two-year period and in three phases: ? Phase I will be the complete design of the future 15-mile (approx.) transmission line, including location and capacity. Lewis County is prepared to work with consultants on determining the best location across the plateau for this project. ? Phase II will be the establishthe region and state energy officials, it is estimated that the total cost of this project will be approximately $45 million. Outcomes: 1. increased energy transmission space 2. increased wind development jobs (approx. 200 during construction and 80 thenal renewable energy production in NYS.
Lewis	Geothermal heating project	$360,000	NYSERDA	The $360,000 will cover the tax payer portion of a geothermal heating project at Copenhagen Central SD. The geothermal heating will allow the district to save an approximate $2.2 over a 15 year time period by not relying on fuel oil. This would save numerous teaching jobs and programs at our school district.
Lewis	Tug Hill Plateau - Electric Transmission Line for Wind Power Development	$45,000,000	NYSERDA	
Lewis	Lewis County Environmental Education and Recreation Center	$17,000,000	OPRHP	The Lewis County Agricultural Society, County of Lewis, Village and Town of Lowville, Lewis County BOCES, Lowville Academy and Central School, Pratt-Northam Foundation, Adirondack Mennonite Camping Association and the Lowville Little League Association have partnered in the proposed development of a community recreation and environmental education area in the center of Lewis County. The park will offer recreational area for residents of Lewis County and will provide valuable space for agricultural education programs in local schools. The plans call for improved and additional athletic field space, including a 400-meter track for the Lowville Academy track team. The land where the facility will be constructed is owned by the Agricultural Society. The project will include: 1. 400-meter track 2. Softball fields - 3 3. Baseball fields - 3 4. Restroom/shower facility - 2 5. Walking Paths - 4000 feet 6. Concession Stand - 2 7. Tree plantings - 120 8. Wetlands/Woodland Trails - 4765 feet 9. Picnic Areas (8)of the community and it is a goal of the community to showcase the region through these events.
Lewis	Lewis County Environmental Education and Recreation Center	$16,776,108	OPRHP	Project includes the construction of nine athletic fields, a 400-meter track, natural wetlands and woodland trails, picnic areas, agriculture program area with a classroom, and a 3,000 seat amphitheater for cultural events and area festivals.
Lewis	Village of Lowville Community Park	$412,356	OPRHP	The proposed project will offer walking paths for residents and an improved setting for local events.

Livingston	NYSARC	$9,100,000	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings and equipment. This proposal is for contruction of a school building.
Livingston	ALLEN'S CREEK	$1,000,000	DEC	We propose to remediate the erosion and flooding issues Allen's Creek is currently imposing on a residential section of our Village. In the past 6 years an inordinate amount of runoff water has been channeled into Allen's Creek; during periods of thawingand heavy rains what used to be a creek is now a river. It runs downhill from the Township into the Village, severely eroding its banks, often overflowing and flooding the surrounding residential properties. We propose to construct erosion resistant banks, levees and other infrastructure deemed necessary to solve this problem.

The project involves the improvement a section of the Genesee valley Greenway, a recreational Rail-Trail owned by New York State and operated by New York State Parks andthe NYS Department of Environmental Conservation. The project is an improvement of an at-grade railroad crossing, enhancing trail use by hikers, bicyclists, and snowmobiles.
Livingston	Retain 200 jobs, add 100, Dansville, NY	$2,400,000	DOT	Project #2 Retention of 200 Jobs and The Creation of 100 New Jobs ? Railroad Infrastructure Project Description: In 2003, Foster Wheeler Energy Corporation closed its 56 acre, 550,000 square foot manufacturing facility in Dansville. Two years later, thefacility reopened under local management with two ?green technology? businesses together employing 200 and growing. One of the growing companies, American Motive Power, is engaged in the rebuilding of railroad locomotives to make them more fuel efficientand compliant with new federal Clear Air standards. The lifeline for these Dansville companies is a 13 mile segment of the Genesee & Wyoming Railroad. The Issue: Last year, a derailment caused AMP to lose one of its most lucrative contracts. The Railroad recently notified the companies that $100,000 in emergency repairs needs to take place before July or the line will shut down placing most of the 200 jobs at risk. The rail line needs to be rebuilt. Unless American Motive Power can receive locomotives,ations to restore the line to a 40 mph line. The cost is $2.5 million. How Quickly Can Work Be Started and The Jobs Created: Since detailed engineering has already been completed, the project could be put out to bid within three weeks of project approvalve Power and LMC Power Systems are businesses that enable its customers to save energy and clean the environment. LMC is part of the demand side power management plan for New York City. Both companies have excellent growth prospects. The Risk: The condit

Livingston	Morris Road Bridge over McMillan Creek Replacement	$513,000	DOT	
Livingston	Mudville Road Bridge over White Creek Rehabilitation	$171,000	DOT	
Livingston	Genesee & Wyoming Railroad, Livingston County, Dansville Village to Mou	$2,800,000	DOT	Genesee & Wyoming Railroad, Livingston County, Dansville Village to Mount Morris Village: This project would involve the repair and replacement of ballast, rail, ties and other items of the industrial track from the Village of Dansville to the Village ofMt. Morris. The project is necessary to support rail shipments (inlcuding rehabilitated locomotives and other products) from American Motive Power (AMP) and LMC industries in the Village of Dansville. The current line is experiencing de-railments and rail traffic can only proceed at about 10 MPH. As a result, special rail handling charges are being assessed to the industries, making it uneconomical for them to operate. It will be upgraded to 40 MPH. AMP employs 200 people in Dansville and they are threatening to leave if this is not taken care of. The Livingston County Industrial Development Agency would sponsor this project that would benefit three companies with a total employment projected to achieve 300 in Dansville. It would also guarantee railanagement required by the NYPSC of large electrical users in the downstate area. ESD fully supports this project because it is critical to the continued operations of several important industries in the Dansville area (several hundred jobs). It would alrvice to other sites along the line, including a state ""Build Now"" industrial park owned by Livingston County IDA. Of course there would also be construction jobs and investment resulting from the activ

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Livingston	Livonia Gateway Industrial Access Road Project, Livingston County, Town c	$4,000,000	DOT	Livonia Gateway Industrial Access Road Project, Livingston County, Town of Livonia: This project is part of a 4.5 mile industrial highway bypass connecting Routes 15 and 20A. $4 million in funding in Multi-Modal funding was provided by DOT to construct the bypass. However there are other costs that are required to make the project a reality, including utility line relocations/extensions (water, sewer, gas and electric) and also a overhead railroad bridge. These obstacles have impeded DOT from approvingthe Multi-Modal funding and undertaking the project. The Town of Livonia has approved $15,000. There is a new $2 million grain elevator used by Perdue operating in this area. The intermodal trans-shipment Perdue facility will be hampered by these transportation limitations. This project has already been recognized (by virtue of the State funding commitment) as an important multi modal project for rail to road transshipment. A new $2 million grain elevator used by Perdue (its first facility in NYS) openupport an existing ag business in the area. It not only has direct employment implications at Perdue, but also indirect at the local farms that utilize it for their own operations.
Livingston	RAW WATER LINE	$3,439,000	DPS	Project is to replace our circa 1910 transmissio line. We have experienced breaks on this line within the last two years, indicating project is a high priority to avoid major disruption in water srvice to multiple surrounding communities and industries,especially American Rock Salt and Seneca Foods. The existing line runs from Silver Lake, is 10 inch cast iron and needs to be replaced with 12 inch PVC. Funding will enable our rural community with a median income of $31k, to offer an affordable water supply to our current users as well as attract new development in our shovel ready Industrial Park and Empire Zone.
Livingston	Pump Station Mod., Sewer Rehab, Treatment Plant Rebuild/EXP (SSO)	$3,300,000	EFC	
Livingston	Route 39 Water Improvement Project	$600,000	EFC	The Town of Avon is requesting funding to extend public water along portions of Avon-Geneseo Road (Route 39) and Hogmire Road. Residents in this area are plagued by private well supplies that produce limited quantities of very poor quality water. The pro
Livingston	Woodsville Water District	$600,000	EFC	The Town of West Sparta is requesting funding to create its first public water supply area. Residents in the Woodsville area are plagued by private well supplies that produce limited quantities of very poor quality water. The project will eliminate a severe health threat to residents who must rely on wells that are contaminated with Total Coliform and E. coli bacteria. Tests of water samples taken from residences in this area in March 2008, report that two-thirds (66.7%) of the wells tested positive forTotal Coliform. In addition, 20% of the wells are contaminated with E. coli. Water supply is also a problem as many of the wells in this area frequently run dry. This project is presently the Town?s highest priority community development need.
Livingston	V/Caledonia-Water&Drainage Improvements	$1,330,000	EFC	V/Caledonia-Water&Drainage Improvements

Livingston	100 new jobs at Kraft, Avon NY	$1,900,000	ESD	Description: Kraft Foods is in the final decision making stage to locate another production line of Oscar Mayer Lunchables to Avon or another plant in Pennsylvania. The Avon plant, Livingston County?s second largest private sector employer, already produces Cool Whip dessert topping and Lunchables. Empire State Development and Livingston County have already submitted incentive proposals. Sewer rates are a serious deterrent. The Issue: Under a 30 year agreement between Kraft and the Village of Avon, Kraft pays the Village for 80% of all capital costs of the Village sewage treatment plant. Kraft pays nearly $500,000 a year in sewer charges ? an amount due to increase significantly due to the need for replacement of original process equipment going back to the 1960?s. The Solution: The Village of Avon has offered to Kraft to immediately suspend Kraft?s 2009 payment to the Waste Water treatment plant capital reserve fund. They have also offered to suspend Kraft?s payments into the future if the Village cate treatment digester and $950,000 for the Influent Grit Removal System. How Quickly Can The Work Be Started And The Jobs Created: Kraft has indicated that if Avon were selected, the process to begin hiring 100 new employees would happen immediately. Thewould be operational by summer. The Risk: If Kraft does not select Avon, the request will be withdrawn. If Kraft selects Avon, 100 new jobs at Kraft would be created at Kraft and additional construction jobs at the Village STP.

County	Project	Requested $	State Agency	Additional Detail
Livingston	Barilla	$900,000	ESD	A New Manufacturer to New York State Exceeds its Growth Projections and Continues to Expand and Add Jobs ? Multi Modal Infrastructure Project In 2006, the largest pasta company in the world, chose Avon, NY to locate its second US manufacturing plant on aBUILD NOW NY ?shovel-ready? certified site after passing over 54 locations in thirteen States. The company has already exceeded its 2010 job creation and investment projection. The $100 million factory and distribution center employs 125 and continues to expand and hire as this is written. The Issue: Part of Livingston County?s success in attracting Barilla was its commitment to construct $3.3 million of required infrastructure for Barilla within 9 months. We successfully fulfilled that promise to Barilla however, because New York State could not move at the same speed, we have been told the County is not eligible for $907,000 in NYSDOT pledged (by Empire State Development) Industrial Access Program reimbursements. Unless corrected, Livingston CountyThe Solution: Sufficient funds were available in the NYSDOT Industrial Access Program budget to commit to this project however, IAP rules cannot be met on a design-build project. IAP requires plans to be approved, permits to be obtained and State Controion to be completed before work can begin. As of this writing, we still do not have a contract with NYSDOT! Recovery funds or other State funds need to be substituted for IAP funds so the County can be reimbursed as originally planned. How Quickly Can th
Livingston	Multi-Tenant Incubator Facility, Livingston County, Town of Geneseo	$2,500,000	ESD	Multi-Tenant Incubator Facility, Livingston County, Town of Geneseo: This project includes the construction of a 20,000 sq. ft. multi-tenant business incubator facility where micro-enterprises can start-up and be nurtured. It will be located at a site inthe Town of Geneseo. The operation would help clients from the existing regional Business Alliance that operates in Livingston, Wyoming and Orleans Counties. SUNY Geneseo would also continue to provide technical support. The establishment of such a facility is the missing component of a 20-year economic development plan for small business development in Livingston, Wyoming and Orleans Counties. Other plan components (Microenterprise Instruction, counseling, loan fund and ongoing technical assistance)have been ongoing for years with success. Through a multi tenant business incubator facility, promising entrepreneurs and young businesses can be nurtured into successful businesses that can be located in one of the three industrial parks owned and operaalization in these areas. This is an important community development component to the rural counties in the Region. A physical facility is needed to support the incubation and training of these businesses.

County	Project	Requested $	State Agency	Additional Detail
Livingston	FIRE HALL	$3,400,000	OHS	Project is to replace our aging structure with a new one. The current building has exceeded its life expectancy and barely meets current standards. It is unable to house the equipment we possess, and we are forced to house trucks off site due to not enough, and not long enough bays. The building is energy inefficient, needs a new roof and is located at one of the busier intersections in the Village. We have been mandated to resolve these issues and the building compromises the safety and efficiency of our firefighters. We propose to build a new fire hall with larger bays on a new site to solve all of the above problems as well as have the ability to accommodate the dimensions of potential new trucks.

County	Project	Requested $	State Agency	Additional Detail
Madison	Madison County, Road projects	$5,300,000	DOT	Madison County, Road projects There are several federal aid eligible roads ready for reconstruction. They are Elm Street, Fabius Road, Kenwood Ave, New Boston Street, Roberts Street, and Upper Lenox Ave with a combined total length of approximately 13.0miles. The cost of in-place recycling of the base material and application of a 2-inch hot mix asphalt top course is approximately $150,000 per mile. Addition of necessary drainage work would bring the total cost to approximately $2,000,000. An additional $2,200,000 in county road projects previously planned for 2009 construction season are in jeopardy due to reduction in state funding and local revenues. Another project is located at Canastota Business Park where road extensions are needed at an estimated cost of $1,000,000. Necessary upgrades
Madison	Madison County, Utility extensions	$2,700,000	DPS	Madison County, Utility extensions One project includes extending electric and natural gas service to additional locations in the Canastota Business Park ($700,000). A second project would provide increased electric supply to ESCO Turbine Technologies in Chittenango, NY. This company employs 302 people and has added 125 employees in the past five years. Its production in its high tech manufacturing operation is at maximum capacity due to electric supply limitation. The cost of this needed upgrade is $2,000,000. Infrastructure needed to accommodate business expansions
Madison	Municipal Water Supply Well	$1,100,000	EFC	At this time the Village of hamilton has two wells in close proximity to one another. If the water quality quality every deteriorated it would most likely affect the other well. We propose to develop a third well in another area of the village to help mitigate any water quality issues.
Madison	Bridgeport Area Sewer Initiative	$4,000,000	EFC	The Town of Sullivan proposes to extend public sewers from Bridgeport to the lakeshore areas between Hitchcock Point and Shackleton Point, as well as along Route 31 from Bridgeport to Lakeport. Presently, these areas are serviced by private septic systems on individual lots. The Madison County DOH has recognized risks posed by the inordinate use of septic systems in the Town, including concerns about the impact on Oneida Lake and other lakeside communities. Further, commercial and residential development in the area is hindered by the lack of public sewers. The Town has worked with its engineers to consider the feasibility of expanding its sewer system. Given the cost of the project and the size of the tax base, it is cost-prohibitive for the Town togo forward without financial assistance.
Madison	Town of Sullivan	$4,000,000	EFC	Bridgeport sewer repairs
Madison	Bridgeport Area Sewer Initiative	$13,900,000	EFC	Bridgeport Area Sewer Initiative
Madison	Canastota Business Park	$500,000	EFC	Canastota Business Park
Madison	Village of Canastota Sewer Upgrades	$14,000,000	EFC	Village of Canastota Sewer Upgrades
Madison	Water system installations/extensions/upgrades	$3,600,000	EFC	Water system installations/extensions/upgrades
Madison	Village of Canastota Wastewater Treatment System	$14,000,000	EFC	Building of a new wastewater treatment plant - LETTER OF SUPPORT
Madison	Madison County, Sewer extension	$2,000,000	EFC	Madison County, Sewer extension - The Town of Sullivan is seeking funding for a Bridgewater Sewer Initiative to expand public sewers to the Hamlet of Bridgeport and the lakeshore areas between Hitchcock Point and Shakleton Point which are serviced by private septic systems. Development in this area is characterized by a high density of residential cottages and camps directly abutting Oneida Lake, and the Madison County Department of Health has identified the Hamlet of Bridgeport as an area with inadequate sewage and wastewater disposal systems. Necessary upgrades

Madison	Madison County, Ag - renewable energy park (ARE Park) / sewer	$3,961,000	EFC	Madison County, Ag - renewable energy park (ARE Park) / sewer ARE Park sewer connecting to the City of Oneida treatment plant to serve businesses n the park Infrastructure needed to be ""shovel-rea
Madison	Madison County, Ag - renewable energy park (ARE Park) / water	$4,445,000	EFC	Madison County, Ag - renewable energy park (ARE Park) / water ARE Park water public water supply to serve businesses n the park Infrastructure needed to be ""shovel-rea
Madison	Madison County, Sewer extensions	$28,400,000	EFC	Madison County, Sewer extensions Three sewer extensions utilizing existing excess treatment capacity are planned. Bridgeport Area Sewer Initiative ($13,900,000) will provide service for the only area on the south shore of Oneida Lake not served by sewers. Severe limitations for on-site systems exist in this area. Implementation within 90 days is feasible; Canastota Business Park ($500,000) sewer upgrades will connect additional business locations to the Canastota Treatment Plant; Village of Canastota Sewer Upgrades ($14,000,000) will replace aging sewer infrastructure and abate combined sewer overflows in the Village of Canastota that has a population of 4,500. Necessary upgrades
Madison	Madison County Water systems	$3,600,000	EFC	Madison County Water systems Two water system installations/extensions/upgrades are planned for existing business parks; one in Thrush Park in Cazenovia ($2,800,000) and one in Canastota Business Park ($800,000). Necessary upgrades
Madison	Wastewater Treatment Plant Sand Filter Rehab	$1,800,000	EFC	Replace three 23 Yr. old sand filters at the Village of Hamilton WWTP with newer technology. This project will require a pilot program to determine the type of system best suited for this WWTP. This project includes all equipment,, materials and labor tocomplete.
Madison	Biodiesel Feedstock Propagation & Oilseed Crush	$5,000,000	ESD	Innovation Fuels has been testing the cultivation of penncyress in New York State, which could be a significant biodiesel feedstock crop producing up to 50 million gallons per year. An oilseed crush facility would be developed and built to process the seed prior to biodiesel conversion of the vegetable oil.
Madison	Renewable Green Energy Project	$8,200,000	ESD	Renewable Green Energy Project
Madison	Canastota Business Park	$1,100,000	ESD	Canastota Business Park
Madison	Central New York Agri-Business Park	$20,000,000	ESD	The first of it's kind fully ""sustainable"" bioprocessing agricultural business park. All clean energy would be produced from maneur based and other feedstock and used for ag processing and manufacturing (waste to energy). Job Development, Tax Base, Renewable Energy and Carbon Footprint Tax Credits, and promoting NYS Ag Development is beneficiary with significant residual return. There is intent to leverage all ready existing interational technology transfer with international ag companies tintent uponpatenting the process for global impact. Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Madison	Madison County, Ag - renewable energy park (ARE Park)	$750,000	ESD	Madison County, Ag - renewable energy park (ARE Park) / site development - An Agriculture and Renewable Energy Business Park (ARE Park) is being proposed for the Town of Lincoln. The ARE Park is a new business park initiative by Madison County and the Madison County IDA. Several businesses are interested in locating at the site (exceeding 150 new jobs and capital investments of over $30,000,000). The site is very competitive on a cost basis because companies will be able to utilize excess heat and low cost power from a nearby landfill methane gas-to-energy plant (coming on line in February 2009). Municipal water and sewer lines to serve the park have been designed, with the anticipation of breaking ground in the spring of 2009. Land is in the processof being conveyed from the County to the IDA. Sewer line construction to the ARE Park is estimated at $4,445,000 to the City of OneidaÆs nearest existing line ; Water line construction via Onondaga County Water Authority (OCWA) is estimated at $3,961,000rvey, engineering and other soft costs for both water and sewer infrastructure. The property is already County owned, public right of ways are available for water and sewer line construction, the county has an existing agreement with Oneida for sewer serof that agreement is being favorably considered), and OCWA discussions are going very well from a technical perspective. Potential businesses identified include: Livestock Processing (value added: processing, marinating, pre-cooking, packaging, warehousi
Madison	Madison County Agriculture and Renewable Energy Park	$8,600,000	ESD	The Madison County Agriculture and Renewable Energy business park (ARE Park) is an initiative to build upon the County's roots of agriculture and value-added agriculture, along with areas of future growth including green energy production. With a historyof innovation in renewable energy including the first commercial wind farm in NYS (followed by two other wind farms in the County), research at Morrisville State College (MSC) on algae as a biofuel, MSC?s recent award of $2MM to build on our region's green collar work force, and finally, the recently constructed methane gas-to-energy renewable energy project at the Madison County landfill - the ARE Park vision is simply a continuation of our innovation. Excess heat and lower cost power will be major drivers for new industry - which are the primary and secondary products created at the development. Municipal water (21,200 lineal feet) and sewer (18,125 lineal feet) are primary infrastructure aspects of this request for funding.
Madison	Schools, Elementary and Secondary, CHITTENANGO CENTRAL SCHOOL	$120,000	NYPA	
Madison	Energy Efficieny Programs	$125,000	NYPA	Scada System: Oriskany Falls Substation, Eaton Substation, Fenner Substation
Madison	Energy System Upgrades	$2,700,000	NYPA	Energy System Upgrades
Madison	ESCO Turbine Technologies	$2,000,000	NYPA	ESCO Turbine Technologies
Madison	Farm and Home Energy Audits with Tune-up	$300,000	NYSERDA	Perform farm and home energy audits and install weatherization tune-up kits. (Reduction in energy consumption)
Madison	Energy Star Rebate	$100,000	NYSERDA	Offer rebate for energy star appliances and proper disposal of old appliances.
Madison	Programable Thermostat Program	$100,000	NYSERDA	Replace non-programable thermostats with programable thermostats.
Madison	Security Light Conversion	$100,000	NYSERDA	Replace mercury vapor lighting with more energy efficient and environmentally friendly LED lighting.
Madison	Energy Efficieny Programs	$50,000	NYSERDA	Home Energy Audits (with tune up kit)
Madison	Energy Efficieny Programs	$40,000	NYSERDA	Replace Mercury Vapor Lights Security lights with more energy efficient LED fixtures
Madison	Energy Efficieny Programs	$30,000	NYSERDA	Energy Star Electric appliance rebates: (water heater, refrigerator, dish washer, electric stove, AC etc.)
Madison	Energy Efficieny Programs	$24,000	NYSERDA	Programmable Thermostats

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
Madison	Madison County, Morrisville State College	$41,675,000	SUNY	Madison County, Morrisville State College - Morrisville State College is New York State's premier agriculture and technology college, with a culture of innovation. The college is known for its cutting-edge use of technology and programs focused on entrepreneurship. To enhance that mission, a key college goal is to enhance the physical environment of the campus. Toward that end, a number of ready to go projects have been identified. Summary of Morrisville State College Projects: Repair 4 Residence HallRoof Parapits $1,100,000; replace Residence Hall Fire Alarms $3,000,000; Stewart Hall Roof Replacement $175,000; Total Rehab Oneida Hall $5,000,000; Exterior doors 6 Res. Halls $250,000; Dairy Laboratory Roof Repair $50,000; Waste Water Plant Screw PumpRep $350,000; Condensate Room Replacement Central Heating Plant $175,000; South Circle Dr Repair $250,000; Rehab Admin Building HVAC $250,000; Bailey Hall Renovation $5,500,000; Bicknell Hall Renovation $3,800,000; Upgrade Athletic Field $5,500,000; Equi000; Install Biomass Boiler $6,000,000 Design is largely complete for many of these projects, there are no Right of Way issues, and the projects are could be scheduled for construction bid opening dates within a very short timeline. Many of these projecbenefits"" and will enhance energy efficiency. These projects are essential to help Morrisville achieve its goal of becoming a nationally recognized college of agriculture and technology. These upgrades are also required to help Morrisville handle gro
Madison	Madison County - Interoperable Emergency Communications System	$20,000,000	Unassigned	Contruction of 14 communications towers and associated support structures.
Madison	Madison County - Renewable Green Energy Project	$8,150,000	Unassigned	Development costs for a new Green business park (ARE) as well as an ARE Park sewer and ARE water supply.
Madison	Madison County- Sewer Treatment Plants	$28,400,000	Unassigned	Three sewer extensions - Bridgeport Area, Canostota Business Park and Village of Canostota
Madison	Madison County - Roads	$5,300,000	Unassigned	Reconstruction of several ""federal aid"" eligible r
Madison	Madison County Water Systems	$3,600,000	Unassigned	Two water system installations/extensions/upgrades.

County	Project	Requested $	State Agency	Additional Detail
Monroe	Integrated Science and Math Building	$29,000,000	DASNY	Construction of an integrated science and Math facility of approximately 88,000 gross square feet. The College expects to follow environmentally sound green principles in the construction of the facility, and endeavor to achieve Silver LEED status. Thisfacility will include classroom that will incorporate the latest teaching technology, science labs, research spaces, administrative support spaces, and group study areas. The project will have a long term impact on the community and allow the College tobuild on its well-established education programs and train much needed K-12 teachers in the fields of math and science. It will also allow the College to continue to expand our excellent health and human services programs and produce health care professionals in such fields as physical therapy, occupational therapy, and nursing. In addition to the educational program in these fields, Nazareth College operates clinics for people from the community who need physical, speech or creative arts therapy but no
Monroe	Campus Roadway Reconfiguration Project	$7,200,000	DASNY	The Campus Roadway Reconfiguration Project will provide an improved transportation plan throughout the college and focuses on getting pedestrians and traffic safely on and off the campus. Our recently adopted master plan includes a redesign of both theexisting roadways within the campus and the entrances from public roads onto the campus. The project envisions removal of existing interior parking lots and roads, replacing them with an open space network and pedestrian circulation system. The goal isto minimize vehicular access into the core of campus by moving the majority of parking to the exterior edge.
Monroe	Math/Science Facility	$30,000,000	DASNY	Nazareth College is planning the construction of an inteEstimated grated math, science and health building. The scope of this project is to construct a facility of approximately 88,000 gross square feet. The facility will include classrooms that will incorporate the latest teaching technology, science labs, administrative support spaces, group study areas, and campus community spaces. The project will have a long term impact on the community as well. It will allow us to train much needed K-12 teachersin the fields of math and science. It also will enable us to continue to produce health care professionals in such field as physical therapy, occupational therapy, and nursing.
Monroe	Campus Energy Efficiency	$1,300,000	DASNY	The purpose of this project is to reduce the campus energy use, and carbon footprint. This is a comprehensive approach which enables us to focus the effort at the greatest need and measure the performance.
Monroe	Campus Infrastructure Renewal	$450,000	DASNY	The purpose of this work is two-fold. One to update the aging utilties and improve the campus image by burying the overhaed lines.
Monroe	Carpenter Hall Geothermal System	$1,700,000	DASNY	The project consists of updating the existing heating system to a state of the art geothermal HVAC system which will enhance the academic and instructional spaces. The current system dates back to the 1930s
Monroe	Cox Hall ADA & Building Envelope	$1,500,000	DASNY	Cox Hall is a signature building on the Roberts Wesleyan College campus housing the division of music and performing arts. The 20,000 square foot tudor style building was constructed in 1893 and the useful life of this building will be greatly enhanced by updating the entrances and restrooms to the ADA standard. The orginal build wood and stucco exterior will be replaced with a durable, energy efficiencyexterior insulation and finish system that will preserve the period style of the building.
Monroe	Miner Hall Geothermal System	$1,100,000	DASNY	This four story 26,000 square foot mens dorm built in 1968 is being updated including the heating system. The new geothermal system will provide a cost effective and enviromental friendly HVAC system to complete this dorms modernization.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Monroe	Resident Hall Sprinkler system	$1,500,000	DASNY	The purpose is to improve the dorm safety by installing approved sprinkler systems through out all of the non-sprinklered dorms.
Monroe	Golisano Institute for Sustainability	$1,070,000	DASNY	The Golisano Institute for Sustainability at RIT will enable New York State to be at the forefront of the economic opportunities associated with a sustainable green/clean tech economy. The initiative builds on RIT?s proven track record in working withmanufacturing companies to improve their product performance, manufacturing processes and productivity, and its globally recognized expertise in remanufacturing, product reuse and recycling technologies. To date, university efforts have led to increasedrevenue for participating companies and created or protected nearly 3,000 high-paying jobs. No other region in NYS is as well situated as Rochester to become the global hub of the green economy. RIT is currently partnering with with GM and Delphi, bothof which have a significant presence in the region centered around alternative energy. A recent report by the Council on Competitiveness emphasized the tremendous economic potential of sustainability as a key competitive differentiator. Of particularinfrastructure to support the green economy. Timing is of the essence in capturing this opportunity. For example, the European Union recently announced a $1.28 billion Fuel Cells and Hydrogen Joint Technology Initiative that is aimed at acceleratinghese technologies, and to help speed their commercialization by two to five years. The economic potential of these industry markets is enormous. A recent analysis conducted by A. T. Kearney Associates, and summarized by the NY Academy of Sciences, note
Monroe	Clinical and Translational Science Building	$7,600,000	DASNY	The Clinical and Translational Science Building (CTSB) at the University of Rochester will serve as an integrated home for clinical and translational research at the Medical Center and build on the Medical Center?s long and rich history in this field. The new $76 million facility will be 185,600 square feet and is the centerpiece of a $500 million strategic investment in research, clinical care, and education that the Medical Center will make over the next several years. Coalescing clinical and translational investigators and research infrastructure in one facility will accelerate the process of harnessing scientific breakthroughs to improve health. Collectively, these programs will make the Medical Center a more effective and efficient clinical science enterprise and a stronger competitor for government and private research dollars. The building will also house the Upstate New York Translational Research Network ? a research consortium consisting of the region?s 10 major biomedical research instit
Monroe	Pediatric Replacement and Imaging Sciences Modernization (PRISM)	$262,000,000	DASNY	The Pediatric Replacement and Imaging Sciences Modernization (PRISM) project is a $262 million, six-story clinical expansion and renovation at the University of Rochester Medical Center that would increase our adult and pediatric inpatient services and improve our diagnostic and interventional imaging services. PRISM is the centerpiece of the Medical Center?s strategic plan to invest $500 million over the next several years in new research and patient care facilities, technology and strategic recruitswith the aim to become one of the top 20 academic medical centers in the nation. Just as the previous strategic plan propelled growth and contributed to the University?s ascension as the region?s largest employer, the current plan will strengthen the Medical Center?s role as an engine for local economic development ? by growing our patient care services, research programs, and consequently, our intellectual capital to develop new technologies and companies. The Center for Governmental Research estimate

County	Project	Requested $	State Agency	Additional Detail
Monroe	Warner School of Education and Human Development Building	$21,500,000	DASNY	The Warner School of Education and Human Development needs a new $21.5 million, 50,000 square foot state-of-the-art facility that will serve as an academic home for its faculty, staff, students and the many community groups they partner and support in the region. According to the Center for Government Research, the direct and spillover impacts from the construction of this project will total almost $20 million in labor income, result in the creation of 460 construction jobs, and 130 permanent jobs in the community.
Monroe	Anthony Jordan Health Center	$500,000	DASNY	The Anthony Jordan Health Center has been asked by the community to expand our services to provide include an Adolescent Health Center. This a 2500 sq. FT. project of new construction added on to our current facility. This would add 8 new exam rooms and3 counciling rooms for mental health. It would provide for OB/Gyn, family planning, primary care and mental health/chemical dependency services for children age 12-22. We have raised 50,000 dollars to date towards the project. We expect to hire all levels of jobs from facilities/maintence, reception, nursing, physician and councilors and case managers. We have been developing this project for 1.5 years and have raised $50,000 so far.
Monroe	University of Rochester Clinical and Translational Science Building	$25,000,000	DASNY	Construction of Clinical and Translational Science Building at the University for translational research and to bring cutting-edge medical care to the region.
Monroe	University of Rochester Kendrick Road/I-390 Interchange project	$0	DASNY	Will provide direct access from I-390 to the University via a Kendrick road ramp access and interchange.
Monroe	University of Rochester Pediatric Replacement and Imaging Sciences Mode	$0	DASNY	Six story clinical expansion and renovation to increase adult and pediatric inpatient services and improve dianostic and interventional imaging services.
Monroe	Nazareth College integrated science and health building	$25,000,000	DASNY	construct an 88,000 sq ft building to include classrooms, science labs, research spaces, group study areas and administrative support spaces.
Monroe	A new building for Warner School of Education and Development	$0	DASNY	Improve the quality of our teaching
Monroe	Public Safety Laboratory Project	$30,000,000	DASNY	Public Safety Laboratory Project
Monroe	Pediatrics & Community Visitation Center Project	$8,600,000	DASNY	Pediatrics & Community Visitation Center Project
Monroe	Sheriff s Consolidated Headquarters Project	$7,062,000	DASNY	Sheriff s Consolidated Headquarters Project
Monroe	Hall of Justice Family Court Room Renovations	$2,760,000	DASNY	Hall of Justice Family Court Room Renovations
Monroe	Jail Sprinkler Project	$2,000,000	DASNY	Jail Sprinkler Project
Monroe	Clinical and Translational Science Building	$0	DASNY	Clinical and Translational Science Building
Monroe	Pediatric Replace and Imaging Sciences Mod and Warner Sch	$0	DASNY	Pediatric Replace and Imaging Sciences Mod and Warner Sch
Monroe	St. John Fisher College safety & Security Infrastructure Project	$2,593,000	DASNY	St. John Fisher College requests a $2,593,000 grant in support of a $4.2 million infrastructure project that will enhance the safety and security for the thousands of students, faculty, staff, alumni, and community members who visit campus each day. Approximately $1.9 million in grant funds will support the construction of a loop road, pavement, fencing, and sidewalks that will direct traffic to the perimeter of the campus and eliminate potentially dangerous pedestrian and vehicle intersections near academic and residential buildings. The diversion will create a safer pedestrian environment and better traffic flow for the College and the adjacent state road and community. The shovel-ready project will also include the development of collection and detention areas that will strengthen the College?s capacity for storm water management. Approximately $630,000 in grant funds will support the purchase and installation of critical public safety and security features, including fire sprinkler systems, a fireo the infrastructure project.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Monroe	Clinical and Translation Science Building	$25,000,000	DASNY	This shovel ready project will help position the University and upstate New York as a national leader in translational research, bring cutting-edge medical care to the region's residents, and serve as a catalyst for substantial economic growth.
Monroe	City of Rochester Revitalizing urban parks/Genesee River Crossroads Park	$2,200,000	DASNY	Structural repairs to the plaza deck/roof.
Monroe	University of Rochester Pediatric Replacement and Imaging Sciences (PRI	$100,000,000	DASNY	Six-story clinical expansion and renovation that would increase adult and pediatric inpatient services and improve diagnostic and international imaging services
Monroe	University of Rochester Warner School of Education and Human Developm	$8,000,000	DASNY	University of Rochester Warner School of Education and Human Development, Monroe County: The Warner School of Education and Human Development building will be 50,000 sq. ft. It will be the academic home for its faculty, staff, students and the many community groups that they partner with and support in the Region. The construction of this building will cost approximately $21.5 million and result in the creation of 130 permanent jobs and 460 construction jobs. The U of R Warner School of Education and Human Development facility is an important academic home for the faculty, staff, students and community groups. The project is important for effective administration and communication of the faculty, staff, students and community groups on the Medical Center Campus. The project will create 130 permanent jobs and 460 construction jobs.
Monroe	Health Care Clinic Renovation	$375,000	DASNY	Dollars are needed for renovations for existing Article 28 health care center for adolescents (12-25 years of age) within organization that holistically serves their needs. Over 4000 young adults utilize the services annually. In addition to health care,GED Preparation/Workforce Development, Counseling and Substance Abuse Prevention services are provided
Monroe	Campus Building Renewal Project	$13,489,500	DASNY	St. John Fisher College requests a grant of $13,489,500 in support of a campus renewal project that will improve the physical condition of buildings. A 2009 Building Audit and Projected Capital Requirements Report revealed that fifteen of the twenty-onemajor buildings on campus require interior and exterior renovations, new heating and ventilation systems, and/or electrical enhancements. The building list includes eight dormitories, five academic and administrative buildings, the library, and a recreational complex. Correcting the infrastructure deficiencies will extend the useful life of assets, reduce maintenance and utilities costs, as well as improve the appearance and functionality of the buildings and campus for students, faculty, staff, and visitors.
Monroe	Campus Building Renewal Project	$13,489,500	DASNY	St. John Fisher College requests a grant of $13,489,500 in support of a campus renewal project that will improve the physical condition of buildings. County	Project	Requested $	State Agency	Additional Detail
Monroe	Rochester - Charlotte/Summerville Pier Safety	$1,000,000	DEC	From the Army Corps of Engineers - Repair and ensure surface integrity of concrete walkway on West pier; install, repair or replace railings on both East and West Piers; repair/replace accessible ladders along both sides of west pier; safety improvements- pier ladder replacements, basic lighting and stanchion repairs
Monroe	Rochester - Mount Hope Site	$1,000,000	DEC	Environmental remediation of existing riverfront parkland along the Genesee River in downtown Rochester to facilitate adjacent riverfront development.
Monroe	Rochester - Orchard-Whitney Brownfield Site	$200,000	DEC	To help finance the environmental cleanup of a four acre Brownfield Site located at 354 Whitney Street and 415 Orchard Street.
Monroe	Orchard-Whitney Brownfield Site	$200,000	DEC	To help finance the environmental cleanup of a four acre Brownfield site located at 354 Whitney Street and 415 Orchard Street.
Monroe	Seneca Park Zoo Animal Life Support Improvements	$1,400,000	DEC	Seneca Park Zoo Animal Life Support Improvements
Monroe	Charlotte (West)/Summerville (East) Pier Safety Enhancement	$1,000,000	DEC	Charlotte (West)/Summerville (East) Pier Safety Enhancement
Monroe	423-435 Mount Hope Site Environmental Remediation Project Erie Harbor (	$100,000	DEC	423-435 Mount Hope Site Environmental Remediation Project Erie Harbor on the Genesee River
Monroe	City of Rochester Revitalizing urban parks/425-435 Mount Hope Site Envirc	$1,000,000	DEC	Environmental remediation/petroleum corrective action of existing riverfront parkland along the Genesee River.
Monroe	City of Rochester brownfields remediation/Orchard-Whitney brownfield site	$200,000	DEC	Environmental cleanup of 4 acre brownfield site containing hazardous waste/petroleum contamination.
Monroe	Monroe County Mill Seat Landfill Gas Generation Phase II, Monroe County	$494,937	DEC	Monroe County Mill Seat Landfill Gas Generation Phase II, Monroe County: The proposed project will construct a gas to energy plant (green energy) at the Mill Seat (Riga) Landfill. There is adjacent industrial land that can be developed and it is the longterm plan to sell this energy to these prospective new companies. This project is important to reducing the methane emissions at the Mill Seat Landfill. 24 jobs will be produced initially, with more jobs resulting from the eventual sale of energy to nearby indusrial tenants. The project will produce green energy (electric) with the landfill gas generators. It will improve the environment and eventually produce energy that will be sold directly to expanding companies near the landfill.
Monroe	Photec Industrial Park, Monroe County, City of Rochester	$1,000,000	DEC	Photec Industrial Park, Monroe County, City of Rochester: The City is in the process of making this former 12.7 acre brownfield site ready for new industry. Industrial sites in the City are very limited, given land availability and development constraints. While some of the improvements have been made, costs and available funding has been limited, inhibiting the completion of the project. The project involves the demolition of a contaminated structure, environmental clean-up/remediation, construction ofaccess roads and installation of other utilities to make it shovel-ready. It is projected that the project will create 200 new full time jobs (at 4 private industries), primarily in the technology and advanced manufacturing sectors. There will also be up to $20,000,000 worth of private real estate investment, contributing much needed real property taxes to the City. The justification of the project is the creation of a much-needed industrial park within the City, thereby making sites available to expathe Park shovel-ready. The Park will benefit the City by adding much needed real property taxes, purchase of other materials and goods, the creation of gainful employment for City residents, etc. The site is fully engineered, permitted and ready to go.oposed project for a number of reasons as follows: the project is fully engineered, permitted and ready to go, there is a gap in funding necessary for the City to complete the project, the City's limited funding has inhibited completion of the project, i

Monroe	F. Douglass Apts.	$4,212,067	DHCR	LIHTC 9%
Monroe	ARCHES (Attic Re-insulation to Create Home Energy Savings)	$11,000,000	DHCR	ARCHES (Attic Re-insulation to Create Home Energy Savings) is a shovel-ready program sponsored by IBP that reduces monthly energy bills for low-income NY homeowners, creates NY jobs, and conserves energy by re-insulating attics. According to a 2007 McKinsey & Co study, improved building insulation represents the single most cost-efficient greenhouse gas abatement measure available with calculated economic benefits far exceeding associated costs. Addressing attic improvements (before more-expensive, longer-payback improvements such as windows and HVAC) accelerates energy bill savings for low-income citizens who need it most. In each home, the need is quickly diagnosed and documented, proper installation is easily validated and energy savings is immediate. IBP, an Ohio-based company with branches in New York state, has available equipment and a scalable infrastructure to hire, effectively train and provide immediate work for job-seekers. ARCHES is set to improve attics at a rate of 2000 homes per year p
Monroe	Revitalizing Vacant Properties with Clean Energy Systems	$10,000,000	DHCR	Revitalizing Vacant Properties with Clean Energy Systems
Monroe	YWCA Supportive Housing Initiative	$7,600,000	DHCR	Development of 14 new units of supportive, affordable housing and preservation of 96 existing units of emergency, transitional, and SROs to increase housing stability. Application submitted to DHCR in Feb. 2009.
Monroe	City of Rochester green jobs/clean energy projects/Revitalizing Vacant Prop	$1,500,000	DHCR	Improvement of vacant single family homes that can be transformed to sustainable owner occupied properties, and implement clean energy systems in both underutilized mixed use properties and new construction projects.

County	Project	Requested $	State Agency	Additional Detail
Monroe	Upstate NY Go Local	$511,000	DOH	This project will help consumers find quality health information and local healthcare agencies that they can contact for help. It will create a searchable database called Go Local Upstate NY that lists healthcare providers and health agencies in all thecounties north of Westchester County. A person searching the web for health information in the National Library of Medicine Medline Plus for ?diabetes?, e.g., will find full text information and the database of local providers and a ?button? to click to?Go Local?. Entering his/her zip will lead to a list of health agencies that can help with that disease. Twenty-six states already participate in NLM?s Go Local. This project will add a large part of NYS. RRLC is coordinating the project for 7 Library Councils in upstate NY. Staff to be hired for this project include: 1 person in each of the 7 regions to collect information about health care providers, ensure its accuracy, enter it into the database, and update the data on a regular basis; a part time eer help, thus delaying implementation for several years. Stimulus funding would make it possible to hire people in each region and complete the project in one year.
Monroe	Rochester General Hospital Campus Expansion Project	$50,000,000	DOH	The Rochester General Hospital Campus Expansion Project includes the construction of a new six-story building, adding 36 medical medical/surgical beds, restoring 34 beds, constructing space to allow for a 90% complement of private rooms, and creating anAmbulatory Services Pavilion and accompanying parking area that will provide a centralized environment for patients that is convenient and accessible. We will also implement a road construction project to aid in traffic mitigation around the hospital. The goal of this project is to mitigate traffic congestion on Carter Street between the hospital entrance and Rt. 104.
Monroe	Newark-Wayne Community Hospital Emergency Department Renovation	$10,000,000	DOH	Newark-Wayne Community Hospital, an affiliate of Rochester General Health System, is seeking $10 million to provide for construction that will result in adequate square footage for clinical care; patient privacy and support services; appropriately sizedfunctional areas which meet current hospital standards; and appropriate room designs to assure the safety of psychiatric patients and the security of hospital personnel.
Monroe	Pediatric Replacement and Imaging Sciences Modernization (PRISM)	$0	DOH	This is a six-story clinical expansion and renovation at the University of Rochester that will increase the adult and pediatric inpatient services, and improve the diagnostic and interventional imaging services.
Monroe	Anthony L. Jordan Health Center	$1,107,750	DOH	Child and Adolescent Comprehensive Primary Health Care Expansion
Monroe	PRISM	$0	DOH	Extpand our research and patient care capacity
Monroe	PRISM	$0	DOH	a six-story clinical expansion and renovation that would increase adult and pediatrric inpatient services
Monroe	FMAP	$0	DOH	Increace in funds to provide relief to the severe cuts currently proposed in VNS.

County	Project	Requested $	State Agency	Additional Detail
Monroe	University of Rochester PRISM Project, Monroe County	$100,000,000	DOH	University of Rochester PRISM Project, Monroe County: The U of R proposes to construct a new $262 million Pediatric Replacment and Imaging Sciences and Modernization Facility at the medical campus. It will be a 6 story clinical expansion and renovation that will increase the adult and pediatric inpatient services and improve the diagnostic and interventional imaging services. It is the Medical Center's strategic plan to invest $500 million over the next several years in new research and patient care facilities, technology and strategic recruits. It will add approximately 460 new jobs and $90 millioin in annual labor income. There will also be an average of 3,116 direct construction jobs and an additional 2,343 indirect spill-over jobs through 2015. The U of R is the leading employer in the Region. This project is another example of their innovative approach to medicine, research and cutting edge technology. The project will create numerous spin-off businesses and benefit the region in innumberable wad placement, etc. The project will create 460 new jobs, 3,116 direct construction jobs and 2,343 indirect spillover jobs through 2015.
Monroe	Wireless Medical Records, Point of Care, and Nurse Call	$200,000	DOH	Establish wireless network infrastructure and implement Electronic Medical Records, Point of Care, and Nurse Call system for Assisted and Independent Living Seniors for approximately 150 residents, currently supported by paper-based records and antiquated call system.
Monroe	The Commitment Project	$60	DOH	The Commitment Project - A public awareness project on African American Health Disparities in the greater Rochester area. The central idea behind the Commitment Project is to utilize local community leaders in short 60-90 seconds PSA's focusing on well documented African American health disparities. A special focus is placed on illnesses for which early diagnosis is both possible, and has been proven to reduce the likelihood of more serious complications developing. The goal of each PSA is to advise Rochester African American community of the existence of these diagnostic tools, and to encourage them to see a doctor in order to assess their risk for these illness. Each PSA will also direct individuals to local clinics where free and/or low-cost healthcare is available. Rochester New York will be the launching pad for this project, our goal is to make is nation wide.
Monroe	University of Rochester - Pediatric Replacement and Imaging Sciences Mo	$100,000,000	DOH	Six story clinical expansion and renovation that would increase adult and pediatric inpatient services, and improve diagnostic and international imaging services.
Monroe	Rochester ReServe	$30,000	DOL	Create a new temporary employment program to serve local nonprofits or small businesses. The program will provide older workers (age 50+) to serve as short-term contractors, to provide high-level professional services not otherwise financially available.Projects will be a few months in length and closed ended, and will be in the fields of accounting, marketing, pubic relations, operations, computing, etc. The program will work with the organizations to develop a job description, and will secure available workers to meet that need. Organizations will be charged a set hourly fee for the contractors' efforts. That fee will be used to cover the cost of the worker, including salary, benefits, payroll fee. Benefits to the partners are: reduced costs, finding screened and qualified short-term contractors, and a way to complete short term projects. Benefits to the contractors are: ability to individually set hours and effort, small salary, statutory benefits, and ease of securing the next assignment. Request

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail

County	Project	Requested $	State Agency	Additional Detail
Monroe	Bus Depot, Monroe County, City of Rochester	$700,000	DOT	Bus Depot, Monroe County, City of Rochester: NY Trailways is currently a tenant in Midtown Plaza in downtown Rochester. Midtown is being demolished to make way for a new office complex. As a result NY Trailways must vacate the site by the summer of 2009.Trailways provides an important transportation resource for the City and nearby communiites in Upstate. Collectively with Greyhound they provide 20 daily inter-city departures/arrivals at the Midtown Terminal. Over 500,000 passengers pass through the Rochester Terminal each year. It is important forTrailways and the City that they remain centrally located in the City and region to provide this important commuting service to the many city residents, through passengers and the many area college students.The proposed project would relocate them to a temporary location, until a new proposed downtown intermodal center is constructed and available in 2014-15. It would be located at 186 Cumberland St. It is the only viable location for this operation. The stion of the Bus Terminal is a crucial transportation and economic development project to not only the City, but also the businesses, colleges and residents in the Region. Until the new Intermodal Center is constructed in downtown (funding is already commot be a permanent home for NY Trailways. The proposed location presents the only option (186 Cumberland St.). The project will retain permanent jobs; insure that residents, businesses and colleges will have access and will create construction jobs. The p
Monroe	Artwalk 2, Monroe County, City of Rochester	$3,300,000	DOT	Artwalk 2, Monroe County, City of Rochester: The proposed project would construct an extension to the successful Artwalk urban art trail, make pedestrian safety improvements at East Ave and N. Goodman St. and construct a public gateway plaza adjacent tothe Rochester Museum and Science Center. The project will create 61 direct jobs, 136 indirect jobs and induce an additional 106 jobs. The proposed project would make safety improvements for pedestrians and travellers. It would also promote tourism and economic development along the Artwalk Trail, as well as at the Rochester Museum and Science Center. The proposed project enhances the toursim and economic development activities in the City of Rochester (Artwalk, shops along the Trail and the RochesterMuseum and Science Center).
Monroe	Ridgefiled Drive Reconstruction	$850,000	DOT	Reconstruction of 2,200 linear feet of Ridgefield Drive in the Village of Churchville. This was installed in the 1960's and is in dire need of reconstruction.
Monroe	Sanitary Sewer Rehabilitation	$4,000,000	EFC	The Village of Scottsville WWTP services both the Village and Town of Wheatland. Planning for future growth includes correcting I&I problems and building for expansion. Phase 1 has been identified and prioritized by our 2008 "Inflow and Infiltration Repo
Monroe	East Maple Avenue Emergency Sanitary Sewer Project	$710,000	EFC	This project will replace 1,410 linear feet of a 24 inch sanitary sewer main trunk line including 4 manholes and tying in 29 laterals serving multi-municipalities. This sanitary sewer is over 100 years old and is failing on a regular basis. The project start date has been accelerated as an emergency due to a significant incident on January 22, 2009. The replacement began on February 10, 2009.
Monroe	WWTP Centrfurge	$400,000	EFC	Install centrifuge to relieve sludge disposal back log at WWTP. Drying beds do not allow for use in the winter months.This would provide for sludge removal 12 months a year, and would allow WWTP to accept more sewage.
Monroe	North Ave. 12"" Water Ma	$100,000	EFC	Continue to replace 700' of 6' water main built in 1926 with a 12"" water main. This will provide water for fire protection in a area that has seen an increased demand because of construtio

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Monroe	Madison Street Storm & Sanitary Sewer Project	$600,000	EFC	This project will replace 2,400 linear feet of sanitary and storm sewer. These sewers are over 100 years old and beyond their life expectancy. The project will include curbing, surface drainage, milling & paving. The project start date is anytime from 30to 91 days. This project is part of a Combined Road Maintenance and Infrastructure Capital Improvement Plan adopted by the Village/Town.
Monroe	Garfield Street Storm & Sanitary Sewer Project	$600,000	EFC	This project will replace 2,400 linear feet of second line sanitary and storm sewer. These sewers are over 100 years old and beyond their life expectancy. The project will include curbing, surface drainage, milling & paving. The project start date is anytime from 30 to 91 days. This project is part of a Combined Road Maintenance and Infrastructure Capital Improvement Plan adopted by the Village/Town.
Monroe	cleaning and lining water mains	$2,000,000	EFC	clean and line all unlined water main in Village of Webster.
Monroe	West Avenue Sanitary/Storm Sewer Project	$600,000	EFC	This project will replace 1,200 linear feet of second line sanitary and storm sewer. These sewers are over 100 years old and beyond their life expectancy. The project will include curbing, surface drainage, milling & paving. The project start date is anytime from 30 to 91 days. This project is part of a Combined Road Maintenance and Infrastructure Capital Improvement Plan adopted by the Village/Town.
Monroe	Park Drive Storm/Sanitary Sewer Project	$400,000	EFC	This project will replace 1,800 linear feet of second line sanitary and storm sewer. These sewers are over 100 years old and beyond their life expectancy. The project will include curbing, surface drainage, milling & paving. The project start date is anytime from 30 to 91 days. This project is part of a Combined Road Maintenance and Infrastructure Capital Improvement Plan adopted by the Village/Town.
Monroe	Concrest Area Sanitary Sewer and Road Widening Project	$400,000	EFC	This project will replace 2,000 linear feet of second line sanitary sewer and widen the existing roads. This sewer is over 100 years old and beyond its life expectancy. The project will include curbing, surface drainage, milling & paving which will allowfor the proper passage of garbage, plow and emergency vehicles. The project start date is anytime from 30 to 91 days. This project is part of a Combined Road Maintenance and Infrastructure Capital Improvement Plan adopted by the Village/Town.
Monroe	Water filtration and RO system	$6,000,000	EFC	Build a filtration system to reduce the iron and manganese in our drinking water. Also install a Reverse Osmosis system to remove the hardness in our well water.
Monroe	Main Street Sewer Trunk Line Project	$400,000	EFC	This project will replace 1,500 linear feet of second line sanitary sewer. This sewer is over 100 years old and beyond its life expectancy. The project start date is anytime from 30 to 91 days. This project is part of a Combined Road Maintenance and Infrastructure Capital Improvement Plan adopted by the Village/Town.
Monroe	Frank E VanLane Wastewater treatment plant aeration	$9,000,000	EFC	Frank E VanLane Wastewater treatment plant aeration
Monroe	Trolley Pump Station Improvments P1 Canal&P2 Pump stat	$7,500,000	EFC	Trolley Pump Station Improvments P1 Canal&P2 Pump stat
Monroe	Irondequoit Bay pump station force main improvements	$5,000,000	EFC	Irondequoit Bay pump station force main improvements

County	Project	Requested $	State Agency	Additional Detail
Monroe	Village of Brockport Main Street Sanitary Sewer & Water Main Replacment	$2,600,000	EFC	The project involves the installation of approximately 5,100 linear feet of 8"" and 12"" sanitary sewer, including new manholes, sanitary laterals and appurtenances along Main Street (NYS Route 19) within the Village of Brockport. The project also includes the installation of approximately 1,300 linear feet of 8"", 12"" and 14"" diameter water main; the cleaning and relining of 4,100 feet of existing cast iron water main; the installation of new water services and appurtenances; and the restoration of all areas disturbed due to construction. The project will be completed prior to the NYS Department of Transportation's Road Reconstruction Project of NYS Route 19 which is scheduled to commence in sp
Monroe	Rochester - Durand Eastman Beach Water	$1,600,000	EFC	To make needed water quality improvements at Durand Eastman Beach on Lake Ontario. The project will install a low-flow Smart Sponge Filter Treatment at the Camp Eastman tributary discharge point and upstream detention, natural treatment, diversion, andSmart Sponge total treatment at the Sherry Swamp tributary discharge point.
Monroe	Durand Eastman Beach Water Quality Improvements	$1,600,000	EFC	To make needed water quality improvements at Durand Eastman Beach on Lake Ontario. The project will install a low flow Smart Sponge Filter Treatment at the Camp Eastman tributary discharge point and upstream detention, natural treatment, diversion, and Smart Sponge total treatment at the Sherry Swamp tributary discharge point.
Monroe	Revitalizing Vacant properties with Clean energy systems	$1,500,000	EFC	improve vacant single family homes that can be transformed to occupied properties
Monroe	Frank E. Van Lare Wastewater Treatment Plant Aeration System Improvem	$9,000,000	EFC	Frank E. Van Lare Wastewater Treatment Plant Aeration System Improvements
Monroe	Trolley Pump Station Improvements Phase 1 Canal Crossing & Phase 2 Pu	$7,500,000	EFC	Trolley Pump Station Improvements Phase 1 Canal Crossing & Phase 2 Pump Station and Force Main
Monroe	Irondequoit Bay Pump Station Force Main Improvements	$50,000,000	EFC	Irondequoit Bay Pump Station Force Main Improvements
Monroe	Wastewater Treatment/Green Infrastructure	$1,600,000	EFC	Wastewater Treatment/Green Infrastructure
Monroe	Conduit Modernization Project	$6,500,000	EFC	Conduit Modernization Project
Monroe	Sanitary Sewer Rehabilitation	$1,143,000	EFC	The sanitary sewer system in the Village of Honeoye Falls was installed in 1938 and much of it is failing. We have an infiltration problem where groundwater is entering the system through failing pipes and using capacity that is needed for current residents/business and for future development. We propose to rehabilitate 12,696 lineal feet of old 8"" clay pipe using the sliplining method. This project will open up capacity for future development and bring us into compliance with our WWT SPDES permit issued by NYS DE
Monroe	Village of Brockport - Water Main Replacement, Sewer and Sanitary Latera	$0	EFC	
Monroe	MCWA Eastside Water Supply Project Regional Water Treatment Plant - Ph	$25,000,000	EFC	MCWA Eastside Water Supply Project Regional Water Treatment Plant - Phase I: This project will fund the equipment, lines and appurtenances for the raw water intake on the Eastside of the County. This project is important to the safe and efficient delivery of water to both residents and businesses in this large service area. This is the Webster area in northeast Monroe County where the Xerox manufacturing complex and numerous other industries are located. It also extends into northwest Wayne County wherethere is another nucleus of companies. This project is necessary to reconfigure and install new raw water intake equipment, lines and appurtenances. Reliable delivery of water to regional residents and businesses is critical. Reliable, safe and efficient delivery of water to this large regional area is critical. It impacts a significant number of major employers and residents.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. County	Project	Requested $	State Agency	Additional Detail
Monroe	Rolling Acres Sanitary Sewer Project	$750,000	EFC	This project involves sewer lining of pipes, as well as manholes that will eliminate inflow and infiltration, as well as create capacity for future commercial growth. This project includes 13,265 linear feet of 8"" pipe and 49 manholes. A Monroe county bid contract will be utilized for this projec
Monroe	Sanitary Sewer Rehabilitation	$941,600	EFC	Rehabilitation of 28,160 linear feet of sanitary sewer system in the Village of Churchville. This was originally installed in the early 1970's and is in need of rehabilitation.
Monroe	expand business and jobs	$75,000	ESD	We are a family owned business that had 2 employes at one time. Do to business in the area were we recieved a lot of work by word of mouth we never had to advertise or promote our business. We are now finding out in these times that we have to do that bu
Monroe	Solar Cell Manufacturing	$1,700,000	ESD	The research, development, and production of state-of-the art solar cell components requires novel manufacturing equipment. Induction Atmospheres (IA), a New York based company, has delivered first generation equipment to facilitate solar cell componentmanufacturing here in the US. Additionally IA has been asked to produce other equipment in this industry. Our request addresses the opportunity on two fronts: Immediately expand sales of existing equipment into the solar market, Develop new products forthis market To facilitate the development of these opportunities, IA will be investing in personnel, plant, and equipment. IA will hire 7 new employees at an average salary of $80,000. We will also be able to save at least two positions in our manufacturing/build areas. Additionally, IA will invest close to $850,000 in plant and equipment to facilitate the sales of this equipment. Our current estimate is that we will be requesting approximately $160,000/job created or saved. At the end of this project,
Monroe	Lab expansion	$5,000,000	ESD	Move to larger facility, expand 5 dept (test equipment), add 3 new departments - higher 50 to 100 engineers, technicians, skilled laborers
Monroe	create jobs	$50,000	ESD	I have been in business for 15 years. I had 2 employes at one time and had to lay them off. Theye have familys and have been layed off again. I would like to hire them back and market and premote my business in new york state. I dont have the funds to dothis without help. Ive worked to hard to give up. I am wondering if by chance are there any programs that can help us. Thanks look forward to hearing fro you. Kevin
Monroe	Golisano Institute for Sustainability	$53,000,000	ESD	The Golisano Institute for Sustainability at RIT will enable New York State to be at the forefront of the economic opportunities associated with a sustainable green/clean tech economy. The initiative builds on RIT?s proven track record in working with manufacturing companies to improve their product performance, manufacturing processes and productivity, and its globally recognized expertise in remanufacturing, product reuse and recycling technologies. To date, university efforts have led to increased revenue for participating companies and created or protected nearly 3,000 high-paying jobs. No other region in NYS is as well situated as Rochester to become the global hub of the green economy. RIT is currently partnering with with GM and Delphi, both ofwhich have a significant presence in the region centered around alternative energy. A recent report by the Council on Competitiveness emphasized the tremendous economic potential of sustainability as a ?key competitive differentiator?. Of particular signrastructure to support the green economy.? The proposed facility would be a state-of-the-art 70,000 square foot LEED platinum building. Timing is of the essence in capturing this opportunity. For example, the European Union recently announced a $1.28 bilHydrogen Joint Technology Initiative? that is aimed at accelerating the development of these technologies, and to help speed their commercialization by two to five years. The economic potential of these industry markets is enormous. A recent analysis con

County	Project	Requested $	State Agency	Additional Detail
Monroe	Center for Collaborative Research	$10,000,000	ESD	RIT has recently initiated an academically radical concept. What if a university collaborated in research and development work with corporate partners, but wasn?t interested in owning any of the intellectual property? This new program is called ?Corporate R&D at RIT?. Based on RIT?s long history of collaboration with corporations, there is an opportunity to advance partnerships in a direction that would immediately benefit research needs of corporations. The Center for Collaborative Research will support this new paradigm for low-cost corporate/academic research and development. Through the use of cutting-edge equipment, well-appointed wet and dry labs, and ample collaboration spaces, industry and academic research will flourish in this new building. This building will support all of the Institute?s corporate R&D partnerships with corporations throughout New York State. Furthermore, an initiative such as this has enormous potential benefit to the state of New York. Through the availability of low-costalization and economic growth. RIT is committed to all new construction being LEED certified and this building will conform to these standards. RIT seeks $10 million dollars for this initiative and is ready to begin construction as early as July 1, 2009.
Monroe	Business aquisition/stimulus assistance	$500,000	ESD	Assistance request will be used to implement the investment and aquisition of an established business, that without funding may be forced to close.This will result in stimulating the local community by the retention of an established business,thus retaining jobs and services in the local community.
Monroe	Marketview Heights Public Market Area Project	$443,243	MAIN_ST	
Monroe	Municipal Utility, Fairport Municipal Commission Electric-Drive Vehicle - Pha	$11,300	NYPA	
Monroe	County, Municipal, & State Government Offices, CITY OF ROCHESTER, P	$375,000	NYPA	
Monroe	Landfill and Garbage Treatment facilities, Monroe County Mill Seat Landfill	$494,937	NYPA	
Monroe	Mill Seat landfill Green Energy Plant (2nd plant)	$4,800,000	NYPA	Mill Seat landfill Green Energy Plant (2nd plant)
Monroe	Mill Seat Landfill Green Energy Plant	$6,000,000	NYPA	Mill Seat Landfill Green Energy Plant
Monroe	Energy Management System	$100,000	NYSERDA	We are a HUD sponsored nursing home and the funds would be used install an energy management system in the Jewish Home to control the HVAC systems, select lighting circuits, power, the fire pump, will monitor power usage and peaks, the emergency generators, pumps, and other equipment in the facility to reduce energy costs through efficient control. Costs include the new system, software, controllers, wiring, operator devices, and the labor to install the new system. A more efficient operating HVAC system will directly improve the life of the residents of the Jwewish Home by increasing their comfort and reducing operating costs. We should see a reduction in energy costs through better management
Monroe	PTAC Replacement	$700,000	NYSERDA	The Jewish Home of Rochester is a HUD sponsored facility. The PTAC (Packaged Terminal Air Conditioners) units in the building are 25 years old and need to be replaced. They provide heating and cooling in the resident rooms, dining centers, staff officesand common spaces throughout the facility. These units are not efficient and as such waste energy. As a result in the winter months the frail and elderly residents of the Jewish Home are uncomfor table and get sick easier. There are over 350 PTACS that need to be replaced at a cost of $2000 per unit including installation costs.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Monroe	Replacement Windows	$675,000	NYSERDA	We are a HUD sponsored facility. The windows at the Jewish Home are over 25 years old and are in need of replacement. The windows leak, are not very efficient, have worn weather stripping and allow cold air into the building in the winter time. This causes the frail and elderly residents who lvie here to be very uncomfortable in the winter. Because of how inefficient they are we waste alot of energy. We would like to replace them with the same style window but with better glazing and thermal barriers. There are over 450 windows in the building and at a cost of $1,500 per window which includes installation.
Monroe	Home Weatherization	$3,000	NYSERDA	My wife and I own a beautiful old home built in 1957. Unfortunately, gas prices have gone up so much lately combined with an exceptionally cold winter, that we are receiving bills 3x normal cost. We need to purchase some windows in order to winterize thehome and use less energy during the cold Rochester winter. I have done everything possible to help including installing heavy insulation, closing off rooms during the winter, installing a timed thermostat that drops temp in house work hours and at night. We're in a tough place because the windows are so expensive to replace with even inexpensive windows. The assistance with the windows would help us tremendously as well as putting some people to work installing them. Thank you so much for your consideration.
Monroe	Repalcement windows & doors for our HUD home	$15,000	NYSERDA	Replacement of 18 windows & front and back door on our HUD home. This will help with the weatherization and make our home more energy efficient. We will be using windows made in NY state and will be installed by NY state employees. The outcome will be tohelp reduce our gas and electric bill in the future.
Monroe	Multi-Agency Green fueling stations projects	$5,314,000	NYSERDA	Multi-Agency Green fueling stations projects
Monroe	Rochester - Mercury Vapor Streetlight replacement	$1,100,000	NYSERDA	Replace existing inefficient mercury vapor street lights with more efficient high pressure sodium and/or LED lighting systems to increase lighting and decrease energy use
Monroe	Rochester - Rundel Library HVAC Upgrades	$2,200,000	NYSERDA	Replace aging inefficient HVAC system in operation for more than 30 hyears at historic landmark central library building with new high-efficiency HVAC system.
Monroe	Rochester - Edgerton Rec Center Upgrades	$1,315,000	NYSERDA	Upgrade existing inefficient lighting and HVAC systems in a historic neighborhood community center facility.
Monroe	Rochester - City Facilities Energy Efficiency Pro.	$500,000	NYSERDA	Make upgrades to lighting systems, replace all incandescent/fluorescent exit signs to LED install Energy Star windows/film tinting, and improve building insulation at 18 different City-owned facilities raning from firehouses to rec centers.
Monroe	Rochester - Riverside Convention Center Upgrades	$400,000	NYSERDA	Make upgrades to existing lighting systems, cooling tower, and electronic signage to obtain significant energy efficiency benefits.
Monroe	Rochester - Revitalizing Vacant Properties	$1,500,000	NYSERDA	Grant funding will be provided for the improvement of vacant single family homes that can be transformed to sustainable owner occupied properties, and in implementing clean energy systems in both underutilized mixed use properties and new construction projects.
Monroe	Chestnut Street Firehouse HVAC Upgrades	$575,000	NYSERDA	Upgrade existing inefficient, aging steam HVAC system in historic downtown firehouse to modernize and increase efficiency.
Monroe	Blue Cross Arena Energy Efficiency Upgrades	$831,000	NYSERDA	Make series of HVAC and mechanical upgrades to indoor sports arena to reduce large load swings during ice-making. Project is the result of a NYSERDA study and will pay back its investment within four years.

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Monroe	City Facilities Energy Efficiency Program	$500,000	NYSERDA	Makes upgrades to lighting systems, replace all incandescent/fluorescent exit signs to LED, install Energy Star windows/film tinting, and improve building insulation at 18 different City-owned facilities ranging from firehouses to recreation centers. Project is the result of a NYSERDA-funded energy audit.
Monroe	Rochester Riverside Convention Center Energy Upgrades	$400,000	NYSERDA	Make upgrades to existing lighting systems, cooling tower, and electronic signage to obtain significant energy efficiency benefits.
Monroe	Revitalizing Vacant Properties with Clean Energy Systems	$1,500,000	NYSERDA	Grant funding will be provided for the improvement of vacant single family homes that can be transformed to sustainable owner occupied properties, and in implementing clean energy systems in both underutilized mixed use properties and new construction projects. Funding will be used to make desirable energy efficient improvements that encourage sustainable building practices, enhance the quality and value of structures, and reduce long term costs.
Monroe	Warner School of Education and Human Development	$8,000,000	NYSERDA	This new building will serve as an academic home for its faculty, staff, and students and the many community groups they partner and support in the region.
Monroe	Rochester Riverside Convention Center Energy Upgrades	$400,000	NYSERDA	make upgrades to existing lighting systems, cooling tower, and electronic signage to obtain significant energy efficiency benefits
Monroe	Multi-Agency Green Fueling Stations Project	$6,376,800	NYSERDA	Multi-Agency Green Fueling Stations Project
Monroe	RCAg Refuse Conversion Facility	$14,000,000	NYSERDA	The project is to construct the first commercial sized facility utilizing the proven GRCP refuse conversion technology that will utilize and consume 30,000 tons of mixed municipal waste (MMW), as the raw material, producing three proven market acceptableproducts, with 97% of the MMW being captured for recycling or use in the production of products. The facility will process 30,000 tons of MMW per year, which currently represents an approximate $2.3 Million/yr liability. The facility will generate, without any increase in that liability, a revenue stream of nearly $10 Million per year. The success of this facility will result in the rapid adoption of the technology and will result in a $10 Billion industry for New York state with the generation of 28,000 jobs.
Monroe	City of Rochester green jobs/clean energy projects/Mercury Vapor Streetlig	$1,100,000	NYSERDA	Replace existing inefficient mercury vapor street lights with more efficient high pressure sodium or LED lighting systems.
Monroe	City of Rochester green jobs/clean energy projects/Chestnut Street Firehou	$575,000	NYSERDA	Upgrade existing inefficient, aging steam HVAC system in historic downtown firehouse to modernize and increase efficiency.
Monroe	City of Rochester green jobs/clean energy projects/Rundel Library HVAC up	$2,200,000	NYSERDA	Replace aging inefficient HVAC system in operation for more than 30 years at historic landmark central library building with new high-effiency HVAC system.
Monroe	City of Rochester green jobs/clean energy projects/Blue Cross Arena energ	$831,000	NYSERDA	Make a series of HVAC and mechanical upgrades to indoor sports arena to reduce large load swings during ice-making.

County	Project	Requested $	State Agency	Additional Detail
Monroe	Infosensor for Alternative Energy	$1,500	NYSERDA	ADVIS Inc. has developed a unique sensor technology with funding from the Office of Naval Research. We request assistance to move this technology quickly into the commercial industrial market. The ADVIS ""Infosensor"" technology addresses the Energy market, specifically the Smart Grid, through Condition Based Monitoring of machinery. Our smart sensors, both wired and wireless, allow automated machinery monitoring over the Internet to improve the reliability and efficiency and reduce the cost of alternative energy production. The major applications are wind turbines, hydroelectric turbines, remote power stations, pumping stations and water treatment plants. Our patented technologies were invented in the University of Rochester's Department of Electricaland Computer Engineering and the technology was transferred to the company through a NYSTAR TTIP (Technology Transfer Incentive Program) grant to the University. Our company needs $1.5 million dollars to fund completion of commercialization efforts andNew Y
Monroe	Monroe County's Child Care Allocation	$0	OCFS	Requests that funds be used to conditionally restore Monroe County's child care allocation to a level that will allow a return to a higher income eligibility threshold.
Monroe	Care Cart for Aging in Place	$25,000	OFT	Creation of pilot program of 3 Care Carts consisting of: - an automated medication dispenser - a large screen computer equipped with camera, microphone and speakers to enable internet video conferencing - various support services and training The care Cart is a logical extension of our existing geriatric House Calls program which currently supports ~70 patients. It would support independence and allow for more immediate, interactive care and medical support for elderly patients choosing to live at home.
Monroe	Core Electronic Medical Record System	$300,000	OFT	The Electronic Medical Record will provide the following benefits: ? Enhance privacy, security and accountability. ? Increase accuracy of resident care data. ? Obtain real-time access to all resident care through echarting and alerts. ? Improve communications between caregivers through messaging and automated progress notes. ? Reduce medical errors. ? Increase Patient Safety. ? Improve Quality of Care. ? Increased coding accuracy. ? Increased efficiencies. ? Reduced paper consumption. ? Drug-drug, Drug-allergy interaction checking. ? Disaster recovery through backup copies of electronic data. ? Interfaces to labs, pharmacies, and other service providers to reduce turnaround times. ? Multiple simultaneous access to single chart.
Monroe	Historical Photo Digitizing	$7,500	OFT	This project involves the scanning and fileing of the digital image files of approx. 5000 historical photographs of the Village of East Rochester. The files would later be used in our historical web site
Monroe	Visual Intelligence Data Base/Web Applcation	$8,000,000	OFT	Oblique, aerial digital imagery of the entire state: 47,242 square miles made available with software to all government personnel. Result would be to aid first resonders in assessing critical events, all law enforcement and fire fighters would be able tosee building features before entering, tax assessors will have up to date building demensions to properly assess all properties statewide (high return on investment), planning departments will have code enforcement data, environmental departments will have access to watershed data.
Monroe	CSS Expansion	$75,000	OFT	Establish a document scanning and storage system to complement our secured shredding operations, operated by developmentally disabled adults
Monroe	Robotic Medication Dispenser	$75,000	OFT	Purchase/deploy robotic medication dispensing units in 362 bed skilled nursing facility and 60 bed assisted living facility. Goals would be to reduce medication errors, improve quality of care through timely administration of medicines, and improve nursing productivity.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Monroe	Rochester - Chestnut Street Firehouse HVAC	$575,000	OHS	Upgrade existing inefficient, aging (70 years old) steam HVAC system in historic downtown firehouse to modernize and increase efficiency.
Monroe	East Rochester PD patrol initiative	$128,000	OHS	Additional (2) officers for road patrol duties including but not limited to community policing, vice activity and special duties. We currently have 7 full time officers and (8) part time officers covering 3 shifts. I would like to gear us to more of a full time department with (3) full timers on each shift, when (1) officer is off the other (2) are covering the road.
Monroe	ERPD vehicle	$30,000	OHS	To obtain a fully equiped 2009 patrol vehicle, (Chevy, Ford or Dodge) to replace our oldest fleet vehicle which is a 2003 Ford Crown Victoria with over 100,000 miles on it.
Monroe	Phillips Road	$500,000	OMR	The proposal is to build a home to support 8 adults with developmental disabilities who currently live at home with their families. This would create 10 jobs for direct care workers plus approximately 5 construction jobs to build the home.
Monroe	Westside Dreive	$250,000	OMR	This proposal is to develop 2 homes to support 12 individuals with developmental disabilities. 9 of these individuals currently live in a multistory home that no longer meets their needs and 3 currently live eith erin the community with their families orin institutions. This proposal would create 9 direct care care and related jobs plus apoproximately 5 construction jobs to build the homes.
Monroe	Ellison Park improvements	$1,140,000	OPRHP	Ellison Park improvements
Monroe	Black Creek Park improvements	$935,000	OPRHP	Black Creek Park improvements
Monroe	ARTWalk 2	$3,300,000	OPRHP	Construct an extension to the successful ARTWalk urban art trail, pedestrian safety improvements at East Avenue and North Goodman Street, a public gateway plaza adjacent to the Rochester Museum & Science Center, and public art.
Monroe	Genesee Riverway Trail Rehabilitation	$2,000,000	OPRHP	Rehabilitate the heavily-used southern segment of the Genesee Riverway Trail, a multi-use trail along both sides of the Genesee River, between Ford Street and the Erie Canal.
Monroe	Ellison Park Improvements	$1,140,000	OPRHP	Ellison Park Improvements
Monroe	Black Creek Park Improvements	$1,140,000	OPRHP	Black Creek Park Improvements
Monroe	Supportive Housing Program	$15,276,082	OTDA	HHAP + LIHTC 9%

Monroe	Center for Relativity and Gravitation	$150,000	SED	Founded in 2007 the Center for Computational Relativity and Gravitation (CCRG) at the Rochester Institute of Technology (RIT) is dedicated to the study of gravitation and its implications in our understanding of the universe through the use of scientificcomputing and visualization. Research at the center focuses on advancing human knowledge on some of nature's most spectacular phenomena such as black-hole and neutron-star collisions, as well as collisions between entire galaxies. The Center also promotes excellence in research and education in interdisciplinary areas of applied mathematics, high-performance computing, and scientific visualization. Today, the Center comprises an interdisciplinary team of prominent faculty and postdoctoral research associates who are experts in key areas of computational astrophysics, high-performance computing and visualization. The cumulative sponsored research awards won by the team since founding exceeds $1,5 millions, including awards from the National Science Fouientific American, etc, and media such as the Discovery Channel, History Channel, etc. The simulations performed by CCRG researchers require the use of the state-of-the-art High-Performance Computing (HPC) systems.Due to a number of new NSF and NASA awar?s faculty which will provide funds to acquire additional computing resources, the computer laboratory of the Center now needs to be expanded and upgraded from it current capacity. The computing laboratory is currently in need of funds to increase the ca

County	Project	Requested $	State Agency	Additional Detail
Monroe	Borinquen Dance Theatre Education and Outreach	$20,000	SED	Borinquen Dance Theatre is a year-round program focused through Caribbean heritage dance classes. Curriculum is developed from the rich cultural heritage of the peoples of the Caribbean including the indigenous Taino Arawak Indian, African, and Spanish traditions. Classes use traditional music; public performances use authentic costuming. In addition to dance, students learn the history and folklore of their Caribbean heritage. The Borinquen program consists of 126 classes annually. Classes meet three times a week for 42 weeks in fall, spring and summer. Thirty to thirty-five (30-35) Hispanic youth attend each session. Dance classes and self-development workshops are divided by age. The Junior Group is for girls ages 8-13, which meets 1 time per week for an hour each class. The Teen Group is for young women and men ages 13-20 and meets 3 times per week for 1 and 1/2 hour classes. All participants are expected to maintain a 2.5 average in school to continue participating in BDT. Teen and Junior Groupsance including becoming a performing artist; one session on body wellness/diet; one on public speaking, and one on professional etiquette and other social skills. College and career guidance is provided for students entering their junior year of high schcific topics are selected for their knowledge and ability to communicate well with young people. Practice follows theory. Senior Dance Members are paid to participate in the Borinquen Dance Theatre Company and its professional performances in the communi
Monroe	New job, Administrative, support staff	$360,000	SED	The Rochester Association of Performing Arts (RAPA) is Upstate New York?s oldest and most comprehensive school of performing arts, having served a five county area around Rochester since 1978. RAPA strives to provide professional training in dance, theater and music to talented individuals from ages 3 to seniors, who express an interest in learning skills for a career or for personal enjoyment. RAPA aspires to provide alternative, positive direction for at-risk youth, by channeling their time and energytoward an appreciation of the arts. We have worked with over 15,000 youth since our inception, in educational programs that build life-skills. RAPA purchased a 20,000 Square foot building with 3 dance studios, actor?s studio, 4 music studios, four offices, costume storage with 2000 costumes, and a 170 seat theater. We need to create new full time jobs: Executive Director, (our volunteer Director is retiring), Administrative Assistant. The Program Director will oversee the entire 25 member staff in dancreports., Marketing Director will work directly with the Executive director, program director to market existing programs and market new program. The Professional Fund-Raiser will work to keep the organization financially solvent by increasing communitygrams and performances. The grant writer will help fund program projects, such as scholarships for disadvantaged youth, sponsorships of shows to increase our revenue, and collaborations with other schools, arts organization for programs for youth during

County	Project	Requested $	State Agency	Additional Detail
Montgomery	Staley Road Drainage Improvements Project	$160,000	DEC	On behalf of the Village of Palatine Bridge in Montgomery County, New York please consider the following project for available funding under the current stimulus plan. This project is a great opportunity to help a small Village such as Palatine Bridge alleviate some drainage infrastructure problems they have been having for many years. The Village of Palatine Bridge is looking to improve drainage along Staley Road, a small road within the Village. Improvements would include the installation of storm sewers to alleviate significant drainage problems. The project would include connection of the proposed Village storm sewers to those of the NYS DOT?s along NYS Rt. 5. Engineers have already me with DOT officials to discuss the project, and have a preliminary design. Project would replace DOT?S inadequate storm sewer infrastructure as well as provide new infrastructure for the Village. DOT Officials indicated that it would not be capable in the immediate future to accommodate this project with funding to rams collect a lot of runoff. Drainage issues include significant pooling of water in people?s back yards and eventual infiltration into homes. Erosion and sediment control issues can also be improved with this project. This project would greatly improvege issues in the Village that have been overlooked by many officials and agencies for a long time. This project would not only improve an existing problem but also improve some of DOT?s infrastructure. Pictures as well as any information regarding design
Montgomery	Storm Water System Improvements/Dove Creek Retaining Wall Replaceme	$3,000,000	DEC	Storm Water System Improvements/Dove Creek Retaining Wall Replacement, Montgomery County Banks have severely eroded and are undermining the foundations of several commercial and residential buildings. Funds are needed to avoid an emergency situation. Immediate Construction Jobs.
Montgomery	Staley Road Drainage Improvements Project	$160,000	DEC	On behalf of the Village of Palatine Bridge in Montgomery County, New York please consider the following project for available funding under the current stimulus plan. This project is a great opportunity to help a small Village such as Palatine Bridge fund improvements to better the Village infrastructure. The Village of Palatine Bridge is looking to improve drainage along Staley Road, a small road within the Village. Improvements would include the installation of storm sewers to alleviate runoff that develops along the steep slopes of the hillside, north of the roadway. Issues regarding this runoff include significant pooling of water in people?s back yards and eventual infiltration into homes. The project would include connection of the proposed storm sewers to the NYS DOT drainage infrastructure along NYS Rt. 5. Consultants have already met with DOT officials to discuss the project, and have a preliminary design. The DOT infrastructure for the proposed connection is dilapidated and undersized, nottructure while providing new infrastructure for the Village. At the meeting with DOT Officials, DOT indicated it would not be capable of replacing its own infrastructure due to budget cuts and projects with higher priority. Therefore the burden of replacT?s infrastructure would fall solely on the Village. Project Costs for the Staley Road drainage infrastructure are estimated at $100,000. Replacement of the DOT infrastructure would add an additional $60,000 to project costs. This project would greatly i

County	Project	Requested $	State Agency	Additional Detail
Montgomery	Van Alstyne Homestead Community Revitalization	$50,000	MAIN_ST	The Van Alstyne Homestead Society in Canajoharie, a 501 c3 organization with an Absolute Charter from the NYS Board of Regents to function as caretakers of a c. 1749 National Historic Landmark and community cultural and service organization, currently faces 1) potentially manageable but impendingly disastrous structural compromise; 2) absence of staff to provide supervision, programming and development; 3) loss of program-derived and private funding sources for paid professional and maintenance staff. These immediate conditions threaten the building and organization's closing and loss of charter, and thus the eradication of a formerly active community cultural asset, tourism and service economic destination, and source of local employment in a hard-hitregion. The current volunteer ad-hoc emergency-coordinating committee has developed work, maintenance and leadership plans to reverse the physical compromise (addressing cedar roof, stone chimney and interior plaster repairs in the 1749 structure) and,ader in regional cultural tourism and community-based services.
Montgomery	Schools, Elementary and Secondary, Fonda-Fultonville Central School Dist	$450,688	NYPA	
Montgomery	NY Biofuel Biodiesel Production & Infrastructure Project	$500,000	NYSERDA	NY Biofuel, Inc - a partnership between two Upstate NY companies, a local environmental firm (GEMS) and trucking company (SLA Transport), have teamed up with a local fuel distributor, Egelston Energy to begin biodiesel production and distribution to thelocal area. The goal is to produce 500,000 gallons initially and up to 2 million gallons once the distribution infrastructure has been well established. Our target markets are local municipal, school system, and private diesel fleets. All the building permits are in place, we have been approved for a loan, and we are ready to begin construction. We are seeking to offset our costs by 40% with a grant through this stimulus program which would greatly expand our ability to create the necessary infrastructure for Upstate NY blended biodiesel distribution.
Montgomery	Town ofc bldg heating/AC project energy efficient	$30,500	NYSERDA	Town ofc bldg heating/AC project energy efficient
Montgomery	Public Safety Facilty	$1,250,000	OHS	The St. Johnsville Fire Department is presently housed in a structure built in 1900 as a clothing store and was converted into a Fire Station around 1955. This facility is begining to show sever signs of deterioration and is begining to cost the taxpayers of this community significantly for upkeep, heating and repairs. This proposal is for the complete replacement of this structure with a new energy efficient and sound structure. The new structure would contain 8 apparatus bays, offices, communicationsroom, meeting rooms, a large public assembly hall, parking areas, live training area, and access for fire apparatus staging. The savings in heating costs, building maintenance and repairs, and availability to the public will have lasting effects within this community and those surrounding this community. This facility is presently a primary evacuation site for emergencies within the district, and this project would allow a larger more efficient way of providing this service.
Montgomery	Town of Mohawk Firehouse Replacement	$1,000,000	OHS	Replacement of current rural firestation built in 1968. Current station is too small for our current apparatus and training needs. The current station in not compliant with many current regulations and is not a handicapped accessible facility.
Montgomery	Cultural/Tourism Center and Museum on Waterfront Devel	$3,750,000	OPRHP	Cultural/Tourism Center and Museum on Waterfront Devel
Montgomery	Museum safety, security and flood waterproofing	$2,040,318	OPRHP	Construction of new above ground storage that will save fine art and history collections from future flood damage. Completion of safety, security system for new building, HVAC for Galleries, and water proofing the building envelope in light of lessons learned in 2006 flood.
Montgomery	Amsterdam City Schools, District-Wide	$3,276,000	SED	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Montgomery	Canajoharie CSD, New High School	$369,459	SED	
Montgomery	Fonda Fultonville CSD, Fonda Fultonville Central	$1,514,800	SED	
Montgomery	Completion of Erie Canal Trailway	$0	Thruway	Completion of Erie Canal Trailway
Mta Region	Energy Efficient Heater Controls for the Metropolitan Transit Authority (NYS	$128,000,000	NYSERDA	
Nassau	Painting of Elevated Water Tank	$2,575,000	CDBG	
Nassau	Recreation/Community Center	$30,000,000	DASNY	A hub of activity for all ages, from pre-k swim class to senior swimnastics, the Long Beach Rec is in constant use. Located at Magnolia Blvd. and the Reynolds Channel bayfront, it offers a weight room, a pool, men's and women's locker rooms, and fitness
Nassau	Public Works Maintenance & Storage Facility	$3,100,000	DASNY	To Contruct a new 2,000 square foot Public Works Maintenance Building for the Village of Kings Point
Nassau	The Public Square at Molloy College	$5,000,000	DASNY	The Public Square is Molloy's new student center/theatre. We have 3,800 students who have no student center. We are concerend about our ability to retain these students, for Molloy and for New York, if we do not provide up to date facilities. We had $5 m
Nassau	Hospital Pharmacy Renovation	$3,000,000	DASNY	Renovation of the hospital pharmacy and adjacent support areas is required to achieve compliance with current safety standards for this critical function. The project will encompass the renovation of 3,000 square feet of space within the existing structure. The pharmacy is currently housed in an area of the hospital where construction is more than 30 years old. Construction will focus on the creation of new ventilation and ducting systems and technology upgrades that will ensure employee safety, and redesign that will improve hospital operating efficiency. Upgraded ventilation and ducting systems are vital to protect pharmacy staff from inhalation exposure to potentially hazardous substances when formulating medications. Proper venting of this area will also ensure the safety of other hospital staff, patients and visitors. The project will generate employment for an estimated 100 workers. Design work for this project has been completed, allowing for rapid implementation upon receipt of funds.
Nassau	Cancer Center Renovation	$2,000,000	DASNY	This project will expand clinical space within the South Nassau Cancer Center in order to meet the rising demand for services in a rapidly growing program. The Center?s nationally-recognized, fellowship-trained medical and surgical oncologists provide residents of southern Nassau County with local access to care that is typically available only at major institutions. Rising demand for the Center?s services can be attributed in part to a 29% increase in service volume at the hospital?s breast imaging center, which is a primary referral source for the Cancer Center, as well as the addition to the clinical team of a fellowship-trained gynecological oncologist with a large existing practice. Plans are under way to recruit two additional physicians to accommodate the increased patient load. The planned construction will involve the renovation of 6,000 square feet of space within the existing structure, to create two additional consultation rooms and four additional treatment rooms. This project will increa

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Nassau	Renovation to Increase Hospital Bed Capacity	$5,000,000	DASNY	Renovation of 14,000 square feet of vacant space within the existing hospital structure will create capacity for an estimated 30 additional acute care beds. Construction will take place in an area of the hospital that was vacated upon completion of a newpatient pavilion in 2006. Additional capacity is needed to respond to rising demand for the hospital?s inpatient services. South Nassau Hospital has experienced a 60% increase in hospital admissions over the last decade. During this same period, the hospital has succeeded in stemming the tide of out-migration of patients to New York City-based hospitals, increasing market share in its service area. Through expansion of its range of services, and enhancements in quality of care, South Nassau has both improved local access to high quality healthcare, and contributed to economic growth in the Long Island region. This project is expected to create 150 jobs during the construction phase, and an additional 50 healthcare-related jobs to support ongoing opera
Nassau	Resurface Municipal Parking Lots	$150,000	DASNY	The Village need to rehabilitate the two municipal parking lots in the Village combined with a beautification of those areas. The one lot is in particualr poor condition and the Village was hoping for funding of $100,000 from a NYS grant request throughSenator Craig Johnson to undertake this work, however, that funding has been put on hold for an underdetermined amount of time (if it will be available at all). This project, which would include a small amount of community beautification beautification in the lots cannot wait.
Nassau	Expand the Mineola Ambulance	$150,000	DASNY	The Mineola Volunteer Ambulance Corps is a volunteer, non-profit corporation, whose emergency medical services are contracted by the Village of Mineola. Located less than five miles from the New York City border and 20 miles from Manhattan, the Village is also the county seat of the County of Nassau. The per capita income based on the 2000 Census is $28,890. MVAC is the ambulance service for the village inhabitants, whose population fluctuates from 19,100 residents to almost 30,000 during weekdays. Theagency provides coverage for the State Supreme Courts, as well as the County Courts. Mineola also has the highly-traveled NYS Route 25, as well as the main artery of the most populated commuter railway system in the country. Recently, the corps purchaseda 2003 ambulance, to replace a 20 year old ambulance. This new vehicle forces the corps to park one ambulance outside at all times, since the modern ambulances no longer fit into the smaller bay. Due to limited funds, security takes a cut due to more vi
Nassau	Mineola Ambulance Headquarters / EOC / Community Health Center	$1,900,000	DASNY	The Mineola Volunteer Ambulance Corps is a volunteer, non-profit, independent corporation, whose emergency medical services are contracted by the Village of Mineola. Located less than five miles from the New York City border and 20 miles from Manhattan,the Village, also the county seat of the County of Nassau, has a population that fluctuates from 19,100 residents to almost 30,000 during weekdays. The agency provides coverage for the State Supreme Courts, as well as the County Courts. Mineola also hasthe highly-traveled NYS Route 25, as well as the main artery of the most populated commuter railway system in this country. Currently the building can no longer house all the required vehicles. Recently, the corps purchased an ambulance, to replace a 20+year old Horton ambulance. This new vehicle forces the corps to park one ambulance outside at all times, since the modern ambulances no longer fit into the smaller bay. Due to limited funds, security takes a cut due to more vital items. Plans to protect
Nassau	East Williston Village Hall ADA upgrades Sagamore Avenue Road Rehabilit	$2,200,000	DASNY	Add 3400 sq ft to existing village hall/firehouse/library/court to include ADA compliant elevators and restrooms. Sagamore Avenue and Prospect Street rehab to include relocation of utilities and new railroad pavillion for shelter.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Nassau	Emergency Lighting upgrade	$350,000	DASNY	Upgrade lighting at Varick Street to enhance safety for student and employees. This new lighting system will include emergency lighting fixtures in case of power failure or building emergency. This is a high priority as the building is located in lowerManhattan.
Nassau	New Residence Hall	$20,000,000	DASNY	New Residence Hall to add 167 beds. This will be a green building and will be powered by a geo-thermal heating and cooling system. It will be Adelphi's fifth building to run on environmentally friendly energy. This project was slated to begin this winter but due to the credit market, we were forced to delay. This project will infuse $41,348,000 in output of Goods and Service to the LI economy; the earning increase alone is $12,902,000.
Nassau	Rehabilitation of our Hy Weinberg Center	$3,900,000	DASNY	Full building rehab including clinics and labs for hearing and speech impaired local residents; new clinics including audiology booths for the hearing impaired and aging community here in the region. This is a community resource center as well as an education facility. This project will have a $8,062,860.00 impact on the Output of Goods and Serice to the LI ecomony abd an d earlings impact of $2,515,890.
Nassau	Rehabilitation of Woodruff Hall	$22,000,000	DASNY	A complete renovation of historic Woodruff Hall will make the building better able to serve both academic programs and recreational activities. Renovations will provide for new classrooms and enhanced weight and fitness areas. A state-of-the-art Human Performance Laboratory will be complemented by fully accessible cardiovascular and adult fitness programs, which will triple in size. This is a green building with a geo-thermal heating and cooling and built with local products and with local labor. Thisproject has an estimated output of goods and serice to the LI ecomony of $45,482,800 with earnings estimate of $14,192,200.
Nassau	Roof of the Ruth S Harley University Center	$600,000	DASNY	Full roof replacement including installation of energy savings elements and improved HVAC system for the building. This project will have a $1,240,440.00 impact on the Output of Goods and Serice to the LI ecomony and a an earnings impact of $387,060.00.
Nassau	Swirbul Library Addition	$10,000,000	DASNY	Expand existing Library, increase community access to our collections, and expand library services. In keeping with Adelphi's community to green construction this project will include energy savings measures, locally available materials, eco-friendly furnishings and equipment, and water savings devices. This project will have a $20,674,000 impact on Output of Goods and Serice to the LI ecomony and an earnings impact of $6,451,000.
Nassau	Academic building renovation	$2,000,000	DASNY	Part of a long-term, ongoing project, this funding will allow us to continue our renovation of all academic spaces, including technology, HVAC, classroom, elevator, and restroom facilities.
Nassau	Adams Playhouse renovation	$1,500,000	DASNY	The John Cranford Adams Playhouse, having just celebrated its 50th year, is one of Hofstra's landmarks and most public venues. When it opened in the 1950s, it was home to one of Francis Ford Coppola's first theatrical productions. Now it requires significant cosmetic, sound and lighting improvements. Hundreds of thousands of people, including students, alumni, K-12 students and community members, visit the Adams Playhouse every year for theatrical, dance and musical performances, for educational programming, and for other community events.
Nassau	Central Utilities Plant upgrade	$700,000	DASNY	This project is to upgrade mechanical equipment in the University's central utilities plant.
Nassau	Fire alarm upgrades	$2,500,000	DASNY	This project is part of an ongoing effort to expand, replace and upgrade fire alarm systems in various academic buildings.
Nassau	Infrastructure projects	$1,000,000	DASNY	In order to be more energy efficient and to preserve and enhance the campus infrastructure, we seek to install new hot water heaters, incoming electrical switches, facade repairs to older buildings and cooling tower upgrades.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Nassau	Law School and Clinic Expansion	$15,000,000	DASNY	The Hofstra Law School requires an expansion to continue to meet its mission of educating students. From its inception, Hofstra Law School has provided an education that is rich not only in theory, but also in teaching the skills needed to groom effective lawyers. We were one of the first schools in the country to adopt clinical education and have served for many years as the regional center for the National Institute for Trial Advocacy. Currently, we offer seven client representation clinics as well as extensive externship and pro bono opportunities. Expanding the law school's central facility will allow us to provide better clinical services to the public and create more educational space for the students.
Nassau	Liberty/Republic renovation	$1,200,000	DASNY	The Honors College residential complex, home to 200 students, is in need of renovation, both cosmetic and infrastructure.
Nassau	Library HVAC riser system	$4,000,000	DASNY	This project is to repair and upgrade the HVAC riser system in the Axinn Library, one of the University's most important educational and public facilities.
Nassau	Master plan	$1,000,000	DASNY	Hofstra University will undergo a site survey and a creation of a master plan for its entire campus.
Nassau	Medical school - renovation of temporary building	$8,000,000	DASNY	Hofstra University is renovating Weeb Ewbank Hall, the former administrative home of the NY Jets, to act as the temporary home to the new School of Medicine. This building will house both offices and academic facilities and will be used for the first few medical school classes. Once the new medical school is built, sometime in the next five - seven years, this building will be used for an appropriate academic use, most likely as an undergraduate science center.
Nassau	Medical School - site improvements	$10,000,000	DASNY	Medical School site improvement and preparation: The permanent Medical School complex site will be on 11 undeveloped acres on the northeast quadrant of North Campus, and this site requires grading, excavation and the installation of all required infrastructure.
Nassau	Medical School construction	$115,000,000	DASNY	The construction of the new School of Medicine's complex will include a state-of-the-art academic facility, including classrooms, labs, and offices, as well as a residential facility suited for medical students.
Nassau	Renovation of health and recreation center	$7,000,000	DASNY	Hofstra's Health and Recreation Center is undersized for our current student population and is aging. This project significantly expands the recreation center's existing space and modernizes and upgrades all facilities, allowing for more classes and programming.
Nassau	Security upgrades and improvements	$500,000	DASNY	This project includes construction of enhanced security booths and entrances in residence halls and other security checkpoints.
Nassau	Student Center upgrades	$70,000	DASNY	The David and Sondra S. Mack Student Center is home to all residential student activity as well as most of our community programs for our neighbors, K-12 students and guests to the area. The Student Center requires renovation in the public program areasand for student organizational offices and infrastructure upgrades for the building.
Nassau	Molloy College Long Term Campus Master Plan Phase I	$0	DASNY	Molloy College has formulated a long term Campus and Facilities Master Plan.This plan is divided into phases. We are currently in the bidding and approval process for PhaseI.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Nassau	A MODERN SHIP MODEL TESTING FACILITY AT	$10,500,000	DASNY	In order to keep Webb Institute at the forefront of undergraduate education in naval architecture, the convenient access to a modern ship model testing facility by students and faculty is of unquestioned value. Ship model towing tanks are the signatureexperimental facilities of naval architecture, having both significant historical and current technical value in understanding and quantifying the hydromechanics of ships and ocean-based systems of all sorts. Most importantly ? towing tanks provide hands-on, physical and practical experiences for students of naval architecture that supplement, clarify, and allow extension of textbook, lecture, and computer-based learning. An increase in tank length would allow longer steady-state data acquisition windows at all speeds; Incorporation of a two-rail carriage support system would provide a heavier, more payload-capable, and more stable carriage; User friendliness in generating well-formed regular, and spectrally- defined irregular, long-crested warobust, rapid, and accurate model making system is needed. The strongest justification for running tests with small models is that the tests can be run much more quickly and cheaply than tests with ?large? models. This is only a justificatithe tests with the small models are suitable to the purpose for which the tests are conducted.
Nassau	Webb Institute Student Union	$1,500,000	DASNY	The Student Union has been developed in response the needs of the school and the student body. These, include but are not limited to, a better social space for student meetings and school activities, an improved area for social events for the school, space to support our student?s sailing team which hosts two major events a year on campus, and storage space for water based student activities such as fishing, kayaking, water skiing and the like. This new Student Union will be two stories. The top floor, approximately 2000 square foot, will accommodate gatherings of as many as 100 people. In addition, its wrap around deck provides a 240-degree view of Long Island Sound allow for expanded indoor-outdoor capacity. Outdoor seating and a BBQ provided on the patio level under the shade of the pavilion deck, provides for shade and shelter from the sun. The proposed facility responds to the numerous needs of the overall student body, faculty, staff, and alumni, enjoy the ambience and breathtaking view
Nassau	Green Government Buildings	$350,000	DASNY	All government buildings are to use biodegradable plastic trash can liners, biodegradable barrier/construction tape, Police agencies to use biodegradable barrier tape, and all agencies to use biodegradable drop cloths for painting.
Nassau	Village of Centre Island Police Station	$375,000	DASNY	This project is the demolition of the old station and the construction of a new 780 sq ft facility.
Nassau	Police Station	$500,000	DASNY	Replace existing Police station
Nassau	Hicksville High School Track	$0	DASNY	Hicksville High School Track

County	Project	Requested $	State Agency	Additional Detail
Nassau	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of nine residences and two day programs in Nassau County.
Nassau	Rehabilitation, Greening and Modernization of Village Hall	$2,650,000	DASNY	Major rehabilitation project - upgrade mechanical systems, replace antiquated heating system, replace lighting systems, increase buildings envelope's performance by adding insulation to walls and roof. Replace windows and doors with high performance units to increase thermal efficiency.
Nassau	Rehabilitation and Modernization of Village Hall	$2,650,000	DASNY	The Rehabilitation, Greening and Modernization of Village Hall The East Rockaway Village Hall was constructed in 1957 and has remained original except for minor upgrades. The building structure and major systems including heating, electrical and plumbingare all over 52 years old. The building is very energy inefficient, lacks accessibility for the physically challenged and does not have air conditioning. The Village is planning a major rehabilitation project to maximize energy efficiency, provide for accessibility to the entire building and provide for more efficient use of the operational space. There are three main goals to this project. The first goal is to upgrade the mechanical systems within the building to a level where we can obtain a LEED Certification for the building. These systems will include adding 10 KW of solar photovoltaic panels to augment the electrical system. Replace the entire antiquated heating system, with a new state of the art geothermal system for heat and air conditioning.iency. Another goal is to provide full access for the physically challenged to all areas of the building by installing an elevator. The building was originally constructed with three usable floors; however, due to the lack of accessibility to all but thed to eliminate the public use of the basement and second floor areas. An elevator will permit the reestablishment of many public service programs in the building, as well as more efficient use of the space. As part of this project, all environmentally ha
Nassau	Hofstra University	$8,000,000	DASNY	Renovation project for new medical school.

County	Project	Requested $	State Agency	Additional Detail
Nassau	PLANDOME HEIGHTS PROJECT PRESERVE BAY	$300,000	DEC	The Incorporated Village of Plandome Heights (""VPH"") is most appreciative of the opportunity to submit its shovel-ready infrastructure project to you. The name of our project is PROJECT PRESERVE BAY. VPH actually started homework on PROJECT PRESERVE BAY several years ago but have had to continually shelve it since then due to insufficient resources. VPH knows the job must be done, and believes that now is the time to do it. PROJECT PRESERVE BAY must: 1. update and enhance the underground water distribution system and increase the number of overflow storm catch basins from their current levels 2. resurface the roads which will be affected by the above-referenced drainage implementation 3. re-contour and resurface two roads which border a natural preserve, eliminating the water aggregation that currently exists, and installing curbs or borders to safeguard pedestrians from complete exposure to oncoming traffic (current state) Sidney Bowne, the appointed engineers for VPH, have confirmed that PROJECT PVPH have further advised that PROJECT PRESERVE BAY will necessitate approximately 2500-3000 manhours to complete. The total cost of the project is expected to be in the vicinity of $300,000. The streets and locations involved include: ? border of Plandomwhich exits to the Manhasset Bay) ? Bay Driveway ? Bayview Circle ? Shore Road ? Summit Drive The Village of Plandome Heights is proud to present PROJECT PRESERVE BAY to Governor Paterson, through your efforts, and hope that we will at long last be able
Nassau	Artifickal Fishing Reef	$200,000	DEC	North Fork Captains Association President: Captain Robert Busby Vice-President: Captain Robert Rocchetta Treasurer: Captain Ken Birmingham Secretary: Captain Mike Connolly Sustainable Fisheries Advocate: Captain Jim House March 2, 2009 Dear Mr. TimothyJ. Gilchrist Stimulus Czar of NY State Albany, NY I am writing in support of a very important ?shovel-ready? project that will create jobs and bolster the floundering recreational saltwater fishing industry in New York State. The project is the creationof artificial fishing reefs by the use stainless steel railway cars from the Metropolitan Transit Authority. The MTA has 1,600 Stainless Steel cars that are being scrapped and sent out of state for the creation of Artificial Reefs. These valuable cars are going out of state because New York does not have the $200,000 needed for a full time Marine Biologist and support items to monitor the reef for 2 years. Six hundred cars have already gone to NJ, Delaware and North Carolina with none being used in oure Captree Boatmen, United Boatmen, Assemblymen Sweeney & Contie, Northfork Captains Association, Imperial Sportsmen, Suffolk Senior Fishing Clubs, the Marine Resources Advisory Council to the DEC, Pat Augustine, the Governors Appointee to the ASMFC, areect. These reefs will provide a tremendous work opportunity for the Long Island area and help to sustain our recreational fishing industry. It will provide employment for the bait and tackle dealers, for hire recreational fishing boats, boat sales, marin
Nassau	Catch Basin - New and Replacement	$450,000	DEC	The Village has two sources of drainage - Village owned catch basins and the County of Nassau's storm sewers. Many of the catch basins date to the founding of the Village and are in excess of 80 years old. They are in a state of failing and desperately need replacement. many are even collapsing. The Village's required participation in annual permitting from the DEC for Storm Water Management may soon move this project to a mandate that the Village currently has no way to fund. The Village has approximatly 80-95 catch basins, at least half of which could be replaced. At an estimated cost of $9,000 per basin, to replace half (50 basins) would be approximately $450,000.

County	Project	Requested $	State Agency	Additional Detail
Nassau	Nassau County, Westbury Theater Parking Lot Development	$3,000,000	DHCR	This project will allow the Village of Westbury to continue its ongoing downtown revitalization along the Post Avenue corridor, through the development of a structured parking facility behind the long vacant Post Avenue Theater. The theater developer isworking with the Village and the County on a complete gut rehabilitation of the building to be used as a theater. Private funding will be used in this effort. Stimulus funds would allow the Village to assist this development by assembling land and constructing a new tiered parking garage to serve both the theater and the surrounding business community. Success of the theater will depend on the availability of the parking. The Post Avenue Theater is located in a HUD-designated low/moderate income censustract. The Post Avenue busuness district serves a total Village population of approximately 15,000. The Village is undergoing a dramatic reviltalization of its business district, assisted with federal, state, and county funds. The Post Avenue Theater isa major boon to the Village.
Nassau	Nassau County, Franklin Ave. Streetscapes	$1,500,000	DHCR	The revitalization of this area will attract more customers to the downtown business district , benefiting the local economy and that of Nassau County. The Village of Hempstead is designated by HUD as a low / moderate income census tract area. In addition, Hempstead is an investment zone within the Nassau County Empire Zones Program, and faces a number of economic challenges.
Nassau	Nassau County, Elmont Streetscapes	$2,900,000	DHCR	This project will revitalize the downtown business district in Elmont via the installation of new sidewalks, brick work, benches, Victorian style lights, and trash receptacles. The revitalization of this area will attract more customers to the downtown business district thus benefiting the local economy and that of Nassau County as a whole. Elmont is a HUD designated low/moderate income census tract area, containing approximately 22,000 people. It is also a development zone under the New York State Empire Zones program. Elmont is host to the Belmont Race Track, and revitalization of the Downtown will allow the community take advantage of the full economic opportunity presented by the race track.
Nassau	La Cite Development	$50,000,000	DHCR	154 Front Street Work Force Housing
Nassau	Electrophysiology Laboratory	$4,750,000	DOH	The construction of a new electrophysiology laboratory and procedure room within the South Nassau Center for Cardiovascular Health will involve the development of 6,100 square feet of space within the existing hospital structure. Construction of these facilities will ensure the hospital?s ability to meet the growing demand for safe, timely and convenient access to advanced cardiac care in southern Nassau County ? care that would otherwise be unavailable in the hospital?s service area. The new lab will be equipped with digital imaging technology that will enhance patient safety and treatment effectiveness, and expand the range of available treatment options. This project will also improve healthcare access and outcomes for low-income individuals and members of minority communities, underserved populations that are disproportionately affected by cardiovascular disease, who represent 40% of residents in the hospital?s service area. The planned construction will provide employment for 150 workers over the

County	Project	Requested $	State Agency	Additional Detail
Nassau	NORC SSP Expansion in Suburbia	$500,000	DOH	In Nassau County, the number of individuals age 60 and older is expected to increase by 11% and those ages 85 and older by 65% from 2000-2015. Condensed communities in which significant numbers of residents have aged in place are called NORCs (NaturallyOccurring Retirement Communities.) The NORC Supportive Services (SSP) model has been in existence in cities for more than 20 years. In suburbia, where barriers such as maintenance of home and property, isolation, transportation, etc. are even more significant, F?E?G?S has been a leader in retooling and delivering a collaborative NORC model, partnering with local government, health providers, community-based groups and seniors. A broad scope of services engages and serves seniors, stabilizing their environment and enabling them to live safely in the homes and communities they have lived in for decades, while reducing their reliance on high-cost institutional care. This project will strengthen existing NORCS and build new ones, serving potentially 2,000-
Nassau	Electronic Health Records Implementation	$500,000	DOH	Planned Parenthood of Nassau County provides 40,000 people annually with low-cost health care, counseling and education. We are requesting funding to purchase, install and implement an Electronic Health Record (EHR) system in our health centers in Hempstead, Glen Cove and Massapequa. The project entails the purchase and installation of new hardware, software, billing modules and on-line appointment modules, as well as maintenance and training. The benefits of this new technology to patients are many: fewer adverse drug reactions, lower morbidity and mortality rates, reduced health care disparities, improved health care quality, and lower costs. Moreover, with the implementation of the EHR system, we anticipate improved access to information; improved workflow and staff efficiency; accurate, quick data analysis and reporting; easier sharing of records among Planned Parenthood affiliates and other health care providers; decreased Medicaid fraud; and improved billing time and patient satisfaction. We kno

County	Project	Requested $	State Agency	Additional Detail
Nassau	Electronic Medical Records System	$7,921,062	DOH	This project is part of a master plan for the development of a comprehensive, certified electronic medical records (EMR) system for South Nassau Communities Hospital. The hospital has invested $7 million to date in EMR systems development. Components currently in place include a clinical data repository, laboratory and radiology functions, a full Picture Archiving Communication System (PACS) that allows for sharing of digital diagnostic images via both Internet and Intranet, and an electronic medicationadministration record (e-MAR) with bedside medication administration bar code identification technology. ARRA funding is requested to support development of additional system components in 2009 and 2010, including an EMR database with electronic charting, computerized provider order entry (CPOE), an enterprise-wide scheduling system, first-level clinical decision support for drug/food/allergy alerts, second-level clinical decision support using evidence-based medicine protocols, an analytical data minirs, technology for secure access to the system from external sites, and development of a wide area network (WAN) to provide required bandwidth for 11 off-site locations. The hospital?s status as a founding member of the LIPIX (Long Island Patient Informafunded through HEAL NY, will allow for sharing of EMR data via an integrated clinical environment with 19 of 24 hospitals on Long Island and 3 in Queens, and several extended care and outpatient services providers. The planned EMR will meet all interope
Nassau	Nassau County Health Care Corp.	$3,000,000	DOH	Emergency Department / Radiology renovation.
Nassau	Loving Care	$120,000	DOL	This project will add another class to our existing nursery school. These ten spots will be reserved for children who's parents have lost their jobs. It will be provided at no cost to the family and run from 8:00 am - 6:00 pm Monday - Friday. This will allow the parents five full days a week to search for a new job and/or go for training in a new field of employment without worrying about the care of their children or the cost. We will also provide two employment seminars for the families to assist themwith their search.
Nassau	Moving Forward	$15,000	DOL	The ""Moving Forward"" project is an employment training program that will help community residents secure new employment. There will be 10 sessions over a three month period. The focus of these meetings will be on interview skills, resume writing, computer proficiency, what employers are looking for and best practices when searching for a job. This type of training will increase the competency and confidence of all participants leading to a more positive outcome in their employment sea

County	Project	Requested $	State Agency	Additional Detail
Nassau	Drainage Improvements and Road Reconstruction	$850,000	DOT	Drainage System Improvements and Road Reconstruction Project The Village of East Rockaway is a coastal community on the south shore of Long Island, NY. The storm water drainage systems here are old and in some areas non existent. There are sections of roadways that flood and become impassable several times each year during coastal storms. These floods occur because the road elevations are lower than the storm surge elevations, and the storm water systems are unable to prevent tidal backup or remove thewater effectively. During severe storms, the flooding impacts the surrounding homes causing damage to property and contents. Tidal surge is brought into the roadways via the storm water drainage system. To solve this problem in the most affected areas,the Village has planned an extensive drainage system and road reconstruction project. This project will completely replace the storm water drainage system including collection basins, piping, and outfalls, and will add backflow prevention valves and champroject will directly affect approximately twenty five hundred (2,500) feet of roadway and over one hundred and fifty (150) homes. The project area includes Lawson Avenue from Main Street south to the Malecon Street and Adams Street from Lawson Avenue wThese roads provide primary access to several hundred homes and are heavily traveled. Flooding of these roadways causes major disruptions for the residents of the water bound residential neighborhoods of south East Rockaway and Bay Park. The estimated co
Nassau	Reconstruction of Suffolk & Norfolk Road	$1,400,000	DOT	Reconstruction of Suffolf Road which is susceptible to flooding. Will include drainage. Norfolk Road has never been redone so it is in deplorable condition.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Nassau	Cover for Water System	$4,000,000	EFC	Cover for Water System
Nassau	Replace Aging Sewer System and Road Repair	$10,000,000	EFC	Replace Aging Sewer System and Road Repair
Nassau	Dig 3 Water Wells	$10,000,000	EFC	Dig 3 Water Wells
Nassau	Sanitary Sewer line replacement/repairs/relining	$0	EFC	Sanitary Sewer line replacement/repairs/relining
Nassau	Water line replacement/repairs	$0	EFC	Water line replacement/repairs
Nassau	Treatment at Well No. 8 and Plant No. 12	$2,221,556	EFC	
Nassau	Treatment at Well No. 15 and 16	$2,580,150	EFC	
Nassau	Boardwalk Replacement	$20,000,000	ESD	The 2.25 mile boardwalk that runs along the Atlantic Ocean is a magnet for resdients and visitors, for use in recreation and events, all year long. It is also a major component in the economic health of the City. The Southern Yellow Pine wood, nailed int
Nassau	Business District Improvements	$960,400	ESD	Replace concrete sidewalks with brick pavers on both sides of Franklin Avenue north of Eleventh Streetto Old Country Roadwith the exception of the east side of Franklin Avenue bdetween 11th & 12th streets (Sears) and on the west side of Franklin Avenue b
Nassau	DIABETIC MEDS	$150,000	ESD	Currently most health insurance providers in New York are using private companies to distribute diabetic supplies to it's patients. The cost of these supplies, such as glucose meters, test strops and alcohol pads are, in many cases, grossly overstated. Glucose meters are tipically billed at three times their cost at local drug stores, test strips are billed at double the drugstore pricess, and alcohol pads usually sell for a third less than the price billed to insurance companies. I will provide a bi-weekly average cost of the most commonly used diabetic supplies to all New York health insurance providers so that they can better negoiate a more reasonable prices they are currently paying. I estimate that HIP of NY alone, would save hundreds of thousands of dollars if they paid a more reasonable amount for these products.
Nassau	Roosevelt Park Marina	$0	ESD	Roosevelt Park Marina
Nassau	Littauer Estate Improvements	$0	ESD	Littauer Estate Improvements
Nassau	North Shore Acres Area in Glen Head	$0	ESD	North Shore Acres Area in Glen Head
Nassau	Westbury Movie Theater	$8,500,000	ESD	Westbury Movie Theater
Nassau	Private Commuter Bus Company Service	$500,000	ESD	Long Island Transit Bus Company is a private company that operates a commuter bus service. It would like to expand this service, adding employees, reducing pollution by taking cars off the road, and providing added quality of life to commuters.
Nassau	solar energy small business/education funding	$1,000,000	ESD	Funding to build small Long Island-based business involved in solar energy design and installation. Dollars provided would go to various activities, which may include installation and safety training of solar panel installers, training of others in energy efficiency courses, materials to be used to help educate young people (schools, scout troops, etc.) about renewable energy, costs of doing business, such as purchase and maintenance of trucks, construction/installation equipment, ranging from tools toscaffolding, and perhaps building rent for safe storage of solar panels and inverters, office area for back-office administrative operations and marketing/advertising expenses to create educational and sales materials, as well as stipend for initial salaries.
Nassau	Oyster Bay Chamber of Commerce	$0	ESD	Would like funding to help entrepreneurs stay in Oyster Bay and take the risk of opening a new enterprise. Would like to make investments in infrastructure such as improved lighting, sidewalks, road surfaces and aesthetics such as benches and bike racksfor Historic Oyster Bay
Nassau	Renovation of the Nassau Veterans Memorial Coliseum	$0	ESD	
Nassau	Business District Improvements	$960,400	ESD

Nassau	Building Solar Energy	$500,000	NYSERDA	We would like to move our villages thinking into the 21st century and aid in anyway possible to conserve energy and add solar power to our buildings,We already changing any lights in our buildings to energy efficient lighting
Nassau	Hospital HVAC Upgrades	$3,000,000	NYSERDA	This project will encompass replacement of obsolete hospital-based HVAC systems to provide required cooling capacity and enhanced energy efficiency in laboratory, pharmacy and radiology areas of the hospital. The existing mechanical systems, which are more than 30 years old, are inefficient, and inadequate to handle the increased heat load generated by state-of-the-art medical and computer equipment that has been installed in these technology-dependent, critical areas of the hospital. The new HVAC equipment is designed for integration with a computerized building management system that will allow for more precise temperature control, greater energy efficiency, and improved safety and indoor air quality. This project will generate an estimated 50 jobs.Design work has been completed. The project can be implemented without delay upon receipt of funds.
Nassau	Solar Power	$500,000	NYSERDA	We would like to add a Solar Power system to our Community building.We have a perfect building for this application. Thank you, Patrick McDermott Superintendent of Public Works
Nassau	Nassau Co Central Utility Plant Steam Line	$10,000,000	NYSERDA	Nassau Co Central Utility Plant Steam Line
Nassau	Post Park Solar Energy Installation	$0	NYSERDA	Post Park Solar Energy Installation
Nassau	Solar Powered Compressed Natural Gas refueling stations	$612,500	NYSERDA	Solar Powered Compressed Natural Gas refueling stations
Nassau	Solar Voltaic System at the East Rockaway Public Library	$50,000	NYSERDA	Solar Voltaic System at the East Rockaway Public Library
Nassau	Solar Panels and New Water Heaters and Boilers	$1,000,000	NYSERDA	Solar Panels and New Water Heaters and Boilers
Nassau	New Hybrid Cars - 20	$200,000	NYSERDA	New Hybrid Cars - 20
Nassau	Replace all cars with Hybrids	$500,000	NYSERDA	Replace all cars with Hybrids
Nassau	Solar Powered Compressed Nat Gas Refueling Station	$57,500,000	NYSERDA	Solar Powered Compressed Nat Gas Refueling Station
Nassau	hi efficiency room air conditioner replacement project	$1,500,000	NYSERDA	We will plan and promote a program to replace old innefficeint wall sleeve and window room air conditioners with new high efficeincy models. We will provide professional installation which will improve weatherization by keeping out heat in summer and cold in winter.
Nassau	Construct Solar Powered Building	$1,000,000	NYSERDA	The Town will build a solar powered maintenacne/storage facility in a public park so as to showcase clean energy technology. The Town will enter into a joint venture with the New York Institute of Technology. Students will design the building under the direction of a licensed engineer/architect. The size of the building will be determined in the upcoming weeks.
Nassau	Solar Housing Project	$1,000,000	NYSERDA	Construction of educational outreach facility through an interdisciplinary collaboaration of NYIT's Schools of Architecture, Engineering and Managemetn with the Town of Oyster Bay. The project will be to design, and construct a fully functional, stand-alone, solar powered building that will serve as a public/private partnership.

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Nassau	Energy Efficiencies	$300,000	NYSERDA	Implement energy saving initiatives throughout all three New York Institute of Technology New York locations - including but not limited to water usage, bio-diesle fuel use and solar panel installation.
Nassau	Weatherization Project	$385,000	NYSERDA	Weatherization of ten buildings currently owned and operated by the private not for profit Mental Health Association of Nassau County. Nine of the ten buildings are residences, with the tenth building used for daytime and evening programs as well as administrative functions. The project would include replacing existing windows with new energy efficient windows, new energy efficient doors, reinsulating structures where needed, and upgrading to energy efficient heating systems where needed.
Nassau	Solar Powered Compressed Natural Gas Refueling Station	$712,500	NYSERDA	Construct a 40 kw solar photovoltaic system on the roof of Dept. of Public Works central truck garage, along with a high volume fast fill compressed natural gas (CNG) refueling station
Nassau	Installation of 10 kw Solar Voltaic System at East Rockaway Public Library	$45,000	NYSERDA	Install 10 kw solar photo voltaic panel system on roof to augment power supply to the building.
Nassau	Solar Powered Compressed Natural Gas Refueling Station	$712,500	NYSERDA	Solar Powered Compressed Natural Gas refueling station: The Village of East Rockaway is planning to construct a 40 KW solar photovoltaic system on the roof of our Department of Public Works Central Truck Garage, along with a high volume fast fill compressed natural gas (CNG) refueling station. The 40 KV of electrical power generated will be utilized to operate the compressors that fill the CNG storage tanks. The CNG from the storage tanks is than transferred at high pressure into the fuel tanks of our fleet of CNG powered vehicles. There are significant environmental advantages to this proposed operation as we will reduce emissions from our diesel and gasoline powered vehicles, and reduce the dependence on oil used to generate power purchased from ourlocal electric utility LIPA. The construction of this station, which will be available to our neighboring Villages and School Districts creates real opportunities for expanding the number of clean CNG vehicles in use here on the south shore of Long Islanvehicles. CNG however needs to be compressed to high pressure to be used as motor fuel. Electric motors are used to drive high pressure pumps in the compression process. These high pressure pumps, or compressors as they are commonly known, use a great dein this process. Installing a 40 KW solar power system will significantly reduce the electrical power we need to purchase from the local utility company. This project has real potential to significantly reduce emissions and promote the use of sustainabl
Nassau	Installation of a 10 KV Solar Votaic System at the East Rockaway Public Lit	$45,000	NYSERDA	Installation of a 10 KW Solar Voltaic System at the East Rockaway Public Library The Village of East Rockaway owns the building that houses the East Rockaway Public Library at 477 Atlantic Avenue. The Library is currently undergoing a major exterior renovation to increase the insulation quality of the building. The windows and doors are being replaced with high efficiency units and the walls are receiving new layers of insulation. In the next phase of this project, we a planning to install a 10 KW solarphoto voltaic panel system on the roof, to augment the power supply to the building. The building has a flat roof with full southern exposure to the sun. The East Rockaway Public Library operates six days a week and serves over 120,000 patrons a year. The Library provides a friendly, warm in winter, cool in summer respite for many children and senior citizens. Brightly lit and always comfortable, the Library is a heavy user of electrical power. Our goal is to reduce the daytime reliance on purchased utto bid in 60 days. The project is projected to cost $45,000.00

County	Project	Requested $	State Agency	Additional Detail
Nassau	Budget Nanny	$65,000	OCFS	The ""Budget Nanny"" is a project where by the JCC will send a expert to the homes of five local families to observe their current financial situation and compare it to their past situation. This expert will meet with each family ten times over the course of a year. During this time they will provide suggestions and homework assignments to help the families consolidate their living expenses and teach them how to live with less. These new skills will assist the families to survive during the current difficult economic times. They will also serve the families well in keeping their finances in check when things turn around so they never find themselves in this position ag
Nassau	License Plate Recognization System	$120,000	OFT	Install 8 fixed compact automatic license plate cameras(infared and color) at 4 different locations in the Village of Sands Point to prevent and control crime. Information will be sent to a central server located in Police Headquarters where it will be m
Nassau	School Upgrade	$96,600	OFT	Upgrade Computer Hardware amounting to 12 computers and 2009 AutoCAD software licenses in the amount of 12. Additional 250 library books. 12 sewing machines and tables for NYSED approved Fashion Design Program. Marketing for Fashion Design Program, Intrerior Design Program and Computerized Drafting (AutoCAD) Program.
Nassau	A Project to Improve the Response Capabilities of the East Williston Fire De	$100,000	OFT	The East Williston Vol. Fire Dept. seeks to update and equip the training room and to make improvments in the Command and Control Room. EWFD is the fifth smallest FD in Nassau Co. and was constructed in 1889. The current condition of the building is poor. Upgrades to the training room will include lighting, electrical, plumbing, painting and video/audio equipment to facilitate training. We willalso install an OSHA required shower and male/female bathroom. We will also construct a closet for the first time in our history and a CHiefs and Adminsitrative officers work area to comply with OSHA, NFPA, and NIMS requirments. Upgrades to the Control Room will include radio installation, telephone lines, interoperable upgrades, coordination technology installion, and collaborative regionalized communication and response items in compliance with NIMS and HSPD #8, the All Hazard Approach to Emergency Management. The Village of East Williston is one square mile with no commercial tax base. We have no businesses awned including two power transmission lines. These needed repairs are beyond our fiscal capabilities and we respectfully request consideration. Thank you.
Nassau	Techno Inc workforce development	$0	OFT	create quipment and training programs to prepare students to compete in global economy

County	Project	Requested $	State Agency	Additional Detail
Nassau	THE FOURDSCAPE? UNCOMMON OPERATING PICTURE	$500,000	OHS	The project plan will productize a deployable Command and Control (C2) Common Operating Picture (COP) System product and deployment template process, utilizing Department of Homeland Security (DHS) sponsored, tested and proven fourDscape? applied technology, and will produce three major results: ? A commercially-ready fourDscape?-based deployment of an interactive common operating picture for the LI/NYC region, operating in New York State?s Applied Science Center of Innovation and Excellence in HomelandSecurity (CoIE) as the core visualization for a regional command center capability. ? Establishing productization methods and deployment processes that can be applied to produce a commercially-ready system product and deployment template process that can be effectively repeated and rolled out city-by-city, region-by-region, at a streamlined implementation cost. ? An operational testbed at the CoIE facility for integrating, testing and productizing new sensor technologies from National Labs, DHS-sponsor
Nassau	Hempstead Police Dapartment	$10,000,000	OHS	Build a new Police headquarters.
Nassau	Hempstead Volunteer Fire Department	$4,000,000	OHS	Replace fire apparatus, 3 engines, 1 floodlight truck, self contained breathing apparatus, repairs to firehouses and new emergency communications center.
Nassau	Nassau County Police Department	$220,000	OHS	2 resource officers for Uniondale, Roosevelt and Baldwin High School.
Nassau	Veterans Service Center	$500,000	OMH	The Mental Health Association of Nassau County, through the Veterans Health Alliance of Long Island proposes to operate 2 Veteran Services Centers - 1 will be located in Nassau County. The other will be located in Suffolk County. The Veterans Services Centers will provide outreach to veterans of all generations, mobile case management services to veterans and their family members, and training to mental health and substance abuse providers regarding PTSD and recovery. It is expected that 2,000 veteransand their family members will be served.
Nassau	Greening My School	$2,500,000	OMR	SLCD is a program providing educational services to autism spectrum disorders ages 3-21 years. We are located at 3 sites: Glen Cove (elementary school), Woodside Queens (middle school) and Richmond Hill (high school). The buildings are old (1930) and need to be renovated to meet the needs of students with disabilities. We would like our buildings to be ""green"" and energy efficient. We serve 450 students from Long Island, New York City and Westchester. There is no funding support from the State for usto do t
Nassau	Jones Beach SP - Cedar Creek Sewer Outfall Connection	$1,000,000	OPRHP	
Nassau	Jones Beach SP - Upgrade Sewage Treatment Plant	$250,000	OPRHP	
Nassau	Reconstruction of Westbury Village Cultural & Performing Arts Plaza	$8,500,000	OPRHP	Reconstruction of a once majestic Calderone-Vaudeville theater built in 1927 that has long been a vacant eyesore in a key downtown in the center of Nassau County. This 23,000 sf. building is footed block-to-block on a .44 acre parcel and is the most significant vacant property in the county. The structure and architecture is classical with a unique medieval Tudor style. Although its local village condemned the property for public safety and it has remained vacant since 2001, it was in fact a neglected and underutilized blight for twenty years before. The property was sold through a court-ordered bankruptcy auction in 2004. This theater is located in a distressed community within a low/moderate income census tract district that, but for this anchor location, has seen tremendous revitalization. Lowe Properties has worked with Westbury Village and Nassau County and is ready to revive the original historic theater, bring back performing arts and create a multi-use commercial/residential cultural arts plaz

Nassau	To restore the Memorial to the Bristol and the Mexico	$105,000	OPRHP	In the 1880's two Irish Famine ships sunk of the coast of Long Island. There were only 8 survivors. The victims were fleeing the Irish potatoe famine and met there fate, frozen to death on the decks of the ships. A memorial was errected to their memory in the Village of Rocville Center in the graveyard where they were buried. As the years went by, their memory was lost and the monument fell into disrepair and eventual ruin. The los of the two ships had a good side; it directly led to the formation of the US COast Guard. This monument represents both American history an Irish history. This is a chance in life time to fully honor those women and children who died alone, cold , and wet on a foriegn soil only yards from freedom. This project has got to getdone.
Nassau	Historical Oyster Bay	$0	OPRHP	Our hamlet needs funding to help entrepreneurs stay in Oyster Bay and take the risk of opening a new enterprise. Funding would allow us to make significant investments to infrastructure which would ultimately ensure that the hamlet attracts and retainsbusiness.
Nassau	Protect the 1926 Pumper	$100,000	OPRHP	East Williston Volunteer & Exempt Firemen's Benevolent Association is a group dedicated to the general welfare of the volunteer firefighters who protect the Village of East Williston on a daily basis. The symbol of the organization is a 1926 Maxum Pumper, which is the first engine purchased by the department. This truck serves as a symbol of the village as a whole, as well. An additional bay is needed to be constructed to protect the 1926 pumper from vandals and the elements. This project will create jobs in the construction field.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Nassau	Roslyn Harbor	$5,000,000	SED	Nassau county museum of fine arts expansion project
Nassau	Technology Staff Development	$1,350,000	SED	Lawrence Public Schools is closing a school building and consolidating the students into the remaining buildings. Though this will be a savings, it is from a reduction of approximately 24 teaching positions and about the same amount of civil service positions. If we could get Federal Funding to retain up to six of these teaching positions for the next three years, we could use them as Technology Staff Developers. Not only would these positions be saved, but we could provide an opportunity for our schools that doesn?t exist. Our teachers do not have technology support in the area of instruction at the building level and we are clearly behind our neighboring school districts. The benefits would be in using effective technology instruction for the students and enhanced teaching throughout the district. Our school district has suffered so many budgetary cuts this year and the opportunity to have Technology Staff Developers to move us forward in a way that students require for their futures is vital. Pleas

Nassau	After School Academic Support & Enrichment Program	$50,000	SED	There is a tremendous need for after school academic support that is of a high quality and is affordable. This is predominantly for minority communities. This project is envisioned to support 50-100 middle school students, with 2 program directors and adjunct staff. The program will run during the week from 3-8 p.m. at the Herricks Community Center. It will maintain a scholastic calendar. This project is an extension of the organization's outreach. Young Indian Culture Group, Inc. has been serving the community for over 15 years and is a landmark organization, recognized for the quality of its program. Please visit www.yicg.com for details.

New York	KENNEDY MEMORIAL COMMUNITY CENTER AND KENNEDY CHILD ST	$40,000,000	DASNY	The Catholic Charities Community Services of the Archdiocese of New York KENNEDY MEMORIAL COMMUNITY CENTER AND KENNEDY CHILD STUDY CENTER FACILITIES REDEVELOPMENT PROPOSAL 134 West 134th Street, New York, NY Background The Kennedy Memorial Community Center, located at 34 West 134th Street in Manhattan, was built around 1940 as The Harlem Boys Club. While it is an aging, out-dated facility surrounded by the Lennox Terrace residential complex, it has the benefit of being situated on the north side of a relatively large 165' by 214' (35,310 s.f.) property. During the last four or five years the owners of Lennox Terrace have developed plans for increasing the number of apartment buildings on their site and, as part of their proposal, have offered to relocate the Kennedy Memorial Community Center to facilities within the new buildings and create a public park on the site of the current building after its demolition. During the planning process, it became apparent that there was also a real opportunity to cved who live in Harlem, East Harlem and Washington Heights. As a result, the plans were updated to provide for these additional program facilities. Faced with the current financial crisis, however, the owners of Lennox Terrace abandoned their project andpursuing it further at this time. Catholic Charities, in the meantime, has proceeded with developing a design for constructing a new building in the large rear yard south of the existing community center which would house both the combined facilities of
New York	African Americans for Fine Arts Sake	$10,000,000	DASNY	African Americans for Fine Arts Sake is a Non-for-Profit Organization that strives to promote Fine Art Industries as a career for African Americans ages 12-24. Art forms such as professional Photography, Architecture, Painting, Sculpting, Graphic Arts, Fashion & Editorial Writing, these are fields that African Americans are noticeable missing from. We want to show the youth of the next generations that these are Professions within their reach, even to those that are attempting it, we would like to helpwith Scholarships and Grants. We would provide Counseling, Classes, Mentoring, Grants, Field Trips, Internships and Training to those that are interested in perusing a career in the field of Fine Arts.
New York	Construction of a distance learning laboratory	$1,250,000	DASNY	This project will enable the College to provide students and faculty with synchronous and asynchronous learning opportunities. We anticipate 40 work stations on-site, with broadcast capabilities to other locations around the globe.
New York	Mayoral Challenge & Sustainability Committee Projects	$1,700,000	DASNY	NYC Mayoral Challenge Planning and Carbon emissions survey, University Wide Sustainability committee projects, including lighting energy conservation projects.
New York	New York City Campus Capital Improvements	$52,700,000	DASNY	Capital renovation projects to improve ADA accessibility access, improve energy management systems including other sustainability measures, a student information learning commons, and safety upgrades
New York	NYC Campus Master plan	$130,000,000	DASNY	Develop a feasibility plan for the redesign of the NYC campus to strategically plan for consolidating space and cost containment across the 5 primary non-dormitory buildings, identify a new presence for the Lubin School of business
New York	Manhattan Campus Deferred Maintenance	$1,800,000	DASNY	Replace and upgrade dated chiller and control systems with high efficiency equipment and controls to better improve the building environment for students.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	Animal Magnetic Resonance Imager	$4,400,000	DASNY	The Weill Cornell Medical College Department of Radiology has the goal of achieving international recognition as a premier research imaging department. A key component of the infrastructural support for imaging at the sub-cellular and cellular level is the translation of advanced microscopic imaging of animals for research purposes. The Department of Radiology proposes to acquire a 7.0 Tesla 30 cm bore magnetic resonance imaging (MRI) system to be located at the Citigroup Biomedical Imaging Center designed for imaging small animals. This would be the first small animal MRI system at WCMC satisfying a critical need in the development of animal models of disease. The Medical College has applied for and been granted funding for this equipment from theNational Center of Research Resources, a component of the National Institutes of health (NIH). The animal MRI will be used in support of NIH sponsored research grants including the research of disease staging and therapeutic monitoring of leukemia and ly
New York	Biomedical Research Building	$778,000,000	DASNY	Weill Cornell Medical College plans to construct a new state-of-the-art biomedical research building on East 69th Street between York Avenue and First Avenue. It would have a gross area of approximately 507,179 square feet. The building would be 16 stories high with two mechanical stories and would house research lab space, classrooms and offices. Modern research lab space with the kind of large floor plates that this project would provide is critical in permitting the College to meet its educationalmission. Upon completion of the project the College will also be better positioned in relation to other other educational institutions, who currently possess such state-of-the-art space, for research funding such as that secured from the National Institutes of Health. Research disciplines to be housed in the building include cancer, global health, children?s health, obesity, diabetes, neurological disorders, aging and reproduction.
New York	Department of Otorhinolaryngology ? Expansion of Pediatric Services	$2,000,000	DASNY	In 2007, the Department of Otorhinolaryngology relocated its activities to the fifth floor of the Weill Greenberg Center. The clinical programs offered have been extremely successful, far exceeding all projections, resulting in the department outgrowingits current facility. The Pediatrics section has grown exponentially and with the addition of new specialists, dedicated space is required. Oxford Suite 100, consisting of 3,500 gross square feet, will be renovated to provide a pediatric themed waitingroom, three patient examination rooms, two audiology testing booths, and clinical and office support space. Existing electrical and HVAC supply as well as information technology systems will be upgraded to support operations. Lighting and existing finishes will be refurbished.
New York	New Laboratories for the Division of Immunology	$8,400,000	DASNY	Among the strategic priorities established by the Medical College?s Department of Medicine is the provision of state of the art laboratories for the Immunology Division. The laboratories will allow new researchers to build on the discoveries in cytokineregulation of the immune system of the current Division Chief. The new bio-medical wet laboratory will occupy the entire fifth floor (approximately 7,647 gross square feet). This floor was left as a shell floor for the new strategic initiatives during the base building renovation, which has just been completed. Immunology requires wet benches and various procedure rooms including a tissue culture room, dark room, microscopy room as well as specific support services: an autoclave, equipment room, coldroom, glass room, etc. The research functions will utilize the existing vivarium located on the fourth floor of the building. Administrative spaces including private offices, meeting rooms and employee break rooms will also be provided

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
New York	Obstetric Suite Renovations	$6,600,000	DASNY	The Department of Obstetrics & Gynecology Outpatient Suite, located in the Oxford Building, 428 East 72nd Street, is a highly successful outpatient program serving approximately 100 to 150 patients per day. The current space is well suited to the program, but existing furnishings and finishes have exceeded their service life requiring replacement. The program seeks to replace the existing flooring and ceilings, repaint walls and trim, provide new Waiting Room furniture, and make some minor modifications to the existing Nurses Station Area and Administrative Area that will enhance patient care, patient privacy, and upgrade current care standards.
New York	Relocation of Public Health Psychiatric Practice	$540,000	DASNY	The Department of Public Health?s Psychiatric Practice of Dr. Robert Millman is forced to relocate as its current location is being demolished. 907 net square feet has been leased at 418 East 71st Street for its relocation which will include a psychiatric consultation room, waiting area, and support offices. Alterations of the space include the relocation of walls, and modification of the heating and ventilation systems
New York	Renovation of the Research Animal Resource Center	$17,000,000	DASNY	This project is the final phase of a 3 phase Master Plan to renovate the Medical College?s Research Animal Resource Facilities. The project will renovate approximately 13,500 gross square feet of space on the third, second and sub-basement floors and the rooftop mechanical rooms. The renovation will provide small and large animal housing, a surgical suite, and related technical and animal support spaces, including an expanded rack washer facility, autoclave, procedure rooms, staff toilets, employee changing rooms, and storage. A dedicated air handler unit will be installed to serve the main animal facility on the third floor, bypassing the existing building system. A supplemental chiller will be installed to provide shoulder period cooling currentlynot available. Electrical, steam, plumbing, and mechanical systems will be upgraded. New information technology and security systems will be provided. The animal freight elevator will also be modernized.
New York	Sleep Disorder Center	$8,000,000	DASNY	The goal is to create a Sleep Disorder Center which meets the accreditation requirements of the American Academy of Sleep Medicine and in compliance with ADA requirements for physically challenged patients. The Center will house twelve (12) beds projected to generate over 3,000 studies annually. The patient population will include adults, bariatric patients, infants and children. Both nighttime and daytime studies will be conducted. The scope of work provides for the creation of twelve (12) sleep rooms with oxygen, two way communications, visual monitoring, polygraphist recording, and direct clinical reporting capability. Each room will be a minimum of 140 net square feet and will provide for daytime consultation/examinations, nap studies, and nighttime sleep studies. A reception/check-in, waiting, and check-out rooms will be constructed as well as a patient/staff lounge, clean linen and soiled linen rooms and charting/file rooms.

County	Project	Requested $	State Agency	Additional Detail
New York	Upgrade of Primary Care Practices	$2,000,000	DASNY	Weill Cornell Medical Associates has been providing primary care in internal medicine, obstetrics and gynecology, and pediatrics at its East Side and West Side satellite locations. The Centers serve as an introduction to main campus Weill Cornell Medical College clinical services directed to a community that would otherwise be oriented to services offered by nearby competing medical institutions. In order to remain competitive as an attractive and contemporary off-site medical facility providing the highest standard of healthcare, a general renovation of the Centers is planned. Renovations include the creation of three (3) new check-out areas, a main reception/check-in area, a billing area, and new audio-visual equipment. Doctors office suites willbe upgraded, an additional exam rooms and nurses offices will be created for each of the three specialties. A call center of eight (8) stations to serve patients will be constructed at the West Side location.
New York	roof repairs	$27,000	DASNY	To repair and or replace broken roof trusses, also to replace old and worned out roof.
New York	Facility Improvement Project	$8,300,000	DASNY	The project consists of a planned construction of a new facility at 1880 Boston Road in the tri-section of the Crotona Park, East Tremont and West Farm areas of the Bronx, adjacent to the Cross Bronx Expressway. CP of NYS offers a wide range of programsand services in New York City designed to support individuals with disabilities in leading more independent and productive lives. CP of NYS operate an Article 28 Diagnostic and Treatment Center on East 149th Street in the Bronx. These facilities have become completely inadequate and CP of NYS has developed a planto relocate to the more centrally located site mentioned above. The reolocation will provide improved access with full accomodation in waiting rooms and treatment facilities with specialized equipment.The OMRDD programs and staff will also be relocated to the new facility and the project will involve 48,000 square feet of space and create 25 permanent jobs along with the construction jobs. Ultimately the project will include the development of
New York	Center for Science and Medicine	$100,000,000	DASNY	In order to improve clinical care and enhance research the Mount Sinai Medical Center is planning a 500,000 square foot state of the art medical science, research and clinical facility. The benefits include: 1260 new construction jobs for each year of construction, 650 new permanent jobs with an annual payroll of $40 million, 400 new patients visits a day, expanding research space will enhance cancer, brain, heart disease, asthama, diabetis, hypertention, obesity and clincial care, as much as $80 million in additional NIH funding
New York	Boriken Neighborhood Health Center	$15,000,000	DASNY	Capital Relocation Project: 'Green' Primary Care Facility
New York	Community Healthcare Network	$621,402	DASNY	Renovation and Expansion of Community League Health Center
New York	Community Healthcare Network	$298,106	DASNY	Renovation and Expansion of Helen B. Atkinson Health Center
New York	Community Healthcare Network	$996,734	DASNY	Expansion and Renovation of Downtown Health Center
New York	Metropolitan Museum of Art	$10,000,000	DASNY	Renovation of the American Wing of The Met
New York	Fashion Institute of Technology (FIT)	$74,000	DASNY	Greening of FIT
New York	New York Public Library	$2,000,000	DASNY	Renovations for children's branches in Belmont & Riverdale
New York	CUNY Grad Center	$1,750,000	DASNY	Technology Infrastructure - ""smart classrooms"" tech upgr
New York	NYU modernization projects	$650,000,000	DASNY	Greening, energy efficiency, fire safety, ADA compliance, etc
New York	Primary Care Development Corporation	$35,000,000	DASNY	20 separate primary care facilities in underserved areas
New York	New York University College of Nursing	$2,000,000	DASNY	Green renovations to NYU Nursing School

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
New York	The National Environmental Surveillance and Technology Center (NEST)	$8,000,000	DASNY	Throughout the developing world, deteriorating environmental systems are a well-documented source of entrenched poverty, social instability, mass migration, and military conflict. Our goal is to support the environmental diplomacy agenda of the Nation, by creating The National Environmental Surveillance and Technology Center (NEST), an early warning system for the world's current and emerging environmental crises. NEST will be co-designed by scientists, technologists, policy-makers, and strategic military planners to identify destabilizing environmental threats, and to craft alternative diplomatic, non-military interventions. NEST will produce human capital, ideas, tools, solutions, and knowledge infrastructure to address this challenge. A 10-30 year forecast and planning horizon will be emphasized. Professor Vorosmarty and his team are nationally recognized leaders in environmental research and assessment, leading major efforts similar in scope to NEST. CUNY will make substantial in-kind contributionies are a next generation of diverse New York students made technology-ready to address this security challenge.
New York	Energy Efficiency Conversation Upgrade	$140,000	DASNY	Old and non-efficient plumbing fixture replacement in all remaining Inmate Cells shall be with Penal - Ware style Fixtures, designed for high abuse by Inmate population. Installer will re-use all existing hangers and Brackets, seals to be replaced and anydamaged studs. Existing fixtures are easily broken and pose a safety risk for officers as well as a problem for maintenance.
New York	Nursing College Renovation Project	$2,000,000	DASNY	The project includes the construction of a 70,000 sq/ft state of the art new nursing school facility. The project calls for a renovation of space for the Nursing College to move into in the interim years. The cost supports a renovation as well as system,infrastructure and mechanical upgrades for energy efficiency.
New York	Renovation and Modernization of Article 28 Dental Clinic	$17,800,000	DASNY	This project involves the renovation of over 29,000 sqaure feet of existing clinical space to help support modern technology and new dental operatories, a new oral healthcare environment for children, a 27 dental chair facility and a 4 chair suite for anOthodontic Rehabilitation Program. NYUCD is the single largest provider of low cost dental care in New York State and serves as an essential safety net for the underserved, uninsured and at-risk members in the community.
New York	Centrifugal Chillers	$5,100,000	DASNY	This project includes the addition of two 450 ton premium efficiency electric centrifugal chillers to provide sufficient air handling. The age of the exisiting chillers has resulted in loss of system capacity of approximately 22% due to control deficiencies at the air handler coils. The projected energy consumption of the Premium Efficiency Electric Centrifugal Chillers is an Annual Electric (kWH) of 980,030 and Annual Carbon footprint (lbs.CO2) of 970,230. Electric centrifugal chillers are more energyefficient than steam absorbers and comparatively new chillers are approximately 20% more energy efficient than chillers which were made in the early 1990's.
New York	Electronic Patient Records project	$5,000,000	DASNY	This project includes development of a paperless and filmless electronic patient record system. Paperless patient records would allow for easy and secure portability and communication between healthcare providers, as well as reduce incidental duplicate delivery of services. An electronic patient record provides readily available information for emergency services and, most importantly, permits the delivery of th emost sophistacated patient care by having every healthcare provider as appropriate, informed about the patient's entire health history.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	Extension Clinic Construction	$500,000	DASNY	Medalliance is an existing multi-specialty Article 28 diagnostic and treatment center located in the Bronx that provides a vast array of primary and specialty medical services. This proposed extension clinic at 514 East 149th Street will enable Medalliance to continue to deliver high-quality primary care, as well as a broad scope of specialty medical care and some therapies to the underserved community in the South Bronx. It is projected that the clinic will provide over 11,000 annual visits. This project entails extensive renovations of the existing space as well as the purchase of equipment. The total cost to complete the extension clinic is approximately $500,000 and any assistance you can provide would be deeply appreciated.
New York	Facility Renovation and Construction project	$10,000,000	DASNY	Medalliance is an existing multi-specialty Article 28 diagnostic and treatment center located in the Bronx that provides a vast array of primary and specialty medical services. The plan is to construct a new, three story building on an existing parking lot in front of the current site. Medalliance will continue to deliver health services during construction.
New York	Emergency Department Renovation Project	$85,000,000	DASNY	This project involves the renovation and reconstruction of the Emergency Department to enhance capacity and to upgrade diagnostic, treatment, information and communication technology. Mechanical systems will be upgraded, including sprinklers, fire alarms, nurse calls, lighting, information technology, cabling for medical gases suction and medical air. A new trauma room with all the necessary equipment is also planned.
New York	Health Information Technology Project	$3,000,000	DASNY	This project involved the purchase of EPIC hardware and hardware set-up equipment. This system allows seamless access across the care continuum by providing users with the ability to track documentation, orders, medication and other data regardless of where patients receive treatment.
New York	Clean Onsite Energy System and Cogeneration Plant Project	$2,000,000	DASNY	This project is the first phase of a multi-phase project for a clean energy onsite energy system and cogeneration plant. The project would include energy management initiatives including demand control and continuous commissioning systems that will contribute to the goal of a 30 percent carbon footprint reduction. Phase I will also include funding for the planning and design of a cogeneration plant. The total project cost of all phases of the project is estimated to be approximately $150 million. In aneffort to incorporate the needs of a new ?green? system, there will be an expected reduction in carbon dioxide emissions of about 18,950 metric tons per year. This is the equivalent to removing the carbon that would be absorbed by 15,795 trees or removing the carbon emissions of 12,569 cars. Operational cost savings to the Medical Center are estimated at $7 million annually. In addition, the installation of a new chiller and the implementation of advanced controls will provide optimal plant production,ze waste water and improve the overall energy efficiency throughout the camps.
New York	Heating Systems/Boiler Replacement	$2,700,000	DASNY	Terence Cardinal Cooke Health Care Center, East Harlem, requests funds to replace the current heating system with a state of the art dual fuel (gas/oil) heating system in order to reduce fuel consumption and increase energy efficiency. The current heating system, installed in 1964, is in urgent need of replacement due to the failure of several main components that are beyond repair. As a result the Center has had to install a temporary heating unit outside of the building to provide heat to its 729 frail, elderly, and developmentally disabled residents. In a addition to energy efficiency a new system would incorporate the latest green technology resulting in fewer emissions and increased cost savings.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	Resident/Patient Call System Replacement	$771,550	DASNY	Terence Cardinal Cooke Health Care Center, East Harlem, requests funds to replace the 729 room resident/patient call system. The call system enables residents to directly notify staff of their medical and care needs and allows staff to respond to those needs in the quickest and most efficient manner possible. The current call bell system is forty years old and we are unable to get parts to maintain functionality. We plan is to install a Rauland Responder 4000 Resident Call System which is both an audioand visual system ensuring prompt staff response.
New York	Fire Alarm Replacement	$3,200,000	DASNY	Terence Cardinal Cooke Health Care Center, East Harlem, requests funds to replace the current Fire Alarm system with a state of the art integrated system. Currently, there are three systems in use at the Center in varying degrees and fashion. Most of thesystems currently in use are over 20 years old and beyond their anticipated life span. The systems do not provide a cohesive and reliable simple mechanism for emergency use and maintenance. Components of a new system would include analog master controlunits, remote annunciator panels, head-end computers with graphic display capabilities, fiber optic conductors and redundant control units. A new fire alarm system would benefit the facility in the following ways: 1) provide a single integrated system which would allow for easier monitoring; 2) ensure rapid response time of in-house and fire personnel and most importantly 3) ensure safety for our 729 frail, elderly and disabled residents.
New York	Long-term Acute Care Hospital (LTACH)	$7,400,000	DASNY	Terence Cardinal Cooke Health Care Center, skilled nursing facility in East Harlem, requests funds to renovate its 50-bed Long-term Acute Care Hospital (LTACH) to meet the acute medical needs of a critically ill population. An LTACH provides acute care for patients with extended inpatients stays (defined by federal statute as an average of greater than 25 days). The LTACH will improve the cost-efficiency of the health care delivery system by creating an appropriate discharge placement option for these medically complex patients therefore reducing the overall health care spend. Access to these LTACH?s is crucial to a small, but critically-ill population of patients to achieve medical recovery and return home, if possible. These patients have multi-system disorders which include respiratory, renal or cardiac failure, neuromuscular or cardiac disease and cancer. Many patients require ventilator support and may have failure of two or more major organ systems. Demand studies for NYC show a need for 80 addi
New York	Federally Mandated Sprinkler System Update	$2,300,000	DASNY	Terence Cardinal Cooke Health Care Center, East Harlem, requests funds to fully sprinkler the complex. Federal regulations mandate facilities like the Center to ensure complete sprinkler protection no later than August 13, 2013. The retrofit upgrade of the fire sprinkler system will be undertaken to comply with the new federal regulation. The current sprinkler system does not cover the entire facility thus placing our 729 frail, elderly and developmentally disabled residents at risk. A new system wouldprovide 100% coverage of the facility and include: new piping, sprinkler heads, and booster pumps to support standpipes.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
New York	Government Mandated Article 28 Clinic Conversion	$2,800,000	DASNY	Terence Cardinal Cooke Health Care Center, a facility catering to the long-term care and outpatient needs of special populations in East Harlem, requests funds to convert its outpatient clinic to an Article 28 clinic under the New York State Department of Health (NYSDOH). The current clinic provides primary medical, dental, rehabilitation, and specialty medical care to approximately 1800 children and adults who have developmental disabilities (i.e. mental retardation, autism, cerebral palsy, epilepsy, traumatic brain injury), and is licensed under the New York State Office of Mental Retardation and Developmental Disabilities (OMRDD). As per a mandate by OMRDD and NYSDOH, the clinic must be renovated and brought up to code to become licensed under the NYSDOH. Once converted, this mandate will enable the clinic to care for additional people in the medically underserved East Harlem area providing better access to quality medical care for people on Medicaid.
New York	Island Asphalt Road Repaving	$1,300,000	DASNY	Repaving of approx. 200,000 sq feet of asphalt roadway. Milling and removal of 2 inch of asphalt and replacement with new asphalt.
New York	East 4th Street Cultural District Infrastructure	$3,400,000	DASNY	FAB proposes an investment of $3.4 million to complete six capital projects already in various stages of design and construction in the East 4th Street Cultural District - one of only two official cultural districts in New York City. Once completed, thecultural district will include 13 theaters, 4 dance studios, 5 rehearsal spaces, and a ""green"" scenic & costume design shop. $16 million has already been committed; additional funding will make it possible to improve handicapped accessibility, create additional rehearsal spaces, clear blighted backlots, plant trees and improve sign
New York	Mount Sinai Queens Hospital Building	$75,000,000	DASNY	Mount Sinai Hospital of Queens is proposing to build a 9 story, 165,000 square foot patient care tower and expand to meet the needs of the growing yet medically unserved community of Western Queens. This project will double the capacity of the EmergencyDepartment and increase the quantity and quality of acute care available in the area. The proposed expansion (adjacent to the existing hospital) would result in an increase of acute beds from 192 (234 certified) to 250 beds. Highlights of the new tower include: --expanded Emergency Departement that would add an additional 20 treatment bays --An expanded ED that would allow for 23 hour observation capablity --98 new medical/surgical beds --12 new Intensive care beds --5 new operating rooms Mount Sinai Queens is an antiquated, grossly undersized facility that is unable to keep up witht he growing needs of its patients. This building proposal attempts to meet those needs.

County	Project	Requested $	State Agency	Additional Detail
New York	Renovation & Construction of Multi-tiered Group Residence for Youth in Fos	$2,500,000	DASNY	Good Shepherd Services [GSS] will restructure its residential programs to implement a 46-bed multi-tier program providing a continuum of care to support the goal of least restrictive care as appropriate to the young person?s needs. The facility is for young women between the ages of 12 and 21 who are experiencing emotional or behavioral dysfunction to such an extent that they cannot be safely maintained in a family environment, and are placed with GSS through the NYC Administration for Children?s Services. The funding request is to help cover the cost of renovation and construction necessary to this program as follows. Renovation: A. Update electrical feeds for new loads such as fire pump, chiller, fan coil unites, lighting and outlets. B. Replace maindrainage, branches, and plumbing fixtures. C. HVAC: new boiler, rooftop cooling tower to feed individual fan coils; Replace leaky radiators in each bedroom D. Interior: New flooring, paint, lighting, window and treatments, bathroom tiles, ceiling work,ntial staff. B. Renovate 3rd floor space to house 5 classrooms to accommodate 12 students each, an arts & crafts room, a dining room and medical suite.
New York	New Engineering Labs	$2,500,000	DASNY	Construct new engineering labs on Manhattan campus to address increased student enrollment.
New York	Clearview Cinema renovation	$2,500,000	DASNY	Renovation of theater to upgrade seating, lighting and staging area to accomodate student use, conferences and community events.
New York	Marine Science, Technology and Training Center (""MASTT"" Cen	$3,800,000	DASNY	The School is seeking $3.8 million in Capital Funds to create the Maritime and Science Technology and Training (?MASTT?) Center on Governors Island. The MASTT Center will be housed in Building 134, a 9,000 square foot two story brick structure built in 1984 for the US Coast Guard, and vacant since 1996 when the USCG left the Island. The building and the vast majority of this 172 acre island in the heart of New York Harbor have remained unpopulated since. The federal government gave the Island back to New York State in 2000 for ""public and educational"" uses. The NY Harbor School will be the first tenant on the island, and is the intitutional keystone in a 5-year old plan to convert the Island to greater educational use. The requested funding is beingsought for building renovation (including wiring and plumbing, windows, doors, roof repair), waterfront and foundation infrastructure including bulkhead repair and floating docks, and equipment needed to fit out the Center as an educational and training
New York	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of three residences and four day programs inNYC.
New York	Metropolitan Museum of Art	$2,370,000	DASNY	Letter for Support for the Metropolitan Museum of Art's shovel-ready project: infrastructure project for the south roof of the museum.
New York	NYU Langone Medical Center - Emergency Department Renovation	$85,000	DASNY	The NYU Langone Medical Center's Tisch Hospital cares for over 39,000 Emergency department patients per year, a growth of 40 percent over the past five years. Moreover a neighboring hospital, Cabrini Medical Center, with approximately 30,000 Emergency Department visits per year, closed in 2008, which has added to the problem of overcrowding. This project involves the renovation and reconstruction of the Emergency Department to enhance capacity and to upgrade diagnostic, treatment, information and communication technology. Mechanical systems will also be upgraded, including sprinklers, fire alarms, nurse calls, lighting, information technology, cabling for medical gases (oxygen) suction and medical air. A new trauma room will all the necessary equipment is also planned.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	Renovation of the Columbus Medical Center in Queens	$3,000,000	DASNY	The NYU School of Medicine recently purchased the 25,000 square feet facility located in the Rego Park section of Queens, enabling the Medical Center to implement its ambulatory growth strategy to have more community based physicians. Renovations will allow us to provide our current patients who reside in Queens easy access to the NYU National Cancer Institute's federally designed Clinical Cancer Center. These patients will be able to receive physician care, research protocols, chemotherapy infusions,and high-end imaging closer to their homes.
New York	The Rev. Linnette C. Williamson Memorial Park Association education proje	$7,000,000	DASNY	Supplement public school education with a quality after-school program and provide day care services to disadvantaged children.
New York	NYU Langone Medical Center- Tisch Hospital Emergency Dept. renovation	$85,000,000	DASNY	Renovation and reconstruction of the Emergency Dept. to enhance capacity and upgrade technology and mechanical systems. A new trauma room will also be included.
New York	NYU Langone Medical Center - Health Information technology	$3,000,000	DASNY	Purchase of Epic hardware and hardware set-up equipment.
New York	Initiatives for Development and Employment Alliance (IDEA)	$0	DASNY	
New York	Dwyer Cultural Arts Center	$900,000	DASNY	Economic and Community Development Provide matching funds for first five years of operations to support programming, audience development, training, staff and media equipment for operations of a new Harlem-based arts and media center, strengthening Harlem as an arts and culture destination for tourist and residents and assist Harlem to capture a greater share of NYC's $2-3 billion annual tourism and culture industry.
New York	Security Upgrade Rehabilitation	$35,000	DASNY	Replace building entrance to upgrade security. Install security cameras in two elevators, which requires some elevator disassembly and reassembly routing cabling.
New York	Humanities and Social Sciences Library - Energy Conservation	$17,000,000	DASNY	This project will replace worn, non-functioning equipment with new energy efficient systems which meet LEEDs requirements reducing energy consumption and saving money. The scope of this project will include the replacement of the main chiller plant, chiller units, replace and relocate two air handlers, replace air handlers in attic, central stack HVAC system, BMS system, upgrade electrical transformers, sidewalk vault and associated abatement required.
New York	Facade Restoration	$10,000,000	DASNY	The New York Public Library's Humanities and Social Sciences Library, located in the heart of midtown Manhattan at Fifth Avenue and 42nd Street, is a designated historic landmark because of its significance to the heritage of the United States of Americaand the City and State of New York. Within its elegant architecture resides an institution dedicated to the collection and preservation of all human knowledge and the world's cultural treasures. Unfortunately, the Library's facade is in serious need ofrestoration and cleaning. Years of weathering and acid rain have had a critical impact on the performance of the marble facades and the roof to such an extent that there exists the potential for leaks and falling pieces of stone that could cause harm topedestrians outside and to collections inside. The work includes: exterior marble masonry cleaning and restoration, sectional replacement and upgrades as well as reconstruction at roofs and gutters, restoration and localized corrective work of monumentalcompasses the high roof, the main roof,,steep monel areas, the main roof low slope monel areas, the main roof flat areas, the north courtyard roof , the south courtyard roof and the 40th St.extension

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
New York	STEPS to End Family Violence	$270,000	DCJS	Funding will be used to provide on-site counseling at Rikers Island Women's Facility and re-entry services to women returning to the community after a period of incarceration at State or NYC facilities. This will include funding to support a job trainingprogram for women returning to the workforce after incarceration. The women will receive job training and work readiness counseling. This will include a 14 hour a week internship on-site for 4 to 6 women. Women will also be assisted in completing resumes and obtaining job interviews. The following outcomes are expected: 100 women will receive both group and individual counseling to prepare them to re-enter the community. Counseling will focus on the following areas: family relationships, parenting, jobreadiness, domestic violence, health & mental health issues, and substance abuse. Concrete services regarding housing and income assistance eligibility will also be provided. Counseling goals will include:
New York	STEPS to End Family Violence	$200,000	DCJS	The STEPS legal program provides both counseling and legal assistance to victims of domestic violence and their children. We work with survivors of all ages - children, teens, and adults. This funding would support one attorney, a social worker, as wellas program supervision and evaluation. We anticipate that with this funding, 50 survivors would be provided with legal assistance and 30 survivors with individual, group, or family therapy.
New York	Tactical CommunicationsVehicle	$80,000	DCJS	A Tactical Communications Vehicle is a large 4 Wheel drive SUV type vehicle that can transport personnel and has all the capabilities to achieve field interoperable communications between different agencies assigned to one operation. A tactical Communications Vehicle would be used in the field to insure true interoperability between Local, State, County, and Federal Agencies involved in mid to large scale operations such as the Ralph Bucky Phillips search, the October surprise storm of 2006 and any other mid to large scale incidents. The implementation and use of this vehicle would streamline the use of Incident Command, allowing the Communications Center to serve the rest of the county during these incidents.
New York	Energy Efficiency Upgrade Sheriff's Building	$750,000	DCJS	Remove and replace steel panels and insulation in Building #1 exterior. Current structure is leaking and decomposing. Replacement will make structure more energy efficient and secure.
New York	Sylvan Beach Replenishment	$250,000	DEC	Replenish sand beach-Sylvan Beach is the premier tourism destination in Central New York; the only industry here is tourism. Located on the East shore of Oneida Lake, it is also bordered by Fish Creek and the Erie-Barge Canal. Since about 1916, followingthe installation of the Canal, the sand beach has eroded to a point where it is almost gone. This beach was over one mile in length and is open to the general public. Engineering made possible by a Local Waterfront Revitilization Program grant has beencompleted and permits from NYS DEC and the Army Corps of Engineers are nearly approved. This is a huge natural resource that must be rehabilitated in order to keep Sylvan Beach economically viable.
New York	Hudson River Park - Pier 40 projects	$57,000,000	DEC	Jacketing on pier piles, new roof, stabilizing pier (evacuation)
New York	Southpoint Open Space Seawall Reconstruction	$10,672,200	DEC	Reconstruction of approx. 1,800 linear feet of seawall located at the east and west shorelines adjacent to the Southpoint Open Space Project. In addition, augmentation of existing revetment with additional rip-rap stone. Based on the engineering studiesconducted by the Corp. of Engineers dated 2001 and by Ocean & Coastal Consultants, date 2007. Estimated time for project to be shovel ready is 6 - 9 months.
New York	Southpoint Opens Space Wild rooms/ Wild Gardens	$1,000,000	DEC	Original open space fixtures and lighting that was removed due to budget constraints.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
New York	Catskill Mt. Organics Composting Systems	$250,000	DEC	We are developing an in-vessel, state-of-the-art composting facility in Greene County, New York to divert up to 10,000 yards per year of combined green waste, yard waste and food waste from landfills and burn facilities. We will accept food scraps and compostable materials from Albany, Greene County and surrounding communities. We will compost the waste into high grade soil amendments. Currently there are no facilities in the Greene County that provide this service.
New York	Removal of an underground heating fuel tank	$400,000	DEC	Removal of a heating oil tank at one of our building sites. The project would include fuel tank and contaminated soil removal. This project is not state aidable because the building is not student occupied.
New York	YWCA Residence for Women	$2,600,000	DHCR	The YWCA Residence for Women is a $23 million green affordable housing preservation project that is absolutely ?shovel ready.? However, commencement of this project has been compromised by the decreased value of tax credit pricing, generating a $2.6 million gap in project financing. The YWCA Residence for Women project has widespread support from public and private agencies throughout the City, County and New York State but needs your help to make sure that it receives gap filling funds. The YWCA Residence for Women is the only provider of permanent affordable housing and supportive services for adult single women in White Plains and Westchester County. The YWCA Residence for Women provides safe, affordable housing for low-income single women who struggle with conditions that prevent them from maintaining stable housing such as mental illness, substance abuse, domestic abuse, medical handicaps, developmental delays, and/or a former period of incarceration or homelessness. This project will not only crtate and beyond.
New York	Greenhope Services for Women	$7,100,000	DHCR	Purchase and renovate Greenhope Services for Women's current residental treatment program in Manhattan. This would add residental and outpatient treatment slots to the city and state of NY. The building would house 60 women with 100 outpatient slots.
New York	Greenhope Services for Women	$23,000,000	DHCR	Build from the ground up 1 and 2 bedroom apartment residence as permanent housing for graduates of treatment programs. Location site is in the Bronx at 830 Hunts Point Avenue.
New York	Building from the ground a 1 and 2 bedroom apartment residence	$23,000,000	DHCR	Greenhope has located a site in the Bronx at 8930 Hunts Points Avenue which is residentially zoned to construct 46 one and two bedroom apartments as of right. Galaxy Contracting own this site outright and is willing to sell it to Greenhope for this project.
New York	Purchase and renovate Greehope services for Women's residential treatme	$7,100,000	DHCR	The renovated building would house 60 women with 100 additional outpatient slots.
New York	Renovate our other site, Greenhope Housing	$3,000,000	DHCR	This renovated building would allow us to house and serve HIV positive women re-entering from incarceration. Greenhope owns Greenhope Housing outright.
New York	Housing Works	$550,000	DHCR	Renovation of 875 Jefferson Ave (Bed-Stuy) for housing
New York	NYCHA developments in 29th Dist	$7,081,088	DHCR	Various modernization projects at NYCHA facilities
New York	Greenhope Services for Women	$3,000,000	DHCR	Renovate other existing building
New York	Stabilization of Renwich Ruins	$1,250,000	DHCR	To fully complete the stabilization of the Landmark Renwick Ruins. Project requires addition steel bracing of the south wall, demolition and debris removal of interior brick walls and decorative iron fencing and landscaping.
New York	Replacement of Heating Systems in Properties Throughout Upper Manhatta	$10,500,000	DHCR	This project includes the replacement of seriously aged and defunct heating systems, with the objective of increasing energy efficiency by up to 30%.
New York	Building from the ground a 1 and 2 bedroom apartment residence	$23,000,000	DHCR	Greenhope has located a site in the Bronx at 8930 Hunts Points Avenue which is residentially zoned to construct 46 one and two bedroom apartments as of right. Galaxy Contracting own this site outright and is willing to sell it to Greenhope for this project.
New York	Purchase and renovate Greehope services for Women's residential treatme	$7,100,000	DHCR	The renovated building would house 60 women with 100 additional outpatient slots.

County	Project	Requested $	State Agency	Additional Detail
New York	Renovate our other site, Greenhope Housing	$3,000,000	DHCR	This renovated building would allow us to house and serve HIV positive women re-entering from incarceration. Greenhope owns Greenhope Housing outright.
New York	HCDC Low-Income Tax Credit Project	$2,775,000	DHCR	Housing and Urban Development Facilitate capital improvements to 185 existing units of low-income housing located in East Harlem and Central Harlem and fund operating reserves.
New York	La Marqueta - Park Avenue Market Mile. Located under the Metro North cc	$12,000,000	DHCR	In partnership with the City of New York and the local community, recreate historic public market in East Harlem. Bring diverse foods, arts and crafts, 315 businesses and 1,500 permanent jobs to a culturally rich area of high unemployment and poor accessto fresh food. Create and implement a model workforce program to train local residents in building the market with recycled materials and operating successful businesses. Use sustainable energy approach to reduce waste and bring power to the site. Use alternative fuel fleet for truck delivery and distribution. Meets ESD/Harlem CDC's state mandate of creating and implementing innovative, sustainable and community focused long range economic development projects that directly benefit underserved communities of upper Manhattan and provides a catalyst for attracting private investment to the area.
New York	Upper Manhattan First-Time Homebuyer Assistance Program	$2,000,000	DHCR	Housing and Urban Development Provide first-time home buyers with down-payment and closing cost assistance grants of up to 6% of the purchase price
New York	Upper Manhattan Housing Stabilization Program	$5,000,000	DHCR	Housing and Urban Development Provide mezzanine capital financing to construct or rehabilitate affordable housing where credit squeeze has created financing gaps
New York	Housing for Indigent Seniors	$33,600,000	DHCR	A higher percentage (18%) of elderly New Yorkers live below the federal poverty level compared to their counterparts in other states (12%). This project would develop155 affordable housing units in Harlem for this underserved population. The accommodations will be designed to enable seniors to live in the community with services as long as is appropriate in order to forestall the need to enter a nursing home, which is consistent with consumer preferences and will result in lower costs to the State for Medicaid long term care.
New York	Project CHIP: Children's Health Improvement Project	$150,000	DOH	Childhood Obesity is a major public health problem, particularly in Central Queens, with its many Bukharian immigrants and large Orthodox Jewish population. A sedentary lifestyle, poor nutrition, and lack of preventive health care create both a children'
New York	TRACKING SYSTEM TO REDUCE HEALTH DISPARITIES IN EARLY DET	$1,750,000	DOH	Prostate cancer is a major cause of death among African American men. The proportion of men who die of prostate cancer is much higher among Black men than among white males. A primary cause for this disparity is the lack of early detection of prostate among Black men. The goal of this project is to reduce this health disparity in African American communities in Manhattan through an effective data tracking and communication system that uses advanced data mining techniques as well as Web-based and cell phone technologies that have been successfully deployed in consumer financial services to detect and manage delinquency and to reduce consumer risk. We will combine advanced statistical techniques with Web and cell phone technologies as well as with Six Sigma (process improvement methodology) to develop a tracking system that will link Black men with clinics and health centers (hospitals, community-based cancer research centers), with other community organizations as well as organizations outside of the c

County	Project	Requested $	State Agency	Additional Detail
New York	Latino Health Research Center	$1,000,000	DOH	The health and well being of Latino communities in NYC is a significant public health issue. With the requested funds, we propose to create a Latino Research Center at the Columbia University School of Social Work. The Center will be designed to investigate the health needs of New York City's Latino Communities. Particular emphasiswillbe placed on understudiedpopulations- e.g., Dominican Americans, Mexicans, etc. The Center will have an applied focus and will collaborate with State and City governmentsto establish an agenda for developing and implementing a cohesive research plan that will have statewide policy and practical implications. The requested funds will create or maintain approximately 10 full-time positions over the course of a 24 month period. The stimulus funds will be used to seek additional external gunding and to provide infradtructure support for the Center.
New York	Long Term Care EMRs	$5,600,000	DOH	? This Project entails the implementation of Electronic Medical Record systems at 7 nursing homes, a program of All-Inclusive Care for the Elderly, a Medicare Advantage Special Needs Plan and a care management program. The programs span a number of counties including Orange, Dutchess, Bronx, Manhattan, and Richmond. The EMR will enhance the quality of care for over 5,000 frail elderly who are served by the Catholic Health Care System by addressing such issues as adverse drug interactions and facilitating the sharing of interdisciplinary care management information on a timely basis.
New York	Healthcare Smart	$2,000,000	DOH	ModSpec is working with Syracuse University and Columbia University CATS, leveraging decades of R&D in our Healthcare Enterprise Intelligence software platform. Our interoperable platform uses natural language processing and Electronic Medical Records toget critical knowledge to patients, clinicians and physicians for preventative care, as well as critical knowledge at the point of care when needed. We solve the problem of misdiagnosis due to lack of knowledge or knowledge overload, particularly in ambulatory/ER care, by getting the right information to the right person at the right time and place. Our initial software development (decision support, electronic medical records, information management, and billing) was done with Beth Israel Hospital, and we?re using our Upstate/Downstate business model to minimize cost while maximizing access to critical resources. GE Healthcare and Siemens are very interested in working with us and are potential sources for cost sharing. This will help maximize the nu
New York	Proton Therapy Cancer Center	$200,000,000	DOH	A collaborative effort amongst Continuum Health Partners, Albert Einstein College of Medicine, and MedScan/C21 Radiation Oncology is ready to break ground with science and shovels. This group has developed and designed plans to build a 400,000 s/f worldclass, cutting edge Proton Therapy Cancer Treatment center in the heart of New York City. New York area residents needing Proton Therapy today must travel great distances to states such as California, Texas, Florida or Indiana rather than receive treatment close to home away from family and treating physicians since no such treatment center was ever build in New York due to size and cost constraints. This is a SHOVEL-READY project with minimal building department approvals needed since the building structure is up and standing, only retrofitting and structural reinforcement is needed to make room for equipment and interior spacing. An estimated 800 men and women will be employed during construction of this magnificent project once construction begins i

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	Information Technology - MRDD	$100,000	DOH	Catholic Guardian Society and Home Bureau (CGSHB) operates a large residential program for people with mental retardation and developmental disabilities. This program does not have a structured electronic case record for recording medical and mental health information. CGSHB will work with a qualified NYS vendor to purchase and install a customized electronic medical case record that will record information for 192 consumers. This project will create immediate jobs for IT vendors, software engineers, data entry operators, etc.
New York	Health Care Workforce e-Learning	$1,879,330	DOH	The elderly population in New York is projected to grow by 23% between 2010 and 2020. Given these significant demographic changes, the ArchCare Institute for Health Care Workforce Training is being established to provide educational programs for long term care staff including nurses, certified nurse aides, home health aides and other professionals in the nursing home and other continuing health care field. The instructional services will include an innovative e-learning technology that enables staff toparticipate in training modules as well as pre- and post testing via the internet from their homes or any other convenient location. The e-learning software and technology can be shared at low cost with the over 600 other nursing homes in the State.
New York	Facility Modernization Project	$1,500,000	DOH	The Guild is a not-for-profit, non-sectarian agency that serves all ages who are visually impaired, blind and multi-disabled. GuildCare, our Adult Day Health Care Program, provides nursing assessment, physical, occupational and speech thereapy, vision rehabilitative services, meals and nutrioonal counseling, transportation, integration and coordination of medical appointments for anyone age 18 or older with a diagnosed health condition, medical need or functional vision problem. We are planning to rebuild approximately 7,500 square feet of space in our Manhattan facility to modernize our program there with new program therapy, group meeting, and office space. the project will have a beneficial impact on the economy, job creation and healthcare. The project is shovel ready.
New York	Replace the Inpatient electronic Medical Record System	$15,000,000	DOH	The Mount Sinai Hospital plans to replace its core inpatient medical record electroinic medical record system. This will include the four service components; inpatient clinical system, pharmacy system, health information management system and emergency department system. The project will promote clinical and operational efficiencies and improve quality. Mount Sinain will spend nearly $20 million on computer hardware.
New York	Home-based Health Information Technologies	$5,000,000	DOH	NYS elderly residents currently number 3.5 million, with 4 million expected by 2015. New Telehealth and Telemonitoring (THTM) Health Information Technologies help elders live safely in their homes by alerting caregivers and nurses to medical emergenciesand potential illnesses. THTM also offers physicians a daily medical history for each patient. THTM is becoming the standard of care, and will require trained personnel to ensure proper deployment and operation. Selfhelp Community Services Inc., an eldercare agency and THTM expert, operates a licensed training center for home care workers. In partnership with F·E·G·S, a major provider of employment training and workforce development services, we propose to train a new, statewide workforce of THTM technicians, who will install and troubleshoot home-based THTM systems. We will locate this training at senior centers statewide, collaborating with local Area Agencies on Aging, the NYS Office for Aging, and the American Association of Homes and Services for
New York	nursing workforce development	$0	DOH	Advocating for allocation of funds for nursing workforce development programs
New York	CHC Capital Grant Program	$35,000,000	DOH	Build and Renovate Community Health Centers

County	Project	Requested $	State Agency	Additional Detail
New York	Cancer center infrastructure improvement program	$151,000,000	DOH	To replace expired funding that was included in The Medicare and Medicaid Modernization Act of 2003. Memorial Sloan-Kettering Cancer Center project; breast cancer treatment center and completion of Zuckerman
New York	AHRC Health Care, Inc.	$20,000	DOH	Expansion of Dental Services in Lower Manhattan
New York	Callen-Lorde Community Health Center	$150,000	DOH	Information Technology
New York	Callen-Lorde Community Health Center	$50,000	DOH	Renovation/Outfitting of Onsite Pharmacy
New York	Community Healthcare Network	$50,000	DOH	Mobile Medical Van Modernization
New York	Institute for Family Health	$1,600,000	DOH	HIT Expansion to Enhance Primary Care Services in New Paltz
New York	William F. Ryan Community Health Center	$5,000,000	DOH	Capital and HIT
New York	William F. Ryan Community Health Center	$411,000	DOH	HIT for Ryan-NENA Community Health Center
New York	William F. Ryan Community Health Center	$274,000	DOH	HIT for Ryan-Chelsea-Clinton Community Health Center
New York	Community Health Project, Inc.	$300,000	DOH	Telecom & IT upgrades to health center
New York	Planned Parenthood of NYC	$1,917,000	DOH	Renovation, expansion of Margaret Sanger Center
New York	Outreach and Diversity	$200,000	DOH	Our project is the expansion of our Diversity and Outreach programs to persons with Alzheimer's disease, their families and their caregivers.
New York	Margaret Sanger Center Expansion Project	$1,917,000	DOH	This project would expand the space that is alloted to PPNYC's Margaret Sanger Center - adding 5,400 square feet to its current space. In addition, the project would included renovation of the 4th floor administrative office space and the 7th Floor Executive office space.
New York	Bronx Health Center Renovation project	$1,000,000	DOH	The Bronx Health Center renovations will improve patient flow so the patients' experience will be better. It will provide additional space for the providers to receive training, and general improvement to enhance code compliance.
New York	Electronic Medical Record Transfer	$2,000,000	DOH	Terence Cardinal Cooke Health Care Center, East Harlem, requests funds to complete the implementation of its Electronic Medical Record System. In 2008 the Center successfully implemented the Computerized Physician Order Entry System (COPE) which is the first phase of the EMR. A significant re-wiring effort is required to finalize the implementation of the EMR. When complete the EMR will allow us to reduce medical costs, decrease adverse drug interventions and improve prescription accuracy for our 729 frail, elderly and developmentally disabled residents. The efficiencies created will not only assist with the retention of staff but also help us maximize our financial reimbursement. A completed EMR will enhance the quality of care for 800+ patients/residents that live at the Center well as for the 1,600 patients that visit our out-patient clinics.
New York	Dialysis Unit Expansion	$2,400,000	DOH	Terence Cardinal Cooke Health Care Center, East Harlem, requests funds to open 11 additional dialysis stations to its current 22 station dialysis outpatient clinic. Dialysis is a life sustaining treatment for patient suffering from chronic kidney disease. The dialysis clinic serves frail and vulnerable populations of northern Manhattan, many with multiple organ system failures. The clinic operates at full capacity with four patient shifts per day, operating from 5am to 11pm, six days a week. This equates to 7.3 patients per station, far exceeding typical planning standards of 4.5 patients per station according to the United States Renal Data Statistics report of 2007. With a growth rate of 5% annually in those diagnosed with chronic kidney disease, thedialysis clinic requires expansion to relieve the current and growing burden on local area hospitals for dialysis treatments

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	Integrated Electronic Health Record	$2,500,000	DOH	F?E?G?S seeks to upgrade its electronic health records (EHR) to enhance the integration and interoperability of our community health services while curtailing costs. Each year, 2,400 F·E·G·S health care employees serve over 70,000 disabled residents in NYC and on Long Island with an array of services in the context of the community in which they reside. As the health care model shifts from hospitals to more community-based services, we rely on medical homes, care coordination and consistent intervention, all of which is supported by EHR technology. An IT infrastructure that that allows for real time care coordination with our partner providers, such as the Bronx Regional Health Information Organization (RHIO) and other multi-agency networks, is essential. Furthermore, the many disabled clients we serve who seek behavioral or developmental health services often over-use or under-use health services, leading to unnecessary hospitalizations or ER visits. Through an integrated EHR system, F·E·G·S care coo
New York	Health and Wellness for People with Chronic Conditions	$3,000,000	DOH	F·E·G·S proposes a health and wellness program for people with chronic conditions using a three-pronged approach: health literacy, care management, and integrated health/mental health services. To contain health costs, improve health and wellness, and increase employee productivity, we will develop a multidisciplinary team of 15 staff consisting of health educators, care managers and nurses. They will use state-of-the-art health literacy tools and electronic predictive and tracking software to help thechronically-ill better manage their conditions and remain well. The target population will be individuals in lower Manhattan with mental and physical disabilities and those struggling with an array of chronic conditions including diabetes, cardiovasculardisease, orthopedic conditions, chronic pain, etc. The project will serve up to 2000 individuals who will receive the appropriate intervention(s).
New York	D2P (doctor to patient)	$1,000,000	DOH	We are a team of researchers at Columbia that has developed an array of solutions to connect patients and providers via mobile phones and social network. We are moving from research to commercialization and have already a first big pharma client. We arelooking for resources to grow. Projects can be funded via the New York Presbyterian Hospital (our commercial partner). Columbia University (our research partner), or the venture itself, Connect US LLC.
New York	Clinical and Patient Financial Information System	$185,000,000	DOH	This project includes the implementation of a fully-integrated, patient-centric, clinical and patient financial information system from Epic Systems, a leading information technology vendor among academic medical centers. This will automate workflow, provide analytic capabilities, and is based on an open, service-oriented architecture that supports interoperability through regional and national standards for health information exchange.
New York	Virtual Electronic Record Administration	$575,000	DOH	Faci is committed to providing small to medium sized physician and ambulatory practices with the ability to automate their health care management practice through the use of Web-based digital software. This will be done by reducing paper redundancy in acost-efficient environment, while increasing productivity and maintaining compliancy. This web-based secured technology will be easy to navigate and a clear return on investment.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
New York	Workforce Timekeeping & Scheduling	$350,000	DOH	The Beth Abraham Family of Health Services operates 4 Nursing Homes providing nursing and rehabilitation services to nearly 2,000 patients 24 hours a day 7 days a week. Staff scheduling and workforce time management are crucial to establishing patient care. Appropriate staffing levels per specialty is needed in order to provide high quality care. Today, scheduling for hundreds of nursing staff plus many other support staff is being done by hand with pencil and paper. This project calls for implementation of a system that would lead to optimal staffing throughout the Homes, that would lead to higher quality patient care and better outcomes.
New York	CAS Electronic Health Records Adoption	$910,000	DOH	As part of its ongoing efforts to provide high quality health care as one of the core services to medically underserved children to ensure their health and well being, The Children's Aid Society will undertake an ambitious project to implement an Electronic Health Record and integrated Practice Management system at all of its school based, community based and mental health specialty sites. The EHR system will enable Children's Aid to meet the following five overarching goals of: Practice efficiency andmodernization, improvement of the quality of patient care, usage of clinical decision support and best practices to support clinical care, maximizing revenue generation and billing to public and private insurance for billable care rendered, and enhancingdata mining and reporting capabilities of existing information systems for strategic planning and capacity building.
New York	Expanded weekend hours for urgent Ear Nose Throat Medicl Care	$300,000	DOH	Offer Saturday and Sunday hours for urgent Ear Nose and Throat care for insured and uninsured New Yorkers by board certified specialists. This will allow emergency room care on weekends to be used for true emergencies, improve patient care and save moneyon care for the uninsured. It will fund the hiring of board certified ear nose and throat specialist, medical assistants, receptionist, scheduler.
New York	Telemedicine / Remote Patient Monitoring	$10,000,000	DOH	THis is a Telemediicine project that will utilize the MedApps Mobile Health Monitoring solution for connecting patients in remote locations to their healthcare providers. We will work with a Non-Profit or For-Profit Hospital system in New York to help administer the program.
New York	Telemedicine / Remote Patient Monitoring	$10,000,000	DOH	We would like to work with strategic healthcare providers in New York in order to help implement a Telemedicine solution that connects patients to their healthcare provider and Electronic Health Record (EHR) remotely, in order to monitor a patient and keep them out of the hospital. We would work with major hospital systems, Medicaid / Medicare patients, Veterans Administration, Indian Health Services and many more. We would choose a Project Sponsor that is Headquartered in New York. Our Website is: www.medapps.net Our Demo / YouTube Video is; http://www.youtube.com/watch?v=GiV239PR0R4
New York	Medical Records Digital	$190,000,000	DOH	The call to digitize medical records has been sounded by President Obama, and New York State must do its part. The benefits are enormous in terms of availability, space reductions, integrity of record keeping, transmission capability as patients move, and so much more. We have the ability to digitize all medical records to meet the President's call to arms.
New York	NYS Green Job Corps	$3,000,000	DOL	STRIVE in partnership w/ the Federation of Protestant Welfare Agencies (FPWA)and 6 other NYC-based workforce development agencies have a "shovel ready" proposal for producing 300 to 500 NYS Green Job Corps (GJC) graduates over a 3 year period. STRIVE's e
New York	Hiring Hands	$50,000	DOL	D N Schwartz & Co is an executive search firm founded in 2005, which focuses on financial services, and was once operated on a retained basis only. Funding is requested to cover operating costs to stay in business during a significant downturn associated

County	Project	Requested $	State Agency	Additional Detail
New York	Luxetier	$850,000	DOL	The company mission is to deliver cost comparison shopping online to empower cost conscious consumers the ability to discover, compare and purchase fashion for less. At the same time a social benefit of the company is that the first 5% of the gross revenues generated by Luxetier are donated to breast cancer and prostate cancer research. The company website is www.luxetier.com and the funds would be used to hire a web developer, a web designer, book keeper, business development manager, marketing executive and general manager. This is a female owned company and the funds would be used to hire staff and for marketing of the service to drive revenues. A full business plan is available upon a positive response to this email application. Respectfully, JuliaMiller
New York	John Jay Workforce Development Training	$500,000	DOL	John Jay's Office of Continuing & Professional Studies trains over 5,000 NYPD Officers, peace officers, and law enforcement officers around NYS annually. We propose to continue and extend training programs that enhance the workforce including paralegal,EMT, crime scene investigation, security guard/nightlife training, fire safety director training, site assessment training, etc.
New York	Safety Through Ex-offender Employment Program, or STEEP	$2,500,000	DOL	America Works of New York, Inc. (AW) shall provide direct job placement and retention services to 500 ex-offenders throughout all five boroughs of NYC. Through providing direct employment services to the ex-offender population, AW shall be able to help prevent ex-offenders from committing new crimes since they have linked to a means of financial stability, even during this tough economic time. Moreover, AW has shown that linkages to employment drastically reduces recidivism, with AW?s recidivism rate for ex-offender averaging 5%, as opposed to the national standard of 67% recidivism. Thus, the cost of incarceration and crime drops drastically, saving taxpayer money for years to come. Through the Safety Through Ex-offender Employment Program, or STEEP,AW shall place and retain 500 ex-offenders in employment for at least 6 months, including developing new jobs for them when they are terminated from employment. Ex-offenders to be addressed shall be on either NYS Parole or NYS Probation, and in need of d
New York	Green Collar Jobs Development	$250,000	DOL	Building Performance training program for at-risk young people; teach skills required to conduct Level 1 building performance audits as specified by ASHRAE
New York	Financial Literacy	$500,000	DOL	Consistent with the United States Financial Literacy and Education Commission?s mandate to improve financial literacy and education of individuals outside the financial mainstream, F·E·G·S proposes to design and implement a standardized financial literacy curriculum and integrate it into the agency?s employment programs which serve 40,000 newly unemployed, disadvantaged, low-income adults and disconnected youth on an annual basis living in New York City and Long Island. The project will raise the financial literacy level of 10,000 individuals with limited knowledge of finances and or challenging financial situations that prevent achievement of or the re-establishment of self-sufficiency. The project will enable the working poor to add to their income.In partnership with financial institutions, the project will include establishing checking and savings accounts, accessing Earned Income Tax Credits, child care tax credits, debt reduction, assistance filing tax returns, preventing identity theft, access

County	Project	Requested $	State Agency	Additional Detail
New York	Chelsea/Clinton Sector Training Initiative	$250,000	DOL	Sector-based employer-targeted training is key to assisting businesses find well-screened and well-prepared workers for positions within their companies. Businesses are increasingly sensitive to employing individuals who reside in the communities where they build their new businesses. To that end F·E·G·S, a workforce development organization will partner with the New York City Community Board in the Chelsea/Clinton area of Manhattan and the Desmond Tutu Center of the General Theological Seminary of theEpiscopal Church to recruit, assess, and train low-income individuals residing in the Chelsea/Clinton area and prepare them for positions in a new hotel being built in the Chelsea/Clinton area. The hotel will be opened by December 2009 and will source their new employees from the Chelsea/Clinton neighborhood by partnering with F·E·G·S, the Community Board and the Desmond Tutu Center. Individuals from Chelsea/Clinton neighborhoods will be recruited and trained according to employer specifications. The ho
New York	Entrepreneurial Services for Women	$250,000	DOL	Over half of the 11 million companies in the U.S. are owned by women and employ over 13 million people. Key to the country?s future is helping entrepreneurs get started in business especially in turbulent economic times when entrepreneurs historically assist in reviving the economy. The Thypin Oltchick Institute for Women?s Entrepreneurship, under the aegis of F·E·G·S, has assisted over 1,000 women since its inception in 2006, to navigate the process of starting a business by connecting them to the resources and services appropriate to their business plans. The Institute, www.yourfutureinbusiness.org, proposes to expand its one-stop information clearinghouse, business counseling and referral service by linking emerging women entrepreneurs to Women Owned Business Enterprise opportunities within infrastructure projects developed under the American Recovery and Reinvestment Act in NYC and Long Island. Located in Hudson Square area in Manhattan near the newly established NYC entrepreneurial incubator for
New York	Green Energy Education Initiative	$400,000	DOL	In order to help our community to get advantage of the Government Recovery Act and the new government programs to create jobs and be energy efficient; as well as to contribute our community to be ready for the upcoming energy industry challenges, and inconsequence to help to overcome this crisis and reduce unemployment in the Bronx, we are submitting to your consideration a brief of the Project ?Bronx Green Energy and Computer Education Initiative?. Objectives ? To train 400 solar panel installers, andsale professionals; as well as to help them to be hired in the industry or to create small businesses (25% of total graduated). ? To outreach 5000 New York City residents and raise their awareness about energy efficiency, weatherization, advantages andcredits. Courses and Events ? Sales, Design and Installation of Solar Photovoltaic Panels (60 hrs Course/ 3 hrs a day / 1 month) ? Electricity Basics (15 hrs Course) ? Green Energy Sales Professionals (15 hrs. Course) ? Energy Efficiency Awareness Seminament of Energy. In order to make sure our trainees will have access to the job market we will partners with the industry local, state and nationwide.
New York	CCNY/Columbia Health Science Internship Program	$1,000,000	DOL	Workforce Development and Job Development ; Health Information Technology Supplement and leverage additional funding to 14-year old scholarship awarded program administered by CUNY and Columbia University Medical Center which provides $12-$15,000 stipends to students who have completed studies in health sciences field to permit them to complete 1,000 hours of unpaid internship required for them to obtain their licenses.

New York	Culinary and Hospitality Industry Workforce Training Program - 5year pilot p	$1,500,000	DOL	Economic, Workforce and Job Development Reposition local workforce (HCDC service area) for job and career opportunities in restaurant, hotel and hospitality industry. Strengthen Harlem as a dining and entertainment destination.
New York	Senior Community Service Employment Program	$50	DOL	SCSEP is a US Department of Labor program that serves low-income and unemployed seniors who are 55 years and older by providing them with paid job training. KCS provides training opportunities to low-income, unemployed seniors in the Asian American community in the New York City area. Through SCSEP, seniors are placed in nonprofits where they can serve their communities and gain job skills. We are especially in need of training sites that can utilize the skills of our Korean, Vietnamese, Cantonese and Mandarin-speaking seniors.
New York	BuildingWorks	$150,000	DOL	A job training proposal to train 25-30 low-skilled individuals in environmental remediation, hazardous materials abatement, and construction. We will then place the majority of graduates in unionized, living-wage positions. This grant would serve as a supplement to add an additional training cycle for residents of the five boroughs and Long Island.
New York	Site Safety Manager	$80,000	DOL	Offering site-safety manager courses for union carpenters. There is an urgent need for site-safety managers to enforce safety codes on job sites. This program is especially good for displaced union carpenters or for those who age and/or physical condition make it difficult for them to continue to participate in the demanding physical labor of our field, yet they are not in a position to retire.
New York	Online Job Matching Application	$1,000,000	DOL	eHire has built the first low-cost candidate-centric and transparent job matching recruitment platform online that gives both candidates a voice in the hiring process and enables recruiters/employers to efficiently find qualified candidates. In essence,the eHire community-based application is the ""eHarmony"" for online recruiting. The platform includes features such as a multi-layered matching engine, a robust scoring mechanism, social networking components, comparative application and qualification views, career check-up services, and the automatic parsing of resumes, among others. Revenue will be generated from both candidates and recruiters/employers; candidate pricing will utilize a subscription model while recruiters/employers will pay success-only f

New York	Moynihan Station Project	$700,000,000	DOT	Project creates transp. infrastructure which significantly enhances the capacity, safety, and security of the busiest commuter/intercity rail hub in North America and heart of Amtrak's NEC service. Project will also create thousands of construction and permanant jobs, expand access to the emerging Manhattan West Side business district, and reduce airport and highway congestion throughout the region. Project requires an additional $700M in funding to supplement $400M in already committed government funds: $350M for new critical transp. enhancements, including new track/platform capacity, modern signaling equipment, and expansion of the lower concourse to serve all tracks; and $350M to replace the short-term gap created by delayed public/private partnership investment. Project has finished design and environmental approvals û needs only PACB approval. Expansion of concourse and vertical access at over-crowded Penn Station; Improve Safety/Security at nations's busiest rail station; Rehabilitate/Reuse His
New York	Dental Van	$1,500,000	EFC	This project includes the purchase of a new mobile Dental Van. The New York University College of Dentistry and the dental clinics it operates comprise the largest dental center in the United States. The NYU dental clinics, which are Certified Diagnosticand Treatment Centers under State law, are the largest provider of comprehensive, preventive, primary and specialty oral health care to Medicaid recipients, the uninsured, and the working poor. The NYU College of Dentistry's mobile dental clinic program, Smiling Faces, Going Places, targets medically-underserved urban and rural children who currently have limited access to comprehensive dental care, due to financial and environmental factors. The need for dental care is especially great among these children, for whom the prevalence of dental disease is four times higher than for other children in New York State. Each year the Smiling Faces, Going Places mobile dental care program provides essential health services to over 5,000 children from throughoud for free. A waiting list of interested sites continues to grow.
New York	Formed Obsession	$500,000	ESD	We are creating a beauty and fashion company. We will employ people in various areas, for example as manufacturers and in human resources, sales, public relations, marketing, etc. We expect to employ at least 50 people within the first two years. For approximately 20% of our work force it is our intent to create apprentice and internship programs for high school and college students. We will also create programs to help prepare people, particularly women, with the skills and knowledge for future employment opportunities. Additionally, we would like to invest in educational and mentoring programs for youth, particularly in the areas of music and the arts.
New York	Gar Wood Securities	$250,000	ESD	We are building a branch office in Manhattan which will focus on equity and fixed income securities brokerage and will focus part of its efforts on African American & Latino Salespersons and accounts.

New York	Technical Assistance/Capacity Building for Poverty Organizations	$1,000,000	ESD	Provide technical assistance and capacity building support to nonprofits to retain needed direct service programs in low-income communities. Working to preserve services and jobs of those providing such services, not necessarily the nonprofit organizations themselves. Outcomes include preserving nonprofit jobs which are often the first jobs for low-income New Yorkers. Also to preserve programs which serve poor people especially in the areas of jobs, housing, food, health care and youth services. Finally, to preserve programs in the low-income neighborhoods they serve in order to ensure easy access during difficult times as well as to enhance the responsiveness of the programming.
New York	Intelligent data system to enable schools to track academic progress of you	$1,500,000	ESD	THIS IS A REVISED PROJECT DESCRIPTION THAT WAS SUBMITTED EARLIER One of the major educational challenges in reducing educational disparities in Black and Hispanic communities is the lack of intelligent and predictive system to help schools and administrators track individual student academic progress, particularly among young Black and Hispanic men. Our plan is to develop this innovative educational solution in collaboration with the Eagle Academy in New York City. Reveal Analytics has developed an innovative technology called ValueManager? with initial funding from the National Science Foundation under the Small Business Innovation Research (SBIR) program that uses intelligent data mining techniques and Six Sigma process and can be used to enable schools to track and monitor individual student academic progress on a continuous and predictive basis. This proposed educational solution will create a unified information environment that will allow teachers, administrators, mentors, students and parents the number of those graduating and going to college and to help school administrators optimize the allocation of school budget. Reveal Analytics is a HubZone certified and minority-owned company located in Harlem, New York City. The company provides advanns to global organizations enabling them to transform their data into valuable information leading to better business decisions. With an innovative combination of industry best practices, analytics technology and Six-Sigma methodology, Reveal Analytics d
New York	Hardcore Artist Opportunities	$500,000	ESD	Hardcore Dynamic is a community for artists and thinkers devoted to a sustainable future to share their work, collaborate, and gain exposure to create a happier, greener, and more technologically advanced tomorrow. We host a website, discussion forums, and events across New York City. The funds will be utilized to employ a staff of full time and part time employees for administration, event planning, and public relations. Hardcore Dynamic is currently a profitable enterprise that employs two individuals.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
New York	Employment Yes!	$50,000	ESD	Through Mercy Center?s Employment Yes! Program, women in the South Bronx are empowered to call on their own skills and strengths to achieve new or improved employment and ultimately to better provide for their families. The Employment-Yes! Program involves two main components ? Skills Training courses, which provide women with the computer and soft skills needed to get a job, and Job Development, which provides one-on-one support throughout the job search process and into employment. Employment Yes! serves over 200 women per year by developing their educational and technical skills, enhancing their job readiness, assisting them in obtaining meaningful employment. A network of local employers and services has been developed to match dreams and goals ofwomen participants to available resources that will help them achieve those goals. The Skills Training component of Employment Yes! expands the employment opportunities of hundreds of women of the South Bronx, with program offerings that include keyboardofessional experience in the corporate world, and the accompanying knowledge of the skills required in an office environment.
New York	Nomad Consulting	$1,000,000	ESD	Nomad Consulting will be a technology and marketing consulting company that will also provide training tutoring services in web technologies. Nomad will provide consulting expertise in the following areas: Brand development Marketing strategy Social media marketing Internet and new media marketing New media driven public relations Sundar Ganapathy will serve as the principal. He hold dual degrees in marketing and finance from the Stern School at New York University and is currently a marketing consultant.
New York	Beach Green/ Arverne East	$35,000,000	ESD	We are seeking $35 mm for the first phase to rebuild the infrastructure associated with the Beach Green development, situated in The Rockaways on the largest undeveloped piece of land in New York City. The Project is located in an area where unemploymentis currently 13% and where foreclosure rates are the highest in the City. The $35mm will permit us to install all the infrastructure needed for roughly one half of the site where over 500 units of workforce housing will be sited, including funds for thewidening, realignment and reconstruction of Shore Front Parkway ? the primary East-West access from the Rockaways to Queens and Long Island and the construction of a new transit plaza, with parking for 1,000 cars. It should also permit us to build the 45 acre Nature Preserve and Visitor?s Center which form the sustainable core of the development. Funding for the infrastructure of the Project will have an enormous multiplier effect as it will enable the first and future phases of this important Projectids are already solicited. Infrastructure quantities are available upon request for this submission.

County	Project	Requested $	State Agency	Additional Detail
New York	Jobs4NYC	$10,000,000	ESD	America Works of New York, Inc. (AW) proposes to place and retain at least 2,000 New York City residents into stable employment in the Jobs4NYC Program. Over the past year, thousands of NYC residents have lost there jobs, often unexpectedly. This has ledto over a 50% increase in the unemployment rate in NYC. While President Obama has provided for extensions of Unemployment Benefits during these tough economic times, NYC residents need more direct assistance considering the high cost of living and the increasing foreclosure rates hitting among other reasons. AW shall provide direct employment and retention services to these unemployed individuals in NYC, rapidly re-attaching them to the workforce in sustainable careers with ample opportunities for advancement. Additionally, through AW?s 25 year history of workforce development, AW can attach these residents to the necessary transitional supportive services they may need as they re-engage in the workforce, including childcare, clothing assistance, or nnfident that we can do this again through the Jobs4NYC program, and help both New York City and New York State as a whole along the way.
New York	Providing Rapid Individualized Direct Employment, or PRIDE Program for V	$1,250,000	ESD	America Works of New York, Inc. (AW) shall provide direct job placement and retention services to 250 Veterans throughout all five New York City Boroughs under the Providing Rapid Individualized Direct Employment Program for Veterans, or PRIDE Program for Veterans. Currently, AW is providing direct job placement and retention services to Veterans in NYC who are receiving Food Stamps or in the NYC Shelter system, but as President Obama continues bringing our service men and women back to the United States, still more Veterans are going to need stronger supportive services available to them to find and retain employment. Our recently returning Veterans are facing one of the most difficult job markets in 34 years, and more direct employment services shallbe needed for the many Veterans who do not qualify for Food Stamps or are in stable housing. It is for these Veterans, re-integrating into civilian life in New York City and in great need of rapid attachment to the workforce that the PRIDE Program for Vat all of the United States has remained safe over the past few years.
New York	Wingspan Arts Center	$5,000,000	ESD	Our plan is to build a permanent home for Wingspan Arts ? a state-of-the-art professional performing arts and education outreach center located in the landmark Metro Theatre at Broadway and 99th Street in Manhattan. The Center will be fully equipped andinclude 30-35,000 sq ft of multipurpose performance and rehearsal spaces. Programming will also include education and workshop programs run by Wingspan and other arts education providers. The estimated cost for acquisition and development of the Center is $30-$35 million. This project is shovel-ready and once funding is secured, construction can be underway within 120 days (Summer 2009) and the Center would be fully operational in 18-24 months (2011). Once open, the Center will enable new and emerging artists, resident and visiting theater companies, students of the arts and participants in arts outreach programs to work side by side in a place that can serve as a learning laboratory and catalyst for sharing creative, relevant ideas in a variety of voi
New York	Digital Textile Printing & Production Business Plan	$2,000,000	ESD	existing business at supersample.com Plan to expand operations to Garment District, NYC. To create jobs and manufacturing in a high tech industry Projected $10,000,000 in gross revenues per annum Maintain US Intellectual Property, support continued R&D
New York	Healthy Candy	$1,000,000	ESD	Health oriented project manufacturing sweets and candy made up of 100% natural ingredients, including no high fructose corn syrup. Devise non chemical sugar substitute and nutrient/vitamin delivery mechanism

County	Project	Requested $	State Agency	Additional Detail
New York	Community Resources Center	$1,000,000	ESD	Citizens Committee for New York City works to stimulate and support self-help and civic action to improve the quality of life in New York City?s neighborhoods. We support hundred of grassroots volunteer groups in all five boroughs by offering one-on-oneassistance, skills-building workshops, and grants. We are a vital source of support for these groups, who often lack any work or meeting space, basic office supplies or equipment. Our extensive relationships with community leaders and neighborhood groupsputs us in a unique position to offer a community center that will provide these resources in a way that is useful to neighborhood leaders and volunteers. We are requesting City dollars for the project because the space will be accessible to all volunteer-led groups working to improve their communities in all five boroughs of New York City. We hope that the Manhattan Borough President?s office will support the project not just by providing funding, but by referring groups working in their districts tol changes to the office layout and add needed technical equipment and furnishings to support the center. These changes will allow us to open the center to thousands of people annually.
New York	Carnegie Hall Stimulus Request	$37,000,000	ESD	Phase 1 of Carnegie Hall Renovation: Mechanical, plumbing, electrical upgrades, chiller plant, elevator pit,education space, performance venue upgrades
New York	The New Victoria Center	$156,610,000	ESD	The Harlem Community Development Corporation has designated Danforth Development Partners, LLC to redevelop the historic Victoria Theater located in Harlem on 125th St (next to the Apollo Theater). The center will be as a mixed used development projecttotaling 3332,183 square feet, with a 33 story tower, featuring 100 residential unites, a 40,500 sq. ft. Cultural Arts center, a 200 room hotel, a 132 space parking garage, and a 26,502 sq ft retail/entertainment facility. A LEED silver Certified building is planned. (Off site affordable housing of 30 to 40 apartments are also planned.)
New York	East River Science Park	$25,000,000	ESD	East River Science Park (ERSP) is a new state-of-the-art life science and technology campus that will provide 1.1 million rentable square feed (ERSF) of commercial office and laboratory space when completed. ERSP is key to New York's ability to diversify its economy by creating a local commercial bioscience sector. ERSP serving as a an anchor for a commercial bioscience industry, the New York region will now have a place to house the commercial spinouts from its universities and attract larger amounts of private sector capital that to date have gone our of state.
New York	Cleantech Technology and Manufacturing Park	$2,000,000	ESD	Development of an 80-100 acre industrial park in Staten Island, New York that is targeted at cleantech or green technology manufacturing/processing operations. The cleantech park would target a variety of cleantech operations, including: operations focused on assemply or manufacture of products used in clean energy generation, such as solar or wind; biomass to energy; and/or manufacturers that process or use recycled materials.
New York	Home For Contemporary Theater and Art	$800,000	ESD	Interior and Exterior renovations to arts center
New York	Irish Repertory Theater	$300,340	ESD	Renovation of theater company
New York	Roundabout Theatre Company	$6,000,000	ESD	Final renovation phase of non-profit Henry Miller Theatre
New York	Roundabout Theatre Company	$1,750,000	ESD	Buildout of Miller Theatre on 43rd Street
New York	Theatre Museum	$10,000,000	ESD	Development of Theatre Museum in Midtown Manhattan (history)
New York	52nd Street Project	$500,000	ESD	Completing project - new offices, program space, theater
New York	Orchestra of St. Luke's	$16,000,000	ESD	Renovation of 3-story rehearsal hall
New York	Manhattan Neighborhood Network	$3,000,000	ESD	New media center- East Harlem Firehouse - job training, etc

County	Project	Requested $	State Agency	Additional Detail
New York	Building Businesses in NYC	$1,000,000	ESD	Project Enterprise (PE) will provide business loans, training and networking opportunities to micro-entrepreneurs in under-resourced neighborhoods across New York City. PE will disburse loans averaging $2,000 to individuals looking to start or expand their own small business including home-based businesses. In the last five years alone, PE has disbursed 382 loans totaling more than $1.1M, with just 7% written off; and provided more than 2,000 microentrepreneurs with business training and networking opportunities. Now more than ever, entrepreneurship is an important option for many families looking to patch income or overcome the loss of a job. Many individuals in the communities PE serves develop and manage micro-businesses as a means of employment, yet often lack the business networks and associations that provide contacts, new markets, as well as business mentors and role models. Project Enterprise helps address these needs by offering entrepreneurs: Ongoing business training and technical assistancincrease in their monthly profit. And PE?s current loan portfolio supports more than $1.56 million in local wages annually.
New York	American Rec and Reinvest Act Title XV	$500,000	ESD	Titile XV requires tracking and reporting. Ecteon, a national leader in contract management software and processes and a New York company, has software specifically designed for Title XV-type reqs, already in use e.g US Senate, Michigan DOT, Ontario County, implementable in days (to meet the Title XV 180 day spec.) Not just a sec 1526 website; software to manage contracting for entire program.
New York	Central Harlem Parking Initiative	$43,000,000	ESD	Central Harlem would benefit from participation in the Federal Stimulus Program based on this request to fund an innovative automated parking garage. Implementing this system will enable development of retail and commercial space resulting in 130 immediate jobs for area residents during construction, 80 permanent jobs from the retail space and residential units developed, increasing to 420 permanent jobs as the full program comes on line. It will create much needed open space, result in significant environmental benefits including a reduction in use of fossil fuels, and generate increased parking and retail sales tax revenues to New York. Automated parking systems have been successfully employed in Europe and Asia for more than 25 years with proven track records in efficiency, safety and well established environmental benefits; however, the United States has been slow to adopt this system primarily due to the upfront cost premium. As urban density and pollution increases, and the number of developmento launch wider use. This technology can revolutionize parking in urban centers. Once developed, the concept can be duplicated in other densely populated areas resulting in significant economic and environmental benefits. Phase 1 proposes to relocate 387ces to a new automated below grade parking garage at the corner of Fifth Avenue and 132nd Street. A team of experts has been assembled to enable this project, including Sam Schwartz, LLC, a pre-eminent traffic engineering and planning firm, WPS, parking

County	Project	Requested $	State Agency	Additional Detail
New York	Maps for Everybody	$2,370,000	ESD	Maps for everybody would provide free mapping services to under served communities and non profit organizations in New York State. It would be intended for groups who do not have GIS (computer mapping) capabilities, or would not otherwise be able to procure GIS consulting services due to financial constraints. Potential clients may include, but would not be limited to, local governments, community boards, environmental organizations, or advocacy groups. Examples of projects include map and atlas production, publishing, graphic design, spatial and non spatial data development, computer programming, and internet mapping application development. Maps for everybody would also provide job training and work experience for residents of ?Poverty Areas? (as defined by the US Census). New employees would be paired with experienced mentors and would learn skills such as cartography, database administration, application development, and graphic design. The Maps for Everybody facility would also be used as a trainevelopers $300,000 x 2 = 600,000 Maps for Everybody Apprentices $500,000 x 2 = $1,000,000 Rent and Utilities = $5,000 x 24 = $120,000 Hardware and Software = $200,000 Legal and other fees = $150,000 Maps for Everybody would provide a free service that hence make better decisions through GIS and mapping technology. The organization would serve as a technical resource where its users could take advantage of its facilities, computer systems (servers, software), and staff expertise. It would also provide jo
New York	WHIDC/ESDC CDFI Program	$500,000	ESD	To provide loans to very small neighborhood businesses in Upper Manhattan utilizing the existing NYS ESDC CDFI Program. Loans ranging from $1000 to $25,000 would be provided to credit-worthy microbusinesses that are ""frozen out"" of the commercial credit market. Program would create 10 new businesses and 50 new f/t jobs as a result of business creation/expansion/maintenance arising out of these loans in the first year. An expansion of the existing ESDC CDFI program statewide would assist dozens of CDFI's like WHIDC and thousands of very small businesses throughout NYS. The state CDFI program's application and funding process is much simpler and faster than the US Treasury Dept.'s CDFI program, and can get the money out more quickly and effectively toNYS busines
New York	East River Science Park	$25,000,000	ESD	East River Science Park (ERSP) is a new state-of-the-art life science and technology campus that will provide 1.1 million rentable square feed (ERSF) of commercial office and laboratory space when completed. County	Project	Requested $	State Agency	Additional Detail
New York	Pre-fabricated Low Income Housing	$500,000	ESD	Creation of a matrix for pre-fabricated low income housing which will reduce costs and create factory and construction jobs. The applicant was the architect for a HUD sponsored project called Instant Rehab. In today's economic climate, the methodology ofpre-fabricated low income housing should be revived and applied to underused manufacturing buildings
New York	Business Education & Development Program	$828,000	ESD	Allan Houston Legacy Foundation is a public 501(c)3. It operates the Business Education & Development Program in Harlem, for young New York City adults ages 18-25. BEDP educates and trains young adults on how to start and operate their own business. Theprogram services 50 students every 6 months and is able to service more, pending funding availability. In addition, the program conducts a year long incubator where selected students are selected by local business professionals to receive $20,000 in donor-advised funds, free office space for a year and a team of advisors to assist them in the developing their business. In one years time, the BEDP has provided entrepreneurship training to more than 86 New York City adults.
New York	Harlem Park	$66,000,000	ESD	large, mixed-use, transportation-based development project contemplated for the southwest corner of East 125 St & Park Ave, immediately adjacent to the 125th Street Metro North station, in the catchment area of the Upper Manhattan Empowerment Zone (""UMEZ""). The project aims to transform the immediately surrounding community, blending more than 600,000 square feet of class-A office, studio and retail space, a/w/a parking, for a series of credit-worthy, high visibility commercial office tenants. The project already has brownfield certification from DEC, and has won the support of UMEZDC. Mayor Bloomberg, Congressman Rangel, Assemblyman Keith Wright, Manhattan Borough President Stringer and City Councilwoman Dickens have all publicly voiced their support for the project as a catalytic, transformative economic development initiati
New York	Bradhurst Beautification Main Street Project	$485,625	MAIN_ST	
New York	Driving Sales to Neighborhood Businesses	$1,000,000	MAIN_ST	Neighborhood businesses are closing at an alarming rate due to lack of consumers going to stores. It costs stores at least $200-$400 per day to advertise in traditional media, even coupons have high costs ($500 per mailing to consumers). Bonusme intendsto correlate a facebook type of application for local businesses, where businesses will put last minute promotions (changeable at any time) for the consumers). These local only promotions will be distributed through various internet mediums to save costs. Businesses only pay for consumers that redeem these promotions at their store. Bonusme knows when a consumer sees a promotion through its application, and when it goes to the local business, which ensures accountability in the methodology while ensuring an increase of sales through the cheapest advertisement possible. Bottom line is local businesses only pay for consumers that go into their stores. This business was tested in Georgia in 2001 with great success. With sophisticated software, it will bemanagement positions for Bonusme in NY State, and headquarters is being planned to be in New York.
New York	GCT Trainshed/Tunnel Structure	$8,500,000	MNRR	Continues ongoing structural rehabilitation of the GCT trainshed/tunnel
New York	MTA Fulton Transit Center	$497,000,000	MTA	Complete construction of Transit Center & Glass Structure
New York	207 St AC Shop	$149,800,000	NYCTA	Expand the overhaul shop to more efficiently repair car air-conditioning units as part of NYCT's scheduled maintenance system (SMS).
New York	207 St Heating System	$21,300,000	NYCTA	Upgrade the overhaul shop's heating system
New York	207 St Electrical	$29,000,000	NYCTA	Upgrade the overhaul shop's electrical system
New York	Gap Fillers: Union Sq Local Tracks	$45,000,000	NYCTA	For passenger safety and service reliability, replace the mechanical "gap fillers" that are along the curved platform edges of this station.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	Power Cable Ducts: Lenox Ave	$25,500,000	NYCTA	Repair the ducts through which traction power cables go to protect the cables and ensure reliable service.
New York	Schools, Elementary and Secondary, IS-17M / PS-111M	$130,941	NYPA	
New York	DPW and Sanitation, Warehouses, DSNY - M3, 26th STREET REPAIR	$25,000	NYPA	
New York	Subway Platform, Track Signals and Tunnel Lighting, NYCT LED MODEL B	$27,027	NYPA	
New York	Street Lighting, Bridges, Yards, Parkings, TBTA - Throgs Neck / Henry Huds	$30,000	NYPA

County	Project	Requested $	State Agency	Additional Detail
New York	Preventing disparities in access to smart grid and smart meter technology a	$2,100,000	NYSERDA	Reveal analytics is a HubZone certified company located in Harlem in New York City. We develop solutions that enable managers and end users in business and government leverage technology and analytics to make intelligent decisions that reduce cost and in
New York	Urban Wind Technologies	$500,000	NYSERDA	Analysis, Testing, and Prototyping of Linear Wind Turbine Technology (LWTT) for roof-top placement on existing urban structures. Turbines could offset current electrical building common area usage by 15-20%.
New York	Urban Home Weatherization	$3,192,000	NYSERDA	Project would employ 50 field staff, utilizing 15 GPS equipped leased hybrid vehicles, in 3 man teams to analyse and retrofit weatherization materials (stripping and insulation blankets) in homes in urban communities. Field staff would be managed by 5 ad
New York	Green Energy Company	$85,000	NYSERDA	Unfortunately, for many people and businesses, the high up-front capital associated with renewable energy systems is an obstacle either insurmountable or unreasonable in a culture of immediacy and short-term demands. I propose a company that sells renewable energy via leasing renewable energy systems to individuals, enterprises, or even entire communities. The lease payment would be a monthly contracted amount based on what the lessee would have been paying without the renewable system/s in place, suchthat the lessee can pay the same for renewable energy as non-renewable. Beneficial outcomes: Reduces dependence on non-renewable energy sources, reduces global carbon emissions, stimulates the ?green? economy, and employs a potentially large number of designers, engineers, and technicians. Action plan: Set up an automated accounting system and database capable of managing billing contracts. Inputs into this system would include real-time regional energy costs, energy production of leased systems, and en
New York	Solar 2 Green Energy Arts and Education Center	$7,000,000	NYSERDA	Solar 2 is an energy building and demonstration project that builds on the successful educational and outreach programs developed by Solar One at Stuyvesant Cove Park in New York City. Relying on extensive renewable energy technologies, Solar 2 will be the first completely carbon neutral, net-zero energy use building in New York and will showcase the feasibility and reliability of ?green? technologies in modern construction projects. The successful construction of a truly sustainable building will encourage widespread development of environmentally responsible design and construction techniques. Solar 2 expects more than 100000 visitors during the first year of operation. Our programs on energy efficiency, renewables,and sustainable design have alreadyreached tens of thousands of New Yorkers and Solar 2 will enable us to expand those programs significantly. Our green collar job training programs are expected to reach more than 500 youth and underemployed workers in 2009 and Solar 2 will enable us toremediation and energy efficiency all in one and should be the poster child for the Federal stimulus package.

County	Project	Requested $	State Agency	Additional Detail
New York	New, Large-Scale Energy Storage System	$5,000,000	NYSERDA	Large-Scale Energy Storage System For Power Grid created by CUNY structural, chemical and cost expert. DOE Funded. Needs funding for NY State Commercialization. Promotes energy independence; works with conventional & solar thermal plants; 30% increased power plant operating efficiency & 30% increased output; Adds ?dispatchable energy?: greatly increases ability to use wind & solar power on grid; Permanently reduces cost/kw; 95% energy storage efficiency; Modular components - make in NY & ship to worksite anywhere; Permanent Jobs: engineering, skilled manufacturing, worksite construction teams. Large worldwide market; NYS Funding enables partnering with a NY power generator for installation of scaled system. Timing: start partner effort immediately on design acceptance; start growing engineering team. Workforce expands to construction jobs. Complete in about 12-24 months. Commercial & Jobs Result: Successful system enables many sales - based on above benefits. Creates major NY engineering & manufacturi
New York	ENERGY STORAGE FOR POWER PLANTS	$3,000,000	NYSERDA	Funding To Enable NY Commercialization of Large-Scale Energy Storage System For Power Plants. Developed by CUNY structural, chemical and cost expert. DOE Funded. Meets Governor?s efficiency goals: 30% increased power plant efficiency; Works with conventional & solar power plants; Enables safe use of wind & solar power on grid; Permanently reduces cost/kw; Modular components - made in NY & ship to worksites anywhere; Promotes energy independence; Large worldwide market. Funding: Enables partnering with NY power generator for first project. Timing: Start partner effort ASAP; expand engineering team. Add more jobs for construction. Complete demo in about 12 months. Full-scale installation follows when funded. Experience enables full sales effort to beginfor major commercialization projects. Commercial/Jobs Result: Enables formation of major NY engineering & manufacturing Co. making modular components and shipping worldwide AND growing and maintaining skilled construction teams to install systems at powe
New York	Energy Efficient Lighting	$227,000	NYSERDA	Catholic Guardian Society and Home Bureau has administrative and program offices that have old lighting systems. We propose to change them to energy efficient lighting systems. This project would involve new lighting within 53,000 square feet of office space. This project will save jobs for manufacturers, installers, architects, and skilled laborers.
New York	Metropolitan Museum of Art infrastructure upgrade and roofing.	$23,700,000	NYSERDA	(1) Replace current cooling towers which are 25 years old. These towers provide proper temperature and humidity to the wings of the museum. (2) Replace the south roof.
New York	The Jewish Museum Facility Improvement Project	$1,000,000	NYSERDA	The project is a construction and facility improvement project that will restore the aging facility to prevent further structural damage and extend the life of the building. Further, a new climate control system would be put into place to help reduce energy costs by 10% and help to preserve the artowrk.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
New York	Electric Vehicle Infrastructure	$10,000,000	NYSERDA	Electric Vehicles (EVs) present an opportunity to create jobs, improve our environment and increase the level of national security by decreasing our dependence on foreign oil. Establishing a recharging infrastructure is critical to the success of EVs inthe consumer market. Consumers must be assured that their vehicle can get them safely to their destination without major disruption. Whether commuting 30 miles to work or 200 miles on a weekend trip, people need to be able to quickly and conveniently recharge their vehicles. Acknowledging that all major auto manufacturers are releasing plug-in hybrid electric or fully electric vehicles in the next 12 to 36 months, ERRA Inc. (ERRA) would like to work with the state of New York to determine the infrastructure required to make your state EV ready. The initial phase of the infrastructure network deployment plan will consist of installing a limited network of commercial fast charge stations around key metropolitan areas. These stations will be strategically
New York	Electricity Storage for the 21st Century City	$6,000,000	NYSERDA	This request is for $6 million over 2 years (2009 to 2011) to supplement existing funds in creating a world-class facility at the CUNY Energy Institute. The Institute?s aim is to develop next generation electricity storage (batteries), crucial to enabling use of renewable, but intermittent, energy sources such as from the sun and the wind, particularly for application in large urban environments. Electricity storage is the Achilles heel of an energy strategy promoting use of renewable energy as the sundoesn?t always shine, nor does the wind always blow, when the energy is needed. Provided massive electricity storage could be economically deployed, substitution of renewable electricity could replace ? of our oil consumption, substantially reducing dependence on imports and reducing greenhouse gas emissions. The requested funds will address: 1) the fundamental research issues intrinsic to high energy density electricity storage systems, usually operated far from equilibrium conditions giving rise to coirect employment for 35 professionals, many of whom would be minority and underprivileged citizens.
New York	Project ReIgnite	$180,000	NYSERDA	Going green has become a ?buzz phrase? that discusses the need to commit to a cleaner, healthier planet by developing a different choice of how we live our lives, of being conscious. However, when we talk about this ?new? strategy of promoting sustainable economic development, the conversation must include educating and creating ?Green Career? paths for formerly incarcerated individuals and other marginalized populations, such as former substance abusers, minority women, homeless veterans, and troubledyouth. Designing and implementing environmentally friendly projects, such as The Project Re-Ignite ?Greening the Broken Windows? Initiative, would have a dramatic effect on creating renewed opportunity for those returning to society from incarceration bycreating jobs, thus reducing the recidivism rates and ebbing continued community/familial destruction. This project would be tied together with a non profit social enterprise business to foster self sufficiency, professional level development and entrep

County	Project	Requested $	State Agency	Additional Detail
New York	East 4th Street Energy Solutions Project	$2,500,000	NYSERDA	To date, more than $16 million has been committed to the renovation of the East 4th Street Cultural District. With an additional $2.5 million, FAB can improve the block?s energy efficiency through our unified Energy Solutions Project, which includes weatherizing buildings, creating an energy management system, and installing a photovoltaic system in the district?s 10 cultural facilities and 18 low income housing properties. FAB will obtain and review proposals from system integrators regarding installation of a photovoltaic system with necessary alterations to the block's electrical grid and rooftops. Ultimately, the medium-scale solar array and energy management system will lower operating expenses, provide security against power disruptions, and potentially create alternative revenue streams.
New York	Home Revitilization Project	$175,000	NYSERDA	The project will hire LEED and weatherization experts to retrofit and upgrade multi-family homes in the Harlem area, as per LEED classifications. The purpose is to ultimately decrease energy use per households and to increase home value. The project willinvolve 3 homes in the Harlem area, with an opportunity to extend to further homes/apartments.
New York	MMW Energy Conservation	$1,782,547	NYSERDA	Mary Manning Walsh Home is a 362-bed nursing home that serves the frail elderly. Through the FlexTech Program of the New York State Energy Research and Development Authority (NYSERDA), a 2/5/09 analysis was prepared regarding cost-effective energy conservation measures that can be take at the nursing home for energy efficiency. The detailed study identified 13 energy efficiency measures throughout the building and its equipment and systems (including lighting, boilers, chillers, kitchen, laundry and bathing facilities) required to serve 362 seniors. The nursing home is ready to move forward to implement the energy efficiency recommendations.
New York	HVAC/Emergency Generator Upgrades	$10,000,000	NYSERDA	Mount Sinai is proposing to upgrade the HVAC system in a one million square foot building and replace 5 emergency power generators.
New York	Train unemployed to do Green Building / Retrofitting	$150,000	NYSERDA	Seed money to start up a weatherization green/buildings skills training for adults who have disabilities for the purpose of job placement in upcoming low-income housing weatherization projects. Project would become self-sustaining within two years
New York	Bradhurst Neighborhood Plan. Solar and Geothermal Lighting Plan and Re	$3,500,000	NYSERDA	In partnership with Harlem Congregations for Community Improvement, the New York City Department of Transportation, the Metropolitan Transportation Authority and the local community, create and implement a solar and geothermal lighting plan for under thehistoric 155th Street roadway viaduct in Harlem. This will turn a dark barrier into a community focal point, attracting further public and private investment in an area of limited commercial activity and job opportunities. The fixtures will be made in Harlem as a part of a workforce development program. In addition, restore the 155th Street and 8th Avenue subway station in this neighborhood to meet demand of the significantly increasing population. Meets ESD/Harlem CDC's state mandate of creating andimplementing innovative, sustainable and community focused long range economic development projects that directly benefit underserved communities of upper Manhattan and provides a catalyst for attracting private investment to the area.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
New York	Work Fair	$0	NYSERDA	Work Fair is a pilot/showcase project, designed for city, state and even national rollout - a branding of sorts for the cleantech movement and the necessity of aligning the greening of the transportation and housing industries - that will begin with the""green home makeover"" of a housing project on the Lower East Side of Manhattan. Once this is complete, we will install a green utility plant on the roof, create an economic incubator on site and green the Staten Island Ferry. This strategic greening project does several things: 1. Creates a template for greening other housing (private and public) 2. Reduces welfare/entitlement spending on infrastructure, energy, food stamps and other government welfare support 3. Creates the foundation for a model fora local food supply (we intend to create organic gardening and hydro farming on site). The federal USDA was extremely excited about this idea, and may even kick in additional funding. 4. Creates the basis of an alt refueling infrastructure for the entirhway"" and essentially a floating battery in emergency situations - the Ferry - a vital part of emergency response, economic development of the Harbor Islands and another connection to large tracts of usable land for organic food production. This is alsoe ""smart grid"" far easier to maintain than any underwater cabling, for example. We intend to ask for special dispensation from the state for our green disability taxis to be able to make the Harbor crossings on the Ferry, recharging as they go. 8. Stim
New York	Menergy	$1,000,000	NYSERDA	We would like to build exercise centers that capture the energy created by the people working out and then convert it for later use. This would create many jobs, in both the building and maintenance of the gyms and those actually providing the manpower
New York	EL JARDIN DEL PARAISO	$50,000	NYSERDA	water recycle project and solar energy for Lower East Side community park and garden. Water recycle project has been partially achieved, but needs completion. it is the only state of the art system in the City of New York, created and supported by localcommunity members in partnership with parks department. Innovative Project has not been completed due to loss in funding resources.
New York	Family Legal Center	$250,000	OCFS	Legal Information for Families Today (LIFT) empowers unrepresented litigants to advocate for themselves in Family Court. All of our programs address the entrenched problems that have plagued the City?s Family Courts for decades. Indeed, the Court, whichhears cases that strike at the heart of today?s most urgent issues such as domestic violence and child custody, is understaffed and suffers from a glaring lawyer shortage, forcing most families to carry the added burden of representing themselves. LIFT?sFamily Legal Center is one way we help families address these challenges. It is the only program of its kind in New York City. It offers unrepresented parents the tools to: (1) represent themselves in Family Court; (2) enhance and improve their relationships with their children; and (3) secure the tools necessary to achieve economic self-sufficiency so that they may support their families. The Center currently employs lawyers, paralegals, social workers, and case workers. It has a staff of ten and a teew York Times Company Non-Profit Excellence Award.
New York	Jewish Guild for the Blind	$1,500,000	OCFS	Complete renovation of adult day health prog
New York	Lower East Side Girls Club	$1,000,000	OCFS	Shovel-ready new Girls Club (housing, educ, etc)
New York	Covenant House	$6,500,000	OCFS	Renovation of Cov House Crisis Center for youths (2/3 complete)
New York	Good Shepherd Services	$2,000,000	OCFS	HVAC/Plumbing renovations for at-risk girls center
New York	The Hetrick-Martin Institute	$320,000	OCFS	Renovation/tech upgrades for LGBT at-risk youth center
New York	Hudson Guild	$243,000	OCFS	Interior/Exterior renovations of child center

County	Project	Requested $	State Agency	Additional Detail
New York	Hudson Guild	$258,500	OCFS	Interior/Exterior renovations of Dr. Elliott (flagship) center
New York	3333 Broadway Expansion	$100,000	OCFS	RCN is a 501 c (3) corporation, located in the Fordham section of the Bronx and two sites in Harlem --3333 Broadway and 301B W. 130th Street. Founded in 1996, by Executive Director Gail J. Davis, Round-The-Clock Nursery provides 24-hour/7 days-per-week childcare was the first (and to this day), the only such institution in one of the most economically-disadvantaged communities in New York City. RCN is an educationally-focused, safe learning environment that enables parents with traditional or non-traditional work and/or educational schedules to pursue their goals. In addition, we provide emergency back-up services when parent?s regular childcare arrangements fail. We are accredited by the NAEYC (National Associaton for the Education of Young Children).We s service children from six weeks of age to 12 years old (afterschool). The Need for RCN. RCN?s ?parent-centered? child care services are urgently needed because existing child care services do not meet the needs of a significant segment of New Yorkarning process is a collaborative effort that requires the partnership of the child, the parent, and the educator and; children will excel academically in a nurturing, challenging, and interesting environment where their teachers have high expectations o-expanding our site at 3333 Broadway--will alow us to service 600 children and create 150 jobs including teachers, teacher's aides, adminstrators, clerical workers, social worker, cook, maintenance worker and facilties manager, etc.
New York	Center for Women and Families	$250,000	OCFS	One in four women is a victim of abuse; every nine seconds, a woman is abused by an intimate partner. Immigrant victims of family violence are particularly vulnerable and face barriers to service and other types of abuse, such as their partner threatening to expose them to immigration authorities. F·E·G·S proposes to expand its existing Center for Women and Families which annually provides 300-400 mostly immigrant women a comprehensive range of services, including crisis intervention; counseling; immigration advocacy; case management; community education and professional training; and hotline assistance. Enhanced resources will enable F·E·G·S to expand its partnerships with legal services providers in order to: assist victims in filing for U-Visas, political asylum and VAWA self-petitions; file documentation with U.S. Immigration and Customs Enforcement; gather evidence of abuse; and provide representation throughout the immigration application process. These services will create a seamless continuum
New York	The Way to Work	$300,000	OCFS	VFI will provide 300 disconnected youth with a comprehensive set of services including:
New York	Center for Benefits and Services	$500,000	OCFS	The Center for Benefits and Services provides emergency financial assistance to families facing eviction and other crises, and training and consultation about public benefit programs for over 1,000 social service providers annually. With our help, agencies build capacity to help their clients achieve financial stability.
New York	Homeless Youth - Opportunities in the Green Economy	$250,000	OCFS	This project will link homeless youth to training and jobs in the green economy through training, creqating linkages with other not-for-profits and/or unions and the development of self-sustaining social enterprises located at transitional independent living programs
New York	Family, Employment and Education Program	$200,000	OCFS	Through the expansion of low to no fee out of school time (OST) programing for an additional 100 children. Our program will help 100 families maintain their ability to work, seek employment, and career training opportunities while their children receivequality after school educational and recreational programming. Funding will also allow us to hire a 50 additional staff including high school and college students to staff the program and learn essential job skills while on the job

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	The Reading Team	$400,000	OCFS	The Reading Team would like to expand its programs into a second program site in order to serve more children and families. We currently conduct innovative and successful early literacy programs in Central Harlem for 225 four- to eight-year-old childrenand we conduct associated programs for the children's parents and their teachers. Our current programs take place at a Reding Team program site. We would like to locate our second program site in a local public school that serves over 350 children in grades PK-5. We believe that, with only a few small changes to our programs, we could serve the entire PK-5 school population with our early intervention literacy programs. Current Reading Team programs include a Preschool Program for four and five year olds; an After-School Program for children in grades K-3; a series of Parent Conversations to teach parents some simple and positive things they can do to support their children's success in school and in life; and a Professional Development Program for theLanguage Arts exam. All the Reading Team children who took the exam scored at Level 3 (Meets Standards) or Level 4 (Meets Standards with Distinction) on the exam. Because so many Reading Team children are growing up without books at home or easy access, we have institute and Book Distribution Program, through wihich every Reading Team child gets to select a new book every month to keep and enjoy at home. In addition, we give each child an assortment of educational materials and activities to keep and
New York	Web 2.0 Recruiting Software	$300,000	OFT	Pilot will launch 3/1/09 - will help people look for work. eHire has built the first low-cost candidate-centric and transparent job matching recruitment platform online that gives both candidates a voice in the hiring process and enables recruiters/emplo
New York	Architecturalized City Simulator	$1,000	OFT	This is a donative project to the educational community to bridge the gap in modern city simulation between social scientific and game-oriented graphical models. Although not under the auspices of an official not-for-profit, this will not be sold. Instea
New York	Increase access to smart grid and smart meter technologies in Black and H	$2,100,000	OFT	THIS IS A REVISED PROJECT DESCRIPTION THAT WAS SUBMITTED EARLIER The focus of this project is to insure and broaden the participation of Black and Hispanic communities in smart grid and smart meter technology to avoid and reduce disparities in access toenergy efficient technology in Black and Hispanic communities. The cost of energy represents a significant portion of the budget of Black and Hispanic communities. These communities were left behind in their access to computing as well as in their accessto the Web. It is important as the country moves to develop and deploy smart grid technology that will empower utilities and end users to manage electricity more efficiently that we create opportunities for Black and Hispanic communities to be empoweredearly to participate in this new energy revolution and to avoid being be left behind. An expected outcome of this project is to mitigate a potential technological disparity that may be created between the Black and Hispanic communities on one side and tcomputing revolution and the explosion of the Web. Another outcome is the creation of jobs and job training for the next generation of transmission workers as well as the emergence of Black and Hispanic entrepreneurs in this dynamic and growing market foogy. Reveal Analytics is a HubZone certified and minority-owned company located in Harlem, New York City. The company provides advanced analytic solutions to global organizations enabling them to transform their data into valuable information leading to

County	Project	Requested $	State Agency	Additional Detail
New York	Family Legal Center	$250,000	OFT	Legal Information for Families Today (LIFT) empowers unrepresented litigants to advocate for themselves in Family Court. All of our programs address the entrenched problems that have plagued the City?s Family Courts for decades. Indeed, the Court, whichhears cases that strike at the heart of today?s most urgent issues such as domestic violence and child custody, is understaffed and suffers from a glaring lawyer shortage, forcing most families to carry the added burden of representing themselves. LIFT?sFamily Legal Center is one way we help families address these challenges. It is the only program of its kind in New York City. It offers unrepresented parents the tools to: (1) represent themselves in Family Court; (2) enhance and improve their relationships with their children; and (3) secure the tools necessary to achieve economic self-sufficiency so that they may support their families. The Center currently employs lawyers, paralegals, social workers, and case workers. It has a staff of ten and a teew York Times Company Non-Profit Excellence Award.
New York	Video Streaming Capability within InfraGard	$150,000	OFT	InfraGard is a public, private program of the FBI. We are totally unfunded and as a green technology we educate security and risk professionals via our video streaming operations and bring education to there desk tops, thus reducing time away from the office, travel, lodging and food expenses as well as conference and professional development costs.
New York	Wireless Deployment of Broadband and Medical Records Transfer	$20,000,000	OFT	This proposal will establish a Wireless Internet Service Provider under the corporate structure, Public Private Partnership. This proposal can include City, State, Municipal, School, Tax Exempt Organizations, and others eligible under the American Recovery and Reinvestment Act of 2009. The proposal addresses four specific areas of broadband transmission to rural, economically disadvantage areas (1) Broadband, (2) Medical Records, Treatment and Care, (3) Education and (4) Public Safety infrastructures ofthe State of New York, Indian Tribal lands, and insure the citizenry can receive discounted carrier class quality Internet, Cable TV and telephone services. The proposal mission will fulfill the ARRA by maximizing alternative, shovel ready technology that will create jobs, enhance communications using carrier class Broadband, transfer of medical records to electronic format, optimizing telemedicine accessing and treatment with current and proposed health Care clinics. The proposal will establish FREE w
New York	Government Offices - Cat 6e Infrastructure Cabling	$5,000,000	OFT	Modernize outdated government office buildings with today's category 6e infrastructure cabling. Many thousands of feet of category 6e cabling completed. Up to 50 skilled jobs created and many maintained due to need for future servicing of the cabling.
New York	AHRC Health Care, Inc.	$400,000	OFT	Infrastructure and Capital Request for Electronic Health Records
New York	Boriken Neighborhood Health Center	$850,000	OFT	Capital IT Costs including Electronic Dental Records

County	Project	Requested $	State Agency	Additional Detail
New York	Electronic Health Record	$6,000,000	OFT	Jewish Home Lifecare (JHL) serves 10,000 elderly New Yorkers annually in Manhattan, Westchester and the Bronx through its skilled nursing facilities and sub-acute rehabilitation programs, homecare services, adult day centers, transportation services andsubsidized housing. JHL currently uses over 10 software applications to support its data management and reporting needs. Because of the number of applications, which lack interoperability, JHL is forced to engage in constant monitoring, reconciliation, duplicate data entry and rework to ensure compliant practices. In 2009, JHL plans to convert to electronic medical records. This shift in data management will integrate the clinical notes of our multidisciplinary care staff including nursing, medicine, and social work, physical, recreational and speech therapies and pharmacy. Total implementation is projected to take 2 years and will occur in phases to provide adequate development and testing time. There will be many benefits associated with automating ors, augmenting resident safety, improving communications and enhancing regulatory compliance.
New York	Rapid Responder Crisis Management System	$5,500,000	OFT	A request to utilize technology solution designed to help mitigate events in the event of an emergency on school campusues. This would include the followong: >identification, imaging of criticcal infrastructure data >Collaborate emergency planning sessions to build team consensus for each schools emergency plan >Develop descriptive data such as building demisinsions/occupancy trens, road blocks, staging areas for governmental agencies. >Evaluate and improve emergency plans at each school or campus regarding air pollution alert, Bio terrorism threat, suspicious package, building-loss, building structural failure, civil disturbance, explosion, fire or fire alarm, flooding, gas leak, medical emergencies, hostage situation. Through the use of technology critical information fromthe database will be easily accessible tolocal governmental agencies. > System is NIMS compliant > Provides for training of staff, teachers and crisis response team members >Provides descriptive datta for each school/campus for ind
New York	Health Information Technology (HIT)	$3,000,000	OFT	This project involves the purchase of Epic hardware and hardware set-up equipment. The Epic model automates workflow, provides analytic capabilities and is based on an open, service-oriented architecture that supports interoperability through regional and national standards for health information exchange. This system allow seamless access across the care continuum by providing users with the ability to track documentation, orders, medication and other data regardless of where patients receive treatment. All users will have security and role-based regardless of where patients receive treatment. All users will have security and role-based access to the same, most up-to-date patient record regardless of their location, thereby improving workflows andefficiencies.
New York	Upper Manhattan Wireless Broadband Initiative - Pilot Project	$1,000,000	OFT	New Technology, Workforce Development and Economic / Job Development Development of wireless Broadband in underserved, economically distressed area; job development; Facilitate development of new technology industry/opportunities

County	Project	Requested $	State Agency	Additional Detail
New York	Crisis Management and Resource Exchange Web Portal	$5,000,000	OFT	There are numerous business opportunities within the global homeland security market. Growth in this market is expected to increase from $70 billion in 2007 to $178 billion by 2015, according to the Homeland Security Research Corporation. F·E·G·S proposes to partner with a crisis management firm in the creation of a central web-based behavioral health network portal for business, nonprofits and first responders that will provide training in crisis management. Drawing on the latest research, the portal will help for-profit and not-for-profit organizations and public entities better prepare for and cope with crises and minimize their negative impact on their overall operations by providing access to a diverse range of crisis management trainings. The portal will offer step-by-step guides for emergency management; an e-learning platform and curricula for training for executives, responders and frontline employees; and other software products and technological resources. The training curricula will also a
New York	Technology Infrastructure Platform	$12,000,000	OFT	F·E·G·S health and human services network reaches more than 100,000 individuals and families each year at over 350 facilities, residences and offsite program locations throughout New York City and Long Island. With demand for services increasing due to the recession, F·E·G·S is seeking funding towards a Technology Infrastructure Platform to assist us in maintaining state-of-the-art technology to support our service delivery network. The planned technology enhancements will enable F·E·G·S to further reduce administrative and overhead costs, improve the quality of data and the measurement of outcomes, and achieve critical economies of scale in the delivery of services. The enhancements would include upgrading our IT network architecture, the implementation of an integrated financial and communication system, and other upgrades. Funding will enable us to continue to respond effectively to new and emerging health and human service needs in the community and access data and management information to assist
New York	Engaging physicians and clinicians in the Adoption and Implementation of H	$350,000	OFT	Implementing Health IT Consulting: 1. Convert existing paper medical records system to digital medical records library system. Outcome: Develop Master Patient Index database and convert paper records before HIT adoption. 50 offices < 10 MD/yr 2. Engage and Train providers in Culture and Work Flow change needed for the adoption and implementation of HIT Outcome: More successful IT implementation. Train 50 sites/year
New York	EMR application and medical chart scanning	$1,000,000	OFT	forward implementation of a current EMR, billing and doctor medical record archiving application. this will include infrastructure, applications, sales & support staffing, advertising - project will allow doctors to comply with all new federal regulations
New York	Physician Technical Support Web Site	$350,000	OFT	creation of technical web site and on line help center for all physicians to contact for help on their medical billing, practice management, attorney needs, insurance claims - repository of professionals from various disciplines to help the physician trnafer to, work with and solve the problems of computerizing their practice to comply with all regulations

County	Project	Requested $	State Agency	Additional Detail
New York	African Square at Adam Clayton Powell, Jr. State Office Building. Located i	$10,000,000	OGS	In partnership with the New York State Office of General Services and the local community, recreate Harlem's central square on the historic and award winning 125th Street with a community-supported design that reflects the important contributions of theAfrican Diaspora in this unique community. The project includes enclosing the breezeways around the lobby of the state office building facing the square with photovoltaic transparent screens that will enlarge the lobby area and add cultural space. MeetsESD/Harlem CDC's state mandate of creating and implementing innovative, sustainable and community focused long range economic development projects that directly benefit underserved communities of upper Manhattan and provides a catalyst for attracting private investment to the area.
New York	The East Harlem Firehouse Restoration Project	$3,000,000	OHS	MNN is ready to start construction on the historic East Harlem Firehouse at 175 East 104th St. This is a shovel ready project that can be included in the list of capital funding request from the NY Sate Economic Recovery Package. MNN's Firehouse Restorations project aims to return the derelict building to full community use and to offer the following services:a Youth media Center will cater ages 12 to 25, New economy skills and job training will be provided. Live broadcast & production studios, multi-purpose meeting, exhibition & performance space,new media training and mentoring for adults and youth, editing,broadcast, camera and studio facilities, broadband access and training. 85 total individuals will be employed on site over the duration of the seven month construction project. New permanent jobs at the firehouse are estimated at 20 full-time equivalents including the staff of the Youth Media Center, which is slated to occupy the 3rd and 4th floors. MNN will also be training local residents and fand allow future generations to acquire the experience and training to be competitive in the 21st century.
New York	Fair Harbor	$2,200,000	OHS	Renovation of the Fair Harbor Fire Department's firehouse. All volunteer - get no financial aid from local government, NYS or the federal government.
New York	biometric facial recognition for NY	$190,000,000	OHS	Public Safety includes preventing identity theft of New York citizens and Americans at key points of transactions. Criminals exploit vulnerabilities and weaknesses in our banks, health records, medicaid, and state entitlements by stealing citizens personal identifiable information. This leads to credit instability in housing markets, particularly in CRA compliance and race based predatory lending, hiring of illegal immigrants and the shortfalls of E-verify that adversely credit SS benefits in error, andmedicaid fraud. Our patented pending facial recognition biometric technology, will prevent id theft. We collect citizens volunteered information and facial images. We then compare that information against a multitude of disparate databases concurrentlywith facial recognition matches. Once the data is correctly matched the facial image is then stored and available for electronic transmission to key points of transaction i.e. banks new account desks, DMV, airports, law enforcement, point of sale terminasecurity analysist, call center operators, and many peripheral jobs i.e. increase in monitor sales, card swipe machines, image capture sales, and so much more. www.headsup.cc
New York	E. 3rd Street	$2,500,000	OMH	Bonds + LIHTC 4%
New York	Harlem Center for Preschool Special Education	$12,000,000	OMR	Construct a 35,000 sq. ft. early childhood special education center for pre-schoolers with developmental disabilities. This would result in the relocation of the current Manhattan facility from E. 67th Street to the community where most of the 130 current students reside. Also, would allow enrollment to increase by 50% to 200 students and provide 30 new jobs to be paid for through additional tuition revenue.

County	Project	Requested $	State Agency	Additional Detail
New York	National September 11 Memorial & Museum	$65,296,258	OPRHP	The National September 11 Memorial & Museum is charged with the creation and operation of a permanent national September 11 memorial and museum at the World Trade Center site in New York City. The organization is specifically tasked with the design, programming and operations of both the Memorial and the Museum, as well as working with the Port Authority of New York & New Jersey, which is managing the construction. The Memorial & Museum will pay tribute to the nearly 3000 lives lost in the terrorist attacks on September 11, 2001 and February 26, 1993. The Security Performance criteria for the World Trade Center site have necessitated unique and complex requirements adding significant cost to the project. The mandated criteria go above and beyond the New York City Building Code in order to ensure that this important public project performs at the most secure level possible. The increased performance requirements for security call for additional funding which compounds our escalating costs in the face o
New York	Harlem YMCA	$3,600,000	OPRHP	Facade repair and pointing of a 1933 NYC and federally designated landmark building. Work will maintain the building and meet NYC LL#11 building requirements. Facility is a center for youth and adult health activities center in Harlem.
New York	West Side	$1,700,000	OPRHP	Facade repair and pointing of 1930 building in a Landmarked district. The work will maintain the building and meet LL#11 building requirements. The facility has two child care centers and is a center for educational and health related activities.
New York	Center Capital Project	$1,172,000	OPRHP	Repair/replace deteriorated masonry, lintels and windows; subdivide space to create new community meeting space; replace sidewalk; create organization records storage; power clean facade; restore front doors; repair interior water damage; re-paint entireinterior.
New York	Tenement Museum Renovation Project	$2,000,000	OPRHP	The Lower East Side Tenement Museum is seeking to secure funding for a $2 million capital project for the renovation of 103 Orchard Street. This is the Museum's new building, which will be converted to serve as the Museum's Immigrant Heritage Center. TheHeritage Center will allow the Tenement Museum to significantly increase its capacity to welcome new and repeat visistors from across New York State and around the world and to expand its innovative programs and services. The project will provide for new enhanced classroom space, theater and performance space, new culinary facilities, retail and visitor orientation space and exhibition space.
New York	Henry Miller's Theatre Project	$2,000,000	OPRHP	Renovation of Henry Miller's Theatre in Times Square; complete final phase of outfitting the theatre, transforming it to a state of the art, LEED certified Broadway facility.
New York	New York City Department of Parks	$3,475,000	OPRHP	CB 8 197 A plan-Queensborough Bridge waterfront park construction
New York	State-of-the art Theatres Project	$2,000,000	OPRHP	A.R.T./New York is ready to build two new 99 seat state of the art theatres in the new Archstone-Clinton complex in the Clinton neighborhood of Manhattan which will provide multi-year residences, at reasonable rental rates, to six to eight of our membercompanies. This will be a ""green"" facility and will achieve either LEEDs gold or silver certificat
New York	Museum Renovation Project	$2,000,000	OPRHP	This project includes steel replacement throughout the museum, purchase and installation of flight deck safety railing, office and interior space renovation, steel catwalk repair and aft steel stairway replacement, refurbishment of Submarine Growler interior, restroom renovation, purchase of new mooring lines, and refurbishment of interior disabled-access elevator.
New York	Franklin D. Roosevelt Four Freedoms Park	$0	OPRHP	Construction of a world class civic space on Roosevelt Island, on a four-acre site designated as the Franklin D. Roosevelt Four Freedoms Park.

County	Project	Requested $	State Agency	Additional Detail
New York	Improvements to Harlem River Park - 135th to 145th Streets, along the Mar	$4,200,000	OPRHP	In partnership with the New York City Parks Department, New York City and New York State Transportation Departments and the local community, create an environmentally sustainable public restroom facility, improve access over Harlem River Drive to the park, and implement a locally based public art project in a new 10-acre community designed environmentally and culturally sensitive waterfront park along the Harlem River that is separated from the adjoining neighborhoods by a large limited access highway (Harlem River Drive). Meets ESD/Harlem CDC's state mandate of creating and implementing innovative, sustainable and community focused long range economic development projects that directly benefit underserved communities of upper Manhattan and provides acatalyst for attracting private investment to the area.
New York	46 Barrow Street Window Replacement	$260,000	OPRHP	This is an 1854 Landmark building. Time to start is long to to Landmark approval process. Landmark windows are approx.$116,000 remainder approx.$87,000. Remainder is architectural and filing fees and manangement
New York	NOW Ensemble Artists Payment	$4,000	OPRHP	NOW Ensemble is a chamber music organization (comprised of 5 players) that recently had its 2009 NY State funding 100% lost, due to the budget cutbacks. We rely on that money to pay players for services that do not pay enough to adequately compensate performers, including educational and outreach concerts, and we have a number of upcoming concerts that fit that description. Some of these shows will need to be cancelled unless we can find funding to replace the NYSCA money we have lost. This is money that would directly pay young, professional musicians who rely on NOW Ensemble for a significant portion of their incomes.
New York	16 Jones Street window replacement	$200,000	OPRHP	1920's 3 story building with original factory style, single pane windows. Approx 525 square feet of fenstation. All steel frame must be demolished and some brick work to be remade, some fill-in needed
New York	Convent Ave. Family Living Center	$900,000	OTDA	HHAP rehab
New York	Lenox Hill Neighborhood House	$1,000,000	OTDA	Facility wide renovations
New York	Funding for NYS Employment and Advancement Services	$1,500,000	OTDA	For too long not enough money has been provided to the NYS Employment of Advancement Services. If this program were to receive better funding more DSS workers would be able to help unemployment rates decrease. The NYS Employment and Advancement Servicesis a program that helps families become more independent. Anyone that is receiving services from DSS such as food stamps is required to participate in a work preparation assignment. This program called the Greater Avenues for Independence is a program toidentify each person as an individual and find jobs that meet each person?s abilities. This program is not required if a person already works fifteen hours a week or more. They need to show evidence that they have been looking for a job such as job applications and also complete training and education classes provided by DSS. Another benefit to funding this program would be of the 38.1 million people on food stamps in the U.S. alone, at least half of them would have a better chance at finding a job. Th

County	Project	Requested $	State Agency	Additional Detail
New York	SingleStop USA	$800,000	OTDA	SingleStop USA seeks funds to launch three new SingleStop sites in partnership with Community Action Agencies across NYS. These sites will give more than 3,000 New Yorkers in need access to a vast of array of government supports, tax credits, and legal and financial counseling and these residents will in turn stimulate local economies by spending these dollars quickly, locally, and productively. SSUSA is a national antipoverty not-for-profit that has pioneered a groundbreaking way to reduce poverty by helping individuals and families access billions of dollars in life-changing public benefits, tax credits and other essential services through a holistic model of integrated service provision. At our sites, families learn their eligibility for a host of resources ? food stamps, health insurance, tax refunds, and childcare subsidies ? in just 15 minutes. SSUSA offers vital legal and financial counseling to help clients maximize these additional resources and address issues such as eviction prevention, immty. By breaking down barriers to existing resources for which families are eligible, and by providing access to multiple benefits and integrated services at once, SSUSA provides an effective, holistic approach to addressing the crisis of poverty. The Sinated at the Robin Hood Foundation, has been tested in NYC since 2001?to great success. Last year, SSUSA connected more than 93,000 households with life-saving resources totaling more than $230 million in benefits and services. Recent evaluation suggests
New York	Coupad Food Stretcher	$750,000	OTDA	Coupad plans to establish an office and create a daily working presence in the state of New York. Coupad Food Stretcher? Three Commerce Park Square 23230 Chagrin Blvd. # 605 Beachwood, Ohio 44122 (216) 355-4236 Dear Sir/Madam: This attached Summary willintroduce you to a new and revolutionary concept for the use of electronic coupons for the purchase of food and other consumer package goods by Food Stamp and WIC recipients. This method will make the money given to Food Stamp recipients? go farther andat the same time save money for the state on its purchases products for the WIC program. Once this method is implemented throughout the state it will result in the creation of hundreds of jobs that will generate considerable tax revenue. As such it is aprime candidate for the investment of Stimulus funds. After you have reviewed the attached Summary I would be happy to talk you, either by phone or in person, to answer any questions. I look forward to hearing from you. In response, please contact me usiS WHILE STRETCHING THE MONTHLY DOLLAR ALLOTMENT FOR FOOD STAMPS AND SAVING THE STATE MONEY ON WIC PURCHASES BY THE USE OF ELECTRONIC COUPONS Coupad, is a marketing services firm connecting Consumer Package Goods (CPG) companies (General Mills, Procter &Gs, etc.), and their various brands, to consumers who utilize Food Stamps and consumers who are in the WIC program. Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
New York	Kids First Harlem Educational Enrichment Program with The Bank Street C	$7,000,000	SED	Our Harlem project is a perfect stimulus fit: education for disadvantaged children; jobs; and infrastructure. Harlem children are often denied equal education. We propose to supplement low-performing schools with model daycare, head start and afterschoolprograms to increase academic skills and strengthen social and emotional development. The following stimulus goals would be met through the Child Care Block Grant; the Community Service Block Grant; and the Head Start Program: 1) Education: There existsan acute lack of model daycare, head start and afterschool programs in Harlem for low-income and working families. Our project would improve literacy and academic skills, and provide enrichment activities for an initial group of 60 children at no charge; 2) Jobs: 9 staff and 30 construction; and 3) Infrastructure: Our new community facility would be a long-lasting benefit to Harlem. The Pratt Center will construct a model environmental building. The project cost of 7 million dollars covers land acquisi
New York	After School Programs	$100,000,000	SED	Child care development block grant.
New York	After School Programs	$9,800,000	SED	Funding for 21st Century Community Learning Centers.
New York	After School Programs	$28,200,000	SED	Restore funding to fy 2008 levels for Advantage Afterschool Program.
New York	After School Programs	$0	SED	Youth Services Block Grant to fully fund the Youth Development and Delinquincy Prevention program, and the Special Delinquency Prevention Program.
New York	Lower East Side Tenement Museum	$2,000,000	SED	Renovation of 103 Orchard Street, the Immigrant Heritage Center
New York	Community Environmental Center Inc.	$3,000,000	SED	Creates a green arts & education center
New York	Learning Spring Elementary School	$3,000,000	SED	New, green tower for learning center for autistic children
New York	Educational Alliance expansion	$15,000,000	SED	40,000 ft of new space for early childhood ed
New York	MAT school library	$488,000	SED	Pre-K-8th grade - new supplies & construction for new lib
New York	Millenium High School	$3,500,000	SED	Gymnasium for new Millenium school
New York	Dixon Place	$500,000	SED	Completion of cultural community center
New York	E 125th St Firehouse (rehabilitation of)	$4,500,000	SED	Caribbean Cultural Center African Diaspora Institute
New York	Asian & Pacific Islander Coalition on HIV/AIDS	$1,000,000	SED	Social service, research, & education center
New York	SHSAT Tutoring Program	$20,000	SED	Our project provides direct tutoring services to low-income middle school children from New York City. We teach mathematics, reading comprehension, logical reasoning, and the test-taking skills necessary to achieve success on the Specialized High SchoolAdmissions Test (SHSAT). Four tutors run our current class of 22 students which runs year-round (including the summer). With relatively little funding we will be able to retain these tutors and staff members and continue our program.
New York	Arts Education and Parent Involvement	$200,000	SED	Cool Culture provides professional development to more than 400 Title I public schools and subsidized pre-kindergarten programs throughout the 5 boroughs of New York City to help them use art based learning in their curriculum and in their parent engagement programs. Through our partnerships we are able to provide more than 45,000 low-income families with free, unlimited admission to our 80 partner museums. We provide parents with a range of tools to turn museum visits into lessons and to use out-or-school learning to prepare their children to succeed in school. The project will work with a subset of public schools and pre-kindergarten programs to: (1)Provide intensive professional development to teachers administrators to help them integrate arts based learning into their curriculum, (2) provide arts education to children in their educational contexts, and (3) creating exhibits of children's art at 5 of our partner cultural institutions.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
New York	Knowledge Bank	$250,000	SED	Knowledge bank will be a continual mentoring program between community professionals and high school and college students. It will give young people a chance to gain some real world corporate and or trade skills from experienced people in various fieldsand professions. This will equip the students with not only proper education but a taste of experience that will make them viable hiring candidates or future entrepreneurs.
New York	Hamilton-Madison House Private Day Care	$100,000	SED	Hamilton-Madison House, a non-profit settlement house located in lower Manhattan?s Two Bridges/Chinatown community, would like to construct a new, private pre-school program at 129 Fulton Street, New York. The three classrooms would serve 45 children 2.5through 5 years of age. The program would be targeted to the new families living in Manhattan's financial district. The program's fees would be based on a sliding scale, depending on the family's income. This community is becoming increasingly more family oriented and there is a paucity of affordable educational opportunities for young children in the community. To complete the proposed program, Hamilton-Madison House would hire a licensed contractor who would have an 8 person crew. Following the completion of the new classrooms, 10 new professional and support staff would be hired. Each year the House provides a comprehensive curriculum of social services to the new immigrant and low-income residents of lower Manhattan. The programs, which are cultur
New York	The Young People's Multicultural Literary Discovery Program	$550,000	SED	The Young People's Multicultural Literary Discovery Program is a ground-breaking program to transform the lives and increase potential of disadvantaged former high-school students. By exploring the genre of literature -- from graphic novels to the screenplay of great dramatic films, including Pulp Fiction -- we explore the whole range of human feeling and existence. This, in turn, builds the reading skills and self-esteem of high-school drop-outs. They are paired with volunteer mentors in the professional world. Together mentors and dropouts build whole new personas, and the young people find jobs with their newfound literacy skills and strengthened characters, and the professional contacts of their mentors. With the funding we are requesting, we believe we can train and employ at least 57 dropouts who would otherwise have no chance at a job.
New York	Breakthrough New York Expansion	$400,000	SED	Breakthrough New York was founded in 1999 in a public/private partnership with The Town School to address the educational and support needs of underserved, public middle school students in New York City by hiring high school and college students as teachers and mentors. We accept students from Central Harlem, Washington Heights, Lower East Side, Queens, The Bronx and Yorkville. Most of our students exhibit at least two of the following risk factors associated with low-college attendance rates. ? 90% ofour students qualify for federal free lunch ? 80% will be the first in their family to attend college ? 70% come from single-parent family households ? 43% speak English as a second language We strive for student cohorts that closely reflect the populations of color in the New York City public school system. The breakdown of our sixty-one Breakthrough students enrolled in our 2007-2008 are: 39% African-American, 37% Latino, 16% Asian, 8% other. 52% of our students are male, 48% are female. Our studentse stimulus money we propose to expand the program to a site in Brooklyn. This would allow us to double the number of students served and teachers hired.

County	Project	Requested $	State Agency	Additional Detail
New York	Performance Works	$3,300,000	SED	This pilot would leverage large existing NYC creative resouces to put 100 out of work dancers, choreographers, writers, musicians, composers and singers to work. The end product (a play/review/musical + a reality TV show about the play/review/musical) would self-fund 1 year after 3.3MM seed money requested. Profits from sale of Realilty TV show would fund the next 100 jobs for the next pilot.
New York	Advocacy, Counseling and Entitlement Services (ACES) Project	$100,000	SED	The ACES Project, established in 1984 as part of the Community Service Society?s Retired & Senior Volunteer Program (RSVP), trains volunteers ages 55 and over as public benefit counselors to serve in community agencies throughout New York City. ACES volunteers provide information and advocacy assistance on the full range of public benefit programs. ACES volunteers receive intensive training in Medicaid, Food Stamps, SSI, Public Assistance, housing and many other government benefit programs. After successfully completing the training, ACES volunteers work directly with clients providing information and referrals, screening for public benefit eligibility, advocating for clients, and assisting with applications. Volunteers are guided in their work by the1,000-page CSS Public Benefits Resource Manual, a comprehensive and regularly updated resource guide on 70 benefit programs. In 2008, the project had 70 volunteers serving in 45 sites throughout NYC. They assisted over 7,000 clients with information on 9
New York	Capital Project	$23,700,000	SED	Replacement of the cooling towers and chilled water systems that serve the Museum's south end.
New York	Casa Duarte Cultural and Performing Arts Center	$0	SED	
New York	Getting Beyond the System(r) for young people	$250,000	SED	educational seminars that prepare at-risk youth for higher education and work and engage professionals in the community in providing career and education advice to at-risk youth.
New York	The Caribbean Cultural Center African Diaspora Institute	$4,500,000	SED	Expand the diversity of cultural education and art services as well as to engage the youth of the communities in educational programs that will assist in employable skills for job opportunities in the broader cultural arts field.
New York	Professional Development Program	$50,000	SED	Funds would allow us to continue the employment of our Education Director, which will in turn allow us to provide Professional Development workshops to public school teachers, 30 of whom will receive $1,000 stipends for attending the workshops.
New York	Reading Team Adult Language and Literacy Program	$250,000	SED	The Reading Team, which is currently in its eighth successful year conducting early literacy programs for the four- to eight-year-old children of Central Harlem, has long had plans to start a language and literacy program for the parents of the childrenwe serve and for other adults in the community. We have been unable to carry out these plans because we have never had the resources to start such a program. Although there are several prospective supporters who might be willing to support such a program, they will not support its start up but require that we have a program in place before they will consider making a grant. About 2/3 of the children we serve are the children of relatively recent West African immigrants whose parents' native languages donot have a written construct and so they have no experience of reading or writing in any language. For many, if not most, of these parents, life is a daily struggle in a world where their weak English language skills and their inability to read are an oiteracy Program include starting with ESL classes for adults for whom English is a struggle and reading classes for those who cannot read or who cannot read well. In addition to the classes, we also we have a large library of materials such as appropriatCD players, CDs, DVDs, tapes, and videos that program participants can borrow to use at home and elsewhere. We expect that we would branch out from language and literacy to include Adult Basic Skills, GED and US Citizenship classes for program participa

County	Project	Requested $	State Agency	Additional Detail
New York	New York Bioscience/Biotechnology Technician Program (BTP)	$1,500,000	SED	This project is a biotechnology program that is unique to the New York area and is funded (until September) by a grant through federal/private funders in New York City. This program has been successful in obtaining employment for 53 biology/biochemistryundergraduate students in New York biotechnology companies and biomedical research institutions. We expect to expand this program to meet the workforce demands for the growing number of biotechnology companies in the New York vicinity. This expansion will involve increased enrollment in the program, networking and job placement.
New York	Emerging Artists Staff Salaries	$20,000	SED	4 employees compensation that run this Non Profit company are on hold - the Artistic Director, Managing Director, Bookkeeper, and Accountant. All are still working for the company - 2 full time and the other two part time without pay. To ensure the necessary infrastructure for this non profit to grow and employ others, these employees compensation must be met.
New York	Crisis Management and Violence Prevention in Schools	$5,000,000	SED	The psychological welfare of students suffering from psychological stress and trauma affects their performance in school. F·E·G·S proposes to enhance the performance of children and teenagers in NYC schools and help prevent violence, by significantly improving their emotional and psychological well-being. In partnership with other crisis management organizations, F·E·G·S proposes to train teachers and guidance counselors at 100 schools throughout New York City to better help students cope with stress and trauma. The agency will also create a comprehensive website that will be available to students and their families, school teachers, guidance counselors, and other professionals. The site will feature interactive learning games for students that build resiliency and will be a resource for the latest research on stress and psychological trauma.
New York	Central Resource Network for the Nonprofit Sector	$20,000,000	SED	For the past fifteen years, F·E·G·S Health and Human Services System has developed extensive management consulting and technical assistance resources in the areas of human resources, technology and staffing. F·E·G·S proposes to establish with a group ofnonprofit organizations and technical experts, a Central Shared Services Umbrella Network which would operate similar to a management (shared services) organization for nonprofits. This network would provide access to critical administrative infrastructure resources for nonprofits to help them reduce costs and significantly enhance their capacity to sustain and expand services for the community. The requested funding would enable F·E·G·S and its partners to develop an array of technology, Human resources management, financial management, procurement, risk management, facilities operations, marketing and other administrative supports services that could reach hundreds of NY nonprofits and enhance their service capacity for hundreds of thousands of New Y

New York	PRO-TV Professional Media Training for Youth	$150,000	SED	DCTV?S PRO-TV media training program for disadvantaged youth provides free hands-on digital media arts instruction in high schools and off-site, using state-of-the-industry digital video equipment. The instruction includes media literacy workshops, and opportunities to produce original videos to youth ages 14-21 from Manhattan, Bronx, Brooklyn, and Queens. It is a multi-tiered program with trainings of graduating skill levels where youth are teamed with professional instructors/mentors who guide them through a rich combination of media arts training; collaborative project implementation, and peer critique. Participating students effectively gain 21st century work skills, job readiness training, and improve their grades and attendance in high school. DCTV?s PRO-TV program is unique because the trainings are offered within the context of DCTV Broadcast Productions, a professional media production company that creates award-winning broadcast documentaries aired on HBO, ESPN, Discovery, PBS, and other medh dignity and strengt
New York	NYWIFT Intern Training Project	$60,000	SED	In the film and television field, most new opportunities are in the new media sector. However, not many women, especially women of color, have had the training to enter and compete for jobs in the sector. New York Women in Film & Television (NYWIFT) willtrain paid interns on Web 2.0 and the convergence of new and traditional media. Interns will shoot, edit, compress and post on-line educational training workshops for women. The workshops will focus on enhancing women's skills in film, television and new media. Interns will work with seasoned professionals who will supervise and advise. Resulting video will be streamed on the NYWIFT website and available to all. The training process will also be documented so that others can train themselves through the streaming videos available for free. This will result in 10 interns trained for working with moving images in the new media field, and 15 training videos to help others make the transition from traditional media to new media. The program will provide m

New York	Cine Qua Non Training and Implementation	$150,000	SED	Cine Qua Non, a 501c3 based in NYC and Westchester trains and educates individuals in the production of high profile media, primarily documentaries and web based work. Specific opportunities include on-site research in Rockland, Champlain and Buffalo Counties, in anticipation of production in those locations. In Manhattan and Westchester, opportunities include research, writing and editing. The outcome of our work is measured in terms of its specific reach: location spending, salaries, future jobs of trainees, as well as the success of the finished project: number of viewers, web-hits, reviews, festival and tv broadcasts. Cine Qua Non is unusual in our dedication to creating opportunities that extend beyond the specifics of media production. Training is closely supervised by Marion Lipschutz, a partner in CQN, a writer, producer and educator (Faculty: The New School) Rose Rosenblatt, her partner, an editor, producer and educator.

Niagara	EARL BRIDGES LIBRARY MUNICIPAL BUILDING--Reconstruction	$750,000	DASNY	EARL BRIDGES LIBRARY MUNICIPAL BUILDING--Reconstruction of floor and replacement of main roof on the City's main library at 1425 Main Street.
Niagara	B. Thomas Golisano Center for Integrated Sciences	$25,000,000	DASNY	This project includes the construction and equipping of a new 42,000 sq.ft. facility to accommodate research and instruction in the following academic disciplines: biology, bioinformatics, chemistry, computational chemistry and physics. The building will comprise laboratories, classrooms, faculty offices and space for interdisciplinary collaborative discussion and research among faculty and students. The project includes the relocation of state of the art scientific instrumentation owned by Niagara University from existing laboratories into the newly constructed facility.
Niagara	Campus Infrastructure Upgrades	$230,000	DASNY	The construction of new campus buildings (science facilty and dining commons) as well as major renovations to an existing theater structure, will require necessary enhancements to the campus infrastructure. Specifically, relocations are planned for thenatural gas service, electric service, water service and sewage and storm water management systems.
Niagara	Dining Facility	$850,000	DASNY	The construction of a new 20,000 square foot facility that will serve as Niagara University's primary dining facility for residential students as well as serving commuters, faculty and staff. The dining builing will be a multi-functional facility that will include a catering kitchen for functions conducted throughout the campus as well as serve as the site for large group events.
Niagara	Parking Relocation and expansion	$2,400,000	DASNY	Institutional plans to construct two new buildings on campus (science facility and dining commons) will require Niagara University to displace 448 parking spots that are currently used by students, faculty and staff. The project provides for the establishment of a new parking lot that will replace the current spots as well as provide additional parking. In total, 600 parking spaces will be created on the Niagara University campus.
Niagara	Theater Renovation and Lobby Addition	$220,000	DASNY	The existing campus theater structure will be renovated, refurbished and repositioned to ensure an excellent teaching and learning environment for students in addition to a comfortable, 150 seat environment for audiences. The project includes a new two-story addition that comprises an entrance/lobby with an elevator and direct access into the facility from parking.
Niagara	Neighborhood Health Center Primary Care Project	$800,000	DASNY	Expanded construction of a now-planned and shovel-ready 6,500 square feet Community Health Clinic. The clinic will be located in a underserved segment of the City of Niagara Falls in Census Tract 202, the area with the largest numbers of individuals whoare poor in Niagara County. Mount St. Mary's has raised $1.2 million for a building to provide basic services to 9,000-12,000 patients annually. Stimulus funds will offer us the opportunity to greatly expand the services offered. Currently it's basic primary care and OB/GYN. Stimulus Funds will allow us to provide space for additional diagnostics (X-Ray, Mammogram), as well as other preventative programs such as high blood pressure, diabetes, and cardiovascular disease prevention.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Replace Original Doors & Floors	$1,729,000	DASNY	Replace original doors and floors (1970s) in order to improve thermal efficiency, reduce safety hazards and facilitate easy of maintenance/care.
Niagara	Improve Energy Efficiency	$1,358,400	DASNY	Install alternate centrifugal chiller to support low & peak loads and implement automatic environmental controls throughout campus to improve heating/cooling efficiency.
Niagara	Replace Deteriorated Elevated Courtyard	$1,560,700	DASNY	The membranes in the elevated courtyard surrounding the library and joining several other buildings on the campus are leaking. This is resulting in water migration into building interiors and into support elements that now pose a serious safety hazard that must be eliminated.
Niagara	Renovate Science Center	$1,366,800	DASNY	Renovate original floors to make them acid-resistant and anti-static, replace outdated chemical ventilation and fire suppression systems, replace old lab benches and fixtures and reconfigure x-ray lab.
Niagara	Renovate Pool Facilities	$1,134,000	DASNY	Renovate pool to eliminate issues with deck, lining, filtration and other support systems and to bring it into compliance with NJCAA swimming and diving requirements. Also modify one of the existing indoor courts to provide space for coaches.
Niagara	Upgrade Scientific & Information Technologies Used in Classrooms	$1,329,000	DASNY	Outfit 30 classrooms with Creston room control systems, develop college web portal, upgrade microscopes and EKG machines, expand availability of laptops to students and faculty, develop pod-casting and video-streaming capabilities, upgrade servers and campus wireless capability, etc.
Niagara	Renovations to City Hall Municipal Building	$1,000,000	DASNY	Renovations to City Hall Municipal Building
Niagara	Rehabilitation of Minicipal Building	$520,000	DASNY	Rehabilitation of Minicipal Building
Niagara	Niagara County DPW Facility	$38,000,000	DASNY	Construction af a new energy efficient Public Works Facility
Niagara	Helipad	$250,000	DASNY	Helipad on hospital roof will allow transfer of emergency patients to and from medical center or case of disaster affecting roads and/or local and international bridges.
Niagara	Roof Replacement Waste Water & Water Filtration	$1,000,000	DASNY	Replace all roofs and repair walls to the City of Lockort's Waste Water Treatment Plant and the Water Filtration Plant. Provide a safe environment for City employees and equipment.
Niagara	Renovate Adult Behavioral Health Units	$6,400,000	DASNY	Niagara Falls Memorial Medical Center is requesting stimulus money to complete the renovation of two Adult Behavioral Health units accounting for 54 inpatient beds. The existing units are over 30 years old and the physical layout of the units? present safety hazards for the patients and staff. The new units will be built to current Office of Mental Health and Department of Health building code.
Niagara	Back-up Emergency Power Generator	$900,000	DASNY	The generator at the medical center now is approaching 40 years of age and is not sized to support all necessary functions. A new generator would greatly improve patient and employee safety in the event of a power failure.
Niagara	Construct Tuscarora Indian Nation Health and Community Center	$2,200,000	DASNY	New 32,500 sq. ft. facility on the Tuscarora Indian Nation. Approx. 10,500 sq. ft. will be dedicated to the Tuscarora Health and Dental Clinics and Community Health Worker Program. Envirionmental, Tribal and Community resources will also be housed. URS Inc. has already completed design and project planning. The building will follow LEED standards to meet minimum point level of certified. The facility will serve the Tuscarora Nation, an under-served population, who is part of the Haudenosaunee (Iroquois)Confederacy. Treaty obligations in place since 1794 provide provisions from the US government to see that Tuscarora communities and people receive proper support for their basic needs.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Ambulatory Surgery Center	$3,300,000	DASNY	The hospital is interested in providing a more efficient and cost effective manner in which to provide ambulatory surgery to patients in the Niagara County area. We are proposing to build a 12,500 square foot building in the Colvin Woods Development in Wheatfield, NY. It provides a central location for all Niagara County zip codes.
Niagara	Niagara Falls Community Health Center	$1,400,000	DASNY	Expand the Community Health Center of Buffalo to establish a Federally Qualified Health Center site in Niagara Falls, serving a combined total of 25,000 people with 80,000 visits, increasing the availability of primary care, reducing health care costs.
Niagara	Child Advocacy Center of Niagara	$1,500,000	DASNY	Construct a secure, child-friendly Child Advocacy Center for team investigation, intervention and treatment for children who are abused, maltreated or traumatized by exposure to violence.
Niagara	Address Health, Safety and ADA Needs Throughout Campus	$1,615,400	DASNY	Upgrade door hardware to be ADA compliant, eliminate dead-end corridors, provide fire separation doors and egress directions, etc.
Niagara	EARL BRIDGES LIBRARY MUNICIPAL BUILDING	$750,000	DASNY	EARL BRIDGES LIBRARY MUNICIPAL BUILDING--Reconstruction of floor and roof replacement of City's main library on Main Street.
Niagara	MUNICIPAL FUEL DEPOT--Dept. of Public Works	$750,000	DASNY	MUNICIPAL FUEL DEPOT--Dept. of Public Works - Remediate and Replace existing 'shared services' fuel tanks (serving the School Board, Water Board, and City) at Corporation Yard.
Niagara	Niagara County (Public Works)	$38,000	DASNY	Department of Public Works Facility
Niagara	Niagara Falls Memorial Medical Center	$250,000	DASNY	Helipad for Transfer of Emergency Patients
Niagara	Niagara County	$200,000	DASNY	Niagara Falls Memorial Medical Center - Real Time Bed Management System
Niagara	Niagara County	$140,000	DASNY	Niagara Falls Memorial Medical Center - Integrated financial Accounting Software
Niagara	Niagara County	$505,000	DASNY	Niagara Falls Memorial Medical Center - Wireless Network on all Nursing Units with Medication Carts
Niagara	Niagara County	$582,000	DASNY	Niagara Falls Memorial Medical Center - Pharmacy System w/Drug Interaction & Point of Care Medical Administration Checking
Niagara	Niagara County	$500,000	DASNY	Niagara Falls Memorial Medical Center - Enterprise-Wide Picture Archiving and Communication System
Niagara	Niagara County	$142,000	DASNY	Niagara Falls Memorial Medical Center - Voice Recognition for Radiology
Niagara	Niagara County	$3,800,000	DASNY	Niagara Falls Memorial Medical Center - Computerized Provider Order Entry with Nursing Documentation
Niagara	Niagara County	$210,000	DASNY	Niagara Falls Memorial Medical Center - Interactive Education Delivery System for Patients and Staff
Niagara	Niagara County	$200,000	DASNY	Niagara Falls Memorial Medical Center - Preventative Care and Chronic Disease Management
Niagara	Niagara County	$735,000	DASNY	Niagara Falls Memorial Medical Center - Laboratory Information System
Niagara	Niagara County	$207,000	DASNY	Niagara Falls Memorial Medical Center - Vitrea Enterprise-wide Advanced Visualization Software
Niagara	Niagara County	$102,000	DASNY	Niagara Falls Memorial Medical Center - Intesys Clinic Suite G2
Niagara	Niagara County - Mount Saint Mary's Hosp.	$1,500,000	DASNY	Expanded Construction of Shovel-Ready 6,500 sq. ft. Community Health Clinic in Underserved Section of Niagara Falls
Niagara	Niagara County - Mount Saint Mary's Hosp.	$500,000	DASNY	IDEA for Infants & Families
Niagara	Niagara Falls Memorial Medical Center	$1,289,000	DASNY	Food Stamp Benefit Increase
Niagara	Niagara Falls Memorial Medical Center	$30,000	DASNY	Food Stamp Administration
Niagara	Niagara Falls Memorial Medical Center	$34,000	DASNY	WIC Program Administration
Niagara	Niagara Falls Memorial Medical Center	$7,000	DASNY	Senior Nutrition Program
Niagara	Niagara Falls Memorial Medical Center	$142,000	DASNY	Homeless Assistance

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Niagara Falls Memorial Medical Center	$0	DASNY	Construct Tuscarora Nation Health/Community Center
Niagara	City of Lockport	$0	DASNY	Municipal Parking Ram Demolition
Niagara	Project Safe Childhood Program	$85,000	DCJS	To continue the employement of a Criminal Investigator in the District Attorney's Office that is dedicated to the investigation of crimes against children and sex offender registry violations.
Niagara	Mobile Command Center	$150,000	DCJS	The current Command Vehicle serves as the backup to our current Dispatch Center as well as onsite incident command center. It is a critical component of the emergency communication infrastructure. It's importance will increase by moving to a Central Dispatch as it will be the backup for the whole County. The existing Command Vehicle (1991), which was purchased as a used vehicle, exceeded its useful life in 2006 and must be replaced. The Department needs to stay ahead of the curve with interoperability and be able to deploy to multiple locations at the same time for any domestic or international terrorism incidents
Niagara	Firearms Training Simulator	$75,000	DCJS	Firearms simulator will allow police officers to respond to real life/real time judgmental shooting situations. Equipment to be housed at the Law Enforcement Academy at N.C.C.C. The existing unit was purchased in 1990 and no longer functions and cannot be repaired. This training aid will be made available to all county law enforcement for training. Potential liability issues can be avoided if this type of situational training is provided.
Niagara	Automated External Defibrillator	$60,000	DCJS	The existing unit was purchased in 1990 and no longer functions and cannot be repaired. This training aid will be made available to all county law enforcement for training. Potential liability issues can be avoided if this type of situational training isprovided. The existing unit was purchased in 1990 and no longer functions and cannot be repaired.
Niagara	Computer Equipment	$222,000	DCJS	Replacement of Data 911's is necessary due to the continual increase in processing and memory demands placed on the units by in car video, trac, field reporting, pictometry, etc. Requires us to upgrade them in order to continue to effeciently run and support these and future applications. Replacement of PC' s is necessary as they will be out of warranty and also need to be updated for latest software. Also these are Dell Precision Workstations with Raid drives as usage is a 24/7 in the Communications(Dispatch) Center. Machine will be over 12 years old. The technology level will need to be addressed. The supervisor engines in our core network switch will be End of Life and no longer supported by Cisco. As we get closer to this date this project will bere-evaluated as technology changes.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Interoperable Communications Equipment	$17,000	DCJS	The Cambria tower site is approximately 50 years old. The single monopole tower is simply not tall enough for countywide communications. The requested replacement height is at least 250 feet as opposed to the existing 80-foot monopole. Cambria is the primary backup site for the Niagara County Sheriff's Office radio system. At this time, communications into the western portion of the county, especially the Village of Lewiston and parts of the Town of Niagara (from the Cambria site) are extremely poor. Increasing the height of the site will greatly increase communications for these areas and for the entire county. Upgrade will allow complete digital communications of Niagara County Sheriff's Office radio system. A Digital format will allow for secure, private communications for the department wide radio system. Now, all CONVENTIONAL communications (Not including DTF and ERT communications) are easily heard by the general public and media via scanners and receivers. Digital Communications allows for privstem. It should also be noted that other area law enforcement agencies including US Border Patrol, Customs, FBI and DEA have all upgraded to digital radio systems. New York State Police will be implementing upgrades soon. Radios can be purchased incremenanalog/conventional capabilities so that the change over to digital will be transparent.
Niagara	Vehicle/EvidenceStorage Building	$2,500,000	DCJS	The proposed Storage Facility would be constructed on a concrete foundation, framed with steel and sided with steel measuring 100 feet by 300 feet long, 30,000 square feet, side walls to be 20 feet in height, with a pitched roof minimum of 41/2 pitch, over all height at peak approximately 36 feet. The building will require all utilities, including a sprinkler system, due to the function of the building. The building would be divided into an eleven(11) bay 11,750 square foot vehicle storage area with 9-16x16 foot overhead doors, 2-10 x 16 foot overhead doors and 2-3 foot man doors. Also included would be a 7500 square foot property/evidence area with 2-10x16 foot overhead doors and 1-3 foot man door. Lastly, a 3250 square foot radio service area with 2-10 x 16 foot overhead doors and 1-3 foot man door. The Sheriff's Office has a pressing need for storage space for Special Use Vehicles, Property/Evidence/Civil Process, records and supplies. Most of our Specialty Vehicles are stored outside in a non secuieve additional records and, in addtition, there is woeful need of storage space for department required supplies.
Niagara	Facility Security Upgrade	$1,090,000	DCJS	Install perimeter fence with gates around facility. Proximity alarms, cameras and intercoms to be tied in with security system. Perimeter fence would enhance facility security and keep inmates inside and unwanted persons on the outside.""Expand IPO sallyport by removing north and south gates and extending each gate approximately 40 ft in each direction. Install new gates and controls along with alarms, intercoms and additional cameras. In addition, erect roof over sallyport. Current sallyport does notaccommodate transport bus and an expansion would add more security. IPO sallyport is uncovered and open to the elements. Snow removal is a problem. Roof would also provide cover for agencies picking up/dropping off inmates. Repair and re-surface facilityparking lot, repair curb & catch basin replacement. Existing parking lot needs to be repaired in some areas and repaved. Storm drains & curbs need to be repaired & replaced. They have been damaged by tractor trailer trucks, snowplows, ice and salt. Grat
Niagara	Public Safety	$107,000	DCJS	Byrne/JAG
Niagara	Public Safety	$0	DCJS	Community Oriented Policing Services (COPS)

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Johnson Creek Erosion Control and Bank Stabilization	$115,000	DEC	Johnson Creek Erosion Control and Bank Stabilization Project along Asher Street - Stabilize approximately 500 LF of north side bank along Johnson Creek from Ridge Road to prevent further erosion and potential future damage to nearby residences and publicroad at top of bank. Project to include repair of eroded slopes, rip-rap placement, shoulder repair and guiderail replacement on Asher Street.
Niagara	Re-forest Northeast Portion of Campus	$150,000	DEC	Re-forest what is now open field in order to reduce gas consumption & emissions associated with cutting and realize air quality and habitat improvements associated with increased vegetation
Niagara	Tonawanda Creek Slope Stabilization	$610,000	DEC	The NCSD has twin 18-inch diameter forcemains that cross perpendicular to and beneath Tonawanda Creek. This area has experienced slope stability issues over the past few years. Failure of the slopes along the waterway could cause severe damage to the twin forcemains, disrupting service, resulting in costly repairs and waterway pollution. This project includes the stabilization of the slopes proximate to the crossing.
Niagara	Clearing of Interceptor Right-of-Ways	$712,000	DEC	The NCSD owns and operates roughly 195,000 linear feet of large diameter interceptors throughout its collection system. A significant portion of these interceptors are located within areas that have become overgrown with brush and small trees. This growth renders access to the interceptors very difficult when access to the interceptors is required for maintenance and/or repair. This project includes the clearing and grubbing of these right-of-ways (a width of 25 feet).
Niagara	Niagara County Household Hazardous Waste Collection Facilities	$175,000	DEC	Contruction of three Household Hazardous Waste Collection Buildings at three municipalities, recycling centers and department of public works facilities. This inter municipal project is presently permitted by New York State and is ready to go online to reduce toxic wastes from our infrastructure.
Niagara	Niagara County Brownfields Program Coalition Environmental Site Assessn	$1,000,000	DEC	The project will allow Niagara County to conduct environmental site assessments on at least thirty brownfield sites throughout Niagara County.
Niagara	Youngstown Cold Storage Site Remediation	$275,000	DEC	Funding will be used to remediate a brownfield site that is currently owned by the Village of Youngstown. Once remediated, the site will be redeveloped for residential uses.
Niagara	Former Lockport Air Force Station/NIKE Site	$1,400,000	DEC	Funding will be used for asbestos abatement and building demolition at the former Lockport Air Force Station/NIKE site in the Town of Cambria.
Niagara	Proposed Niagara County Fish Hatchery	$13,500,000	DEC	The proposed Niagara County Fish Hatchery's primary purpose would be to raise sport fish, primarily lake trout, for stocking into Lake Ontario and Lake Erie in support of the State's recreational sportfishing industry. A continuous and reliable supply ofdisease-free fish for stocking into the Lakes is important to support this industry and restore Lake Trout populations.
Niagara	Aquarium of Niagara	$0	DEC	This project is for the expansion of the Aquarium.
Niagara	Eighteenmile Creek Public Fishing Rights	$100,000	DEC	Eighteenmile Creek is one of the top trout tributaries in New York State based on creel census numbers. Project would seek the purchase of public fishing rights and improve access north of Fishermen's Park.
Niagara	Fisheries Projects for Niagara River & Lake Ontario	$100,000	DEC	Shoreline access is limited, especially at Lower Niagara River and at the mouth of Lake Ontario. For one of the top trout fisheries in the world, this project is designed to improve access for anglers that don't have boats at places like Artpark, JosephDavis State Park and Fort Niagara State Park.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Olcott Harbor Breakwater Project	$1,800,000	DEC	Construction of a new breakwater and/or wave absorbers to improve the safety of Olcott harbor as well as protect the inner harbor marinas and federal piers from storm surge and heightened wave action. Project would also allow for expansion of existing docking facilities within the harbor and possible construction of new docking facilities along the federal piers and outer harbor to accomodate transient non-trailerable recreational vessels. The project would include construction, renovation, expansion, and/or installation of support facilities to encourage greater use of the harbor and greater access to Olcott area attractions.
Niagara	Packard Rd. Drop Inlets Rehab/Replacement	$40,000	DEC	Drop Inlet rehab/replacement
Niagara	NFSS Risk Assessment Report Expert Review	$25,000	DEC	The NFSS, a federal government defense related site, part of the LOOW, is a priority public health and environmental issue in the Niagara County community. The US Army Corp of Engineers (COE) is currently in the process of studying and reporting on the NFSS as to its current environmental and public health condition. Its future will be determined as part of the process--will it stay? or will it go? and is it safe? One report that currently exists is the NFSS Risk Assessment Report. Expert review of thisdocument is critical to the current COE review/discussion process in order to represent the Niagara County community and present an unbiased expert opinion on the risk assessment issues as seen by this community. The review expert must have expertise inhuman and ecological risk assessment. The money noted would pay for that expertise to include public engagement in the review and conclusion process.
Niagara	Community LOOW Project Continuance	$50,000	DEC	Niagara County Department of Health's federally funded Community Lake Ontario Ordnance Works (LOOW) Project established a geographical information system (GIS) for environmental data associated with this federal government defense related site dating back to World War II. The GIS site is utilized by experts, the public and agencies and is in need of being made more public friendly. In addition, the GIS site needs to be updated as new environmental data is generated. The NCDOH needs to lead this processto ensure that the public is heard on this LOOW issue and that the state and federal agencies do their parts in assessing community public health issues/concerns.
Niagara	Removal of Water Tank, Town of Niagara	$50,000	DEC	The Town of Niagara would like to abandon an existing public water supply storage tank that is part of the Town's public water supply distribution system. An engineering evaluation of this proposal needs to be conducted by a licensed NYS Professional Engineer and submitted to the local health department for approval. Upon approval, the tank will be dismantled and removed from service.
Niagara	Niagara County (Sewer District No. 1)	$500,000	DEC	Tonawanda Creek Slope Stabilization
Niagara	Niagara County (Public Health)	$25,000	DEC	Niagara Falls Storage Site Risk Assessment Report Expert Review
Niagara	Niagara County (Public Health)	$50,000	DEC	Community Lake Ontario Ordnance Works Project Continuance
Niagara	Niagara County (Economic Development)	$13,500,000	DEC	Proposed Fish Hatchery at Joseph Davis State Park
Niagara	Niagara County (Economic Development)	$100,000	DEC	Fisheries Projects for Niagara River and Lake Ontario
Niagara	Niagara County (Economic Development)	$100,000	DEC	Eighteenmile Creek Public Fishing Rights
Niagara	Niagara County (Economic Development)	$1,800,000	DEC	Olcott Harbor Breakwater Project
Niagara	Niagara County (Economic Development)	$150,000	DEC	Cayuga Creek Watershed Restoration Plan
Niagara	Niagara County (Economic Development)	$1,400,000	DEC	Former Lockport Air Force Station/NIKE Site Asbestos Abatement and Demolition
Niagara	Niagara County (Economic Development)	$275,000	DEC	Youngstown Cold Storage Site Remediation
Niagara	Niagara County (Economic Development)	$1,000,000	DEC	Niagara County Brownsfield Program Coalition
Niagara	Niagara County (Refuse Disposal District)	$9,000,000	DEC	Niagara County Landfill Cap

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Niagara	Lockport Air Force Station	$1,400,000	DEC	Lockport Air Force Station Demolition and Asbestos abatement Create construction jobs
Niagara	Village of Youngstown	$275,000	DEC	Village of Youngstown Cold Storage Site Remediation Create construction jobs
Niagara	Assisted Living Facility for Low and Moderate Income Residents	$15,000,000	DHCR	Niagara Falls Memorial Medical Center proposes to construct a 60 unit, 88 bed assisted living facility in downtown Niagara Falls with 20 beds dedicated to individuals with memory impairment. A recent marketing study we commissioned demonstrated a need for low and moderate income assisted living beds in the Niagara Falls area. Currently, there is only one ALP provider in Niagara County and that facility is in Lockport some 20 miles from downtown Niagara Falls. The Governor is looking to add 6000 assistedliving beds across New York State. This project would serve the needs of the poor elderly in the Niagara Falls area, save health care dollars by placing residents in a more appropriate setting and create employment opportunities.
Niagara	Niagara County (Social Services)	$100,000	DHCR	Weatherization Revitatlization Assistance Program
Niagara	Health Information Technology	$6,500,000	DOH	Electronic Medical Record (EMR) system to include full Nursing Clinical Documentation (acute, Primary Care & long term), clinical decision support, updates to Cardiology systems (Tracemaster & Sandman), upgraded Pharmacy System, with expansion to Medication Administration. Wireless network environment, portable carts and PDA's for Nursing documentation and bar-coded wrist bands.
Niagara	Certified Nursing Assistant Training	$400,000	DOH	Certified Nursing Assistants (C.N.A.) Training for displaced or unemployed with salary support. Training for 60 participants in 5 classes with guaranteed employment and job placement. Mount St. Mary's will providing training and guaranteed job placementin a healthcare career.
Niagara	Expand Healthcare Offerings At Food Pantry Program	$500,000	DOH	Expand services of the Parish Nurse Program at the ""Heart Love and Soul"" food pantry and soup kitchen to double capacity by serving both lunch and dinner to support our mission and serve the under-served in the community. Currently, the food pantry isonly capable of serving lunch. Depending on the day of the month, between 75-120 people attend. Program will expand to two meals (lunch and dinner) and add coverage of Parish Nurse program to assist with medical ne
Niagara	Pre-Diabetes Education Program	$20,000	DOH	Pre-Diabetes Education Program. Current Hospital outpatient program recently initiated for Community health to be expanded in an effort to provide services to the underserved and underinsured in the Hospital's Primary Care Center located in the City of Niagara Falls. Program designed to educate individuals at risk for the development of diabetes on the importance of lifestyle changes for improved health.
Niagara	Address Perinatal Mood Disorders	$20,000	DOH	Perinatal Mood Disorder Program. Multi-agency collaborative program serving Niagara County, which will identify women at high risk for the development of postpartum depression and offer support services through formal groups and a 24 hour peer-supportedhotline. Program offered through several agencies and academic insitutions to identify high risk women for postpartum depression. Program will include peer support training and contact, education of providers and crisis intervention.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Employee Health Fitness	$50,000	DOH	Hospital Employee Health Education Program. Interdepartmental, interdisciplinary program to increase staff awareness of the importance of fitness for care providers, to improve utilization of on-site exercise facilities designed to promote fitness and toinstruct all staff in the importance of employing available preventive measures to maintain good health. Program will focus on health promotion for employees through a structured fitness component, interdepartmental informational campaigns and improvedawareness of maintaining good health through disease prevention.
Niagara	Increasing Access to Primary Care in Niagara Falls, NY	$1,420,000	DOH	The Community Health Center of Buffalo (CHCB) is requesting funding to open a Federally Qualified Healthcare Center (FQHC) satellite center in Niagara Falls in collaboration with the Niagara Falls Memorial Medical Center. The CHCB will expand into Niagara Falls to create a single integrated Buffalo-Niagara FQHC with one community board of directors and two sites serving approximately 25,000 individuals and with over 80,000 visits annually. $1,420,000 is requested to renovate an existing 18,000 sq. ft. site in Niagara Falls, along with the HIT system infrastructure. The CHCB will be the core of a new integrated network that is strategically positioned to work with all of the major hospital systems in two counties. The goals are to cost-effectively address the documented unmet need for safety net health care services, to create a patient-centered medical home to address racial/ethnic disparities in health care quality and access, and to improve the management of chronic conditions for all patients. This
Niagara	Heart Center Of Niagara Cardiopulmonary Health and Wellness Program	$134,000	DOH	Our community suffers from the highest Cardiac and COPD illness prevalence in the nation. Our socio-economically disadvantaged, underinsured and high-risk population has poor access to health, wellness and prevention education services. This funding is proposed to improve acess to our Cardiopulmonary health, wellness and prevention services for this population, and others who fall between the cracks of the current healthcare system. Our Cardiopulmonary Wellness Center offers programming designed to prevent/control heart disease, diabetes, COPD and other co-morbidities. Our intervention is highly supervised fitness and education provided by exercise physiologists and registered nurses. This intervention is designed to improve cardiovascular and muscularendurance, muscular strength, flexibility, body composition, blood pressure control, stress management, diabetes control, and psycho-social well-being. Our vision is that each participant will learn and understand the importance of exercise in maintaini
Niagara	Childhood Lead Prevention - Healthy Neighborhoods Program	$25,000	DOH	The Healthy Neighborhoods Program of the NCDOH is a State Health Grant Program that goes door-to-door in the underserved areas of Niagara Falls concentrating on environmental lead, indoor air (to include carbon monoxide, smoking and asthma), fire safetyand overall environmental health issues. The Program centers around prevention by providing much needed education accompanied by limited assistance in the form of prevention products such as smoke detectors, carbon monoxide detectors, asthma products, lead cleaning products and general safety items. As part of the childhood lead prevention component, the Department is in need of a lead paint instrument to replace our current outdated instrument. The instrument is used to test paint to determine if it contains lead. Many of the homes we visit have peeling paint issues that require fixing. This instrument, tied in with lead poisoning prevention education, will allow us to document conditions, educate, and pursue a fix to prevent a child from getting lead

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Niagara	Asthma Education/Intervention as part of the Health Neighborhoods Progra	$60,000	DOH	Asthma is becoming a major component of our Healthy Neighborhoods Program. About 30% of the homes we visit have at least one asthmatic. Our program concentrates on the environmental triggers behind asthma. Education aimed at prevention and proper management is provided. Limited asthma relief products (such as dust mite resistant pillow covers, mattress encapsulates and pet wipes) are also provided, and follow up is conducted to determine if education and management are working. Statistics show that reductions in the number and the severity of asthma attacks are realized. Additional supplies of asthma relief products to include carbon monoxide detectors, along with medical education in the form of a nurse, would greatly benefit the program and increaseour success rate. It is noted that asthmatics are more susceptible to carbon monoxide and as such are readily poisoned. Our current program has ties to the resident physician program at Niagara Falls Memorial Medical Center where residents go door to doo
Niagara	Heart Center Research Program	$150,000	DOH	This proposal is requesting funds necessary for advancing the proposing organization?s scientific research program examining the merits of non-invasive cardiac imaging modalities for the evaluation of heart disease. On-going research protocols are evaluating non-invasive positron emission tomography and multi-slice computed tomography as viable alternatives to invasive coronary angiography for the evaluation of individuals with suspected heart problems. Preliminary evidence from the proposing organization suggests the proper incorporation of these techniques into practice may reduce healthcare costs due to avoidance of unnecessary cardiac procedures without compromising patient health. The research program has been successful in obtaining extramural funding through reputable organizations such as the American Heart Association. The current proposal is seeking additional support for the research program to hire a full-time research assistant and enhance the technological capabilities to facilitate resetion of cheaper, non-invasive cardiac imaging technologies relative to more expensive, invasive alternatives.
Niagara	ICS remote view and EMR integration	$102,000	DOH	Intesys Clinical Suite G2 (ICS) will provide all of these capabilities: remote Docs viewing patients, interfacing with EMR and keeping track of patients from one floor to the next.
Niagara	Patient Safety	$447,000	DOH	Niagara Falls Memorial Medical Center is becoming a 21st Century Intelligent Personalized Health Care System. To facilitate the change to a Center for Community Health, rather than just a hospital the facility needs to embrace and utilize the latest technology available. To that end, Spacelabs Inc. has been approached to become the facility?s partner. A 12 lead EKG will be able to used at any bed side with a single cable change. Precious time is saved in this manner during an adverse cardiac event. Physicians will be able to be see a patient?s vital signs from any web enabled computer. These vital signs can be viewed in real time or the physician may look back in the history to make treatment decisions. Again, time is saved as the physician does not need to dig through charts after making a trek into the facility. Any data from the monitors can be put into the patient?s electronic medical record. Should a physician need to review any of this information at the patient?s medical home, it is readily ava
Niagara	Chronic Diseasse Self-Managent Program for seniors	$50,000	DOH	Our office has initiated training and dissemination of the Stanford Chronic Disaease Self-Management model at key points across our county. Federal funding will allow much broader, deeper reach and more savings to the healthcare system as more seniors are able to manage their health more effectively

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Niagara	Four Pillars of Care model for decreasing Hospitalizations	$50,000	DOH	The Four Pillars of Care model has been proven to reduce re-hosptalizations and improve transitions between levels of care. Our pilot efforts will be greatly magnified through additional funding through the stimulus program. Health care costs will be decreased, seniors will have fewer re-hospitalizations.
Niagara	Pharmacy with Medication Administration Checking and Drug Interaction in	$1,087,000	DOH	Implement a Pharmacy System with Bedside Barcoded Point of Care Medication Administration and Drug Interaction Checking in a Wireless Environment on all inpatient units. These systems are designed to ensure that the right drug is being administered via the right route to the right patient in the right amount at the right time: the ""five rights"" of drug administration. They are effective in preventing medication administration errors but are currently implemented in only about 2% of U.S. hospit
Niagara	VSurvey	$92,000	DOH	GOAL: Implement software to improve patient safety by monitoring compliance with core measures and with a wide range of regulatory agencies (joint commission, CMS state regulatory, MAGNET, HFAP, CARF, Baldrige, recommended by evidence based practice. Program is a web- based software package (ASP model) that minimizes impact on the facility?s information service/support staff. The system is available anytime and anywhere for the hospital user?s support is provided by telephone, e-mail and web-based training videos. Integrates regulatory compliance with patient safety, infection control and hazardous rounds. Provides centralized repository for all supporting documents which are easily linked to the appropriate EPs or CoPs (such as plans of correction, policies, and committee minutes). This feature allows the facility to quickly and efficiently determine compliance status, minimize hours of data input and document research. As well as, hospitals can link individual questions and results at the EP or CoPLeapfrog)automatically informs user?s when there has been a change in compliance standards from regulatory agencies.
Niagara	Team Building	$180,000	DOH	TEAM BUILDING The medical center will have three team trainers teaching Team Leaders of the medical center in learning the STEPPS Program. The STEPPS Program was developed by AHRQ(Agency for Healthcare & Quality) for the implementation of safety programswithin the hospital setting. These multi-disciplinary teams that are coordinated throughout the hospital system provide a system?s approach in dealing with safety issues. The safety teams created out of this project will assist in the transfer of the punitive culture of dealing with medical errors to a culture of safety. The safety culture will be ?bottom up? approach allowing everyone to be involved in these multi-disciplinary teams. The trainers will be employed for a period of 18 months. After the training program, the team leaders will be able to carry on the work of the trainers in team development.
Niagara	Computerized Physician Order Entry System with Nursing Documentation i	$4,305,000	DOH	Implement a Computerized Physician Order Entry System that includes nursing documentation and clinical decision support in a wireless environment. Interoperability and the ability to capture health care quality indicator data to support the exchange of clinical data with other organizations are also system requirements. The Siemens Soarian Clinicals 2.0C5 system that has been selected is CCHIT certified. Expected outcomes are: reduced medical errors, reduced length of stay; reduced repeat tests; reducedturnaround times for laboratory, pharmacy and radiology requests; as well as cost savings.

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Niagara	Pharmacy System with Bedside Barcoded Medication Administration Check	$1,087,000	DOH	Implement a Pharmacy System with Bedside Barcoded Medication Administration Checking and Drug Interaction in a Wireless Environment. These systems are designed to ensure that the right drug is being administered via the right route to the right patient in the right amount at the right time: the ""five rights"" of drug administration. They are effective in preventing medication administration errors but are currently implemented in only about 2% of U.S. hospitals. The Siemens Pharmacy and Med Administration Check 24.0 system that has been selected is CCHIT certif
Niagara	Real Time Bed Management System	$200,000	DOH	Implement a Bed Management system that is a workflow-enabled, integrated solution designed to provide significant improvements in bed control operations ? improving bed turnaround time, enhancing patient and employee satisfaction, while supporting patient safety initiatives. Bed Management helps organization: maximize capacity utilization and efficiency, improve bed turnaround time, increase admissions and occupancy, reduce Emergency Department (ED) diversions and cancelled procedures, enhance physicianaffinity, Address Joint Commission on Accreditation of Healthcare Organizations (JCAHO) patient safety and quality guidelines for patient flow, and automate and track important ancillary tasks such as environmental services and patient transport.
Niagara	Renovations for Residency Relocation	$250,000	DOH	Training Primary Care Providers - Niagara Falls Memorial Medical Center has provided training for a primary care residency program for 30 years. We would like to replace our existing ACGME program with a larger American Osteopathic Association AccreditedProgram to train primary care physicians as a mean of succession planning. This expanded residency program would require extensive renovations to an existing bank of medical offices in our Medical Office building.
Niagara	Healthy Me	$25,000	DOH	Improve health status of employees and families in underserved area thru data collection, cardiovascular,diabetes, dietary and fitness education and training.
Niagara	Diabetes Primary Care/ Outreach program	$135,000	DOH	Certified diabetes educator will be provided in primary care settings for patients with diabetes and pre-diabetes; outreach component will train peer educators to promote prevention and compliance in the community.
Niagara	Me and My Blood Pressure	$40,000	DOH	Education and outreach program to address the problem of hypertension in high-risk community and to reduce the health care disparities in the treatment and prevention of hypertension.
Niagara	Obesity Program	$350,000	DOH	Nutrition and fitness program that will treat, educate and coach 45 low-income residents who lack resources a health club membership or other nutritional and fitness services. The program provides classroom and one-on-one training in a group format, as well as linkages to smoking-cessation, health care coverage and primary health care.
Niagara	Pre-natal and peri-natal health	$40,000	DOH	This project will address pregnant teens and other high-risk populations to provide pre-natal education and encourage safe infant environments. Education and incentives will address sleep positions and environmental issues as well as other risk factors such as smoking.

After the training program, the team leaders will be able to carry on the work of the trainers in team development.
Niagara	Interactive Patient and Staff Education System	$1,449,400	DOH	Implement the Patient Edu Patient Education System. Patient Edu content is a collection of high-quality patient education healthcare programs that is developed and delivered on an interactive, on-demand video basis covering over 1,000 titles, 80% of medical conditions requiring hospitalization for three days or longer. The benefits to the hospital and the physician are improved patient safety, reduce costs by freeing up nurse personnel and automating the educational process, improving patient complianceand outcomes, reduces readmissions by certifying the patient?s knowledge of post operative requirements and improves nurse retention and satisfaction because of the consistent high-quality education that is provided to their patients. This database willbe installed on the central server in your hospital which will allow you to assign and prescribe education for any treatment a patient has been admitted for. This will provide the patients with customized patient presentations which can be modified andctually watched, what their knowledge level was and report what further education may be required by this patient to meet ?Joint Commission?s continuum of education requirements?. The patient web portal license allows the hospital to pre-register a patieon upon discharge through a patient ID and password web access which will allow the patient to view and be educated prior to admission and post-discharge while also being tracked and recorded in the Patient Edu Joint Commission Compliant Management Softw
Niagara	TheraDoc Infection Control and Antimicrobial Management Software	$920,000	DOH	Implement the TheraDoc suite of software products that offer real-time surveillance coupled with real-time decision support. This is an electronic surveillance systems for injury detection and prevention to transform the quality and safety of patient care?in real-time. This software helps clinicians improve infection prevention and management as well as reduce adverse events. It also enables robust antibiotic stewardship that effectively optimizes antimicrobial selection, dosing and utilization to control antimicrobial resistance. TheraDoc interfaces its software on-site with existing health information systems to provide immediate access to historical and emerging patient information. Clinicians are empowered with active surveillance tools that recognize changes in patient conditions, adverse events and threats to patient safety?as they occur. The intelligent trigger-based alerting system concurrently prompts timely clinical interventions. As a result, TheraDoc eliminates the lag time between recogni
Niagara	Prenatal Education/Importance of Natural Childbirth lowering risk for Cesare	$500,000	DOH	Developing Natural Childbirth education center and supportive services using stimulus money to encourage midwifes and birth doulas to practice in city of Niagara Falls and Lewiston as a means to reduce long care healthcare costs of cesesareans.

County	Project	Requested $	State Agency	Additional Detail
Niagara	McKesson InterQual Utilization Management System	$100,000	DOH	Implement the McKesson InterQual evidence-based clinical decision support system for use throughout the medical center. Prior to the general use of consistent and rigorous utilization management, widespread care variations, excessive healthcare costs, and less-than-optimal care were the rule rather than the exception. Today, thousands of people in hospitals, health plans, and government agencies use InterQual evidence-based clinical decision support criteria to answer critical questions about the appropriateness of levels of care and resource use. These criteria have helped define and legitimize the disciplines of utilization and care management, providing medical directors and other hospital, and health plan professionals support in making the type ofobjective, evidence-based decisions that define top-quality, efficient care, and leading to greater transparency and collaboration between payors and providers.
Niagara	WellCentive Preventative Care, Chronic Disease Mangagement, and Medic	$200,000	DOH	Implement the WellCentive Preventative Care, Chronic Disease Management, Medical Home software solution. The WellCentive system provides hospital systems with a cost effective and comprehensive preventive care and chronic disease management solution thatoffers a wide variety of benefits. Because they are Web-based, WellCentive systems and the data they contain can be used by various types of providers and staff across the continuum of care - outpatient primary care offices, outpatient specialty care offices, emergency rooms and urgent care centers, hospitals, and home health settings. WellCentive Outreach includes a comprehensive VoIP patient outreach system that can inexpensively, effectively, and automatically identify patients who are due for appointments or care, contact these patients using VoIP telephone calls, speak with each patient using his or her specified Primary Language, forward each patient who answers an outreach call directly to the scheduling office, record which reminders were succ

Niagara	Professional Healthcare Job Creation - critical shortage areas	$1,037,875	DOL	Niagara Falls Memorial Medical Center is an inner city hospital serving a disproportionate share of the medically underserved population. We are experiencing critical shortages in many key health care positions that dramatically challenge our ability todeliver care to our patient population. To address these needs we will create a competitive scholarship program for dislocated workers, partnering with state, local and minority agencies. This program will provide the full educational funding for shortage healthcare positions including RNs, LPNs, Nurse Practitioners, Pharmacists, Medical Lab Technologists, Certified Nursing Assistants, etc. Through this Federal grant, our safety net hospital, will achieve the following results: ? 64 permanent professional health care jobs providing lifelong career stability ? Significant financial and professional improvement of 64 unemployed or under employed residents of Niagara County. ? ability to hire for critical shortage positions that remain open greater than 1
Niagara	Niagara County Inactive/Archival Records Storage project	$5,152,000	DOS	In Niagara County, the County Clerk serves as the Records Management Officer (RMO). The Office of the County Clerk developed, implements and oversees the daily operation of the Niagara County Inactive Records Management Program. The program serves over 40 Niagara County departments scattered across the entire geographic area of the county. The purpose of the program is to facilitate the systematic, cost efficient control of the records created by our local government as required by law. The program identifies, preserves and encourages the use of records, providing safe, efficient storage of records and allowing them to be accessed as needed by government officials and members of the public. Additionally, the program controls all phases of records, fromcreation to final disposition to ensure that redundant records are not created, that records of continuing value are preserved for historical and archival research and that records that are no longer needed are promptly disposed of in accordance with lecost prohibitive, creating duplicate expense for office operations such as phone and fax lines, computers and associated programs such as internet and email. Two separate facilities also creates the need and added expense for duplicate and additional mains for HVAC, costs for supplying power, snow removal, maintenance of access and egress roads and regular building maintenance and cleaning in general. Neither of the current physical plants provides space in which records can be prepped or prepared for d

Niagara	RMP at Main St Bike Path	$1,624,000	DOT	RMP at Main St Bike Path Design approval requested from DCE could advance PS&E

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Water Distribution System Infrastructure Improvements	$760,000	EFC	Install approximately 5,500 LF of 6"" PVC waterline on Town roads that currently have no water service, including installation of line valves and fire hydrants at various locatons on distribution lines originally installed as transmission lines. Performimprovements to meter gauging station between the Towns of Hartland and Somerse
Niagara	Clearwell Upgrade	$7,500,000	EFC	Construction of two 1.25 million gallons underground concrete water storage tanks
Niagara	Water Treatment Plant Electrical Upgrade	$200,000	EFC	Upgrade of electrical control panels at water treatment plant.
Niagara	Sludge Lagoon Rehabilitation	$325,000	EFC	The Niagara County Water District is proposing to clean and rehabilitate an existing sludge lagoon at the water treatment plant. This allows the district to continue to use the same area of the project site for conditioning and disposal of the filter backwashing waste
Niagara	Pump Coating Upgrade	$50,000	EFC	The Niagara County Water District is proposing to perform pump coating upgrades on existing pumps at the water treatment plant to increase pumping efficiency and reduce energy use.
Niagara	Tonawanda Creek Force Main Replacement	$1,932,000	EFC	This project consists of the replacement of approximately 9100 linear feet of 18-inch diameter forcemain. The original material of construction is asbestos cement pipe and is roughly 35 years old. The pipe has a long history of breaks, often requiring expensive emergency repairs while disrupting service.
Niagara	Wastewater Treatment Plant Modifications/Collection System Improvements	$10,000,000	EFC	The operation of the NCSD wastewater treatment plant is governed by a State Pollution Discharge Elimination System (SPDES) permit issued by the New York State Department of Environmental Conservation (NYSDEC). This permit is currently undergoing a modification by the NYSDEC. Once issued, compliance with the new SPDES permit will require significant capital expenditures by the NCSD. Major compliance items will include a new wet weather operating plan to accommodate greater flows during periods of wet weather and improved flow metering/distribution throughout the wastewater treatment plant for increased process control. Also included are improvements to the satellite collection systems to reduce extraneous flows during periods of wet weather.
Niagara	Extension of Cambria Interceptor	$5,300,000	EFC	To accommodate new growth and business expansion within the Town, extension of the Cambria interceptor will be required. This project includes the installation of approximately 30,000 linear feet of interceptor.
Niagara	Extension of Pendleton Interceptor	$3,500,000	EFC	To accommodate new growth and business expansion within the Town and replace an aged and very problematic and maintenance intensive grinder pump sewer system, extension of the Pendleton interceptor will be required. This project includes the installationof approximately 14,000 linear feet of interceptor.
Niagara	Water Tower Rehabilitation	$763,000	EFC	This project consists of the rehabilitation of the existing elevated process water storage tank located at the Water Pollution Control Center. The major items of work include the detailed inspection of the interior and exterior of the tank, cleaning andsurface preparation of both the interior and exterior, application of a corrosion resistant liner on the interior, painting of the exterior, replacement of the discharge valve, and other miscellaneous tank improvements.
Niagara	Niagara County Refuse District Landfill 1 Cap	$12,000,000	EFC	Landfill Capping and Environmental Cleanup of County Municipal Landfill operated in 1969. 12 Acre NYSDEC Earth and Geomembrane Cap with Perimeter Groundwater Collection System.
Niagara	Niagara Falls Water Board	$100,000,000	EFC	Niagara Falls Wastewater Treatment Facility Refurbishment .

County	Project	Requested $	State Agency	Additional Detail
Niagara	Drinking Water/Waste Water Treatment System - Tuscarora Indian Nation H	$885,000	EFC	The Tuscarora Indian Nation is constructing a Health and Community Center. The facility will require a potable water treatment system (chemical pre-oxidation, ion exchange activated carbon/reverse osmosis filtration and disinfection) and wastewater collection and trreatment system (septic/aeration/settling tank, intermittent sand filter and UV disinfection). There is no centralized system on the Nation. There are high levels of dissolved solids, chemical/bacterial contamination. Also, wastewater discharge system is needed to avoid futher contamination of existing wells and land.
Niagara	Niagara Falls Wastewater Treatment Facility- Refurbishment of equipment a	$100,000,000	EFC	
Niagara	Niagara County (Sewer District No. 1)	$1,700,000	EFC	Upgrade Tonawanda Creek Forcemain
Niagara	Niagara County (Sewer District No. 1)	$10,000,000	EFC	Wastewater Treatment Plant Modifications and Collection System Improvements
Niagara	Niagara County (Sewer District No. 1)	$5,300,000	EFC	Extension of Cambria Interceptor
Niagara	Niagara County (Sewer District No. 1)	$3,500,000	EFC	Extension of Pendleton Interceptor
Niagara	Niagara County (Sewer District No. 1)	$650,000	EFC	Water Tower Rehabilitation
Niagara	Niagara Falls Memorial Medical Center	$885,000	EFC	Drinking Water and Wastewater Treatment System For Tuscarora Indian Health and Community Center
Niagara	Niagara County (Water District)	$7,500,000	EFC	Clearwell Upgrade
Niagara	Niagara County (Water District)	$16,000,000	EFC	Transmission Line Upgrade
Niagara	Niagara County (Water District)	$200,000	EFC	Electrical Upgrade
Niagara	Niagara County (Water District)	$750,000	EFC	High Service Pump Station VFD Upgrade
Niagara	Niagara County (Water District)	$325,000	EFC	Sludge Lagoon Rehabilitation
Niagara	Niagara County (Water District)	$50,000	EFC	Pump Coating Upgrade
Niagara	Ketchum Avenue Waterline	$300,000	EFC	1,500 linear feet of 8 inch waterline along Ketchum Avenue in the hamlet of Newfane including hydrants, valves, lawn restoration, pawing, and sidewalk repairs. The project will replace existing cast iron waterline that is deteriorating due to age with increased breaks, and is at the end of its design life. The waterline is an important component of the Town water supply system providing water to the only hospital located in the Town.
Niagara	Murphy Road Waterline	$100,000	EFC	2000 linear feet of 8 inch waterline along Murphy Road including hydrants and appurtenances to provide enhanced water service and fire protection to residents and agricultural entities.
Niagara	Beach Street and Jackson Street Waterline Replacement	$500,000	EFC	? 4,500 linear feet of 8 inch waterline to replace failing waterline and to eliminate low pressure and inadequate fireflows in the Beach Street/Jackson Street development. The project will also include replacement/upgrade of hydrants, water services, andrestoration of disturbed lands.
Niagara	West Avenue and Orchard Street Waterline Replacement	$600,000	EFC	5,500 linear feet of 8 inch waterline to replace failing waterline and to eliminate low pressure and inadequate fireflows in the Orchard Street/West Avenue development. The project will also include replacement/upgrade of hydrants, water services, and restoration of disturbed lands.
Niagara	Ketchum Avenue Sewerline	$200,000	EFC	1,500 linear feet of 15 inch sewerline to replace a failing clay tile sewer line that leads to backups and sewer service interruptions for the residents of the Ketchum Avenue and surrounding areas.
Niagara	Olcott Waterline Replacement	$800,000	EFC	6,000 linear feet of 8 inch waterline to replace failing waterline that was installed in the 1930 and 1940s. The hamlet of Olcott has areas that experience low pressure and have inadequate fireflow capacities for the fluctuating population they experience during the summertime tourism season. The project will also include the replacement of hydrants, water services, sidewalks, repaving of roads, and restoration of disturbed lands.

County	Project	Requested $	State Agency	Additional Detail
Niagara	Transforming Health & Wellness in Eastern Niagara County	$2,000,000	ESD	This is a request for $2 M in Federal support for fixtures, furnishings, equipment and soft costs (architectural design); this is in addition to the $9.5 M cost to construct a new 68,000 s.f. YMCA in Lockport, New York. Federal investment in such fixtures/equipment for this YMCA will help enable the ?Activate America? program which targets the national fight against obesity and assists the YMCA in addressing handicapped access compliance issues (ADA). Activate America is the YMCA?s nationally-developedresponse to our nation?s rapidly increasing average weight. It is a comprehensive set of programs and activities that focus on improving eating habits and increasing physical activity and it is conducted and administered at YMCA facilities. This requestis targeted at enabling the Activate America initiative in our service area of Eastern Niagara, Northern Erie and Western Ontario counties. This project will positively impact the lives of thousands of people in our region. This project is shovel-ready:
Niagara	Lockport Industrial Park Infrastructure	$2,125,000	ESD	Lockport Industrial Park Infrastructure
Niagara	Niagara County IDA Industrial Park Electrical Service	$65,000	ESD	This project involves the installation of 1806 trench feet of underground primary electrical cable in Vantage International Point Industrial Park in Wheatfield. This line will extend service to a section of the park that currently lacks electrical service and allow for construction of additional manufacuring facilities.
Niagara	Countywide Marketing Program for Niagara County	$300,000	ESD	Development of a marketing program to market Niagara County to Canadian and international companies . The program would include direct mail, print advertising and production of marketing materials. Companies attracted to Niagara County will provide employment opportunities for Western New York residents.
Niagara	Venture Capital Fund for High-Tech Startup Businesses	$1,500,000	ESD	Designed to establish a $10 million venture capital fund - a pilot program to provide seed capital to high-tech startup companies that have the potential to expand into major employers
Niagara	Niagara County Agribusiness Fund	$1,000,000	ESD	Make investments that support access to marketing agribusiness, food processing, alternative fuels, etc. and hire a Director of Agribusiness Development
Niagara	Develop Hospitality & Tourism Center in Downtown Niagara Falls	$13,200,000	ESD	Develop a hospitality and tourism educational facility in downtown Niagara Falls that will respond to the growing need for training in this industry and provide economic development stimulus in this economically-challenged area.
Niagara	Town of Niagara Spec Building	$2,000,000	ESD	Construction of spec building for light manufacturing and warehouse/distribution operations. Town of Niagara if minutes from the Canadian border and provides opportunity for Canadian companies to set up a U.S. operation.
Niagara	Lockport Industrial Park Spec Building	$2,200,000	ESD	Construction of 30,000 SF one-story steel building to subdivide for start-up light assembly, warehousing and distribution businesses.
Niagara	Parking Ramp/Shopping Mall for Rainbow Centre	$5,750,000	ESD	Parking Ramp/Shopping Mall for Rainbow Centre
Niagara	Development of Niagara Experience Center	$92,000,000	ESD	Development of Niagara Experience Center
Niagara	Buffalo Bolt Business Park - Spec Building/ Incubator	$1,500,000	ESD	An incubator building on a recently remediated and City owned parcel of land that is currently being redeveloped as the City's prime business park.
Niagara	Gateway Harbor Inn	$500,000	ESD	The local development corporation bought an abandoned 3 story brick building along the Erie Canal to be converted into a hotel/inn. $350,000 has been invested in acquisition and remediation. Further funds are in place and bid documents are being prepared. This is a downtown anchor project that can transform the whole area.

County	Project	Requested $	State Agency	Additional Detail
Niagara	Old Falls Street - West Mall Initiative	$7,950,000	ESD	Old Falls Street - West Mall Initiative - Major infrastructure investment involving full restoration and reconstruction of Old Falls Street, from Prospect Street to First Street, in downtown Niagara Falls. A construction contract was awarded in November2008 and preliminary efforts for Phase I of the project are underway. Final design for all phases/elements of the project is complete and full funding would enable construction to commence within 60-90 days of allocation. Funding Need $7.95 million/Project Costs: $7.95 million. Project is scheduled for completion in June 2009 to facilitate the centennial celebration of the 1909 Boundary Waters Treaty between the U.S. and Canada. An international symposium between U.S./Canadian federal officials on bothsides of the border is planned as part of this celebration. This project would reestablish Old Falls Street as an important place of downtown activity, connecting Niagara Falls State Park to the City of Niagara Falls and reinvigorating this traditionalhile enhancing the environment for the development of businesses and jobs in this tourist district.
Niagara	Buffalo Bolt Business Park Infrastructure and Spec Building	$2,500,000	ESD	Buffalo Bolt Business Park Infrastructure and Spec Building Construct a business park with spec buildings Create construction jobs
Niagara	Niagara County, Niagara Experience Center	$20,000,000	ESD	Niagara County, Niagara Experience Center To construct a niagara experience center Create Jobs

County	Project	Requested $	State Agency	Additional Detail
Niagara	Building Renovation	$150,000	ESD	Having recently gone through a Phase 1 part of a business start up we have opened our restaurant in Newfane NY Del Fuego Steakhouse. We are currently awaiting our liquor licesnse to be able to be full service, but are currently employing 13 people both part and full time. Phase 2 will be the renovation of our Banquet Facility which can seat 300 guests for banquets and other social events. This facility would employ approx. 10-20 full and part time employees as well. The funding would be for equipment purchase and building renovations due to years of neglect and vandalism. We are looking for some help with this endeavor to bolster the rural economy of Niagara County and the entities which we would be involved with. ie Local winery's and the Niagara WineTrail, Featuring their wines in our restaurant etc. Any Assistance would be appreciated.
Niagara	Committed to Cambria	$4,660,000	ESD	This 5-year plan involves our current business and community. We intend to employ up to 170 skilled / unskilled workers covering 20 fields of expertise with 35-40 permanent employees remaining after completing the project. We plan to build 3 new buildings, renovate 2 structures built in 1826, and dig a 2-3 acre irrigation pond for the existing 15 acres of grapes and 1000-tree apple orchard. The 1826 Stone House will be completely renovated with a new kitchen to be used for a restaurant / catering business. The 1826 Barn will be completed and made available for Community Events. We will build a 42? x 120? climate controlled building for processing and storage. A log cabin will be build for public and private meetings and rental. We will builda a roffedpad that that will house new gas and wood fired kilns to teach local students and artists the joy of pottery. There will be a covered walkway between the tasting room and the restaurant in the Stone House. A stone fence with 2 main gates will be built to

Niagara	Power Plants, NYPA NIAGARA Power Project - HVAC	$506,283	NYPA	
Niagara	Solsil - Solar Grade Silicon (SoG-Si) Manufacturer	$55,000,000	NYSERDA	Solsil, a subsidiary of Globe Specialty Metals, produces very high purity silicon for use in photovoltaic solar cells, by means of a proprietary metallurgical process. Solsil currently supplies its industry leading solar-grade silicon to top-tier manufac
Niagara	Integrated high efficieny/solar panel lined roof.	$800,000	NYSERDA	The project would both reduce energy cost for the facility as well as provide renewable electrical power, with a reduction in the carbon footprint & load on the energy grid.
Niagara	Installation of Energy Efficient Windows	$400,000	NYSERDA	Installation of Energy Efficient Windows in Hospital. Replacement of 180 windows on 7-story main building. Project would enhance energy efficient, and improve patient comfort and care.
Niagara	Replace Electric Switchgear From 1970s	$500,000	NYSERDA	Replace switchgear that is obsolete and could fail at any time. Repair is not an option due to lack of replacement parts. Failure could result in loss of ability to distribute power to multiple facilities for an extended period of time.
Niagara	ApplianceEfficiency Upgrade	$430,000	NYSERDA	Purchase new washer and dryer for inmate laundry room, replace fire panel, replace water heater, upgrade refridgeration in kitchen. Replace Kitchen and laundry Equipment, Ovens/Steamer/Dish Washer/Washer & Dryer. Kitchen and Laundry Equipment, Washer/Dryer and refrigeration. Kitchen Equipment, ovens, convection steamer and refrigeration. Current washer and dryer are 15 years old. These appliances are in use 8 hours a day, 7 days a week, they will need to be replaced. Fire Panel is no longer manufactoredand parts will no longer be available. The water heater was installed in 1989, fin tubes are deteriating and is in need of replacing. Current refrigeration system needs to be upgraded in order to accommodate both the Jail and OFA's food. All equipment is in need of replacement due to non-efficiency, age and usage.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Solar Power Installation	$1,000,000	NYSERDA	Upgrade medical center roof and install solar panel array to provide electricity to the medical center. This will provide ""clean"", renewable energy for the medical center. The result will be reduced energy cost and a cleaner environm
Niagara	Energy Efficient Window Replacement	$550,000	NYSERDA	Replace approximately 320 forty year old windows with energy efficient windows in the medical center. This will result in reduced energy cost to the medical center.
Niagara	HVAC Efficiency Upgrade	$500,000	NYSERDA	This project is to add a heat recovery system and upgrade the controls on the medical center's HVAC system to improve efficiency and reduce operating expenses.
Niagara	Municipal Building Solar Project	$1,250,000	NYSERDA	Replace the roof of the City of Lockport's Municipal Building and install a Photovoltaic System for supplemental electricity.
Niagara	Outreach for young ""scientists"" interested in solar en	$200,000	NYSERDA	People of all ages are looking for information to help in understanding of the merits of solar energy. The topic can be rather confusing. Information misleading or incomplete. True experts in the field are rare and busy. An outreach program to enhance the fundamental understanding of direct conversion of light into electricity can be highly beneficial to young inquiring minds.
Niagara	Performance and reliability of thin film solar cell and module	$200,000	NYSERDA	Photovoltaic Research Center is a nonacreditated research institution capable to produce valuable and frontline research in the field of photovoltaics. The director of the institute is a well known thin film photovoltaics specialist willing and capable to transfer a reach and valuable pool of expertise to a younger generation of scientists.
Niagara	Manfacturing thin film solar modules suitable for large scale application of p	$2,500,000	NYSERDA	Canrom, a developer of state of the art, CdTe-based, thin film solar modules is ready to start experimental production. We are missing working capital and trained personnel. Canrom, most probably, is the only company in New York state well positioned toadvance fast in this endeavor. The market is endless.
Niagara	MUNICIPAL BUILDINGS--Dept. of Public Works	$520,000	NYSERDA	MUNICIPAL BUILDINGS--Dept. of Public Works - Rehabilitation, energy-efficiency upgrades and roof repairs on multiple buildings: John Duke Center; Carnegie Bldg.; Fire Administration Bldg.; Golf Course Facility; Tenth St. & 72nd St. Firehouses.
Niagara	MUNICIPAL BUILDING--Hyde Park Ice Pavilion	$1,500,000	NYSERDA	MUNICIPAL BUILDING--Hyde Park Ice Pavilion - Complete Rehabilitation of privately operated Municipal Ice Hockey Complex. Installation of energy efficient machinery & equipment. Complex is a regional draw for many hockey tournaments.
Niagara	Mount Saint Mary's Hospital	$750,000	NYSERDA	Integrated High Efficiency/Solar Panel-Lined Roof
Niagara	Mount Saint Mary's Hospital	$300,000	NYSERDA	Replace 180 Windows with Energy-Efficient Windows
Niagara	Niagara County (Sherriff's Office)	$430,000	NYSERDA	Correctional Facility Appliance Efficiency Upgrade
Niagara	Niagara County (Sherriff's Office)	$750,000	NYSERDA	Sherriff's Building Energy Efficiency Upgrade
Niagara	Niagara County (Sherriff's Office)	$140,000	NYSERDA	Energy Efficiency Conservation Upgrade
Niagara	Niagara Falls Memorial Medical Center	$740,000	NYSERDA	Back-up Emergency Power Generators
Niagara	Niagara County (Sewer District No. 1)	$600,000	OBG	Clearing of Interceptor Right-of-Ways

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Niagara	Home Run Program	$150,000	OCFS	The Home Run Program provides complete wrap-around counseling for grade school aged children and their families. The children are referred to the program by the school in conjunction with the Niagara County Department of Social Services. Behavioral issues that impact a child's ability to excel in school are addressed both at the school and at the home with the family. Currently, this program operates at two schools in the county and is lauded by both school principals. Each program works with 10 children and their families. This additional funding will allow us to expand the program to two more schools in the county and assist twenty more families. The county would contract this out to Berkshire Farms, a not-for-profit, which currently operates the existing program.
Niagara	Summer Fitness and Nutrition Program	$5,000	OCFS	Summer Activities Program for Underserved Children. Program focusing on providing structured activities and nutrition for children in poverty in Niagara Falls, New York during the summer months. Program designed to support children in poverty in NiagaraFalls, New York during the summer months, through enrichment activities, structured play and good nutrition.
Niagara	Nutrition for Good Health Program	$10,000	OCFS	Nutrition for Good Health Program. Program designed to provide food for impoverished children in Niagara Falls, New York as an adjunct to after-school fitness programs, summer enrichment programs and to supplement nutritional aid offered through a localhealth & resource center. Program designed to provide supplemental nutrition for children in poverty as part of after-school enrichment programs, summer enrichment programs or through the efforts of local Soup Kitchen in the City of Niagara Falls.
Niagara	Child Protection Services/ Domestic Violence Collaboration	$200,000	OCFS	DV worker will be assigned to all three County CPS sites to go out on initial investigations with CPS caseworkers and provide domestic violence services and intervention when needed. Over 50% CPS cases have family violence issues in the home.
Niagara	Child Care Assistance for low income families enrolled in Health Related St	$67,000	OCFS	Currently find many low income families are faced with the desire and need to further education in order to obtain a reasonable job but the lack of financial support for their families needs is declined. This program would create a tuition assistance program for low income families who are enrolled in health care studies. Program would support families with financial assistance of 80% of weekly fees. Parent would be responsible for 20% as a condition to continue with program. Program could continue as arecruitment tool for hospital. Program would retain child care staff and potentially create new positions as needed based on enrollment. Program would encourage low income families to get the education needed to promote careers in health care.
Niagara	Mount Saint Mary's Hospital	$0	OCFS	Expand services at Food Pantry/Soup Kitchen
Niagara	Niagara County (Social Services)	$0	OCFS	Safe Dates Program
Niagara	Niagara County (Social Services)	$0	OCFS	Child Protective Services/Domestic Violence Collaboration
Niagara	Niagara County (Social Services)	$166,000	OCFS	SSI-One-time Payment
Niagara	Mount Saint Mary's Hospital	$174,000	OCFS	Workforce Investment Act (WIA)
Niagara	Mount Saint Mary's Hospital	$1,256,000	OCFS	UI Benefit Extension & Administration
Niagara	Mount Saint Mary's Hospital	$442,000	OCFS	UI Modernization
Niagara	Mount Saint Mary's Hospital	$23,000	OCFS	Employment Services
Niagara	Transit North Infrastructure	$4,175,000	OFT	Installation of sidewalks, crosswalks, stretscape improvements and WiFi Network and water line relocation to support commercial corridor build-out

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Niagara	Smart Permitting	$250,000	OFT	A regional, online permitting system for home building activities and housing, economic, and community development projects for both participating municipalities and the region in the counties of Niagara and Erie is proposed and ready for implementation.A properly administered Smart Permitting system will promote economic development, standardize and streamline, permitting process, facilitate contractor and developer needs that would enable additional home building activity and faster completion of housing, economic, and community development projects, improve citizen access to information, enhance communication and improve customer service, create resource, process and technological efficiencies for participating municipalities to enhance their housing, economic, and community development, realize economies of scale, further regional partnerships and collaborations, and serve as the model for other online regional services. Approximately 60 communities including cities, towns, and villages will have
Niagara	WiFi Hotspots for Niagara County Municipalities	$500,000	OFT	Upgrade a WiFi project implemented in 4 municipalities 3 yrs ago, to expand to all 3 cities, 12 towns and 5 villages. Essentially every municipality in Niagara County will have a Free WiFi hot spot locations.
Niagara	Financial and Payroll Systems for Niagara County	$1,200,000	OFT	Niagara County needs to upgrade or replace our current Payroll and Financial systems, as the current system has reached its end of life cycle.
Niagara	Lockport Industrial Park Wi-Fi Network	$5,000	OFT	Installation of Wi-Fi technology to provide internet access to enhance connectivity for businesses without internet access.
Niagara	Broadband Access for Eastern Niagara County Municipalities	$30,000	OFT	Expand broadband internet to provide access to underserved rural areas of Niagara County including the Town of Newfane, Town of Royalton, Town of Somerset, and Village of Barker.
Niagara	Town of Wheatfield WiFi	$75,000	OFT	The Town of Wheatfield is proposing free outdoor internet at 4 locations, Town Hall Gazebo, Highway Garage Veteran park, Water/Sewer mini Park and Recreation at Fairmount Park.
Niagara	Integrated Financial Accounting Software	$140,000	OFT	Implement an Integrated Financial Accounting Software package. Sage Accpac is an advanced web-based accounting solution built on a world-class, object-oriented, multitiered architecture and has been selected by our Financial Software Selection Team. It is designed for institutions of all sizes, and is the foundation for a completely integrated set of end-to-end business management applications. It has the flexibility to help us meet the current and future financial management requirements and provides arobust feature set designed to handle the most demanding needs.
Niagara	Voice Recognition for Radiology and Cardiology	$142,000	OFT	Implement the Nuance PowerScribe Voice Recognition system for Radiology and Cardiology. This system will be used for both transcribing reports automatically as well as command and control of the workstation being used by the radiologist or cardiologist.Healthcare provider organizations have reported dramatic workflow efficiency and cost savings benefits by adopting speech recognition technology. Speech recognitions' benefits include a drastically improved turnaround time on reports, cost savings, reduction in reporting errors, and all-around improved efficiency.
Niagara	Enterprise Wide Picture Archiving and Communications System (PACS)	$500,000	OFT	Expand our Picture Archiving and Communication System (PACS) from our current 8 modality licenses to unlimited licenses for use with all diagnostic imaging modalities. Enterprise PACS allows all imaging studies to be stored and available for any user atany time from multiple locations. Our current hybrid situation leads to operational inefficiencies and physician frustration. Cost savings will be realized by a totally filmless environment in which films are only printed upon request.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Vitrea Web Advanced Visualization Software for CT Angiography and CT Br	$243,000	OFT	Implement Vitrea Web advanced visualization software for CT Angiography and CT Brain Perfusion. Provides users with everywhere access to Vital Images? powerful advanced clinical applications via the Web. With Vitrea Web, radiologists and cardiologists have the capability to review, analyze, and communicate findings, from any PC with internet access. A clinician can measure plaque in the coronaries, probe a lung nodule, or evaluate a CT brain perfusion case and communicate the results, all from their home or another remote computer. This will have a huge impact on efficiency and ultimately patient care.
Niagara	Nutrition Services Information System	$156,000	OFT	The dynamic nutrition software solution gives the nutrition service professionals the tools needed to increase patient safety, improve patient outcomes, enhance patient care, improve operational efficiency and reinforce patient education. Information systems help to reduce errors in service by providing diet specific menus and tray tickets. Special diets are more accurate as the software provides a means to flag menu selections which do not meet special diet requirements and make appropriate corrections. The system can help to improve health care out comes by identifying patients whose health care provider may not have ordered adequate nutrition support. By flagging theses patients to the Registered Dietitian an assessment of needs and nutrition care plan will be developed. The software systems support HIPAA compliance with built-in security administration tools.
Niagara	VSurvery	$92,000	OFT	?GOAL: Implement software to improve patient safety by monitoring compliance with core measures and with a wide range of regulatory agencies (joint commission, CMS state regulatory, MAGNET, HFAP, CARF, Baldrige, recommended by evidence based practice. ?VSURVEY is a web-based software package (ASP model) that minimizes impact on the facility?s information service/support staff. The system is available anytime and anywhere for the hospital user?s support is provided by telephone, e-mail and web-based training videos. ?VSURVEY integrates regulatory compliance with patient safety, infection control and hazardous rounds. ? VSURVEY provides centralized repository for all supporting documents which are easily linked to the appropriate EPs or CoPs (such as plans of correction, policies, and committee minutes). This feature allows the facility to quickly and efficiently determine compliance status, minimize hours of data input and document research. As well as, hospitals can link individual questions and resudes the ability to continuously monitor Leapfrog)automatically informs user?s when there has been a change in compliance standards from regulatory agencies.
Niagara	Laboratory Information System	$735,000	OFT	Implement SCC Soft Computer?s LIS solution (SoftLab). SoftLab is a premier LIS that helps clients reach top productivity in the laboratory environment. It provides healthcare facilities with full multisite consolidation, flexible patient and management reporting, specimen tracking, and more. Organizations using SoftLab will appreciate significant productivity enhancements thanks to the systems critical result warning function, extensive call-management feature, and superior rules-based auto-verification. In addition, SoftLab provides improved fiscal management by greatly improving charge captures, reducing processing days in accounts receivable, and eliminating over-utilization, duplicate test orders, and combine test orders. SoftLab is built on the latest modem multi-tier client/server architecture. This includes CORBA (Common Object Request Broker Architecture) and Web Services, which promote enterprise-wide connectivity and allow the incorporation of new technologies. Information displayed onscreen
Niagara	Niagara County (Data Processing)	$1,200,000	OFT	Financial and Payroll Systems

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Town of Lockport Industrial Development Agency	$5,000	OFT	Town of Lockport IDA Industrial Park Wi-Fi Network
Niagara	Niagara County (Economic Development)	$30,000	OFT	Broadband Access for Eastern Niagara County
Niagara	Niagara County (Data Processing)	$500,000	OFT	Wi-Fi Hotspots for Niagara County Municipalities
Niagara	Niagara County - Mount Saint Mary's Hosp.	$6,500,000	OFT	Clinical Electronic Medical Record (EMR) for all Mount Saint Mary's Hospital Facilities
Niagara	Niagara County - Mount Saint Mary's Hosp.	$1,000,000	OFT	Clinical Electronic Medical Record (EMR) at offices of Primary Care Physicians
Niagara	Towns of Lockport, Newfane, Royalton and Somerset and the village of Bar	$35,000	OFT	Towns of Lockport, Newfane, Royalton and Somerset and the village of Barker Install broadband and WiFi networks Create construction jobs and upgrade technology to create a more competitive environment.
Niagara	Redundant Fiber Optic Line throughout the Southern Tier	$1,500,000	OFT	Redundant Fiber Optic Line throughout the Southern Tier Southern Tier West, Allegany, Chautauqua and Cattaraugus Counties are working together to close fiber optic network corridor in WNY and reate a redundant network. Project cost is $3,000,000. Southern Tier West, Richard Zink, is the contact. We have held several meetings and are currently in the process of setting up meetings throughout the County to gauge business support for the project. Create construction jobs that will lead to a more competitive region
Niagara	Addition to existing volunteer fire station	$920,000	OHS	Lewiston #1 Volunteer Fire Company in Niagara County is requesting financial assistance in the construction of a 12,250 sq. ft. 2 story addition to our existing fire station. This addition will be used to house our fire trucks and ambulance. Our current
Niagara	Station 2	$550,000	OHS	Replace a 2 bay fire station which no longer fits needs of area. Replace with a 5 bay structure allowing for continued growth of our area. This will help update our storage area and improve ability to respond to all scale emergencies. New building wouldbe able to be used as shelter for townspeople in emergency situations. Such as natural disasters, evacuations, and also serve as a command post for extended resopnse. This building is within 2.5 miles of our public school campus which has over 2000 students along with over 500 staff daily.
Niagara	Terry' Corners Vol. Fire Co. new truck room	$750,000	OHS	The projected construction of the new three bay drive thur truck room and renovation to our former truck room will create a safe entrance to a state hihgway(Rt. 77) which currently has a right away of less than three feet from our front doors. Renovationto the existing building will allow for updated training and physical fitness facilities along with handicap access.
Niagara	Rapids sub station	$500,000	OHS	We currently have a sub station that houses 2 fire apparatus, 1 ambulance and 1 fire police vehicle. These vehicles are squeezed into a 3 bay building. The past 20 years we have out grown the present station due to growth in the surrounding area. Withina 2 square mile area around the sub station there is a 1300+ mobile home park and 50+ multiple family apartment units. We respond to over 700 calls a year and 75% of our yearly calls are in that 2 square mile area. Currently we have been working on plansto replace this building in the spring of 2010. The intention for this new building is to provide better service to our community and provide a safer work environment for our members. This new building will have 4 double bays with a exhaust removal system, back up generator, storage rooms for fire and ambulance supplies, operations / dispatch office, kitchen, day room and more.
Niagara	High Service Pump Station VFD Upgrade	$750,000	OHS	Upgrade of high service pump station with new VFDs and controls.
Niagara	Public Safety	$0	OHS	Homeland Security-Fire Station Construction
Niagara	Tonawanda Creek	$400,000	OMR	This proposal is to develop a home to support 6 adults with developmental disabilities who are currently living at home with their families. This proposal would create 13 direct care and related jobs, in addition to approximately 5 construction jobs to build the home.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Niagara	Fort Niagara SP - Sewage System Improvements	$1,000,000	OPRHP	
Niagara	Golden Hill SP - Replace Failed Pedestrian Bridge	$100,000	OPRHP	
Niagara	New construction on Municipal Building	$275,000	OPRHP	New construction on Municipal Building
Niagara	Complete rehab of Municipal building	$3,000,000	OPRHP	Complete rehab of Municipal building
Niagara	Boat Launch & Dock @ Fort Niagara State Park	$100,000	OPRHP	Boat launch ramp renovations and transient boat dockage. Project would connect the two existing launch ramps with some type of docking system
Niagara	Olcott East Pier Access	$75,000	OPRHP	Improve pier access to the east pier for the benefit of anglers and tourists alike. Project would also address handicapped accessibility.
Niagara	Riviera Theatre Expansion Project	$500,000	OPRHP	The Theatre (on the historic register)bought a contaminated and blighting property on Main Street and is expanding into it for handicap accessible bathrooms, larger dressing rooms to bring longer running shows, a new lobby and concession area, and a small ""black box"" theater to diversify programming opportunit
Niagara	Penney Center	$523,825	OPRHP	Provide a mezzanine exhibition level to the historic building housing the Erie Canal Discover Center. Display the ""Niagara Collection"" of renowned art and memorabillia collector Dr. Charles R. Pen
Niagara	Fort Niagara State Park -- Roof Restoration	$370,000	OPRHP	This Transportation Enhancement Project is supported by NYSDDOT Commissioner Glynn. The project involves the replacement of a deteriorated roof on the historic Old Fort Niagara, located within Fort Niagara State Park.
Niagara	Fort Niagara State Park - Electric Upgrades	$500,000	OPRHP	This Transportation Enhancement Project is supported by NYSDDOT Commissioner Glynn. The project involves the upgrading of deteriorated electrical systems in Old Fort Niagara, an historic building located on the shore of Lake Ontario, within Fort NiagaraState Park.
Niagara	CITY HALL MUNICIPAL BUILDING--Historic Preservation	$500,000	OPRHP	CITY HALL MUNICIPAL BUILDING--Historic Preservation (approved) renovations to 1925 stone façade and installation of new energy efficient windows, insulation, lighting, etc.
Niagara	MUNICIPAL BUILDINGS--Dept. of Parks	$275,000	OPRHP	MUNICIPAL BUILDINGS--Dept. of Parks - New construction and renovation of Comfort Station at Griffon Park servicing municipal boat launch/dock.
Niagara	Niagara County (Economic Development)	$100,000	OPRHP	Proposed Boat Launch/Dock - For Niagara State Park
Niagara	Niagara County (Economic Development)	$75,000	OPRHP	Olcott East Pier Access
Niagara	City of Lockport	$0	OPRHP	Palace Theatre Restoration
Niagara	Niagara Falls - TIP projects	$2,500,000	OPRHP	Niagara Falls Customhouse restoration LETTER OF SUPPORT
Niagara	The Erie Canal Discovery and Charles Rand Penney Center	$250,000	OPRHP	NCHS (501c3) has been hard hit by the economy and especially the elimination in funding from NYSCA for 2009 and has furloughed 25% of its workforce. This shovel-ready project would employ about 10 construction laborers, 2 full time staff and several morepart-time. The Center proposes to add a mezzanine exhibit level to the Erie Canal Discovery Center (ECDC) to display the Niagara collection of renowned art and memorabilia collector, Dr. Charles R. Penney. His collection includes 5,000 paintings, artifacts and photos on dozens of subjects related to Niagara. Grant funds will be used to provide renovations, handicapped accessibility, along with proper storage and preparation areas. Dr. Penney?s interests lead to the creation of the Burchfield Penney ArtMuseum and substantial donations to the Castellani Museum. Our addition of the Penney Collection will provide a ?must do? destination for visitors. ECDC reaches out to a potential audience of 8 million Niagara Falls tourists. Over 2,000 WNY school child
Niagara	WYCA of Niagara	$70,000	OTDA	HHAP rehab

Niagara	Phlebotomist Training	$27,600	SED	Phlebotomist Training for 12 individuals with guaranteed job placement. Mount St. Mary's will providing training and guaranteed job placement in a healthcare career.
Niagara	School Health Literacy Program	$20,000	SED	1. School Health Literacy Project. Multi-agency collaborative program serving students in Grades 3, 4 & 5 in Niagara County Schools. Collaborative amongst several agencies to provide on site instruction to students to empower them in health decision-making and health consumerism.
Niagara	Afternoon Reading All Stars	$10,000	SED	Afternoon Reading All Stars Program. Multi-disciplinary, after-school program focusing on providing educational enrichment for underserved children in the City of Niagara Falls, New York. Program designed to assist impoverished and homeless children in the City of Niagara Falls by improving reading skills in a multi-disciplinary approach which includes physical therapy services. Program focuses on improving among other intellectual and physical skills, eye/hand coordination and essential skills in reading readiness.
Niagara	Underground Railroad Interpretive Program	$1,000,000	SED	Create an educational program dedicated to the history of the Underground Railroad in Niagara County including development of interpretive signage, historical exhibits, and other elements at across throughout the County.
Niagara	Safe Dates Program	$70,000	SED	Safe Dates is a research based program that targets the attitudes and behaviors associated with dating abuse and violence. It helps teens more clearly define what a healthy dating relationship is and what dating abuse is. It also helps teens understand the causes and consequences of dating abuse as well as key ways to prevent abuse from happening. There is also training provided for teens with strong leadership skills who are interested in becoming peer leaders in schools and the community.
Niagara	School Nutrition and Wellness	$135,000	SED	Registered dieticians will assist schools to analyze menus and competitive foods offered and provide recommendations that will meet Dietary Guidelines for Americans. Dieticians will also work with school staf to develop coordinated nutrition education programs for students, staff and parents. The program will include incentives and social marketing.
Niagara	Lumber City History Center	$400,000	SED	Renovation of a 40.184 square foot building into a community center open seven days a week year round housing the North Tonawanda History Museum and its reference library and genealogy department, the Gateway Cities Welcome Center, the Lumber City Gift Shop, the Gateway Cities Event Hall, and a restoration of the Sugar Bowl (a 1920s soda fountain, candy shop, lunch counter) in the locally designated Downtown Historic District within half a mile of the Erie Canal Heritage Corridor and the Niagara River (Seaway Trail).

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Niagara	Planning for Lumber City History Center Project	$25,000	SED	Architectural services for project design.
Niagara	Startup staffing for Lumber City History Center	$100,000	SED	Start up staffing for implementation of the renovation phase and reorganization of the history museum component of the building in our new facility, purchased in March 2009. Presently staffed by one full time volunteer and one full-time paid employee andseveral part time volunteers we hope to hire, continue the salary of the paid employee, and pay the full-time volunteer Executive Director a partial salary to retain them.
Niagara	Challenger project - Lockport	$905,000	SED	Purchase and install space station simulators and a portable planetarium to service 250,000 students in a NYS curriculum based program. Students run a simulated mission after 6 weeks of classroom work. Soon WNY will be the only part of the state not serviced by a challenger learning center. Being near the Erie Canal, we will serve tourist and other local residents when schools are not in session. This program will expose students to career choices in technology and improve Science and math scores. Thisprogram should provide local talent for our workforce.
Niagara	Mount Saint Mary's Hospital	$0	SED	Certified Nursing Assistants Training for 60 Individuals with Guaranteed Job Placement
Niagara	Mount Saint Mary's Hospital	$0	SED	Phlebotomist Training for 12 Individuals with Guaranteed Job Placement
Niagara	Mount Saint Mary's Hospital	$28,000	SED	Vocational Rehabilitation (Title I)
Niagara	Mount Saint Mary's Hospital	$7,000	SED	Rehabilitation Services & Disability Research
Niagara	Mount Saint Mary's Hospital	$49,000	SED	Neighborhood Stabilization Program
Niagara	Mount Saint Mary's Hospital	$245,000	SED	HOME Investment Partnerships
Niagara	Mount Saint Mary's Hospital	$103,000	SED	Community Development Block Grant (CDBG)
Niagara	City of Niagara Falls	$0	SED	Niagara Experience Center
Niagara	Native American Tours	$50,000	SED	Train and provide jobs for up to 6 Part time or seasonal Tourism guides to lead tours in Niagara Falls in the area of Native American History and sites.

County	Project	Requested $	State Agency	Additional Detail
Niagara	Enclose Courtyard and Convert to Learning Commons	$20,000,000	SUNY_CC	Enclose courtyard between the Library and the Humanities/Social Sciences buildings and convert to a Learning Commons. This will give students a place to study and socialize between classes. The project will also provide enhancements to the learning labs,improved access to the Library, upgrading of a number of classrooms to current educational standards, renovation of the Information Technology facilities, and up-to-date facilities for the Child Development Center.
Niagara	Flight of Five Lock Restoration	$4,000,000	Thruway	Restore Locks 67 - 71 of the Erie Canal. Utilize the rehabilited locks to help develop a tourist attraction.
Niagara	City of Lockport	$0	Unassigned	Erie Canal ""Flight of Five"" Locks Restora
Oneida	V. of Bridgewater Municipal Water System Project	$400,000	CDBG	
Oneida	T. of Trenton Sewer Collection System	$97,448	CDBG	
Oneida	Code Enforcement Radios to better manage Code Enforce	$75,000	CDBG	Code Enforcement Radios to better manage Code Enforce
Oneida	Henderson Street Area Sanitary Sewer Rehab	$118,000	CDBG	Sanitary sewer system in Henderson Street area can experience high sewage flows, greater than capacity of pipes, which can result in sanitary sewer overflow events. NYSDEC has issued ""Notice of Violation"" of Clean Water Act to Village and Village has implemented a flow management plan to identify and eliminate extraneous flows. This project would continue and accelerate the prgram. Work would include the internal close-circuit television inspection of approximately 3,500 ft of sewers, the structural repairs of deficiencies, the sealing of infiltration sources in approximately 4500 ft of sanitary pipes, and appurtenant wo
Oneida	Pulaski Street Sewer Replacement	$95,000	CDBG	The existing sanitary sewer has been identified as having structurally deteriorated pipe, vertical alignment problems and offset joints. Its replacement is recommended. The project would remove and replace approximately 420 ft of the existing 8 inch diameter sewer and appurtenant work.
Oneida	Led Street Lighting	$250,000	CDBG	52 Town owned street lighting at a major state intersection connecting NY Rts 12,5,12B and Genesee Street.This is a major commercial truck traffic corridor where all the state routes meet. Led lighting would be a great asset to this area.
Oneida	SSO Abatement Project - Televising & Smoke Testing	$1,900,000	CDBG	Oneida County is currently under a NYSDEC Consent Order (No. R620060823-67) to eliminate sanitary sewer overflows. This request for funding is for the preparation of bid packages for televising and smoke testing of 100+/- miles of sanitary sewers necessary to identify the causes of the overflows along with the related engineering and inspection services.
Oneida	Sylvan Beach DPW Garage	$175,000	DASNY	Sylvan Beach is the premier tourism destination in central NY on the East shore of Oneida Lake. Incorporated in 1971; a small Department of Public Works(DPW) garage was built in one of the village parks in 1973. This project proposes constructing a new energy efficient DPW garage in a location other than a public park area. The new garage will create jobs necessary to build the structure, decrease energy usage and improve the environment
Oneida	Science and Technology Complex Phase III	$16,000,000	DASNY	This is a 30,000 square foot facility (the third phase of our Science and Technology Center) that will house Biology and undergraduate research

County	Project	Requested $	State Agency	Additional Detail
Oneida	Field House	$7,500,000	DASNY	Mohawk Valley offers one of the most comprehensive and diverse two year college intercollegiate athletic programs in the country. Currently there is only one gymnasium to meet the needs of our student athletes and the general student population. During the fall semester volleyball and men's and women?s basketball vie for practice/game time. This often means students are practicing late at night; which is not conducive to their study habits. Sometimes, due to a contest, they do not get to practice at all. During the spring semester it is even more difficult as five sports teams compete for use the gym (men's and women?s basketball, baseball, softball, and lacrosse). Each day at least one of these teams does not get to practice because of facility limitations. This lack of facility space doesn?t begin to address the inadequacies that our general student population faces. With over 500 resident and 4,000 commuter students, intramural activities are almost non-existent as there is nowhere to schedule them
Oneida	New Building Project	$300,000	DASNY	Hope House is a soup kitchen which served 80,296 meals in 2008 (our 16th year). We are 501(c)(3), horribly overcrowded, lack storage and need to upgrade refrigeration and other equipment. Building will be 8000 square feet and all on one level. All food services are provided by volunteers - 75 to 100 volunteers each week, mostly retirees. IF we get this building erected, we can use our current one to create even more jobs via production of our entrepreneurial effort. We also need more office space. We have already raised over $200,000 for this project, but local philanthropy has dried up. We will not break ground until we are sure of completion but are shovel ready now. We have all necessary approvals and drawings and own the property on which we will build. OUTCOME: feed the new people coming to us (mainly working poor and newly unemployed); have adequate storage and refrigeration; make it easier to move supplies and provide larger numbers of meals. We are open seven days each week and most holidays.
Oneida	New York Mills School District Renovations Project	$500,000	DASNY	The voters of the New York Mills School District approved a renovations project totaling $3,075,000. However, a number of items that are health and safety-related could not be included due to financial constraints. They are: new elecric service, replacement of electric panels, high efficiency hot water heaters, sound attenuation lining in ductwork, fabric ductwork, direct difital controls, rooftop units at High school wing, paving at track, access door to roof, and re-keying of K-12 complex. We are requesting and additional $500,000 to address these remaining issues and add them to the scope of our project, which goes to bid this month and will begin during the next 90 days.
Oneida	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of two residences in Utica.
Oneida	Health Information Technology Project	$300,000	DASNY	Im plement a Web-based integrated Practice Management System including sharable Electronic Health Records for patients.

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Oneida	Doyle Hardware Building market rate housing, City of Utica	$3,000,000	DHCR	Doyle Hardware Building market rate housing, City of Utica Market rate housing project will transform former hardware store into mixed use development. Historic neighborhood preservation and the stabilization of the city tax base could be accomplishedby this project.
Oneida	Players Theater construction completion, City of utica	$800	DHCR	Players Theater construction completion, City of utica Complete theater construction on a community based theater that has struggled to obtain the resources to accomplish this goal. Community cultural services could be expanded and economic developmentof the surrounding center city would be a result of the completion of this project.
Oneida	Acquisition and Rehabilitation of Abandoned Housing in distressed census	$1,200,000	DHCR	Acquisition and Rehabilitation of Abandoned Housing in distressed census tracts - 218, 219, 225 Appraisals & Matching Funding in place To purchase and rehab abandoned houses in our CDBG and Brownfield Opportunity Area for development of senior and affordable housing. Neighborhood Stabilization requires a focused plan of rehabilitation and infrastructure improvements in marginal neighborhoods.
Oneida	Genetic Help Desk	$225,000	DOH	Genetic advances are revolutionizing health care. There is a severe lack of genetic application in daily health care practice. ?American public expects their primary care providers to know something about genetics? (Feero 2008). At present there are limited interactions regarding genetic risk in routine medical encounters and it is related to ?self-assessed inadequacy of the primary care workforce? to respond patient questions (Scheuner 2008). A primary barrier to actualizing genetic advances is a lackof user friendly information and genetic consultation infrastructure for the average medical practice. In 2006, Ferre Institute launched on a local basis the Genetic Help Desk (SM), a free and confidential innovative tool that directly supports in officegenetic information needs of patients and their doctors. The GHD is not another website, database or hotline. It is an innovative and cost effective method that aims to give every NYS medical practice and their patient?s direct access to trained and expinformation and advances into health practice. This GHD benefits patients, families, employers and insurers
Oneida	Web-based integrated Patient Management System	$300,000	DOH	This project will allow Upsate Cerebral Palsy to implement a Web-based integrated Practice Management System that includes sharable Electronic Health Records for patients receiving services in our multi-location health and behavioral clinics. Through theinstallation of a wide-area network, our clinic providers will be able to access data from other medical providers who serve patients and outside providers will be able to access agency-maintained patient information.
Oneida	Upstate Cerebral Palsy - Health Information Technology	$300,000	DOH	
Oneida	Mohawk Valley Community College - CDL-A Training for 100 Dislocated Wc	$480,000	DOL	Mohawk Valley Community College - CDL-A Training for 100 Dislocated Workers Commercial tractor trailer driving license certification Significant demand for trained personnel predicted in this field.
Oneida	Mohawk Valley Community College -Certified Nursing Asst. Training Progra	$200,000	DOL	Mohawk Valley Community College -Certified Nursing Asst. Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Oneida	Main Street Road Reconstruction	$3,425,000	DOT	Project will upgrade deteriorated pavement of main vehicular thoroughfare through community, upgrade pedestrian walks and improve safety, address flooding from deficient storm system and address lack of capacity issues in sanitary sewer system. Work willinclude milling and asphalt overlay of approximately 5000 ft of deteriorated Main Street pavement; together with the removal and replacement of approximately 13,000 ft of existing deteriorated concrete curb, 4,000 ft of existing deteriorated concrete sidewalk, 10 non-ADA compliance drop curbs, and 150 driveway aprons; also remove and replacement approximately 5100 ft of existing deteriorated and inadequate storm sewers and approximately 2400 ft of existing undersized sanitary sewers; and appurtenant work.
Oneida	Garden Street Road Reconstruction	$90,000	DOT	Project would reconstruct and relocate an existing street that is too narrow and has deteriorated pavement, with a street meeting Village standards. Pavement also needs to be relocated farther away from an existing building where snow has been known to slide off roof and on to pavement thereby endangering vehicles and pedestrians. Work would include approximately 450 ft of new road, drainage system modifications for new alignment, and appurtenant work.
Oneida	Sidewalk Reconstruction	$63,000	DOT	Project would remove and replace approximately 1025 ft of deteriorated concrete sidewalk on various streets that pose a hazard to pedestrian traffic. Project would also reconstruct and bring into compliance 6 drop curbs at walk/street intersections whichcurrently do not meet ADA requirements.
Oneida	Salt/Sand Storage Building	$75,000	DOT	We are trying to put up a salt/sand storage building of approx.7500 sq.ft..Our current storage is not covered and we risk a possilbe environment issue because we are close to a fresh water river.Keeping the salt out of the weather would also help us saveour product from an approx. loss of 10to15% due to rain and snow.
Oneida	Re-pave Main Street	$100,000	DOT	To pave Main Street in Westernville,8100'x20'x2"with h.m.a.(hot mix asphalt) The street has been cold patch for years and is currently in poor shape.
Oneida	Pixley Falls State Park - Bridge Restoration	$400,000	DOT	This Transportation Enhancement Project is supported by NYSDDOT Commissioner Glynn. The project involves the replacement of an existing bridge, which has been flagged by DOT for deterioration concerns, within Pixley Falls State Park. The bridge providesvehicle and pedestrian access to the state park, including its public campground and historic grounds.
Oneida	The Boonville Walkway	$300,000	DOT	Boonville needs a pedestrian walkway over Route 12 to connect the village to Erwin Park. Currently there is no safe way for residents to cross the very busy route 12.
Oneida	Edmonds Road Bridge	$170,000	DOT	Rebuild bridge over the Black River on EdmondsRoad in the Town of Boonville. The center pier needs a steel cas driven in and grouted. The north abutment needs to be reinforced. The surface (110 feet -2x6 lumber nailed face to face is good) Town of Boonville to supply guard rail system. Edmonds Road floods in the spring requiring resdents to travel thru Forestport. Mail delivery takes twice as long and doubles cost. Restoring bridge would benefit Boonville by allowing Forestport residents easier access to Boonville stores. Currently provides a dead end where fires are started for partying etc.
Oneida	ROAD WORK	$700,000	DOT	THESE ARE ROADS THAT ARE IN DIRE NEED OF REPAIR IN OUR TOWN. THIS WORK WOULD BE ABOVE WHAT WE PLAN TO DO WITH OUR CHIPS MONEY THIS YEAR.
Oneida	Woods Highway Reconstruction	$510,000	DOT	Reconstruction of an approximately 2,000 foot portion of Woods Highway in order to accommodate increased vehicular traffic at the New Hartford Office Park. Plans are complete and ready to go to bid.

County	Project	Requested $	State Agency	Additional Detail
Oneida	Woods Highway Reconstruction and Water Loop	$400,000	EFC	Repave and construct water main on a 3,500-foot portion of Woods Highway from the New Hartford Office Park to Whitestown. This project is to accommodate increased vehicular traffic at the New Hartford Office Park and complete a loop of water main from Park to existing main in Whitestown.
Oneida	Mohawk Valley region	$66,000,000	EFC	Oneida County to make major improvements to its wastewater treatment facility - to be completed by 2014.
Oneida	Village of Vernon Water Improvement Project	$5,500,000	EFC	This project is shove ready and could go out to bid in 30 days and start in 60 days. The Oneida County Health Dept. has told the village the water system must be improved. The health dept. requires storage of one day's water use and some addtional for fire protection, presently our storage tank holds less than half of what is required. Also the pumps are inadequate to handle the new volume. The present transmission line is old and has numerous breaks each year. We lose 10% of purchaced water because ofleaks. Without some monetary help, the water rate increase would create a hardship for our two largest employers and possibly driving them away, costing the area 400 jobs.
Oneida	Town of Verona Water System Improvements	$25,800,000	EFC	19.1 miles of 24"" and 12"" water main, 2.0 million gallon water storage tank and master meter and rechlorination stat
Oneida	Verona Hamlet Sewer District	$8,860,000	EFC	31,700 linear feet of 8"" gravity sewer, 7,700 linear feet of 10"" gravity sewer, 141 manholes, and eight sewage pump stations. Additionally, 1,800 feet of 2"", 3,700 feet of 4"", 1,650 feet of 6"", and 6,800 feet of 8"" HDPE force main and related appurtenances are also anticipated. Wastewater would be conveyed to the City of Oneida Wastewater Treatment Plant, which recently underwent capacity i
Oneida	Sanitary Sewer Overflow Abatement Project - Manhole Rehabilitation	$2,100,000	EFC	Oneida County is currently under a NYSDEC Consent Order (No. R620060823-67) to eliminate sanitary sewer overflows. This project includes the preparation of bid packages for the rehabilitation of approximately 500 sanitary sewer manholes, easement accessimprovements, and related engineering services. Undertaking this work will aid in the reduction of the sanitary sewer overflows.
Oneida	Sanitary Sewer Overflow Abatement Project - Henderson St. Sewer Separa	$900,000	EFC	Oneida County is under a NYSDEC Consent Order (No. R620060823-67) to eliminate sanitary sewer overflows. This project includes the construction of improvements to remove stormwater from the sanitary sewer system along Henderson Street in the Village of New York Mills with the intent of alleviating sewer back ups into basements. Work will include sewer spot repairs, lateral reconnections, and construction of 1,000 lf +/- of new storm sewer. Engineering and related services are included.
Oneida	Sanitary Sewer Overflow Abatement Project - CSO Outfall Repair	$1,100,000	EFC	The outfall structure associated with the City of Utica combined sewer overflow control structure requires structure repair in order to alleviate negative impacts on the Oneida County Sewer District water pollution control plant. The work will include the construction of structural repairs to the CSO outfall structure and evaluation of CSO treatment and control technologies in order to accomodate flows from the tributary combined sewer service area of the City of Utica.
Oneida	City of Utica - Combined Sewer Overflow	$150,000,000	EFC	
Oneida	Oneida County Sewer District	$150,000,000	EFC	Control the outflow of sanitary sewer overflows into the Mohawk River during wet weather.
Oneida	Sauquoit Creek Sewer Project	$100,000,000	EFC	
Oneida	City of Rome Water System	$31,000,000	EFC	
Oneida	Village of Boonville Box Sewer Replacement Project	$0	EFC

County	Project	Requested $	State Agency	Additional Detail
Oneida	Completion of Griffiss Parkway	$8,000,000	ESD	Completion of Griffiss Parkway
Oneida	Griffiss Info Tech Campus/Airfield/Infrastructure/Demolition	$5,800,000	ESD	Griffiss Info Tech Campus/Airfield/Infrastructure/Demolition
Oneida	Marcy Chip FAB Site Development	$0	ESD	Marcy Chip FAB Site Development
Oneida	Waterfront Redevelopment	$15,000,000	ESD	Waterfront Redevelopment
Oneida	South Rome Industrial Park	$2,000,000	ESD	South Rome Industrial Park
Oneida	Downtown Mixed-Use Development	$2,431,872	ESD	Downtown Mixed-Use Development
Oneida	Incubator Building	$750,000	ESD	Incubator Building
Oneida	Mohawk Valley Edge	$2,000,000	ESD	Griffis Park Empire Aero hangar renovations
Oneida	Mohawk Valley region	$6,000,000	ESD	Completion of State route 825, known as the Griffiss Parkway, through the Griffiss Business and Technology Park in Rome. The completion of this project is vital to the future redevelopment of this former Air Force Base.
Oneida	Mohawk Valley region	$0	ESD	Continued development of a shovel-ready site adjacent to the SUNY Institute of Technology in Marcy, near Utica, which can be used by a nanotechnology firm, or other high technology industry. This site is a very important key to the future economic development of the Mohawk Valley.
Oneida	Mohawk Valley region	$25,000,000	ESD	Completion of a major renewable energy project in the Griffiss Business and Tech Park in Rome. Conversion of wood chips and other fuel sources into gasifiers, which would convert the product into steam. Steam would be used to generate electricity for sale to tenants in the Griffiss Business and Tech Park, as well as back to the electric power grid.
Oneida	Empire Aero Center Hangar Expansion - Oneida County	$4,500,000	ESD	Empire Aero Center Hangar Expansion - Oneida County EAC is looking to expand its operations at Griffiss. They currently have 450 employees and contractors at Griffiss. The company will add 250 jobs over the next five years as they take on more commercial and add military aircraft to their air frame maintenance services. The total project cost is estimated at $11.5 Million. GLDC has arranged the majority of the funding for the project, but requires and additional $2.0 million to complete the financingand ensure that the project can move forward.
Oneida	REACH Microenterprise Center	$500,000	ESD	REACH Microenterprise Center - Phase II rehab of 28,000 sq ft community center building for job creation & microenterprise development. Engineering and plans complete, ready to bid. - City of Rome To create jobs and provide technical assistance to entrepreneurs to locate new microenterprises in Rome and Oneida County 2002 Main Streets Masterplan 2006 Urban Design Plan 2005 Rome City Master Plan
Oneida	Demolition of Obsolete AF Building Infrastructure - Rome, NY - Oneida Cou	$6,000,000	ESD	Demolition of Obsolete AF Building Infrastructure - Rome, NY - Oneida County Abatement surveys are underway and demolition packages could be ready for bid by the end of April. GLDC would abate and demolish approximately 12 former Air Force buildings within Griffiss Business & Technology Park, which are functionally obsolete. Demolition will create additional shovel ready development sites at Griffiss.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Oneida	Renovation of museum's Historic building	$250,000	SED	6,000 square feet of new flooring on 4th floor; handicapped accessible bathrooms on 3rd floor; Repair 6,000 square feet of flat blacktopped roof to prevent the current leaking into buckets onto our 4th and 5th floors.
Oneida	Oneida County projects - letter of support	$3,307,987	SED	Springbrook Residential School expansion
Oneida	Utica/Rome Institute of Technology, Field House	$19,552,467	SUNY	
Oneida	Utica/Rome Institute of Technology, Auxiliary Services Building/Student Cer	$14,120,252	SUNY	
Oneida	Dev of SUNY Marcy	$0	SUNY	Dev of SUNY Marcy
Oneida	Mohawk Valley Community College - MV Cybersecurity Consortium	$900,000	SUNY_CC	Mohawk Valley Community College - MV Cybersecurity Consortium Create seamless transition into growing sector of local economy Promote technology education and prepare skilled workforce; establish pathway to meaningful employment
Oneida	Mohawk Valley Community College - Advanced Manufacturing Training for	$500,000	SUNY_CC	Mohawk Valley Community College - Advanced Manufacturing Training for 50 Individuals Computerized Numerical Control Operators High Demand from Employers going unfulfilled
Oneida	Mohawk Valley Community College - Earn While You Learn Training for 30	$900,000	SUNY_CC	Mohawk Valley Community College - Earn While You Learn Training for 30 Technicians Electrical Service Techs. High Demand from Employers going unfulfilled
Oneida	Mohawk Valley Community College - Procure Alternative Fuel Vehicles	$65,000	SUNY_CC	Mohawk Valley Community College - Procure Alternative Fuel Vehicles Two electric powered units and one hybrid Replace gas powered vehicles used by Maintenance Staff & Campus Safety. Reduce carbon footprint
Oneida	Mohawk Valley Community College - Replace Dormitory Roofs	$500,000	SUNY_CC	Mohawk Valley Community College - Replace Dormitory Roofs Required maintenance Current roof system old and needs replacing - improve rates of energy consumption and savings
Oneida	Mohawk Valley Community College - Hazardous Waste Handling	$100,000	SUNY_CC	Mohawk Valley Community College - Hazardous Waste Handling Improve safety by building safe, temporary storage facility for hazardous waste Local disposal facilities close during winter months, requiring college to store waste until spring.
Oneida	Learning Community Classroom Retro Fit	$200,000	SUNY_CC	Establish a Learning Community Strategic Initiative designed to serve a cohorts students in collaborative learning in Mathematics, chemistry, English and reading. Learning Centers have resulted in a higher level of integrated, inter-disciplinary learningthat foregrounds critical thinking and student success and enable the college to infuse current educational technology and furniture designed to stimulate flexible learning collaboration.
Oneida	Chemistry Laboratory Renovation	$250,000	SUNY_CC	Chemistry program lab space is 24 years-old and process over 700 students each year. Due to age its and changes in pedagogy over the years it is not set up to adequately deal with current practices in Green Chemistry. In an effort to reduce the college'scarbon footprint the facility needs to be redesigned replacing hoods, plumbing, etc. to be in keeping with changes in delivery of a more environmentally friendly system.
Oneida	Village of Sylvan Beach	$0	Thruway	Repairing main access point for Barge canal
Oneida	New Student Center at SUNYIT	$14,000,000	Thruway	
Oneida	SUNY IT Center in Analytical NanoSciences	$15,000,000	Thruway	
Oneida	SUNY IT Cyber Security Research Lab	$2,250,000	Thruway

County	Project	Requested $	State Agency	Additional Detail
Oneida, Madison	Highway Rail Grade Crossing Surface Improvements - NYS&W Railroad	$1,320,000	DOT	
Onondaga	NYS FFA Chapter House & Leadership Center	$750,000	AGMKT	This project includes construction of a new agricultural education complex at the New York State Fair is to facilitate the understanding of all facets of agriculture for people young and old. To accomplish this it our goal to revitalize the west end of the fairgrounds by replacing the old buildings currently on the site with a new facility for agriculture education. The focus of this cornerstone building called the FFA Chapter House and Leadership Center is to provide a forum for public education aboutNew York State agriculture as presented through seminars, technical displays, and interactive exhibits produced and presented by the youth agriculture leaders within the NYS FFA Association. The new Chapter House would also bring about a return to the family oriented values once held by the west end of the fairgrounds and would allow hundreds of thousands of visitors young and old to learn the practices of healthy and sustainable food and energy production for a more secure New York State.
Onondaga	Sunview Water District	$100,000	CDBG	installing a water transmission line to provide 22 homes which are currently served by indivdual wells with safe public water.
Onondaga	Justice Center	$250,000	DASNY	a new justice center will meet the state guidelines for public safety. Also, it will allow the town and village to combine courts facilities providing long term savings.
Onondaga	4 Town Justice Center & State Police Barricks	$2,500,000	DASNY	Towns of Camillus, Elbridge, Marcellus & Skaneateles combine to build a court room and justice center which would include a very much needed state police headquarters. This would be a first in the state of this nature. A joint facility would provide longterm savings, plus improved service to the public, justices, and lawyers serving clients.
Onondaga	Tully Village Annexation	$500,000	DASNY	Replace and upgrade water and sewer lines from Village of Tully to the Interstate 81 corridor. Project investment will provide public sewer and water infrastructure necessary for economic development in this rural area. Project is in final approval stages. Work to be completed in 2009.
Onondaga	LeMoyne College Science Building	$13,000,000	DASNY	LeMoyne College Science Building
Onondaga	SUNY ESF Green Gateway Building	$12,500,000	DASNY	SUNY ESF?s Green Gateway Building focuses on the development of programs to help stimulate the new Green Economy of Central New York. This 33,650 sq. ft. LEED Platinum Plus building in Syracuse, New York will generate more renewable energy than it actually uses thus producing energy to power existing campus buildings. The building will be a living laboratory for ESF?s undergraduate, graduate and non-credit students training them for a role in the new Green Economy and showcasing renewable energy and energy saving technologies and practices to be replicated throughout the state, region and country. The Gateway Building would serve as a model for renewable energy solutions for other SUNY campuses and state agencies. Project creates 200 construction jobs,17 permanent jobs, educates 1,000?s for new green collar jobs and establishes dozens of new renewable energy related courses at ESF. Several shorter-term components of the energy infrastructure for the Gateway Building can be started in 30, 90 and 120 ded and commissioned in 36 months. Project leverages already secured $28.3M (69%) of NYS funding for SUNY ESF Green Gateway Building.
Onondaga	Le Moyne Science Facility	$26,000,000	DASNY	The purpose of the project is to provide expanded and more modern facilities to support growing enrollments in the sciences, mathematics and the health professions. The project includes both the total renovation of an existing facility as well as the construction of a new wing to add additional academic capacity in the sciences and related fields such as nursing and physician assistant studies.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Onondaga	Bowne Hall Biometerials Facility	$15,500,000	DASNY	The new interdisciplinary research cluster in the field of biomaterials will be housed inexisting space to be renovated in Bowne Hall. The program includes shared laboratory and community space for all faculty associated with the Syracuse Biomaterials Institute (SBI) and dedicated space for 7-10 researchers, with laboratories, offices, and administrative space to support the program. The philosophy utilized in designing this space has led to a highly interdisciplinary layout that will enable the SBI tobe highly productive in attracting research funding and doing high-quality research.
Onondaga	Closed Circuit Television Security Monitoring System	$2,940,000	DASNY	The Syracuse University Department of Public Safety will expand its closed circuit television security monitoring system to include stationary, pan/tilt/zoom and/or mega pixel cameras positioned at several locations. Additionally this project will provide live and recorded monitoring capabilities for all walkways, pathways, roadways, parking lots and parking garages at Syracuse University. The system will improve not only safety on Syracuse University property, but also the public streets and areas adjacent to university property.
Onondaga	Green Data Center Analysis & Design Center	$12,000,000	DASNY	Construction of the most energy efficient data center in the world. Syracuse University and IBM continue their two-year collaboration in cutting data center energy consumption in half while maintaining parity computing. The data center design providesbenefits to companies, governments and electrical utility providers with an allowance to operate off-grid as needed. The Data Center will be configured and instrumented as a test-bed for on-going research and enhancements. Additionally, the Analysis &Design Center will use PhD engineering students to engage in high performance computing and sophisticated modeling to analyze and diagnose client data centers, helping them reduce energy use and transition to new operating regimes with quick paybacks.
Onondaga	Syracuse University Campus Energy Performance Infrastructure Projects	$22,900,000	DASNY	HVAC Improvements - heating, ventilating, and air conditioning systems in the requested buildings are at advanced ages and operate at reduced degrees of efficiency due to worn equipment or less than state of the art controls. The projects would replaceobsolete components and improve control systems to improve indoor environmental conditions, reduce breakdowns, and conserve energy Window Replacements - Windows in SU's older buildings have significant infiltration and thermal conductivity losses. The requested window replacement projects would upgrade or replace existing windows to improve thermal performance and save energy. Roof Replacements - Flat roofs on the buildings provided are in need of replacement in the next few years. Leaks have begun to saturate and deteriorate roof insulation, resulting in thermal loss. The roof replacements will replace damaged insulation and increased thermal values when possible, resulting in improved thermal performance and reduced energy consumption. Steam Lin, and reduce energy consumption by limiting heat loss. Stormwater Management - The project will prevent uncontrolled peak stormwater flows at building sites and will help reduce overcharging the County wastewater treatment plants and uncontrolled dischake.

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Witting Surgical Center at Crouse Hospital	$16,000,000	DASNY	Crouse Hospital is shovel ready to begin a $49 million project to build a 73,000 sq/ft Operating Room to replace its current 34 year old facility. The project will increase the number of inpatient operating rooms from 11 to 14 and provide space for a 4 -OR ambulatory surgery center. The project will incorporate green features including high-efficiency motors and motion detectors for lighting. The current operating rooms were built in the ?70s. Over the past 30 years, the hospital has worked to maintainthese facilities and upgrade appropriate equipment. The present OR is extremely cramped. The recovery area does not meet current square-foot requirements from the NYSDOH. The first phase renovation of the main lobby of the hospital to accommodate all surgical patient flow has been completed. The current phase involves the placement of underground infrastructure to allow for the build out of the multi-level structure. Foundation digging for the main portion of the project began Feb. 9, 2009. Full completinpatient and outpatient surgical volume is expected to increase hospital employment by 3%/year, or about 60 full-time equivalents.
Onondaga	LeMoyne College upgrade and expansion of science facilities	$0	DASNY	Modernize and expand science facilities, renovate and expand classrooms, laboratories, faculty offices and related support facilities.
Onondaga	Crouse Hospital - the Witting Surgical Center	$16,000,000	DASNY	Build a new operating suite to repalce the 30 yr old inpatient and outpatient operating rooms.
Onondaga	MDA	$50,000,000	DASNY	St. Joseph's Hospital Expansion
Onondaga	Syracuse University	$7,050,000	DASNY	Construction of green Data Center
Onondaga	Syracuse University	$5,000,000	DASNY	CASE Supply Phase 1 Renovations (artists-work-live housing)
Onondaga	ESF	$13,000,000	DASNY	LEED Building to serve as central point for green ESF buildings
Onondaga	SUNY Upstate	$20,000,000	DASNY	Comprehensive cancer treatment center
Onondaga	Le Moyne College ""green and LEEDS certified"" buil	$0	DASNY	
Onondaga	Crouse Hospital - Operating Room Construction	$16,000,000	DASNY	
Onondaga	Syracuse University Research Park Infrastructure	$650,000	DASNY	Electric, sewer, water and gas upgrades
Onondaga	University Hill Park and Ride	$1,200,000	DASNY	
Onondaga	St. Joseph's Facility Projects - Short Term	$15,000,000	DASNY	Helipad, Hybrid Operating Room, Infant Abduction Alarm Upgrade, Generator, Fire Safety, Nurse Call System, Medical Vacuum Pumps, Infrastructure Repairs to College of Nursing Building, Mechanical Upgrades, HVAC, Sitework, Parking Lot and Garage Upgrades.
Onondaga	St. Joseph's Facility Projects - Mid Term	$35,000,000	DASNY	Emergency Department, Emergency Mental Health Unit, Observation and Chest Pain Unit, Data Center, Kitchen and Nutritional Services
Onondaga	St. Joseph's Hospital - Expansion	$35,000,000	DASNY	This project is one of the largest and most significant investments in the region. To date, St. Joseph?s Hospital has invested $45 million of its own resources to facility projects and is also working with local, state, and private organizations to revitalize the surrounding Prospect Hill neighborhood. The next phase of facility expansion will total 105,000 gross square feet and will construct a new, expanded medical emergency department, observation/ chest pain unit, psychiatric emergency unit, data center, and kitchen/nutritional services. With a workforce of over 3500, St. Joseph?s Hospital is one of the region?s largest employers. In addition to generating construction and health care jobs, the project will engage local architects, engineers and vendors, will generate up to $2 million in additional local revenues, and will incorporate sustainable design while seeking LEED Silver certification. The City and surrounding neighborhoods will benefit from upgraded underground water / storm water infrast

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Syracuse Community Health Center - Exterior renovation and Capital Impro	$1,517,000	DASNY	renovation of the exterior of SCHC Central, located at 819 Salina Street to also include replacement of sdewalks, parking lot construction, installation of fencing and landscaping.LETTER OF SUPPORT
Onondaga	Onondaga County, SUNY ESF Green Gateway Building	$12,500,000	DASNY	Onondaga County, SUNY ESF Green Gateway Building ESF is a leader in developing the green economy across Upstate. This proposed 33,650 sq ft LEED Platinum Plus building would generate more renewable energy than it uses, producing energy to power other existing campus buildings. The building would be a new gateway to the campus, and also serve as a living laboratory for ESF's undergraduate, grate and non-credit students, training them in technologies that could be replicated across the state and country.This project would serve as a model for renewable energy solutions for other SUNY campuses and state agencies. The project would educate thousands of students fro new green collar jobs and could establish dozens of new courses at the college.
Onondaga	Onondaga County, SUNY ESF New York Bioenergy Pellet Testing Plant	$2,000,000	DASNY	Onondaga County, SUNY ESF New York Bioenergy Pellet Testing Plant SUNY ESF proposes the development of a pilot scale bioenergy pellet plant (2000 - 5000 tones per year) that would serve as a model for developing community-based energy systems. The plantwould also serve as a research vehicle, providing test capabilities for innovative biomass sources. The plant would also test boilers manufactured in NYS to utilize this technology. There is a robust residential market for the pellet industry, and there is tremendous need and opportunity to transfer cost and carbon emissions savings by using wood pellets to the non-residential market, including NYS schools, municipal buildings and commercial users. Funding for this project would fast-track the development of this market by developing cost-effective commercial grade pellets. There are also NYS manufacturers of heating systems that could use commercial wood pellets. New York grown energy crops can help reduce the state's dependence on imported energy
Onondaga	Onondaga County, SUNY University Hospital Modernization	$43,900,000	DASNY	Onondaga County, SUNY University Hospital Modernization Renovation of north wing, expansion of emergency medicine department and neurodiagnostics areas, and upgrades and replacement of HVAC/electrical systems Biotechnology

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, Le Moyne science facility	$13,000,000	DASNY	Onondaga County, Le Moyne science facility - The purpose of the project is to provide expanded and more modern facilities to support growing enrollments in the sciences, engineering, mathematics and the health professions. The project includes both the total renovation of an existing facility as well as the construction of a new wing to add additional academic capacity in the sciences and related fields such as nursing and physician assistant studies. Le MoyneÆs new science facility will give the college new teaching facilities commensurate with the high quality of its faculty and will help strengthen programs that already help feed the pipeline for employers with workforce needs requiring skilled workers in science, engineering, mathematics and the health professions. The project will create 230 new jobs. The college has secured $13,000,000, and is looking to match that amount to complete the building. Designs are in place, and the college is working with the locality on site plan approvals, SEQR anUpstate region, will depend increasingly upon technology and the information economy. It is critical to train New Yorkers to work in these growing sectors of the economy. These are high demand sectors with critical workforce shortages across Upstate andregion. These sectors have also been identified as most critical to the regional economy.
Onondaga	Onondaga County, Discovery Center of Science and Technology	$500,000	DASNY	Onondaga County, Discovery Center of Science and Technology - The Milton J. Rubenstein Museum of Science & Technology (MOST) is working in partnership with internationally recognized science center and global attraction designers Jack Rouse Associates toplan, design and produce a new exhibit which tells the story of the freedom of wings and science of flight. The MOST is the largest hands-on science center in Central New York, offering tourists and residents alike an entertaining, educational and interactive science experience. The MOST is also a business catalyst for the community, bringing together scientists, engineers, business leaders and educators. The project is ready to go. Preliminary designs for the Flight Feature have already been completed. Final designs are in development and installation is planned for 2009. Once funding is secured, fabrication can begin, with installation of the exhibit within 120 days of completion of fabrication of all components. The fabrication firm of Geograph Inn anchor for Armory Square and SyracuseÆs new SALT (Science, Art, Lifestyle, Technology) District, and one of the landmarks along the NYS-funded ôConnective Corridorö project by Syracuse University and the City of Syracuse.
Onondaga	Onondaga County, Crouse Hospital expansion - Crouse Hospital has begur	$16,000,000	DASNY	Onondaga County, Crouse Hospital expansion - Crouse Hospital has begun a multi-phased $49 million project to build a new 73,000 sq ft surgical center. The NYS DOS has approved the project, which will increase the number of inpatient operating rooms from11 to 14 and provide future space for a four-OR ambulatory surgery center. The project will create more than 115 jobs during construction. The OR project will also preserve hospital employment and create additional job growth. Of the $49,000,000 budget,$27,000,000 will be financed and $6,000,000 will be raised through a capital campaign -- leaving a gap of $16 million. This project responds to regional needs. The projected growth in both inpatient and outpatient surgical volume, due in part to procedures related to an aging population, has the potential to increase employment at the hospital by 60 FTE's. Crouse Hospital is a top 10 employer in Central New York. The hospital's combined inpatient and outpatient surgical volume is more than 18,000 proc

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, SUNY Upstate Medical University (SUMU) North Campu	$37,600,000	DASNY	Onondaga County, SUNY Upstate Medical University (SUMU) North Campus Development/Biotechnology Research Center Building demolition, extension of City street, construction of CNY Biotechnology Research Center and Central New York Cord blood facility, anddevelopment of associated parking facility Biotechnology
Onondaga	Onondaga County, Syracuse University Campus Energy Performance Infra	$2,730	DASNY	Onondaga County, Syracuse University Campus Energy Performance Infrastructure Projects Roof Replacements Environmental
Onondaga	Onondaga County, Near West Side Initiative	$1,000,000	DASNY	Onondaga County, Near West Side Initiative LaCasita - Hispanic cultural center Community development
Onondaga	Marcellus Town Hall renovation and Addition	$1,000	DASNY	Renvate and expand current Town Hall to provide adequate space and to upgrade energy technology to include geo thermal heating/ cooling, energy efficient windows, natural air circulation and light, rain water collection and other sustainable features. Wewill use as much recyclable material in the construction as possible. This project has total area of 9,500 sq.ft. and is scheduled to be bid in April.
Onondaga	Town Highway Garage Renovation	$750,000	DASNY	Renovate existing Town Highway Facility to improve energy efficiency thrgh the use of solar heating, redirect garage floor drains and add water separator and extend truck bays by 1,000 sq. ft. to better accomodate equipment.
Onondaga	Onondaga County, Public water supply protection	$525,000	DEC	Onondaga County, Public water supply protection - The City of Syracuse operates it primary drinking water supply, Skaneateles Lake, under a filtration waiver awarded by the New York State Department of Health. First awarded in 1992, the waiver allows theCity to offer its water to a population of approximately 200,000 in the city and its environs, disinfected, without further filtration. Syracuse provides annual funding for the on-going Skaneateles Lake Watershed Agricultural Program (SLWAP), which installs best management practices on the 44 farms surrounding Skaneateles Lake. SLWAP has identified four priority Best Management Practices (BMPs) to address significant non-point pollution concerns in the watershed. $525,000 would cover costs to construct three covered barnyards and one composted bedded pack structure to USDA Natural Resource Conservation Standards. If funded, the projects could start immediately. Protection of Syracuse's primary drinking water source
Onondaga	Onondaga County, Lead service replacement	$5,000,000	DEC	Onondaga County, Lead service replacement - The Lead Service Replacement program is part of the Federal Law to reduce the amount of lead in the public drinking water. The City has approximately 15,000 lead services throughout the system. The City of Syracuse was mandated to replace a minimum of 7% (1325) public side lead services per year in the water distribution system. The last several years of replacing lead services throughout the City has clearly had a positive impact on water quality. This program would employ numerous people employed by the contractor to perform the replacements. The cost per service is approximately $4,000 and the City has close to 15,000 services still to replace. The City proposes to replace 1,250 lead services per year atan annual cost of $5,000,000. All of the lead services could be replaced for $60,000,000. Necessary upgrades - The City is no longer required to replace the services but the program should continue to decrease the levels of lead in the system. In additi

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, Brownfield assessments	$1,000,000	DEC	Onondaga County, Brownfield assessments - The City of Syracuse has a number of brownfields that need funding assistance for conducting Phase I and Phase II studies. Many brownfields in Syracuse are abandoned gas station and auto repair shops. If at the time of completion of Phase I and II studies, a developer is no longer interested, the studies would remain property of the city and can be use in attracting other developers or soliciting additional funding for remediation. The targeted sites will be within the CityÆs Community Development target areas (Near Westside, near Southside, Brighton, Near Eastside, Near Northeast, and Washington Square) or in one of the three BOA areas (Gateway/South Salina, Erie East, Hiawatha Blvd). $1,000,000 would permitthe assessment of ten sites; five petroleum sites, and five regular brownfields. Brownfield assessment is key to redevelopment. There are no other funds for this purpose. If funded, targeted sites would be selected within 30 days and the assessment wor
Onondaga	Onondaga County, Residential meter replacement	$8,200,000	DEC	Onondaga County, Residential meter replacement - The City of Syracuse will replace obsolete water meters with new meters that can be read using radio technology. A network of radio transmission towers will be installed to send water meter readings to a central data collection point. The project includes the replacement of approximately 35,000 residential water meters in the City of Syracuse. Inaccurate readings from outdated meters has an adverse affect on other water management programs such as loss prevention, leak detection, and water main replacement. Meters are manufactured in the United States and installers would be hired to complete this project. Once completed, the new water meters will be read in real time on one or multiple desktop computers. Efficiency

Onondaga	Town of Geddes Lindbergh Lawns Storm Sewers, Ph 2	$160,000	DEC	The Lindbergh Lawns housing tract, a low income area as shown by census data, has long had an inadequate storm sewer drainage facilities. Yards are difficult to maintain with wet un-mowable areas, and roadways deteriorate prematurely. Phase 2 of the Lindbergh Lawns Storm Sewer project will consist of the installation of six 2.5 feet square catch basins, 362 feet of 12-inch diameter perforated storm sewer pipe, and 140 feet of 12-inch diameter non-perforated storm sewer pipe on Curtis Avenue. Work on Bennett Avenue would include the installation of four 2.5 feet square catch basins, 220 feet of 12 inch diameter perforated storm sewer pipe, 74 feet of 12 inch diameter non perforated storm sewer pipe, 308 feet of 15 inch diameter perforated storm sewer pipe, and 45 feet of 15 inch diameter non perforated storm sewer pipe. In 2005, Phase 1 of the storm sewer project was completed. Storm sewer facilities were installed along Stinson Avenue and a small portion of Bennett Avenue. This work eliminated the pon

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Town of Van Buren Seneca Knolls Drainage Imp	$150,000	DEC	The project consists of improvements to drainage areas, primarily in back and side yards in the Seneca Knolls area. Improvements include installation of approximately 3,000 linear feet of drain tile and swale along approximately 80 lots. The Town formedthe Seneca Drainage District to address these types of drainage problems that are prevalent in the Town?s older subdivisions. This is part of the Town?s initiative to help restore the Seneca Knolls neighborhood, a low income area according to the census.The project would improve surface drainage in the Seneca Knolls area, focusing primarily in back/side yards. Over time, many of the original drainage swales and/or ditches have been filled, or yard grades have changed. The Town formed the Seneca Drainage District to address these types of drainage problems. It is not the intent of this project to address an improvement that is affecting only 1 or 2 properties, but to tackle larger contiguous standing water problems.
Onondaga	Salina School Apts.	$2,928,288	DHCR	LIHTC 9%
Onondaga	Onondaga County, Near Westside Initiative - Syracuse University	$23,000,000	DHCR	Onondaga County, Near Westside Initiative - Syracuse University A university-led, local not-for-profit development corporation that is combining the power of art, technology and innovation with neighborhood values and culture to revitalize Syracuse's New Westside. The Near Westside has the lowest home ownership and highest poverty rates in the City of Syracuse, and contains some of the poorest census tracts in the United States. It is disconnected from Syracuse's urban core by three blocks of vacant land and abandoned warehouses. Redevelopment of these properties will comprise the anchor project of this redevelopment for the Near Westside. 50 units of green housing are simultaneously being developed in the immediate vicinity. The project is serving asa test bed for new technologies emerging from the Syracuse Center of Excellence in Environmental and Energy Systems. This is a signature project for both Syracuse University and the City of Syracuse and has the potential to be a national model
Onondaga	Onondaga County, Near West Side Initiative	$5,000,000	DHCR	Onondaga County, Near West Side Initiative CASE Supply Phase One Renovations-artist work-live housing Showcase projects that are priorities for the City of Syracuse and Syracuse University
Onondaga	Onondaga County, S&W Redevelopment	$1,800,000	DHCR	Onondaga County, S&W Redevelopment Addition of apartments to vacant space in office building Key downtown revitalization project
Onondaga	Onondaga County, Streetscapes	$500,000	DHCR	Onondaga County, Streetscapes Westcott Street Streetscape Improvements (Dell Street to Beech Street) These projects support a comprehensive downtown revitalization effort, and other initiatives underway such as the ""Connective Corridor"" to enhance livability down
Onondaga	Onondaga County, Hancock housing demolition	$8,000,000	DHCR	Onondaga County, Hancock housing demolition - On June 10, 1999, the City of Syracuse acquired the Hancock Housing Area (HHA) from the Air Force Base Conversion Agency. This 84.86 acre parcel, referred to as Tract 5, consists of 77 multi-family and two single family buildings. HFDCÆs key objective is to attract high quality manufacturing and commercial facilities and the associated new employment to Hancock Air Park. Given the CityÆs need to ensure adequate property for future development, it has been determined that of the approximate 85 acres, the City only requires 25 acres, making the 60 acres available for possible development by HFDC. The HHA is located adjacent to the current Hancock Air Park, a 425 acre site leased to the Hancock Field Development Corporation by Onondaga County. There is a need for shovel ready sites in the 50 to 80 acre range. The City is seeking funding to demolish all structure on the site, including the removal of hazardous material, concrete sidewalks, asphalt roads, ande potential to create 10 jobs for every acre that is developed.

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, Streetscapes - The City of Syracuse is proposing streets	$1,400,000	DHCR	Onondaga County, Streetscapes - The City of Syracuse is proposing streetscape projects that will complement several developments. Lakefront district projects enhanced by the streetscapes include: Lakefront Lofts (a $5,000,000 mixed use development with50 residential units); the Amos @ City Harbor project (a $11,500,000 project with 80 residential units); and small office developments in the western sector of the Lakefront area. Downtown streetscape projects include: Bank Alley improvements which willcomplement three mixed use projects supported by the Restore NY program (a $4,900,000 project encompassing 325 South Salina, 317-319 South Salina, and 359-361 South Salina). These projects support a comprehensive downtown revitalization effort, and other initiatives underway such as the ""Connective Corridor"" to enhance livability downtown. Lakefront streetscape improvements are projected to cost $1,000,000. Downtown streetscape improvements are projected to cost $400,000, of which $148,000 was receiv
Onondaga	Onondaga County Housing Rehabilitation Program	$2,400,000	DHCR	Onondaga County Community Development Division (CDD) has significant need for housing rehab program dollars. CDD recently received a total of $6.6 million in lead grant funds through HUD; contracts have been executed. Funds will be used to complete leadhazard control of 450 income-eligible units over the next 3 years, countywide. CDD committed $2.1M of anticipated CD/HOME entitlement funds for general rehab of 210 of these units. An additional $2.4M is needed to match HUD Lead Program dollars for general rehab and energy improvement of the remaining 240 units. CDD has the staff, policies and procedures in place begin spending requested stimulus funds immediately. Rehab projects are bid out; CDD works with over 90 local contractors and actively recruits and trains contractors including WBEs/MBEs. CDD maintains a waiting list of potential clients who have met preliminary eligibility requirements. There are currently 375 households on the Lead Program waiting list with one or more children under the age

Onondaga	Onondaga County, St. Joseph's Hospital	$35,000,000	DOH	Onondaga County, St. Joseph's Hospital - Expansion - New medical emergency department, psychiatric emergency unit, observation/chest pain unit, data center, kitchen/nutritional services - With a workforce of over 3500 employees, St. JosephÆs is one of thelargest employers in Central New York. The Hospital is committed to remaining at its urban site and has embarked on a long-term plan to expand its facility. St. JosephÆs has made a significant investment of its own resources to these projects û more than $45 million to date û and is also working with several local, state, and private organizations to revitalize the surrounding Prospect Hill neighborhood. This project is one of the largest and most significant investments in the region. Designed to serve just 38,000 patients per year, each year St. JosephÆs busy Emergency Department (ED) sees nearly 50,000 patient visits, a number expected to grow to 70,000 in the next decade. A new, expanded ED will include a chest pain & observation center and adjach care system and will be financially viable just one year after completion. St. JosephÆs Hospital Health Center is a non-profit, 431-bed hospital and health care network providing services to patients in the City of Syracuse, NY, and 16 surrounding courea includes Fort Drum, Griffiss Air Force Base, the 174th Fighter Wing of the Air National Guard, and Nine Mile Point nuclear facility. Phase 1 is complete and planning is well underway for Phase 2.

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Re-entry Program: Economic Revitalization through Job Readiness	$136,000	DOL	The south side of Syracuse has been label ?an economic desert? by many for years. Our community?s economic struggles are due largely to a lack on ?know-how? on the part of its residents. An increasing high school drop-out rate coupled with high levels ofincarceration have left many on the south side without the skills required to qualify for decent jobs with good benefits. In order to improve life on the south side of Syracuse, we must go to the core of the problem. Education, skills training and the receipt of certifications in various fields are the keys to correcting this problem. Our target population is those who have not finished high-school or college and those re-entering from jail or prison, who reside within the South Salina Street Trade Area (between Taylor and Brighton/Route 81 and Midland). Many adults who are being released from jail or prison are finding it very difficult to find employment. On top of a lack of qualifications, a constant reminding by the consensus reality that employerback to prison. Understanding unfortunately that re-entry is a major component in our city, a focus on assisting those re-entering society in obtaining skills and/or employment would greatly reduce unemployment rates and thereby improve the economy. Anent?s ?work know-how or ability? will turn the poorer neighborhoods in our city into economically, culturally and politically vibrant communities. The Southside Community Coalition is seeking to contribute to the development of a strong work force. By pa

Onondaga	Road Repairs and Paving	$360,000	DOT	The Village of Minoa needs to mill and pave three (3) streets and pave six (6) streets for an estimated 8,050 linear feet of road work.
Onondaga	Town of Camillus Highway Project	$7,000,000	DOT	A 2006 analysis of the transportation network determined that the best alternative to address current and future traffic concerns was through the construction of a connector road. NYSDOT has also mandated the modification of multiple county owned roadways and intersections in the area with a total project cost of $7,000,000. The connector road and the additional highway and intersection modifications will provide operating and safety improvements: a. Reduce accidents by improving traffic flow. b. Produce highway safety improvements for West Genesee School District. c. Evenly distribute traffic projecting 20 years out. Since 2006, continuous interaction of the Town, the County, and the NYSDOT, which has produced plans for the highway modification. The highway improvements will also assist in the development of a 68 acre parcel of land with a total taxable property value upon completion of $50,000,000. The project will create 600-800 construction jobs. Upon completion it is anticipated that the occupantl be facilitated through the donation of the fee title to the necessary lands by the project owners to the Town of Camillus.

Onondaga	Onondaga County, Airport sidewalk replacements	$2,000,000	DOT	Onondaga County, Airport sidewalk replacements - This project includes the replacement of sidewalks, cross-walks, curb cuts and signage between the terminal building and parking garage by the City of Syracuse Department of Aviation at Syracuse Hancock International Airport. Improvements to the airport are a critical part of the regionÆs Economic Development strategy. The current configuration of the cross-walks between the terminal building and parking garage does not provide sidewalk to sidewalk curb-cuts. The economic impacts include several construction contracts, primes and subs, including mechanical, electrical and general contractors. If funded, the City can go to bid within two weeks of having received approval, advertise and bid for a three week period, award contracts for construction within three weeks or receiving bids, and begin construction immediately upon receiving notice to proceed. Part of a proposed $56 million enhancement to Hancock Airport recently proposed by the City. This proj
Onondaga	Onondaga County, Salina Rail infrastructure	$11,000,000	DOT	Onondaga County, Salina Rail infrastructure - Infrastructure enhancements would create a 200+ acre industrial ôsuper siteö equipped with extraordinary rail access along the CSX mainline. This concept of a multimodal industrial ôsuper siteö would leveragemillions of dollars already expended by General Motors Corporation to redevelop the former automotive plant. Create a Salina ""super-industrial site"" combining the former GM plant (Salina Power Park), Southern Wines and Spirits and former Syracuse China factory; provide 4,500 linear feet of new track over three locations, installing three new switches and ancillary / utility roads to include the supplemented improvements to Salina Industrial Powerpark and Southern Wine and Spirits; provide up to 8 acres of paving for truck and material staging capable of serving both north and south sides of CSX R>O>W; create Rail Crossing at eastern border of Syracuse China The project would enhance the opportunity to create 700+ jobs, in addition to 800 existingnts. This site has one of the most impressive potential rail yards along the CSX mainline along the NYS Thruway. Of the $11,000,000 project cost, approximately $8,000,000 would be for rail and $3,000,000 for road upgrades to enhance access to the site, ati
Onondaga	Onondaga County, Radisson Rail infrastructure	$350,000	DOT	Onondaga County, Radisson Rail infrastructure - The project is the rehabilitation of about 6,000 feet of an industrial freight rail spur at Radisson Corporate Park in Baldwinsville to service an existing PET container factory which employs over 100 people as well as other vacant industrial land for sale.áá The bid package is finished and the only lead time needed is bidding and permitting time. The company's use of rail saves it $1,000,000 per a year over trucking, and with about 300 carloads a year saves wear and tear on adjacent highways. The rail and the two road crossings must be reinforced to avoid derailments. ESD has developed Radisson Corporate Park. This project would greatly enhance its rail capacity. ESD engineers have completed plans, there is site control and the project is truly ready to go.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, Road extension	$600,000	DOT	Onondaga County, Road extension - A 100+ acre industrial park, the owner completed $1,050,000.00 (plus soft costs) in infrastructure improvements in calendar year 2008. The site is a prime ""shovel-ready"" industrial park, in close proximity to the NYS Thruway, I-481 and I-690. Improvements include roads, gutters, storm conveyance, sanitary sewers, domestic water, electric and gas. To complete the project improvements are required by NYS DOT, including road widening, turn lanes, and signalization of anew access point from NYS route 298. This project is truly ready to go, with all permits in place, along with site control. The economic impact includes the retention of an estimated 50 jobs, and the creation of 100 jobs within 3 years. The road designhas been approved by NYS DOT, and work can begin in late spring; and would be complete by late sum
Onondaga	Onondaga County, Bike lanes	$250,000	DOT	Onondaga County, Bike lanes - The City has received requests to expand this alternative transportation option throughout. The estimated cost to expand a basic connecting bike lane network to the North, South, East and West sides of the city would be $250,000. The City of Syracuse has installed a small bike lane network mostly in the Syracuse University area (East Side of the City). Utilizing the CityÆs existing bike lane model, this expansion could easily be designed, with installation starting this spring and being completed by the end of October of 2009. Mobility
Onondaga	Onondaga County, Downtown-University Hill Rail Connection	$250,000	DOT	Onondaga County, Downtown-University Hill Rail Connection Restart rail shuttle service between Armory Square and Syracuse University Future project
Onondaga	Onondaga County, Syracuse University Research Park	$30,000,000	DOT	Onondaga County, Syracuse University Research Park Connector to I-481 (Rock Cut Road) Future project
Onondaga	Onondaga County, University Hill Park and Ride	$1,200,000	DOT	Onondaga County, University Hill Park and Ride Satellite parking facility Future project
Onondaga	Onondaga County, Syracuse Streetcar System	$35,500,000	DOT	Onondaga County, Syracuse Streetcar System Link University Hill, Downtown Syracuse and West Side Initiative by 1.8M streetcar system Future project
Onondaga	Onondaga County, McBride Street District	$500,000	DOT	Onondaga County, McBride Street District Installation of antique lighting Streetscape project
Onondaga	Onondaga County Facilities Management	$1,357,000	DOT	Onondaga County Facilities Management Community Plaza and Walks Renovations Municipal project
Onondaga	Onondaga County Facilities Management	$2,730,000	DOT	Onondaga County Facilities Management Community Plaza Garage Municipal project
Onondaga	Onondaga County, Rail infrastructure	$2,000,000	DOT	Onondaga County, Rail infrastructure This project will weld in place 10 miles of jointed track on the NYS&W main track. The project will create stronger track with a smoother ride that will enable trains to travel at greater speeds. Increase rail freight along key rail corridor in NYS
Onondaga	Onondaga County, Rail infrastructure	$0	DOT	Onondaga County, Rail infrastructure A project in the Town of Fairmount to add trackage to handle the growing number of businesses in Solvay. This project will provide additional car storage and switching space in support of increasing carload interchange with CSX at Solvay. This project will also improve customer service to Solvay Paperboard and Southern Container. Necessary upgrades
Onondaga	Onondaga County, Rail infrastructure	$0	DOT	Onondaga County, Rail infrastructure A project in the Town of Camillus to create a crossover installation at Southern Container which will improve LGLK operating efficiency by creating two runarounds (one at 8 car lengths and a second at 14 car lengths)from one 22 car length runaround siding. It will also improve the rail switching service to a key customer and regional employer, Southern Container. This project will enable an increase in rail capacity and improve grade crossing exposure, thereby alsoincreasing public safety. Necessary upgrades

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, ADA accessibility	$275,000	DOT	Onondaga County, ADA accessibility Within the City of Syracuse Central Business District there are 57 corners which do not meet ADA requirements for accessibility. This project will bring these corners up to current ADA code requirements. Safety, accessibility. Mobility for persons with disabilities is crucial to the viability of the Central Business District.
Onondaga	Onondaga County, Park Street Bridge	$1,000,000	DOT	Onondaga County, Park Street Bridge Connect Syracuse University, Downtown, and the Carousel Center to the Regional Transportation Center by rail. The bridge is a barrier to the Near Westside -- but with infrastructure upgrade, could be a vital connector within the City of Syracuse
Onondaga	Onondaga County, I-81 Viaduct	$5,000,000	DOT	Onondaga County, I-81 Viaduct Reconstruct or replace elevated section of I-81 in Downtown Syracuse (design and engineering for preferred alternative) Future project
Onondaga	Onondaga County, Hancock Airpark	$9,000,000	DOT	Onondaga County, Hancock Airpark Infrastructure improvements to prepare 50-acre shovel ready parcel Future project
Onondaga	Baldwinsville Village Square Trail Connection	$200,000	DOT	Construction of a downtown, urban park along Denio Street, adjacent to the Seneca River. Proposed improvements include 600 lineal feet of sidewalk with monolithic curb to delineate the park; 400 lineal feet of sidewalk to connect the existing Yevich Trail to the River Street Walkway and the proposed South Shore East Trail; and eight (8) streetlights. Future improvements to Village Square may include a gazebo, a plaza, and a skating rink. Four (4) pedestrian/bike trails converge in the central business district of the village, but do not connect. This project will become the hub, connecting these trails to allow safe access to and passage through the business district. This project will improve access to parks and recreational points of interest. The project will increase pedestrian traffic in the central business district of the Village and should increase business activity
Onondaga	Town of Dewitt Parkill Redevelopment, Ph 3-5	$1,300,000	DOT	Parkhill is one of the oldest residential areas in the Town of DeWitt, developed in the 1920?s and 1930?s. This is a low income neighborhood, per the census, which has experienced a decline over the years. The roads are substandard and in need of major reconstruction. In addition, drainage work is needed along with new sidewalks and other amenities as streetlights and trees. Due to the small lots, most residents park on the street, often on grassed areas adjacent to the roads. This project will addressthat problem by providing paved shoulders. Other infrastructure in the area (water, sanitary sewers, and gas) will be updated, if necessary. It is intended that the redevelopment of the public infrastructure will encourage private investments in the housing stock. Onondaga County Community Development has approved the first two phases of funding for this project. The first Phase, on Bennett Street and North Highland Avenue, was completed in 2007. The work (new roads, sidewalks, curbing, water mains, stoments on North Highland and Nelson Avenues and Avon and Frederick Streets. The purpose of this project is to revitalize the Parkhill neighborhood and reverse a downward trend in property values. It is a goal of this project to make the Parkhill area a nefor young families purchasing their first homes. Another goal of the project is to fix ongoing drainage problems in the area by installing a well designed storm sewer system.
Onondaga		$725,000	DOT	
Onondaga	Onondaga County Salina Electrical substation	$2,900,000	DPS	Onondaga County Salina Electrical substation - This is a key link in the power grid serving both the primary transmission lines through Central New York and the primary service to more than 15 businesses within the Salina Industrial Powerpark. This project includes Salina Powerpark and Teal Avenue electrical substations. The grid upgrade would have a life expectancy of approximately 40 years.
Onondaga	CSO (Harbor Brook CSO Abatement Ph. I)	$63,000,000	EFC	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Onondaga	Water Treatment to Meet LT2ESWTR Requirements	$1,228,000	EFC	UNFUNDED MANDATE: in accordance with the LT2ESWTR, the Villages of Elbridge and Jordan are required to install and operate additional (UV) treatment for their drinking water supply by March 31, 2012. We are in the final engineering stage and plan to put
Onondaga	Pleasant Valley Water District	$450,000	EFC	Project will provide public water supply to 38 homes currently experiencing quality and quantity issues with ground water. Project involves installation of 8600 linear feet of 8"" ductile water main. Estimated completion time for the project is 180 day
Onondaga	Limeledge Water District	$700,000	EFC	The Limeledge Water District project will provide a new public water system for 300 residences in Marcellus and Skaneateles and a treated water suplly to over 600 customers in the village of Marcellus. The project encompasses the installation of 59,000 feet of linear pipe ass well as two tanks and two pump stations. Construction contracts have been signed and the project construction will commence on March 2,2009. Completion is slated for 12/1/2009. Toal project cost is up to $6,687,000.
Onondaga	Village of East Syracuse Sanitary Sewer Project	$2,115,500	EFC	On 12/13/07, the Village of East Syracuse received a Consent Order from DEC due to alleged violations of the NYSECL resulting from sanitary sewer overflow (SSO) discharges. Furthermore, because the village did not have a valid NYS Pollutant Discharge Elimination System (SPDES) Permit for these discharges, it is subject to a civil penalty in an amount of up to $37,500/day/violation. The Order required that an engineering report and recommendation be prepared (the ""Plan""), and the problems addressed by08/31/10. While the Plan has been accomplished, the Village will be forced to raise property taxes to fully comply with the Consent Order. The Village has a population of 3,178, with 1,393 households and 742 families. 14% of the families and nearly 15% of its overall population lives below the poverty line. The Plan identified several remedial alternatives, and the Village asks for funds to pursue those options which will correct the violations in the Consent Order, and result in a modern and effici
Onondaga	Sewer Repair and Replacement Project	$4,200,000	EFC	The Village of Minoa needs to repair and replace approximately 15,500 linear feet of sewer lines and 71 manholes that were constructed in the 1940's and early 1950's. The project would account for a depth average of 8 feet, patch streets, stone, labor, bond, yard restoration, lateral hook-up, bi-pass pumping, pipes and manholes.
Onondaga	Onondaga County, Storm water pre treat pump station - A storm water pre t	$4,000,000	EFC	Onondaga County, Storm water pre treat pump station - A storm water pre treat pumping station is proposed for the Salina Power Park. The project would help manage water flow into Ley Creek from development of a proposed ""super site."" The pumping facility would meet building requirements for storm water management for the entire 200 + acre site. SEQR could occur in 120 days. Necessary upgrades to serve site and improve storm water impact on Onondaga
Onondaga	Onondaga County Fire hydrant replacements	$20,000,000	EFC	Onondaga County Fire hydrant replacements The Fire Hydrant Replacement program is part of the City of Syracuse Water Department Capital Program. The Syracuse Fire Department has more modern equipment that allows for higher flow characteristics. The hydrants currently in use by the department are sub standard in terms of flow capacities. The cost per hydrant is approximately $8,000 and the City has 2,500 hydrants to replace. The total cost would be $20,000,000 to replace all the hydrants in the system.Necessary upgrades

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Woodbine Business Park	$600,000	ESD	100 acre business park is designated as a Build Now NY site, and is currently under construction; owner has already funded approximately $1,000,000.00 in construction in calendar year 2008. Subdivision approval requires improvements to NYS Route 298 withthe widening of the road, turning lanes, sidewalks, and traffic signal. The grant money would be dedicated to improvements within the State ROW.
Onondaga	CDIM	$1,000,000	ESD	Independent toileting for those with limited mobility. Substitutes technology for labor, reduces cost of healthcare by reducing falls, lowers labor cost for home care, hospital and nursing home providers, improves quality of life for user/caregiver. Creates manufacturing, distribution and servicing jobs.
Onondaga	Syracuse CoE/Infrastructure for Innovations in Energy & Green Bldg Techn	$10,000,000	ESD	The SyracuseCoE is currently under construction on a redeveloped brownfield in downtown Syracuse adjacent to the intersection of I-81 and I-690. The facility will serve as the headquarters for SyracuseCoE, an industry-university collaborative enterprisethat creates environmental and energy innovations for a sustainable future. Through the SyracuseCoE more than 200 firms and institutions conduct research, develop new technologies, commercialize innovations, educate the workforce and engage the public.The facility has been designed to achieve the highest rating in the US Green Building Council's LEED-NC system.
Onondaga	Syracuse University Research Park/Blue Highway Building Project	$3,400,000	ESD	In the Spring of 2009, Syracuse University will be breaking ground for 20,000 sq. ft. rental building at its Research Park, located on South Campus. Half of the space will be occupied by Blue Highway, an innovation company recently spun out of Welch Allyn. Welch Allyn, Inc., at New York State company is a leader in diagnostic medical devices used by front-line doctors around the world. The other half of building will be taken by its spinout companies of other high-tech tenants.
Onondaga	MDA	$5,000,000	ESD	Hotel Syracuse - renovation of vacant historic hotel
Onondaga	City of Syracuse	$45,000,000	ESD	Construction/Renovations of West side buildings
Onondaga	County of Onondaga	$10,000,000	ESD	New Convention Center hotel
Onondaga	RUBBER ROOF	$30,000	ESD	REPLACE ROOF WITH NEW RUBBER ROOFING IN WHITE
Onondaga	Onondaga County, Northside Collaboratory/Business Development Center	$100,000	ESD	Onondaga County, Northside Collaboratory/Business Development Center Renovation of historic structure to provide space for services addressing needs of residents Multi-agency community development project
Onondaga	Onondaga County, Near West Side Initiative	$12,000,000	ESD	Onondaga County, Near West Side Initiative New Regional Public Broadcasting Facility - WCNY complex Showcase projects that are priorities for the City of Syracuse and Syracuse University
Onondaga	Onondaga County, Near West Side Initiative	$2,400,000	ESD	Onondaga County, Near West Side Initiative Lincoln Supply Warehouse Renovations Showcase projects that are priorities for the City of Syracuse and Syracuse University
Onondaga	Onondaga County, 300 Block Redevelopment	$1,000,000	ESD	Onondaga County, 300 Block Redevelopment Renovations to 4 historic buildings for mixed use project Key downtown revitalization project
Onondaga	Onondaga County, Merchants Bank Building	$4,000,000	ESD	Onondaga County, Merchants Bank Building Rehab of 152,000 SF for mixed use project Key downtown revitalization project
Onondaga	Onondaga County, Dey's Centennial Plaza	$1,000,000	ESD	Onondaga County, Dey's Centennial Plaza Addition of 50 apartments to office building Key downtown revitalization project
Onondaga	Onondaga County Facilities Management	$10,600,000	ESD	Onondaga County Facilities Management OnCenter Complex Infrastructure and Facility Improvements (Includes War Mem. Scoreboard) Municipal project
Onondaga	Onondaga County, Excellus Building	$1,900,000	ESD	Onondaga County, Excellus Building Rehabilitation of 233,000 SF building for mixed use Key downtown revitalization project

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, Zipper Building	$350,000	ESD	Onondaga County, Zipper Building Conversion of warehouse for mixed use project Mixed use redevelopment
Onondaga	Onondaga County, Marriott Hotel	$2,000,000	ESD	Onondaga County, Marriott Hotel New construction of 175 room facility Key downtown revitalization project
Onondaga	Onondaga County, Hotel Syracuse	$5,000,000	ESD	Onondaga County, Hotel Syracuse Complete the renovation of vacant historic hotel for hotel, condo and apartment uses Key downtown revitalization project
Onondaga	Onondaga County, HSBC Building	$5,000,000	ESD	Onondaga County, HSBC Building Assemble land and garage for mixed use project Key downtown revitalization project
Onondaga	Onondaga County, SIDA Parcels	$3,000,000	ESD	Onondaga County, SIDA Parcels Incentive to be used for new construction mixed use project Key downtown revitalization project
Onondaga	Onondaga County, Symphony Place - Syracuse University	$2,000,000	ESD	Onondaga County, Symphony Place - Syracuse University - The Connective Corridor is developing this as a signature strip of cutting-edge cultural development connecting the University Hill with downtown Syracuse. It is home to three major universities andmore than 25 arts and cultural venues all within close distance to one another. Connective Corridor- Symphony Place: The test site for the new urban landscape of the Syracuse Connective Corridor will be Symphony Place, the public plaza framing the restored Hotel Syracuse. In the coming months and years these venues will be stitched together and showcased with new urban landscapes, bike paths, imaginative lighting, public and interactive art, signage and way finding systems. This is a signature project for both Syracuse University and the City of Syracuse and has the potential to be a national model
Onondaga	Onondaga County, Convention Center Hotel	$25,000,000	ESD	Onondaga County, Convention Center Hotel - Plans for a 365-room Westin On Center Convention Center headquarter hotel have stalled due to the current constriction of the capital markets. The county has lost an estimated $20,000,000 of convention businessannually due to the lack of a headquarters hotel. A cash infusion or low interest loan of $10,000,000 into the $100,000,000 project would move the project forward, create 500-600 construction jobs, over 200 full time hotel jobs, plus revitalize the On Center, an award winning convention location. There is strong community support for this project, and the City of Syracuse and Onondaga County have both identified this as their top priority. All funding in place (except the $10,000,000 gap), and permitsand site plan approvals are secured. The developer and contractor are on board, and this project is truly ready to go. Key factors include: Skilled union jobs performed at prevailing wage, dominate the project; the project is supported by the Hotel Motemmunity; the highly visible location can be seen from Syracuse University, Everson Museum, and nearby interstate highways; with the addition of the hotel, the convention potential for 2010-2014 is $125,000,000 in direct spending. This project could be anngine for the region.

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, Syracuse CoE/Infrastructure for Innovations in Energy &	$10,000,000	ESD	Onondaga County, Syracuse CoE/Infrastructure for Innovations in Energy & Green Bldg Technologies for the CoE Headquarters facility in downtown Syracuse The Syracuse CoE is currently under construction on a redeveloped brownfield in downtown Syracuse adjacent to the intersection of I-81 and I-690. The facility will serve as the headquarters for Syracuse CoE, an industry-university collaborative enterprise that creates environmental and energy innovations for a sustainable future. Through the Syracuse CoE more than 200 firms and institutions conduct research, develop new technologies, commercialize innovations, educate the workforce and engage the public. The facility has been designed to achieve the highest rating in the US Green Building Council's LEED-NC system. This is a signature project for both Syracuse University and the City of Syracuse and has the potential to be a national model
Onondaga	Onondaga County, Syracuse University Research Park / Blue Highway Buil	$1,150,000	ESD	Onondaga County, Syracuse University Research Park / Blue Highway Building Project Extension of infrastructure to accommodate high-tech business
Onondaga	Onondaga County, Syracuse University Research Park/Blue Highway Build	$3,400,000	ESD	Onondaga County, Syracuse University Research Park/Blue Highway Building Project In the Spring of 2009, Syracuse University will be breaking ground for 20,000 sq. ft. rental building at its Research Park, located on South Campus. Half of the space willbe occupied by Blue Highway, an innovation company recently spun out of Welch Allyn. Welch Allyn, Inc., at New York State company is a leader in diagnostic medical devices used by front-line doctors around the world. The other half of building will be taken by its spinout companies of other high-tech tenants. This will be Central New York's first university research park, and holds great promise as an ""accelerator"" facility for companies that have incubated at Syracuse University and The Tech Garden,as well as other companies that are expan
Onondaga	Onondaga County, Downtown parking - Sibley's garage	$20,000,000	ESD	Onondaga County, Downtown parking - Sibley's garage This project would replace the existing Sibleys 800 space parking garage. This garage serves three major office buildings with approximately 1.3 million sq ft of office space. The new garage would alsoprovide parking for residents in the Salina Street and Armory Square neighborhoods as well as short term parking for Armory Square and Landmark Theater visitors. The continuation of parking at this location is critical to the economic viability of thisarea. Downtown parking has been identified by the City of Syracuse as one of the most critical obstacles to revitalization. There is a serious shortage of downtown parking to serve the central business district, and as a result, several major employershave moved out of the downtown area to the suburban ring. Building capacity for parking is a vital tool for successful mixed-use redevelopment of the central business district
Onondaga	Onondaga County, Park Warren Garage	$6,000,000	ESD	Onondaga County, Park Warren Garage Rehab of garage to support revitalization strategy Key downtown revitalization project

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, Clay Business Park	$4,600,000	ESD	Onondaga County, Clay Business Park A primary goal of Onondaga County is to enhance the shovel ready 300-acre business site that could easily accommodate a project as large as 1 million square feet and having as many as 2,500 employees. This is one of the best sites in New York State to locate a high-tech, green technology, R&D or bio-pharmaceutical business. The County IDA has been acquiring parcels for several years and is currently purchasing the last parcel of land necessary to reach that acreage threshold. The undertaking of several infrastructure upgrades will create a highly competitive shovel ready site. Federal assistance with the upgrades would complete the site & yield a premier investment location. Onondaga County has hosted a number of prospective industrial projects with the job creation targets of 150 to 3000 jobs per project. One prospect alone was prepared to invest up to $1 billion in capital investment. The overwhelming majority of these prospects required shovel ready sites and so compete for such investment. The upgrades include: Construction of a sewer line ($2.8m) (90-120 days); Installation of rail track and switches ($1m) (90-120 days); Wetlands Mitigation ($250K) (60-90 days); Temporary Internal Road ($100k) (30-90 days)
Onondaga	Hanover-Montgomery Revitalization Program	$500,000	MAIN_ST	
Onondaga	Brewerton Main Street Program	$500,000	MAIN_ST	
Onondaga	Syracuse Fall 2008 MS South Salina Street	$500,000	MAIN_ST	
Onondaga	North Salina/Prospect Hill Development: Syracuse	$166,625	MAIN_ST	
Onondaga	Connective Corridor- Symphony Place	$2,000,000	MAIN_ST	The test site for the new urban landscape of the Syracuse Connective Corridor will be Symphony Place, the public plaza framing the restored Hotel Syracuse. The Connective Corridor is developing this as a signature strip of cutting-edge cultural development connecting the University Hill with downtown Syracuse. It is home to three major universities and more than 25 arts and cultural venues all within close distance to one another. In the coming months and years these venues will be stitched together andshowcased with new urban landscapes, bike paths, imaginative lighting, public and interactive art, signage and way finding systems.
Onondaga	Connective Corridor-Symphony Place in Downtown Syracuse	$3,000,000	MAIN_ST	The test site for the new urban landscape of the Syracuse Connective Corridor will be Symphony Place, the public plaza framing the restored Hotel Syracuse. The Connective Corridor is developing this as a signature strip of cutting-edge cultural development connecting the University Hill wtih downtown Syracuse. It is home to three major universities and more than 25 arts and cultural venues all within close distance to one another. In the coming months and years these venues will be stitched togetherand showcased with new urban landscapes, bike paths, imaginative lighting, public and interactive art, signage and way finding systems.
Onondaga	Near Westside Initiative	$23,000,000	MAIN_ST	A University-led, local not-for-profit development corporation that is combining the power of art, technology and innovation with neighborhood values and culture to revitalize Syracuse's New Westside. The Near Westside has the lowest home ownership andhighest poverty rates in the City of Syracuse, and contains some of the poorest census tracts in the United States. It is disconnected from Syracuse's urban core by three blocks of vacant land and abandoned warehouses. Redevelopment of these propertieswill comprise the anchor project of this redevelopment for the Near Westside. 50 units of green housing are simultaneously being developed in the immediate vicinity. The project is serving as a test bed for new technologies emerging from the SyracuseCenter of Excellence in Environmental and Energy systems.

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Syracuse Center of Excellence/Energy Efficiency and Green Jobs to Revita	$16,000,000	MAIN_ST	Syracuse CoE is a primary partner in the Near Westside Initiative with responsibilities focused on technologies and innovations that will reduce energy consumption and improve indoor environmental quality. This request will enable Syracuse University and its SyracuseCoE partners to assist in the renovation of more than 100 homes and other buildings in Syracuse's Near Westside Neighborhood. The total project includes: Energy-efficient hom renovations, workforce development, asbestos & lead abatement and deconstruction.
Onondaga	Walkable Community Sidewalk Initiative	$1,444,014	MAIN_ST	
Onondaga	Schools, Elementary and Secondary, JAMESVILLE-DEWITT CSD	$816,721	NYPA	
Onondaga	Colleges and Universities, SUNY UPSTATE MEDICAL UNIVERSITY	$529,279	NYPA	
Onondaga	Colleges and Universities, SUNY UPSTATE MEDICAL UNIVERSITY - PHA	$752,549	NYPA	
Onondaga	Colleges and Universities, SUNY (ESF) ENVIRONMENTAL SCIENCE & FC	$933,390	NYPA	
Onondaga	Colleges and Universities, SUNY UPSTATE MEDICAL UNIVERSITY - PHA	$1,847,850	NYPA	
Onondaga	Colleges and Universities, SUNY Upstate Medical - Phase IV	$2,588,823	NYPA	
Onondaga	Town Hall Renovation and Addition	$750,000	NYSERDA	Renovation and addition to 100 year old former bank building that has served as the Town Hall for 20 yrs. Plans call for geo thermal heating, energy efficient windows and additional upgrades in pursuit of LEEDS certification
Onondaga	Onondaga County, SUNY ESF Campus Solar Leader Project	$800,000	NYSERDA	Onondaga County, SUNY ESF Campus Solar Leader Project ESF has developed limited photovoltaic projects on its campus. The college is now proposing: 60kW installation on the main campus; 10kW installations at the Adirondack Ecological Center. This new capacity, together with existing installations, would provide approximately 10% of annual demand of the campus This project continues ESF's commitment to renewable energy. The project also compliments photovoltaic installer and maintenance training to at-risk youth, as well as a major workforce development initiative with other regional colleges.
Onondaga	Onondaga County, St. Joseph's Hospital - College of Nursing	$3,805,000	NYSERDA	Onondaga County, St. Joseph's Hospital - College of Nursing The College is housed in a 49-year-old building that is badly in need of infrastructure upgrades. Some improvements have been undertaken as funds have been raised but the need is becoming moreurgent. Shovel-ready components include windows, replace/ upgrade electrical system and plumbing, sprinklers in dormitory, replace floor tiling, asbestos abatement and ADA-compliance. The average age of a nurse in America is 47. As our nursing workforceprogresses toward retirement, it is more important than ever that we maintain and expand our ability to prepare the next generation of nurses. Each year St. JosephÆs College of Nursing produces about 100 new nurses, helping to alleviate the shortage inour Central New York community and beyond. In the current economic climate, nursing is a viable choice for laid-off workers seeking a new career path. Investment in the College of Nursing would serve the dual purpose of increasing the nursing workforce w

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Onondaga County, Hydrogen refueling station	$500,000	NYSERDA	Onondaga County, Hydrogen refueling station-The Hydrogen Refueling Station Project is an extension of the hydrogen economy. As the halfway station of the designated New York State Hydrogen Pathway, its equi-distance from the two existing stations (Albanyand Niagara Falls) would provide the connecting location necessary for refueling and continuity of the StateÆs hydrogen outreach demonstration program. Feedback obtained by operation and data analysis, calculated emission reduction savings and analyseswill be shared with relevant NYS agencies and project partners including the Syracuse University College of Engineering and Computer Science, host of the existing Syracuse Center of Excellence, and SUNY ESF. With a project manager currently in place, work to be performed includes finalizing system design and engineering plans; upgrading and enhancing the existing state-of-the-art CNG (compressed natural gas) dispensing system to allow it to produce compressed hydrogen; constructing the hydrogen refueliold the compressed hydrogen and 3) a field data acquisition system for testing and analysis of liquid fuel savings and emission reductions associated with the refueling station. Seed funding has been secured. Engineering plans are being finalized and thready to go in 120 days. It would a critical link in the State's renewable energy infrastructure.
Onondaga	Onondaga County, Syracuse University Campus Energy Performance Infra	$22,300,000	NYSERDA	Onondaga County, Syracuse University Campus Energy Performance Infrastructure Projects - The projects would replace obsolete components and improve control systems to improve indoor environmental conditions, reduce breakdowns, and conserve energy. Flat roofs on the buildings provided are in need of replacement in the next few years. Windows in SU's older buildings have significant infiltration and thermal conductivity losses- Roof leaks have begun to saturate and deteriorate roof insulation, resulting in thermal loss. Segments of the campus steam distribution system have aged and groundwater has penetrated the insulation which causes increased heat loss. HVAC Improvements - systems in the requested buildings are at advanced ages and operate at reduceddegrees of efficiency due to worn equipment or less than state of the art controls. Window Replacements - would upgrade or replace existing windows to improve thermal performance and save energy. The roof replacements will replace damaged insulation andrmwater flows at building sites and will help reduce overcharging the County wastewater treatment plants and uncontrolled discharge into Onondaga Lake. This is a signature project for both Syracuse University and the City of Syracuse and has the potentimodel
Onondaga	Onondaga County, Green Data Center Analysis & Design Center	$12,000,000	NYSERDA	Onondaga County, Green Data Center Analysis & Design Center - Syracuse University - The Data Center will be configured and instrumented as a test-bed for on-going research and enhancements. Construction of the most energy efficient data center in the world. Syracuse University and IBM continue their two-year collaboration in cutting data center energy consumption in half while maintaining parity computing. The data center design provides benefits to companies, governments and electrical utility providers with an allowance to operate off-grid as needed. Additionally, the Analysis & Design Center will use PhD engineering students to engage in high performance computing and sophisticated modeling to analyze and diagnose client data centers, helping themreduce energy use and transition to new operating regimes with quick paybacks. A state-of-the art education-industry partnership that accelerates tech-led economic development in Upstate

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Onondaga	Generator Project	$75,000	OHS	Provide and install an emergency generator power system at the fire station.
Onondaga	Marcellus Cemetery Improvement Project	$80,000	OPRHP	In 2006 the Town of Marcellus assumed responsiblity for the maintanence of the oldest cemetery in the Town. Those interred ther date back to the Revolutionary War. We have cleaned up much of the grounds and built a brick observation area overlooking thecemetary. Funds are sought to replace a retaining wall, wrought iron fencing and continue to restore or replace grave markers.

Onondaga	RARe	$250,000	SED	From July 6th-22nd (tentative date), Bellgrove community 3rd-8th graders will engage in local outdoor exploration and enrichment activities. The two and a half week session will build on scientific enrichment and community exposure- in addition to individual and group skill motivational training, the program bridges together: parents, area volunteers, local environmentalist groups and community organizations. Local private partnerships are invited to expand the support and scope of the programs? mission. The theme of Responsibility, Awareness, Research and Recreation (RARe) allows participants to visit parks, lakes and technology facilities exploring how the world we all live in works. As a community member and educator, there is desire from our youthto understand the world outside of their city streets. New York State is known for its green and resourceful landscapes, participants can visit places like Spafford forest, Pratt Falls Park, college and university labs, OCWA facilities, Erie Canal and Thts, parents would be encouraged to participate in some creative writing and team building activities. There is no doubt that parents are a key component to the success of our children, and their engagement and exposure increases parental involvement andfinal layout will include environmentalist and community input, however the current plan involves: creative writing, fishing and trail exploration, outdoor fitness, scientific research, capacity building and non-violent solutions. The overall vision of t
Onondaga	Young Entreprenuers' Alliance	$80,000	SED	Our primary goal is to introduce entrepreneurship as a viable career option to youth in inner-city communities, while building a unified network of up and coming entrepreneurs. One of the primary objectives of this movement is to develop a core group ofsuccessful younng entrepreneurs to serve as a model for their community, showing that education and business ownership are alternatives to drugs (sale or use) and other destructive behavior. Our mission is to provide youth with the opportunity to take part in economic revitalization of their community by introducing entrepreneurship while strengthening skills offered in the classroom such as Math, Social Studies, and English Languange Arts.

Onondaga	Syracuse Division bridge improvements	$4,000,000	Thruway	Dear Mr. Gilchrist, Attached is a copy of a letter that I sent to Senator Schumer and Rep. Maffei offering a pragmatic temporary solution to the lack of ""shovel ready"" projects. The discourse concerning infrastructure rebuilding/repairing is totally missing the public employee/in-house piece. As I stated in my brief letter, with funding I could increase employment and begin making capital improvements to bridge immediately. Of the 200 bridges in my bridge population apx. 40% could be significantly improved with in-house forces. This could fill in the gap while larger projects work their way through the design process. Any consideration of this approach would be appreciated. Daniel J. Markis,

Ontario	Cornell Ag Technology Farm, Ontario County, City of Geneva	$1,500,000	AGMKT	Cornell Ag Technology Farm, Ontario County, City of Geneva: The proposed project involves the completion of the water line loop in the Park. The line will open up opportunities for new development in the Park, including a new incubator complex and individual ag-related businesses. Development will be impeded until this is completed. This project is a cooperative effort among the State of New York, City of Geneva, Ontario County and Cornell University to leverage state and regional agriculture assets and technology-led economic development. The enhanced Research Park will spur technologies that can propel agriculture, food science and bio-based industries. As such it will create hundreds of permanent jobs over a period of years and construction jobs inthe short term. The Tech Farm is a not for profit agency. The project will create several hundred permanent jobs over a period of years, as well as construction jobs. Ag technology start-ups will be nurtured here with assistance from Cornell and the ne
Ontario	C. of Geneva Richards Park Neighborhood Revitalization	$650,000	CDBG	
Ontario	T. of Farmington Public Facility Program	$377,000	CDBG	
Ontario	V. of Naples Public Water Supply System Improvements	$600,000	CDBG	
Ontario	Geneva Community Center	$250,000	CDBG	The Boys & Girls Club of Geneva is building a community center that will be available for Club programs and programs of other organizations, including an after-school teen program and the Geneva Senior Citizens program. Construction began in July 2008 and is expected to be completed by July 2009 but additional funding is needed. Construction has employed many workers and suppliers, and the completed center will generate considerable employment as well. Four regional banks have participated in a short-term $2 million construction loan, and they are relying on successful completion of the project to be repaid. The local community, and New York State, have given as much as can be expected, and outside help is now needed.
Ontario	Renovation of Academic Space	$17,625,091	DASNY	Renovation of 50,000sf of vacated space from the move of Student Services to new building. Create music recording classrooms/labs, general purpose classrooms, offices, and science labs.

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Ontario	Student Services and Auditorium Building	$31,117,950	DASNY	75,000sf, 2 story building for student services (Bursar, Registrar, Financial Aid, Counciling Center, and Admissions), Student Life/Student Clubs and Student Association, 400 seat auditorium, bookstore, cafeteria and kitchen, as well as, student programmable space and loading dock with ancillary storage.
Ontario	Viticulture Building	$38,000	DASNY	Design and construct a building to house a new program in Viticulture. Provide space for lab and classrooms that will allow for hands on approach to growing grapes and processing crush.
Ontario	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the construction of two residences and the renovation of one day program in Canandaigua.
Ontario	Phase II - Renovation and Expansion of F. F. Thompson Hospital	$3,000,000	DASNY	Thompson Health is the parent organization of F. F. Thompson Hospital located in Canandaigua, New York, Ontario County. Thompson Health is applying for funding to expand, improve, and correct deficiencies in our laboratory, rehabilitation units, dietaryfacility, our operating rooms and ambulatory procedures unit. Many of these areas have not had any physical change in over thirty-five years. They are seriously undersized for the projected level of population growth and expanding tourist areas in Canandaigua. The area now served by F. F. Thompson Hospital is among the fastest growing geographical areas in the State of New York.
Ontario	State Street Stormwater Drainage	$350,000	DEC	This stormwater drainage construction will service the western end of State Street where there is no current drainage system. The project involves laying 1,200 feet of drainage from the outer edge of the west end of State Street, located in the Town of Farmington, into the Village of Manchester on State Street. This is necessary to prevent the inflow and infiltration of surface and ground water causing Wastewater Treatment Plant overflows during heavy rains and snowmelt and dangerous traffic conditions.This will be a cost savings to the Village of Manchester in terms of deterring street erosion due to surface water. Additional savings will be incurred by the prevention of exceeding SPDES permit limits, and possible fines. The work includes over 1200 feet of piping, 18 manholes, 15 drainage inlets, stone, fill, curbing and gutters, frames and grates, and labor.
Ontario	Crystal Beach Pavement & Drainage Project	$1,622,000	DEC	Crystal Beach Pavement & Drainage Project
Ontario	Shortsville Meadows II - 24 Units Affordable Rental Housing	$3,942,412	DHCR	
Ontario	Shortsville Meadows II	$4,121,693	DHCR	LIHTC 9%
Ontario	Victor Village Commons	$9,759,913	DHCR	LIHTC 9%

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Ontario	Electronic Medical Record expansion	$1,400,000	DOH	Thompson Health, Ontario County, requests funding to expand its Electronic Medical Record (EMR) capability and develop operational linkages with the Ontario County Fiber Optic Ring. Interoperability is the ability of different information technology systems and software applications to communicate, to exchange data accurately, effectively, and consistently, and to use the information that has been exchanged. In order to achieve interoperability, Thompson Health must upgrade and expand its information technology wide area network (WAN). Thompson?s current system, in addition to its advanced age and lack of vendor hardware/software support, will not provide the routing, throughput, and management capabilities necessary to meet the minimum requirements for bandwidth and connectivity, needed now and in the next five to seven years, to support rapidly increasing business needs for advancing computer systems networking and applications support. Thompson Health plans to replace equipment in its data center aing with the developing Greater Rochester Regional Health Information Organization (gRrhio) in collaboration with other regional healthcare providers. The Ontario County telecommunications initiative mission is to establish Ontario County as a world-clastechnology as a key focus, specifically developing a dark fiber ring as a backbone infrastructure, linking communities and supporting various last mile solutions in partnership with the telecom industry, healthcare, education, municipalities, businesses

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Ontario	County Road 16 (City of Canandaigua Line to Butler Road)Pavement Reha	$825,000	DOT	
Ontario	Church Street from the South Village Line to Rt 96 Reconstruction	$1,071,000	DOT	
Ontario	Upgrade WasteWater Treatment Plant	$6,000,000	EFC	Upgrade of Existing Waste Water Treatment Plant ? This sewer system services the Villages of Manchester and Shortsville, and a portion of the Town of Manchester, feeding the Manchester-Shortsville Joint Sewer WWTP, located on NYS Route 96, in the Villageof Manchester, Ontario County. This WWTP was built in 1984. While the treatment plant is well maintained and generally meets SPDES permit limits, this plant is 25 years old and requires frequent maintenance and upkeep. The project consists of: ? UpgradeExisting WWTP ? New Headworks Facility ? No increase in treatment capacity would be provided. ? Installation of New Pumping Station with self-priming pumps(with expansion capabilities) ? New Controls ? New Generator ? New Forcemain (in parallel with theexisting)
Ontario	Rushville Water System Improvement Project	$1,900,000	EFC	The Village of Rushville Water System Improvements Project will provide for a complete overhaul of the Village?s current method for retrieving and filtering its public water supply. The existing Water Pump Station would be demolished and a new buildingwith adequate space for new filtration, chlorination and zebra mussel control equipment would be constructed. This would provide for adequate space for handling and storing equipment and chemicals for all related site work. At such site modern-style pumps and an up-to-date filtration system would be installed. By constructing a new facility for retrieving water and moving its current filter plant to the same location as its pumping station, the Village of Rushville would comply with the requests of theNYS Department of Health and provide a better water supply to its customers. The primary concern with the Rushville Water System is that it has previously been in violation of State and Federal Regulations for exceeding the Maximum Contaminant Level forent capacity, filtering to waste capability, adequate backwash water holding and disposal, an emergency power source, automation of controls, security enhancements, a lavatory at the treatment plant, and improvements to the distribution system to increass. These improvements are deemed appropriate by the NYS Department of Health and are fully supported by its representatives. Currently the Village utilizes Canandaigua Lake at its sole source of water supply. The Village?s water supply was originally dev
Ontario	West Bloomfield Water Tank Painting	$100,000	EFC	300 water customers would have to each pay $333.00 to paint the tank. Work includes needed upgrades to be in compliance with the regulations. This would put a burden on the water customers any assistance would be appreciated.
Ontario	Naples Sewer System Construction	$14,500,000	EFC	Naples Sewer System Construction
Ontario	Flint Creek Sewer Line Construction	$8,400,000	EFC	Flint Creek Sewer Line Construction
Ontario	Honeoye Lake WWTP Building Upgrade	$850,000	EFC	Honeoye Lake WWTP Building Upgrade
Ontario	Sewer System Rehab @ Honeoye Creek	$620,000	EFC	Sewer System Rehab @ Honeoye Creek
Ontario	Canandaigua Lake Pump Station Upgrade	$1,900,000	EFC	Canandaigua Lake Pump Station Upgrade

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Ontario	Ontario County Sewer Line, Ontario County, Seneca Castle to City of Gene	$4,500,000	EFC	Ontario County Sewer Line, Ontario County, Seneca Castle to City of Geneva: This project will construct approximately 5 miles of sanitary sewer line from the regional landfill in Seneca Castle east to the City of Geneva Sewer Treatment Plant. This line will transport leachate from the landfill (currently being trucked to an STP). Along the 5 mile corridor it will also serve the residences, businesses and the Regional BOCES (vocational technical school) in this area. This includes a growing business district along Routes 5 and 20 west of the City of Geneva that needs this service. The project is already engineered, however, the County cannot bond for the funds because of inadequate cash flow needed to pay off the debt. There are environmental integrityissues that can be resolved as a result of the construction of the line. Permits are anticipated within the next 30 days. There will be a considerable number of construction jobs created by the activity over a period of months, as well as the opportunitnment by eliminating failing septic systems and allowing a more cost effective way of disposing of the leachate at the landfill
Ontario	Canandaigua Regional Water Supply, Ontario County, City of Canandaigua	$3,000,000	EFC	Canandaigua Regional Water Supply, Ontario County, City of Canandaigua and surrounding communities: The project includes the construction of a new 4.5 million gallon water supply storage system and a smaller tank. The system is owned by the City of Canandaigua and serves the entire City, plus water districts and surrounding communities. This includes 50,000 people and many industries and businesses. In fact, most of the major Ontario County employers are served by the system. The NYS Health Dept. as notified the City that they are in violation of health code regulations due to the age and deterioration of the existing system. The project is engineered, has its permits and is ready to bid out. However, due to the financial crisis the City has found it difficult to obain affordable financing. This water supply needs to be improved to serve the RegionÆs residents and business- from both a health standpoint, as well as reliable supply. With many of the largest employers being served by the Supply, thisuse the City is the sole provider of water to this area, it is critical to economic lifeblood of the region. The financial crisis has negatively impacted the City's ability to finance this project at competitive rates.
Ontario	Lakeshore Drive Infrastructure Improvements, Ontario County, City of Cana	$3,000,000	EFC	Lakeshore Drive Infrastructure Improvements, Ontario County, City of Canandaigua: The proposed project include the installation of water and sewer lines on a large site at the north end of Canandaigua Lake in the City of Canandaigua. This blighted and underutilized area will be the location of a new planned mixed use development that will include housing, small shops, restaurants and recreation facilities. The project will remove the blight from this attractive lakeside parcel of land and create an attractive mixed use development that will add several hundred permanent jobs, as well as construction employment. By improving access and utilites in this area, adjacent parcels will also be enhanced and become more attractive for new quality/upscale development (e.g. for hotels, etc.). Of course all of this will add considerable real property tax revenues, sales tax and other economic benefits to the City and County. This project will enhance tourism and local economic development prospects in the City
Ontario	Glacier Lakes Resort Indoor Water World & Conference Center	$42,500,000	ESD	70,000 square ft. indoor water world, 275 upscale hotel rooms, 5000 square ft. arcade, 2 restaurants, 32,000 square ft. conference center, 100 room Hampton Inn hotel, outside swimming pool & 1,800 construction jobs for 20 months

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Ontario	Old Firehouse Re-Use, Ontario County, City of Geneva	$3,100,000	ESD	Old Firehouse Re-Use, Ontario County, City of Geneva: This project will rehabilitate the former firehouse in downtown Geneva, near the City Office Building. The City is cramped for space and this building would allow City offices to be located here, as well as a City Council meeting location and other public functions. Currently these activities are spread out and there are considerable operational inefficiencies. Also by bringining these offices, and the associated employment, into the central businessdistict there would be an improvement to the local economy (e.g. shopping, restaurants, offices, etc.). The project includes the installation of an elevator, general construction, window and heating improvements, etc. The project will be a model for combining historic preservation with green technology and energy efficiency applications. It is anticipated that there would be construction jobs over an 18 to 24 month period. The project is ready to go and will create both direct permanent jobs, as wellof historic preservation, environmentally friendly practices, and construction techniques using green technologies and energy efficiencies. This project is important to the downtown City revitalization efforts. Additionally the City does not have the fut at this time. Both direct and indirect permanent jobs will be created in downtown, as well as the construction jobs.
Ontario	OEO Site, Ontario County, City of Geneva	$1,000,000	ESD	OEO Site, Ontario County, City of Geneva: The OEO is a City-owned vacant and deteriorated site on South Exchange St in downtown Geneva, NY. It is immediately adjacent to the central business district and has attractive views of Seneca Lake. The project would make the site shovel-ready for construction of a hotel or mixed used facility involving market rate housing and commerical/office space. This site is a key location not only because of its business district location but also because of its proximityto the recreational attractions of the Lake and Hobart and William Smith College. However, in order for private developers to become interested, there is a need for the funding to shore up the retaining wall, remove on-site conrete foundations/pads, improve access with drives and curb cuts and install other infrastructure. The project will prepare a site for development that has considerable marketing advantages. It will greatly enhance the central business district improvement efforts and stimulate oation efforts of this part of the City central business district (currently blighted). The project is ready to go. There is development potential only if the City makes the site shovel-ready. Revenues to the City are much-needed (real property taxes, sal. It is anticipated that the project will create 50 new jobs and a $15 million investment. Of course construction jobs would also be created and much needed real property taxes generated for the City.
Ontario	Labelon Building Restoration, Ontario County, City of Canandaigua	$7,000,000	ESD	Labelon Building Restoration, Ontario County, City of Canandaigua: The propsed project will rehabilitate the blighted 63,000 sq. ft. Labelon Building in downtown Canandaigua, making the site ready for new development opportunities. The building has beenvacant for the past 5 years and the current owner has mixed use development plans, including 5,000 sq. ft. of retail, 20,000 sq. ft. of office, 33 residential units and parking. With this redevelopment, the building would become the largest downtown tenant involving both residential and commerical uses. In turn, it would spur investment throughout the entire central business district. Remove a blighted influence on downtown Canandaigua. Spur new development and businesses in downtown Canandaigua. Theproject will create approximately 100 permanent jobs as part of the retail, office and residential activities in the building. Of course there will be short term construction jobs. The project will also breath new life into the central business district

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Ontario	Wilcos Lane Sr. Citizens Housing Co., Inc.	$641,025	NYSERDA	Replace existing 33,300 square foot single ply roof that has begun to leak with a modified bitumen system that has a 30 year guaranty and will provide substantial enegy savings.
Ontario	regional fiber optic broadband infrastructure	$5,000,000	OFT	Ontario County created Finger Lakes Regional Telecommunications Develoopment Corp. for single purpose to build 188 mile, 144 strand, universal service provider access fiber ring. Connects all gov'ts, schools, hospitals, emergency services, industrial sites. Overcomes digital divide, will serve parts of yates and wayne counties and is key part of ontario county officially adopted economic development strategic plan.
Ontario	Emergency Communication System	$18,000,000	OFT	Emergency Communication System
Ontario	Fiber Optics Broadband Infrastructure	$5,000,000	OFT	Fiber Optics Broadband Infrastructure
Ontario	Ontario County Broadband Network, Ontario County, Multiple Municipalities	$5,000,000	OFT	Ontario County Broadband Network, Ontario County, Multiple Municipalities: Ontario County has engineered and initiated a broadband ring in both rural and suburban parts of the County. To date they have constructed 40 miles, with another 120 miles remaining. The ring will serve un-served and under-served residents and businesses in the County. The County envisions that the project will greatly enhance economic opportunity, business expansion efforts, new job development and access to public services. From an economic development perspective, this will occur at both existing businesses, as well as new small and large comanies that are contemplating opening operations in Ontario County. Connecting this un-served and under-served County to the Global Economy. Creation of thousands of permanent jobs over a period of years. Improve the regionÆs attractiveness to national and international companies. Enhance the other competitive advantages of the region Economic development opportunities will not continud expanding micro-electromechanical companies, could easily locate here and take advantage of the new broadband capabilities. Thus there will be thousands of new permanent jobs resulting from its implementation over a period of years. Of course there wiluction jobs required to install the ring. Additionally the system is being designed so that service can be extended to outlying areas in Wayne and Yates Counties. The system in engineered and ready to construct.
Ontario	Fire Station 2 addition	$3,000,000	OHS	15,500 sq ft addition to an inadequate existing sub-station in a growing fire protection district. Plan is for improved emergency response (for both time and equipment), for improved retention and recruitment of volunteer firefighters & EMS personnel.
Ontario	Ontario County Youth Court	$50,000	OHS	Youth Court is a community solution to juvenile crime that allows immediate consequences for first time youthful offenders. Peer imposed sanctions allow defendants to be held accountable, make amends and develop the competencies required to become productive members of the community. Volunteers are given the opportunity to actively participate in the local decision-making process and to gain knowledge of the criminal and legal systems in NYS. They also gain leadershipand conflict resolution skills whileexploring new career paths. Ontario County YC has been in operation for 8 years, hearing over 300 cases and educating over 300 volunteers. Thanks to community support and in-kind donations (training, courtroom, office space, etc.) the program can boastan excellent recividism rate for first-time offenders. This year YC will hear 50 cases, 46 of those will complete the program successfully and significantly reduce risk factors. 70 Volunteers will benefit by developing increased respect for the law and c
Ontario	Parks Project Gannett Hill	$273,000	OPRHP	Parks Project Gannett Hill
Ontario	Parks Project Grimes Glen	$266,000	OPRHP	Parks Project Grimes Glen
Ontario	Canandaigua City Schools, Primary School	$1,183,450	SED

Ontario	Finger Lakes CC, Extend Electric to Score Boards/Fields	$25,000	SUNY_CC	
Ontario	Finger Lakes CC, Variable Speed Drive replacement	$35,200	SUNY_CC	
Ontario	Finger Lakes CC, Locker Room Renovation - Design	$50,000	SUNY_CC	
Ontario	Finger Lakes CC, Seal Exterior - front of building	$105,000	SUNY_CC	
Ontario	Finger Lakes CC, Geneva Campus Center Building	$12,000,000	SUNY_CC	
Ontario	4th Floor Rest Room Upgrades	$34,000	SUNY_CC	Current Rest rooms do not meet ADA standards and are the only facilities on the 4th floor. Facilities are 40 years old and falling apart. Energy efficient faucets, commodes, hand driers and urinals are required to be in allaignment with energy efficientguidelines or standards.
Ontario	D2 Unit Movement Structural Study	$33,000	SUNY_CC	Requires drilling into existing slab of 2 lecture halls and one projector space to investigate why the concrete structure is moving/bucking or shifting - it will also aid in determining why one elevator is not operating in this area. Water mitigation isexpected and structural reinforcement is to be determined.
Ontario, Seneca	Seneca AgBio Green Energy Park	$50,000,000	ESD	On behalf of the Town of Romulus, David Kaiser - Supervisor, I would like to introduce a shovel-ready, fully designed construction project that involves 2 active businesses operating at the former Seneca Army Depot, Seneca BioEnergy, LLC and Top QualityHay Processors, LLC, whereas both of our companies have been restoring former warehouse buildings using private equity investment and supported by Restore NY infrastructure grants during 2007-2008. Seneca BioEnergy acquired the 55-acre site with 2 buildings 400,000sf and 3500feet dedicated rail spur along Route 96 in Romulus, Seneca County from the County IDA and military in 2008, and we have been rehabbing the buildings for expanded utilities, readying the site for installation of an agricultural processing and biodiesel plant. This shovel-ready project is ""Seneca AgBio Green Energy Park"", and we attracted the first tenant, Top Quality Hay Processors, who have an innovative hay drying system that is being installed at the building. Between the 2lines for hay drying. These agri-businesses and renewable energy production businesses will generate over $160Million annual revenues, support regional agriculture and renewable energy production, and generate over 200 high-wage manufacturing jobs. Thesported by the Town of Romulus, the Seneca County IDA, the ESDC and Senator Nozzolio, and we are committed to construction and full-scale operation of the completely designed and permitted facility within 15 months from funding infusion. The Seneca AgBio

County	Project	Requested $	State Agency	Additional Detail
Ontario, Seneca	Technology Farm	$2,500,000	ESD	Requested working capital and to secure the long term viability of the Park. The funds would allow us to continue operations and move forward with plans to add pilot production space in the proposed Flinger Lakes Food Innovation Center.
Ontario, Seneca	Technology Farm	$2,500,000	ESD	Requested working capital and to secure the long term viability of the Park. The funds would allow us to continue operations and move forward with plans to add pilot production space in the proposed Flinger Lakes Food Innovation Center.
Ontario, Seneca	NY Rural Residential and Commercial Renewable Energy And Conservatio	$10,000,000	NYPA	Funding to support grants to New York States rural electric cooperative customers to improve energy system reliability and security, reduce energy cost burden to low income households, mitigate environmental and health impacts of energy use, support of emerging technologies. This program already exists with NYSERDA but is not available to NY rural electric cooperatives.
Orange	City of Goshen Sewer Project	$40,000	CDBG	Evaluate and repair sewer pipes in the City of Goshen.
Orange	Water Related Project RR4	$500,000	CDBG	Repaint and upgrade of Mountain Avenue. 1,000,000 gallon water storage tank
Orange	Water Related Project RR4	$500,000	CDBG	Replace and service inoperable valves, potentially a safety and health issue (Requires budgeting for several years)
Orange	Municipal Vehicles Parking Lot	$500,000	DASNY	Municipal Vehicles Parking Lot
Orange	Aquinas Dining Hall Expansion and Renovation	$1,000,000	DASNY	Enlarge and upgrade our existing Campus Dining Room to accommodate growth in our residence population. Enlarge the Dining Room by several thousand square feet by expanding into adjacent facilities next to the Dining Room. Then the complete dining areaneeds new fllors, ceilings, lights, windows, and HVAC system. Also new tables and chairs will be provided where needed and painting and decorations.
Orange	Aquinas Theater Renovations	$2,820,000	DASNY	In existing Aquinas Hall Theater remove asbestos where necessary, replace floor, seating, upgrade lighting ans sound system, update HVAC system and make interior renovtions to update a 1,100 seat theater built in 1962 to 2010 standards.
Orange	CC 35 Elmwood	$4,000,000	DASNY	This is a complete Gut and Rehab of a student residence facility built in 1950 for approximately 50 people. The project will include a state of the art fire alarm and fire sprinkler system, wireless computer network and solar panels providing some of the electric needs.
Orange	Dominican Field	$750,000	DASNY	Renovate an unused old field-hockey field into a NCAA Soccer and Lacrosse Field. Expand and regrade the field to 345' X 210' and build retaining walls. Install: stairs, bleacher area, walking track around the field, fencing, storm drainage, irrigationsystem and needed electrical work for score board and sound system.
Orange	Garden Apartment Renovatons	$600,000	DASNY	Renovate Garden Apartment Residence Area to house 65-75 resident students. Install a fire sprinkler system, add and renovate bathrooms and install appropriate access control devises and CATV.
Orange	Turf Kaplan Field	$1,250,000	DASNY	Installation of a synthetic field in our existing Kaplan Field complex. This complex is used for Women's Softball, Soccer and Lacrosse and Men's Soccer and Lacrosse. Also the College's intramural sports program would utilize this facility. Excavate toproper grade and remove topsoil. Installation of filter fabric membrane. Laser grade entire sub-base for proper drainage and pitch. Install synthetic turf and in-lay sports lines.
Orange	Town Hall and Court Building for Town of Monroe	$6,000,000	DASNY	Town of Monroe needs a new Town Hall and Court Building.
Orange	Mount Saint Mary College renovation projects	$10,416,000	DASNY	modernization and/or renovation of CC 35 Elmwood, Dominican Field, Aquinas Dining Hall, Garden Apartment Residences, Aquinas Hall Theater and Turf Kaplan field
Orange	Greater Hudson Valley Family Health Center, Inc.	$14,000,000	DASNY	Construct a new facility for primary care

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Orange	Middletown Community Health Center	$500,000	DASNY	Pine Bush, United Community Health Center Facility Expansion
Orange	St. Anthony's Community Hospital Renovation	$1,425,000	DASNY	At the Warwick Healthcare Campus, Bon Secours provides acute care hospital services in St. Anthony Community Hospital, a building that needs significant work. In particular, sue to the fact that approximately 95% of the building ranges in age from 40 to100 years old, there is a significant opportunity to improve energy efficiency. We propose to install an External Insulating Facing System (EFIS) which will dramatically reduce the amount energy required to heat and cool the building. This will also provide a modern and attractive appearance for this facility and will add many years to the useful life of the structure. We will also replace windows in some portions of the facility to significantly improve energy efficiency throughout the year. The cost of this upgrade will be $1,425,000.
Orange	Highway Maintenance/Operations Building	$1,150,000	DASNY	Construction of a Highway Department Maintenance/Operations Building to increase the Town's capabilities including maintenance of the recently storm water management facilities being constructed as part of new larger residential subdivisions.
Orange	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of one residence in Bullville.
Orange	Public Safety Command Center	$1,500,000	DCJS	Construct building and garage, install security cameras in all public buildings
Orange	Village of Highland Falls	$140,000	DCJS	Closed circuit television system and live scan fingerprint system for the police department
Orange	Town of New Windsor	$2,800,000	DCJS	renovation of an army reserve center at stewart airport to house a new police headquarters and for use and a mid-hudson Police academy
Orange	Town of Warwick Police Department staffing and equipment	$0	DCJS	Hire seven full time police officers. Purchase license plate readers and live scan fingerprint systems.
Orange	Water Related Project RR5	$30,000,000	DEC	Increase the Shawangunk Dams Height by ten feet
Orange	Browns Pond Dam	$2,800,000	DEC	Browns Pond Dam
Orange	The NY Highlands Conservation Program	$125,000	DEC	The NY Highlands conservation project seeks to restore habitats across the NY Highlands in order to increase biodiversity, combat invasive species, and protect habitat for rare and endangered species. If funded, we will hire a full-time assistant, fund the Assistant Director's position, and fund the GIS Director's position for one year in order to remove 100 acres of invasive Phragmites from high resource value wetlands in the NY Highlands. We will also survey all of Harriman State Park (55,000 acres) for endangered Golden Winged Warbler and restore critical nesting habitats within Park boundaries to increase population numbers. Finally, we will use any influx of State funds to leverage additionally sources of funding for future efforts and to stabilize our current budget.

Orange	Intergrating Brownfeild Redevelopment and Biomass Recycling to Create a	$10,000,000	DEC	A Concept Proposal for Integrating Brownfield Redevelopment and Biomass Recycling to Create a Sustainable Revenue Stream for CAAs To Carry Out Their Anti-Property Mission. Increasingly, the common vision and purpose for the hard and important work of addressing the causes and symptoms of poverty is sustainable community development. What is sustainable community development? Let's start with a definition to build upon from President Clinton's Council on Sustainable Development: ""Sustainable communitiesare those communities which support the dignity of families and individuals and in which the quality of life is renewed and enhanced within the context of responsible environmental practice through collective decision-making and action. Sustainable communities depend on the existence of a social infrastructure which provides for the basic needs of shelter, jobs, income, health, education and social support."" The concept and practice of sustainable community development is unique in that it provides aent for Community Action Agencies because here is a revolution under way - a green revolution. CAAs can ride the wave of this revolution to better fulfill their mission as anti-poverty agencies. How? CAAs can reinvent themselves as sustainable communitytions. One very tangible pathway for CAAs to realize themselves as sustainable community organizations is to redevelop brownfields and vacant lands. Brownfields are usually defined as contaminated, abandoned or underused industrial or commercial properti
Orange	David Moore Heights II - 20 Units Affordable Rental Housing	$4,371,315	DHCR	
Orange	Aishes Chayil Affordable Rental Housing	$2,700,000	DHCR	Construction of 36 affordable rental units
Orange	David Moore Heights II	$4,273,494	DHCR	LIHTC 9%
Orange	Greenwood Lake Water Storage Tank Renovation	$245,000	DHCR	The Village needs to renovate their 200,000 gallon water storage tank, which needs to be reinforced and repainted. We have submitted an application for DWSRFs, but were told that it was a low priority project. We were hoping this might fall under anothercategory for stimulus funding.
Orange	HIGHLANDS (T) WD #2 Phase 2 to provide source water.	$4,748,700	DOH	
Orange	Hudson Valley Rehabilitation and Adult Care	$30,000,000	DOH	Ground up construction of a desperately needed Adult Day Care facility. 350 Bed full time adult care, day care for physically impaired, and physical rehabilitation along with additional forms of rehabilitation. Currently in Orange County we have insuffic
Orange	Safe Routes to School	$450,000	DOH	Construction of pedestrian trails to improve safety for school children
Orange	Women's Services Center Expansion	$2,250,000	DOH	Construct an addition to an existing Women's Services Campus. The expansion will consist of nursery & feeding area, 18-bed wing and medical arts area

County	Project	Requested $	State Agency	Additional Detail
Orange	Cody Sewer Project	$1,908,000	EFC	Build nearly 4,000 linear feet of new sewer line that will serve the New York State Police Troop F, Zone 2, Monroe Barracks, several school buildings, and residences along Orange County Route 105.
Orange	Wasterwater Treatment	$800,000	EFC	Wasterwater Treatment
Orange	replacement and connections of waterline - water district 8	$1,000,000	EFC	replacement and connections of waterline - water district 8
Orange	Wickham Well Treatment Building	$0	EFC	Wickham Well Treatment Building
Orange	Hidden Valley Sewer Treatment Plant Rebuild	$1,600,000	EFC	The exsiting WWTF, constructed in 1970 is under a consent order from NYSDEC and in imminent danger of collapse. The cost of reconstruction is $1.4 million plus additional expenses for legal fees, engineering, and change orders. This plant presently services 100 homes, the majority of the residents are NYC police and firemen. The Town of Mount Hope is a small municipality with no rateable tax base. We are hosts to a State and Federal prison which are tax exempt. The reconstruction would increase mortgagecosts and put many of them in danger of losing thier homes.
Orange	Waste Water Related Project RR2	$30,000,000	EFC	Upgrade and Expand the Waste Water Treatment Plant
Orange	Waste Water Related Project RR2	$2,000,000	EFC	Upgrade and replace sewer lines in the vicinity of Sterling Street and along the Monhagen Brook
Orange	Waste Water Related Project RR5	$4,000,000	EFC	sanitary sewer replacement projects that are needed throughout the City to replace old ones
Orange	Water Related Project RR1	$18,000,000	EFC	New 5.1 Million gallon per day Water Treatment Plant
Orange	Water Related Project RR2	$1,500,000	EFC	Water Main extension, County Rte. 78. Provide for alternate water feed route to the City of Middletown
Orange	Water Related Project RR4	$1,500,000	EFC	Mill Pond Dam Reconstruction and Pump Station: Replace old dam what was ordered drained. Reconstruct new one to include provisions for pumping excess water into city owned reservoirs.
Orange	Water Related Project RR4	$9,000,000	EFC	Upgrade and replacement of the City's raw water lines
Orange	Water Related Project RR4	$500,000	EFC	Repaint and upgrade of Amchir Water Storage Tank
Orange	Water Related Project RR4	$700,000	EFC	Construct new finished water ""Two Million Gallons"" Water Storage
Orange	Water Related Project RR5	$1,000,000	EFC	Ground Water exploration and development
Orange	Sanitary Sewer Upgrades - Pump Stations	$0	EFC	Sanitary Sewer Upgrades - Pump Stations
Orange	Sewer Treatment Plant Gravity/Sludge Belt Replacement	$0	EFC	Sewer Treatment Plant Gravity/Sludge Belt Replacement
Orange	Waterfront Infrastructure Reconstuction	$0	EFC	Waterfront Infrastructure Reconstuction
Orange	Sewer District No.1 Gravity Interceptor Capacity Improvements	$700,000	EFC	The replacement of sanitary sewer pipe deemed structurally unsound, lining of pipe experiencing infilitration, pipe bursting to increase pipe diameters in areas where pipe is not sufficiently sized to carry existing and anticipated future flow, manhole replacement and repair, and drainage pipe installation to allow inflow to be safely conveyed to surface outlets.
Orange	Shore Road Sewage Treatment Plant Improvements	$1,346,000	EFC	The WWTP components have been in operable use for over 30 years and are in need of major rehabilitation. A defined and vigorous maintenance program have kept many of the treatment units in operable condition; however, there are some remaining componentswhich, due to their age, the difficulties in obtaining repair or replacement parts, and the fact that units have exceeded their useful operational life, and are in need of complete replacement. As well, portions of the plant structure are in need of major repair or reconstruction.
Orange	CLFP - GREENSAND FILTRATION	$2,750,000	EFC	INSTALLATION OF THREE 10 FOOT DIAMETER GREENSAND FILTERS FOR MANGANESE REMOVAL. INCLUDES NEW BUILDING TO HOUSE FILTERS, ASSOCIATED ELECTRICAL, MECHANICAL, HV, AND UNDERGROUND PIPING.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Orange	RT 9W WATER MAIN REPLACEMENT	$700,000	EFC	AN EXPOSED 12 INCH DIAMETER STEEL WATER MAIN HAS DETERIORATED DUE TO EXPOSURE TO SALT/SAND FROM NYSDOT SNOW PLOWING. MAIN IS PRIMARY WATER SUPPLY TO DANSKAMMER POWER GENERATION PLANT. PROPOSED TO INSTALL A NEW 12 INCH WM ON OPPOSITE SIDE OF ROAD.
Orange	Water System Improvements	$2,000,000	EFC	Project involves placing three new wells (drilled & tested) in service and includes the pumps. controls, meter/treatment structure, state and county highway crossings, 11,000 feet of ductile iron water main and tie-ins to existing distribution system. (This corrects error on prior form; wrong subcatagory listed.)
Orange	Tappan I/I Project	$1,000,000	EFC	The proposed project is in response to the New York State Department of Environmental Conservation requiring that the Town investigate and correct infiltration and inflow into their sewer system. The extraneous groundwater and stormwater flows are overloading the wastewater treatment plant. The sewer system has been investigated using closed circuit television equipment. Approximately 5,000 feet of sewermain and associated manholes need to be replaced to mitigate the infiltration and inflow and protectthe sewer plant and associated receiving team.
Orange	Orange and Rockland Well Project	$2,000,000	EFC	The Village of South Blooming Grove is proposing the construction of a new well and watermain to serve consolidated water district 1 in the Village. The well is known as the Orange and Rockland well. The well has been constructed and tested. The work tobe completed includes the construction of a wellhouse, controls and treatment system along with approximately 10,000 feet of transmission main along NYS Rt 208 to the existing distribution system located at the intersection of Duelk Ave and Rt 208. The well and distribution main will provide much needed water to the Village residents.
Orange	Walton Lake Infrastructure Rehabilitation	$7,800,000	EFC	Walton Lake is a residential community in the Town of Chester that has substantial infrastructure failures. The community was developed in the 1950?s. There are constant failures of the waterlines, the sewer system has substantial infiltration and inflow, the well water has elevated levels of chlorides that requires treatment, there is inadequate water storage for fire protection and the pressurized water system repeatedly fails leaving the residents without water. The Town is proposing to implement thefollowing rehabilitation program: A. Replacement of 11,000 feet of watermain and associated valves for hydrants and water services. B. Installation of 500,000 gallon water storage tank to provide for fire protection C. Replacement of 11,000 feet of sewerline, manholes and sewer laterals to eliminate extraneous infiltration and inflow. D. Reclamation and restoration of the roads. E. Rehabilitation of the water pump- station F. Treatment for the elevated chlorides in the raw water. The Walton Lake infrasject cost is $7.8 million dollars.

County	Project	Requested $	State Agency	Additional Detail
Orange	Walton Lake Water Filtration Plant Upgrade	$1,300,000	EFC	The work proposed involves multiple improvements to the Walton Lake Filtration Plant. In general, these improvements include replacement of the existing flocculator tanks to chemical contact tanks, replacement of the settler/filter tanks with two Pall ARIA AP-4 Packaged Microfiltration Systems with, removal of backwash pumps, replacement of air actuated control valves throughout the plant, new plant blowers, replacement of plant control equipment for enhanced automatic operational functions, improved monitoring equipment for local and remote monitoring of operations, upgrade of electrical service and distribution system of the plant (with automatic standby generator), and removal of backwash and overflow piping from the clearwell area, structural/architectural maintenance to the pump room roof and walls, construction of an office/control room area within the plant building, and other miscellaneous non-process work. Capacity of the plant will be increased such that each Pall Microfiltration system willanufacturer of the proposed filtration equipment. The manufacturer has provided technical support for the AP Package Micro-filtration System. The unit configurations reflect standard manufacturer designs which are in use throughout New York State, and arextent, pre-designed proprietary configurations.
Orange	Contractor ,Renovation	$500,000	EFC	My company want to be able to bid or how ever they plan to destrib the work for the local projects for the new york areas county and state level. We are in Construction

County	Project	Requested $	State Agency	Additional Detail
Orange	Orange County Energy Investment Project	$750,000	NYSERDA	Federal funds to be used to subsidise (based on individual need) building envelope insulation upgrades and heating equipment efficiency upgrades for approximately 250 low income homes in the Orange county area. Expected outcomes are as follows: 1. Reduced energy costs for the affected homeowners which will reduce household budget and ultimately reduce forclosure rates in the area 2. Reduction of demand on local power / fuel supply grids as a direct result of the energy improvements made. 3. Creation / retainment of local jobs The project can easily be expanded to other areas of the state thus multiplying the reductiion in energy requirements and the increase in job creation.
Orange	Expanded Infant & Toddler Child Development & Family Support Center	$12,000,000	OCFS	Through a generous planning grant from the Office of Community Services at the U.S. Department of Health and Human Services, NCAC, Inc. has developed a strategic plan for overcoming poverty in the Newburgh area. The plan includes three main initiatives:Actions to support employment opportunities,? Strategies to create opportunities for low-income families to purchase homes, and? Initiatives to provide for quality child development programming.? This Plan describes one aspect of NCAC, Inc.?s three-part plan to impact poverty in the Newburgh community: an expanded infant/toddler services delivery model. The services offered by this model will provide quality child development programming through a Child Development Center, a Home Visitor program, anda Medical Community Involvement component. As part of its larger three-part plan, NCAC, Inc. will develop green businesses that will employ Newburgh area residents. In line with this sustainable approach to ending poverty, NCAC, Inc.?s Child Developmentld-care services to Newburgh?s at-risk families. NCAC, Inc. has developed an expanded infant and toddler child care and family support delivery service model to promote early childhood development among area families. The service model focuses on quality-quality early childhood education. The program seeks to accomplish the following objectives for the Newburgh community and beyond. To promote the social, emotional, mental, and physical health of parent(s) and their young children.? To support strong,
Orange	www.statewidemediaproject.org	$75,000	OFT	Providing live and archived coverage of government and other public meetings on the Internet via a dedicated website -- www.statewidemediaproject.org, as a means pf providing open government to the taxpayers.
Orange	Monroe Police Dept.	$425,000	OFT	This project includes the purchase ofLive Scan digital fingerprint technology and closed circuit TVs. It would also fund two additional officers for a three year period.
Orange	Office Equipment	$14,000	OFT	$9,000 to purchase and install new computer server, $3,500 to purchase a digital recording camera and microphone system, $1,500 to purchase a computer for archival storage and retrieval.
Orange	Fire House Addition	$2,500,000	OHS	Rebuld and add on to our firehouse due to out growing it with more and larger equipment ,as the district grows.We have run out of room.
Orange	Firehouse Addition	$360,000	OHS	Addition needed to improve safety for firefighters and movement of rescue vehicles in very tight quarters, when responding to emergency calls
Orange	Pine Island Fire District New Firehouse	$500,000	OHS	The Pine Island Fire District is currently in the process of building a new firehouse.The money that we are requesting will help the entire Pine Island Fire District.The new firehouse is about 12000sq/ft.The taxpayers of the fire district have already approved of the constuction of this new firehouse.The amount of money we are asking for will be greatly appreciated and will help take some of the burden away from our district
Orange	UPGRADE TO CODE ADA	$1,500	OHS	up grade firehouse to meet ada rules and regulations. also to make it more energy efficent.

County	Project	Requested $	State Agency	Additional Detail
Orange	Education and Community Center	$3,000,000	SED	The Neversink Valley Area Museum is requesting economic stimulus funds for a new Education and Community Center Building. Our project is important and worthy of receiving these funds because it will: a) Provide jobs: to local builders and other tradesmenduring construction, and afterwards, the museum will hire additional staff once the building is fully opened. b) Environmentally sound: our new building will be designed green. The historic buildings we currently inhabit are very energy inefficient, butas historic buildings, we cannot replace windows, etc. Our new building will enable us to use the current buildings less, thus replacing our carbon footprint c) Help the local economy: our new Education and Community Center will encourage more visitorsto our rural area, thus improving the economy of the Town of Deerpark. Each $3.00 admission to the museum is actually a $25.00 or more contribution to the local economy for day trips and $75.00 per person for overnight trips. The museum?s expanded lecture the budget of the Town of Deerpark, by providing important tax revenue. d) Educate: The Neversink Valley Area Museum is a museum of local history that has created exhibits with museums in Germany and the New York State Museum and has annual new exhibitnewly created Institute for Early Film Studies, which explores the culture and technology created at the turn of the 20th century by DW Griffith and others. Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Orleans	Hoffman Road Industrial Site, Orleans County, Town of Shelby	$1,000,000	DOT	Hoffman Road Industrial Site, Orleans County, Town of Shelby: This industrial site is located on Hoffman Rd. in the Town of Shelby on the western side of the County. The project involves the construction of access roads, water, sewer, electric, natural gas telecom and rail. Currrently there is active interest from a large steel manufacturer to construct a new plant here that would manufacture reinforcing rods. The project would create 200 new jobs initially and 300 over time. The average wage would be $50,000 per year. It would also create $200 million worth of investment. The site is logistically superior for a number of reasons, including access to the Buffalo and Niagara Falls area, good utilities (incuding a substation that can provide considerable electricity), a rail connection, etc. It also falls inside the NYS hydro power area where a company might receive an allocation. The project is worth supporting for a variety of reasons including the need to make it shovel-ready for the existing steelignificant capacity, other utilities, a short line rail connection, etc. The IDA does not have the funding necessary to implement the project. The project is ready to go.
Orleans	Infiltration & Inflow Correction, Sewer Rehab	$2,600,000	EFC	
Orleans	Treatment Plant Rehab	$2,500,000	EFC	
Orleans	Public Water Connection Project	$100,000	EFC	The Town of Ridgeway is seeking assistance to provide funding to enable 40 low and moderate income households to connect to the TownÆs existing public water system. Most residents dependent on on-site private supplies suffer serious public health concern
Orleans	Public Water Connection Project	$125,000	EFC	The Town of Albion is seeking assistance to provide funding to enable 50 low and moderate income households to connect to the TownÆs existing public water system. Most residents dependent on on-site private supplies suffer serious public health concerns.
Orleans	Gwinn St. Reconstruction	$1,325,000	EFC	Seperate the combined sanitary sewer system into sanitary only and storm only. Re-construct and widen the existing street to better accomidate school bus traffic, Install sidewalk for children walking to the school.
Orleans	Water System Improvements Water District No. 15	$600,000	EFC	The Town of Murray is requesting funding to provide a reliable supply of quality water to serve an area designated as Water District No. 15. Residents in this area are dependent upon inadequate water supplies. The project will correct serious public health problems caused by extreme shortages of quality water produced by individual wells in this area. Additional concern is raised for the health of local residents in that the area is not served by public sanitary sewers and there is evidence of significant infiltration of coliform bacteria from septic systems and other contaminants into private wells.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Orleans	Medina Business Park, Orleans County, Medina	$150,000	EFC	Medina Business Park, Orleans County, Medina: The proposed project includes installation and upgrades to 500 ft. of water and sewer lines. The Orleans County IDA owns this 150 acre Park. While there are two industries located here, the Park is still notcompletely shovel ready. There are various strategic advantages to the Park including: its proximity to the State's hydro allocation area, redundant electric service, access to all utilities from the Village (e.g. water, sewer, etc), and a superior watersupply (excellent location for food processing). It is envisioned that there will be 300 new permanent jobs created here at build-out of the Park. Of course there will be construction jobs created as part of the infrastructure installation. The projectis ready to go The IDA does not have adequate financing to allow them to install the needed water and sewer lines and upgrades. As a result, the Park is not shovel ready and this is impeding its marketability to expanding companies. The Park has numerouis important to Orleans County and the Region for several reasons, including: the lack of funds from the IDA (to complete the project), the inherent advantages/marketability of the site, and the fact that it is engineered and ready to go.
Orleans	Holley Business Park, Orleans County, Holley	$200,000	EFC	Holley Business Park, Orleans County, Holley: The Holley Business Park is an existing industrial park in the Village of Holley, NY. The project includes the installation and upgrade of water lines in the Park to accommodate fire protection and supply. Without this the Park is deficient and is not marketable to expanding companies. There would be 2000 ft. of water line construction. There are 3 companies in the Park but they are also at risk due to this deficiency. They currently employ 175 jobs that thecommunity does not want to lose. Additionally the project would open up sites in the Park to new development. A Canadian company is currently looking at the Park, however, the water improvements need to be made first. There will be approximately 200 newpermanent jobs when the new sites are occupied. The project is necessary in order to insure fire protection for the 3 existing companies in the Park and also to make it marketable for new companies looking at it as a possible expansion location. The prmunicipal electricity. The Seneca County IDA is the owner. There are a variety of reasons that the project should be implemented including: the need to retain the existing 3 companies that employ 175 jobs now, the need to make the rest of the park markcompanies, the opportunity to create 200 new permanent jobs and the fact that it is ready to go. Additionally, the IDA does not have the funds needed to implement the project.
Orleans	Hoffman Road Greenfield Site	$125,000	ESD	Hoffman Road Greenfield Site
Orleans	Agricultural Spec Bldg 40 000sf (Medina)	$3,000,000	ESD	Agricultural Spec Bldg 40 000sf (Medina)
Orleans	Business Parks-Albion Medina	$1,700,000	ESD	Business Parks-Albion Medina

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Orleans	Medina Spec Building, Orleans County, Medina	$2,400,000	ESD	Medina Spec Building, Orleans County, Medina: Orleans County lacks modern industrial building space. The IDA is proposing the construction of a spec building to meet that need. It would be 60,000 sq. ft. and located in the Medina Business Park. The project would involve site preparation, general construction, extension of utilities, roads and parking. Engineering, permitting and other feasibility matters have been obtained. It will be a light manufacturing building and it is projected that it would create approximately 50 jobs when occupied. The County has an abundance of old and outdated buildings. This new spec building would offer a modern state of the art facility so that existing businesses do not have to look outside the County and also so new companies looking at the County have an existing modern facility option, and not just older structures. The IDA does not have access to funding to allow this project to occur. It is fully engineered, permitted and ready for construction. It is believed thunty including: 50 new permanent jobs, expanding the building inventory (new modern space), construction jobs and increasing the marketability of the Medina Business Park and sites in the Park. The IDA does not have the funding to complete the project. I
Orleans	Home Energy Consulting and Green Construction	$50,000	ESD	A green home energy consulting business that would generate jobs for construction tradesmen to complete the work determined in the study of the individuals home. Homeowners that are eligible for assistance or credit rebates will be educated on their homeneeds and given options. For other home owners, sustainable energy resources will be introduced and construction tradesmen will be put to work to complete jobs. New construction in the area will be introduced to green products and methods to achieved energy star ratings. Wind and solar possibilities are endless in the region.
Orleans	Holley Business Park-Electric Service	$6,500,000	NYPA	Holley Business Park-Electric Service
Orleans	Meter Reading	$914,000	OFT	Install radio read meters and reading equipment
Orleans	Orleans Fiber-optic Pipe	$500,000	OFT	Orleans Fiber-optic Pipe
Orleans	Kendall CSD, Kendall Elementary	$1,513,263	SED	
Orleans	Kendall CSD, Jr/Sr High School	$2,037,437	SED	
Orleans	Kendall CSD, Buildings & Grounds Shop	$19,400	SED	
Orleans	Holley CSD, Jr-Sr High School	$146,550	SED	
Orleans	Keep our teachers!	$600,000	SED	The superintendent has proposed abolishing 12 positions (all in the Holley Teachers' Association (HTA) unit). The HTA believes that these reductions would seriously impact our ability to provide the education and support that the children of Holley are entitled to--no, not entitled to, it is a basic NEED.
Oswego	T. of Scriba Senior Center Development Project	$400,000	CDBG	
Oswego	V. of Parish Wastewater Treatment Plant Improvements	$530,000	CDBG	
Oswego	T. of Hannibal Water District #3	$600,000	CDBG	
Oswego	Roof Replacement - LOB	$200,000	DASNY	The project involves the replacement of the roof at the County's Legislative Office Building. Given the historic standing of this structure it is not possible to modify the roof to one that would better withstand the Oswego county winters. As such the life expectancy is shorter than more modern structures and replacement has become necessary. The current roof is over 20 years old.
Oswego	New York State Police Facility	$850,000	DASNY	Construct a 2,400 sq.ft. State Police Station to replace the 800sq.ft. station, which is presently located in the Town of Hastings Municipal Building. This will be located next to the existing on the same property owned by the Town.
Oswego	Oswego County Buildings	$75,000	DASNY	repair sally-port at public safety center
Oswego	Oswego County Buildings	$1,000,000	DASNY	install a ferrous metal recovery system at the county waste-to energy facility

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Oswego	Oswego County Recreation Facilities	$1,500,000	DASNY	remove and replace main building at the Port of Oswego eastside marina.
Oswego	Oswego County	$500,000	DASNY	Midtown garage rehabilitation in the city of oswego
Oswego	Oswego County	$470,000	DASNY	New Roofing, windows in tower and Paint exterior windows of city hall in the city of oswego
Oswego	Oswego County	$350,000	DASNY	relocate westside department of public works facility to new expansion at existing Eastside Public works site
Oswego	Garage addition	$65,000	DASNY	Addition to highway garage for office,lunchroom.Facility is also used for voting.
Oswego	Highway Equipment Building	$500,000	DASNY	Construct a new facility to house the highway departments equipment and employees. This structure would replace a structure which was built in the 1940's. It would allow for better energy effient and air quailty as well as a less maintenance required facility. Currently there are 10 employees working out of the facility with no break room or locker room. There is only a single small office, which is shared by all managers. This project would create a project for the construction trades which would greatly help the local economy.
Oswego	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of one day program in Oswego.
Oswego	Town of Parish Municipal Center	$600,000	DASNY	The Village and Town currently share an old gymnasium building that serves as the municipal building and a rec. center for area youths. The building requires repairs and upgrades before it can adequately serve in the capacity for which it is now used.Or a new building must be constructed.
Oswego	Public Safety	$20,250,000	DCJS	Replace boat for sheriffs department. Install 911 Interoperability system
Oswego	Oswego County Buildings	$900,000	DCJS	Replace master control system at jail
Oswego	Oswego County, Brownfield redevelopment/Access Road	$1,500,000	DEC	Oswego County, Brownfield redevelopment/Access Road - The Oswego County Industrial Development Agency has developed a comprehensive redevelopment plan for the Columbia Mills brownfield site located in the town of Minetto, NY. This contaminated 90-acre site has been cleaned up with $2,900,000 of State and Federal funds. Reuse of the site will require rezoning the site to a Planned Unit Development (PUD) and demolition of the remaining foundations and structures, site preparation, construction of an access road, and the extension of infrastructure to accommodate a combination of industrial, commercial, and residential uses. This project would bring in the first phase of infrastructure to support redevelopment. Reuse of the site would have positive impact on jobs, quality of life, tax base, and sustainability in the town of Minetto and the region
Oswego	Oswego Hamilton Homes Phase II - 58 Units Affordable Rental Housing	$10,800,000	DHCR

Oswego	City Line Road 104 to Rte 4	$2,200,000	DOT	City Line Road 104 to Rte 4 Sufficient funding has not been available to add this project to the STIP
Oswego	North Sixth Street/CSX	$1,500,000	DOT	North Sixth Street/CSX Major rehab. tp replacement of bridge over CSX
Oswego	Oneida Street/Oswego Canal	$600,000	DOT	Oneida Street/Oswego Canal Rehabilitation large downtown bridge
Oswego	Oneida River Walkway Under US 11	$0	DOT	Oneida River Walkway Under US 11 Project added to SMTC list as a result of 30 day public comment period.
Oswego	Phillips Street/Tannery Creek	$853,000	DOT	Phillips Street/Tannery Creek Replace Defifient bridge
Oswego	Rte 48 (West River Road)	$5,285,000	DOT	Rte 48 (West River Road) Reconstruction project just starting implemention of design. High community benefits.
Oswego	Pineville Bridge	$3,200,000	DOT	Pineville Bridge
Oswego	Airport Runway Reconstruction	$2,500,000	DOT	The County propopses to reconstruct the bulk of runway 15-33 at the county airport. Those ares that don't require total reconstruction will receive a pavement overlay. Certain areas of associated taxi-ways will also need to be repaired where they meet the main runway. Runway 15-33 is 100 ft. wide by 5200 long. This will help the airport meet critical safety needs while providing opportunities to grow.
Oswego	Airport Tie-Down Apron Reconstruction	$700,000	DOT	The project proposed includes the rehabilitation of an aircraft parking apron of approximately 170,000 sf (280' x 600'). The apron is located east of the Airport Administrative offices and off Taxiway C. Pavement rehabilitation construction is expected to generally include the following major items of work:
Oswego	Other	$8,080,000	DOT	Other
Oswego	Oswego County Airport	$1,000,000	DOT	reconstruction of primary tie-down apron to accommodate approx. 50 planes
Oswego	Oswego County	$800,000	DOT	road salt storage sheds for local highway departments
Oswego	Oswego County	$1,350,000	DOT	Replacement of CR 54 bridge (NYS DOT)

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. County	Project	Requested $	State Agency	Additional Detail
Oswego	Village of Sandy Creek	$0	DOT	Sidewalk improvements
Oswego	Oswego City	$200,000	DOT	Oswego Canalway Access Project
Oswego	Oswego County	$800,000	DOT	Salt storage sheds for local highway departments.
Oswego	Salt Shed	$80,000	DOT	60' x 80' salt storage shed
Oswego	Salt Storage for Towns	$120,000	DOT	Road salt storage sheds for local highway departments. These funds will allow 6 Town highway departments to install covered storage facilities for the road salt they use during Oswego County?s harsh winter months. Covering the salt piles helps to preserve the salt for its proper use and minimizes the amount of run-off from these areas into the local groundwater. All 6 of the Towns are located in the vicinity of either the Tug Hill Aguifer, the Salmon River watershed or the Oneida Lake watershed. Protecting the salt while controling the runoff from these sites will have significant environmental benefits.
Oswego	Town of Parish Road & Bridge Construction, Truck Replacement	$1,500,000	DOT	The Town is responsible for maintain a road and bridge that are in very poor condition. Truck replacements.
Oswego	Paving-RT 104A, CAY CO LN-RT 104, OSWEGO CO	$445,000	DOT	
Oswego	Paving-RT 34, CAY CO LN TO RT 104, TOWN/HANNIBAL, OSWEGO CO	$529,000	DOT

Oswego	PAVING - RT 104, VIL OF HANNIBAL,OSWEGO CO	$1,200,000	DOT	
Oswego	Paving-RT 11, ONON CO LN TO VIL OF CENTRAL SQ, OSWEGO CO	$514,000	DOT	
Oswego	RT. 104 OVER CATFISH CREEK	$3,494,130	DOT	
Oswego	UTICA STREET OVER OSWEGO RIVER	$3,300,000	DOT	
Oswego	Oswego County, Port of Oswego	$3,000,000	DOT	Oswego County, Port of Oswego - The Port of Oswego is advancing a major regional development project that could improve the overall efficiency of its facilities and position it as a major port of entry into the United States. This project has consistently been identified as having the highest regional impact. Port expansion is necessary to accommodate the demand in use and as a step towards making the Port of Oswego ôContainer Readyö when a $300M container terminal project in E. Canada is completed, adding a significant value to the local and regional economy. This project would directly affect the creation and retention of thousands of jobs in the local and regional economy and would also have a much larger impact when the Port of Oswego becomes a container feeder port. The Port of Oswego routinely handles 1 million tons annually of international and domestic cargo. Primary cargoes are in the bulk commodity market, while the Port has surfaced over the past few years as experts in handling project andThe project also has a strong environmental benefit, removing a significant portion of truck traffic from surrounding residential neighborhoods, thus improving congestion and safety in the community. The project calls for an upgrade to the railroad traceast terminal and through the Fitzgibbons site, the construction of a road adjacent to the rail, cutting back the road site to allow for a retaining wall to be constructed, and grading and paving the property to allow for loading of the terminal. Compone
Oswego	Street Paving	$72,000	DOT	One mile of paving on 3 separate Village Streets. Our streets are in very bad condition and due to lack of funding we have not been able to get them done. This will give us a chance to get the work done to improve our Village and help with our tourism and business attractions.
Oswego	Honey Hill Bridge	$50,000	DOT	Replace Bridge on Honey Hill Road over Tannery Creek. Approx 30 X 19.5. The side has caved in.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Oswego	Port of Oswego Expansion	$3,000,000	DOT	Oswego County supports the Port of Oswego Authority in their request to fund improvements to their road and rail infrastructure. This project will allow the Port Authority to expand its customer base by utilizing lands it owns to the east of its main facility. The project will upgrade the roads and rail network at the Port and extend them easterly to allow for the utilization of a Brownfield site as a staging and storage area.
Oswego	OswegoCounty/Town of Volney/City of Fulton Sanitary sewer extension	$7,500,000	EFC	The County is interested in constructing a sanitary sewer line from the Bristol Hill Landfill to the nearest existing connection point for the City of Fulton sanitary sewer system. This would require a line that ran along State Rt. 3 for approximately 3miles to a point near the Volney Elementary School facility. This is currently the eastern most extension of the Fulton sanitary collection system. An engineering study currently underway estimates the cost for this portion of the project at about $4.7 million dollars. This amount includes the funds necessary to tie in every user along the route that desires to have a connection. While the county would be the primary user of this line there are currently about 100 potential residential users (many of which are in a mobile-home park that consists mostly of low-moderate income citizens) in this corridor and about 10 potential commercial users. In addition, it is anticipated that the Town of Volney will tie-in the Town Hall and the Town Highway garage tot industrial park increasing the likelihood for further development of those two areas as well. In addition there are approximately 80 residential users along this extension (many of which are low-moderate income citizens) that will have the opportunityvice if they so desire. The estimated cost for this part of the project is $2.8 million dollars.
Oswego	Village of Parish/Wastewater Upgrades	$750,000	EFC	The County supports the Village of Parish in their application for funding to repair and upgrade the Village wastewater treatment plant and system to meet current environmental codes. The Parish wastewater plant and system needs to add a new chlorination/de-chlorination system and upgrade its pumping stations in order to meet new requirements. The Village is bounded on the east by I-81 and could be an attractive location for businesses that rely on that north/south corridor. Failure to make these upgrades further limits the ability of the Town and Village to attract new business to the area.
Oswego	Schilly Road Water District	$900,000	EFC	Installation of 13,200 lineal feet of public water main.
Oswego	Purdy Road Sewer Project	$600,000	EFC	Installation of public sewer extension to serve 105 single family manufatured dwellings located within an income eligible area of low/moderate families. The project planning area could accomodate approximately 140 dwelling units. All of these units existon private septic systems with numerous failures. This project is essential to enable the feasible installation of public sewers to correct a growing public health problem.
Oswego	Co. Rt. 32 Rail Road Crossing Water Main	$450,000	EFC	installation of 3300 lineal feet water main, inpart crossing under the CSX Rail Road.
Oswego	Airport Construction	$3,500,000	EFC	Oswego Co airport reconstruction and pavement overlay on runway 13-33. Reconstruction of the primary tie-down apron toaccommodating aprox 50 planes
Oswego	Rural Wastewater Projects	$0	EFC	Extend municipal Sanitary svce.New Storm sewers and Storm drains
Oswego	Sewage Treatement Plants	$21,400,000	EFC	Reconfigure and repair wastewater treatment plant and riverview business park. Install wasterwater service lines to Oswego county Industrial Park.
Oswego	Oswego County Buildings	$900,000	EFC	replace the jail master control system at public safety center
Oswego	Oswego County Recreation Facilities	$400,000	EFC	Complete the conversion of an abandoned commercial wharf to a facility the will serve large transient recreational vessels. Bathrooms, tourism information, historic interpretation and navigational aids

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Oswego	Oswego County Wastewater Projects	$4,000,000	EFC	Extend Municipal sanitary sewer service in the town of volney along rt 3 corridor
Oswego	Oswego County Wastewater Projects	$4,000,000	EFC	Extend Municipal sanitary sewer service in the town of volney to the Industrial park a the county airport
Oswego	Oswego County Wastewater Projects	$900,000	EFC	New Sanitary Sewer on e. seneca street in the city of oswego, bring service to a commercial and residental area that lacks the critical infrastructre
Oswego	Oswego County Wastewater Projects	$245,000	EFC	new storm sewer on east seneca street in the city of oswego
Oswego	Oswego County Wastewater Projects	$50,000	EFC	New storm drain on third avenue in the city of oswego
Oswego	Oswego County Wastewater Projects	$138,000	EFC	new storm sewer on Murray street in the city of oswego
Oswego	Oswego County Wastewater Projects	$425,000	EFC	new storm sewer and street improvements on Whitetail circle in the city of oswego
Oswego	Oswego County Wastewater Projects	$350,000	EFC	new storm sewer and street improvements on the westside of W. 2nd street between W. Bridge and Oneida streets
Oswego	Oswego County Wastewater Projects	$420,000	EFC	new storm sewer and street improvements on Rowe road in the city of oswego
Oswego	Oswego County Sewage Treatment	$20,000,000	EFC	reconfigure and repair wastewater treatment plant at riverview business park
Oswego	Oswego County Sewage Treatment	$750,000	EFC	repair and upgrade the Village of Parish wastewater treatment plant and system to meet current environmental codes
Oswego	Oswego County Sewage Treatment	$650,000	EFC	West side long term control plan phase I in the city of oswego
Oswego	Port of Oswego	$3,500,000	EFC	port of oswego expansion. Upgrade roads and rail network at the port
Oswego	Oswego County	$500,000	EFC	Oswego canalway access project in the city of oswego
Oswego	Oswego County	$500,000	EFC	New water mains on Byer Road, Gardenier Road and West Albany Street in the city of oswego
Oswego	Volney	$20,000,000	EFC	Reconfigure/repair wastewater treatment plant
Oswego	Parish	$0	EFC	Sewer repairs
Oswego	Town of Parish Water and Sewer Extensions	$1,800,000	EFC	Town not currently served by water and sewer lines. Bring Services to areas of town where needed. A significant portion of town residents do not have an adequate water supply and their septic systems are failing creating a public health hazard.
Oswego	Oswego County, Municipal projects (PHASE1) - New storm sewers and stre	$3,178,000	EFC	Oswego County, Municipal projects (PHASE1) - New storm sewers and street improvement projects Ready to go projects: (Whitetail Circle, $425,000; West Second Street from Route 104 to West Oneida Street, $350,000; Murray Street, $138,000; E. Seneca Street, $245,000; Rowe Road, $420,000; New Sanitary Sewer: E. Seneca Street, $900,000; New Water Main --Byer Road to West Albany Street, $500,000; Oswego Canal Greenway Access (downtown connector), $200,000). These projects are ready to go in two stages. Subtotals are outlined. Oswego County consistently has one of the highest unemployment levels in the state. It is currently over 9% as of December 2008.
Oswego	Oswego County, Municipal projects (PHASE2) - New storm sewers and stre	$755,000	EFC	Oswego County, Municipal projects (PHASE2) - New storm sewers and street improvement projects ""Ready to Go"" in 6 to 12 months: (City Hall (*NRL building) Windows & Roof revitalization, $470,000; West Side Sewer System Long Term Control Plan, $650,000;Conway Municipal Center (*NRL US Custom House) Restoration project, energy HVAC & solar panels, $1,300,000; DPW facility--dislocated w/Restore project, $350,000; Midtown Parking garage rehabilitation, $500,000; Oswego Canal Welcome Center, $663,000) These projects are ready to go in two stages. Subtotals are outlined. Oswego County consistently has one of the highest unemployment levels in the state. It is currently over 9% as of December 2

County	Project	Requested $	State Agency	Additional Detail
Oswego	Oswego County, Sewer extension	$5,000,000	EFC	Oswego County, Sewer extension Extension of sewer facilities to the Oswego County Airport, which would also extend service to an adjacent 130 acre Industrial Park, the Oswego County Energy Recovery Facility, and commercial and residential users along Rt. 3 and Rt. 176 corridors in the town of Volney, NY This sewer project would greatly enhance the viability of developing more businesses and residences in the proposed areas as well as ensure the long-term viability of the Oswego County Airport. The proposed sewer extension project would serve areas which have already had water supplied along with all other utilities. Preliminary design work is almost finished.
Oswego	Biodiesel Production, Blending & Storage	$4,000,000	ESD	Develop, construct, and operate a 5 million gallon per year biodiesel production plant and blending and storage depot at Riverview Business Park in Fulton, NY
Oswego	Oswego County	$400,000	ESD	Conversion of commercial wharf
Oswego	Oswego County	$3,500,000	ESD	Port of Oswego expansion.
Oswego	WWTP Digester Cleaning	$250,000	NYSERDA	Internal cleaning of the citys waste water treatment plants primary digester. This will improve effiency, reduce energy consumption and give the city the ability to capture digester methane to fuel its own heat exchanger
Oswego	Green Upgrades to County Office Buildings	$1,800,000	NYSERDA	The project invloves retrofits to the Oswego County Legislative Office Building and the Oswego County Health Complex. The project includes new lighting, boilers and HVAC systems that will dramatically increase the energy efficiency of these two buildings.
Oswego	Public/Private Energy Efficiency Project	$2,000,000	NYSERDA	The project involves the retrofit of the County?s waste to energy facility to capture waste heat and increase efficiency. This project, in concert with a local manufacturing facility, will capture heat that is currently wasted and pumped into the OswegoRiver through the plant?s cooling water system. New pumps, condensers and waterlines will capture some of this heat and use it to supply heated process water to Interface Solutions, greatly reducing their operating expenses. This process could save as much as one-half million gallons of oil annually and will help to retain about 150 full time manufacturing jobs. The energy savings for resulting from this project amount to 57,299 MMBTU on an annual basis. This is equivalent to about 379,462 gallons of #6Oil or 57,299 DT of natural gas. Interface currently has the ability to use either fuel type. The environmental emission reductions would be substantial. Eliminating #6 Oil would reduce SOX by over 71,000 lb/yr, NOX by 17,000 lb/yr and greenhouse gasesproducts are used by manufacturers in the automotive and housing industries. This project could make this facility significantly more competitive externally and within the company itself. Oswego County already has one of the highest unemployment rates inect will creat about 100 new jobs and help retain 150 existing jobs. New condensers will be built in NY.
Oswego	County Buildings	$5,175,000	NYSERDA	Green Upgrades, new lighting, boilders and HVAC systems. Repair Sally-Port at Public Safty Center.Roof Replace Roof. Replace master control system at public safety center. Install metal recovery system.
Oswego	Oswego County Buildings	$1,200,000	NYSERDA	retrofit the county's energy facilty to capture waste heat and increase efficiency. New pumps, condensers and waterlines
Oswego	Oswego County	$360,000	NYSERDA	Install solar panels and wind generators as alternative energy sources for he municipal building, wastewater treatment plant, highway garage, all in the village of Pulaski
Oswego	Oswego County	$1,400,000	NYSERDA	repairs to the historic conway building in the city of oswego, add energy efficient measures and new HVAC for the building

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Oswego	Village of Pulaski, Green Energy Initiatives	$360,000	NYSERDA	The County of Oswego supports the Village of Pulaski in their application to install solar panels and wind generators as alternative energy sources for the municipal building, the wastewater treatment plant and the highway garage.
Oswego	Oswego County, Renewable energy manufacturing projects	$20,000,000	NYSERDA	Oswego County, Renewable energy manufacturing projects - (3) -Solar Array Ventures - Solar Array Ventures has plans to develop a solar panel manufacturing facility at the Riverview Business Park in Fulton, NY using a production process developed by Applied Materials (different process than Corp. E Solutions project) or another global vendor with proven technology. The facility would be 200,000 sq ft in Phase 1 and could be expanded to 600,000+ sq ft in Phase 2. Phase 1 would be a $200,000,000 project and would directly create 250 jobs. The project could employ up to 500 or more in Phase 2. This project would take 12 months to complete renovations, install machinery and equipment, and begin production after financing is secured. There are currently three renewable energy related manufacturing projects that are expressing interest in locating at sites in Oswego County. However, with current economic conditions, each of these projects need help to complete financing to make the projects feasible. Direcsuffer economic hardship.
Oswego	Oswego County, Renewable energy	$4,000,000	NYSERDA	Oswego County, Renewable energy - This project was initiated to develop several wind turbine projects throughout Oswego County to promote the use of local renewable energy with net metering. Three sites have been identified at business incubators in Oswego, NY and Schroeppel, NY in locations that have been determined to have excellent wind potential. Design and feasibility studies are currently underway to develop three pilot sites for wind power net metering which would then be precedents for future wind power generation and net metering in an area with huge under-utilized wind potential. These power projects could offer low cost sustainable energy to businesses located in incubators and would also be able to supply the grid creating a zero carbon footprint. These projects have an impact on hundreds of jobs located at these incubators as well as the future implications these pilot projects would have on the local and regional economy.
Oswego	Oswego County, Renewable energy manufacturing projects	$20,000,000	NYSERDA	Oswego County, Renewable energy manufacturing projects - (1) - Corporate E Solutions - Corporate E Solutions has plans to redevelop a former manufacturing facility just outside Fulton, NY as a solar panel manufacturing facility using cutting edge technology developed by Applied Materials. This facility would be 150,000 sq ft and could produce 60 MW of solar panels each year. This is a $240,000,000 project that would directly create 200 jobs. This project would take 12 months to complete renovations, install machinery and equipment, and begin production after financing is secured. There are currently three renewable energy related manufacturing projects that are expressing interest in locating at sites in Oswego County. However, with current economicconditions, each of these projects need help to complete financing to make the projects feasible. Direct loans, credit enhancements or access to the proposed Renewable Energy and Transmission Loan Guarantee Program, could help these three companies secur

County	Project	Requested $	State Agency	Additional Detail
Oswego	Oswego County, Renewable energy manufacturing projects - (2) -Allied Ene	$20,000,000	NYSERDA	Oswego County, Renewable energy manufacturing projects - (2) -Allied Energy - Allied Energy has plans to create a 60 million gallon ethanol plant in Oswego, NY. The company has an option on property in the Lake Ontario Industrial Park and has performedextensive feasibility studies. Site plans are in place to construct a $125,000,000 corn based ethanol plant on a 60 acre site. The facility would create 35 to 50 direct jobs and could indirectly support hundreds more in the local and regional economy. This project would take 18 months to complete construction after financing is secured. There are currently three renewable energy related manufacturing projects that are expressing interest in locating at sites in Oswego County. However, with current economic conditions, each of these projects need help to complete financing to make the projects feasible. Direct loans, credit enhancements or access to the proposed Renewable Energy and Transmission Loan Guarantee Program, could help these three companies
Oswego	Generator	$5,000	NYSERDA	Our municipal office building does not have a generator. We would use this money to purchase single phase 200 AMP system. the municipal office building is a shared building with the Villages of Sandy Creek and Lacona both located there.
Oswego	Families and Schools Together	$65,000	OCFS	Families and Schools Together (FAST) is a research based program.The FAST program goals are to: strengthen family functioning, prevent the target child from experiencing school failure, prevent substance abuse by the child and family, and reduce the stress that parents and children experience from daily life situations. The FAST program?s objective is to build protective factors on multiple levels. The program focuses on children identified by school, social service, and mental health personnel. Building protective factors builds resistance against failure in school, substance abuse or other risks faced by children and families. The program employs a positive approach based on family systems and community/school collaborations. Such an approach is meant to enhance the child?s functioning in school, in the community, and at home. Further, the program directly promotes increasing parental involvement in the child?s life, within the family unit, with other parents of children at that school, with the sch
Oswego	911 Interoperability System	$20,000,000	OFT	Over the past few years, the 911 Center has been developing a plan to utilize the National Interoperable Communications Frequencies to help facilitate communications when out of county units respond to this area. The costs identified in this Appropriations request are associated with implementing interoperable communications for each of four proposed sites in our County. This includes VTAC, UTAC and ITAC equipment on the national interoperability frequencies at these sites and controlled from the 911 center; also included is a dedicated tri-band system for the Oneida Lake area using dedicated frequencies (we are currently filing for these frequencies with the FCC) that will provide interoperable communications with Oswego (800), Onondaga (VHF and/or UHF), Madison (VHF and/or UHF) and Oneida (VHF and/or UHF) such that as an example if one agency talks on VHF other agencies on UHF and 800 would hear - this system would be always on; also included are tactical gateway units for use at the scene of the insystems. This will also help the county move forward to build a similar Communications System as proposed in the Five County Consortium proposal. This equipment, along with 6 new towers and miles of fiber-optic cable will not only help to protect and serOswego County but it will also be dedicated to a communications bridge that could expand beyond the five County region.

Oswego	Northern Oswego County Health Services, Inc.	$250,000	OFT	Expanded Rural Primary Care Access
Oswego	Rural Broadband Services	$69	OFT	Oswego County supports the application by New Visions PLC, Inc. to bring broadband services to the counties of Oswego, Cortland and Schoharie. Affordable high-speed broadband services is no longer a luxury, rather, it is a necessity for the villages, towns and cities of our State. New Visions PLC, Inc. proposes to deploy broadband services to our 33 towns/village and cities in Oswego County. The project will pass over 54,000 homes, a high percentage of which have no broadband availability or limited access. For the past 8- 9 months, we have worked with New Visions to design a plan for deployment of a high speed network that will reach every home. Affordable high-speed broadband will provide universal access to community residents, particularly economically disadvantaged and disabled persons, and dislocated workers to electronic library services, technology training programs, research, shared services and data bases, school-to-home projects, telemedicine links between local community health care providt populations with limited English capabilities. New Visions will partner across disciplines working together to deliver programs and services to the technologically underserved enhancing the quality of life for the residents of the 3 counties in their p

County	Project	Requested $	State Agency	Additional Detail
Oswego	Sheriff's Department Lake Ontario Boat	$290,000	OHS	This project calls for replacing the Lake Ontario Boat for the County Sheriffs department. Oswego County has 35 miles of coastline on Lake Ontario and within that area are three nuclear power plants, a university, an oil fired power plant with significant fuel storage capacity and the first inland port on the Great Lakes. The entire coastline has the potential to be an illegal landside entry point into the United States should anyone try to enter the country by boat from Canada which is only an hour orless across the lake. The current boat has been in service over 20 years and lacks the speed and technology to stay ahead of current threats. The new boat will be a 31 foot american made MV hull with two 250hp outboard engines.
Oswego	Oswego County Public Safety	$250,000	OHS	Replace Lake Ontario Boat for sheriff's department
Oswego	Oswego County Public Safety	$20,000,000	OHS	Install Oswego County 911 Interoperablility system
Oswego	Camp Zerbe Lodge	$700,000	OPRHP	This project would restore and repair an historic lodge at the County's Camp Zerbe. Originally constructed as the main lodge for the Syracuse Boys Club camp in 1939, the camp and its structures were purchased by Oswego County in 1992 and became part of our park and natural area inventory. The camp itself continues to provide wild and scenic opportunities for residents but the lodge has become structurally unsound. This project would restore the lodge to something near its original state at which time itwould be made available for a variety of public and private uses (conferences, retreats, meetings, family gatherings, etc.).
Oswego	Camp Hollis Renovation	$70,000	OPRHP	The project includes the repair and replacement of various structures at the County's Camp Hollis. Opened in 1946 to provide the under-privileged children of the county with an opportunity to experience and enjoy our natural surroundings, the camp servesan average of 4000 children annually. Several of the structures there need to be rehabilitated or replaced for health and safety purposes in order to continue to offer this valuable program to children in need.
Oswego	Recreation Facilities	$2,700,000	OPRHP	Restore and repair historic lodge and Camp Zerbe. Repair and replace various structures at Camp Hollis. Complete the conversion of an abandoned commercial wharf to a facility that willl serve large transient recreational vessels.
Oswego	Oswego County Recreation Facilities	$700,000	OPRHP	restore and repair historic lodge at camp zerbie
Oswego	Oswego County Recreation Facilities	$100,000	OPRHP	repair and replace various structures at camp Hollis
Oswego	Town of Hannibal	$0	OPRHP	Fencing, construction of Town Recreation Park
Oswego	Village Park	$50,000	OPRHP	The children in our Village have no place to play. We would like to build a village park with a skateboard area as well as other areas for play so that families have a place to walk to to get exercise and to get the children out of doors into the fresh air.
Oswego	Mexico CSD, New Haven Elementary	$48,500	SED	
Oswego	Oswego City School, High School	$15,562,000	SED	
Oswego	Oswego City School, High School	$100,000	SED	
Oswego	Oswego City School, District Office	$484,000	SED	
Oswego	Oswego City School, District Warehouse	$307,000	SED

County	Project	Requested $	State Agency	Additional Detail
Oswego	Oswego	$650,000	Unassigned	West Side Long Term Control Plan (Phase I)
Otsego	Construct Handicapped accessible restrooms at town hall	$20,000	CDBG	Construct Handicapped accessible restrooms at town hall
Otsego	Springbrook Expansion and Renovation Project	$20,000,000	DASNY	Renovation and Expansion of private residential school serving multihandicapped and autistic children Adding capacity to bring students out of state back into state. Project a[pproved by SED and OCFS for addition 24 bed expansion. Project includes: redev
Otsego	Oneonta Municipal Parking Garage Project	$250,000	DASNY	Oneonta Municipal Parking Garage Project Steel Repair and Painting Project. -The City?s Municipal Parking Garage is a three level 520 space facility located in the heart of downtown at the corner of Market Street and Chestnut Street Extension. The garageis vital to the economic prosperity of the central business district. -In December, the upper two levels of the garage were temporarily closed because of the failure of three structural steel support beams. The repairs were made and an inspection revealed that other structural steel repairs were needed and the lower level steel needs to be painted and coated to prevent further deterioration. The City has repaired, painted and sealed the upper two levels in 2006. -These repairs were estimated to cost $250,000.
Otsego	Bassett Healthcare parking and other	$5,200,000	DASNY	Bassett Healthcare parking and other
Otsego	Anderson Hall Energy Efficiency	$910,000	DASNY	This project will include the replacement of a boiler in the Anderson Art Center and the installation of a new chilled water system
Otsego	Binder Physical Education Center Energy Efficiency	$100,000	DASNY	This project entails the installation of a boiler in the Binder Physical Education Center.
Otsego	Bresee Hall Energy Efficiency	$470,000	DASNY	This project involves the installation of new windows in Bresee Hall.
Otsego	Campus Road Construction	$650,000	DASNY	This project entails the upgrade of campus roads and sidewalks including creation of catch basins, curbs and culverts, and the blacktopping of roadways.
Otsego	Clark Hall Energy Efficiency	$100,000	DASNY	This project will entail installation of a new air conditioning unit in Clark Hall.
Otsego	Dewar Hall Energy Efficiency	$250,000	DASNY	This project will entail installation of a new chilled water system and new windows in Dewar Hall.
Otsego	Holmes Hall Energy Efficiency	$180,000	DASNY	This project will include the replacement of a boiler, windows, boilers controls, and conversion of the heating system to individual room thermostats.
Otsego	Holmes Hall Modernization	$810,000	DASNY	This project will consist of lighting upgrade, replacement of flooring, interior painting, replacement of carpeting, asbestos remediation, upgrade of bathrooms, replacement of shingle roof, replacement of window blinds, repair of masonry door around doors, installation of additional room outlets, installation of security screens on windows, and replacement of vestibule porches.
Otsego	Holmes Hall New Construction	$160,000	DASNY	This project includes the construction of ADA compliant restroom facilities, installation of a sprinkler system and sprinkler standpipe at stais.
Otsego	Holmes Hall Technology Upgrade	$20,000	DASNY	This project will entail the upgrade of fire alarm systems.
Otsego	Johnstone Science Center	$90,000	DASNY	This project will involve installation of a new boiler in the Johnstone Science Center Greenhouse.
Otsego	Saxton Hall Energy Efficiency	$370,000	DASNY	This project includes the installation of a new boiler and window replacement in Saxton Hall.
Otsego	Van Ess Hall Energy Efficiency	$260,000	DASNY	This project will entail replacement of windows, upgrade of lighting, replacement of a boiler, installation of 19 mixing valves, upgrade of boiler controls, conversion of heating system to indificual room thermostats.
Otsego	Van Ess Hall Modernization	$1,140,000	DASNY	This project will include installation of additional outlets in each room, exterior painting, replacement of acoustic tiles, refinising of floors, replacement of carpeting, interior painting, replacement of window blinds, refurbishment of cabinetry, replacement of stair treads, repair of masonry at door frames, complete asbestos remediation, upgrade of doors for ADA compliance, replacement of corridor and stairway fire doors, installation of security screens on all windows, replacement of parking lot concrete deck.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Otsego	Van Ess Hall New Construction	$200,000	DASNY	This project will include providing standpipe to stairs and installation of a building sprinkler system.
Otsego	Van Ess Hall Technology Upgrade	$490,000	DASNY	This project will include extension of bunker conduit to service switch, installation of 44A feeder to building, installation of 400A panelboard, replacement of all 225A panels, 100A laundry panel, 200A feeder and 100A feeder, and installation of a new fire alarm system.
Otsego	Wilder Hall	$1,000,000	DASNY	Modernization of Wilder Hall to replace doors at selected locations, in student rooms and at exists for fire safety, install security screens on windows, replace roof at central gable, complete asbestos remediation and post-remediation repairs.
Otsego	Wilder Hall Energy Efficiency	$150,000	DASNY	This project will replace windows, upgrade controls to DDC, and replace a boiler
Otsego	Wilder Hall New Construction	$150,000	DASNY	This project would entail the installation of a sprinkler system and provide standpipe to stairs.
Otsego	Wilder Hall Refurbishment	$100,000	DASNY	This project's purpose is the refurbishment of student cabinetry and painting of block walls.
Otsego	Wilder Hall Technology Upgrad	$450,000	DASNY	This project will entail installation of new fire alarm system with full upgrade, replacement of 225A panel boards on each hall and replacement of existing 800A service in Wilder Hall.
Otsego	Yager Hall Energy Efficiency	$580,000	DASNY	This project will include installation of a new boiler, new chilled water system, and new windows

Otsego	Otsego County - A.O. Fox Memorial Hospital information technology	$3,156,000	DOH	Otsego County, With a goal of enhancing patient safety and clinical excellence, A.O. Fox Memorial Hospital plans to implement a comprehensive information technology (IT) system from McKesson. Fox will implement the advanced Horizon Clinicals« solution suite along with McKessonÆs pharmacy automation technologies. The transformation to an electronic medical record-based environment represents a monumental shift in our approach to delivering care. Even more, however, it represents a deep commitment to providing our staff with the latest and most powerful technologies for delivering superior levels of service to each and every patient. The project will automate healthcare processes and create ôpaperlessö electronic health records (EHRs) that span both inpatient and outpatient settings in the community we serve. The IT project will also include:á emergency care tracking; a secure physician portal system which will allow access to all patient records on a real time basis; pharmacy automation tools for fast, notes and diagnostic images as the patient progresses through the care process. This translates into safer, more informed, more efficient and better treatment outcomes. By deploying these technology tools, Fox Hospital clinicians no longer need to trat information on a paper chart or solely rely upon the patients as the keepers of their allergy information and previous medical history. Once fully implemented, the systems will enable our medical staff to improve the patientÆs overall healthcare exp

Otsego	West End Ave Oneonta	$300,000	DOT	West End Ave Oneonta
Otsego	Street Improvement Project	$1,075,000	DOT	City of Oneonta Street Improvement Project Because of the high price of oil and asphalt in recent years the City has been unable to continue its asphalt overlay program at levels adequate to maintain a minimally acceptable driving surfaces on some roads.As a result, many streets in the City are deteriorating and need to be repaired with new asphalt. Quality driving surfaces on streets is a basic municipal infrastructure need and impacts all areas of economic development. The following streets need to be improved with a basic asphalt overlay, milling and overlay and several need some curbing improvements: 1.West End Avenue- Curbing, asphalt overlay $190,000
Otsego	Bugbee Road Project	$850,000	DOT	Bugbee Road Project -Bugbee Road is located in the northeast section of the City and is the primary road connecting East Street to the State University College, the City?s largest employer. The 2000 linear foot road was constructed of concrete in 1963 and not only has the surface deteriorated, but the storm sewer line has collapsed in several areas. The undersized and deteriorated storm and sanitary lines need to be replaced and increased to meet the demands of the College, new housing development and the planned HOSPICE campus. The sanitary sewer main is also experiencing significant infiltration and inflow while impacting the capacity of the sanitary sewer system in the East Street area of the City. The project scope includes: new sanitary sewer mainand laterals, new storm main, new curbing, removal of concrete surface, new Subbase and the installation of asphalt in a base, binder and top course. The estimated cost of the project is $850,000 and the project is nearly designed and ready for bid.

County	Project	Requested $	State Agency	Additional Detail
Otsego	Catella Park Well Project	$400,000	EFC	Catella Park Well Project The Catella Park Well is the secondary water supply source for the City of Oneonta. Two surface reservoirs provide the City?s average daily need of approximately 1.6 million gallons of water per day. When the reservoirs fall below full capacity the wells are used to supplement the water supply which usually happens in the months from June thru October. A study of the Catella Park Well indicated that another separate aquifer was available that was tested at 1100 gpm. If this well is developed, it could provide all the water needed by the City which is important in times of drought, reservoir contamination or reservoir water line supply issues. The proposed project would include a new well house, two pumps and controls for bothwells including a back up power supply. A new supply line would also be needed to bring the new well water to the transmission line to the water treatment plant. Estimated project cost is $400,000
Otsego	Copperstown S End Water & Waste System improve	$5,163,457	EFC	Copperstown S End Water & Waste System improve

Otsego	Bugbee Road Project - Rotating Bacterial Contractors Project	$500,000	EFC	Hospice Campus at Oneonta College.
Otsego	City of Oneida 2	$500,000	EFC	Wastewater Treatment Plant - Rotating Bacterial Contractors Project, needed to replace 6 of 9 non-functioning RBC's so the city can continue to meet NYSDEC treatment standards.
Otsego	City of Oneonta - Rotating Bacterial Contractors	$500,000	EFC	rotating bacterial contractors project at the wastewater treatment plant
Otsego	City of Oneonta - Catella Park Well project	$400,000	EFC	not provided
Otsego	Otsego County, Village of Richfield Springs will upgrade the village waste w	$2,000,000	EFC	Otsego County, Village of Richfield Springs will upgrade the village waste water treatment plan and collection system. The collection system contains old lines that need to be repaired and replaced. The treatment plant generators, screening process andend of process filters are required to be upgraded and improved. The plant is currently under consent order by NYSDEC. Due to I & I problem the collection system must be upgraded. The end of process filters are key to appropriate discharge, as the discharge water flows into trout waters at the northern most point of the Susquehanna River head waters.
Otsego	Village of Cooperstown ""South End"" Water / Wastewater System improver	$5,163,457	EFC	Village of Cooperstown ""South End"" Water / Wastewater System improvement and Street Reconstruction. Otsego County To repair significant water pipe leakage; sewer infiltration issues; street reconstruction and WWTP effluent pumping to wetlands connection The Village of Cooperstown is home to 1,500 year round residents, but is also a world-class tourism destination (300,000 visitors / year) hosts a a major medical facility that employs 2,000 people and accommodates over 600,000 patient visits a year.The underlying water and waste water infrastructure is heavily decayed, lending the system to be stressed, and the WWTP to be at maximum capacity due to the significant infiltration issues. NYSDEC is urging the Village to correct the South End (Linden, Walnut, Delaware, South Ave and parts of Susquehanna) section of the Village where the sewer pipes, storm drains and streets are in the poorest condition. The South End is a major low point in the Village therefore a lot of the storm water and sump pumps

Otsego County. Thisproject has secured funding commitments from NYSOCR and local participation. The IDA has commitment from a recycling equipment manufacturing tenant to occupy a portion of the Industrial Park. Development of a fully infrastructured Industrial Park will provide a fully infrastructured Industrial Park in the Northern end of Otsego County to attract new manufacturing / commercial jobs to the area. The park has excellent access to key transportation corridors. Development of a fully infrastructured Industrial Park is needed to accommodate the immediate need for an equipment manufacturing facility and the future attraction of new business to Otsego County. The County of Otsego IDA has purchased and engineered a light industrial park. Construction of a newng facility.
Otsego	Portabello's Banquet & Conference Center	$500,000	ESD	33 acre parcel with a 10,000 sq ft building, newly erected by all private, personal funds. Dollars needed are to finish interior, exterior, and parking area. This is a minority owned business that is family run. In the industry for 8 years.
Otsego	Richfield Springs 08 Main Street Project	$327,850	MAIN_ST	
Otsego	Otsego Bresee Building Restoration Project	$500,000	MAIN_ST	
Otsego	Schools, Elementary and Secondary, Worcester CSD	$196,934	NYPA	
Otsego	County, Municipal, & State Government Offices, OTSEGO COUNTY	$295,000	NYPA	
Otsego	Line upgrade and relocation	$3,000,000	NYPA	Upgrade and relocate 40 miles of distribution lines to road right of way. This will help reduce line loss and increase reliability.
Otsego	Pole testing	$500,000	NYPA	Test and replace weak and damamged poles so that system reliability can be maximized.
Otsego	Recloser upgrade	$190,000	NYPA	Replace older equipment with new smart grid equipment.
Otsego	SCADA	$300,000	NYPA	Install SCADA for smart grid capabilities.
Otsego	Infrastructure upgrade	$3,000,000	NYPA	Infrastructure upgrade

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Otsego	Infastructure maintenance	$500,000	NYPA	Infastructure maintenance
Otsego	Infrastructure Project Distribution System	$4,000,000	NYPA	Infrastructure Project Distribution System
Otsego	Infrastructure Project defective utility distribution plantq	$500,000	NYPA	Infrastructure Project defective utility distribution plantq
Otsego	Natural Gas Line Extension	$13,000,000	NYPA	Natural Gas Line Extension
Otsego	Kosmer Zero Energy Plus Solar House Project	$2,500,000	NYSERDA	I am the founder and principle of the Kosmer Solar House Project. I would like to build 5 Zero Energy Plus homes that generate more energy than they consume as a model for future 21st century home building standards in New York State when home building resumes as the economy recovers. A little over a year ago I designed and built a new traditional style 4000 sq. ft. affordable passive solar home in the Cooperstown, NY region for $125.00 a sq. ft., assembling technologies and incorporating design features that enable it to heat for $2.50 a day ($900-1200 a year in the cold Upstate, NY region with crude around $100 a barrel). The website, www.SolarHouseProject.com, explains how the home was built and how it functions. Dollar for dollar this traditional style passive solar home far exceeds the cost-to-benefit ratio of any ?green? or ""zero energy"" home today. Heated by the sun, it cost about the same as a comparable size new ENERGY STAR qualified home but uses less than 70% of the energy of that comparaublication NEW HOME annual and another article on it is in the quarterly summer issue of NYS regional magazine Kaatskill Life. It also appears in the current Nov/Dec 08 issues of both SMART HOMEOWNER and DCD (DESIGN COST DATA). If you would like to see ta PDF of the articles. If you google Kosmer Solar about a dozen articles come up that, in turn, have been reproduced on about thirty alternative and renewable energy websites. If you google the generic term solar house my website comes up on page one or
Otsego	LED lighting - convert mercury vapor bulbs to LED	$250,000	NYSERDA	Replace 850 mercury vapor bulbs with high efficiency LED bulbs. Reduce kWh usage by approximately 600,000. Remove mercury from the enviroment.
Otsego	ROW Efficiency and Reliability	$875,000	NYSERDA	Reduce line loss and increase reliablilty with brush and tree removal from 350 miles of right of way (ROW). This will also provide us better access for our smart grid updates.
Otsego	programmable thermostats	$125,000	NYSERDA	Distribute programmable thermostats to our member/owners.
Otsego	Demand control	$150,000	NYSERDA	Install demand control units on water heaters to switch usage to off peak
Otsego	Hybrid Vehicle	$50,000	NYSERDA	Purcahse Hybrid Electric Vehicle and convert it to an all electric vehicle and use it as a test case to determine how the effect on our system.
Otsego	Construct Incubator	$6,000,000	NYSERDA	Construct Incubator
Otsego	Reduce dependency of oil with Electric Thermal Storage	$400,000	NYSERDA	Reduce dependency of oil with Electric Thermal Storage
Otsego	Infastructure upgrade	$190,000	NYSERDA	Infastructure upgrade
Otsego	Renewable generation dairy manure digester	$6,000,000	NYSERDA	Renewable generation dairy manure digester
Otsego	Install SCADA System	$250,000	NYSERDA	Install SCADA System
Otsego	LED Bulb change out replace 1000 vapor bulbs	$400,000	NYSERDA	LED Bulb change out replace 1000 vapor bulbs
Otsego	Reduce dependency of oil with Electric Thermal Storage	$400,000	NYSERDA	Reduce dependency of oil with Electric Thermal Storage
Otsego	Installation of 5 residential photovoltaic applications	$200,000	NYSERDA	Installation of 5 residential photovoltaic applications
Otsego	Clarity Connect, Inc. will reconstruct an existing tower owned by the school	$49,506	OFT	
Otsego	Fiber optics	$10,000,000	OFT	Install fiber optic cable system wide.
Otsego	Broadband Fiber Infrastructure	$500,000	OFT	Broadband Fiber Infrastructure
Otsego	AO Fox Mem Hosp IT system	$3,156,000	OFT	AO Fox Mem Hosp IT system
Otsego	Infrastructure Project Smart Grid	$1,500,000	OFT	Infrastructure Project Smart Grid

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Otsego	Countywide Telecommunications	$0	OFT	Countywide Telecommunications
Otsego	Otsego County fiber optic loop system serve entire county	$0	OFT	Otsego County fiber optic loop system serve entire county
Otsego	Southern Tier East Fiber Optic Spine	$7,500,000	OFT	This project will involve a public-private partnership which will create a fiber optic spine in the eastern southern tier which will support ""last mile"" delivery of broadband internet access (a cooperative effort, not included in cost estim
Otsego	Fiber Optic Cable	$7,000,000	OFT	Fiber optic cable loop to serve the entire county
Otsego	County Broadband Fiber Infrastructure Project, Otsego County	$500,000	OFT	County Broadband Fiber Infrastructure Project, Otsego County To improve flow of information of county government between the Main County office building on Main Street in Cooperstown and the 911/ Public Safety Building 5 miles to the south. The Countyneeds to connect the County Office Building on Main Street in Cooperstown with its skilled nursing facility, the County Highway garage and Emergency Services building. This underground broadband fiber connection will allow the county to increase efficient, reliability and reduce its overall operating costs by removing leased T1 and other outside telecommunication costs. The increased and dedicated broadband connection will also open the possibility for telemedicine and distance learning opportunities.
Otsego	New Fire Station	$800,000	OHS	The current firehouse limits the size, type, and number of trucks that can be purchased. The current firehouse is also limited in size for use as an emergency shelter. The organization is currently all volunteer but in the future may be forced to becomea paid department/squad in order to support the emergency services needed in our rural area. The current facility at the very least would require renovation if this were to happen.
Otsego	Springbrook Campus Rehab & Extention	$25,000,000	OMR	Springbrook Campus Rehab & Extention
Otsego	Soccer Hall of Fame Expansion	$0	OPRHP	Soccer Hall of Fame Expansion
Otsego	Performing Arts Center	$12,000,000	OPRHP	Performing Arts Center
Otsego	Family Housing	$115,000	OTDA	HHAP rehab
Otsego	Schenevus CSD, Andrew Draper School	$100,000	SED	
Otsego	Oneonta City Schools, Valley View Elementary	$1,807,199	SED	
Otsego	Oneonta City Schools, Center Street Elementary	$1,978,364	SED	
Otsego	Oneonta City Schools, Oneonta Jr/Sr High	$6,667,810	SED	
Otsego	Oneonta City Schools, Great Plains Elementary	$339,518	SED	
Otsego	Oneonta City Schools, Riverside Elementary	$695,925	SED	
Otsego	Oneonta City Schools, New Bus Garage	$26,469	SED	
Otsego	Richfield Springs CSD, Main Building	$2,000,000	SED	
Otsego	Springbrook Residential School expansion	$11,467	SED	renovate and redevelop site infrastructure and create space for 24 residential beds and calssroom space for children currently in out of state schools
Otsego	Expansion of Springbrook Residential School	$3,307,987	SED	Development of in-state residential beds for school aged children, ages 5 to 12 currently placed out of state.
Otsego	Springbrook Residential School	$3,307,987	SED	Residential School Expansion, for a 24-bed facilty to accommodate the 412 referrals for those children with extensive behavioral, medical, emotional, and management needs in need of a residential placement in state. Redevelopment of site infrastructureto include water, septic, water retention on campus, not currently up to code. Construction fo 3 building residential complex, 6 classroom addition, kitchen-cafeteria/entry addition, station gym with ancillary support spaces. Renovation of therapeutic pool and mechanical room, existing gym, 2 classrooms, existing cafeteria, dining rooms and kitchen, administrative wing.

County	Project	Requested $	State Agency	Additional Detail
Otsego	Oneonta College, 283930-Wilber Hall Major Rehab	$9,075	SUNY	
Otsego	Oneonta College, Rehabilitate Biological Field Station- Cooperstown, Bldg.:	$6,352,334	SUNY	
Otsego	Oneonta College, Rehabilitate Fine Arts Building, Phase II	$5,595,240	SUNY	
Otsego	Oneonta College, Rehabilitate Fine Arts - Phase IIA	$6,178,000	SUNY	
Otsego	City of Oneonta - Municipal Parking Garage	$250,000	Unassigned	steel repair and painting
Otsego, Sullivan	FA SIGNAL REQUIREMENTS 2009/10	$750,000	DOT	FA SIGNAL REQUIREMENTS 2009/10
Otsego, Tioga	GUIDE RAIL REQ MTS CONTRACT 10/11	$2,265,000	DOT	GUIDE RAIL REQ MTS CONTRACT 10/11 Project is funded with 100% SDF Funds.
Putnam	Ceiling & Light Fixture at Gymnasium	$60,000	CDBG	The roof at the Philipstown Recreation Center is in need of repair, once that is completed, for the safety and welfare of the program participants, the ceiling needs to be replaced and the lighting fixtures upgraded. This facility conducts many programsfor all ages and this improvement would assure the safe use of the Community Center.
Putnam	Addition to Town Hall	$3	DASNY	The town hall was built in 1867, an addition to the town hall would provide handicap accessibility as well as much needed space for record retention. This will also make the court handicap accessibility, and secure for the staff and judges.
Putnam	Roof at Community Center	$312,000	DASNY	Flat roof repair and asbestos removal at the Philipstown Recreation Community Center. The Town of Philipstown Recreation Department is located in Garrison, New York and offers many recreational programs for both the youth and seniors. The building was donated to the town by the Open Space Conservancy which have placed limited improvements to the property ensuring that open spaces are maintained. This improvement with assure a safe environment for the children and adults that participate in the recreational programs.o
Putnam	Patterson Court House	$2,386,000	DASNY	Construction of a new 7,100 Court House. Project design is complete and ready for bid. The Town needs to relocate the exising Town Court from the Patterson Library Building, as the Library wishes to expand also.
Putnam	Recreation Center Renovation	$200,000	DASNY	The project would install HVAC units and address energy efficiency issues such as insulation in an existing gymnasium and recreation center.
Putnam	Othmer Building Rennovation	$400,000	DASNY	Renovate existing Town of Carmel owned Othmer House and convert to Town offices to provide better service to Carmel Citizens.
Putnam	Putnam County Senior Center	$7,000,000	DASNY	Senior Nutrition and Adult Day Care Center. This project will provide a variety of services for hundreds, if not thousands, of seniors.
Putnam	RENOVATION OF TOWN HALL FACILITY	$250,000	DASNY	THE PROJECT WILL INCORPORATE A MODULAR ONE-STORY STRUCTURE (APPROXIMATELY 2,800 SQUARE FEET) TO PROVIDE OFFICE AND CONFERENCE SPACE, AS WELL AS FILE STORAGE. THE MODULAR WILL BE PLACED BEHIND THE EXISTING TOWN HALL CONNECTED BY AN ENCLOSED WALKWAY. THISOFFICE FACILITY WILL PROVIDE MUCH NEEDED WORK AND STORAGE SPACE TO AN EXISTING CROWED FACILITY

County	Project	Requested $	State Agency	Additional Detail
Putnam	Proposed Public Safety/Justice Center/ Community Center for the Town of (	$15,000,000	DCJS	Over the past ten years increased demands on services has strained the resources of the Town of Carmel, particularly in the areas of Public Safety, Justice System, Senior Recreation and Emergency Disaster preparedness. Recently the Carmel Town Board authorized completion of a needs assessment for the Carmel Police Department, currently housed in the first floor (4800 sq. ft.) of the Town Hall. Likewise, the Board has authorized grant applications by the Carmel Justice Court to obtain funding for stop gap measures involving security for the Court Room located on the Second floor of Town Hall. Ever-growing recreational needs has resulted in expenditures by the Town Board for projects ranging from inline skating rinks, ball fields and skateboard parks. Other recreational needs however which require indoor floor space remain unmet. For instance, the Town of Carmel has had to create ad hoc locations for Senior center meeting areas. With these three major needs in mind, the Town of Carmel contemplates the cl with an eye to the future planning for these needs over the next thirty years. Most of this document addresses the needs for these facilities. Details on actual facility construction are purposely left flexible, as the final design elements will dependture and quality of property that the Town is capable of acquiring.
Putnam	Crofts Corners Neighborhood: Chloride Impacted Groundwater Plan	$2,500,000	DEC	Due to chloride contamination of the groundwater, the area in Putnam Valley known as Crofts Corners is in need of a water delivery system and a new water source The area involves approximately 30 homes and the Putnam Valley Town Hall. None of these homeshas potable drinking water. A viable water source has been located and the property owner has agreed to build a pump station. However, approximately 1.5 miles of pipe need to be laid, as well as piping to the homes, plus a water storage tank. The ownerscannot sell their homes and are basically ""home locked."" They cannot drink their water. It is costing the town a lot of money annually to purchase drinking water. In addition, our Town Hall water is also contaminated with chloride. The town could never afford to construct this project without aid from the state and federal governm
Putnam	Oil Water Seperator at Highway Garage	$80,000	DEC	Installation of Oil/Water Seperator at Town of Carmel Highway Garage which services 50 fleet vehicles.
Putnam	Lake Oscawana Management and Restoration Program	$1,000,000	DEC	To restore a natural 2 mile lake which is currently impaired as defined in Section 303 (d) of the Clean Water Act
Putnam	Southeast Landfill Closure	$3,000,000	DEC	NYC DEP and NYS DEC have encouraged the Town of Southeast to close an abandoned municpal landfill, situated in the NYC watershed, that has been abandoned for decades. In partnership with NYS MTA, the neighboring property owner, Phase I was completed in 2008 at a cost to Southeast of $610,000. Phase II will cap the landfill in place and complete the project. At this time, the municipality does not have the money necessary to complete Phase II. Phase II of this project can authentically be commenced in less than 30 days, if funding were made available.
Putnam	Stormwater Control	$10,000,000	DEC	US EPA delegated authority to NYS to implement so-called ""MS 4"" stormwater control regulations. Municipalities in Putnam and Westchester Counties are proceeding, pursuant to an IMA, regarding compliance but are facing unbearable costs. The present estimate for complance in Putnam County alone exceeds $100 million. The Town of Southeast is conducting proceedings requisite to establishing a town-wide drainage district to streamline compliance efforts. With funding, Southeast and neighboring communitiescould commence stormwater control implementation in easily targeted areas, for example along town roads. Construction-type jobs from this project will be a boon to the region during the present regional (and national) economic contract

Putnam	Phillipsebrook Road Culvert	$150,000	DOT	The Town of Philipstown will installed a much needed culvert 24""x8'x6' the site is 1/2 mile from Snake Hill Road. Philipstown has 35 miles of dirt roads, and the safety and welfare of our residents and tourist are a priority
Putnam	Terry Hill Road & Rote 311	$750,000	DOT	Intersection improvement with realignment of road & signalization
Putnam	Peekskill Hollow Road Bridge	$1,500,000	DOT	Replacement of failing bridge with wider bridge & turning lanes. Bridge to have concrete deck, steel diaphragms & girder bearings.
Putnam	Turk Hill/Morningthorpe Road Bridge	$2,000,000	DOT	Replacement of bridge, which is currently closed. The superstructure will have a concrete deck on steel girders.
Putnam	Lovers Lane Bridge Project	$300,000	DOT	Demolish the present bridge (now closed) which spans Shrub Oak Brook and re-install a thirty-two foot long bridge intended for two-way traffic. the bridge is situated on Lovers Lane between Peekskill Hollow Road and Mill Street in the town of Putnam Valley, NY. Right now, from either end of Lovers Lane --the Peekskill Hollow Road end or the Mill Street end-- one can only travel one way as far as the current bridge and then one must turn around because it is too dangerous to cross the impaired bridge. This has created a very dangerous situation. The current arrangement could result in preventing fire, emergency and medical personnel from reaching certain locations on Lovers Lane. Two years ago, the NYS DEC, Putnam County Emergency Services, and the Putnam County Highway Department considered replacing it with a box culvert, but since the brook is 32 feet wide, the DEC declared that this body of water was too big for a culvert to handle the large amounts of water which would result from heavy rains.
Putnam	Maybrook Bikeway I Construction	$2,900,000	DOT	
Putnam	Bridge Replacement: I-84/Dingle Ridge Rd	$10,596,000	DOT	
Putnam	Rt. 22 Interim Improvements at Rt. 312	$5,695,000	DOT	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Putnam	Morningthorpe Road Bridge Repair	$5,000,000	DOT	Morningthorpe Road Bridge has been closed by highway authorities due its unsafe condition. The bridge comprises an integral feature of surface transportation in the Town of Southeast and County of Putnam. Its closure creates a hardship for the community,for example to school buses filled with children, to their commuting parents, and to the emergency personnel who serve and protect them. The bridge needs to be repaired and reopened, but no funds (apart from ARRA funds) are avaialbe in sufficent amountsto commence and complete the project.
Putnam	Prospect Hill Road Bridge Repair	$5,000,000	DOT	Prospect Hill Road Bridge, maintained by NYS MTA, has been closed by highway authorities due to its unsafe condition. The bridge comprises a critical feature of surface transportation in Southeast in and Putnam County. Its closure creates hardships for the community, for example to school buses delivering children, to their parents and families, and to emergency personnel who serve and protect them.
Putnam	Putnam Lake Stormwater Retrofits	$197,000	EFC	The project would install two Vortecnic stormwater treatment units two catch basins and approximately 300 feet of drainage pipe. The project would capture and prevent sediment from entering the Putnam Lake, thereby improving the Lake quality.
Putnam	Carmel Sewer District # 1, Extension # 4	$4,000,000	EFC	Sewer Extension to eliminate failing septic systems.
Putnam	Carmel Water District # 14 System Upgrade	$200,000	EFC	Upgrade of fifty year old public water system to todays standards.
Putnam	Water Meter Upgrade	$6,000,000	EFC	Replace antiquated water metering and billing system with state of the art radio read remote system. Approx. 3000 meters in 14 water districts.
Putnam	Water Treatment System @ Garrison Landing Water District	$40,000	EFC	The Town of Philipstown is requesting this funding for the installation of a water treatment system at the Garrison Landing Water District. This water treatment system will provide clean and safe drinking water for the residents and business that are within the Water District Boundaries.
Putnam	Peaceable Hill Water District	$2,000,000	EFC	Families living in Peaceable Hill Water District describe their drinking water as dirty, for which they pay a phenomenally high annual cost, about $2,000 annually per family. Present NYS OSC guidelines recommend a cap of about $1,200 for such services. New water wells could provide these families with clean drinking water at much lower cost. However, the capital cost of the infrastructure project constitutes a bar to this project.
Putnam	Energy Efficiency Upgrades at Carmel Town Hall	$200,000	NYSERDA	High Efficiency Boiler Upgrades at Carmel Town Hall. Installation of photovoltaic cells on Carmel Town Hall and connection to electric Grid via a net meter.
Putnam	Recreation Replacement of Windows	$50,000	NYSERDA	Replace all the windows at the Philipstown Recreation Center. These windows were installed when the building was first constructed in the 50's. There are approximately 54 double windows, of crank style. Replacing these windows would increase energy efficiency, decreasing the need for fossil fuel use.
Putnam	Library Geothermal project	$175,000	NYSERDA	The Alice Curtis Desmond and Hamilton Fish Library, a medium sized Public Library in Putnam County, would like to install an energy efficient geothermal Heat Pump HVAC system. We already have a cost estimate from Altren and another company, have plenty of land, and could begin construction very quickly.
Putnam	Purchaser or Fire Engine Pumper	$700,000	OHS	The project involves purchase of one E-1 Pumper Engine to replace a antiquated 32 year old pumper engine. The new Engine will assist the Department in responding to various Structure fires and Motor Vehicle accidents. This Engine would be a first responefirematic apparatus. The supply of the new Engine will improve response time from an average of 5-7 minutes to 4 minutes, and will result in a reduction in lost lives and property.
Putnam	Fahnestock SP - Replace TOEC Sewage System	$500,000	OPRHP	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. County	Project	Requested $	State Agency	Additional Detail
Putnam	Patterson Library Renovation & Expansion, Patterson NY 12563	$3,000,000	OPRHP	The Patterson Library provides critical public services in 2,400 sq. ft. of space. The current service population requires 15,000 sq. ft. plus additional space for future growth. As part of a ten year plan to expand the library, we purchased the currentlibrary building in 2007. The architectural plans are already in progress. Estimated costs to renovate the 7,500 sq. ft. existing building are $1.125 million. Estimated costs for the needed expansion are $1.5 million. Site development is another $250,000. Furnishings, architectural, engineering, and design costs will be $622,500. Soft costs are estimated at $100,000. The library currently shares a building with the Town Court, which is planning a simultaneous and vital relocation project. Both projectswill retain critical local jobs, create new construction jobs and add staff positions. This 501c3 not-for-profit, NYS chartered association library has a dedicated volunteer Board of Trustees. The Patterson Library helps local, unemployed citizens to fine asking New York State for critical assistance with this renovation and expansion project to ensure its completion in a timely manner for the citizens of the Town of Patterson. Please consider funding this vital public services project as part of the Nec Recovery and Reinvestment. Thank you for your consideration.
Putnam	Airport Town Park and Athletic Complex	$1,500,000	OPRHP	Town Park and Athletic Field Complex to be developed from existing retired airport property. Site will include multipurpose athletic fields, comfort station/park support building, childrens playground, picnic area, parking area, enterance road, accessible paths to all facilities ant other park amenities.
Putnam	Scenic Hudson, Inc. - West Point Foundry Preserve	$3,500,000	OPRHP	Constrcut nature preserve, museum and park.
Putnam	West Point Foundry Habitat Restoration	$312,215	OPRHP	This project will restore four habitat areas of the Preserve that in the 19th-c. served an industrial use: stream, pond, woodlands and marsh buffer. Also planted bioswales will be built on a slope to slow runoff, remove silt and provide habitat. This ispart of a larger project to create an 87-acre outdoor museum and nature preserve that brings to life an industrial marvel and features a restored marsh. The ruins of the West Point Foundry lay in the steep valley cut by Foundry Brook. The brook was channelized with stone which over time fell into the stream. Rubble will be removed in 2,000 sq. ft. brook section to create a natural streambank. A man-made pond stored water from the brook and channeled it to a waterwheel during foundry operations. The silted 1,950 sq.ft. pond (5-8 ft. deep) will be cleaned out and planted along the bank. Invasive trees fill the valley floor and slopes. Ailanthus and Norway maples will be removed along a steep bank and replanted with natives to stabilize the slope and rest
Putnam	Hudson Valley Region	$3,500,000	OPRHP	Scenic Hudson's request for funding for shovel-ready state park improvement projects - specifically - West Point Foundry Preserve - Letter of support from Senator Saland.
Putnam	Scenic Hudson, Inc. - West Point Foundry Preserve	$3,500,000	OPRHP	Constrcut nature preserve, museum and park.
Putnam	Scenic Hudson, Inc. - West Point Foundry Preserve	$3,500,000	OPRHP	Construct nature preserve, museum and park. SUPPORT LETTER
Putnam	COMMUNITY PROJECT	$15,000	OPRHP	THIS PROJECT INVOLVES THE RESTORATION OF AN EXISTING MEMORIAL LOCATED AT SINGER BEACH IN LAKE PEEKSKILL, NEW YORK. REPAIR AND ENHANCEMENT OF STONEWORK TO BE PROVIDED BY A STONE MASON AND HIS/HER CREW. EXTERIOR ILLUMINATION FOR FLAGPOLE PROVIDED BY AN ELECTRICIAN. A NEW BRONZE PLAQUE IS TO BE DESIGNED BY AN ENGRAVER TO REPLACE THE ORIGINAL PLAQUE THAT WAS STOLEN MANY YEARS AGO. THE RESORATION AND EMBELLISHMENT OF THIS MONUMENT WILL PROVIDE THE RESIDENTS OF THE TOWN WITH A LASTING MEMORIAL BOTH REFLECTIVEAND RESPECTFUL IN DESIGN

Putnam	Putnam County Historical Society	$60,000	SED	We send this letter as a request for $60,000 for much-needed, shovel-ready capital projects in 2009. The last few years have seen an incredible amount of change and growth at the Putnam County Historical Society & Foundry School Museum (PCHS?FSM). In 2006, we completed a major renovation of our facility that simultaneously restored the layout of the original West Point Foundry School and created a state-of-the-art museum. A stellar exhibition schedule, including haute couture costumes in The Gilded Age:High Fashion in the Hudson Highlands, 1865?1914 and Hudson River School paintings in This Perfect River-View, has drawn unprecedented attention to our collections. Our new museum has won awards for excellence from both the Lower Hudson Conference of Museums and Hudson Valley magazine. Yet there is much urgent work that remains to be done. As with any old building, preservation is an on-going and costly prospect, and there are several imminent, necessary capital improvements. At the same time, the growiu will consider our package of shovel-ready capital improvements, totaling $60,000. Repairs to our historic site will include sealing and repointing of brickwork, restoration of deteriorating wood elements in the soffit along the roof line, creation of adoor between inner and outer attics, creation of an outdoor brick path, restoration of property fencing, electrical reorganization and cleanup in the basement, custom library cabinetry work, and window replacement. These projects will create jobs for ou

County	Project	Requested $	State Agency	Additional Detail
Queens	New CUNY Law School	$100,000,000	CUNY	CUNY is among the law schools with the highest percentage enrollment of minority students. And it is the number one producer of public sector lawyers in New York State. Some 70% of its graduates are employed in public sector positions.
Queens	Queensboro Community College - Campus Electrical Upgrades	$18,700,000	CUNY_CC	Multi-phase project will replace failing transformers in underground vaults; replace underground distribution cables; replace service equipment in 13 buildings; and provide emergency generators.
Queens	Rockaways YMCA	$8,000,000	DASNY	Construction of a new YMCA for the only community recreation facility in the Rockaways, Queens. Pools, gymnasium, all-purpose child care areas, exercise areas, and outdoor play areas. The building will serve as a child care and health center for this lowincome neighborhood.
Queens	Queens Campus Deferred Maintenance	$10,600,000	DASNY	Replace, renovate and upgrade dated infrastructure for mechanical lighting, control systems, elevator, fire alarms, plumbing systems with high efficiency equipment and controls and to improve the campus.
Queens	Queens Campus Newman Hall IT Data Room	$2,600,000	DASNY	Current data room is at maximum capacity for equipment, growth, cable management and at the threshold of power and cooling capacity.
Queens	Queens Campus St. John Hall Classrooms	$8,900,000	DASNY	Modernize learning environments that meet current standards of higher education and continue the campus wide green initiative.
Queens	Queens Campus St. John Hall Infrastructure	$6,300,000	DASNY	Replace and upgrade dated infrastructure for chiller/mechanical systems, elevator, fire alarm and electrical distribution.
Queens	Queens Central Chiller Plant	$5,000,000	DASNY	The construction of a new building on campus includes a central chiller plant that will serve 25% of the buildings on campus. This is part of the campus-wide green initiative for energy efficiency
Queens	Queens Cogeneration Plant	$8,000,000	DASNY	Cogeneration plant will allow St. John's to provide power to a strategic part of its campus and will reduce dependence on electricity from the local utility company, will reduce emissions by recapturing and utilizing the waste heat and further continue the mission of having a more green campus.
Queens	Staten Island Campus Compost Equipment	$350,000	DASNY	Purchase and create a compost system for the Staten Island Campus as part of the University Green Campus Initiative.
Queens	Staten Island Campus Deferred Maintenance	$1,800,000	DASNY	Replace and upgrade dated infrastructure for the chiller, control systems, elevator, fire alarms systems with high efficiency equipment.
Queens	Library	$4,070,000	DASNY	Build a new library with a media center and appropriate technology-based resources.
Queens	Facility Modernization Project	$106,000,000	DASNY	This project is a major planned capital construction and facility improvement project. This project, while located in Bayside, New York, will result in improving the availability and quality of health care services to a unique population of children withspecial health needs and their families in the entire greater New York metropolitan area. The project will encompass both renovation and new construction - doubling the size of the facility. The concept of the modernized facility will be that of a ""Village"". The new facility is designed to address the specific challenges faced by the unique population we serve. St. Mary's, while licensed under Article 28 of the New York Public Health Law as a skilled nursing facility, actually provides care similar to a children's rehabilitation hospital due to the acuity, medical complexity, short length of stay, exceptional high admission/discharge rate and high rehabilitation needs of the children cared for.The current facility was built in 1950 and has inadequat

County	Project	Requested $	State Agency	Additional Detail
Queens	Environmental Services Center at QCC	$750,000	DASNY	The nation?s colleges are only fulfilling half of their duties with respect to environmental sustainability when they pledge to reduce energy usage and waste. The other half must take place in the classroom, where students need information and training about how to tackle complicated environmental issues and fill new jobs that need to be created in the coming decade. Queensborough Community College will create an Environmental Services Center to train 500 students in areas that include alternative energies and biotechnology. The project?s key objectives include: ?Launch an Environmental Services center through the integration of faculty training, upgraded lab facilities, new and revised courses and focused job placement efforts; ?Support retooling/certificate programs for individuals who need short-term training to upgrade their skills to, for example, install, operate and maintain solar energy equipment; ?Collaborate with businesses such as solar and alternative energy companies, utilities, and gover
Queens	Facility Renovation	$64,536,800	DASNY	Parker Jewish Institute for Health Care and Rehabilitation seeks funding to move forward with our facility master plan for renovating and modernizing our infrastructure. Our plan to renovate the residential floors, include a two phase approach to construction. During the first phase, a 21 bed swing unit will be constructed on an existing vacant floor. Construction and finishing of this unit is expected to take 9-12 months and is necessary in order to horizontally decant our existing resident units in order for them to be fully renovated. The second phase includes renovating the 6 residential floors, consisting of 324 resident rooms and bathrooms. Resident room renovations include flooring, ceiling, wall covering, paint, lighting, window replacement, furnishing, HVAC replacement, and bathroom renovations. In addition, each unit will be fully sprinklered which will necessitate an upgrade to the fire alarm system as well as installation of a secondary water loop to supply resident rooms. Each floor willwalls on the east facade and 2nd floor with energy efficient panels. This project has been approved by the NYS Department of Health in CON #012332-C.
Queens	Columbus Medical Center Renovation Project	$3,000,000	DASNY	NYU School of Medicine recently purchased the 25,000 sq/ft facility located in Rego Park section in Queens. Renovations will allow the School to provide its current patients who reside in Queens wasy access to the Clinical Cancer center.
Queens	St Mary's Hospital for Children, Bayside, Queens	$106,000,000	DASNY	Capital construction and facilities improvement project.
Queens	NYU Langone Medical Center- Columbus Medical Center renovation	$3,000,000	DASNY	Renovations to this newly purchased medical facility will enable current patients who reside in Queens east access the NYU's Clinical Cancer Center.
Queens	Library Services Center	$20,000,000	DASNY	The newly renovated facility, 145,640 sf, will consolidate NYPL's operating functions at one centralized location allowing NYPL to increase it's efficiency and service to the public. The Library Services Center facility will house operating functions such as acquisitions, cataloging, archival processing, digital conversion, micrographics, collections care, conservation labs, photo documentation and disaster recovery. The new LSC will also house shipping and receiving which, with a new state of the art sorter, will allow the processing of 10,000 items per hour for availability to the public for the purpose of acquisitions, cataloging, distribution, care of, preservation and the conservation of NYPL's various collections.

Queens	Tax credit gap financing for proposed building renovations in Queens	$4,500,000	DHCR	Selfhelp Community Services, Inc. owns and operates 6 affordable senior housing apartment complexes in Queens County, all with extensive waiting lists. Two buildings, built in 1964 and 1971, need major capital improvements. Proposed renovations include:new roofs, bathrooms, compactors, windows, & hot water heaters; elevator upgrades; emergency generators; boiler retrofits; public hallway renovations; lobby upgrades; and community space additions. We expect to begin work by June. To finance the renovation, we asked NYSHFA to issue $4.5 million in tax exempt bonds with 4% as of right low income housing tax credits which, under today?s market conditions, would generate $8.7 million in tax credit equity. Due to sharp declines in tax credit investor pricing and availability, we have a financing ?gap? of $9 million which we were hoping to fill through a NYSHFA subsidy as a second mortgage. Additional funding will be provided through sellers? notes, deferred fees, etc. NYSHFA has indicated that, given the s

County	Project	Requested $	State Agency	Additional Detail
Queens	Nursing Career Ladder	$2,000,000	DOH	In the shifting locus of care from hospitals to nursing homes over the past 10 years, a major challenge has been the shortage of workers to provide specialized needed care. Workers with advanced level skills will be in much greater demand as the population ages. The scarcity of trained caregivers to deal with the needs of an aging population continues to be perhaps the most serious handicap faced by many nursing homes. Yet, many frontline workers in nursing homes lack the advanced skills necessary to maintain employment in the nursing home sector. It is difficult for these frontline workers to advance their educational credentials because many are single parents, work two jobs and have been out of school for many years, and because of time restraints,have been unable to advance their education. The cost of education programs and limited time are the greatest barriers to pursuing further education. The Parker Nursing Career Ladder addresses the national nursing shortage with the development of a careeide more flexible learning opportunities ? Encourage disadvantage workers to enter health care professions ? Improve work force retention
Queens	Joseph P. Addabbo Family Health Center's Rescue of St. Dominic's Family	$6,527,250	DOH	Caritas, the current operator of the St. Dominic Center, has declared bankruptcy and is looking to transfer St. Dominic to Addabbo. If the proposed transfer fails, Caritas has indicated that it will abandon the facility. If this occurs, the loss of thisfacility will undermine the health status of area residents by reducing the availability of primary care services to the already seriously underserved residents of Southeast Queens. A 2006 report prepared by the Primary Care Development Corporation for the Regional Advisory Committee to the Berger Commission, which assessed the supply of primary care physicians available to low-income residents of New York City identified the supply in Southeast Queens (zip codes 11434, 11435, 11436) as experiencing a ?Serious Shortage?. Addabbo has been working with the Primary Care Development Corporation (PCDC) to effectuate the transfer from Caritas and to secure the start-up and renovation/outfitting capital needed to provide the foundation for successful operatiocenter; and (3) approximately $1.1 million in initial occupancy expenses, to cover unreimbursed expenses as volume ramps-up; and (4) contingency operating support for unforeseen. Addabbo has been conservative in making initial volume projections. Althougre present for a successful turnaround under Addabbo?s auspices, in light of the chaos associated with the current owner?s financial difficulties, Addabbo has not wanted to understate the potential challenges of moving one facility and taking over anothe
Queens	21st Century Patient Satisfaction Model	$3,000,000	DOH	Today in the healthcare industry, patient satisfaction is now the new healthcare currency in the 21st century. Our innovation introduces the first patient satisfaction model of its kind in U.S. history. Its primary goal is to transform and reform the healthcare industry,the workforce and quality of care delivery from the 20th century ""service model"" to a 21st century ""experience excellence model"" benefitting all whom it affects. Expected Outcomes: This innovation will increase the medicare portion of financial reimbursement of healthcare organizations statewide. It will increase HCAPHS scores, embedd ""best practices"" in care delivery in an overburdened workforce and reduce or eliminate potential losses due to poor service delivery an

County	Project	Requested $	State Agency	Additional Detail
Queens	HIV/AIDS & STD Awareness Conference & Speak Out	$500,000	DOH	The workshops are geared toward African American & Latino boys & girls in the age range of 9-19 because have been shown to be the most highly infected population at this time according to the Center for Disease Control report December 2007-2008. Expectedoutcomes with prevention strategies like this will help curb the increasing rates of HIV transmission and educate and influence thoses who are at risk to reduce or eliminate high risk behavior & decrease their chance of contracting HIV/AIDS & other STD's;also the high incidence of unplanned teenage pregnancies as well.
Queens	RDRC Workforce Development Initiative	$750,000	DOL	The project is focused on providing skills training to low-moderate income persons that will lead to opportunities in the construction and health care industries. RDRC has a commitment from the Carpenters Union to provide carpentry apprentice training se
Queens	Financial Services Retooling Center	$550,000	DOL	Financial Services Retooling Center The effect of the economic downturn on the Financial Services industry is significant in New York City. With thousands of layoffs anticipated due to consolidations or closings, all levels of staffing will be forced tomake decisions about their economic futures. Some may think about retiring, others will look to start a business, while others may seek to leave the industry. Helping these individuals transition, obtain employment, and maintain financial stability, willbe the focus of the Financial Services Retooling Center. Queensborough Community College in conjunction with employment specialists, financial services institutions, and local Chambers of Commerce will meet these key objectives: o Train 500 workers in skills transference, which will teach workers how to apply their skills in other industries; resume writing; interviewing; networking and establishing businesses ? all contextually based using financial services and business management skills. o Targetingries in the NYC metropolitan area to which financial services skills will be transferrable and referrals can be made. Also provide internet access.
Queens	ERDA Workforce Development	$750,000	DOL	The East River Development Alliance (ERDA) is working to transform and improve New York City public housing neighborhoods by providing residents with the tools and opportunities necessary for self-sufficiency and economic mobility. ERDA aims to expand its current Workforce Development initiative with the launch of the ERDA Worker Academy ? an intensive employment preparation and temporary employment program. Through the Worker Academy, ERDA will operate as the employer as well as the job placement center, enabling us to address social service, economic, and skill set barriers, particularly for our harder-to-employ participants. Participants in the Worker Academy will be employed by the ERDA Community Task Force (ECTF) for 6 months. Work assignments with the ECTF will include: neighborhood clean up and maintenance, internships and apprenticeships with local businesses, and special assignments with local nonprofit organizations. Participants will also receive extended soft-skills, financial education, a
Queens	Employment & Job Readiness Computer Prog.	$600,000	DOL	To provide employment & job readiness skills along with computer training workshops for youth, adults, and ex-offenders focusing on the development of key technology skills needed for computer skills and the job market to develop spreadsheets, graphs, reports and financial statements using Microsoft office Excel, Word and PowerPoint to be used as a creative way to present financial reports by way of slide shows. We will also touch on typing skills, The course will be conducted over eight to ten week sessions, each 120 minutes in length. At the conclusion of the course, participants will be able to: become completely computer literate, improve their personal and academic development, gain job ready skills, become advance in Microsoft Office 2007, and gain marketable experience to become gainfully employed.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Queens	Arverne By The Sea	$20,000,000	ESD	Arverne By The Sea is a mixed use Transit-Based urban development that is part of the Arverne Urban Renewal Plan and spearheading the revitalization of the Rockaway Peninsula in Queens, NY. The development is a public- private partnership and is sponsored by the New York City Department of Housing Preservation and Development. The land where Arverne by the Sea is being constructed has been vacant and blighted for over 40 years. It truly was an ""urban waste land"". Arverne By The Sea will contain approximately 2,300 middle income units (comprising of two-family home and condominiums) of which about 15% are designated as affordable. The development will also include a new YMCA community facility with two pool and a baseball field, a new Super Stop & Shop Supermarket, a New Public Charter School as well as approximately 150,000 square feet of retail/commercial space. Arverne by the Sea has already won numerous awards and been hailed as one of the premier urban developments in the Country. Arverne By Thehe last phase of public infrastructure required for Arverne By The Sea. The Infrastructure work includes the installation of new sanitary and storm sewer lines, water mains and new roads including Rockaway Beach Blvd., Beachfront Road, Beach 67th and Beaof this new infrastructure will service the entire Rockaway Peninsula as well as Arverne By The Sea. The first phase of the Public Infrastructure was recentlty completed at a cost of over $45 million. This amount was all paid for by the Developer. The s

County	Project	Requested $	State Agency	Additional Detail
Queens	Minority Business: Strategized and Posed for Growth	$600,000	ESD	Minority Business - Strategized and Poised for Growth Queens, New York is the most diverse county in New York State, if not the nation, and its share of minority owned businesses in the county and neighboring Nassau and Suffolk counties is great. In these economic conditions, New York City area small and mid-size minority business owners and senior executives are struggling to maintain and grow their customer base of both corporate and government entities and meet the upcoming supply chain demands of new infrastructure, transportation, construction, and energy contract opportunities. Queensborough Community College will create a Minority Business Owners Developmental Center that will meet the following objectives: o Launch a Center to serve Queens, Nassau and Suffolk counties that will design, develop and provide educational programs for 300 business owners and their key executives on strategies for growth that will retain and create new jobs, generate new contract opportunities, and increase sales. os such as the MBDA area Enterprise Center, the Queens Chamber of Commerce, Queens Minority Business Owners Association and other CUNY campuses
Queens	21st Century Patient Satisfaction Model	$3,000,000	ESD	Today in the healthcare industry, patient satisfaction is now the new healthcare currency in the 21st century. Our innovation introduces the first patient satisfaction model of its kind in U.S. history. Its primary goal is to transform and reform the healthcare industry,the workforce and quality of care delivery from the 20th century ""service model"" to a 21st century ""experience excellence model"" benefitting all whom it affects. Expected Outcomes: This innovation will increase the medicare portion of financial reimbursement of healthcare organizations statewide by 25%. It will increase HCAPHS scores by 25%, embedd ""best practices"" in care delivery in an overburdened workforce and reduce or eliminate potential losses due to poor service delivery an
Queens	Arverne East	$35,000,000	ESD	The widening, realignment and reconstruction of Shore Front Parkway - the primary East-West access from the Rockaways to Queens and Long Island - from Beach 32nd Street to Beach 62nd Street; including construction of two new transit plazas, with parkingfor 1000 cars. The site is situated on a larger peninsula and is bound by the Atlantic Ocean; good roads and easy access is all the more vital to this location. Funding for the infrastructure of the Project will have an enormous multiplier effect as itwill enable the first and future phases of this important Project to proceed. frastructure work can launch within 180 days and will create 850 jobs -- another 2,000 jobs will result from the construction of more than 1,000 units of workforce housing, acommercial core, a 45 acre nature preserve and visitors center, bids are already solicited. The infrastructure work will all be built using union labor conforming to New York State and City law.
Queens	Arverne by the Sea / Bluestone	$110,000,000	ESD	$35,000,000 for the widening, realignment and reconstruction of Shore Front Parkway. $55,000,000 for the construction of a new street system between Shore Front Parkway and the Boardwalk. $14,000,000 for the construction of a nature preserve, Visitor'sCenter and playground between Beach 44th Street and Beach 56th Street. $3,750,000 to incorporate solar thermal technology into affordable homes.
Queens	Rolling Stock Support Equipment	$6,000,000	LIRR	Purchase of three wheel truing machines

Queens	green recovery: Energy and Environmental Nexus	$500,000	NYSERDA	The Central Queens Y is a non-sectarian community center and a major public asset, housing numerous federal, state and city-funded programs. The 35,000 square foot building is grossly inefficient, causing scarce public and community resources to be waste
Queens	Replacement of Dated and Inefficient Heating Plants in 60 Multifamily Build	$10,500,000	NYSERDA	Vantage is the manager of over 150 rental apartment buildings in NYC, serving over 40,000 low and middle income residents. The average age of these buildings is 60+ years, and nearly half of these properties have aged and defunct heating plants. We havelearned that replacement of these systems can achieve up to a 30% reduction in energy consumption, while also providing more reliable heat to building residents. Furthermore, funding of this program through the ARRA would allow their completion without the need for rent increases under the MCI program, and would thereby keep millions of dollars in the pockets of our residents at a time when every dollar counts.
Queens	Energy-efficient retrofitting in Queens senior housing complexes	$975,000	NYSERDA	Selfhelp Community Services, Inc. owns and operates 6 affordable senior housing apartment complexes in Queens, New York, in addition to 17 other sites for community programs throughout New York City. Three of these buildings receive project-based Section8 assistance. The buildings were constructed with equipment that does not meet modern energy efficiency standards. We seek federal stimulus funds to retrofit these properties for energy efficiency and to install green technologies. Specifically, we areexploring a mix of the following technologies: ?Hot water heaters ?Solar power to heat water & generate electricity ?Either thermal heating or co-generation ?Geothermal cooling Funding would enable us to engage an outside consulting firm to perform an energy audit to determine the feasibility of each of these systems for each of the three buildings. If feasible, we would then hire an architectural/engineering firm and a contractor to perform the specified work. We will perform these steps upon receipt o
Queens	Building construction	$400,000	NYSERDA	Our building project will incorporate Leed construction practices. We are installing Geothermal HVAC and a 25KW grid tied solar system. We are attempting to construct a ""0"" fosil fuel building to house our 104 year old Volunteer FD and Ambulance Co

Queens	Museum Expansion & Renovation	$9,000,000	SED	Features of the Museum of the Moving Image renovation and expansion include a new 264-seat film theater; a new entry lobby, bookstore, and café; two new galleries for changing exhibitions of artifacts and multimedia installations, and a courtyard for outdoor screenings and programs. An Education Center will house a dedicated student entrance, an orientation amphitheater, a 71-seat screening room, a multi-classroom digital media lab, a seminar room, and an experimental production studio. The creation ofthe Education Center will enable the Museum to significantly increase the number of students served each year from 32,500 to well over 60,000, and to expand educational programs for seniors and families.
Queens	Smart Steps Child Development Co	$50,000	SED	Statement of Purpose Smart Steps Child Development Center Co. has three main objectives; these are: 1. To create a safe, educational haven for pre-school aged children 2. To create a comfortable nursery setting for infants and toddlers 3. To develop a viable after-school program for school aged children The participants involved in this venture have been active in the early childhood field for several years and have operated a group family daycare program known as Sanjae?s Group Family Day Care, for over eight years. There is now a great urgency to start up a center based program, in order to better accommodate existing clients and to serve the community. We will continue to practice teaching strategies that reflect a commitment to the learning enrichment of young minds; however an expansion will allow for: the implementation of new and exciting (dance, art, music, etc.) programs. We will also have the ability to employ certified early educators, knowledgeable in the cognitive and physical developmentnjae?s Group Family Day Care); to meet the growing demand for early childhood care programs. Our mission is simple and commonsensical, to serve the community, by providing the type of quality child care for young children that put parents at ease. Due totment to that purpose we have had a positive response from the local community. Our new game plan is to reach out to the public at large by undergoing a change from a group family to a center based program. Our winning formula for attracting and keeping
Queens	In-Language Small Business Stimulus Seminars	$180,000	SED	York College Continuing Education proposes to develop and deliver a series of in- language seminars to disseminate the information on stimulus tax breaks and other opportunities for small businesses. Seminars will be developed in Spanish and Chinese. Delivery format will be 2-hour seminars--breakfast, lunch or evening offered through our current partnerships with local Chambers of Commerce, community based organizations and existing clients of the SBDC. Additionally, the seminar schedule will be postedon the York College Continuing Education and Small Business Development Center (SBDC) web sites. Seminars will be developed and delivered by bilingual business advisors trained by our SBDC. Technical assistance will be provided through the combined resources of the advisor and the SBDC. After two-month startup (training and marketing), we anticipate education for 600 participants--2 seminars in each language with 15 participants each--and technical assistance for 300. Participants will be asked to pay $

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Queens	Help Us Save The Teaching Artists	$100,000	SED	We are a 26-years-old small community-based Arts in Education Non-profit organization based in Long Island City, Queens, NY. operating Citywide in the 5 boroughs of NYC since 1983. We provide unique career development skills training in the arts and entertainment industries to inner city NYC public schools to teachers (for sustainability) and to their students in Grades 6-12, and to learning disabled students ages 16-21. Our programs offer serious training and career opportunities for those otherwise deprived, to obtain truly meaningful jobs or careers in various performing or visual arts, and the related technologies, stagecraft, and production areas, according to their individual abilities and by directing and developing their natural skills or talents to their fullest potential. This funding will allow us to retain the five Teaching Artists we now employ, to keep their jobs, avoid unemployment, and continue our current educational training programs at least through the next 18 months. Hopefully, ou
Queens	Science and Technology Center at CUNY	$25,000,000	Thruway	
Queens	Travers Park Expansion and Renovations	$5,000,000	Unassigned	[Parks Comm'r providing more info]
Queens, Nassau, Suffolk	Station Railing Replacement	$17,000,000	LIRR	Replace platform railings at twenty stations to increase customer safety as current railings do not meet ADA code
Regional Director	Nassau County, Herb Hill/Garvies Point Rd Reconstruction	$0	DOT	curbs
Regional Director	Nassau County, Enhanced Bus Service at the HUB	$500	DOT	Provision of enhanced bus service within the Nassau Hub area tying directly into major intermodal facilities and local generators of activity. The Nassau Hub contains two universities, major retail establishments, the Nassau Coliseum and Museum Row, buthas limited mass transit options and very few pedestrian-friendly features.á The project will result in a reduction in the number of single occupied vehicles and an attendant decrease in vehicle- miles travelled, and in increased public access to localbusinesses and economic anchor facilities. á",DOT,"$4
Rensselaer	Urban Grow Center Project	$5,000,000	AGMKT	This project calls for the construction of a new Urban Grow Center where CDCG can reinforce and extend its core mission of bringing food security and self-reliance to the people ot the Capital Region.
Rensselaer	Veggie Mobile	$50,000	AGMKT	Capital District Community Gardens (CDCG) was established in 1972 (incorporated in 1975) as a private, non-profit community service organization dedicated to working with low-income people in the inner cities of our region to foster self-sufficiency through the rewards of gardening. CDCG helps families cut their living costs by growing food locally, transforms vacant lots into productive neighborhood garden spaces, and beautifies urban areas through landscaping and urban tree programs. Our mission is toconnect inner city residents in the Capital Region to local food sources. We continue to create innovative ways to accomplish this goal whether food is raised in one of the Capital District Community Gardens? garden plots as part of our Community Gardening Program or received by those in need from a food pantry through our Squash Hunger Program, tasted in our Taste Good Series for kids or purchased on The Veggie Mobile, our new mobile food market launched in April 2007. The Veggie Mobile is connectingcity residents, particularly families and their children. Children are currently at serious risk due to the obesity epidemic which coexists with the lack of availability of healthy foods. To provide easy access to nutritious food options, CDCG brings the. Launched in April 2007 and running year-round, The Veggie Mobile provides convenient access to healthy, fresh food in inner city neighborhoods in Schenectady, Albany and Troy. These neighborhoods have easy access to liquor, tobacco and candy but limit
Rensselaer	Co. of Rensselaer Housing Rehabilitation	$300,000	CDBG

New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Co. of Rensselaer Accessibility Project	$150,000	CDBG	
Rensselaer	T. of Schodack South Rensselaer County Family Resource Center	$600,000	CDBG	
Rensselaer	T. of Nassau Burden Lake Sewer Project	$600,000	CDBG	
Rensselaer	C. of Renssealaer Broadway Infrastructure Improvements	$600,000	CDBG	
Rensselaer	RENSSELAER STATION CAPACITY IMPROVEMENTS PHASE II	$500,000	CDBG	RENSSELAER STATION CAPACITY IMPROVEMENTS PHASE II
Rensselaer	Hydrant Replacment	$3,000,000	CDBG	The City of Troy has over 1,500 fire hydrants with many that need to be replaced due to age and use. Some are currently inoperable while others are obsolete.
Rensselaer	City-Wide Water Meter Replacement	$4,050,000	CDBG	The City of Troy has over 13,000 water meters and uses them as the main source of revenue for the water and sewer departments. They also generate revenue for the Rensselaer County Sewer District #1. Residents are charged for water and sewer use based onthe meters and the readings. The City takes efforts to replace old outdated meters but the necessary funds are restricted due to volume and cost of the meters needed.
Rensselaer	rehabilitation and Upgrade of City sewage Pump Stations	$500,000	CDBG	The City has several areas where it must pump sewage to get it to an elevation where it can flow by gravity to the county interceptor main. This project will rehabilitate and upgrade the City Sewage Pump Stations including replacement of antiquated pumps, piping and instrumentation with high efficiency energy saving pumps, motors and control technology.
Rensselaer	Neighborhood Stabilization	$15,000,000	CDBG	Target 150 vacant housing units for acquisition and rehabilitation (or, where appropriate, demolition) to alleviate blighting conditions in CDBG-eligible neighborhoods
Rensselaer	Infrastructure & Development Projects	$100,000	CDBG	Blight Removal
Rensselaer	County Office Building&Senior Centers Accessibility	$570,000	CDBG	County Office Building&Senior Centers Accessibility
Rensselaer	Public Library Accessibility	$1,000,000	CDBG	Public Library Accessibility
Rensselaer	Hoosick Rd Rt 7 from Rt 142 Sanitary Sewer Line	$675,000	CDBG	Hoosick Rd Rt 7 from Rt 142 Sanitary Sewer Line
Rensselaer	Drinking Water Booster Pump Vanderheyden Reservoir	$450,000	CDBG	Drinking Water Booster Pump Vanderheyden Reservoir
Rensselaer	Two Million Gallon Storage Reservoir	$525,000	CDBG	Two Million Gallon Storage Reservoir
Rensselaer	Water Meter Project	$375,000	CDBG	Water Meter Project
Rensselaer	Hoosick Road Water Transmission Main	$550,000	CDBG	Hoosick Road Water Transmission Main
Rensselaer	Waste Water Infrastructure	$575,000	CDBG	Waste Water Infrastructure
Rensselaer	Town Municipal Center Emergency Generators	$125,000	CDBG	Town Municipal Center Emergency Generators
Rensselaer	County Office Building and Senior Centers Accessibility	$684,000	CDBG	County Office Building and Senior Centers Accessibility
Rensselaer	Public Library Accessibility	$1,000,000	CDBG	Public Library Accessibility
Rensselaer	Handicap Ramp Town Hall	$20,000	CDBG	Handicap Ramp Town Hall
Rensselaer	Nassau Blight Removal Project	$100,000	CDBG	These funds would provide demolition and removal costs for dilapidated and abandoned structures in the community. Such efforts promote redevelopment and community investment.
Rensselaer	Comprehensive Plan Completion	$25,000	CDBG	Funding of this program will allow the Town to complete it's Comprehensive Plan thus providing the necessary information and framework to attract new business development. The Town has secured funding for $20,000. of the contract with CT Male. Without further funding the completion will be delayed.
Rensselaer	Town of Brunswick - water infrastructure	$1,905,000	CDBG	(a)Water booster pump station for drinking water, (b)water storage resevoir paint and upgrade, (c) water meters and (d)Hoosick Rd water transmission main
Rensselaer	Town of Brunswick wastewater infrastructure	$1,250,000	CDBG	(a) Pump station improvements and (b) Hoosick Rd Sanitary Sewer - NY Rte 7 (from Rte 142 to McChesney Ave)

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Rensselaer	DPU Public Utilities Construction and rehabilitation	$250,000	DASNY	The Department of Public Utilities complex was built in the 1960?s and some of the buildings are in need of repair. The area over the chemical feed room at the WTP where chemicals are added to the drinking water is leaking and causing problems with the equipment that monitors the chemical flows. The Administration building is leaking causing equipment malfunctions.
Rensselaer	Repair of Fifth Avenue Parking Garage	$350,000	DASNY	Replacement of leaking Butyl joints in the four (4) level parking structure, repair expansion joints. Structural repair of spalled and deteriorating concrete deck, provide inside &outside security lighting. Seal deck.
Rensselaer	Repair of State Street Parking Garage	$550,000	DASNY	Remove spalled concrete from surface and underside of concrete decks from the five (5) level structural steel-frame and concrete deck and structural frame. Improve drainage throughout garage; repaint steel. Restoration of stair tower, provide security lighting, seal cove deck
Rensselaer	Renovation of Firehouse-Engine 6	$375,000	DASNY	Replace structural floor system in Apparatus Room. Provide Canal Avenue & Third Street proper and safe access to basement area. Replace windows with efficient windows and energy efficient lighting. Restore/re-point and secure brick and stone exterior masonry. Upgrade wiring.
Rensselaer	Renovation of North Street Firehouse	$345,000	DASNY	Replace deteriorating floor system in Apparatus Room, Engine No #4 upgrade electrical system and outdated fixtures; replace HVAC and lighting with energy efficient systems. Replace/restore failed and deteriorating brick and stone masonry; provide insulation in ceiling area, paint deteriorated/water stained interior. Replace damaged acoustic ceiling.
Rensselaer	Energy and Physical Improvements to Frear Park Public Buildings	$450,000	DASNY	Restore brick and stone masonry gazebo area, skeletal frame roof and slate shingles, replace deteriorated concrete walks, water supply, solar lighting and electrical outlets and fixtures and fountain area. Restore roofing, brick masonry and timber-roof framing of Arcadia Building.
Rensselaer	Construction of New City Hall	$17,000,000	DASNY	Replace existing deteriorating City Hall and failing parking deck structure with a new LEED-certified municipal building consisting of a two level parking area, commercial space and two levels of municipal offices. Funding has already been secured for demolition of the existing structure ($921,000) and construction of the new parking area ($2,700,000)
Rensselaer	Construction of North Central Community Center	$5,000,000	DASNY	Intergenerational community center to be used for child care, employment training, medical services and educational purposes.
Rensselaer	Infrastructure & Development Projects	$6,000,000	DASNY	Nassau Community Center and Government Offices
Rensselaer	Center for Science and Innovation	$100,000,000	DASNY	This project will replace, expand and upgrade the existing Science Center. The new Center for Science and Innovation will provide 120,000 sf of new laboratory space for research and undergraduate education. The new center will be adjacent to and connected to the existing Science Center. The existing Science Center will be renovated for offices, academic programs, classrooms, dry labs, technology space and conference space. In addition, the existing observatory will be renovated.
Rensselaer	Energy Efficient Facade and Exterior Restoration for the Low Center	$12,000,000	DASNY	This Project will provide an energy efficient facade to replace the building's deteriorated brick facade and infrastructure. The new energy efficient facade will use an insulated terra cotta rainscreen system and result in substantial energy savings. This Project will also serve as a research project in concert with the Institute's School of Architecture to evaluate the use of this system in the United States.
Rensselaer	Energy Efficient Retrofit of Campus Facilities and Infrastructure	$15,000,000	DASNY	This Project will provide and install energy efficient construction equipment and technology across the campus to substantially reduce energy usage and carbon emmissions. the energy efficiency measures included in this Project will have an overall payback of seven (7) years.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Information Technology Infrastructure	$1,000,000	DASNY	Rensselaer, in concert with NYSTAR and other partners, including government, industry and other universities will provide networked, high performance computers and associated technologies including interactive, imerive visualization tools to facilitate research and development as well as providing the necessary links between universities, government, industry and emerging technology companies.
Rensselaer	Research Facilities and Infrastructure for Materials Fabrication and Charact	$16,000,000	DASNY	This Project will provide Rensselaer with a new Nanoscale Materials Characterization Core Facility and an upgraded Clean Room Facility to enable and expand research and facilitate new discoveries in the existing Rensselaer Signature Thrusts areas of nonotechnology, energy and the environment and biotechnology.
Rensselaer	Renovation of East Street Public Library	$1,000,000	DASNY	Renovation of East Street Public Library
Rensselaer	Firehouse in Northend of City	$0	DASNY	Firehouse in Northend of City
Rensselaer	Highway Department Facilities Improvement	$1,700,000	DASNY	Highway Department Facilities Improvement
Rensselaer	Retrofitting an old building for a 21st century school	$500,000	DASNY	Tech Valley High School, an innovative regional public high school, is requesting funds to retrofit space at the UAlbany East Campus (former Sterling Winthrop Labs in Rensselaer) to provide a home for the school for the fall of 2009 ? the school has outgrown its current location in Rensselaer Technology Park. The project is ready to go. Since the school is legally a BOCES program, it is not eligible for the usual construction funding and building aid that school districts have access to. Without Recovery Act funding, the costs of preparing space for the school would be borne by participating school districts at a time when they are already facing devastating budget cuts. Providing Tech Valley High with a $500,000 construction grant would not only insure that the school has a space to operate in but provide important relief to taxpayers that will be felt around the region. Tech Valley High School is a regional STEM high school ? the first of its kind in upstate New York ? that is open to students in 47hares its professional practices and curriculum with educators and schools in the immediate region as well as with schools in other regions of New York State. The requested funds would be used for: ? Renovations, upgrades and improvements for 22,000 squaindustrial building for use as classrooms, science laboratories, office space, and general support; ? Installation of energy efficient lighting, heating, cooling, and ventilation systems; ? Technology infrastructure ? for both hardwire and wireless class
Rensselaer	Public Library	$600,000	DASNY	The City of Rensselaer has purchased a building at 676 East Street for use as a public library. It plans to renovate this building to replace the current library that is undersized, lacks parking, and is not handicapped accessibly. An Architectural firm is developing design documents that will be ready to put out to bid in March 2009.
Rensselaer	Town Hall Moderization Project	$350,000	DASNY	This proposal would reconfigure Nassau?s current 200 year-old farmhouse/Town Hall to provide access to services for the mobility challenged and provide desperately needed office and meeting space. This proposal includes utilizing the existing structure with a historically appropriate addition on the current site of the town hall. This project would allow for greater energy efficiency for the Town but would also not remove any property from the tax rolls and would provide a centralized location for Townservices.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Nassau Government Center Green Building Project	$6,000,000	DASNY	This is the alternative proposal to the Town?s renovation of its existing facility. This proposal would allow for the development of a green centralized government facility to combine town and community services in one location. Such a move would free upadditional lands for community development. The Town has far outgrown their current location in a 200 year-old farmhouse. Many offices are not accessible for all members of the community and any large public hearing is not able to be held at the location. Conflicts with court hearings and other required meetings limit the effectiveness of town government. This proposed project would be located on town owned land on Route 20 in Nassau. Further, this estimate includes engineering and development as wellas construction
Rensselaer	Rensselaer County, RPI - Center for Science and Innovation - Energy-effici	$100,000,000	DASNY	Rensselaer County, RPI - Center for Science and Innovation - Energy-efficiency Improvements This project will replace, expand and upgrade the existing Science Center. The new Center for Science and Innovation will provide 120,000 sf of new laboratory space for research and undergraduate education. The new center will be adjacent to and connected to the existing Science Center. The existing Science Center will be renovated for offices, academic programs, classrooms, dry labs, technology space and conference space. In addition, the existing observatory will be renovated.
Rensselaer	Expand the South Troy Health Center	$1,358,727	DASNY	The existing South Troy Health Center, affiliate of Samaritan Hospital is seeking funding for the purpose of expanding primary care services. Expanded services will include family practice, behavioral health and diabetes care for 2,000+ patients. The Center is within a ""Medically Underserved Area"". The sustainability of both programs is baed on a delivery model called ?family team care?. This model provides a platform capable of efficiently providing care coordination for larger primary care populations of patients, while expanding into additional preventive health programs associated with a broader range of chronic medical conditions. Time frame to start is based on need for CON applicat
Rensselaer	Waterfront	$2,000,000	DASNY	In conjunction with the Waterfront Development there is a need to construct a sea wall at the water edge of the River
Rensselaer	Water System Security	$1,200,000	DCJS	Water security has become a large and important responsibility of municipalities and is not easily fundable by any federal or state agency. The Water Department has made great strides to secure areas with funding from the annual budget but has been unable to get to the degree of security needed due to the expense. The City has been working with BECATECH to try and obtain funding for security improvements and has not been successful. The project entails the installation of a protective security system across the entirety of Troy?s drinking water infrastructure.
Rensselaer	Tomhannock Reservoir Spillway Rehabilitation	$300,000	DEC	The Tomhannock Reservoir was built in the early 1900?s with many manmade structures. Parts of these structures include an earthen dam and a spillway. The spillway was upgraded in the 1960?s. Due to the extreme weather and use conditions, the spillway concrete takes much abuse and the surface is in need of rehabilitation.
Rensselaer	Chemical Unloading Area	$250,000	DEC	When the water treatment plant was first constructed in the late 60?s it met all guide lines for chemical unloading and shipments. With new regulations and safety guidelines required by federal and state governments the unloading areas are not adequate.The existing area needs to be rebuilt because of corrosion to the concrete and rebar and new areas must be built to meet current guidelines.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Cosntruction of Hudson River Bulkhead	$3,850,000	DEC	Install 1,000 LF of sheet pile bulk-head WPH with concrete ?deadmen? and a concrete cap. Remove deposited sediment and restore the channel way for barge access. Construct reinforced concrete piles and a pile cap for a crane base. Install and place a 200ton ring crane for barge material loading and unloading. Construct a railroad spur for access to the ring crane.
Rensselaer	Infrastructure & Development Projects	$120,000	DEC	Nassau Transfer Station Re-Development
Rensselaer	Effluent Disinfection	$2,900,000	DEC	Effluent Disinfection
Rensselaer	Fort Orange Paper Company Site Remediation	$1,700,000	DEC	Fort Orange Paper Company Site Remediation
Rensselaer	South Troy Industrial Park Remediation	$2,788,000	DEC	South Troy Industrial Park Remediation
Rensselaer	Dewey Loeffel Land-fill Clean-up-Access Road	$250,800	DEC	Dewey Loeffel Land-fill Clean-up-Access Road
Rensselaer	Flood Control	$0	DEC	Flood Control
Rensselaer	Demolition of BASF Plant at Port of Rensselaer	$0	DEC	Demolition of BASF Plant at Port of Rensselaer
Rensselaer	Demolition on Fourth Street	$0	DEC	Demolition on Fourth Street
Rensselaer	Repair Retaining Wall on Fifth and John Street	$0	DEC	Repair Retaining Wall on Fifth and John Street
Rensselaer	Soils Failure and Drainage Culvert in Falcon Chase	$0	DEC	Soils Failure and Drainage Culvert in Falcon Chase
Rensselaer	Flood Control along Quackenderry Creek	$1,500,000	DEC	Flood Control along Quackenderry Creek
Rensselaer	Wynantskill Creek Dredging Project	$1,500,000	DEC	Wynantskill Creek Dredging Project
Rensselaer	Urban Grow Center Project	$5,000,000	DEC	This project calls for the construction of a new Urban Grow Center where CDCG can reinforce and extend its core mission of bringing food secuirt and self-reliance to the people of the Capital Region. The Center will be a Gold/Platinum LEED certified building with attached greenhouses and will serve as a hands on jjob training center for BOCES students, thousands of community gardeners and the general public. The new Center will create 26 jobs and provide 35 job training positions annually.
Rensselaer	Port of Rensselaer - BASF Site	$5,000,000	DEC	This City of Rensselaer is seeking to demolish buildings at the former BASF site at the Port of Rensselaer. This would remove fourteen buildings that have bee vacant since BASF left Rensselaer over a decade ago. The cost of the demolition has preventedthe redevelopment of this thirty two acre site.
Rensselaer	Nassau Transfer Station Redevelopment Project	$150,000	DEC	The efficiency of waste disposal is impacted by having large dumpsters and solid waste exposed to the elements. Waste becomes saturated and heavy from the impact of rain, snow and ice. This increases tipping fees and provides impact on the area with theblowing of debris. This proposal would provide an enclosed steel-frame structure to provide for community recycling services and reduce the waste stream in the community. This project would create an enviromentally friendly facility. Plans are already developed and require funding to move forward.
Rensselaer	Town of Brunswick - Stormwater Project	$1,100,000	DEC	Stormwater collection systems
Rensselaer	Rensselaer County, Dewey Loeffel Landfill Clean-up/Access Road	$250,800	DEC	Rensselaer County, Dewey Loeffel Landfill Clean-up/Access Road Project would eliminate the continued leaking of contamination from the landfill and strengthen a one-mile portion of Mead Road so that it can bear the weight and width of the equipment andvehicles necessary to proceed with the clean-up operation of the landfill.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Rensselaer County, Fort Orange Paper Company site	$1,700,000	DEC	Rensselaer County, Fort Orange Paper Company site - Remediation of paper mill site containing 102 acres upon which are located several buildings, including a main manufacturing building and several ancillary structures. Until summer 2007, EPA worked toeliminate asbestos that was deemed hazardous to human health and the environment. However, EPA demobilized in 2007 before ridding the site of all asbestos contamination which now obstructs redevelopment of the property. The site could be fully remediated and ready for redevelopment as a tax revenue-producing industrial location.
Rensselaer	Slope Stablization	$3,200,000	DEC	In the Hollow area of the City there is a severe need for slope stablization due to erosion and collapse of hillsides.
Rensselaer	Lead Paint Remediation	$2,000,000	DHCR	Fully remediate lead paint from 80 ? 100 housing units in CDBG-eligible neighborhoods.
Rensselaer	School 10 Apartments	$150,000	DHCR	Developed through the Division of Housing and Community Renewal, School 10 Apartments offers 20 apartments to low and very low income households, among them working families, and, in two instances, households at risk of homelessness. Owner TAP, Inc., byregulation must make the apartments available to people earning 60 percent and below Area Median Income. Most tenants, however, earn much less. The apartments are housed in an adaptively used historic school, fitted with approximately 171 large windows,which must remain according to state preservation law. Because School 10 shelters tenants with Section 8 subsidies, tenant-based assistance administrator Troy Housing Authority has instructed the owner to eliminate lead paint on the exterior of the windows by June, or the housing authority will withdraw subsidies, forcing tenants to move. The continued drain on reserves also puts at risk the quality of life of tenants, whether their rent is subsidized or not. The disruption of leaving the comfort and sery building, TAP cannot sustain the crushing financial pressure caused by this deadline. Tap is requesting $150,000 in emergency assistance to eliminate lead hazards and replace the slate roof, which also is failing to the point of shedding slate, whichanger. These repairs will allow tenants to retain their homes and, in turn, their livelihoods.
Rensselaer	Town of Nassau Section 8 Housing Program	$100,000	DHCR	Expansion of existing Section 8 Program.
Rensselaer	Department of Motor Vehicles Accessibility	$800,000	DMV	Department of Motor Vehicles Accessibility
Rensselaer	RT 22 Rehab over Kinderhook Creek	$2,200,000	DOT	
Rensselaer	Empire Corridor - Rensselaer Station Phase 2	$12,000,000	DOT	
Rensselaer	RT 22 over Kinderhook Creek	$2,750,000	DOT	RT 22 over Kinderhook Creek
Rensselaer	Rehabilitation of the Route 67 bridge over Hoosick River Town of Hoosick	$1,760,000	DOT	Rehabilitation of the Route 67 bridge over Hoosick River Town of Hoosick Rensselaer County.
Rensselaer	Replacement of the Route 7 bridge over Hoosick River BIN 1004310	$7,370,000	DOT	Replacement of the Route 7 bridge over Hoosick River BIN 1004310
Rensselaer	Congress Street From 11th Street to Pawling Avenue	$12,680,000	DOT	Congress Street From 11th Street to Pawling Avenue Execution of ROW agreements and utility relocation may cause schedule delays
Rensselaer	Troy/Menands Bridge Ped Safety Sidewalk	$1,650,000	DOT	Troy/Menands Bridge Ped Safety Sidewalk
Rensselaer	Sidewalk Construction on Brookside Avenue and at the Intersection of Pers	$90,000	DOT	Sidewalk Construction on Brookside Avenue and at the Intersection of Pershing Avenue and Peck Road Sidewalk project promotes/facilitates pedestrians
Rensselaer	Brookside Avenue over Wyantskill: Bridge Replacement	$1,200,000	DOT	Brookside Avenue over Wyantskill: Bridge Replacement Design of Project has not begun
Rensselaer	East Greenbush Sherwood New Jersey and Ontario Avenues Sidewalks	$1,665,000	DOT	East Greenbush Sherwood New Jersey and Ontario Avenues Sidewalks On illustrative list
Rensselaer	Broadway over AMTRAK Bridge Replacement	$3,250,000	DOT	Broadway over AMTRAK Bridge Replacement
Rensselaer	Lower Congress and Ferry Streets Reconstruction	$7,930,000	DOT	Lower Congress and Ferry Streets Reconstruction Engineer

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Construct sidewalks on First Alley in Rensselaer and realign road/intersect.	$184,000	DOT	Construct sidewalks on First Alley in Rensselaer and realign road/intersect. Project scope is larger than approved STIP additional funding of $184 000 is needed
Rensselaer	CaretakerÆs Road over Walloomsac River	$1,300,000	DOT	CaretakerÆs Road over Walloomsac River
Rensselaer	Broadway from US 20 to Broadway Viaduct Bridge: Reconstruction	$7,010,000	DOT	Broadway from US 20 to Broadway Viaduct Bridge: Reconstruction
Rensselaer	CR 26 Bridge over Black Creek Bridge Replacement BIN 3303820	$780,000	DOT	CR 26 Bridge over Black Creek Bridge Replacement BIN 3303820 Project not yet initiated
Rensselaer	Elm Street Bridge Berlin Bridge Replacement	$1,000,000	DOT	Elm Street Bridge Berlin Bridge Replacement Project not yet initiated

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Fog sealing	$8,110	DOT	Fog sealing
Rensselaer	Reconstruction of Broadway Corridor	$1,000,000	DOT	Reconstruction of Broadway Corridor
Rensselaer	Engineering for I-90 Connector	$1,500,000	DOT	Engineering for I-90 Connector
Rensselaer	Rensselaer Technology Park Access Highway	$25,500,000	DOT	Rensselaer Technology Park Access Highway
Rensselaer	Brookside Avenue Bridge Replacement Project	$5,500,000	DOT	Brookside Avenue Bridge Replacement Project
Rensselaer	Snyders Lake Road Realignment Project	$2,000,000	DOT	Snyders Lake Road Realignment Project
Rensselaer	Winter Street Extension Traffic Signalization Project	$2,500,000	DOT	Winter Street Extension Traffic Signalization Project
Rensselaer	NYS Rte 43 Reconstruction Project	$10,000,000	DOT	NYS Rte 43 Reconstruction Project
Rensselaer	Snyders Lake Sidewalk/Bikeway Improvement Project	$50,000	DOT	Snyders Lake Sidewalk/Bikeway Improvement Project
Rensselaer	NYS Rt 4-NYS Rte 151 Intersection Improvements	$7,000,000	DOT	NYS Rt 4-NYS Rte 151 Intersection Improvements
Rensselaer	Transportation Infrastructure	$1,200,000	DOT	NYS Rt 4- Mannix Road Improvements
Rensselaer	NYS Rt 4 - I-90 Exit 9 Eastbound Interchange	$3,500,000	DOT	NYS Rt 4 - I-90 Exit 9 Eastbound Interchange
Rensselaer	Sherwood Ave Sidewalks and utilities	$1,890,000	DOT	Sherwood Ave Sidewalks and utilities
Rensselaer	Rt 151 Pedestrian and Bicycle Improvements	$1,962,000	DOT	Rt 151 Pedestrian and Bicycle Improvements
Rensselaer	Highway improvements	$300,000	DOT	This project will rebuild 7 miles of town road that need immediate attention. The cost includes excavation, materials, culvert pipe replacement, binder and blacktop for the roadways. Town forces will be used to do some of the site work, i.e., excavationand culvert replacement. Roadway repaving will be done by an outside contractor.
Rensselaer	Old Mill Pond Road Bridge Construction	$150,000	DOT	The current concrete structure needs to be completely rehabilitated. This project would involve Town and outside entity contributions.
Rensselaer	Hogarty Road Reconstruction Project	$150,000	DOT	This town road is in serious deteriorating condition due to underlying clay and significant increased traffic with development in the area. This road needs to have a new underlayment and would be economically chip-sealed to provide a standard road surface.
Rensselaer	NYS Rt 4& Co Rt 151 Intersection Improvements	$6,500,000	DOT	This intersection has existing deficiencies and constrictions. Planned develpment in the area must have this improvement for the traffic system to function. A new roundabout is planned as well as turning lanes, right of ways and infrastructure improvements.
Rensselaer	NYS Rt 4 and Mannix Road Improvements	$450,000	DOT	Rt 4 corridor is a two lane road and Mannix Road is slated for development as are other sections of Rt 4 in this vicinity. The intersection will require a roundabout and related infrastructue improvements
Rensselaer	NYS Rt 4 and Interstate 90 - Exit 9 Interchange	$3,500,000	DOT	The one lane exit 9 onto a two lane Rt 4 is in adequate for future needs. This interchange must be rebuilt with a new roundabout and road reconstruction in both directions.
Rensselaer	Sherwood Ave Sidewalks and Uitlites	$1,550,000	DOT	This County/Town Road (Sherwood Ave) experiences heavy traffic, poor drainage, other related infrastructure problems and there are no sidewalks. The Town can be awarded $344,000 FHWA funds if the project commences in 2009, otherwise the Town has to reimburse $90,000 of design cost back to FHWA.
Rensselaer	Rt 151 Pedestrian & Bicycle Improvements	$430,000	DOT	Rt 151 does not have sidewalks or other means of non vehicle transportation. The area is highly developed and public safety is a concern to the area residents. The majority of funds (80%) are available from a NYSDOT program.
Rensselaer	S.E. Hollow Bridge Replacement	$80,000	DOT	Funding of the project provides for the replacement of bridge(BIN 2201520)that crosses Southeast Hollow Brook. This bridge had been red flagged by the State for structural problems. the bridge is currently under a monitoring program untill it is replaced. The substitution of a preformed culvert will provide increased load capability and give a cost avoidance of at least $420,000.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Town of Brunswick -bridge projects	$75,000	DOT	Dater Hill Rd Bridge, John Snyder Road bridge, Deepkill Rd Bridge
Rensselaer	Town of Brunswick - road projects	$567,835	DOT	hot mix paving and fog sealing
Rensselaer	Water transmission main	$30,000,000	EFC	The two (2) existing raw water mains supplying water from the Tomhannock Reservoir are over 100 years old and need to be replaced in order to maintain a water supply. The new main will be seven (7) miles long.
Rensselaer	Water Storage Tanks Lead Abatement	$3,500,000	EFC	The three (3) large drinking water storage tanks were resurfaced in 1999. The resurfacing did not include the removal of the original external lead based coating. The existing coating is failing due to the non-removal of the lead based coating. Correction of the problem is to remove all coatings and replace with a new one-part Tenemec coating.
Rensselaer	Sedimentation basin reconstruction	$3,120,000	EFC	There are eight (8) sedimentation basins at the John P. Buckley Water treatment Plant that are required as part of the pre-filtration process to settle out particulate matter in the raw water. These basins are original, over 40 years old and are submerged in water year round. The concrete is breaking down and is in need of resurfacing with an approved material that is approved to be in direct contact with drinking water.
Rensselaer	Transmission Main Right of Way	$420,000	EFC	The current transmission mains are parallel and are about 5 to 10 ft apart. The Right of Way (ROW) containing the mains is overgrown with areas in not accessible to people or equipment. If repair work is needed on the transmission mains it takes considerable time to locate the leak and provide access the area so work could begin.
Rensselaer	Transmission Main Right of Way Clearing	$200,000	EFC	The current water transmission mains are over 100 years old and so are the valves that control the flow of water through them. The valves should be replaced to ensure proper and safe control of the flow in the transmission mains, especially in emergencyconditions. If a new water transmission main were constructed, the current mains would become secondary but would still need to have safe and satisfactory valves controlling the flow.
Rensselaer	Combined Sewer Collection System and CSO's	$35,000,000	EFC	The City is involved with the Albany Pool communities to establish a Long Term Control Plan that will evaluate the current CSO concern and devise a plan that will overall reduce the amount of overflows. The City has several surface streams that enter into the City?s Combined Sewer Collection System. The Combined Sewer Collection System and combined Sewer Overflows (CSOs) Improvement Project will include, but not be limited to separation of influent creeks and streams, correction of hydraulic deficiencies associated the City?s deterioration infrastructure system and other required improvements necessary to reduce the City?s CSOs associated with Phase II implementation of the Albany Pool CSO Phase I Long Term Control Plan (LTCP). The City of Troy currently has 49 CSOs the most of any municipality in upstate New York.
Rensselaer	Water and Sewer Service	$1,500,000	EFC	Provide water and sewer infrastructure throughout 50+ acre City-controlled Industrial Park Funding has already been secured for access road and building demolition
Rensselaer	Infrastructure & Development Projects	$2,500,000	EFC	Town of Nassau, New York
Rensselaer	Water and Sewer Replacement full road Construction	$5,000,000	EFC	Water and Sewer Replacement full road Construction
Rensselaer	Storm Water Project Phase I	$225,000	EFC	Storm Water Project Phase I
Rensselaer	Storm Water Project Phase II	$875,000	EFC	Storm Water Project Phase II
Rensselaer	Washington Avenue Sewer Replacement	$9,000,000	EFC	Washington Avenue Sewer Replacement
Rensselaer	Pump Station Improvements	$7,658,000	EFC	Pump Station Improvements
Rensselaer	Replace 5 million Gallon Water Tank	$6,124,360	EFC	Replace 5 million Gallon Water Tank
Rensselaer	Water District No. 15 Water Improvements	$9,500,000	EFC	Water District No. 15 Water Improvements

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Sanitary Sewer Improvement Projects	$120,000	EFC	Sanitary Sewer Improvement Projects
Rensselaer	Water Pipe and Main from Tomhannock Reservoir	$11,000,000	EFC	Water Pipe and Main from Tomhannock Reservoir
Rensselaer	Town of Poestenkill public drinking water	$100,000	EFC	Establish a public water system.
Rensselaer	Joint Water System Improvement	$6,114,360	EFC	Water supply and Distribution system project
Rensselaer	City of Rensselaer - Water and Sewer Infrastructure	$5,000,000	EFC	The City of Rensselaer seeks funding to replace failing water and ser infrastructure, and full road reconstruction on Washington Ave. Existing services are not able to provide adequate water for residential use or fire protection. Aging sewer lines have a long history of backups into adjoining homes.
Rensselaer	City of Rensselaer - Water Tank	$3,062,180	EFC	The City of Rensselaer and the Town of East Greenbush are replacing a jointly owned five million gallon water tank that is undersized and structurally failing. The tank will be replaced by two five million gallon tanks that will serve current residents/businesses, and accommodate future growth. Both communities have new redevelopment projects that cannot be realized without replacing the water tank, including a riverfront development that will transform Rensselaer and significant commercial growth along Rte 4 corridor in East Greenbush . This funding includes upgrades and improvements to the City's existing water distribution system. It has been award to a contractor and construction is ready to begin April 2009.
Rensselaer	Shared Municipal Sanitary Sewer Service	$6,555,000	EFC	Shared Municipal Sanitary Sewer Service
Rensselaer	Town of Schaghticoke Melrose Pump Station	$40,000	EFC	This project will eliminate the use of an existing underground pit that houses valves, a water meter and chlorine injection equipment. The equipment would be repiped into an existing building. The existing valve would be replaced with an Electrically Positioned Throttling Valve. Moving this equipment from a pit into a building would accomplish several objectives: the investment in the infrastructure is protected, enable a more thorough check of important controls, outside service calls will be reduced and control of chlorine residuals will be improved.
Rensselaer	Burden Lake Sewer Project	$2,600,000	EFC	The proposed project is for municipal sewer services to residences currently not served and protection of an environmentally sensitive area surrounding Burden Lake in the Town of Nassau. The Town of Nassau is requesting funding to offset costs associatedwith running a main line through the target area, stemming from across the Town Boundary in the Town of Sand Lake. The antiquated, inadequate and failing septic systems are having a detrimental effect on Burden Lake as a natural resource and recreational venue, and are threatening the community?s water quality. The NYS DEC Division of Water Citizens Statewide Lake Assessment Program (CSLAP) monitors a number of parameters (biological, physical and chemical characteristics), and has documented the negative effect of the current septic systems on Burden Lake and the community.
Rensselaer	Pump Station Improvements Project	$7,500,000	EFC	Rensselaer County Sewer District owns and operates five wastewater pumping stations that transfer on average 20 million gallons per day of raw wastewater to the county owned facility for treatment. The main purpose of this project is energy saving through equipment and technology upgrades. A study completed in 2005 estimates the energy savings at over a 1,000,000 kilowatts per year. Additionally, data acquisition, communication and safety equipment and technology upgrades will be implemented resulting in improved overall system efficiency and reliability. This project can also be tied to the Long Term Control Plan being conducted to address combined sewer overflow issues in the hudson river. This project can also be tied to economic develeopment withinRenssealer County by expanding the sewer service area currently not served by the district.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Joint Water System Imrovements	$3,300,000	EFC	A joint water system owned by the Town of East Greenbush and the City of Rensselaer is in dire need of several improvements including , new storage and pumping facilities. The tank is inadeqate and cited by the Dept of Health as such. Emergency pumping is required in the event of power loss. This system serves four communities. Plans were perpared, bonding aquired for the short term to fund two new 5 million gallon tanks and the emergency pumping system. Bids were awarded in January and construction will start by the end of March.
Rensselaer	Wastewater System Improvements	$1,500,000	EFC	The Town of East Greenbush has reached its sewage treatment capacity, cannot accept future flows due to anticipated residential and industrial growth. The plan is to connect theCounty treatment plant which has available capacity by installing a new sewerand preliminary treatment facilities at the existing Town plant. Both the Town and County will benefit from increased revenues and energy savings through shared municipal services.
Rensselaer	Ultraviolet Disinfection System	$500,000	EFC	The Town has been mandated by NYS to disinfect its wastewater treatment plant effluent before discharge to the Hudson River to protect the environment and provide safe recreational waters. The project has been awarded after bidding is underway as of 01/01/09. The project has incorporated energy saving systems to disinfect the effluent and includes emergency power backup systems formerly not available at the plant, which has caused environmental problems in the past.
Rensselaer	Consolidate Water Systems	$1,100,000	EFC	Town of Schodack/Town of Castleton-on-Hudson seek to consolidate water systems to assure sufficient water quantity for all users and to allow expansion of the system.
Rensselaer	Completion of Town Well Field	$1,634,515	EFC	In 2006 the Town placed in operation water mains along Rts 9&20 and Rt 20 to provide potable water to litigants seeking redress of highway salt contamination. The soils along Rt 20 are dense. There were documented problems with e-coli in wells.
Rensselaer	Construction of Elevated Water Storage Tank	$1,629,999	EFC	NYSDOH/Bureau of Public Water Supply identified a serioues health threat caused by carcinogens in drinking water in residential areas. In 2007 water transmission mains were installed and users hooked up utlizing water purchased from another municipality.Construction of an elevated water storage tank will begin in April, together transmission mains to consolidate 6 water districts has been given notice to proceed.
Rensselaer	Rensselaer County, Pump Station Improvements, Rensselaer County	$7,658,000	EFC	Rensselaer County, Pump Station Improvements, Rensselaer County The improvements needed would replace the existing process with high efficiency motors, update pumping controls systems, and data acquisitions systems.
Rensselaer	Rensselaer County, Effluent Disinfection	$2,900,000	EFC	Rensselaer County, Effluent Disinfection Waste water equipment used to disinfect the effluent prior to discharge hoping at some point to have the Hudson River swimmable from mouth to source in 2009
Rensselaer	Poestenkill Water District #1	$9,530,000	EFC	Poestenkill will purchase water from the City of Troy, transport it through North Greenbush for a fee to supply safe water to 745 benefit units in Poestenkill. We have hazardous waste water contamination and must provide safe water to 16 miles of Town residents.
Rensselaer	Hemstreet Park Highway	$200,000	EFC	The town is constructing a sewer facility in the Hemstreet Park area of the Town of Schaghticoke. Rock excavation has exceeded all anticipated amounts for this project using all of the funds that were planned for roadway reconstruction. The contract endsJune 30, 2009. Any funding consideration to get town roads in this hamlet back to good condition would be greatly appreciated. This project has been a funding nightmare!

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Poestenkill Water District #1	$9,530,000	EFC	Poestenkill will purchase water from Troy, transport it through North Greenbush, for a fee, to supply 745 benefit units with safe water. We have hazardous waste water contamination making this necessary to serve a 16 mile long water line, about 1/3 on Poestenkill.
Rensselaer	Joint Water Tank	$3,100,000	EFC	this project is joint with East Greenbush to replace the current water tank which is in poor condition. It will be replaced with 2 5million gal water tanks. These funds will also upgrade our pump station which does not have any electric backup should power be lost there would be no water to the City of Rensselaer
Rensselaer	Water Sewer replacement	$5,000,000	EFC	Replacement of 1 mile of failing water and sewer infrastructure and road reconstruction. This will eliminate current backups into homes and will improve much needed water pressure in the North end of the City
Rensselaer	Broadway water sewer replacement	$3,500,000	EFC	Replacement of 3/4 mile failing water and sewer infrastructure. This would be in conjuction with our current project of the Reconstruction of Broadway.
Rensselaer	Rensselaer County, South Troy Industrial Park	$278,000	ESD	Rensselaer County, South Troy Industrial Park - Remediation of the former location of Republic Steel Corporation, whose 19th and early -20th century manufacturing activities caused extensive soil contamination that the New York State Department of Environmental Conservation (DEC) believes is hazardous to human health and to the environment. The estimated cost to adequately remediate the approx. 19-acre site, according to DEC, is $2,788,000. Through the Environmental Remediation Program offered by New York State, the Rensselaer county IDA can recoup 90% of the remediation costs (which are now being incurred) but the remaining 10%, or $278,000, poses a significant hardship for the IDA. Upon completion of remediation, which is scheduled for mid-2009, the property will be marketed and sold to private sector businesses as was the case in 1999 when a 7-acre portion of the site was remediated and sold to New Penn Motor Express. The IDA has at least two private sector developers waiting for remediation befo
Rensselaer	Saratoga County, LFTC Build-out	$13,049,000	ESD	Saratoga County, LFTC Build-out -- Maximizing the value of the Luther Forest Technology Campus is essential to achieve the regional economic development benefits that will occur with full build out of the Campus. In support of this, much of the work hasbeen done to develop the Campus' supporting infrastructure. The infrastructure already put into place to prepare Pod 1 for construction will be leveraged to develop the remaining Pods on the Campus to attract new tenants to the Campus and fully realizethe regional economic benefits that this Campus will create. Aside from Pod I (future home to the Foundry Company), the remaining eight Pods at the Campus allow for up to 2 million square feet of development space. Pods 2-8 will be targeted at advancedmanufacturing companies and nanotechnology suppliers and support service companies.
Rensselaer	Troy Little Italy Neighborhood Main Street	$200,000	MAIN_ST	
Rensselaer	Green Island Power Authority	$98,500,000	NYPA	Expansion of Hydroelectric Facility on the Hudson River
Rensselaer	Battery and supercap prototyping and manufacturing	$1,250,000	NYSERDA	This project is focused on developing shape-fitting, safe batteries and supercapacitors devices, based on technology invented at RPI. The technique uses established roll to roll printing techniques to scalably manufacture these high performing nanocompos

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Solar Energy Conversion Project	$150,000	NYSERDA	We have been planning to install Solar Energy panels on our Fire House for the purposes of creating enough electricity to power the needs of the building and all the fire company equipment without reliance upon the Public Utility servicing the town. We are looking to install five (5) ten (10 KW) solar panels that will generate over fifty (50) KW of electrical power. The project will cost about $450,000.00. We estimate the project will last about one (1) and employ about 50 people, including solar paneltechnicians, electricians, engineers, and construction personnel as there is trenching, concreting of solar panel supporting poles and the ripping up and restoring of asphalt. This project has been ready for a year and the Board of Fire Commissioners hasalready begun to set aside funding for this project and we are now ready to move forward to begin to implement and contract the work according to the governing Municipal Law of New York State. It is anticipated that the project will be ready to begin inthe projected cost. As I understand the recent stimulus bill, there is a provision for 8 Billion dollars in grants for this exact purpose. The Fire District would need about $150,000.00 to complete the project. As you know, Fire Districts rely upon taxirate the funding needed to operate the fire, rescue and EMS responses. If we were to finance this project from only tax receipts, we would have to raise the tax rate. Similarly, if we were to borrow, which is highly uncertain in this credit crunch climat
Rensselaer	Solar Powered Classroom/Go Power!	$50,000	NYSERDA	Construction of an outdoor solar powered classroom and accompanying energy efficiency educational exhibit featuring a 10kW solar array at The Museum tied to the grid.
Rensselaer	Motor Upgrades (Energy Efficiency)	$3,300,000	NYSERDA	The City water department has over 22 motors that are from the original construction of the facilities in the 1960?s or 1970?s. Replacement of these motors and drives with modern high efficiency units will drastically reduce the amount of energy the Cityuses.
Rensselaer	Energy Improvements to 5th Avenue Firehouse	$550,000	NYSERDA	Replace deteriorated HVAC system for more energy-efficient Engine 1 system. Replace and upgrade lighting, provide for emergency power back up. Apparatus Room overhead doors, lighting and communications system
Rensselaer	Energy and Physical Improvements to Campbell Avenue Firehouse	$275,000	NYSERDA	Replace/Upgrade HVAC and lighting with energy efficient Engine No #3 systems; some roof repair.
Rensselaer	Energy Improvements to Knickerbacker Arena	$185,000	NYSERDA	Replace outdated uninterrupted power supply (UPS). Provide high-efficiency chiller/cooling system. Make roof repairs; upgrade wiring and lighting systems.
Rensselaer	Infrastructure & Development Projects	$30,000	NYSERDA	Nassau Highway Department Emergency Energy Project
Rensselaer	CCNI On-Site Generation Project	$2,600,000	NYSERDA	Rensselaer, in concert with NYSERDA, will install innovative and emerging alternate energy technology using microturbines to provide distributed generation and combined heat and power capability at the Institute's Computational Center for NanotechnologyInitiatives (CCNI). This Project, at the Institute's super computing center will provide substantial energy savings and environmental benefit as well as providing an excellent opportunity for further research and development of this important emerging energy technology. This Project has already received significant formal support from NYSERDA.
Rensselaer	Town Municipal Center - Solar Panels	$280,000	NYSERDA	Town Municipal Center - Solar Panels
Rensselaer	Replacement Windows for City Hall	$0	NYSERDA	Replacement Windows for City Hall
Rensselaer	Town of Poestenkill Public Library furnace	$60,000	NYSERDA	Purchase and install a new furnace for the library building.
Rensselaer	Town of Brunswick - Energy	$405,000	NYSERDA	Town Municipal Center solar panels and generator

County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Rensselaer Library Energy Efficiency	$0	NYSERDA	The City purchased a seven thousand square foot building last year that requires extensive renovation to adapt it for use as the library. Design documents have been developed by the architectural firm of CS Arch in Albany and includes new HVAC systems aswell as new windows, doors, skylights and lighting that will improve the energy efficiency of the building.
Rensselaer	Rensselaer County, RPI - Energy Efficient Fatade and Exterior Restoration	$12,000,000	NYSERDA	Rensselaer County, RPI - Energy Efficient Fatade and Exterior Restoration for the Low Center - Modernization, Renovation and Energy-Efficiency Improvements This Project will provide an energy efficient facade to replace the building's deteriorated brick facade and infrastructure. The new energy efficient facade will use an insulated terra cotta rainscreen system and result in substantial energy savings. This Project will also serve as a research project in concert with the Institute's School of Architecture to evaluate the use of this system in the United States.
Rensselaer	Rensselaer County, RPI - Energy Efficient Retrofit of Campus Facilities and	$15,000,000	NYSERDA	Rensselaer County, RPI - Energy Efficient Retrofit of Campus Facilities and Infrastructure - Modernization, Renovation and Energy-Efficiency Improvements This Project will provide and install energy efficient construction equipment and technology acrossthe campus to substantially reduce energy usage and carbon emmissions. the energy efficiency measures included in this Project will have an overall payback of seven (7) years.
Rensselaer	Window Replacement	$575,000	NYSERDA	replace old original windows at City Hall with new energy efficient windows total 150 windows. Also original roof on building need to be removed and replaced due to age of roof and severe leaking problems
Rensselaer	Caseworker Mobile Technology Project	$9,000,000	OFT	The need to equip county based caseworkers was identified several years ago resulting in an initial pilot program with funding appropriated by the NYS legislature. Subsequent to the successful pilot, the legislature authorized a demonstration project which over 35 counties particiapted in. It found more staff were satisfied with their job and desired to remain employed when documentation was current, equating to enhanced safety for children and families.
Rensselaer	Asset Tracking (GIS)	$104,000	OFT	The City has many assets in the ground, namely the water and sewer systems, that are of various ages, sizes and construction. To better maintain the water and sewer systems, the City needs a GIS tracking system that can document the locations of the assets and will allow the City to more effectively use these resources and to help maintain them.
Rensselaer	Wireless Access Points, High Speed Fiber and Wireless Cameras	$1,200,000	OFT	Intended to serve the Central Business Districts and adjoining neighborhoods. Will provide better web access to businesses, affordable access to under-serve and low-income populations and address public safety issues in these areas.
Rensselaer	Radio Tower-Northern Rensselaer County	$2,000,000	OFT	Radio Tower-Northern Rensselaer County
Rensselaer	Emergency Communications Center Planning&Design	$1,000,000	OFT	Emergency Communications Center Planning&Design
Rensselaer	Radio Tower - Central Rensselaer County	$2,000,000	OFT	Radio Tower - Central Rensselaer County
Rensselaer	Nassau Highway Fleet Redevelopment	$850,000	OGS	Current aged highway equipment has more than 200,000 miles of operational usage and is in danger of catastrophic failure. The high level of low-income families has made replacement of vehicles costing upwards of $180,000 each, nearly impossible. The Townproposes a fleet retention and capital program which would begin with the replacement of 5 large dump/plow trucks to aid and serve the residents. Cleaner fuel vehicles are sought for the health of the community.
Rensselaer	Eastern Pittstown Fire Station	$1,500,000	OHS	We are in the process of getting bids to build a new fire station, the land has had work done already. the old station has parts that was built in the 1950's and is barely standing, it also is too cramped. the new station will be safer for our volunteersand will allow for training of our firefighters.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Station #25 Firehouse	$500,000	OHS	The proposed Fire Station #25 has been under development for the past ten years. In 2007 the Eastern Pittstown Fire District purchased 3.52 Acres parcel located on NYS Rt7 in the Hamlet of Pittstown. In the early fall of 2008 phase #1 was put out to bidfor purpose of grading, construction of entrances and storm water protection. Phase #1 was awarded and will conclude in March of 2009. Phase #2 will include the construction of 11,000sqft, 4 bay firehouse. The firehouse will have meeting room with seating for 100 people, kitchen facilities, recreation / training room, decontamination area, day room and equipment repair area. The new firehouse will correct many of the present safety and space problems current building. The new firehouse will also serve as a meeting place for the local Cub Scouts and or Town functions i.e. (polling place and warming area during natural disasters). The drawings, specifications and contract documents have all been prepared. All of the necessary permits have been obtained.
Rensselaer	Police Department Garage Facilities Project	$750,000	OHS	Police Department Garage Facilities Project
Rensselaer	Center Brunswick Fire Station Construction	$4,000,000	OHS	Construction of a 5000 sq foot addition consisting of apparatus bay, training space, offices, and storage area. Renovation of existing 21 yr old 10000 sq ft facility to provide safety enhancements to meet required codes and standards, upgrade mechanicalsystems, lighting, and building envelope for energy efficiency and reduction of operating expenses. Upgrade facility to allow for continued use as an emergency shelter. Repairs to facility due to age and weather related issues. The expected outcomes arenew apparatus bays that meet current code and standard requirements. Updated facility that will be available for county wide training and local training. Reductions in the operating costs of the facility will benefit the community by providing fiscal relief on future tax levy. Provide a safe and efficient facility for the continuity of operations required by firefighters and medical personnel during emergencies and disasters. Provide a safe and improved shelter for community use during emergencies and d
Rensselaer	Rensselaer County, Radio Tower - Northern Rensselaer County	$2,000,000	OHS	Rensselaer County, Radio Tower - Northern Rensselaer County New radio tower site needs to be constructed to better serve the Fire, EMS and Law Enforcement within Rensselaer county and to better protect the residents and visitors to Rensselaer County.
Rensselaer	Rensselaer County, Radio Tower - Central Rensselaer County	$2,000,000	OHS	Rensselaer County, Radio Tower - Central Rensselaer County Radio tower site in the Town of Grafton needs to be renovated and updated equipment needs to be installed to better serve the Fire, EMS, and Law Enforcement, and to better protect the residentsand visitors to Rensselaer County.
Rensselaer	North End Fire Station	$3,400,000	OHS	Construction of new fire station at the north end of the City. This will provide quicker response time for the residents at the North end of the City. Location of the fire station is on property that is currently occupied by senior citizens of which thiswill provide immediate assistance
Rensselaer	12th St.	$750,000	OMH	Bonds + LIHTC 4%
Rensselaer	Grafton Lakes SP - Dunham Dam Rehabilitation	$5,000,000	OPRHP	
Rensselaer	Park and Recreation Quackenkill Stream	$175,000	OPRHP	Park and Recreation Quackenkill Stream
Rensselaer	Upgrade of New Mount Ida Cemetery in Troy	$0	OPRHP	Upgrade of New Mount Ida Cemetery, Pinewoods Ave, Troy, NY to preserve the heritage for those who fought and died in the Civil War.
Rensselaer	Capital District Community Gardens	$5,000,000	OPRHP	This project will improve the availability and quality of farm fresh food and agricultural training, while providing a significant and immediate economic benefit to the local community

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Town of Hoosick Pool Improvement Program	$678,000	OPRHP	Consists of construction of a 1,400 square foot wading pool on the site of a former dilapidated wading pool, and the construction of a new family bathhouse. Also, the reconstruction of the bathhouse would allow for energy and water savings features to beincorporated.
Rensselaer	New York Routes 7 & 22 Revitilization Project	$1,005,000	OPRHP	Consists of the purchase of a vacant car dealership located on 6.5 acres of land located on Routes 7 & 22.
Rensselaer	Town of Brunswick - Parks & Recreation	$225,000	OPRHP	construct baseball field, nature trail, construct wet lands, increase park lands
Rensselaer	Bert's Place	$1,000,000	OTDA	This project involves the acquisition, demolition and new construction of a property at 202 Fourth Street in Troy NY. This project will provide permanent supported housing to 22 formerly chronically homeless single adults with a disability. Economic Recovery funding is requested for the substantial rehabilitation of the building and the creation of 18 studio apartments and 2 1-bedroom apartments. All units will be handicapped adaptable or accessible. Project amenities include laundry, courtyard, commercial kitchen, large common areas and a commercial storefront. The building will be staffed 24 hours a day and social service support will be available 7 days a week. This property is located in the South Central section of Troy and has already been purchased with McKinney-Vento act funding the Department of Housing and Urban Development?s Supportive Housing Program. Additional financing will be provided by NYS?s Homeless Housing Assistance Program, HUD?s Supportive Housing Program, NYS?s Office of Mentalin project approval, but all approvals are now in place, working drawings and bid documents are complete and this project is immediately shovel ready.
Rensselaer	Rensselaer County, Tech Valley High School	$3,100,000	SED	Rensselaer County, Tech Valley High School - Tech Valley High School, a new, innovative regional public high school serving students from 39 schools in 7 counties of New York's Capital Region is pursuing an adaptive reuse project of existing institutional space to establish a permanent home. The project involves an investment of $7,000,000 and already has a funding commitment of $3,900,000, leaving a gap of $3,100,000. The school will prepare students to participate in the growing high-tech and globaleconomy in the Capital Region and beyond, by providing them with 21st century skills, by applying their learning in real-world, high technology projects.
Rensselaer	Beacon Institute: Deployment and Operation of River Monitoring Stations	$1,375,000	Thruway	
Rensselaer	Beacon Harbor Research Dock	$500,000	Thruway	
Rensselaer	Ecovative demonstration line	$750,000	Thruway	
Rensselaer	To build a state-of-the-art LED factory manufacturing highly energy-efficient	$5,000,000	Thruway	
Rensselaer	Community Education Pavilion at the Hudson Valley Community College Ec	$625,000	Thruway	
Rensselaer	Regional Center for semiconductor and Nanotechnology Education -- Adva	$750,000	Thruway	
Rensselaer	Establishment of Rensselaer Center for High-Throughput Biotechnology	$6,500,000	Thruway	
Rensselaer	Enhancement of RPI Micro-Nano Fabrication Facility	$8,400,000	Thruway	
Rensselaer	Development of Cross-Cutting Renewable Energy Technologies	$1,700,000	Thruway	
Rensselaer	CCNI On-Site Generation Project	$2,600,000	Thruway	
Rensselaer	Upgrade the Center for Bioengineering	$10,000,000	Thruway	
Rensselaer	The Upstate New York Composite Manufacturing Forum (UNYCMF) will ass	$16,000,000	Thruway	
Rensselaer	Establishment of new high temperature fuel cell Membrane Electrode Asse	$20,000,000	Thruway	
Rensselaer	Research on new lighting control systems	$0	Thruway	
Rensselaer	Develop new testing methods for quickly detecting lead based paint in hom	$3,100,000	Thruway	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Rensselaer	Rensselaer County, RPI - Research Facilities and Infrastructure for Materia	$16,000,000	Thruway	Rensselaer County, RPI - Research Facilities and Infrastructure for Materials Fabrication and Characterization This Project will provide Rensselaer with a new Nanoscale Materials Characterization Core Facility and an upgraded Clean Room Facility to enable and expand research and facilitate new discoveries in the existing Rensselaer Signature Thrusts areas of nonotechnology, energy and the environment and biotechnology.
Rensselaer	Rensselaer County, RPI - Information Technology Infrastructure - Moderniza	$1,000,000	Thruway	Rensselaer County, RPI - Information Technology Infrastructure - Modernization, Renovation Rensselaer, in concert with NYSTAR and other partners, including government, industry and other universities will provide networked, high performance computers and associated technologies including interactive, imerive visualization tools to facilitate research and development as well as providing the necessary links between universities, government, industry and emerging technology companies.
Rensselaer	City of Rensselaer - Quackenberry Creek Flood Control	$1,500,000	Unassigned	Rensselaer suffered sever damage to homes and businesses from the flooding in the summer of 2008. This project will improve drainage of the creek with the installation of gabion walls, and other measures. This will reduce the threat of future floodingin this densely populated area, and has been identified as a top priority by the City Engineer.
Richmond	Tappan Park Ambulatory Care Development (TPACD)	$28,500,000	DASNY	According to the Report on Primary Care Capacity Shortage in NYC there is a serious shortage of primary care in the RUMC catchment area. The Tappan Park Ambulatory Care Development would provide adult and pediatric sub-specialty programs to improve access for an underserved multi-racial community on Staten Island. TPACD involves the design and redevelopment of approximately 60,000 square foot commercial structure on property located in Stapleton, Staten Island (13004). When completed the structure willintegrate adult and pediatric sub-specialty clinical programs supporting an underserved multi-racial community on Staten Island. The ambulatory facility will be designed to incorporate green environmental building technology and include integrated electronic patient record management as part of its operations design. The feasibility of acquiring the facility is being assessed at the present time in coordination with the Primary Care Development Corporation (PCDC). The redevelopment of the site will requated that the project will involve the employment of 150 full time skilled trade persons and following completion approximately 200 full time equivalent employees will be located at the facility on a continuous basis. It is anticipated that the operationl have a major long-term economic impact on the Stapleton community. Additional indirect economic enhancements including increased private sector employment are expected within the community as a result of the facility?s long-term operation.
Richmond	Completion of Health Center Renovations	$137,000	DASNY	Refurbishing of seven existing examination rooms; one patient interview room; one professional office; and installing a security gate on the center parking lot to limit trespassing, illegal dumping and loitering.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Richmond	Castleton Women and Children's Health Center	$2,500,000	DASNY	Castleton Women and Children?s Health Center (CWCHC) would provide OB/GYN, Pediatric and WIC services for underserved and indigent women and children in the Staten Island community. This project would involve shifting these services from the hospital toa free-standing ambulatory care building located in the community to expand access and improve the quality of primary medical care on Staten Island. CWCHC involves the purchase, design and redevelopment of approximately 5,000 square foot commercial structure on property located adjacent to the RUMC campus and the shifting primary care services out of the hospital to a more accessible site. When completed the structure will integrate women and children clinical primary care and WIC services for the underserved multi-racial community on Staten Island. The redevelopment of the site will require renovation of existing space including architectural design, general construction, HVAC installation, electrical service, and plumbing. During the construction phawho are marginalized and disenfranchised, is a high priority for RUMC.
Richmond	Capital Improvements	$400,000	DASNY	Catholic Guardian Society and Home Bureau (CGSHB) operates 12 residential facilities for mentally ill adolescents in foster care. These facilities require ongoing maintenance of the physical plant, such as 2 new roofs, 2 new boilers, 6 new kitchens and 7new bathrooms, 100 new windows to save energy, 4 electrical system upgrades to prevent fires, etc. This project will create immediate jobs for manufacturers, contractors, skilled laborers, and sales people.
Richmond	Stapleton Court	$33,460,087	DHCR	LIHTC 9%
Richmond	Public Cord Blood Bank Initiative	$750,000	DOH	Along with proper public education about Umbilical Cord Blood, regional Cord Blood Banks are a public service that is desperately needed. The CCBBRF would provide services to all nearby communities and hospitals, in Staten Island, Brooklyn and lower Manhattan. There is a direct correlation between transit time and the number of viable cells recovered from a sample. The longer it takes the cord blood to be received at the processing laboratory, the fewer viable stem cells can be recovered. Cord Blood adult Stem cells will be critical for the treatment of diseases and integral to regenerative medicine as technology improves. Over 6,000 children are born each year on Staten Island alone, and only a fraction of the parents are either sufficiently informedabout the process, or think that they can afford it. In reality they cannot afford NOT to bank their child?s cord blood, and we, the public, cannot afford to let any child?s cord blood go unbanked. Over 70 diseases, not just childhood leukemias, are currafford the cost, especially under-represented minority families. NYS should make cord blood collection available and affordable for all our children.
Richmond	Substance Abuse Treatment and Prevention	$100,000	DOH	Catholic Guardian Society and Home Bureau operates (CGSHB) 11 residential facilities for 114 adolescents in foster care of which 75% are involved in some form of substance abuse. CGSHB will provide theraeputic recreation opportunities for the youth a a means of positive youth development. This project will create or retain 3 jobs for skilled therapeutic recreation specialists with drug treatment and prevention skills and will allow youth to experience positive recreational alternatives to drug use.
Richmond	Roadway improvements along Front Street of the Homeport site a decomm	$4,500,000	DOT	Roadway improvements along Front Street of the Homeport site a decommissioned
Richmond	Utility improvements to the Staten Island Ferry Terminals to support retail te	$8,600,000	DOT	Utility improvements to the Staten Island Ferry Terminals to support retail tenants
Richmond	Staten Island St. George Ferry Terminal Bus Ramp Reconstruction	$175,000,000	DOT	Staten Island St. George Ferry Terminal Bus Ramp Reconstruction

Oxygen atom in the structure of additives help to give low-soot combustion. Hydroxyl group can be a hydrogen bonding donor to ester group onthe biodiesel fatty acid chain, improving the fuel flow and combustion properties of the system.
Richmond	solar energy	$500,000	NYSERDA	my funding will help the infastructure of a model home to show exclusively how we can use solar power energy to run the normal power that any home uses, with out the dependence of electricity. my business will sponsor the program and i can put plenty ofpeople to work on it. Also it can show anyone how they can do this to there own home. i think it is a very good idea to go solar but it needs to be seen by the public in order to sell.
Richmond	Clean Air Hybrid Buses	$0	NYSERDA	New buses for MTA fleet

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Richmond	Richmond University Medical Center Project Green	$10,000,000	NYSERDA	Richmond University Medical Center (RUMC) seeks to collaborate with National Grid in a Project Green initiative that will establish a power plant and institute an energy saving program for the RUMC campus. Currently two gas boilers and three chillers areantiquated and out of use, there is uneven heat and air conditioning throughout the medical center?s environment of care, and inefficient windows that need to be replaced. Since RUMC is a big energy consumer and National Grid is a large gas supplier this Project Green would involve a working collaboration to develop a reliable, efficient and safe delivery of energy for the medical center with the potential of energy overflow for use in the community. Project Green would involve the construction of a power plant on the RUMC campus for use of gas, and production of electric, solar, and non-fossil fuel renewable energy sources on-site. The project would include upgrading boilers, chillers, pumps, windows, lighting and HVAC environmental controls. Additioor the medical center with energy overflow to be used by area residents or local businesses. RUMC Project Green will result in a marked decrease in operation and maintenance costs. This will be accomplished through improved quality control processes thatcooling, and other mechanical systems work efficiently to save energy and reduce operating costs. In addition, including use of solar and non-fossil fuels in this project will result in energy use that is better for the environment.
Richmond	Install new financial management and practice management systems	$110,000	OFT	Community Health Center of Richmond (CHCR) requests $110,000 to purchase and install a financial management and general ledger system and an in-house practice management system. CHCR has operated on an off the shelf accounting system, Quick-Books, sinceopening and: due to the scope of its activities including grants funds management, and the size of its budget. The current practice management system is a web-based system which was designed for small private group practices and is unable to readily provide the patient information and billing data required by a health center which must comply with mandated federal and state reporting and billing requirements. Maintaining adequate fiscal controls and improving financial performance in order to maintain the economic viability of the center requires robust, multi-user server-based systems be put in place.
Richmond	Beacon Christian Community Health Center, Inc.	$100,000	OFT	Improvements in Telecommunication and HER Infrastructure
Richmond	Fort Place	$13,750,000	OMH	Bonds + LIHTC 4%
Richmond	Programs for Children & Young Adults with Autisitc Spectrum Disorders	$150,000	OMR	This project is to meet the needs of children and families in the community who have been diagnosed with autistic spectrum disorders and whose needs are not currently being met in accordance with State and Federal regulations in the public sector. The project would provide increased services to children and young adults 3 to 21 years of age.
Richmond	Program for Children & Young Adults with Autistic Specturm Disorders	$250,000	OMR	This project would provide education services to children and young adults 5 to 21 years of age who have been diagnosed with autisitc spectrum disorders and whose needs have been determined as not being appropriately met in accord with State and Federalregulation in the public sector. After school recreation and support services to parents will also be provided. This project would operate in two zip codes 10314 and 10305 and would serve students from Richmond County, as well as Kings and Queens county.

County	Project	Requested $	State Agency	Additional Detail
Richmond	Shipyard Overhaul of USS SLATER Museum	$2,000,000	OPRHP	Plans are now being made to dry-dock the USS SLATER to assess the condition of the hull below the waterline and do long term hull preservation of the underwater body. The USS SLATER is 306 feet long by 36 feet wide and is 1200 tons light displacement. This process will involve replacement of hull plating along the water line, and address any repairs that may be needed to the underwater body. The shipyard best equipped to handle this work is located in Richmond County on Staten Island. In 1993, when theship was donated to DESA by the Greek Government, it was dry-docked and surveyed by Stewart & Hazell Marine Services, Ltd. This was an insurance requirement in preparation for being towed across the Atlantic. At that time, the underwater body was found to be in satisfactory condition with the exception of the waterline plating, which was badly deteriorating. Also, in preparation for the voyage it was necessary to seal its sea chests (underwater openings in the hull) and other apertures as well as instal97, it was resting in highly polluted salt waters. During the following years, hundreds of volunteers have undertaken the task of turning the SLATER into a first-class stationary museum ship. All the paintwork on the ship was scaled and renewed inside antion of the main machinery spaces, tanks, voids and magazines. Wasted metal was cropped and renewed throughout the ship, and systems necessary for her operation such as heating, ventilation, fresh water, and lighting were repaired or renewed. Approximate
Richmond	SI Arts Incubator	$30,000	OPRHP	The Council on the Arts and Humanities for Staten Island is programming an arts incubator providing artists and cultural organizations needed resources to run as effective small businesses. Artists will have a well-equipped and centralized location to develop business skills and their ideas and products--such as web, print, and product design; photography; film/video production; glass design and production; jewelry design and production; etc. Cultural organizations, especially emerging groups, will haveaccess to affordable space and cooperative services. The arts incubator will center on innovative ways of thinking by reimagining untapped resources (adaptive reuse of materials, underused space, volunteerism, knowledge pooling, shared operating costs,etc.) The incubator will be strategically located in St. George, and will contain programming that provides incentive for artists and creative professionals to live and work in the area; fosters a productive collaboration between businesses and the creatical assistance workshops that help build art-business skills.

County	Project	Requested $	State Agency	Additional Detail
Richmond	Italian Heritage and Culture Educational Programs and general operating su	$30,000	SED	Italian Language Classes for adults are offered two semesters a year, 15 weeks at a time. The Garibaldi-Meucci Museum employs two professors of Italian Language to teach seven classes, which each meet 1½ hours, once a week. Courses offered: Italian I, Italian II, Italian III, Italian Language Through Film, Advanced Communication and our newest class, Italian for Travelers. Due to popular demand, we added an additional Italian I class, and an Italian I Immersion class. Our School Program serves the entire metro area, and approximately 4,000 children participate in these very popular programs each year. Students can either visit the museum on school field trips or the GMM provides presentations in schools. Currently we offer four cross-disciplinary programs: The Legend of the Spider, Carnevale in Venice, Life in Ancient Rome and the Guided Historical Tour. All programs culminate in a hands-on project to take home (except the Guided Historical Tour). Classes last 1½ hours. Speaker?s Bureau Programs (Inteore convenient for the group. Programs are presented by experienced educations on over twenty topics, ranging from ?Italian Opera? to ?Italian-American Sports Legends.? Each topic will enlighten any group to the vast cultural and social impact that Italiicans have impressed upon world history. Program educators use a wide variety of technology that engages the participants on many levels. Due to an increase in demand, the museum would like to use a small portion of the funds to purchase a projector and
Richmond	Learning Institute	$200,000	SED	The JCC wishes to receive funding so we can continue and expand our Learning Institute, a tutorial program that has served SI youth for over 25 years. Funding will enable us to provide approximately 250 children with academic assistance including those with learning disorders.
Richmond	This project will synthesize a family of copolymers to enhance the desirable	$132,000	Thruway	
Richmond	Biodiesel, Staten Island Project	$132,000	Thruway	
Richmond	Waste heat can be converted to electricity by an improved Thermoelectric C	$240,000	Thruway	
Rockland	Industrial Greenhouse Project	$300,000	AGMKT	The project will introduce to the United States of America the industrial greenhouse system by an Israeli company. The greenhouse will produce leafy vegetable, particularly lettuce. The project is in line with supporting local agriculture in the US EastCoast states. The farm business model will promote local production of vegetables in line with addressing the health concerns associated with imported vegetables that was further enhanced due to the salmonella outbreak traced to farms outside the US, thehigh cost of transportation in bringing vegetables to the US East Coast from production areas in California and even outside the US such as Chile and Mexico, and the increasing dependence of US East Coast states on imported vegetables that in New York State alone is estimated to be around 1 billion US$ annually. The industrial greenhouse is about 1 hectare (10,000 square meters) covered area that will be used for soil less production of lettuce, and other vegetables. It will employ automated greenhousee can be established and operated in cooperation with local farmers. Alternatively, land can be rented out by an agribusiness management company that will specialize in the operation of industrial greenhouse that will be engaged in the production of leafal consumption. The construction time of the greenhouse is 4 months at a cost of around 2.5 to 3 million $US including installation and training. Other operating cost include labor, water, seeds, fertilizer, heating, lighting, packaging, and marketing. E

County	Project	Requested $	State Agency	Additional Detail
Rockland	Tactical Storage Facility for the Stony Point Police Department	$1,000,000	DASNY	The Police Department in the Town of Stony Point is in need of a facility to house some of it?s supplies, equipment and vehicles that should not be exposed to the weather for any extended period. The plan is to construct a three-bay building in an area located directly behind the police station. The need for this new building is driven by the increased security demands placed on the police department, as well as the higher level of tactical preparedness needed by law enforcement in recent years.
Rockland	Bond Vote 2009	$50,000,000	DASNY	We have a bond vote going before our Clarkstown voters March 10, 2009 for $187,100,000 to make basic infrastructure repairs in our 16 facilites. Our roofs are over 23 years old and leaking. We are out of ADA compliance in all buildings. We have numeroussafety and energy issues that have been identified. The needed repairs are to basic infrastructure only. We need to replace roofs, windows and doors and to make our schools ADA compliant and energy efficient. All of our windows are single pane with aluminium frames. They waste energy. None of our buildings meet ADA regulations. One of our two high schools has been infested with cock roaches for over three decades. We exterminate once every week, spending tens of thousands of dollars on this. Eggs are laid in the heating system which is original to the building's construction in 1951. The heating system must be replaced to rid ourselves of the roaches. The windows, electrical, roof and multiple other systems in the high school are badly in need of repai
Rockland	Construction of a new Emergency Medical Services Facility	$3,000,000	DASNY	Our current Emergency Medical Services building was constructed in 1947 on a small piece of donated land. While this facility has served us well over the past 62 years, new standards in the field of emergency medical services have rendered it inadequate.Newer ambulances are considerably larger than the original ?Cadillac-hearse? style our building was designed to accommodate. We have had to special order shorter and less adequate trucks to fit into our current garage. We also lack a decontamination area needed to clean contaminated equipment. Our goal is to construct a new facility that will not only house our emergency vehicles, but that can also be used as a shelter in the event of a disaster.
Rockland	New Highway Garage for the Town of Stony Point	$15,000,000	DASNY	The Town of Stony Point?s highway department garage is old, in deplorable condition and vastly undersized for our growing town. The trucks, equipment and other vehicles that need to be maintained by the highway department are left out in the weather dueto lack of space. The storage areas, including the one needed for road salt and sand, are far too small. Additionally, the service bays are undersized and not properly equipped to handle the maintenance of the larger vehicles it is now required to handle. Basically, the entire antiquated structure needs to be replaced with a new larger and more adequate facility.

County	Project	Requested $	State Agency	Additional Detail
Rockland	Construction of a new Town Hall for the Town of Stony Point	$14,000,000	DASNY	Our Town Hall, constructed circa 1900, is in terrible shape and desperately needs to be replaced with a safer, more adequate facility. While this structure has served us well over the past 109+ years, gradual deterioration has rendered it inadequate andbeyond repair. In addition, the town?s population and community service needs have far outgrown the available office space, meeting rooms, community center, justice court, and storage areas that should be available in the Town Hall. Our building, which looks ?charming? from the outside, has it?s original windows, little or no insulation, an inadequate, inefficient, and antiquated heating system, a few inadequate window or wall-mounted air conditioners, wood floors and beams that sag from the weight of filing cabinets, no second floor accessibility for the disabled, leaky pipes, and mold in the ?storage? basement where important documents are deteriorating from the dampness. We hope to replace the Town Hall with a new structure that is energy efficienting area.
Rockland	New Highway Facility	$30,000,000	DASNY	New Highway Facility
Rockland	Village Hall Community Center	$260,000	DASNY	Village Hall Community Center
Rockland	Village of Airmont infrastructure/energy/technology	$0	DASNY	Construction of portions of new city hall (unfinished)
Rockland	Village of Airmont infrastructure/energy/technology	$0	DASNY	Repair bus shelters; sewer system repair/replacement; purchase and install solar panels/windmills; purchase computer equipment for youth center and senior center; construction of portions of new city hall (unfinished)
Rockland	Refuah Health Center	$6,925,000	DASNY	Building Expansion of Rufuah Health Center
Rockland	Congers Valley Cottage ambulance building	$0	DASNY	Congers Valley Cottage ambulance building
Rockland	Construction of a new Emergency Medical Services Facility	$3,000,000	DASNY	Our current building was constructed in 1947 on a small piece of donated land. While this facility has served us well over the past 62 years, new standards in the field of emergency medical services have rendered it inadequate. County	Project	Requested $	State Agency	Additional Detail
Rockland	Nyack Library Expansion and Renovation Project	$1,249,240	DASNY	The Nyack Library is the only Carnegie Library in Rockland County, completed in 1904. Along with the current 15,000 sq. ft. expansion of The Nyack Library is a comprehensive renovation to the existing 15,600 sq. ft. building. The existing building will be brought up to code by several means. A new sprinkler system will be installed, currently there is none. The old fire alarm system will be removed and new wiring and hardware will be installed. Also a new building security and closed camera system willbe installed to support excellent library services by ensuring the safety of the library, its users and materials. Substantial electrical upgrades are planned that will help meet changing demands on the library to provide electronic resources. These upgrades include electrical, network and telephone infrastructure, which in the redesigned space will allow The Nyack Library to double the size of our Computer Resource Center and create a special Computer Applications room. The complete renovation projectost every square foot of the existing library will be renovated. The library has final site plan approval for the overall project and permits have been obtained from local government authorities.
Rockland	VILLAGE MARINA BULKHEADS	$1,750,000	DEC	NYACK'S MUNICIPAL MARINA'S BULKHEADS ARE IN VERY POOR CONDITION AND NEEDS REPLACEMENT. APPROXIAMETLY 2000 FEET OF BULK HEAD REPLACEMENT
Rockland	NYACK STREAM DIVERSION	$1,250,000	DEC	NYACK STREAM RUNS THROUGH VILLAGE MAIN STREET AND AT TIMES UNDER STORE FRONTS. LARGE RAINS FLOOD OUT BASEMENTS AND ROADS. DIVERSION PLANS CALLS FOR PIPE TO DIVERT OVERFLOW TO NEXT STREET SOUTH AND THEN IN NYACK STREAM AFTER MAIN STREET. ABOUT 1000 FEET O
Rockland	Hydroelectricity From Old Dams	$25,000	DEC	This is a Feasibility Study to determine how the two dams in Piermont New York can be utilized to generate hydroelectric power. The dams were used in the 18th and 19th centuries to power all of the local mills. Since the mills closed, the dams have remained and are in perfect condition. Given the fact that the flow of water over these dams has never stopped on record, they would be perfect candidates to set up hidden turbines to harness the hydroelectric power there. Millions of gallons of water flow over these dams every day. The town already owns a small vacant building directy adjacent the larger dam, and United Water owns a small vacant building next to the smaller damn. United Water would like to pursue renewable energy opportunities. Both of these buildings would be perfect to set up generators in. The outcome of the study is that it will show the Town of Piermont how much hydroelectric power can be generated from the two dams, how much money it would cost to install the system and how long it w
Rockland	Ferdon Mill Pond Assessment	$15,000	DEC	The Town of Orangetown New York has pursued dredging the contaminated silt in The Ferdon Mill Pond for several years. There have been many impediments in the process of doing so, mainly confusion as to how much it will cost. This project is a scientificstudy on the Ferdon Mill Pond. The results will be reports that provide all of the information needed to determine a proper course of action with regards to dredging, and the disposal of dredge spoils. Specifically, maps will be provided showing all of the current depths of the water, samples will be collected and tested, and additional maps will show where any existing contamination is located. This will provide The Town with all of the information needed to estimate the work that is needed and to assess the costs of the project.

County	Project	Requested $	State Agency	Additional Detail
Rockland	Brookside Wildlife Sanctuary Restoration	$100,000	DEC	This project is a six month job to remove a 25 meter long, 20 meter wide and 1 meter deep pile of sediment that has accumulated in a wildlife sanctuary along the Sparkill Creek in Piermont New York. This pile of sediment was the result of Hurricane Floydand it has destroyed the wildlife sanctuary there by critically disrupting the habitat. It has contributed to the flooding of adjacent housing and put an end to the kayaking, canoeing and bird watching that was popular there just ten years ago. Approximately 500 cubic yards of sediment will be removed from the sanctuary using shovels and buckets and loaded onto trucks for proper disposal. This project will not utilize any heavy machinery due to the sensitivity of the area. This project will double as apilot study for restoring nearby environmentally sensitive areas in similar predicaments. The immediate result of this project will be the improved recreational opportunities. The habitat restoration will provide more biodiversity and improve the health
Rockland	Congers Lake Dam & Trailway	$2,500,000	DEC	? The CONGERS LAKE EARTHEN DAM AND GILCHRIST ROAD DIKE IMPROVEMENT/ NORTHEND TRAILWAY PROJECT. This two part project will include increasing the height of an earthen dam at the Congers Lake Memorial Park, drainage improvements, and also extending the recreation trailway through the park. These projects are estimate to cost $4.1million, last for several months and employ scores of men and women in various industries. Congers Lake Dam improvement will include various trades, operating engineers, masons, carpenters and laborers for an estimated man hours of 13,328 for the trailway. For dam project trades will include six operating engineers, laborers, masons, carpenters, teamsters and ironworkers which will work an estimated 27,318 man hours.
Rockland	Drainage Improvements and Flood Mitigation in the Town of Stony Point	$7,912,000	DEC	The Town of Stony Point has a number of serious and critical drainage infrastructure problems that need immediate attention. A list of these projects is attached below. Areas of our town have repeatedly flooded due to poor infrastructure design, a largeincrease in construction and population, crumbling and antiquated storm drains, debris in streams, brooks and ponds, erosion of stream banks, and undersize and insufficient storm drains. Some of the specific drainage projects (with estimated costs) include: Roadway underdrainage - to stop flooding throughout the town - $2,300,000 Lighthouse Court drainage/flooding - $1,725,000 Elm Street drainage reconstruction & improvements - $575,000 Buckburg pond outfall reconstruction - $517,500 Rider Hills Subdivision drainage improvement - $517,500 Stream cleaning and wall construction in Lowland Park - $402,500 Bypass route westerly side of Palisades Interstate Parkway @Rt.210 - $345,000 Rising Hill drainage improvements - $287,500 Dunderburg Estates swale reco000 Reconstruction Rider Hills detention pond - $138,000 Catch basin reconstructions - $115,000 Higgins storm drain improvements - $92,000 Stream cleaning Cedar Pond Brook near Marvello?s - $92,000

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rockland	Silt Relocation Plan	$20,000	DEC	1000 cubic yards of silt need to be relocated to prevent the obstruction of water flow that is taking place in Piermont NY. The Village of Piermont does not have the money to do this. As a result, members of the town board, community, and non-profits came up with an idea to form an island with the silt, and use it to improve the habitats of both fish and bird species. This plan was approved by the NYSDEC. At this point the implementation of the project is hindering on available financing. The project will take 2 people, 6 months to complete.
Rockland	Stonehouse Drive Storm Sewer Imrovements	$1,000,000	DEC	Remediation of flooding along Pascack Brook. Replacement of bridge/culvert at Union Rd.
Rockland	Town of Stony Point Infrastructure	$12,050,000	DEC	Repair drainage infrastructure problems at 16 locations throughout the town.
Rockland	Village of West Haverstraw environmental projects	$550,000	DEC	(1) Landscaping work to provide erosion control along Captain Shankey Drive and (2) provide drainage to the area between route 202 and Hurd Ave.
Rockland	Route 45 project road overhaul drainage improvement	$0	DEC	Route 45 project road overhaul drainage improvement
Rockland	Flood Control	$1,000,000	DEC	Main drainage system in the Village runs through open and closed portions of a brook which is in desperate need of repair and upgrade to alleviate continuos flooding into houses and properties.
Rockland	Brownfield Investigation In Piermont	$15,000	DEC	I am a prospective buyer of a brownfield in Piermont New York (The Site). This project is a Phase II Environmental Site Assessment at The Site. The Site is suspected of having significant hazardous waste in the soil from operations between 1920-1980. Since 1980, it has remained vacant. The site is in a highly populated area and human health may be at risk. The site is adjacent and above gradient to residential housing. A Phase I Study suggested hazardous waste exists at the site. The owner has legally agreed to remediate any contamination that is found as a result of this Phase II Environmental Site Assessment. The owner is also willing to pay for the other half of this Phase II Environmental Site Assessment (15,000). We have already gotten the quote from the environmental contractors. The project will consist of the installation of 20 boreholes and the collection of 60 soil samples at 2' 7' and 12' below grade surface. Groundwater is over 40' below grade surface, therfore no groundwater samples willthe building will also be made. This Phase II Environemental Site Assessment will automatically employ 3 people for the job and because it is likely that both tanks and contaminated soil are discovered, many other jobs will potentially be created during. As stated above, the owner has legally agreed to pay for all remediation work. Remediation typically ranges from 50,000-1,000,000 dollars which would create a number of more jobs.
Rockland	North Lot Drainage	$326,000	DEC	Installation of approximately 640 linear feet of new 15"" HDPE drainage pipe with five (5) new catch basin vaults. Also installation of approximately 220 linear feet of 30"" HDPE drainage pipe with two new vaults, including the installation of a Tideflexoutflow valve in the Hudson Rover seawall. Re-grading, paving and curbing improvements with installation of gravel hydrostatic relief trenches and implimentation of water-retaining landscaping featu
Rockland	Ritie Street Drainage Corridor	$250,000	DEC	Replacement of an aging corrugated metal pipe drainage system. System is located on a +45% slope channeling stormwater from county highway 5 and state route 9W to the Hudson River. Replace three drop catchbasins (over 25' in height) and replace approximately 275 feet of deteriorating CMP with HDPE. Due to the velocity and volume of water this system conveys, any failure would be critical to the property and safety of neighboring residents.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rockland	Ritie Street Drainage Corridor	$250,000	DEC	Replacement of an aging corrugated metal pipe (CMP) drainage system. System is located on a steep (+45%) slope, chanelling stormwater from County Rt. 5 and State Rt. 9W to the Hudson River. Project will replace three (3) drop catch basins (over 25' in height each) and approximately 275 of CMP with 15"" HDPE. This system was installed over 50 years ago and is constructed with corrugated metal pipe, which has a history of corrosion and degradation, leading to potential failure of the system. Due to the velocity and volume of water this system conveys, any failure would be critical to the property and safety of neighboring residen
Rockland	Ferdon Mill Pond	$350,000	DEC	Riparian remediation of over 23,000 cubic yards of sediment that has gathered in this area of the Watershed. The overwhelming sediment has entered this pond via the Sparkill creek from the drainage areas in Orangetown and from Bergen County New Jersey, critically during large storm events like Tropical Storm Floyd and the Nor'easter of 2007. The silt, which has been tested to contain benzene compounds (UHCs), is classified as 'Municipal Waste' but NYDEC has indicated permission to remediate on-site which will save transport and landfill costs. The project will shift this silt to create islands in the pond, increasing channel flow and improving the flushing action of the stream.These island will be landscaped with Phragmites to serve in the bioremediation of the hazardous compounds in the silt.
Rockland	Pier Pavillion Upgrade	$95,000	DEC	Renovation of the exterior of the cinderblock laboratory/storage building at the end of the Piermont Pier. The exterior work will include adding a covered portico porch surrounding the building and the installation of educational placards with information about the history of the Pier and the environmental status of the Hudson River. Developed in partnership with Columbia University's Lamont-Dougherty Earth Observatory (LDEO), these placards will be designed to display real-time information on the Hudson river- water temp, salinity, disolved oxygen, as well as recent water sample results for biological contaminants. Current meteorological information will also be displayed. This educational resource will enhance the public understanding of the work currently performed by LDEO on the Hudson river estuary.
Rockland	Homes for Heroes	$10,000,000	DHCR	50 rental units of supportive, permanent apartments for combat disabled or homeless veterans and their families PHASE I-Rehab existing structures into 25 handicapped accessible garden style apt. units involving carpentry, masonry, electric, plumbing, excavation & grading services. Est. 50 constr jobs created and 15 retained to operate complex, once completed
Rockland	People to People Expansion Project	$250,000	DHCR	Expanding into unused space to address escalating demand for our Food Pantry and assistance programs. Demand at the Pantry is up 75%. This project would create 20+ construction jobs, finishing the second story of our building, currently a shell. Pro-bono design work has been accomplished, and we are in the process of securing permits. Beyond the life of the construction project, the resulting space (space that we actually have but cannot use because it is not finished) will allow us to provide programsto assist clients who rely on our Food Pantry. The space will, in essence, help us to stop the cycle of poverty by providing programs to that constituency. Lack of space is the primary limiting factor to our ability to provide programs to our constituents. By finishing the second floor, which is currently just a shell with a staircase, we will be able to properly address the issues facing our neighbors in need. We will be able to provide full-scale ESL classes, budgeting and nutritional classes and job
Rockland	Green Affordable Housing	$5,000,000	DHCR	I would like to initiate ""green,"" environmentally friendly affordable housing in Spring Val

County	Project	Requested $	State Agency	Additional Detail
Rockland	Wellness and Fitness for Healthy Aging	$3,915,645	DOH	Wellness and Fitness for Healthy Aging Wellness Centers are becoming a mainstay in senior living communities. Current information clearly indicates that wellness programming improves function and promotes successful living among older adults. Wellness initiatives at communities benefit both residents and staff. The next generation of resident will demand wellness as a way of life. Beyond protection against heart disease, diabetes, and some cancers, numerous studies suggest that regular exercise can lower the risk of decline-the dementia-the fraility-that spells the end of independence. The American College of Sports Medicine and the American Heart Association issued new exercise guidelines for seniors that call for several workouts a week incorporating resistance training, stretching and balancing as well as aerobics. An associate professor of nutrition at Tufts University states ?getting regular aerobic workout by walking, running, swimming or biking improves hypertension and cholesterol levels?. Foocializing and living an active lifestyle. Our residents do so by using the many maintained walking paths and by participating in a full range of exciting daily activities which include cultural, spiritual, intellectual, educational, vocational and physiinView?s programs are based on a sound wellness philosophy and therefore the community has a wide array of wellness activities in place. The schedule boasts a weight and strength training program three times a week with oversight from physical and occupa

Rockland	Hospice Home	$750,000	DOH	UHR plans to build a 10 bed Hospice Home offering residential, end-of-life care for seriously ill individuals in fragile living situations. We anticipate serving 70-93 patients a year (representing approximately 3,000 days of care). This level of care ismuch-needed, but not currently available in Rockland County.
Rockland	Apprenticeship Program	$50,000	DOL	We are a small NYS DMV registered collision repair facility; currently we are seeking to instill a registered apprenticeship program in NYS for auto body technician. This is for us to attract, train and retain a hardworking individual who will get experience and very viable skills that are necessary in the market today. We are seeking funds to help offset this new program in our business and the add-to-staff with its associated costs.
Rockland	Replacement of Fire Rescue Truck	$0	DOS	Replacement of Fire Rescue Truck

County	Project	Requested $	State Agency	Additional Detail
Rockland	Historic Waldron Cemetery Restoration	$97,000	DOS	In our town, off of East Main Street, feet from CSX railroad tracks and the high-tension power lines, lies a narrow gravel road that leads south to the long-neglected Waldron Cemetery dating from the time of the American Revolution. This cemetery has been virtually forgotten and is overgrown. Many of the tombstones are broken and in pieces and those that are still standing are hidden by weeds and the entire area is mostly inaccessible. Thanks to the efforts of the local Sons of the American Revolution,the Town of Stony Point road crews, and a host of volunteers and contributors, we have made a major effort to clear the brush, improve the access road, and bring the cemetery to a condition that begins to honor the memory of our ancestors. Our goal is toallow safe public access to this historic site for the first time in many years. We are requesting funds to construct a fence around the large cemetery area, erect two flagpoles, and establish a suitable monument and memorial in order to honor the Ameri
Rockland	Rockland County Bus Purchases	$8,000,000	DOT	
Rockland	New City Road Reconstruction & Revitalization	$15,000,000	DOT	The NEW CITY ROAD RECONSTRUCTION AND REVITALIZATION PROJECT is a comprehensive two-phase, $18million project that is expected to start this Spring and last for at least18 months. County	Project	Requested $	State Agency	Additional Detail
Rockland	Bridge Rehabilitation: Oak Tree Rd/Sparkill Creek	$2,130,000	DOT	
Rockland	Bridge Painting - 10 bridges	$2,000,000	DOT	
Rockland	Guiderail Replacement	$1,000,000	DOT	
Rockland	Kings Highway and Greenbush Road Reconstruction	$300,000	DOT	
Rockland	Intersection Reconstruction: RT 9W/CEDAR POND BRK, STAGE 2	$11,517,350	DOT	
Rockland	Left Turn Lane: RT. 303 @ VALLEY COTTAGE LIBRARY	$860,000	DOT	
Rockland	Br Replacement: RT 59: SICKLETOWN ROAD TO ROUTE 303	$30,355,000	DOT	
Rockland	New Square - Village-wide Road Repairs	$1,011,008	DOT	Grinding, milling, casting manholes and catchbasins, and restriping: Buchanan Lane, Bush Lane, Cleveland Avenue, Clinton Avenue, Eisenhower Avenue, Garfield Road, Harrison Lane, Jackson Avenue, Jefferson Avenue, Lincoln Avenue, Monroe Lane, Ostereh Boulevard, Roosevelt Avenue, Taft Lane, Truman Avenue, Washington Avenue, Wilson Avenue.
Rockland	Turning Lane SWY Route 306	$1,700,000	DOT	Addition of new turning lane for the southbound traffic along SWY Route 306 at intersection of Phyllis Terr. Area currently has very poor traffic movement during peak hour periods with both degrading of the air quality and the coninuing loss of fuel by vehicles required to wait for several signal cycles at traffic light. Project will eliminate all of the above hazards.
Rockland	Rita Avenue Road Widening	$440,000	DOT	Widen 26 ft width narrow roadway pavement of Rita Avenue to achieve Village Highway Standards of 30 ft between curbs and 32 ft in the dangerous section of road with a horizontal curve. This will provide for the safe passage of the Transport of Rockland buses, school buses and large number of school buses that use this corridor between NYS Route 306, E Maple Avenue and Village of Spring Valley, as well as greatly improve safety of the pedestrian traffic which includes large number of school children.
Rockland	Sewer	$1,500,000	EFC	This project will replace 3 aging pumping stations that pose risks for spills into the Hudson River in the village of Grandview.
Rockland	Sewer Plant Repair for the Town of Stony Point	$10,000,000	EFC	The town?s sewer treatment facility (located by the Hudson River, near the Haverstraw/Stony Point border) is one of the least efficient and single biggest energy ?guzzlers? in the area. The facility was constructed in 1969 using the highest standards available at that time. While this facility has served us well over the past 38 years, recent improvements within equipment manufacturing, new electronic & electrical standards, more energy-efficient designs, and increased population in the area have rendered it inadequate. The estimated life expectancy of the plant at the time of construction was 30 years. We are now 10 years beyond that point. Almost all of the electronic and electrical machinery in the plant is obsolete. The facility is inefficient, outdated, inadequate and is seriously in need of replacement. In addition, the major manufacturer of many of the plant?s critical components has been out of business for over 20 years and replacement parts for the old equipment cannot be obtained. It has beir tolls. There comes a time when equipment reaches the end of its usable life and integrity can no longer be restored within these units due to fatigue, corrosion and general wear. It is our plan to replace antiquated and worn out equipment at the sewer

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rockland	Installing Water & Sewer Lines to the western part of the Town Of Stony Po	$25,000,000	EFC	In the western part of the Town of Stony Point, wells and septic tanks are still being used by most residents. In order to encourage new construction and commercial development in this area of our town, we would like to install both water and sewer services. In our growing community the problems that emerge due to the use of septic tanks instead of sewers, and ground water pollution while using wells for drinking water, increase at an alarming rate. By connecting most of the existing homes and all of the new construction to the sewer lines and water utility, this growing infrastructure problem will be abated.
Rockland	Wastewater Treatment Plant & Pump Station Improve Ph1	$3,100,000	EFC	Wastewater Treatment Plant & Pump Station Improve Ph1
Rockland	Wastewater Treatment Plant & Pump Station Improve Ph2	$5,000,000	EFC	Wastewater Treatment Plant & Pump Station Improve Ph2
Rockland	Town Clarkson Pump Station Upgrade	$10,000,000	EFC	Town Clarkson Pump Station Upgrade
Rockland	Pump Station Upgrade	$10,000,000	EFC	Pump Station Upgrade
Rockland	Headwork Improvement	$600,000	EFC	The Joint Regional Sewerage Board will replace the existing bar screen and grit handling equipment. By perform this work, the following benefits will be realized: ? more cost-effective treatment ? reduction of labor related to cleaning of equipment ? reduction of energy
Rockland	Disinfection System Improvements	$3,500,000	EFC	The Joint Regional Sewerage Board will replace the existing disinfection system with a new disinfection system. The new system will be required to meet new water quality standards for the Hudson River. The following are the benefits of the project: ? improve water quality of the Hudson River ? improve wastewater treatment plant operations
Rockland	Biosolids Improvements	$9,500,000	EFC	The Joint Regional Sewerage Board will construct a New Anaerobic Digestion System with cogeneration capabilities. The anaerobic digester will reduce the quantity of sludge while producing biogas for utilization in a generator. The energy will be utilizedat the wastewater treatment plant to offset electrical costs to the Joint Regional Sewerage Board. Sludge trucking will also be reduced, thus saving fuel costs for Rockland County. The following are the feature benefits: ? utilize waste (sludge) to generate electricity ? reduce electrical costs by utilizing biogas ? reduce sludge disposal costs by reducing sludge quantities
Rockland	Village of Airmont infrastructure/energy/technology	$0	EFC	sewer system repair/replacement
Rockland	Village of Haverstraw Dr. Girling Drive Pump Station	$2,500,000	EFC	The Village of Haverstraw sewer pump station is about 40 years old, and upgrading it is directly tied to the Haverstraw Waterfront Redevelopment Project. As part of the approvals process for Phase 1, the Village (through the Joint Regional Sewerage Board) agreed to this upgrade. Construction plans have been completed for this shovel ready to go replacement pump station project.
Rockland	Western Ramapo sewer Ext project	$0	EFC	Western Ramapo sewer Ext project
Rockland	Wastewater Treatment plant and pump station Orangeburg	$0	EFC	Wastewater Treatment plant and pump station Orangeburg
Rockland	Wastewater Treatment plant and pump station Orangeburg	$0	EFC	Wastewater Treatment plant and pump station Orangeburg
Rockland	Wet weather inflow indentification and removal	$0	EFC	Wet weather inflow indentification and removal
Rockland	50+ year old municipal building install new HVAC System	$0	EFC	50+ year old municipal building install new HVAC System
Rockland	Pump Station replacement	$0	EFC	Pump Station replacement
Rockland	Anaerobic Digester cogeneration project	$0	EFC	Anaerobic Digester cogeneration project
Rockland	Capital Project 6150 Western Ramapo Sewer Extension Project	$25,000,000	EFC	Capital Project 6150 Western Ramapo Sewer Extension Project
Rockland	Capital Project 6210 Wastewater Treatment Plant and Pump Stations Impro	$3,100,000	EFC	Capital Project 6210 Wastewater Treatment Plant and Pump Stations Improvement Project Phase I
Rockland	Capital Project 6250 Wet Weather Inflow Identification and Removal	$9,370,000	EFC	Capital Project 6250 Wet Weather Inflow Identification and Removal
Rockland	Town of Clarkstown Pump Station Upgrade	$0	EFC	Town of Clarkstown Pump Station Upgrade

County	Project	Requested $	State Agency	Additional Detail
Rockland	Interceptor Improvements Phase I	$4,000,000	EFC	Interceptor Improvements Phase I
Rockland	Sewer Line Replacement	$2,481,540	EFC	Replacement of old deteriorating sewer lines that besides its bad condition it also cannot accommodate the current and future needs of our Village.
Rockland	North Lot Drainage	$326,000	EFC	Installation of approximately 640 linear feet of new 15"" HDPE drainage pipe with five (5) new catch basin vaults. Also installation of approximately 220 linear feet of 30"" HDPE drainage pipe with two (2) new vaults, including the installation of a Tideflex outflow valve in the Hudson River seawall. Grading, Paving, curbing and the installation of hydrostatic relief trenches incorporated with water absorbing, indigenous vegetat
Rockland	Nyack Park Commission	$0	EFC	Waste Water Infrastructure - Environmental Facilities Corp. - Water Supply & Sewage Treatment Facilities - Repair of Bulkheads along the River
Rockland	Route 45 Project	$0	EFC	Waste Water Infrastructure - Environmental Facilities Corp. - Route 45 Project: Road Overhaul and Drainage Improvement
Rockland	Nyack Flood Remediation	$0	EFC	Waste Water Infrastructure - Environmental Facilities Corp. - Nyack Flood Remediation: Divert a Stream that Periodically Floods
Rockland	Ramapo	$5,000,000	EFC	Waste Water Infrastructure - Environmental Facilities Corp. - 20 Drainage Improvement Projects
Rockland	Clarkstown Projects	$6,000,000	EFC	Waste Water Infrastructure - Central Nyack - Drainage Improvement
Rockland	Clarkstown Projects	$5,000,000	EFC	Waste Water Infrastructure - West Nyack - Drainage Improvement
Rockland	Clarkstown Projects	$2,000,000	EFC	Waste Water Infrastructure - Hackensack River Improvements
Rockland	Clarkstown Projects	$700,000	EFC	Waste Water Infrastructure - Elks Drive - Drainage improvement
Rockland	Clarkstown Projects	$92,000	EFC	Waste Water Infrastructure - Demarest Mill Creek - Drainage improvement
Rockland	Clarkstown Projects	$2,500,000	EFC	Waste Water Infrastructure - Klein Avenue Levee - Drainage improvement
Rockland	New Square Bush Lane Sewer Project	$2,481,540	EFC	
Rockland	Rail enhancement western New york	$20,000,000	ESD	Create a commuter line that connects to the metro north in whiteplains and goes over the Tapanzee Bridge that crossess the western side of Rockland County, Orange County, sullivan & beyond. Currently the eastern part of New york is a better economic area
Rockland	Maple Avenue Gateway	$11,150,000	ESD	Mixed use project;97,212 sf,Health Ctr, P.O. space, supermkt, 30 res. rentals, located in Central Bus. Dist. Demo of vacant industrial bldgs. SEQR is complete.Contracts fully executed. $9 million already secured and/or committed. Zoning is in place. Loca
Rockland	Blue Hill Golf Course Clubhouse Renovation	$1,127,000	ESD	Blue Hill Golf Course Clubhouse Renovation Acquired by the Town in 1964, the Blue Hill Golf Course is a municipally owned 18-hole golf course located in the center of Orangetown. Until the last four years, revenue from tee times and outings made the golfcourse self-sustaining. A ten percent decrease in the number of rounds played has lead to a precipitous drop in revenue. A financial analysis has concluded that a primary reason for the decline in play is the condition of the golf clubhouse, especiallyin comparison to surrounding courses. The clubhouse is beautiful stone building from the turn of the century that houses the pro shop, offices, cart barn and locker rooms. All building systems have exceeded their life cycle expectancy and need replacement or substantial renovation. Specific improvements needed to meet current building and life safety codes include a fire alarm system, and new toilet and locker rooms. To increase energy efficiency, a new roof, windows, interior lighting and air condition

County	Project	Requested $	State Agency	Additional Detail
Rockland	Letchworth Village Water/Sewer/Electric Upgrade in the Town of Stony Poir	$10,000,000	ESD	In the Letchworth Village section of the Town of Stony Point the buildings were constructed at the turn of the 20th century by New York State as part of the Letchworth Village housing for the mentally disabled. These buildings, now owned by the town, aresituated in an area perfect for commercial development. Unfortunately the water, sewer, and electric services to this area are totally unacceptable for any sizable development. Our plan is to upgrade, replace and/or repair the water, sewer, and electricservices to Letchworth Village so as to attract commercial development and create new and permanent jobs in the town.
Rockland	Village of Haverstraw Waterfront Redevelopment Phase 2 & 3	$18,300,000	ESD	In partnership with Ginsburg Development Companies, the Village has plans to redevelop three of its existing waterfront peninsulas which have been fallow for years. They are privately owned, without public access, and the subject of continuing tax rolldisputes. Plans include housing, a 'Hudson River Promenade Park"", and waterfront redevelopment. Phase 1 was begun in 2003, Phase 2 has been fully designed and reviewed by the Village's staff, and Phase 3 is in the planning stages. Phases 1, 2, and 3will complete a 2 mile continuous public promenade park only Haverstraw's shoreli
Rockland	ASTM Standards Certification	$10,000	ESD	Think Fiberglass is a small business. We provide fiberglass waterproofing in showers under tile. We are currently seeking avenues for standardizing the process of fabricating these liners. Anyone can buy the supplies and put it together, but is it done properly? We have perfected the technique to the point where they are 100% reliable. Some other companies use inferior products, training and installation methods, in some instances resulting in leaks from the shower into the home. We are seeking for an independent lab like ASTM or ASSE to standardize our shower liners so building inspectors and contractors have a way to qualify a liner as effective and properly installed. Right now no standard exists. It costs $8,000-10,000 to go through this process. As we are trying to stay afloat and maintain our current staffing levels, during these rough economical times, this is a huge capital expense for this small company and any funding would be helpful. If are successful in obtaining these standards, we will
Rockland	Heritage Park	$2,000,000	ESD	The Village will construct a 15,000 square feet industrial park to be operated by Adir Poultry Inc., at 806 Route 45, an 8 acre lot. The property will be the home of the planned Heritage Park Industrial Complex. Adir Poultry will the first business in the complex. ZD Realty, the owner of both lots, will donate the adjacent, commercially zoned, lot at 806 Rt. 45 to construct the new facility in order to ensure that the economic and social benefits of this local enterprise remain within the municipality.
Rockland	Restore New York - Hornick Manufacturing Facility Revitalization	$1,750,000	ESD	The Hornick textile manufacturing plant in Haverstraw NY has closed, putting approximately 100 people out of work. The Blue Beverage Group (BBG) purchased the 181,393 sf building for the purposes of undertaking a significant revitalization project thereto start a new manufacturing operation using state-of¬the art food processing technology including retort bottling. BBG will also lease out a portion of the property to other industrial users. Certain improvements to the property need to be made to accommodate current and future phases of development which will lead to significant job creation in this distressed area.
Rockland	DOWN TOWN REVITALIZATION	$1,500,000	MAIN_ST	NEW SIDEWALKS, STREET LAMPS, DRAINAGE WORK, ROAD RECONSTRUCTION, PLANTERS, TREES, AND CROSS WALKS. ABOUT 2400 FEET OF DOWN TOWN AREA. NYACK'S ECONOMY DEPENDS ON A UP TO DATE DOWN TOWN.
Rockland	Hospitals, Health, Downstate Medical Centers, ROCKLAND COUNTY HEA	$211,006	NYPA	
Rockland	Hospitals, Health, Downstate Medical Centers, OMH ROCKLAND PSYCHI	$279,600	NYPA

County	Project	Requested $	State Agency	Additional Detail
Rockland	Ramapo	$1,800,000	NYPA	Energy Infrastructure and Green Jobs - County, Municipal & State Government Offices - Crow House
Rockland	Ramapo	$2,500,000	NYPA	Energy Infrastructure and Green Jobs - County, Municipal & State Government Offices - Jacob Sloat House
Rockland	Ramapo	$750,000	NYPA	Energy Infrastructure and Green Jobs - Water Supply & Sewage Treatment Facilities - Five Sewer Extensions to Un-served Areas
Rockland	Ramapo	$600,000	NYPA	Energy Infrastructure and Green Jobs - Water Supply & Sewage Treatment Facilities - Six Sewer Pump Station Upgrades: Emergency Generators
Rockland	Camp Venture Equestrian and Greening Projects	$1,500,000	NYSERDA	Camp Venture is developing a 17,000sq ft equestrian building for developmentally disabled that will incorporate solar and geothermal heating and cooling. One other additional geothermal and five solar projects as well as the creation of a biodiesel fueli
Rockland	Anaerobic Digeter / Cogeneration Project	$8,500,000	NYSERDA	Anaerobic Digester/Cogeneration Project $15 million; 1-year construction period, potentially 40 construction jobs. This project will take methane generated by the OrangetownÆs sewer plant and create electricity that will provide 90% of the electricity re
Rockland	Town Hall Energy Efficiency Project	$900,000	NYSERDA	Installation of energy efficient windows, drainage improvements, perimeter wall insulation, faтade repair. $900,000; 9 month construction ; potentially 18 construction jobs Installation of new high-efficiency HVAC system in the 50+ year old municipal bui
Rockland	Brewer Fire Engine Renewable Energy Initiative	$270,000	NYSERDA	Our fire house wants to become the first fire house in the region to install a photo-volaic electric array which would offset our greenhouse gas emissions. We would like to become the model on how the fire service can go green and pursue renewable energyinitiatives. We have secured estimates and are prepared to pursue the project immediatley should funding be alloted to us for our project.
Rockland	Rockland County Dept. of Transportation	$4,200,000	NYSERDA	Purchase 5 replacement 45' Hybrid Buses for Tappan ZEExpress
Rockland	Rockland County Dept. of Transportation	$6,600,000	NYSERDA	Purchase 11 replacement 35' Low Floor Hybrid busses for TOR
Rockland	Rockland County Dept. of Transportation	$3,600,000	NYSERDA	Purchase 6 replacement 40' Low Floor Hybrid buses for TOR
Rockland	Solar Power Upgrade At Town Hall	$270,000	NYSERDA	Solar Power Upgrade At Town Hall
Rockland	Church Weatherization Program	$20,000	NYSERDA	A revamping of the heating system,insulate and weatherize thebuilding.Also to repair and recon struct the Lighting system for more efficiency.
Rockland	Village of Airmont infrastructure/energy/technology	$0	NYSERDA	Repair bus shelters
Rockland	Village of Airmont infrastructure/energy/technology	$0	NYSERDA	Purchase and install solar panels/windmills
Rockland	Camp Venture Energy Projects	$300,000	NYSERDA	Venture Center Day Habilitation Program - This facility is our largest home to over 100 adults in day program and lease space to Long Island University Graduate School and BOCES for small alternative special ed. High school program - 76,000 square feet.Energy upgrades
Rockland	Camp Venture Energy Projects	$375,000	NYSERDA	Venture Center Equestrian Center - To construct a 17,500 square foot indoor riding arena to allow for equestrian program to operate year round and not be subject to weather.
Rockland	Camp Venture Energy Projects	$70,000	NYSERDA	Venture Inn Residence (24 person ICF) & Venture Best Day Program (40 person adult day program) - Currently waiting for approval for two PV systems a 7.2 system for the day program and a 4.9 system for Venture Inn. Would like to retro fit the building electrical and HVAC systems.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rockland	Camp Venture Energy Projects	$530,000	NYSERDA	Venture Select and Industries - Home to workshop, farm, Venture Select Day Program and summer camp and is under review. A roof mounted 25 KW PV system is proposed. Further upgrades include a 5 KW roof mounted wind turbine and an additional 5 KW PV system on the roof of a small accessory building. Finally, the addition of geothermal heating and cooling systems to heat and cool the 30,000 square foot space.
Rockland	Camp Venture Energy Projects	$75,000	NYSERDA	Kathleen Lukens Independent Living Center - Working with architect to retrofit building and add a 25KW PV system along with LED lights and other comprehensive energy saving measures.
Rockland	Camp Venture Energy Projects	$80,000	NYSERDA	Residental Energy Audits - Have completed first phase on energy audits on six and are authorizing studies on the next ten programs. First phase has identified projects ranging from $3,000 to $15,000 in upgrades
Rockland	Camp Venture Energy Projects	$225,000	NYSERDA	Bio-diesel Fueling Facility - Create a bio-diesel fueling station Stony Point.
Rockland	Town Hall energy efficiency project	$0	NYSERDA	Town Hall energy efficiency project
Rockland	Wind & Solar Electricity Generators for the Town of Stony Point	$3,000,000	NYSERDA	The Town of Stony Point would like to build a wind generating station high on a hill overlooking the town. In addition, we would like to install a large bank of solar panels that are needed to supplement the wind generator in order to insure sufficient power under all conditions. By using renewable and ?green? sources of energy generation we are hoping to partially (or completely) offset the electricity used by the Patriot Hills Golf Course and completely remove the facility from the ?grid? whenever possible. With this project we hope to establish a ?model? system that other towns in the region can replicate whenever possible.
Rockland	Insulation of Steam Pipes	$7,300	NYSERDA	Fabricate and install insulation to approximately 800 feet of uninsulated steam heat pipes. We anticipate that this would considerably increase the energy efficiency of this very old building.
Rockland	Insulation ceiling	$3,000	NYSERDA	Remove and replace old ceiling insulation that has shifted out of place with new more efficient insulation. We anticipate that this would increase the efficieny of our heat and lower the heating bills.
Rockland	District Energy and Infrastructure Upgrades	$7,500,000	NYSERDA	Project includes energy improvement components on the 300,000 sf high school, with health, safety and welfare upgrades including fire alarms and technology improvements to the middle and primary schools.
Rockland	Ramapo	$300,000	NYSERDA	Energy Infrastructure and Green Jobs - County, Municipal & State Government Offices - Saltbox House
Rockland	Energy Savings Project for Yeshivath Viznitz/KTC School Buildings	$300,000	NYSERDA	Replace old energy consuming boilers with new energy efficient boilers for three 50,000 sq. ft school buildings. Replace old drafty windows with new energy efficient windows for same three 50,00 sq ft school buildings.
Rockland	Energy Savings project for Yeshivath Viznitz/KTC School Buildings	$300,000	NYSERDA	Replace old energy consuming boilers with new energy efficient boilers for three 50,000 sq ft school buildings. Replace old drafty windows with new energy efficient windows for same three 50,000 sq ft school buildings
Rockland	Building Energy Efficiency and Weather Protection	$35,000	NYSERDA	Two thousand square feet of wall and roof insulation; new high-efficiency steam boiler for seven thousand square foot building; two energy-efficient commercial refrigerators and one energy-efficient water heater; improve weather proofing of doors and windows and replace incandescent lighting fixtures with LED fixtures.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Rockland	Harbor Town Renewable Energy Project	$250,000	NYSERDA	Seeking funding for the purchase & installation of Renewable Energy Solar Panels on 9 building housing 101 families. The Harbors at Haverstraw is a riverfront community that graces the Hudson River's most vibrant location in Haverstraw NY - Rockland County. Charming and wonderfully detailed, homes at The Harbors at Haverstraw are architecturally distinct, with ferry service to Manhattan just steps away.
Rockland	Enhanced Maternal Child Health Home Visiting	$200,000	OCFS	This proposal is for funding to implement an evidence-based maternal child health home visiting program in Rockland County modeled after the Healthy Families program.Rockland currently lasts the staffing and fiscal resources to provide a sustained, evidence-based home visiting program in the county. The program targets pregnant women and their first born infants in high-risk families. Funding is estimated to provide capacity to serve 100 plus families from mother's pregnancy until child reaches age 3 with regular home visits from trained community workers under nursing supervision. The home visiting curriculum is designed to assure prenatal care, infant medical care and immunizations, developmental evaluations, and timely referral for needed services.Outcomes from the program model include decreased child maltreatment, ensuring healthy child development, promoting school readiness and family self sufficiency. Prevention strategies will optimize child's health and development and reduce long-term healaines' Prevention Agenda and the priorities of New York State Local Public Health.
Rockland	V-Global Section 8	$1,875,000	OFT	Project provides low cost dial-up VoIP telephone services to underserved Section 8 housing development residents without access to broadband. Sales and customer service jobs will be funded to educate and service low income Section 8 housing residents onusing a simple device the size of a deck of cards to access lower cost telephone service. The project has already been initiated with the acquisition of dialer devices in inventory and all network facilities activated to provide service. Funding requestwill be applied 100% to new job positions in sales and customer service.
Rockland	V-Global Schools	$1,875,000	OFT	The V-Global Schools project lowers school telecommunication costs by providing interconnected VoIP telephone service to schools currently using POTS services (Plain Old Telephone Service). The funding will be applied 100% to new jobs for sales consultants and customer service agents to work with school administrators in reducing their telcommunications costs and improving service features received. The existing V-Global network facilities will be utilized in providing the services.
Rockland	County Radio Communications Room Upgrade	$10,000,000	OFT	County Radio Communications Room Upgrade
Rockland	Village of Airmont infrastructure/energy/technology	$0	OFT	purchase computer equipment for youth center and senior center
Rockland	Rockland County Fire training center radio commun room	$0	OFT	Rockland County Fire training center radio commun room
Rockland	Tappan Firehouse	$4,500,000	OHS	Total new fire station to accomodate larger vehicles, personnel safety, training facilities,m/f lockers and restrooms, etc.--To replace 100 year old concrete structure unable to be remodeled.--In the center of state and federal historic district.-Fire company owned and paid for property. Letter sent to Mr Gilchrist on Feb 16th, before we were aware of this site.
Rockland	Fire Dept Equipment	$265,000	OHS	Fire Dept Equipment
Rockland	Tappen Firehouse	$4,950,000	OPRHP	Replace 100 Year Old Firehouse
Rockland	Stonehouse Drive Storm Sewer Imrovements	$500,000	OPRHP	Construction of Kennedy Park in Spring Valley including walking paths, picnic pavilion, picnic tables, benches and a meadow.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Rockland	Historic Waldron Cemetery Restoration	$97,000	OPRHP	In our town, off of East Main Street, feet from CSX railroad tracks and the high-tension power lines, lies a narrow gravel road that leads south to the long-neglected Waldron Cemetery dating from the time of the American Revolution. This cemetery has been virtually forgotten and is overgrown. Many of the tombstones are broken and in pieces and those that are still standing are hidden by weeds and the entire area is mostly inaccessible. Thanks to the efforts of the local Sons of the American Revolution,the Town of Stony Point road crews, and a host of volunteers and contributors, we have made a major effort to clear the brush, improve the access road, and bring the cemetery to a condition that begins to honor the memory of our ancestors. Our goal is toallow safe public access to this historic site for the first time in many years. We are requesting funds to construct a fence around the large cemetery area, erect two flagpoles, and establish a suitable monument and memorial in order to honor the 300+
Rockland	Rockland Road Bridge- Historic Renovation	$1,250,000	OPRHP	Project proposes a historic renovation to this unique brick arch structure (ca 1874)- one of two of its kind in NY State. This is an endeavor involving labor intensive masonry work- estimated at well over $1.5 million. The current structure's walls havebeen bowing due to the weight stress it faced when the repairs to the Army Bridge in the early 90's redirected heavy traffic over this structure. The bridge was listed as 'seriously deficient' by NYSDOT in 2002 and has been weight limited to 3 tons and reduced to a single lane of traffic. The viability and safety of this bridge has been a growing concern for the Village, we've applied to SHPO and NYDOT for Historic Preservation Grants for several years and have not 'made the cut'.
Rockland	Piermont Estuary Walkway	$245,000	OPRHP	Installation of a ADA compliant walkway through the Piermont estuary to facilitate access to the unique environment at the mouth of the Sparkill. This walkway will be designed to have minimal impact on the sensitive nature of this geographic feature andwill provide viewing stations for education and first hand experience of the flora and fauna of this estuary.
Rockland	Clarkstown Central School District, Congers Elementary	$78,300	SED	
Rockland	Clarkstown Central School District, Bardonia Elementary School	$86,500	SED	
Rockland	North Rockland/Haverstraw-Stony Pt, Willow Grove Middle School	$316,500	SED	
Rockland	South Orangetown CSD, Tappan Zee High School	$187,500	SED	
Rockland	South Orangetown CSD, Middle School	$3,393,539	SED	
Rockland	Ramapo CSD, Suffern Middle School	$239,500	SED	
Rockland	Ramapo CSD, RP Connor Elementary School	$159,750	SED	
Rockland	Ramapo CSD, Sloatsburg Elementary	$439,005	SED	
Rockland	Ramapo CSD, Cherry Lane Elementary	$112,500	SED	
Rockland	Ramapo CSD, Suffern High School	$229,000	SED	
Rockland	Ramapo CSD, Viola Elementary	$142,250	SED	
Rockland	East Ramapo CSD, Spring Valley Senior High	$250,000	SED	
Rockland	Universal Pre Kindergarten	$0	SED	we think your UPK efforts are commendable however as a upk provider i see many upper middle class families benefitting while the ones in need still don't have access. Most families utilizing UPK have the financial means to send their child to pre-k and w

County	Project	Requested $	State Agency	Additional Detail
Rockland	Work Project-One to One	$25,000	SED	Project is two fold: 1. It will provide jobs for 4 students of One to One Learning, an organization that provides English and citizenship classes. These are men who usually have jobs in construction and landscaping but, with the economic times as they are, find themselves out of work. They are highly skilled workers and fathers of families and need work. 2. Because of our recent move of classes into cabins in a camp setting, we have painting, cleaning, repair and wood flooring to be laid. We have rampsto be repaired. We want to put in thermostat timers and insulation with drapes--environmental concern for heating and energy use.
Rockland	Residency/Studio building	$487,000	SED	New construction to add 4 live/work spaces to accommodate artists (ADA standards to be complied with for accessibility) attending Residency Program in an LEED certified 3000 Sq. Ft. building to include latest green techniques such as composting toilets.Site ready, all plans submitted, awaiting permits.
Rockland	Multi-Purpose Community/Headstart Center	$2,775,000	SED	Complete construction of multi-purpose Community Center which will provide day care & headstart classes for children through five years of age, early childhood support services, family services, senior support services and large multi-purpose community room for approximately 8,000 residents, 85% of which are low to moderate income families.
Rockland	Expanding Early Childhood Home-Visiting Program & Building Capacity of S	$179,585	SED	Rockland 21st Century Collaborative for Children and Youth (a nonprofit) and the Youth Bureau and its AmeriCorps Program partner to implement The Parent-Child Home Program in 5 school districts. PCHP is a national research-proven home-visiting model thatprepares at-risk toddlers for school success by increasing literacy skills, enhancing social-emotional development, and strengthening parent-child relationships. The program bridges the achievement gap, preparing children to enter school as ready to learn as more advantaged peers. Home visits are provided by AmeriCorps? Literacy Corps. Each district program has a waiting list. School districts? Family Resource Centers?also supported by 21C?operate above capacity too. FRCs offer family support and earlychildhood, school-age, and parent engagement programs. Attendance has risen 275 percent in 5 years. In 3 districts, FRC coordinators also act as PCHP coordinators. To build capacity in both programs, we would build infrastructure: hire 3 part-time distr110 participating children, who can be expected to graduate from high school at a 20% higher rate than other low-income students.
Rockland	Rockland CC, Demolition of Impervious Building and restoration of land are	$400,000	SUNY_CC	
Rockland	Rockland CC, Restore Boiler to Energy Efficient performance	$75,000	SUNY_CC	
Rockland	Rockland CC, Library Improvement Project	$50,000	SUNY_CC

County	Project	Requested $	State Agency	Additional Detail
Rockland	Wind & Solar Electricity Generators for the Town of Stony Point	$3,000,000	Unassigned	The Town of Stony Point would like to build a wind generating station high on a hill overlooking the town. In addition, we would like to install a large bank of solar panels that are needed to supplement the wind generator in order to insure sufficient power under all conditions. By using renewable and ?green? sources of energy generation we are hoping to partially (or completely) offset the electricity used by the Patriot Hills Golf Course and completely remove the facility from the ?grid? whenever possible. With this project we hope to establish a ?model? system that other towns in the region can replicate whenever possible.
Rockland	Camp Venture Equestrian Building & Alteernative Energy project Stony Poi	$800,000	Unassigned	Camp Venture Inc is seeking to build an indoor equestrian arean to serve the more than 200 developmentally disabled children and adults who utilize the program seasonally. The new building will extend the program to year round status and create seven toten new permanent jobs. The project is recently approved by the local planning board and can start within 30-90 days. The project includes geothermal and solar that we would otherwise not be able to afford and will reduce long term operating expenses aswell as adding 40 KW of power to the grid annually. Further, we are adding geothermal and solar to the existing large warehouse building on site. The project has been designed in partnership with the IBEW 363 and other trades unions and will create up toforty construction jobs for the life of the construction six to nine months and seven to ten new permanent human service jobs.
Rockland	Camp Venture Solar and Energy Efficiency Projects Sparkill	$650,000	Unassigned	Camp Venture Inc. in partnership with the IBEW 363 is seeking to add geothermal and solar projects to three of our larger building in an effort to reduce costs. We are seeking to add 90KW of solar at three distinct sites on our south campus. The projectswill create ten to fifteen union construction jobs during the lifetime of the projects and two to three permanent jobs. The projects are ready to go immediately and will create union construction and trades jobs as well as permanent staff positions in anot-for-profit agency These green projects will add power to the local grid and reduce operation costs of a medicaid funded agency..
Rockland	Estuary Enhancement Program	$3,300,000	Unassigned	An component of the Haverstraw Waterfront Redevelopment project, this will provide an ecologically=enhanced estuary environment on the Hudson River, in a location that is underutilized and inaccessible to the public. This project has undergone environment review pursuant to SEQRA, and the Village's adoption of a Lower Waterfront Revitalization Program, and it has completed landscaping and engineering design. The Estuary Enhancement Program will be connected to the 2-mile promenade park, and proposesa pedestrian and bicycle pathway, outlook points, and education al plaques.

County	Project	Requested $	State Agency	Additional Detail
Saratoga	Water Tower Exterior Rehabilitation	$402,000	CDBG	The project consists of the rehabilitation of a 500,000 gallon elevated water tank, including complete sandblasting, coating of all exterior surfaces and lead abatement. A monopole is being constructed at a cost of $188,154 to allow the relocation of cellular communication equipment to be relocated permanently off the tank. This project ha NYSDOH approval.
Saratoga	City of Saratoga Springs - Infrastructure Projects	$375,000	CDBG	Water Treatment Plant - DPW - Emergency Power Generator
Saratoga	Regional Community Center at Moreau	$3,000,000	DASNY	The Moreau Community Center seeks your assistance in investing in our future with your expertise, insight and resources in securing funding for The Regional Community Center at Moreau as part of the Federal Stimulus Package. ItÆs our understanding that p
Saratoga	Saratoga Springs Public Library Remodelling Project	$379,750	DASNY	The project entails remodeling the first floor of the Saratoga Springs Public Library in order to increase energy efficiency, improve access for senior citizens, improve space dedicated for middle and high school students, and improve workflow efficiencies. Specifically, plans include replacement and upgrades of bathroom plumbing fixtures, lighting throughout the floor, and entrance doors; improve the shelving and seating in the large print area and create a Teen Center for homework, socialization and informal learning opportunitites; redesign the Circulation Desk to increase visibility and implement a self-check-out service model, and installation of an emergency generator.
Saratoga	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of three residences in Saratoga.
Saratoga	Schenectady County, Union College - Improvements to Richmond Hall	$490,000	DASNY	Schenectady County, Union College - Improvements to Richmond Hall Facilities renewal improvements to Richmond Hall a 120 bed residence hall on the Union campus to include: installation of sprinklers, Renovations to the first floor to provide accessibility, installation of new ventilation system, and installation of an accessible ramp on the building site.
Saratoga	Underground Fuel Tank Removal and Replacement	$150,000	DEC	This project involves removal of two 21 year old underground fuel tanks and replacement with above gound. The current tanks capacity is 2000 gallon gas and 4000 gallon diesel. The lines and tanks are on boarder line for cathotic protection under tests that we have conducted reguired under DEC's application. There is concern about line integrety and possible line failure.We experienced a leak in one of the lines 2 years ago and remediation was completed by airating the soils in tank area as required. Monitoring of soil and underground water flows occurred for 2 years. Area properties water is supplied by wells. These tanks service the Highway and Water Department, as well as, our fire and emergency departments.
Saratoga	City of Saratoga Springs - Infrastructure Projects	$100,000	DEC	Broadway Drainage Project - DPW - City Center
Saratoga	Construction of new Saratoga County Animal Shelter	$5,270,000	DEC	Construction of new Saratoga County Animal Shelter
Saratoga	Clifton Park Senior Apartments - 70 Units Affordable Rental Housing	$11,795,347	DHCR	
Saratoga	Restore NY - Collingwood Drive and North Perry Housing Projecy	$600,000	DHCR	The City of Johnstown has demolished three old commercial and industrial buildings on an 1.1 acre, 3 parcel site near the City center. The City will transfer ownership to a private developer who plans to construct three duplex townhouses. Each of the 6 housing units are approximately 1355 sq. ft. for a total of 8,130 sq. ft. These homes will be constructed to conform to the current market and neighborhood needs. Access to two of the duplex townhouses will be off the off of Collingwood Dr. and the thirdtownhouse will be off of North Perry St. This project fulfills the objectives and needs identified in the city's ""Comprehensive Plan"". This project will also leverage the City's BOA prog

Saratoga	Monument Drive Paving Project	$122,000	DOT	The village has attempted to receive assistance for paving of Monument Drive through different programs and has not been successful but is not capable of paving without assistance, based solely on the village's budget. The Saratoga National Park Service(NPS) has a capital project near completion and needs handicap parking on the southend of the Monument Drive paving project. The paving project would include paving 20'X560', grind pavement, grade 2.5"" binder course, 1.5"" top course install 4 cross culverts and 120 LF of drainage and material. The village respectfully requests your consideration through the Economic Stimulus program. Thank
Saratoga	Saratoga Spa State Park -- Historic Roadway Rehabilitation	$400,000	DOT	This Transportation Enhancement Project is supported by NYSDDOT Commissioner Glynn. The project involves the rehabilitation of historic sections of park roadways within Saratoga Spa State Park. The roadways are used by vehicles, pedestrians, and bicyclists visiting the state park.
Saratoga	Clark Rd North Branch Culvert Replacement	$275,000	DOT	Replacement of a failing 50'L x 84"" Diameter steel culvert, the existing culvert and headwalls are failing and need to be replaced. Existing headwalls are failing and subject to washout, and one headwall has falling into strea
Saratoga	Clark Rd North Branch Culvert Replacement	$275,000	DOT	Replacement of a failing 50'L x 84"" Diameter steel culvert, the existing culvert and headwalls are failing and need to be replaced. Existing headwalls are failing and subject to washout, and one headwall has falling into strea
Saratoga	Burt Road Culvert Repair	$172,000	DOT	Project includes concrete repair to an existing 40' wide by 18ft diameter steel arch culvert section. The steel arch is in good condition however the concrete base and wing walls require rehabilitation to safely maintain the span. This culvert approximates a small bridge, and repair of the concrete is far cheaper than replacement of the span by a new bridge.
Saratoga	Town of Hadley bridge replacement	$0	DOT	Construction of bridge spanning the Hudson River connecting Town of Hadley and Town of Lake Luzerne.
Saratoga	Reconstruction/resurfacing of Denton Road	$1,200,000	DOT	The rebuilding of two miles of Denton road that is shovel ready and has been slated for construction for a number of years. This project has been unable to be started do to it lying in two different municipalities and neither of them being able to securefunding for the upgrades. The importance of this project is the extreme safety hazards the road presents to a large senior housing complex that uses it as the only access to there community for emergency vehicles.
Saratoga	Installation of new road and infrastructure	$1,250,000	DOT	Installation of new road, base, sidewalks and appurtenances on Denton Road. from Bloomfield Ave. to Locust Grove Rd. (1/2 in Saratoga Springs and 1/2 in Greenfield, NY) Owned by both, maintained by Greenfield, NY approximately 1/2 mile
Saratoga	Collector/Sanitary Sewer, Force Main, Pump Station, Water Treatment Plan	$5,750,000	EFC	
Saratoga	Infiltration & Inflow Correction	$1,360,000	EFC	
Saratoga	Pipe Line, New Water ource	$5,000,000	EFC	Hudson River Dredging May 14th, 2009. PCBs from Hudson River has ruin the Villages well field and its aquifer for life. want new water source with the Saratoga County Water Authority, which requires new pipping from the Village of Stillwater to connectio
Saratoga	Saratoga County Water Interconnect	$795,000	EFC	Installation of 4500 feet of new water main, two metering/chlorination stations, and one metering station to provide a connection between the Clifton Park Water Authority system and the Saratoga County Water Authority system.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Saratoga	Water Line Extension to Saratoga Medical Park at Malta	$1,716,000	EFC	Saratoga Hospital is asking for federal stimulus finds to extend a water line from the Town of Ballston town line east along State Route 67 to our Saratoga Medical Park at Malta (SMPM) site in the Town of Malta, a distance of approximately one mile. Thiswill help ready SMPM for development into a comprehensive healthcare campus and will also facilitate development along Route 67 between the Town of Ballston town line and the SMPM site. When fully developed, the total assessed value of the SMPM projectwould be over $162,000,000 and could employ up to 2000 people
Saratoga	Saratoga County Water	$22,000,000	EFC	Expansion of the Saratoga County Water Authority Transmission Mains
Saratoga	Relining 3881 of Sewer interceptor line	$1,649,425	EFC	Relining 3881 of Sewer interceptor line
Saratoga	City of Saratoga Springs - Infrastructure Projects	$550,000	EFC	Geyser Crest - DPW - Well System Improvements
Saratoga	City of Saratoga Springs - Infrastructure Projects	$700,000	EFC	Gilbert Road - DPW - Water Line
Saratoga	Sanitary Sewer Rehabiliatation Project	$7,500,000	EFC	Rehabiliatation of Village's 100 year old sanitary sewer system to reduce inflow and infiltration and eliminate sewer overflows. Rehab. / replace +/- 70,000 feet of sewer pipe ranging in size from 4' - 30"". Eliminate stormwater corss connections from roof laterals, sump pumps, and drainage system
Saratoga	State-of-the-art LED Factory	$3,500,000	ESD	Evident Technologies, a SBTIF portfolio company (so NY State already owns stock) is faced with increasing sourcing challenges from suppliers in China. Evident is working on building a LED manufacturing facility in New York. This state-of-the-art LED factory would be one of few in the US, manufacturing highly energy-efficient light diodes using the Company?s patented technology. Currently these LEDs are manufactured in China and Evident already has an existing, growing customer base. There is no reason to make these energy efficient lights over-seas. Let?s bring the high paying, high tech jobs back to the US. The STEP park in Malta is an ideal location from this project. A new building would probably have to be constructed and the project requires the purchase of high-tech manufacturing equipment. Evident would hire employees from the local region and train them to use equipment.
Saratoga	waterfront dock installation & park development	$100,000	ESD	Waterford is seeking to expand it's waterfront area. Waterfront visitor center/docking area created in 2000, brought much tourism and small business to community. Looking to expand to allow area for small baot craft, kayaks, canoes and expand tourism opportunities, small business opportunities. Received grant, have bids, etc., but due to recent budget contraints cannot comeup with toatl matching dollars to do whole project.
Saratoga	Schuylerville Broad Street Revitalization Program	$220,428	MAIN_ST	
Saratoga	Schools, Elementary and Secondary, Ballston Spa Central School District	$265,308	NYPA	
Saratoga	Schools, Elementary and Secondary, Cairo-Durham CSD	$403,791	NYPA	
Saratoga	Schools, Elementary and Secondary, SOUTH GLENS FALLS CSD - PHAS	$498,591	NYPA	
Saratoga	Aquariums, Parks, Zoos and Nature Centers, SARATOGA STATE PARK	$173,761	NYPA	
Saratoga	Alternative Fuel Vehicle Research Lab at STEP (NYSERDA)	$38,000,000	NYSERDA	
Saratoga	Solar PV Contracting	$600,000	NYSERDA	Saratoga Solar is seeking to sell and install PV systems to public buildings such as schools and universities, local government, and commercial projects as phase I. Phase II would consist of residential PV installations. Saratoga Solar would install thePV arrays at no cost to the end-user. The end-user would sign a power purchase agggrement for any power produced by the PV array and consumed by the end user at an agreed upon $/kwh price for a 20 year term.

County	Project	Requested $	State Agency	Additional Detail
Saratoga	City of Saratoga Springs - Infrastructure Projects	$25,000	OFT	The Saratoga Springs Public Safety Capital Construction Committee was appointed in January 2006 by the Commissioner of Public Safety and charged with developing a comprehensive facility needs analysis preparing base line cost projections, funding alternate
Saratoga	9P fire sub-station	$500,000	OHS	We are a rural volunteer fire department. Our district covers 50.2 square miles in the Town of Saratoga. We currently have a single firehouse. We received public approval in July 2007 to build a fire sub-station on Saratoga Lake to improve coverage and response time within our district. Since then we have worked through design, permits, Wicks Law changes, approvals, bidding, and contractor selection. We are ready to break ground on this project. We worked to save over $300,000 for this project, but dueto rising materials/labor prices, costs have escalated beyond our original budget. The current price for the project is $934,240. The economic impact of putting this into the economy could be 3-5 times that. We are requesting $500,000 in funding. This project will create jobs in the building and manufacturing industries immediately. Going forward, instead of making bond payments, we would be able to use our tax revenue to invest in gear and safety equipment to keep our firefighters safe. We also would r
Saratoga	Station 2	$3,500,000	OHS	Replacement of 35 y/o fire station to increased current space for training and equipment. Building will also be offered to local agencies as a command center and shelter during emergency situations.
Saratoga	EastSide EMS/Fire Station	$4,300,000	OHS	Current service unable to field timely and appropriate response to medical and fire emergencies in newly developed areas east of the Adirondack Northway.
Saratoga	Public Safety Facility	$11,700,000	OHS	Current circa 1887 facility is one-third of necessary size, lacks a private interview room for victims (a violation of Federal Law), lacks booking and arrest processing areas and adequate storage for weapons, equipment and evidence; building security isat risk due to the overcrowded conditions; proper ventilation is not possible, the court facility is inadequate as well.
Saratoga	Saratoga Spa SP - Geyser Dam Rehabilitation	$650,000	OPRHP	
Saratoga	waterfront dock installation & park development	$100,000	OPRHP	Waterford is seeking to expand it's waterfront area. Waterfront visitor center/docking area created in 2000, brought much tourism and small business to community. Looking to expand to allow area for small baot craft, kayaks, canoes and expand tourism opportunities, small business opportunities. Received grant, have bids, etc., but due to recent budget contraints cannot comeup with toatl matching dollars to do whole project.
Saratoga	Tug Chancellor Restoration Project	$375,000	OPRHP	Listed on the National Register of Historic Places, the 1938 tugboat Chancellor is an enduring symbol of the spirit of the Erie Canal. The WMHS seeks full restoration to participate in this year's quadricentennial celebration between Lake Champlain and NY Harbor, and to conduct a statewide tour next year in recognition of the bicentennial of the original Erie Canal Commission. Major physical infrastructure work on the boat would include new steel decks and bulwarks, new safety rails, engine room improvements, environmental systems improvements, and interior rehabilitation of the wheelhouse and bunkrooms. Our goal is a permanent, statewide educational program aboard the tugboat, bringing the rich history of the Erie Canal to school children across the State, especially in our inner cities. The Chancellor is the flagship of the Tugboat Roundup, though we have traveled in recent years to Troy, Cohoes, and Albany. More information about this venerable vessel and our programs are available at www.waterfordlace at the Port of Albany, at Scarano Brothers boatyard.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Schenectady	Burdeck Street Corridor Infrastructure	$7,000,000	DOT	Burdeck Street Corridor Infrastructure
Schenectady	road to water plant	$500,000	DOT	Road to the water plant of the town and the finishing of top coat of the facility black top area.
Schenectady	Dawson Road Bridge	$150,000	DOT	This is a small bridge that has been showing some signs of detereation and must be inspected and repaired as needed. A STUDY WOULD BE NICE.
Schenectady	5 year road plan	$2,000,000	DOT	there is a 5 year road maintenance & re-placement plan submitted annually to the board,with a few changes. One change is the amount needed to catch up / this is in exchange of not raising taxes. The roads still need maintenance/replacement
Schenectady	Reconstruct Town Roadways	$550,000	DOT	Reconstruct approx. one mile of town roadways (Millington Pl., Whitney/Trottingham Dr., Midland Ave.,Holiday Dr.
Schenectady	Hillside Avenue	$1,500,000	DOT	Rehabilitate and widen/straighten Hillside Avenue
Schenectady	Improve Multi-Use Town Paths	$675,000	DOT	Improve certain multi-use paths throughout Town (River Rd. Park, near GE and soccer complex on Zenner Rd.) and add approx. 3 miles of new multi-use paths (along Hillside Ave. and connector to Town rec. facility on abandoned rail bed).
Schenectady	New Sidewalks	$150,000	DOT	Construct new sidewalks along Cornelius Ave. (from Ray St. to Hillside Elementary School)
Schenectady	Repave Roadway at Wastewater Treatment Plant	$200,000	DOT	Repave the entrance roadway and parking areas at the wastewater treatment plant and water treatment plant.
Schenectady	Schenectady County, Schenectady Amtrak Multimodal Station -- Complete	$4,000,000	DOT	Schenectady County, Schenectady Amtrak Multimodal Station -- Complete reconstruction of the current outmoded facility in downtown into a modern efficient transit center. The project involves a total investment of $8,700,000. A commitment of $4,700,000 in federal funds has been obtained for the station, leaving a financing gap of $4,000,000. More than simply a train station, the project involves the complete rehabilitation of the facility into a multi-modal transit center that will continue the resurgence of downtown, and bring additional visitors to the city.
Schenectady	Warren County, Bay Street Reconstruction	$2,750,000	DOT	Warren County, Bay Street Reconstruction The project is approximately one mile long beginning at the intersection of Washington Street and ending at the City Line. The project includes a box out section with new curbing and an asphalt overlay of the majority of the roadway. Several sections of the existing sidewalk will be preserved but the majority will be replaced. Two traffic signal replacements are also included. Selective drainage improvements are proposed to rehabilitate some deteriorated catch basins and to separate stormwater drainage from the sewer system where possible. The project also includes approximately 1200 ft. of water main replacement. The sanitary work will include replacement of an old, deteriorating wastewater force main, which is entirely City betterment,. This project is a continuation of the Central Business District revitalization effort and is the 3rd component of the area wide transportation plan which calls for the reconstruction of Warren Street, Glen Street and Bay Stre regional economy. The Bay Street project continues the infrastructure investment necessary for the City to maintain its position as the economic center of the region.
Schenectady	Town of Rotterdam Capital Projects - Stimulus Funds 2009	$35,000,000	EFC	We submitted a package to Governor Paterson and other NYS and federal officials last month. We have CD's available with all plan details, etc. We included all our studies and plans for the following: Burdeck Street Corridor Sewer Project, Hamburg Street
Schenectady	Water Treatment Plant-Metered System	$15,000,000	EFC	Funds to be used to reduce energy use at the City of Schenectady's water treatment plant (metered system).
Schenectady	North Ferry Pump Station Improvements	$700,000	EFC	Funds to be used for the North Ferry Pump Station upgrade.
Schenectady	Sewer Treatment Plant Thickener	$200,000	EFC	Funds to be used for a gravity belt thickener at the sewer treatment plant.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Schenectady	Oneida Street Storm Sewer	$1,500,000	EFC	Funds to be used for Oneida Street storm sewer improvements.
Schenectady	Water Treatment Plant Co-Generation	$3,000,000	EFC	Funds to be used for co-generation using digester gas at the sewer treatment plant.
Schenectady	Construct new Water & Sewer Maintenance Facility	$3,500,000	EFC	Construct new Water & Sewer Maintenance Facility
Schenectady	Purch & replace equipt @ Water Waste Plants&Pump Stat	$100,000	EFC	Purch & replace equipt @ Water Waste Plants&Pump Stat
Schenectady	replace 1 mile public water main	$2,000,000	EFC	replace 1 mile public water main
Schenectady	Add 2 miles new public water main	$3,300,000	EFC	Add 2 miles new public water main
Schenectady	Design & drill 2 replace water wells @ Water Treat Plant	$300,000	EFC	Design & drill 2 replace water wells @ Water Treat Plant
Schenectady	Add 3 new water towers	$1,300,000	EFC	Add 3 new water towers
Schenectady	Water plant repair / water softener	$650,000	EFC	the original water plant that is still in operation has the main floor that is falling into the clear well,must be repaired.water softeners are off line and not working residents are complaining to soften the water-need funds.Our water debt is already high.
Schenectady	woodcrest sewer	$290,000	EFC	This sewer system is one that is very exspensive to the residents, there are numorus failling septic systems due to the poor soils in this area.This project has been approved by N Y S Office of the State Comptroller, & ready for bid.
Schenectady	New Sewer Line between Burdeck St and Mariaville Road	$7,000,000	EFC	New Sewer Line between Burdeck St and Mariaville Road
Schenectady	Water and Sewer Improvements	$6,000,000	EFC	Water and Sewer Improvements
Schenectady	Water improvements - gravity belt thickener	$200,000	EFC	Water improvements - gravity belt thickener
Schenectady	Replacement of Water Transmission Mains	$3,500,000	EFC	Replacement of Water Transmission Mains
Schenectady	Extend sewers north on Route 50	$4,000,000	EFC	Extend sewers north on Route 50
Schenectady	Extend sewers to upper Woodcrest Drive	$350,000	EFC	Extend sewers to upper Woodcrest Drive
Schenectady	New Water Tank	$1,500,000	EFC	New Water Tank
Schenectady	Wast Water Treatment Plant Upgrade	$6,000,000	EFC	Wast Water Treatment Plant Upgrade
Schenectady	expanding sewer availability north rt50	$1,000,000	EFC	The moving of a sewer lift station to the other side of creek along highway rte 50 would open up for the availability for the north end of the town , 1/3 of the population of the town
Schenectady	Add three new water towers	$13,000,000	EFC	Add three new water towers
Schenectady	Water Tower (Rotterdam Junction) New Construction	$2,800,000	EFC	Water Tower (Rotterdam Junction) New Construction
Schenectady	water supply to 6 pump station	$18,000	EFC	pump staion in need of 2"" water supply for operations of maintenance at these pump stations- Freemans bridge , Price chopper, airport, Mohawk St., Hill St., and Brookside St
Schenectady	wells at pump house	$75,000	EFC	Connection of #1 & #2 wells to the operation of the new water plant. As the town of Glenville supllies potable water to 3 other towns, the next phase is connect 2 other well with automatic valve
Schenectady	Scada communication system	$100,000	EFC	a scada system that would allow a complete over view of all operations of water and sewer from a computer system with system being wirerless. read tank levels, and lift & pump stations from a computer
Schenectady	Woodhaven I & I	$100,000	EFC	This section of town has a large problem with I & I, Manholes that need to be repaired & slip lining of the sewer mains would solve the high I & I problem in that area
Schenectady	New Water and Sewer Maintenance Facility	$3,500,000	EFC	Design and Construct a new water and sewer maintenance facility
Schenectady	Improve Drainage	$5,000,000	EFC	Construct detention basins and install corresponding pipes to improve drainage in certain residential neighborhoods (Lexington/Dean St. area, Tall Oaks Apt. area)
Schenectady	Replacement of Public Water Main	$2,000,000	EFC	Replace approx. one mile of public water main (adjacent to Rosendale Road, Old River Road, Niskayuna Road, Lishakill Road)
Schenectady	Add New Public Water Main	$3,300,000	EFC	Add approximately 2 miles of new public water main (from intersection of Van Antwerp Rd. and River Rd. to Hillside Commerce Park)

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Schenectady	Replacement Water Wells	$300,000	EFC	Design and drill 2 replacement water wells at water treatment plant
Schenectady	Three New Water Towers	$13,000,000	EFC	Three new water towers - one at water treatment plant, one at Hillside Commerce Park, one at existing water town site on Jaffrey Street
Schenectady	Schenectady County Water Treatment Plant	$15,000,000	EFC	Funds to be used to reduce energy use at the water treatment plant (metered system).
Schenectady	Town of Rotterdam WWTP	$6,000,000	EFC	The current WWTP needs to be upgraded to accommodate this demand for expansion.
Schenectady	Science Center of Tech Valley	$55,000,000	ESD	Funds to be used for the construction of the ""Science Center of Tech Valley"", a regional science center in the City of Schenectady (LEED-certified ""green"" bu
Schenectady	818 Albany Street Renovation Project	$100,000	ESD	My name is Larry Bratton. I am the administrative assistant for Minority Contractors Technical Assistance Program (MCTAP), 955 State Street, Schenectady, New York 12307. I am writing to you on behalf of MCTAP. MCTAP is a small non-profit organization created in 1994 to provide technical assistance to minority contractors, a class that is sorely under represented in the construction trades. MCTAP is rooted in the African American community in Schenectady and our mission is to increase the number and competitiveness of minority tradesmen and contractors in the construction industry through the dissemination of information, education, training, and technical assistance. However, the name Minority Contractors Technical Assistance Program is a misnomer inseveral ways. One of those ways is that MCTAP's services are not exclusively provided to minorities. We serve any individual who walks through our doors seeking help, regardless of their race, creed, and country of origin or religion. Another way in whicCP and a practice area for a youth after-school step dance team. And we are presently in the process of establishing a computer lab using refurbished computers donated by GE Elfun Computer Rehab of Schenectady for use and training by our clients and they at large. One of our more notable recent accomplishments was collaboration with One Stop of the Schenectady Job Training Agency (SJTA) and Phoenix Resources, a staffing agency in St Augustine Florida, in which we facilitated the training and employment
Schenectady	Schenectady Museum Science Center construction	$55,000,000	ESD	Schenectady Museum Science Center construction
Schenectady	Reconfigure Industrial Park Municipal water feeds	$400,000	ESD	Reconfigure Industrial Park Municipal water feeds
Schenectady	High Temperature Superconductor Wire Manufacturing	$4,800,000	ESD	SuperPower has urgent need of two additional major pieces of capital equipment (MOCVD and Silver Sputter Systems) to eliminate a manufacturing bottleneck and double the manufacturing capacity for second-generation high-temperature superconducting (2G HTS) wire in Schenectady. This would allow us to obtain a greater share of the worldwide market demand for 2G HTS wire which enables more energy-efficient, reliable, safe and environmentally friendly power cables, motors, generators, transformers and otherrelated devices. Additional capacity will allow for acceleration of cost reductions that will lead to earlier adoption in cost-sensitive utility markets and will also allow us to retain the US technology leadership position in 2G HTS wire that is now being threatened by organizations in Japan, Korea, China and Germany. Addressable applications will include devices for the Smart Grid infrastructure and alternative energy areas such as generators for wind turbines, as well as dc cables to transmit energyincrease our leadership position in the world. Also included in the request is funding to immediately train the 17 new workers who will be needed to run the equipment. Although SuperPower is now offering 2G HTS wire commercially, sales do not yet cover eance would help to accelerate the time to profitability and value to New York State. Additional job growth will follow as well.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Schenectady	Data Storage and Other Tenants using District Heat Plant	$1,400,000	ESD	Proctors owns a 12,000 third-floor unused space in a former downtown Department store. Three finished floors are already used by Proctors as a theatre, education center, conference spaces and offices. This project would fit up the third floor space withHVAC and electricity for an environmentally friendly downtown development, including private tenants and additional spaces for Proctors. Discussions with potential clients for the vacant space include a data storage facility, a conference room and the offices of public access television. Expansion into this space would utilize the Proctors District Heating and Cooling Plant (DHCP), adding no additional carbon footprint. It would also use co-generated electrical power from the DHCP, which would supply ?off-grid? power to the space. Being able to supply ?off-grid? power and a reliable cooling system from the DHCP would be a great asset for the attraction of the data storage center. The grant would cover HVAC, electrical and basic fit up of the entire sp
Schenectady	Schenectady NYMS Program - Lower State Street	$500,000	MAIN_ST	
Schenectady	Colleges and Universities, SCHENECTADY COUNTY COMMUNITY COLL	$725,029	NYPA	
Schenectady	promote energy efficient utilities for home owners	$100,000	NYSERDA	This is to get new energy efficient equipment in to homes to upgrade old utilities. ie. Boilers, Hot water tanks, and furnaces. The money will go in to getting the appliances and save the homeowners energy savings at a low cost.
Schenectady	Cogeneration Energy Monitoring	$100,000	NYSERDA	The project is to install energy monitoring sensors and software so NYSERDA can display the Proctors cogeneration facilities operating characteristics on their website. In addition, Proctors will utilize these date to optimize total plan efficiency. Proctors operates a District Heating and Cooling Plant (DHCP) which now provides hot and cold water to heat and cool its own 180,000 sq. ft. non-profit performance venues, an adjacent hotel, a near-by office building/sports complex, and snowmelt for about anacre of downtown sidewalks. Included in the DHCP is a cogeneration facility of four micro turbines, with nameplate output of 60 kWatts each, and an exhaust gas energy recovery unit. The exhaust gas unit is an evaporate chiller/heater capable of 120 tonsof refrigeration, or 1100 MMBtu/hr heating, under nominal atmospheric conditions. This cogeneration facility will meet about half of the electrical needs of Proctors while also providing waste heat for the DHCP. The energy sensors and associated softwar
Schenectady	Renewable Energy Features for Affordable Housing	$200,000	NYSERDA	Funds to be used for renewable energy features (solar, photovoltaics) for 10 units of Universal Design/Green Affordable Housing.
Schenectady	Schenectady City Hall Energy Improvements	$2,000,000	NYSERDA	Funds to be used to reduce Schenectady's carbon footprint/reduce energy costs by replacing original windows on Schenectady City Hall (c. 1932) and the reconstruction of the original skylight.
Schenectady	Piping for District Heat	$2,000,000	NYSERDA	The project builds the piping infrastructure (+/-2000 linear feet) to provide energy, as hot and cold water, to the former Trustco Building from Proctor's existing District Heating and Cooling Plant (DHCP). The project is being done in cooperation with Schenectady County, which will use this building as its main County office building. The Proctors? DHCP now provides hot and cold water for its own 180,000 sq. ft. non-profit performance venues, an adjacent hotel, a near-by office building/sports complex,and snowmelt for about an acre of downtown sidewalks. Schenectady County?s project, if funded, would take approximately a year to construct, during which time the piping from Proctors would be completed. Schenectady County will realize savings in firstcost and maintenance by using DHCP, rather than installing their own systems. In addition there are benefits in avoidance of greenhouse gas emissions. The routing which the pipes take will also open the opportunity to serve two vacant development sites,

County	Project	Requested $	State Agency	Additional Detail
Schenectady	Cold Energy Storage System for Load Leveling Proctor's DHCP	$1,000,000	NYSERDA	The project will add cold energy storage to the Proctors District Heating and Cooling Plant (DHCP). The project involves adding a tank of water with coils of piping inside, which carry a glycol solution to freeze the water, or melting the ice when cold energy is needed by the DHCP. To freeze the ice the glycol solution is cooled by electric refrigeration powered primarily from Proctor?s micro turbine cogeneration facility. The three primary benefits to adding cold storage are: 1. The peak energy demandis reduced by moving some load to the off-peak nighttime hours from mid-day maximums, usually called ?peak-shaving? or ?load-shifting.? 2. The utilization of capital is increased in that existing equipment can serve a larger load, thus forestalling the purchase of more capacity as load increases or aging reduces nameplate ratings. This is done by using the ?cold energy? created at night to assist in serving the peak cooling loads during mid-day. 3. Proctors DHCP can provide cooling in the event of chill

Schenectady	Police Technology Equipment	$800,000	OHS	Funds to be used for police technology equipment including security cameras and for a crime tracking data base.
Schenectady	Replace approx 30 fire hydrants	$100,000	OHS	Replace approx 30 fire hydrants
Schenectady	Police Station Improvements	$100,000	OHS	Police Station Improvements

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail

County	Project	Requested $	State Agency	Additional Detail
Schoharie	V. of Schoharie Housing Rehab & Facade Program	$400,000	CDBG	
Schoharie	T. of Conesville Housing Rehabilitation Program	$400,000	CDBG	
Schoharie	Purchase and install water meters	$200,000	CDBG	Purchase and install water meters
Schoharie	Water Metering	$0	CDBG	Water Metering
Schoharie	Village of Sharon Springs - Secondary Water Source Project	$550,000	CDBG	
Schoharie	Village of Sharon Springs - Replace 250,000 Gallon Water Storage Tank	$100,000	CDBG	
Schoharie	Village of Sharon Springs - Upgrades at Water Treatment Plant	$85,000	CDBG	
Schoharie	Renovation and New Building Project	$750,000	DASNY	A Green energy renovation of part of the existing structure and construction of a new apparatus bay to meet OSHA, PESH and NFPA standards.
Schoharie	Cobleskill Regional Hospital Nursing Home	$6,000,000	DASNY	Development of 120 bed unit. Schoharie County is one of only two counties in NYS that does not have a nursing home.
Schoharie	Town Facility	$500,000	DASNY	Construct a facility to house town offices, highway garage, Town Court, Town Judge's Office, Assessor's Office and a meeting room.
Schoharie	New Town Hall	$650,000	DASNY	Currently the town of Carlisle operates out of a 16x16 room built in 1960 that is attached to the highway garage with parking for approx. 5 cars. This office is shared by the Supervisor, Town Clerk/Tax Collector, Highway Superintendent, Code EnforcementOfficer, Dog Control Officer,Assessor, Planning Board, Historical Society, and Town Justice. The Town Board meetings and Historical Society Meetings are held in the Fire House with frequently conflicting schedules. The Town Justice also holds court in the Fire House and transports all of her recordds and equipment on a regular basis to and from the fire house. Court records are stored in her home. We are curently renting space for the Planning Board meetings and the Board of Assessment Review. There isconstant interferance with highway equipment as the Town Clerk/Tax Collector has regular office hours in the highway garage. In March we received bids for the construction of a new town hall, and we are shovel ready. The new facility will be 4400 sq feet
Schoharie	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of two residences in Middleburgh.
Schoharie	School Renovation, Modernization, and Expansion Project	$1,955,000	DASNY	This project will renovate and reconstruct key areas of our K-12 school building in order to improve the safety, energy efficiency, appearance, and usefulness of our facilities. The project will also add 7,200 square feet of instructional space includinga new library/media center and digital technology classroom. Energy effeciency upgrades include new windows and doors, heating systems, and heating system controls. This project will expand computer and broadband access in our community. Our school is atrue community center. We house the only public library, broad band internet access and computing center, and health/recreational facility in our six-township district. We are the district's largest employer, with 61 full-time employees and an annual payroll of $2.3 million. The district has secured state funding for approximately 77% of the project's cost; stimulus fund dollars would reduce the local taxpayers' cost, which would be of great aid during this difficult economy. We will commence work in A

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Schoharie	New I-88 Interchange At Oak Hill	$30,000,000	DOT	New I-88 Interchange At Oak Hill
Schoharie	Signage Installation Along I-88	$25,000	DOT	Signage Installation Along I-88
Schoharie	Podpadic Road Bridge Construction	$500,000	DOT	Podpadic Road Bridge Construction
Schoharie	BRIDGE APPROACH SLAB REPAIR (I88 EAST OF ONEONTA)	$2,225,000	DOT	
Schoharie	County Route 1, 1 Mineral Springs Road, Single Course Paving	$991,000	DOT	
Schoharie	County Route 8 Culvert Replacement	$301,000	DOT	
Schoharie	Pump Station Rehab, Treatment Plant Rehab	$4,716,000	EFC	
Schoharie	Village of Esperance Sewer System	$2,500,000	EFC	The Village of Esperance needs to install a comprehensive sanitary sewer system to serve the Village area. There are serious problems with the existing septic systems in the area because of the very small lots and poorly percolating soil conditions due t
Schoharie	Re Line the sewer line under Main st	$300,000	EFC	Re Line the sewer line under Main st
Schoharie	Sewer Line replacement on Chestnut St.	$200,000	EFC	Sewer Line replacement on Chestnut St.
Schoharie	Water Treatment Plan upgrades	$85,000	EFC	Water Treatment Plan upgrades
Schoharie	Purchase blower attachment for skid steer	$10,000	EFC	Purchase blower attachment for skid steer
Schoharie	Waste Recovery/Gasification	$6,000,000	EFC	Waste Recovery/Gasification
Schoharie	Municipal Sewage Sludge Compost	$0	EFC	Municipal Sewage Sludge Compost
Schoharie	Water Source/Watrline Extension	$1,100,000	EFC	Water Source/Watrline Extension
Schoharie	Wastewater Treatment Facility/Central Bridge Water System	$4,500,000	EFC	Wastewater Treatment Facility/Central Bridge Water System
Schoharie	Wellhead Development	$1,100,000	EFC	Wellhead Development
Schoharie	Water Distribution Analysis/Improvements	$0	EFC	Water Distribution Analysis/Improvements
Schoharie	WWTP Upgrade	$6,000,000	EFC	WWTP Upgrade
Schoharie	Water and Sewer Extension from Cobleskill along NYS Route 7	$8,600,000	EFC	Extension east to Shad Point Industrial Park and west to the Village of Richmondville ($2.4 million and $6.2 million, respectively). To support the expansion of existing businesses and the influx of new businesses.
Schoharie	Reconstruction of Middleburgh Primary Water Main	$1,500,000	EFC	One of the oldest in the County, and serves numerous businesses and residents of the Village. Future expansion to other businesses is not feasible until the existing main is replaced and upgraded.
Schoharie	Extension of Water Service in the Hamlet of Central Bridge	$1,500,000	EFC	The area is located along the Interstate I-88 Corridor and at the intersection of Montgomery, Schenectady and Schoharie Counties. It is also served by rail. The area is ideal for future industrial and commercial development but lacks the water needed toaccommodate this growth.
Schoharie	Water Treatment Plant Upgrade project	$100,000	EFC	This project will upgrade the municipal Water Treatment Plant in an effort to improve water quality and quantity. We would, first, replace the flush waste water tank. Then update the electronics systems for better control and, third, relocate the sodiumpermanganate injection point from the current location of 120 feet to 2,000 feet from the plant (along with treatment building) to help us better treat the water and reduce brown water occurrences.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Schoharie	Water and Sewer Extension to Shad Point Industrial Park	$3,200,000	ESD	To support the development of a 100+ acre industrial park located immediately off the I-88 Interchange No. 22.
Schoharie	Extension of Water Service in the Hamlet of Central Bridge	$1,500,000	ESD	The area is located along the Interstate I-88 Corridor and at the intersection of Montgomery, Schenectady and Schoharie Counties. It is also served by rail. The area is ideal for future industrial and commercial development but lacks the water needed toaccommodate this growth.
Schoharie	Howe Caverns Water Park Highway Access Improvements	$3,000,000	ESD	To support the development of a proposed $75 million water park to be located at Howe Caverns. Includes the building of a new 250 room hotel and a one-acre indoor water park.
Schoharie	Cobleskill Industrial Park Manufacturing Building	$2,000,000	ESD	No current lease space exists. A new 15,000 square foot facility could accommodate growing demand.
Schoharie	New IDA Industrial Park Acquisition	$3,000,000	ESD	There exists a severe lack of industrial sites for manufacturing firms to locate. The IDA plans on acquiring two additional 100+ acre sites.
Schoharie	Sharon Springs Infrastructure Improvements, Schoharie County	$3,000,000	ESD	Sharon Springs Infrastructure Improvements, Schoharie County These improvements are needed to support the development of an international health spa and hotel complex. Total new employment is estimated to be roughly 300 new employees upon final phase ofdevelopment. Project area is located in a New York State Empire Zone. Total private investment for phases I and II is estimated to be $38 million. Estimated construction summer 2009. These improvements are needed to support the development of an international health spa and hotel complex. Total new employment is estimated to be roughly 300 new employees upon final phase of development. Project area is located in a New York State Empire Zone. Total private investment for phases I and II is estimated tobe $38 million. Estimated construction summer 2009.
Schoharie	Downtown Anchor - The Newberry Building	$500,000	MAIN_ST	
Schoharie	Sharon Springs MS Project	$285,000	MAIN_ST	
Schoharie	Colleges and Universities, SUNY COBLESKILL	$1,113,806	NYPA	
Schoharie	Development of Redundant Electric Feed at Shad Point	$3,230,000	NYPA	Various requests from site selection firms have identified a 100+ acre tract of land suitable for development at Shad Point, adjacent to Interstate I-88 Interchange No. 22. These requests include duo-feed electric.
Schoharie	Extension of Natural Gas along Route 30 Corridor	$3,300,000	NYPA	This area between Sloansville and Middleburgh is adjacent to Montgomery, Schenectady and Schoharie County, located along the Interstate I-88 Corridor, and serviced by rail. It is poised for future commercial and industrial development, but lacks naturalgas
Schoharie	SUNY Development of Waste to Bio-Energy Project	$3,000,000	NYSERDA	Phase I and II of this project have already been funded by the U.S. Department of Energy and the U.S. Department of Defense. Phase III of this project involves the development of the deployment system for the U.S. Department of Defense design and build of a 40kw system for the Project. The Project will convert common household waste into gas for residential and commercial applications.
Schoharie	Alternative Energy Revolving Loan Fund	$2,000,000	NYSERDA	For alternative energy companies wishing to develop alternative energy production within New York State.

County	Project	Requested $	State Agency	Additional Detail
Schuyler	Raw Water Intake Facility	$1,100,000	EFC	New intake location/facility
Schuyler	Flood Control Project	$245,000	EFC	install a series of retention ponds in the stream itself, to help slow the water in this area
Schuyler	Village of Cayuga Sewage Treatment Upgrade	$3,100,000	EFC	Village of Cayuga Sewage Treatment Upgrade
Schuyler	NYMS Montour House Anchor & W. Main Street 2009	$465,000	MAIN_ST	
Schuyler	Schuyler Hospital Information Technology Implementation Project	$3,000,000	OFT	Schuyler Hospital is in need of hardware and software systems to implement an electronic health record. In addition, there would be extensive training needed and implementation costs. This request fulfills the Federal Government's requirement that hospitals be a meaningful user of Health IT by 2015.
Schuyler	Training Grounds Fire Station	$2,500,000	OHS	Provide a 4-bay fire station to house 7 pieces of fire apparatus and associated equipment, utilized to train approximately 6000 firefighters annually. Building will include a training room, equipment storage, equipment cleaning/maintenance area, and restrooms. Construction and installation of roadways, fire hydrants and site lighting will also be included in the project. Project supplements an existing training site which includes a live fire training building, fire investigation burn building, hazardous materials training props, technical rescue training props and a flammable gas training facility. Project provides heated vehicle storage, restrooms, classroom space and storage, none of which are currently available at this site, thereby reducing vehicle maintenance and repair costs, providing for rehabilitation of students performing in adverse weather conditions, making better use of time spent at the training site, and ultimately providing a more effective learning experience for these students. Seneca	Seneca Army Depot Rail, Seneca County, Towns of Romulus, Fayette and V	$3,000,000	DOT	Seneca Army Depot Rail, Seneca County, Towns of Romulus, Fayette and Varick: The proposed project would rehabilitate the short line railroad into the Seneca Army Depot. This would include new rail, ballast, ties, switches and sidings. The rail that is inplace is inferior and could not be reliably used. Access roads to the rail sidings and crossing improvements are also needed. By making these improvements the marketability of the Depot for large industrial uses would increase significantly. This is very important so that the utility of this meg-site can be improved. At build out thousands of jobs could be created. The project is engineered and ready to go. Construction jobs would be created as a result of the activity. Rail improvements to the Army Depot are needed in order to increase the usefulness of this mega-site. The project is engineered and ready to go. The project is necessary if the County, Region and State are to take full advantage of the attributes that the Depot has to offer large expgo.
Seneca	Walnut St. and Rumsey St. Drainage Improvement Project	$5,250,000	EFC	Due to drainage concerns in the Walnut/Rumsey Streets Watershed, which include flooding of private property where property damage has occurred, the Village of Seneca Falls is needs to make significant drainage improvements on Walnut Street. Storm sewerswill be extended along Walnut Street from the intersection of Miller Street to Ridge Street. In addition, upgrades will be made on connecting side streets, which include Miller Street, Ridge Street, Laws Lane, Chapel Street (from Walnut to Laws Lane) andthe intersection of Pleasant Street. Included in the project, in addition to drainage, are road upgrades and water line replacement or extension of new lines. Drainage improvements include installing approximately 4300 feet of smooth interior corrugateplastic pipe (SICPP), storm sewer of various sizes from 8? up to 30? with manholes and catch basin structures. The new lines will connect to the existing system at the intersection of Miller and Walnut Streets. These lines will replace undersized lines oin the area and contain runoff within the road area to prevent drainage onto private property. The length of road to be improved is 4200 lineal feet. All roads will have a consistent width of 20 feet with the exception of Laws Lane which will be 12 feety? street. Sidewalk replacement is included in the scope of work as required where walks have deteriorated or cause drainage issues. Water line replacement is included in the proposed work. The new lines are to replace existing lines with an 8? PVC SDR 1
Seneca	Wright Ave & Swift St Storm Sewer Project	$2,000,000	EFC	Installation of 3,000 LF of storm sewer to remediate the flooding in the central portion of the Village.
Seneca	Seneca Army Depot Site Preparation	$18,900,000	ESD	Stage 1 of a multi-stage site improverment plan to convert this former army base into the largest industrial site in NY State (perhaps the largest in the Northeast U.S.
Seneca	Seneca Army Depot Site Development Stage 2	$20,000,000	ESD	Stage 2 (installation of infrastructure) site development work to convert this former army base into the largest industrial site in NY State (if not the Northeast U.S.).

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Seneca	Seneca Army Depot Demolition of Warehouses and other Structures, Sene	$5,000,000	ESD	Seneca Army Depot Demolition of Warehouses and other Structures, Seneca County, Town of Romulus: The proposed activity includes demolition of numerous warehouses and other structures that are blighted and in considerable decay. By doing this there wouldbe a significant increase in sites that are available for new industry and business. When the Army left the Base these buildings were not rehabilitated or upgraded. This activity would greatly increase the marketability of this 10,000 acre mega-site. Byremoving the warehouses and other structures at the Depot, sites will be made available for expanding businesses and industry. Given the size of the Depot (10,000 acres) and its potential for large economic development expansions, it may be one of the most valuable meg-sites in the State. The project is engineered and ready to go. The Seneca County IDA is the owner. The Seneca Army Depot has a tremendous amount of potential as a valuable mega-site not only in this Region, but also for all of NYS. The
Seneca	Seneca Army Depot Demolition of Munitions Bunkers, Seneca County, Tow	$9,500,000	ESD	Seneca Army Depot Demolition of Munitions Bunkers, Seneca County, Town of Romulus: The proposed activity would include the demolition of at least 200 concrete munitions bunkers left by the Army when they closed the base. By doing so this will increase the amount of land that can be used for possible industrial expansions at this large (10,000 acres) site owned by the IDA. By removing the concrete bunkers the Depot will make sites available for new industrial and businesses uses. Given the size of the Depot (10,000 acres) and its potential for large economic development expansions, it may be one of the most valuable meg-sites in the State. The Seneca Army Depot has a tremendous amount of potential as a valuable mega-site not only in this Region, but also for all of NYS. The project is engineered and ready to go. The IDA and local community do not have the funds to implent the project and make it shovel-ready.

March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Hermon Fire Station	$894,410	DASNY	The proposed station will be approximately 8900 sq. ft, with 5 truck bays to house the fleet. We currently have 3 bays that hold 5 vehicles with trucks parked sideways. the facility will also be used as an emergency shelter. Our current facility does notmeet The Americans with Disability Acts standards. We have been working with an engineer and have filed an application with USDA. The project could start in less than 120 days if financing was secured.
St. Lawrence	Town of Brasher New Highway Garage	$1,500,000	DASNY	New highway garage facility to replace existing building. Existing building in need of major repairs, leaking roof, poor insulation, limited work and parking space for plow trucks and other equipment. Low ceilings make working on trucks and equipment difficult. Septic system failing, no space for new system location, poor soils. New building would be located more centrally in Town.
St. Lawrence	Construction of new town hall and justice court.	$3,200,000	DASNY	Construction of new town hall and justice court.
St. Lawrence	Municipal Buildings/Renovations	$75,000	DASNY	Municipal Buildings/Renovations
St. Lawrence	Construction of new courthouse Village & Town offices.	$2,500,000	DASNY	Construction of new courthouse Village & Town offices.
St. Lawrence	Municipal Buildings/Renovations - New highway Garage	$1,200,000	DASNY	Municipal Buildings/Renovations - New highway Garage
St. Lawrence	Municipal Buildings/Renovations	$500,000	DASNY	Municipal Buildings/Renovations
St. Lawrence	Municipal Buildings/Renovations - New Highway Garage	$950,000	DASNY	Municipal Buildings/Renovations - New Highway Garage
St. Lawrence	Equipment storage facility new DPW	$500,000	DASNY	Equipment storage facility new DPW
St. Lawrence	Hospitals/ Clinics - replacement of a fire destroyed clinic	$3,000,000	DASNY	Hospitals/ Clinics - replacement of a fire destroyed clinic
St. Lawrence	Hospitals/ Clinics - Expansion of an existing hospital	$9,300,000	DASNY	Hospitals/ Clinics - Expansion of an existing hospital
St. Lawrence	Student Center	$25,000,000	DASNY	The Student Center Project calls for the design and construction of a 57,500 GSF building to house student social and recreational activities, student organizations, food services venues, and a number of student service offices. Perkins & Will Architects have been retained to perform the design services for the building, which was subsequently approved by the Board of Trustees. The early stages of design have been completed and all stages required before construction is initiated will be finalized in the 1Q, 2009. If funding commitments are in place, construction commences in 2Q, 2009 and project completion will follow 16 months afterwards.
St. Lawrence	Bewkes Hall Renovation	$20,000,000	DASNY	Bewkes is an approximately 50 year old 45,000 square foot science building. Our biology department recently vacated this building to be housed in our new LEED Gold Johnson Hall of Science. We have planned a complete renovation with small expansions, tohouse our Physics, Geology, and some Environmental Disciplines.
St. Lawrence	Campus wide Energy Ronovations	$7,000,000	DASNY	Following a NYSERDA supported campus wide Energy Audit from which we expect to agree on about $7 million in energy efficiency renovations including HVAC equipment replacement, building envelop improvement, lighting changes etc.
St. Lawrence	Griffiths Arts Renovation	$7,500,000	DASNY	Griffiths Arts Center is a 33,000sqft, approximately 50 years in age. Following an extensive planning process, we have everything in place to break ground on an complete renovation of this space and expansion of an additional 19,000sqft. The new building will house a mix of arts faculty and classrooms including a newly expanded and renovated recital hall and classrooms. the full cost of this project is projected at about $15,000, with the first phase of the project, (the portion we are prepared to begin) costing $7.5 million.
St. Lawrence	St. Lawrence County	$476,000	DASNY	Renovation of the former jail dormitory into space for the Board of Elections and voting machine storage and maintenance
St. Lawrence	St. Lawrence County	$720,000	DASNY	Construction of two equipment storage buildings in remote staging locations for the County Highway Department

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	St. Lawrence County	$1,200,000	DASNY	New Highway Garage
St. Lawrence	St. Lawrence County	$500,000	DASNY	Building Addition to Highway Garage
St. Lawrence	St. Lawrence County	$1,650,000	DASNY	New Highway Garage and Salt Storage Shed plus water extension from Village of Massena to Highway Garage
St. Lawrence	St. Lawrence County	$1,520,000	DASNY	Expand Highway Barn to allow for sharing services with the Canton Central School District and Village of Canton and Rensselaer Falls
St. Lawrence	St. Lawrence County	$62,000	DASNY	Replacement of the Town Hall roof with 50-year architectural shingles and a 5-year 100% warranty on all work
St. Lawrence	St. Lawrence County	$500,000	DASNY	Canton Municipal Building
St. Lawrence	CHP Emergecny Room	$22,000,000	DASNY	Renovation and construction of the CHP emergency room. Expand existing emergency dept, reconfigure its main entry and add outpatient space. New critical care unit space will be constructed and medical/surgical capacity will be added.
St. Lawrence	Comprehensive Cancer Center	$6,000,000	DASNY	Construction and development of a comprehensive cancer center. Purchase a linear accelerator to replace outdated one
St. Lawrence	Medical Office Building	$2,000,000	DASNY	Construction of a new medical office building will house both private and hospital employed physicians
St. Lawrence	Canton Village	$500,000	DASNY	ADA Compliance - Canton Municipal Building
St. Lawrence	St. Lawrence University	$0	DASNY	Expansion of child day care center
St. Lawrence	Morristown	$2,500,000	DASNY	Construction of a new Courthouse
St. Lawrence	Brasher	$1,200,000	DASNY	New Highway Garage
St. Lawrence	Colton	$500,000	DASNY	Building Addition to Highway Garage
St. Lawrence	Clifton-Fine Clinic	$3,000,000	DASNY	To construct a new primary care medical clinic with outpatient physical therapy services, a dental clinic and office space. The project is to replace Clifton-Fine Hospital's primary care clinic which was damaged beyond use from a fire on October 11, 2008. Primary care services are now being provided to the community out of two connected double wide trailers. A new clinic is needed to provide efficient and effective primary care services to a rural underserved population. (This project may have already been submitted by the St. Lawrence County Planning Director.)
St. Lawrence	Renovation and modernization project/ER/CCU/MS	$22,000,000	DASNY	Renovation and construction of the CPH emergency room and modernization of the critical care and medical surgical units. This project will dramatically improve the ability of CPH to continue to deliver high quality, cost effective health care to the community it serves. As part of the project, CPH will expand its existing overburdened Emergency Department, reconfigure its main entry and patient registration area and add significant outpatient space. New modernized critical care unit space will be constructed and single occupancy medical/surgical capacity will be added.
St. Lawrence	Construction of Comprehensive Cancer Center	$6,000,000	DASNY	Construction and development of a comprehensive cancer center. This project encompasses the acquisition of a new linear accelerator and will incorporate space for both the hospital medical oncology program and its radiation program.
St. Lawrence	Medical Office Building - Canton	$2,000,000	DASNY	Construction of a new medical office building in space contiguous to the former EJ Noble Hospital in Canton, New York. The proposed new building will be Article 28 compliant and will house both private and hospital employed physicians. Construction of this building will directly address the primary care shortage as it will provide much needed additional primary care practice space and greatly assist CPH as it attempts to recruit physicians.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Canton-Potsdam Hospital	$22,000,000	DASNY	Renovation and construction on the CPH emergency rom and modernization of the critical care and medical surgical units.
St. Lawrence	Canton-Potsdam Hospital	$6,000,000	DASNY	Construction and development of a comprehensive cancer center.
St. Lawrence	Canton-Potsdam Hospital	$2,000,000	DASNY	Construction on a new medical office building
St. Lawrence	Bewkes Hall Renovation, St. Lawrence University	$10,000,000	DASNY	Bewkes Hall Renovation, St. Lawrence University The second is Phase 2 of a major renovation and minor expansion of Bewkes Hall, where biology, chemistry, and several psychology laboratories were housed prior to construction of our LEED gold certified Johnson Hall of Science, opened in 2007.á When the renovation is complete Bewkes will house physics, geology, and shared classrooms, including important new classrooms for mathematics, statistics and computer science. St. Lawrence university is an important educational institution in this region and its graduates provide an excellent workforce.
St. Lawrence	Enviro. Remediation for Comm. Improv. Project	$230,000	DEC	Enviro. Remediation for Comm. Improv. Project
St. Lawrence	St. Lawrence	$1,400,000	DEC	Replace 9,000 linear feet of pipe within the Village
St. Lawrence	St. Lawrence	$1,000,000	DEC	Waterline Replacement on State Route 37B
St. Lawrence	Midtown Apartments (Senior/Handicap Housing)	$1,800,000	DHCR	Midtown Apartments is a 27 year old, 65 unit highrise for senior/handicap citizen's. It has a 20 year section 8 HAP agreement in place for a subsidy. We have been working with an architect for the past 1 1/2years to rebuild this very dated, dark and oldbuilding. This is a section 8, 515 (Used to be under USDA..but paid off debt 19 years early. Want to put new kitchens, flooring, plumbing, closet doors and ceilings in the units. Also all the public areas and halls will have new lighting, ceilings, floors, molding, chair rails, some floor plan changes in community room and front lobby, new furniture in public areas, some kitchen cabinets in public areas, library shelving, sidewalk replacement, parking lot replacement and enlargemet, air flow exchangerson each floor, windows added to dark space by elevators on each floor and for better air flow, canapy at front door with a patio area underneath, new front door etc. We will not be getting stimulus funds under Capital funds for Housing Authority's. We reyou!
St. Lawrence	St. Lawrence County	$300,000	DHCR	Water meter replacement
St. Lawrence	St. Lawrence County	$1,000,000	DHCR	Waterline Replacement on State Route 37B
St. Lawrence	St. Lawrence County	$1,000,000	DHCR	Purchase and Install Water Meters Citywide - project can be let to bid within 60 days of funding
St. Lawrence	Village Family Housing, LP	$485,000	DHCR	We just restructured three years ago and ran out of funding to properly finish our project. Storage sheds and private patio areas only got put on three buildings out of 12. Old walks and driveways were rehabbed but very cheaply and poorly done, landscapeand reseeding funds went out the window. We have a beautiful playground with no sidewalk leading to it...DHCR requires it but no funding has been offered. When we rebuilt our facility as DHCR sugeested using mixed funding and tax credits we did not realize the population living here now is the working poor...but many have two cars because of mom and dad both working. We do not have enough parking spaces. We would like to have the funds and 15 more project based section 8 to complete what we set out todo.
St. Lawrence	Village Family Housing, LP	$15,000	DHCR	The Potsdam Housing Authority does not operate like federal public housing. We are under DHCR, and we restructured using tax credits three years ago however, we were not given enough project based section 8 and we need 15 more units. Because of the economy people really need subsidys and we only have 50 units out of 100 project- based. Our vacancy rate last year was up to 8% because of it. Your consideration would be greatful.

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Newton Falls Rail	$9,750,000	DOT	Refurbish and upgrade to the Newton Falls Rail Line to Class III track. Replacement of deteriorated ties & track sections, rebuild areas of washout, removal of brush, trees & beaver dams, inspection of rail & structural improvements, surfacing and add automatic rail crossing warning devices. This 46.25 mile branch of the Mohawk Adirondack & Northern Railroad connects industrial sites in Jefferson, Lewis and St. Lawrence Counties to CSX?s system at Carthage. The goal of this rehabilitation is to bring the non operating rail line to Class 3 status. The Class 3 rating is critical to allow use of Unit Trains that would be required for operations at Benson Mines. Accomplishing this will allow the continued success and growth of Newton Falls Fine Paper. Among other benefits are creating the ability to ship aggregate from the Benson Mines site, allowing greater access and marketability to the former J&L site, the means of expansion for Harrisville Dry Kiln and continued north country presents of Slack Chemic
St. Lawrence	Massena Industrial Park Rail Spur	$347,000	DOT	Massena Industrial Park Rail Spur Project can be let to bid within 60 days of funding

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Airport Systems, Massena - Massena Airport - runway & terminal expansior	$5,000,000	DOT	Airport Systems, Massena - Massena Airport - runway & terminal expansion, field lighting & signage Improvements to this airport are crucial. This airport provides limited but important air service to the business community. Assisting in improving air service is an important part of economic development.
St. Lawrence	A series of bridges that need renovation or new construction throughout the	$10,780,000	DOT	A series of bridges that need renovation or new construction throughout the county Many of the County's bridges are in major need of renovation or demolision. These are the most critical for the County. There is no major interstate in the County and having any of these bridges collapse or get shut done will negatively impact transportation issues for businesses in the County
St. Lawrence	Ogdensburg Lake Street Bridge Replacement Project	$1,600,000	DOT	Ogdensburg Lake Street Bridge Replacement Project This bridge connects the west side of the city, which houses the hospital, to downtown and the east side.In 10/07 a study done by the NYSDOT found the bridge to be in an advanced stage of deterioration and in extreme peril of collapse. The brigde is currently closed. If the bridge collapses not only would water and sewer services be terminated to the west side of the city and hospital, but raw sewage would spill into the Oswegatchie River. This is a community infrastructure issue which effects many businesses and a community.
St. Lawrence	Newton Falls Rail	$10,582,700	DOT	Newton Falls Rail This project will restore an existing rail line which has been unused for many years due to the shutting down of numerous paper mills and mining operations in the region. Due to Newton Falls Paper Mill starting up again as well as somemining operations in the area, the need for rail has become crucial. ESD has supported the reopening of the Newton Falls Paper Mill and having this rail line operational helps to substantially reduce transportation costs and helps with the long term viability of this paper mill located in the Adirondak Park.
St. Lawrence	SPRING STREET BRIDGE REHAB	$430,000	DOT	To rehab the base of the bridge.There are areas Identified by the most recent N.Y.D.O.T. inspection that need to be repaired.The city did the first phase of this project sealing the top deck to reduce the water infiltrating the base of the bridge. With the freeze,thaw action That has taken place over the years,it has caused concern that the concrete is deteriorating.We need to do the second phase as soon as possible or the first phase(that was all the city could fund) will be for not.We can have this project bid in 30 days or less as we have spec's and drawings complete.
St. Lawrence		$35,000,000	DOT	Project can be let to bid within 60 days of funding
St. Lawrence		$0	DOT

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Canton Park Infrastructure	$575,000	ESD	This project is for utility and road installation for the Canton Industrial Park, which is owned by the Agency. Completing installation of services and a road will better allow the Agency to market and build to entice employment in this rural Northern New York community. These sites have the potential of housing eight manufacturing facilities and employ a minimum of 60 local residents.
St. Lawrence	Smart Wind Turbine Technology Development and Commercialization	$1,500,000	ESD	Vento Tek, Inc. is a small technology-based, spin-off company of Clarkson University that specializes in the research, development and commercialization of innovative designs for renewable energy applications. Vento Tek, Inc. intends to bring to market arevolutionary Smart Wind Turbine Blade which incorporates active control capabilities for more efficient power generation. This is accomplished by using flow control actuators as well as twisted-coupled blades, constructed from composite materials. Theturbine blades can be lighter, more stable and more efficient than the existing ones; it can operate across a broader wind speed range, spinning with less vibration and friction to produce the intended maximum power. This technology has the potential forimprovements in cost, reliability, and performance of medium to large horizontal-axis wind turbines. The technology has the potential to change the economics of wind power. Vento Tek is seeking $1,500,000 under The American Recovery and Reinvestment Actmmercialize technologies developed cooperatively at New York?s Universities and small companies in Central and Upstate NY.

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Fire Station Addition	$125,000	OHS	Dekalb /Richville Fire District, EIN#16-1572625 Richville Fire Department P.O. Box 51 71 Main Street Richville, NY 13681 Project Title: Richville Fire Department Station Renovation Project Location of Project: Village of Richville County: St. Lawrence Served by NY State Legislator: Darrel J. Aubertine New York State Senator ? 48th District 317 Washington Street 4th Floor Watertown, NY 13601 Additional Project Details: The Richville Fire Department is a volunteer emergency services agency serving the Village of Richville and the Town of Dekalb. The fire department in Richville is part of the Dekalb/ Richville Fire District. We provide fire protection and advanced life support emergency medical services to our community and surrounding communities as part of our county mutual aid plan. The current main building in Richville, which was built in 1971, has a total of 2,400 square feet of space. The main building houses four emergency vehicles and is in desperate need of additional space and renovations. Thooms routinely used by the public during community events held at the fire station. The lack of space and condition of the building are the most significant problems currently faced by the department. The building does not meet all current building regulon only has 10 foot doors which make it very difficult to find fire apparatus that will fit in the doors. Due to financial reasons, a new fire station is not feasible at this time. We propose an interim solution of expanding the current building by 2000
St. Lawrence	Replace fire hall	$750,000	OHS	After leveling the old building a new structure with 5 bays will be constructed. This structure will bring the department into compliance with federal and state laws. The current fire house in 52 years old and his in very bad shape. This new structure will contain decontamination showers for fire personnel as well as laundry facilities for personnel gear, office space, expamded facilites for newer modern trucks, meeting, training and exercise facilities. This building is located in the center of town and is utilized by the towns people for social funtions.
St. Lawrence	St. Lawrence County	$200,000	OHS	Erection of a pole barn behind the County Jail to house the mobile emergency command unit shared by local public safety agencies
St. Lawrence	St. Lawrence County	$982,000	OHS	Construction of a new fire hall
St. Lawrence	New Fire and EMS Facility	$400,000	OHS	The new fire and ems building would replace the seperate buildings that presenly house each organization seperatly. With each building 60-80 years old niether are in compliance with American's with Disabilities Act and do not meet the generally acceptedstandards for energy use and for operational efficiency.Our district cover a 47 square mile township which has a very depressed local economy and by operating out of seperate facilities the district is beyond its finacial capabilities. The new 120x80 building would allow both organizations to serve the community better with combined serves and shared costs of fixed expenses.
St. Lawrence	Potsdam Fire New Building	$4,000,000	OHS	Construction of new Fire Station
St. Lawrence	Recovery Help	$60,000	OHS	We are a part-time police department with very limited budget of $57,030 per year. We are currently trying to hire 2 more officers and outfit at 14.95 hr per member for 365 days. We are in need of uniforms, bullet-proof vest, assault weapons for stand-offs/hostage situations. We have 2 patrol cars that need replacing at $28,000.00 ea. radio communications are needed at $400.00 ea. radio, computers and software from DCJS. Evidence retention is needed along with much more.

Second Draft List - Project Proposals

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Safe Start	$365,000	OHS	Our police department is located in the basement of our town hall. There has been talk about combining the court that is upstairs and the police force into one new complex. Our office is not handi-capped accessable and very small where were running out of room. We have no place for lockers, evidence, etc. Are police office is not secured from town workers that at times needs to come through our office to get to the main components that are in the cellar like water and heating. Records are not secured.
St. Lawrence	Parishville Fire Station	$1,750,000	OHS	We currently have an engineered set of blue prints for a new fire station that are tailored to our needs and current equipment. The building is 144' 10"" x 66' 8"" and will be used to store fire trucks, ambulances , wildland firefightig vehicles and equipment as well as provide vehilce and personell decontamination facilities. Included is office space for the fire department, rescue squad and underwater recovery team line officers as well as the fire district commissioner's office. Many metings with town officials and fire department officers were held to crreate this site plan and construction project. This project could be started very soon after funding is provi
St. Lawrence	Fire Station, Hopkinton-Ft. Jackson	$650,000	OHS	We propose to use economic recovery funds to build a new station for the Hopkinton-Ft. Jackson Volunteer Fire Department. Our current location is a converted 1800?s school house that we purchased in 1953. The truck bays that were added over the years areno longer large enough to house our trucks and other equipment. After over 50 years at our present location, we propose to build a new fire station, large enough to address our needs. A new building will have other benefits also, such as a shower and laundry facility, so when we return from fires covered in asbestos, lead, and other contaminants we can keep them out of our homes. We attempted this project in 2008, so we have already developed a building layout, selected a site, and obtained budget estimates. The project had to be shelved, however, because the town could not cover the expense. Since then the nearby Massena GM plant has closed, and there have been other layoffs in the area. A new fire station would serve a long-term need in our communit
St. Lawrence	North Gordon St.	$2,500,000	OMH	Bonds + LIHTC 4%
St. Lawrence	Clark House Project	$1,700,000	OPRHP	Restore and reconstruct an 1883 hotel into four senior apartments, a 9 Victorian bed and breakfast hotel, conference center, restaurant, and living museum. The facility will have catering services not only for conferences, but weddings and events. This structure is the main anchor building on Main Street and will contribute to the continueing development of businesses on Main Street. It will create many construction jobs for 1 year and ten newly created permanent jobs to run the hotel. The hotel is located approximately 800 feet from the shoreline of the St. Lawrence River. This project fits into the community development plan for Waddington and has full support of the municipal government. The monies will construct the reconstruction of the rear of the hotel making the facility fully handicapped accessible and renovate the 1883 section of the building. The architect and engineers will complete final plans in the next 30 days. Michael Skerebutenas was sent a complete package of materials covering this
St. Lawrence	Siding for library museum buildings	$75,000	OPRHP	Siding for library museum buildings
St. Lawrence	repairs to the stairs and plaster in the Theater.	$75,000	OPRHP	repairs to the stairs and plaster in the Theater.
St. Lawrence	Additional Projects - Expansion of Trail system	$1,200,000	OPRHP	Additional Projects - Expansion of Trail system

March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Rehabilitation of Historic Crossover Island Lighthouse	$3,000,000	OPRHP	Exterior Rehabilitation and Handicapped Accessibility Improvements for the National Register listed Crossover Island lighthouse complex on the St. Lawrence River by American Light and Tower, a not-for-profit formed to undertake and maintain the project.Goal: to make the historic lighthouse complex accessible to the public, especially the disabled, to learn its important place in Thousand Island, state, national maritime transportation history. Project is rehabilitation of the historic lighthouse, keeper?s house, dock and outbuildings, placement of interpretive panels explaining the significance and history along the seaway trail view area on land overlooking the island. Adding solar power will make the island energy independent and an example of ?green? historic preservation. The Crossover Island Rehabilitation Project will contribute to the economic vitality of the Thousand Islands - creating a new heritage tourism destination and educational opportunity.
St. Lawrence	St. Lawrence County	$500,000	OPRHP	Replacement of the Recreational Facility Roof
St. Lawrence	St. Lawrence County	$2,300,000	OPRHP	Greenbelt Park redevelopment of trails, sidewalks, streets, curbing, parking areas, stormwater management systems adjacent to downtown park
St. Lawrence	St. Lawrence County	$2,500,000	OPRHP	Community Center Rehabilitation - replace a rental facility which is used year round as a recreational center for groups and community events and is the central voting center for the Village
St. Lawrence	Canton Village	$1,200,000	OPRHP	Expansion of Trail System

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
St. Lawrence	Clarkston University, Potsdam: Nanoengineering & Biotechnology Laborato	$10,500,000	Thruway	Clarkston University, Potsdam: Nanoengineering & Biotechnology Laboratories (NABLAB) - Clarkson University (Potsdam, NY) seeks to expand its internationally recognized Center for Advanced Materials Processing (CAMP) into the rapidly emerging areas of nanoengineering and biotechnology to advance innovation and job creation with ClarksonÆs strategic partners such as Corning Incorporated and new start-ups incubated in Clarkson laboratories. Clarkson has a shovel-ready project to construct a 25,000 gsf nanoengineering and biotechnology research building (the NABLAB project on the Clarkson campus). The highly promising combination of three modern scientific areas: biology, electronics, and nanotechnology have American industry gearing up for intense globalcompetition in new markets. Clarkson is a key economic development partner with ESD and will provide many new business opportunities from its graduates doing this type of research.
Statewide	T. of Bolivar Housing Rehabilitation Program	$400,000	CDBG	
Statewide	T. of Ward Housing Repair Program	$400,000	CDBG	
Statewide	T. of Wirt Preservation of Rural Homes	$400,000	CDBG	
Statewide	T. of Alma Housing Rehabilitation Program	$400,000	CDBG	
Statewide	Town Hall Renovation	$150,000	CDBG	Our present town hall does not meet building code or ADA requirements. There is no running water or plumbing of any kind. There is no insulation or adequate electric or phone service This project will bring the building up to code so we can once again us
Statewide	Water Plant Project	$33,000	CDBG	Backup Generator for Water Treatment Plant
Statewide	Route 275 Backup Generator	$33,000	CDBG	Route 275 Backup Generator - Ready for bid
Statewide	Water Hydrant Replacement	$58,000	CDBG	Water Hydrant Replacement - ready for bid
Statewide	The Lodge Bed And Breakfast	$200,000	CDBG	We currently own a Bed and Breakfast that we opened April 2008 in Caneadea, NY. This town is in Allegany County near Letchworth State Park. We are also 3 miles from Houghton College. Since opening last year we have seen a need for lodging in this area. We would like to provide 3 more guest rooms to the 3 we already have. This is a poor county so we have and will continue to use local contractors. Houghton College and Letchworth State Park are huge draws for Allegany County,so it would be nice to accomodate the guests from all over the country. We are also on the NYS Greenway.
Statewide	Town Hall	$450,000	DASNY	The present Town Hall houses the police , ambulance, court, assessors and bookkeeping. It lacks space for all town functions, the roof leaks, has very little insulation and does not meet codes. A new Town Hall in a necessity, not a luxury
Statewide	Town Highway Garage	$1,200,000	DASNY	Our current shop is a half pipe shaped building, intended for storage. This building is very inefficient, we have to move every piece of equipment out to get the next one, impossible to heat, and hard to work in. Our town is at a huge disadvantage because of seven thousand acres of untaxable state land. We are looking for funding for this project, because there is no way in a hundred years the town could afford to build this themselves. We want to erect a building that is up to code and will hold all ofour fleet with a little room left to do repair work. Please give this top priority.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Statewide	Mount Monroe Road Resurface, Reconstruction	$750,000	DASNY	The buisiest road in our town, hundreds of cars per day, built for about fifty. This road should be a county road, but they won't have it. It is a short cut between schools in a merged district. When the schools merged they didn't take into effect the poor town in the middle of two rich ones. We can't afford to rebuild this road. It is also a shortcut between SR305 and SR243. This is a serious public safety concern, the first responders sometimes have to go several miles around do to the rough surface.Please give this a high priority. Recostruction of 6.42 miles. thankyou
Statewide	Office for Aging Veterans Facility	$500,000	DASNY	Office for Aging Veterans Facility
Statewide	Courthouse Parking Area	$250,000	DASNY	Courthouse Parking Area

Statewide	Construct Salt Storage	$150,000	DASNY	Construct Salt Storage
Statewide	Upgrade Town Hall	$175,000	DASNY	Upgrade Town Hall
Statewide	Town/Village Court Facility	$4,250,000	DASNY	Town/Village Court Facility
Statewide	Allegany County Courthouse	$13,780,000	DASNY	45,000 square foot addition to the rear of the exisiting courthouse in Blemont
Statewide	Salt Storage Facility for Village and Town	$227,500	DASNY	Salt Storage Facility for Village and Town
Statewide	Route 417 Building Project	$8,000,000	DASNY	Construct a 38,000 square foot facility that will provide the comfort of an open, welcoming atmosphere ? a home away from home where life supporting activities and friendships are created every day. The new facility will utilize the newest technology andthe latest trends in disability healthcare to enhance individuals? visits and delivery of care. It will replace the Edna & Edward Antoon Community Services Center (36 Madison Street, Wellsville) and allow Arc services to meet enrollment demands, improveaccessibility, and support individuals? personal successes. Utilizing sustainable design elements in the areas of water & energy efficiency, materials usage, and environmental quality, this building is expected to qualify for a Leadership in Energy andEnvironmental Design (LEED) Rating. The need for a new facility is attested by the record growth of both service levels and benefited populations, the problematic inadequacy of current space, the need for more cost-efficient operations and the widening r
Statewide	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings and equipment. This proposal is for the retrofitting and replacements of their bus fleet in order to cut down on emissions. Their fleet consists of 3,200 vehicles and 600 large passenger buses.
Statewide	Soil Erosion Project	$1,110,000	DEC	Erosion Mitigation Along VanCampen Creek- 3 Main Areas in Need
Statewide	New Highway Shop	$100,000	DEC	New Highway Shop

Statewide	Retrofit M-7 cars with software & hardware	$17,000,000	DOT	Retrofit M-7 cars with software & hardware From NSTCC ECOREP TIP action list
Statewide	Haskins Road Bridge	$500,000	DOT	This bridge is currently closed, causing people from four towns to leave a paved road and run on an unfit dirt detour of about five miles. The bridge being closed also threatens public safety, prolonging the response of first responders. This structure is almost fifty years old spaning fourty feet across crawford creek. If awarded funding I am sure we could have a contrator on site working within six weeks, if no funding this bridge, and road will remain closed. We have the most disadvantaged town in the county, with 7000 acres of untaxable state land, fifty miles of road, and only two full time employees. Please give this project top priority.
Statewide	Salt/Sand storage Building	$80,000	DOT	Todays date 02/27/09 Funding to Build a State of the Art Salt/Sand storage facility to house 1,900/Tons. Building size is 55' wide x75'long, Gavinized Bar Truss Rafters with a 20/Year fabric Roofing warranty. With this building it will prevent contamination run off to the ground water.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Statewide	High Speed Rail along Empire Corridor.	$2,000,000,000	DOT	The High Speed Rail initiative for the Empire Corridor is designed to improve rail infrastructure to increase rail speeds from 60 û 80 mph to 90 û 110 mph and lay the future framework for very high speed rail. In order to achieve high speed rail operation (90 û 110 mph) the following upgrades, preliminarily estimated to cost $2 û 3 Billion, must take place: (1) Addition of a third track dedicated to high speed passenger rail service following the current lines from Albany to Buffalo (2) Alleviation of present bottleneck between Schenectady and Albany (3) Installation of new interlocking and automated switches (4) Reduction in number of grade crossings (5) Introduction of new train sets with enhanced technology (6) Installation of additional track sidings. In 2005, it was estimated that the economic output resulting from a fully-functional higher speed rail system along the Empire Corridor would be nearly $4 billion over 20 years. Despite the current level of service and aging equipment, the Empire Coproven fuel efficiency, increased use of rail for passenger and freight tranportation will provide a greener, more cost efficient and sustainable transportation and shipping alternative. Construction alone on this project will create an estimated 12,000
Statewide	Improvments to Highway Buildings/and Pole structure	$125,000	DOT	Insulate,Heating,Electric, Plumbing,and closing in of current open Highway Building. 3-Garage doors,concrete flooring. and a lunch room for employee's. and a pole structure to park equipment inside. County	Project	Requested $	State Agency	Additional Detail
Statewide	Hybrid Pickup	$48,000	NYSERDA	Our current trucks consist of a 2000 F350 desil that smokes like an old train, and a F250 that gets 10 or less miles to the gallon. We do alot of boom mowing, parts chasing, ditching, and patching with an abundant amount of idle time. A hybrid pickup would save us thousands per year in fuel costs, and tons of emissions in the air. If we recieve approval for this funding we would order immediately, keeping the US auto industry moving. We are quite possibly the most disadvantaged town in the entire statewith 7000 plus acres of untaxable state lands. If this land was taxed it would mean over a $100,000.00 per year to our budget. Therefore I feel we should get special attention in this matter. Thankyou.
Statewide	New York State Library Association will provide broadband access and upg	$1,014,500	OFT	
Statewide	Broadband/Fiber Optic	$4,000,000	OFT	Broadband/Fiber Optic - Southern Tier West

Statewide	Belfast CSD, New Bus Garage	$194,190	SED	
Statewide	The Fountain Arts Center	$400,000	SED	The Fountain Arts Center, Inc. has been involved in a rehabilitation of a historic property, the former Belmont Hotel, into a mixed use space--residential on the upper floors, and commercial on the street level. Housing is being funded by a package of lo
Statewide	Head Start and Early Head Start	$20,000	SED	With the country being in an economic recession many parents, whether being single or married, are finding it very hard to provide an educational start for pre-school children. President Obama has released $2.1 billion for early childhood and health programs of which N.Y. State will receive $130,000. We believe that for a child to be successful in life he/she needs to receive an educational start in the early years. With this funding many underprivileged children will be able to receive the proper education needed for a successful start in life. To receive this education the proper tools and equipment will be needed in which this funding will appropriate. With this funding jobs will be created for Head Start teachers, aids, and parents will be able togo to work while the children are in school. This will allow the economy to get a ?kick-start? and children will receive a jump start to their educational success.
Statewide	Alfred College of Ceramics, Residence Hall Renovations	$10,000,000	SUNY

County	Project	Requested $	State Agency	Additional Detail
Steuben	Coopers Plains	$7,300,000	EFC	Coopers Plains/Long Acres Sewer Main Extension
Steuben	City of Hornell, The Water Treatment System Improvements Project	$5,800,000	EFC	City of Hornell, The Water Treatment System Improvements Project will include modification to the existing aeration system, secondary clarification addition, chemical feed systems, along with improvements to the plant facilities that have reached the endof their useful life. Hornell collects and treats wastewater that is returned to the Canisteo River, a class C receiving streatm. The river is also a drinking water source for municipalities downstream of the treatment facility. These improvements arerecommended by a report prepared for the Susquehanna River Basin Commission. Important Infrastructure projects for City.
Steuben	The Greater Binghamton Airport Corridor infrastructure improvement projec	$8,000,000	EFC	The Greater Binghamton Airport Corridor infrastructure improvement project. In 2009 we will begin construction of a sewer line that will extend from our landfill, travel past our airport, and incorporate a large swath of commercial and residential properties. Municipal sewer services to our Greater Binghamton Airport, whose current system is near the end of its lifespan. Provide municipal sewer services to commercial enterprises up and down the Airport Road Corridor, specifically Westcode, which is experiencing tremendous growth and needs the municipal services in order to stay in its current location. If we do not supply these services we might risk losing this company and its 200 employees. We would be providing municipal services to residents alongthe corridor Potential 200 acre industrial park-we would be setting the stage for future economic development. Currently the Greater Binghamton region has very few(and not very large) shovel ready locations for prospective development.
Steuben	City of Hornell, The Water Treatment Plant Improvement Project	$520,000	EFC	City of Hornell, The Water Treatment Plant Improvement Project will make structural repairs and repaint the 2.5 million gallon storage tank that holds the City's finished drinking water. It will also replace the existing control system. The existing control system for the purification facility is in excess of 30 years old. The technology is outdated and has reached the end of it's useful life and must be upgraded to insure dependable facility automation. Important Infrastructure projects for City.
Steuben	City of Hornell, The Reservoir System Repairs Project	$410,000	EFC	City of Hornell, The Reservoir System Repairs Project consists of repair to inoperable valving which inhibits and prevents the transfer of water between reservoirs and raw water to the treatment facility. Due to its age, the reconditioning of these valves is limited and replacement is necessary. Important Infrastructure projects for City.
Steuben	City of Hornell, The Water Distribution System Improvement Project	$900,000	EFC	City of Hornell, The Water Distribution System Improvement Project will replace approximately 2.9 miles of undersized water distribution main lines throughout the City of Hornell. The NYS DOH has proposed that this project be completed in order to restore adequate fire flows to critical points throughout the City including a Hospital and in areas that supply two local industries. Important Infrastructure projects for City.

County	Project	Requested $	State Agency	Additional Detail
Steuben	Farm Efficiency Program	$150,000	NYSERDA	Cost share on the purchase and installation of energy efficient lighting, milking equipment, plate coolers, tunnel ventilation systems, electric service upgrades and back up generator systems for dairy farms. The Cooperative currently cost shares $3,000per member
Steuben	Residential Enery Efficiency Program	$300,000	NYSERDA	Consumers will receive CFL/LED, energy star appliance rebates, programmable thermostats, energy audits and water heater rebates with the installation of load control.
Steuben	SmartGrid/AMI Program	$100,000	NYSERDA	Advance the current load control program on water heaters and electric thermal storage heating. Add an outage assessment program and Capacitor program.
Steuben	Line Loss Program	$200,000	NYSERDA	Institute a Line Loss Program. The program will investigate and mitigate line loss starting at the substations and continuing throughout our 1,400+ miles of distribution lines. It will include balancing of our system, demand service review and replacement were needed.
Steuben	Howard Wind Farm	$45,000,000	NYSERDA	The Howard Wind Farm has been fully approved by New York State DEP. It is a 62.5 megawatt windfarm in Steuben County, New York and is ready to begin construction. We are seeking a loan to allow us to begin civil construction in April 2009 as well as preliminary engineering. The project could be fully operational by December 2009.
Steuben	Rural broadband high speed internet: startup program with broadband ove	$0	OFT	Rural broadband high speed internet: startup program with broadband over power lines
Steuben	Rural broadband high speed internet: exploratory program fiber optic	$250,000	OFT	Rural broadband high speed internet: exploratory program fiber optic
Steuben	Broadband Over Power Lines	$750,000	OFT	Start up of a BPL program offering broadband to our residential and business customers and to set up communication to our Landfill Gas Project.
Steuben	Rural Broadband Expansion Project	$250,000	OFT	This project will provide new high-speed Internet to at least 500 rural residents within the first year and 1,000 within 2 years. It will provide employment for at least 5 people in this area.
Steuben	Village of Canisteo emergency generator and fire dept equipment	$0	OHS	Purchase an emergency generator to power 2 water wells in event of an outage, and purchase extraction tool used by fire dept to save lives.
Steuben	New Fire Station Project	$900,000	OHS	This is a two (2) phased project: 1- Renovation of Existing Recreation Hall & 2- New Truck Bay Construction. Renovation of Existing Recreation Hall: Removal of existing septic system, leach fields and buried concrete truck (exact locations and depths areunkown. Removal of existing roof structure and installation of new structure. Removal and replacement of kitchen. Installation of new masonry veneer walls and EIFS finishes on exterior. Installation of new bathrooms. New VCT and ceramic tile flooring where indicated. Painting and taping drywall walls and ceilings. Windows, doors and hardware per plans. Mechanical systems utilizing existing heating system. Sprinkler system. Paving parking area. New septic system for bathrooms. New Truck Bay Construction: Removal of existing garage. Excavation and backfill for foundations and slab on grade. Installation of new foundations and 6 inch concrete slab on grade. Installation of pre-engineered structural steel building. Installation fo steel stud and drywall pite excavation and backfill necessary. Paving. Installation of overhead doors. Installation of exterior doors and windows. Installation of storage deck area. Plumbing and heating installations. Sprinkler system (excluding water supply). Electrical instalstem. All phases of preconstruction have been completed including: environmental studies 1 & 2 and test bores for ground stability. All architectural, structural, mechanical and electrical drawings have also been completed. This project is ""shovel ready

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Huntington YMCA Childcare and Wellness Expansion Project	$1,000,000	DASNY	The Huntington YMCA opened its doors to the community in 1953. Our original building is overcrowded and ""tired"" We have outgrown our space. The 17,000 sq ft expansion will alleviate large waiiting lists and overcrowding at the Y. We currently serve more than 14,000 members. The main floor will house the childcare center adding 5 new and 8 renovated classrooms which will allow for an additional 120 full day preschoolers, 150 summer campers, after school programs, day care, UPK and more. The lower levelwill house a 7000sq ft fitness center, a large improvement over the 2900 sq ft existing room. this will allow for more senior programs, teen programs and youth obesity classes and focus on wellness and health. our traffic and parking will be greatly improved specifically for handicapped.We have currently raised $3.6 million of this $6.2 million project. we continue to reach out to secure more funds. it is our plan to raise 75% and put a shovel in the ground in 9-09 while we continue to fundraise. Thisthe opportunity to seek employment as a result of the YMCA providing safe affordable childcare,preschool and summer camp.The YMCA serves a critical need in the Huntington Community by providing membership and program scholarships to individuals and familherwise afford to particpate in Y programs and services. Due to rising unemployment the requests for financial assistance continue to grow. In 2008 the Huntington Y awarded $268,000 in scholarships to 2600 members. The Huntington Y is a unique community
Suffolk	Renovation of Village Hall	$300,000	DASNY	Saltaire Village Hall was originally constructed in 1938, only months before the devastating hurricane hit Saltaire that year. The Village Hall was built well and survived that storm, but unfortunately what the storm could not do in 1938 has been done gradually over time by the harsh environment of Fire Island. The Village has spent considerable money reconstructing the foundation and roof system of the building, but the rest of the project has been stalled due to lack of funding. The major building components need to be replaced and updated and the entire building needs to be renovated.
Suffolk	New Campus Location	$200,000	DASNY	To open a new facility for The Metropolitan Institute of Interior Design to further educate invidiuals in the areas of design and drafting.
Suffolk	improvements to Youth Center and Americam Legion Hall	$0	DASNY	improvements to Youth Center and Americam Legion Hall
Suffolk	Dillon Child Study Center	$1,000,000	DASNY	The College has planned a renovation and modernization of the Dillon Child Study Center on the Brooklyn campus.

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Patchogue Athletic Complex	$13,800,000	DASNY	On January 11, 2008, St. Joseph?s College purchased a 24.8-acre property for the purpose of a new Athletic Complex to serve the College?s growing athletic program. The property is located on the south side of Sunrise Highway South Service Road, east of Swan River and west of Hewlett Avenue in the hamlet of East Patchogue, Town of Brookhaven. The site is vacant, generally consists of native pine/oak cover and has many dirt trails meandering throughout. The College has identified a preliminary program ofdesired improvements to include: Facilities building including restrooms, concession area, office(s), storage and training room and locker room space; 400-meter all weather running track and related field events with a synthetic turf multi-purpose field and 1,000 seat capacity bleachers and press box, scoreboard, etc. The multi-purpose field would be configured in coordination with the track design to accommodate NCAA soccer, lacrosse, and field hockey; Baseball field with dugouts, practice pitchingimprovements and a comprehensive landscape plan. It is understood that a synthetic turf surface will be considered for all sports fields. Additionally, sports field lighting will be planned for all fields. The construction of the Athletic Complex will oses from July 2008 through 2011.
Suffolk	BLM HVAC Project	$5,000,000	DASNY	This project will replace the HVAC and piping system in Broadlawn Manor (BLM). Due to the age of the plant and building infrastructure, BLM had to first completely replace its Cogeneration Power Plant (which provides power back to the grid) and now mustreplace the HVAC and piping systems to maintain compliance with New York State Mechanical Code. The piping system needs to be replaced due to the age and corrosion of the piping walls. The first phase of this project was completed in 2007 with the deployment of a new 1250 KW cogeneration plant. LIH contributed over $4.7M toward Phase 1 of the project. BLM is over 35 years old and a total renovation of the piping system is required to properly provide both heating and cooling for the building. BLM must totally renovate the piping and HVAC systems to complete the project for compliance with NYS guidelines and long-term sustainability of the facility. Resulting energy efficiency will reduce our facility?s use of power, thus, making more power available to
Suffolk	Renovation of Jennings Hall for Patient Care	$1,500,000	DASNY	The NYS Office of Mental Health and Brunswick Psychiatric Hospital (BPH) have approached South Oaks Hospital to assist them with the closing of BPH. South Oaks Hospital(SOH) currently operates at capacity in Valentine Hall, a building licensed by the State of New York with both psychiatric beds and chemical dependency beds. After review of campus site plan with all clinical service directors and support staff, it has been determined that the best use of space to accommodate the addition of BPH patientswould be to relocate SOH?s current chemical dependency services (both inpatient and outpatient) from Valentine Hall to Jennings Hall (currently vacant). Valentine Hall would then be utilized for all inpatient psychiatric services. In order to accommodatethe relocation of services, Jennings Hall will need to be renovated to meet the New York State standards for the provision of chemical dependency services.
Suffolk	Renovation of Wilsey Hall for Patient Care	$1,500,000	DASNY	This project addresses the need to renovate a building that is nearly 75 years old. It is in need of significant upgrades and improvements to be a viable building for the future of our patient care needs. Having recently been approved by New York State to expand a program serving youth that is currently operating in this building, the need to improve the usefulness and design of the space has become a necessary objective. The project would cost approximately 1.5 million dollars which would include the installation of an elevator, making the entire lower level of the building accessible space for the program expansion.

Suffolk	Learning Resource Center	$16,400,000	DASNY	This building will include traditional library functions, technologically advanced computer spaces and consolidated faculty and student independent learning spaces. This LEED certified building will complete the existing loosely defined campus quadrangle. Design is 70% complete.
Suffolk	Fire Sprinkler/Water System Infrastructure	$12,500,000	DASNY	Presently, the older buildings on the Ammerman campus are not sprinklered. In order to correct this deficiency, this project would first provide additional water pressure and capacity for both existing and future fire fighting systems. This will then allow additional buildings to be sprinklered under this project.
Suffolk	Building Renovations	$750,000	DASNY	The building and property owned by the organization was donated to MHA for its use decades ago. It is located on a corner lot of a high traffic roadway, and its value, once renovated will far exede the requested amount. The organization serves all of Suffolk County for mental health concerns, and the annual budget does not allow for the necessary renovations to make the building fully functional. Several areas of prime space are unfinished and programs for the comunity cannot be expanded as a result. Units of service to the community are projected to double (at no additional cost to the State/County) if the additional space is made available for use.
Suffolk	Building Project	$5,000,000	DASNY	A building project that will add 70,870 square feet to the hospital, creating construction jobs, new jobs within the hospital, and economic activity in the community.
Suffolk	Central Islip Health Clinic	$1,000,000	DASNY	Renovate and equip new primary care clinic located on the Central Islip campus site.
Suffolk	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the construction of two residences in Corum and Mt. Sinai.
Suffolk	John Jermain Memorial Library expansion and restoration	$50,000	DASNY	The Library has just completed plans for a restoration and expansion that will bring our 100 year old building into compliance with federal ADA laws, replace our 100 year old cesspool, and add approximately 6,000 square feet of space, including accessible restrooms and an elevator.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Long Island GLBT Community Center	$3,000,000	DASNY	The Long Island Gay, Lesbian, Bisexual and Transgender (GLBT) Services Network (The Network) is an association of three nonprofit organizations that serve Long Island?s GLBT community throughout the lifespan: Long Island Gay and Lesbian Youth (LIGALY), The Long Island GLBT Community Center (The Center) and Services and Advocacy for GLBT Elders ? Long Island (SAGE-LI). The three organizations currently occupy a 4,300 square foot facility located in Bay Shore that cannot accommodate the current size of programs and demand for services. The Network plans to purchase and significantly-renovate the adjacent and currently vacant and dilapidated 18,000 square foot building, into a state-of-the-art Green GLBT community services ?campus?. The campus will housethe growing health and human service, cultural, business and economic needs of Long Island's GLBT Community. It will also fill a huge gap by providing the following, which do not currently exist: ? A health clinic that will provide medical services and peurs to get their businesses off the ground and develop the necessary resources for success. Estimated numbers to be reached through this venture are over 100 new small business owners per year. ? ?Smart? Classroom spaces for providing job training and pent programs to more than 1,500 people annually. This is a shovel-ready capital project that will be New York State's first Green GLBT Community Center. This project will create well over 100 jobs.
Suffolk	Construction of New Building	$46,000,000	DASNY	Brookhaven is proposing a new building to house psychiatric beds (resulting in an addition of 20 psychiatric beds for a total of 40 psychiatric beds) and expanded cardiology services. The cardiology services include a new cardiology suite with 2 cath labs. The addition of the 20 psychiatric beds was mandated by the Commission on Health Care Facilities in the 21st Century (""Berger Commission"") and is part of a plan to rationalize and consolidate service delivery on the eastern end of Long Island to improve the hospitals' quality of care and fiscal standing. The expanded cardiology services are needed to serve the growing aging population in Brookhaven's catchment ar
Suffolk	Emergency Operation Center	$5,500,000	DCJS	Emergency Operation Center
Suffolk	Peconic Estuary and Long Island Sound Marine Infrastructure	$5,500,000	DEC	Increase safe access and use of local waterbodies through improved community facilities. County	Project	Requested $	State Agency	Additional Detail
Suffolk	Suffolk County, Town of Riverhead Brownfield Remediation	$350,000	DEC	critical to expansion of downtown tourist destination project Aquarium expansion precluded by contaminated gas station but essential to distressed community
Suffolk	Shinnecock Shellfish Hatchery and Environmental Project	$3,500,000	DEC	This project builds upon the investment of $400,000 from the Administration for Native Americans to develop the first Shinnecock Nation Economic Development Tribal business. The building that originally housed the enterprise begun in the l980's was comprised of the first solar energy building on Long Island. The business began to fail when the ""Brown Tide"" destroyed much of the seafood industry on the Island, but was revitalized several years ago with the grant award by ANA. A new Hatchery facility isrequired and marketing is available to begin the sale of shellfish throughout L.I. and beyond. Funding this important project would provide the Shinnecock Indian Nation with means of achieving a true economic development base enabling self-sufficiency both now and into the future. It also will serve to assist in the vast global effort to sustain economy through indigenous economics as practiced through conservative and beneficial methods of re-seeding and harvesting the wat
Suffolk	Reclaim Long Island Homes	$6,558,000	DHCR	LIHTC 9%
Suffolk	Patchogue Village	$25,000,000	DHCR	Affordable housing revitalization
Suffolk	Take Back The Block	$500,000	DHCR	Construct seven (7) units of owner occupied workforce housing, each with legal affordable rental for a total of fourteen (14) affordable units.
Suffolk	Harbor Village	$100,000,000	DHCR	Harbor Village provides housing for middle income seniors. The project will provide Long Island seniors with the ability to stay where they want to stay, on Long Island, close to their families.
Suffolk	Redevelopment of Next Generation Housing	$10,500,000	DHCR	Redevelopment of Next Generation Housing
Suffolk	Water Tower Painting	$500,000	DHCR	The Village of Ocean Beach constructed a water tower 16 years ago that is in need of remediation and preventive maintenance. Engineering and testing has been completed and we are prepared to go out for bids for the repainting of the water tower. This project is ready to begin as early as the spring of 2009. Funding to complete this project would enable the Village to choose the option with the most remediation, rather than a laundry list of temproary repairs.
Suffolk	Veterans Community Center	$2,000,000	DOH	Construction of a Community Center on donated 4-acre property overlooking Long Island Sound for veteran activities and theraputic day service program for Northport VMAC.
Suffolk	Electronic Health Record Implementation	$3,000,000	DOH	The goal of this project is to increase the efficiency of services provided within South Oaks Hospital and Broadlawn Manor Nursing Care and Rehabilitation Center through improvements in facility layout and information technology/information exchange capabilities, as well as information exchange with partnering RHIO. This initiative will improve the organization?s ability to meet the needs of patients and residents. Broadlawn entered into a collaborative agreement to serve older adults entering into theNorth Shore Hospital/Long Island Jewish Healthcare System. This collaborative agreement was put in place for the purpose of eliminating excess capacity and achieving greater efficiency in services that are responsive to identified community needs. Broadlawn is one of multiple nursing homes affiliated with the NS/LIJ System that are using E-Health Information Technology solutions in order to exchange patient information, enhancing opportunity for interoperability as need increases and hospital and nursindress the specific needs of the patient population that is served. Outcomes include reduced healthcare costs, decrease duplication or work/tests, increased quality of care.
Suffolk	obesity	$100,000	DOH	10% reduction in obesity within 3 months for mentally ill children and adolscents by implementing healthy foods and exercise program

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Suffolk	Suffolk County, Calverton Rail Rehabilitation	$3,500,000	DOT	supports major industrial park DEC-permitted project critical to expansion of industrial park
Suffolk	The Long Island Expressway (495) to Mattituck Extension	$127,725,000	DOT	THE LIE ""MATTITUCK EXTENSION:"" In 1969, three years before the expressway reached Riverhead, the New York State Legislature approved a 13-mile extension beyond EXIT 73 in Riverhead out to Mattituck. This extension opened the possibility for an Long Island Sound bridge to either southeast Connecticut or southwest Rhode Island. In accordance with newly enacted environmental legislation. The expressway extension and bridge proposals are now popular with many North Fork residents. The Tri-State Regional Planning Commission has advocated construction of the eastern LIE extension to Mattituck. In its 1975 report ""Maintaining Mobility"", the Commission recommended an LIE study corridor between Riverhead and Mattituck, anticipating traffic growth through 2000:"" Since NY 25 east of Riverhead will be inadequate for future demands, an arterial extension of the Long Island Expressway to Mattituck should be constructed. The Long Island Expressway extension to Mattituck should be put back on the NYSDOT officialconnect the Long Island Expressway between its planned eastern terminus in Riverhead and New England. 3 possible routes are suggested as follows: 1.) East Marion, NY to Old Saybrook, CT, 2.) Orient Point, NY to New London, CT, 3.) Orient Point, NY to Weers Island, NY). The time is now for New York State to do this overdue neede

County	Project	Requested $	State Agency	Additional Detail
Suffolk	The Long Island Loop	$68,000,000	DOT	Suffolk County over 50 years ago had in their Capital Program for the people of New York State had a capital project to build two bridges that would connect the North Fork of Long Island to the South Fork of Long Island (The Long Island Loop). The capital project was to build two bridges. The Shelter Island Sound Bridge 1.) from 3rd Street a/k/a Wiggins Street a/k/a NY-114, Greenport, New York 11944 (Village of Greenport) over Shelter Island Sound to Bridge Street a/k/a Summerfield Place a/k/a NY-114, Shelter Island Height, New York 11964 (Town of Shelter Island). The Noyack Bay Bridge 2.) from NY-114, Shelter Island, New York 11964 (Town of Shelter Island) over Noyack Bay / Smith Cove to NY-114, Village of North Haven, New York 11963 (Village of NorthHaven). These two bridges were never constructed. The two bridges are necessary now for 1.) The safety of the public, [if the North Fork or South Fork or Shelter Island of Long Island ever had to be evacuated], 2.) to promote tourism in New York State as and poor White Americans from entering Shelter Island Height, and Shelter Island and settle. Please look at the 1652 to 2000 United States Census for the areas of Zip Codes 11944, 11963, and 11964. Shelter Island was settled in 1652 by Nathaniel Sylvesgar Merchant of Barbados.
Suffolk	Town of Babylon - Replace Municipal Bulkheads	$2,000,000	DOT	
Suffolk	Town of Babylon - Road Improvements	$4,000,000	DOT	Lindenhurst, East Farmingdale - Route 109 - Conklin
Suffolk		$17,000,000	DOT	
Suffolk		$0	DOT	
Suffolk	Treatment Plant Upgrade (Nitrogen Removal)	$5,400,000	EFC	
Suffolk	Treatment Plant Mod./EXP	$3,500,000	EFC	
Suffolk	Pump Station, Treatment Plant Repl.	$3,000,000	EFC	
Suffolk	Peconic Estuary and Long Island Sound Stormwater Cleanup Project Imple	$4,780,000	EFC	Install stormwater cleanup structures, including bioswales, collection systems and piping, to eliminate direct discharge of stormwater into local waterbodies that include the Federally recognized Peconic Estuary and Long Island Sound. Watershed managemen
Suffolk	Water System Upgrade	$750,000	EFC	The Village of Saltaire operates its own water system and provides all the water to its residents via two separate wells. One well has a 15,000 gallon hydro-pneumatic tank that was originally installed in the 1960?s. It has been determined by the Village?s engineers to have reached the end of its useful life. The second well has never had a tank installed at its location, which has severely deterred efficiency of the water system. The advise of our engineer is to install a new 15,000 gallon tank at thesecond location to improve water quality and fire suppression capabilities, and to act as a back-up to the existing tank which, although still operating, has long exceeded its theoretical useful life.
Suffolk	Rebuild and Rehab WW Collection System	$2,500,000	EFC	Rebuild and Rehab WW Collection System
Suffolk	Extension of sewer system to Sandy Beach	$250,000	EFC	Extension of sewer system to Sandy Beach

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Public water hookup	$1,500,000	EFC	Provide public water to 300+ households in the Clearwater Beach area of Springs which currently are on individual well water. Some of which fail the current standards for clean water. Project was started in 2008 and is currently underway. The cost is ofthe project is approx. $5,000 per house hold and is optional per household. Funding should be made available to ensure all households get the public water hook-up at little or no cost to the homeowner.
Suffolk	Village of Patchogue	$6,000,000	EFC	Wastewater treatment plant
Suffolk	VOC Removal Dix Hills Water District	$2,000,000	EFC	Remove volatile organic compounds from public water supply.
Suffolk	Huntington Sewer District Headworks	$1,000,000	EFC	Increase the treatment capacity of the HSD Wastewater Treatment Plant by 100,000 GPD. This is a water quality and economic development stimulus project
Suffolk	Huntington Sewer District Microturbines	$1,500,000	EFC	Install a methane collection and filtration system and two microturbines at the HSD wastewater plant to convert natural methane gas by-product of treatment into electrical energy and heat to self-power the plant.
Suffolk	Sewer District No 8 - Ronkonkoma/Lake Ronkonkoma	$90,000,000	EFC	Sewer District No 8 - Ronkonkoma/Lake Ronkonkoma
Suffolk	Mastic/Shirley Sewers and Infrastructure	$35,000,000	EFC	Mastic/Shirley Sewers and Infrastructure
Suffolk	Long Island Sound Wastewater Infrastructure Improvements	$5,400,000	EFC	Long Island Sound Wastewater Infrastructure Improvements
Suffolk	Rocky Point Sewers and Infrastructure	$150,000,000	EFC	Rocky Point Sewers and Infrastructure
Suffolk	Wyandanch New Sewers	$30,000,000	EFC	Wyandanch New Sewers
Suffolk	Water Conveyance	$2,000,000	EFC	Water Conveyance
Suffolk	Sanitary Sewer System	$1,000,000	EFC	Sanitary Sewer System
Suffolk	Public Drink Water Well	$13,000,000	EFC	Public Drink Water Well
Suffolk	Bay Park Sewage Treatment Plant	$300,000,000	EFC	Bay Park Sewage Treatment Plant
Suffolk	Cedar Creek Sewage Treatment Plant	$42,183,000	EFC	Cedar Creek Sewage Treatment Plant
Suffolk	Huntington Sewer District - Headworks Improvement	$1,550,000	EFC	Huntington Sewer District - Headworks Improvement
Suffolk	Volatile Organic Compound Removal	$2,700,000	EFC	Volatile Organic Compound Removal
Suffolk	Great Neck Sewer	$68,000,000	EFC	Great Neck Sewer
Suffolk	Port Washington Sewer	$22,822,995	EFC	Port Washington Sewer
Suffolk	Sewer Plant Upgrades	$16,000,000	EFC	Sewer Plant Upgrades
Suffolk	Howell Pump Station Upgrade	$3,500,000	EFC	Howell Pump Station Upgrade
Suffolk	Smithtown/Kings Park Sewers and Plant Expansion	$40,000,000	EFC	Smithtown/Kings Park Sewers and Plant Expansion
Suffolk	Southhampton Sewers and Infrastructure	$20,000,000	EFC	Southhampton Sewers and Infrastructure
Suffolk	Long Island Sound Wastewater Infrastructure Improvements	$2,900,000	EFC	Long Island Sound Wastewater Infrastructure Improvements
Suffolk	Sewer Improvements	$7,000,000	EFC	Sewer Improvements
Suffolk	Patchogue Plant Expansion and Sewers	$25,000,000	EFC	Patchogue Plant Expansion and Sewers
Suffolk	Port Jefferson New Sewer Installation	$25,000,000	EFC	Port Jefferson New Sewer Installation
Suffolk	Sag Harbor Sewer Rehab and 1/1 Reduction	$3,000,000	EFC	Sag Harbor Sewer Rehab and 1/1 Reduction
Suffolk	Water System Upgrade	$750,000	EFC	Water System Upgrade
Suffolk	Nitrogen Removal & Upgrade to Long Island Sound Waste Water Treatmen	$412,000,000	EFC	Nitrogen Removal & Upgrade to Long Island Sound Waste Water Treatment Plants
Suffolk	Modifications to Peconic Estuary	$16,500,000	EFC	Modifications to Peconic Estuary
Suffolk	Calverton STP Upgrades/force main/recharge beds	$6,000,000	EFC	Calverton STP Upgrades/force main/recharge beds
Suffolk	Defriest PS	$6,500,000	EFC	Defriest PS
Suffolk	Rebuild and Rehab Wastewater Collection System	$2,500,000	EFC	Rebuild and Rehab Wastewater Collection System
Suffolk	Replace Water and Sewer Mains	$750,000	EFC	Replace Water and Sewer Mains

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Suffolk	Village of Greenport - Wastewater Treatment Plant Upgrade	$6,000,000	EFC	
Suffolk	Town of Riverhead - Sewer	$16,500,000	EFC	Riverheade AWTF TMDFL Upgrade
Suffolk	Suffolk County, Town of Riverhead pump station upgrades	$7,000,000	EFC	2 deteriorated pump stations supporting substantial redevelopment of downtown area Critical to economic development of downtown area;job growth est 500
Suffolk	Suffolk County, Bergen Point outflow pipe restoration	$585,000	EFC	severely deteriorated;phase I ready to proceed serves all industrial areas of the town of Babylon and Rt 110 corridor in Melville as well as south shore downtown areas
Suffolk	Suffolk County, Town of Babylon Wyandanch Sewer	$30,000,000	EFC	connection to Suffolk County Sewer District #3 needed to support commercial revitalization of downtown area critical to economic development of severely deteriorated commercial area including 25 acres of Empire Zone
Suffolk	Suffolk County, Town of Riverhead STP upgrade	$10,000,000	EFC	treatment upgrade required by DEC due to discharge to Peconic Estuary upgrade and capacity expansion essential for downtown redevelopment
Suffolk	Suffolk County/Brookhaven Sewer District #2	$10,500,000	EFC	expansion to serve Empire Zone/industrial park create/retain 1500 jobs in empire zone/industrial park
Suffolk	Suffolk County, Patchogue STP upgrade	$10,000,000	EFC	antiquated/deteriorated ww treatment plant at risk of failure/upgrade needed to support downtown redevelopment project
Suffolk	Suffolk County, Calverton STP upgrade	$3,500,000	EFC	secondary treatment required by DEC to be increased to tertiary treatment 1100 acres Empire Zone;industrial redevelopment project; job growth 3000+
Suffolk	Peconic Riverfront Urban Renewal Workforce Housing Project	$4,500,000	ESD	Economic Redevelopment: Demolition and reconstruction of four blighted/condemned vacant buildings for redevelopment as mixed use residential project to include 50 workforce housing units, retail and office space located within a designated Urban Renewal
Suffolk	Incubator	$1,250,000	ESD	Businesses in incubator; microwave Amplifier training facility for existing business, 50 jobs; payroll company sales force 15 jobs, Creation of Salon and Hair Products Franchise; 25 businesses, processed human hair recycled 15 jobs; Teaching Spanish andFrench (Creole) speaking parents to help their children with homework; 10 jobs created. Property needs to be expanded to encompass all of these activities. Expansion construction cost part of funding request. Property located in State Empire Zone. Specialized Construction Contractors have established a business together to bid on Education Construction Contracts. Veteran, minority and women business owners.
Suffolk	Incubator (Cont'd)	$4,500,000	ESD	Bio-fuel Stations Product grown in Mississippi, possible consideration, if climate is determined to be suitable. Would need to be trucked to New York. 100 Jobs in New York starting slow. First crop will take nine months to complete. Jobs in Mississippi 100. Would require coordination between the States for funding. Explore creation of/or purchase of a unit which creates water in deserts to sell to nations with massive desert lands. +50 Jobs.
Suffolk	Suffolk Theater Historic Building Restoration along Route 25	$7,000,000	ESD	Suffolk Theater Historic Building Restoration along Route 25
Suffolk	Tanglewood Carpet And Flooring	$60,000	ESD	To take my small one person shop at home floor covering business and bring it to the next level which would be opening a commerical store front amd hireing employees .

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Sales engineering project	$180,000	ESD	The funds of $150,000 would be used to hire three new employees with at least a master's degrees in engineering or science. The new employees would serve as product managers to promote the sale of ALA products, which are currently sold throughout the world. Hiring would emphasize new graduates in order to help keep good biotech jobs on Long Island. ALA is a growing company and we have just purchased a new building for our headquarters through the SBA 501 program. The money would cover the cost of salary, training, and travel for three employees for one year until they can become self-sustaining. Unlike other projects where the jobs end after the money runs out, we have a proven record that after about 1 year qualified candidates can bring in enough newbusiness to our company to support their salary and additional profit.
Suffolk	Expanding machining capability	$100,000	ESD	Funds would be used to purchase a used CNC milling machine and a used CNC lathe of high quality. We would also hire an additional machinist so we would retain the one we have now and add a second. The equipment and the manpower would be used to capture aspecific market opportunity manufacturing small plastic parts for Neuroscience research. These items would be sold domestically and internationally and will conservatively bring in about $100,000 in sales annually.
Suffolk	Coram Commercial Plaza Theater Renovation	$1,500,000	ESD	The project includes the rehabilitation of the currently vacant movie theater in the Coram Commercial Plaza located on Route 112 in the Town of Brookhaven into a 10 screen, state-of-the-art movie theater. The building is located in the downtown core andis currently viewed as a community eye-sore. The Theater first opened in 1885 and after closing eight years ago it has remained vacant. The building was purchased in 2005 by the current owner who is looking to erase the signs of disrepair and vandalism which have occurred in recent years. The community has identified the rehabilitation of the Theater as a community priority due to its high visibility and central location, and the grant would make the project more feasible.
Suffolk	Graphic paper company expantion	$2,000,000	ESD	company expanion into new markets to service new and excessting accounts
Suffolk	Huntington Station Business Incubator	$250,000	ESD	Renovation of property at 1268 New York Avenue, Huntington Station, NY for use as a business incubator to spur job growth in minority, low-income census tract community.
Suffolk	Huntington YMCA	$2,200,000	ESD	Construct a renovated and expandedYMCA
Suffolk	Center Moriches Sewers and Infrastructure	$55,000,000	ESD	Center Moriches Sewers and Infrastructure
Suffolk	Lighthouse at Long Island	$3,000,000,000	ESD	Lighthouse at Long Island
Suffolk	Open Public Space and Parks	$102,000,000	ESD	Open Public Space and Parks
Suffolk	Convention Center	$88,300,000	ESD	Convention Center
Suffolk	Manorhaven Park	$12,000,000	ESD	Manorhaven Park
Suffolk	Clark Gardens	$3,060,000	ESD	Clark Gardens
Suffolk	Companion Star Inc G/O	$30,000	ESD	This project is for General Operating costs for our Arts Production/Education company. It would insure current salaries for employees who run and organize our education program, performance projects, and concert events.
Suffolk	Town of Riverhead - Economic Development	$7,000,000	ESD	Suffolk Theater restoration
Suffolk	Town of Riverhead - Economic Development	$500,000	ESD	Demolition of blighted mixed-use hotel
Suffolk	Town of Riverhead - Economic Development	$350,000	ESD	Demolition of mixed-use residential property

County	Project	Requested $	State Agency	Additional Detail
Suffolk	divas salon &beauty supply	$20,000	ESD	I am currently a salon owner that is trying to open a bigger salon with a beauty supply store.I would like to give jobs to the young adults that graduate from cosmitology school and to give them a chance in traing them that they can also open their own business and be sucsessful at what they do
Suffolk	Suffolk County, Suffolk Theatre Renovations	$7,000,000	ESD	supports downtown redevelopment-theatre constructed 1933 under FDR National Recovery Act key component of downtown redevelopment and leverages private investment in adjacent bldgs
Suffolk	Suffolk County, National Synchrotron facility	$10,000,000	ESD	to house major national project at Brookhaven National Lab BNL employs 3000 and is a significant economic development stimulus for the region
Suffolk	Suffolk County, Brookhaven Solar Project	$50,000,000	ESD	ideal location and economic development benefit DOE site with high energy costs and land available for solar facility
Suffolk	Northport Biosciences, New Drug Development	$5,000,000	ESD	Northport Biosciences is a Long Island start-up seeking to establish a drug development organization focusing on treatments for unmet medical needs. We will create treatments for cancer pain, Pompe, ALS, CJD and other 'death sentence diseases' that willbe affordable and can be used widely (as if from a not-for-profit).
Suffolk	LIRR Huntington Station North Parking Garage (Rehabilitation)	$1,870,000	LIRR	LIRR Huntington Station North Parking Garage (Rehabilitation)
Suffolk	LIRR Huntington Station South Parking Garage (Rehabilitation)	$2,300,000	LIRR	LIRR Huntington Station South Parking Garage (Rehabilitation)
Suffolk	East Main Street Urban Renewal Area - Town of Riverhead	$500,000	MAIN_ST	
Suffolk	Huntington Station LIRR Parking Garages	$4,200,000	MTA	Renovate and make critical repairs to North and South parking garages at the LIRR terminal in Huntington Station.
Suffolk	DPW and Sanitation, Warehouses, NYS DOT - Facilities Upgrade - Katonal	$326,507	NYPA	
Suffolk	MTA Traction Loads, LIRR - High Speed Flywheel Energy Storage System	$750,000	NYPA	
Suffolk	DPW and Sanitation, Warehouses, SUFFOLK COUNTY FACILITIES UPGF	$1,139,041	NYPA	
Suffolk	Colleges and Universities, SUFFOLK COUNTY COMMUNITY COLLEGE -	$1,362,087	NYPA	
Suffolk	Light plant Upgrade	$5,000,000	NYPA	Light plant Upgrade
Suffolk	Electrical Substation Land	$3,000,000	NYPA	Electrical Substation Land
Suffolk	Energy Distribution	$33,900,000	NYPA	Energy Distribution
Suffolk	Village of Greenport - Light Plant Upgrade	$3,500,000	NYPA	Switch gear, transformer, generator work
Suffolk	Reduce Railway Energy Used at Wheel-Rail Interface	$500,000	NYSERDA	There is a good deal of energy lost by railways when wheels and rails do not have the proper interface. When wheel and/or rail wear results in less than optimum guidance of wheelsets on the track more friction is developed. Preliminary investigation hasshown that this wear could result in between 5% and 30% more energy to move an identical load under those wheel-rail interface conditions. This investigation will provide analysis and supporting empirical data that railways in New York could use to justify correcting improper wheel-rail interface conditions. The effort will require instrumenting one or more rail vehicles to measure energy usage under both ideal and poor conditions, and could require some rail grinding of a test area. It will require theparticipation of a New York railroad or transit operation. Adoption of a practice of saving energy using the rail and wheel maintenance approach developed in this study will create jobs to remediate existing poor conditions. This cost is expected to be

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Suffolk	Long Island Green Accelerator	$250,000	NYSERDA	The Long Island Green Accelerator? or LIGA Knowledge and Information Exchange has developed a number of programs designed to allow companies and entrepreneurs to take advantage of one of the greatest assets we have to offer - collaboration with academic,government and business leaders. In addition to specialized topics, regular programs include: Accelerating Green? LIGA would be jointly run with Suny Stony Brook and possibly supported by and through NYSERDA in support of the new $45 million AERTC or Advanced Renewable Energy Technology Center at SBU. LIGA would revivie the old defense technology base on Long Island and turn it in to a Clean Technology base of high-paying jobs and bring about tremendous innovation in the renewable, energy efficency, clean tech and smart grid space.
Suffolk	Efficient Street Lighting on State Road 114	$0	NYSERDA	Efficient Street Lighting on State Road 114
Suffolk	Residential Solar Power Installation Project	$12,500,000	NYSERDA	To install approximately 50 residential homes with solar panels at no cost or financial risk to the homeowners, with an incentive to lower their monthly power bills. To use the grant money to pay for start up costs, labor and materials, and to repay thegrant in full, over time with revenue generated by power from the solar panels installed. Once the grant has been repaid in full by energy generated by the residential solar power, the ongoing revenue created will go into our business to fund new projects and allow the business to grow. This is a win-win for all involved, both environmentally and financially. Our principal/owner is a certified solar power enginer and a fully licensed and insured master electrician with deep roots in the local community.
Suffolk	Municipal Energy & Conservation Efficiency	$16,750,000	NYSERDA	Improving 3 town buildings
Suffolk	Photovoltaic Roof at Board of Elections Building,	$2,000,000	NYSERDA	Replacement at Bd of Elections
Suffolk	Energy Improvement Project in Yaphank	$20,000,000	NYSERDA	Photovoltaic installations
Suffolk	Energy Improvements at Various County Facilities	$3,000,000	NYSERDA	Energy performance project for town buildings
Suffolk	Cohalan Courts Energy Project, Hauppauge	$2,000,000	NYSERDA	Interior & Exterior lighting
Suffolk	Paumanok Hall HVAC	$400,000	NYSERDA	Energy efficient replacements
Suffolk	Energy improvement Project	$20,000,000	NYSERDA	Energy improvement Project
Suffolk	Development of Hybrid Passenger Vehicles	$500,000	NYSERDA	Most diesel locomotives, and cars and locomotives with power obtained from wayside catenary or third rail, use electric motors for propulsion. Batteries are a potentially effective and convenient method to supplement the prime power source. Maximum powerfor passenger trains and transit railcars is often selected based on the requirement to achieve satisfactory acceleration performance, only needed for a fraction of the time in service. An initial study has shown that it is feasible to use on-board batteries to provide a supplement to the prime power source, thus not requiring sizing based on acceleration performance, enhancing performance of existing equipment, and capturing braking energy for reuse. The objective of the proposed investigation is to develop and prototype a hybrid rail vehicle tailored to commuter rail and transit operations. An available locomotive will be used for prototyping and will be instrumented to measure engine fuel consumption and retention of acceleration performance at redengine maintenance and reduced exhaust emissions.
Suffolk	Town Hall Solar Energy Array	$250,000	NYSERDA	Install solar shingles or panel on the south facing roof of Town Hall. Array will generate 21,265 Kwh of electricity. Project will include interactive display in building lobby as solar energy savings teaching tool.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Suffolk	Development of XRF Solar Cell Thin Film Monitors	$500,000	NYSERDA	We currently have developed a series of prototype in-line x-ray fluorescence (XRF) tools used to control thickness and more critically, composition of alloy thin films used to produce electric power from sunlight on both rigid and flexible substrates. Weneed outside funding to complete the development and ramp up keep us ahead of our foreign competition. The funding will be used to hire 4 - 6 people immediatley, including software engineers, service engineers and applications engineers (analytical chemists). Early completion of the project will allow us to export as much as 50% of our products overseas and grow our business to hire additional support and technical personnel. Our business plan calls for growth in sales from the current level of $2M, to$10M in less three years, with an increase in staff from current level of 8 to approximately 30 people. This is a US manufacturing business with significant export potential.
Suffolk	Town Hall Solar Power Master Plan	$5,500,000	NYSERDA	Town Hall Solar Power Master Plan
Suffolk	Huntington Sewer District Micro Turbines	$1,500,000	NYSERDA	Huntington Sewer District Micro Turbines
Suffolk	Fleet Conversion to Compressed Natural Gas - CNG	$15,000,000	NYSERDA	Fleet Conversion to Compressed Natural Gas - CNG
Suffolk	East Islip Marina Recreation Center Wind Turbine Project	$488,000	NYSERDA	East Islip Marina Recreation Center Wind Turbine Project
Suffolk	Renewable Energy Projects - Solar Electric Facility	$3,000,000	NYSERDA	Renewable Energy Projects - Solar Electric Facility
Suffolk	Three 10kw solar systems for Willow Street	$202,500	NYSERDA	Three 10kw solar systems for Willow Street
Suffolk	Street Light Induction Lamp Replacement	$4,000,000	NYSERDA	Replace 15,000+ sodium street lights with high-efficiency Induction lamps, which will reduce energy demand by $1-million annually.
Suffolk	Village of Greenport - Purchase Biofuel / Gas Generators	$12,000,000	NYSERDA	
Suffolk	Village of Greenport - Green Energy	$80,000	NYSERDA	Purchase and installation of green energy components for Village buildings, and to Generate into the grid.
Suffolk	Town of Riverhead - Solar	$750,000	NYSERDA	Rec modular building / senior center / highway garage / Pulaski St / Denitrification building
Suffolk	Town of Riverhead - Emergency Resources	$250,000	NYSERDA	Emergency generator for Jamesport Emergency Shelter
Suffolk	Energy Efficiency Projects	$1,500,000	NYSERDA	VFD retrofit- electric driven centrifugal chiller, boiler conversion to gas with new controls, plate and frame heat exchanger, piping distribution optimization, high efficiency chiller
Suffolk	Solar projects	$550,000	NYSERDA	Solar for preheating domestic water/economizing boiler water, site lighting
Suffolk	Univeristy Hospital Energy Efficency Window Replacement	$28,000,000	NYSERDA	Stony Brook University Hospital is more than 34 years old. The two towers are exposed to harsh weather with no wind shield. Rain and weathering has caused the towers' structural wall system gaskets to deteriorate. This gasket system need to be replaced but with the University's efforts to become more green and environmentally sustainable, it would be more cost efficient to replace the windows to an insulation value of R 19. The cost of repairing and upgrading this system is approximately $28 million butwill help the University realize fuel savings alone of nearly $500,000 annually.
Suffolk	Suffolk County, Smart Grid Test and Validation Facility at SUNY Stony Broo	$20,000,000	NYSERDA	20,000 sf energy technology test and validation facility proposed to address innovative energy infrastructure/closed loop system Meets goal of Smart Grid Investment Program to identify, design, and implement new innovative technologies for increased energy and cost efficiency

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Long Island Power Authority Wind Energy Program	$65,000,000	NYSERDA	Long Island Power Authority currently has a Wind Energy Program (http://www.lipower.org/efficiency/wind-programs.html)(Kevin S. Law, President and Chief Executive Officer (631) 755-6000). This Wind Energy Program reimburses home owners up to $35,000 for the installation of a residential wind turbine. The cost of installation of a residential wind turbine can be as high as $100,000. At this price, it is to high for the low and mid income person. I am recommending funds from the American Recovery and Reinvestment Act provide the non-reimbursement amount for installing a residential wind turbine system. This will create 1,000s of new jobs in the renewable energy field, improve national security, lower home owners energy costs over the long run. Thank you Joe
Suffolk	Long Island Power Authority Solar Pioneer Program	$45,000,000	NYSERDA	Long Island Power Authority currently has a Solar Pioneer Program (http://www.lipower.org/efficiency/solar-facts.html)(Kevin S. Law, President and Chief Executive Officer 1-800-692-2626 or 1-800-490-0025). This Solar Pioneer Program reimburses home owners up to $35,000 ($3.50 per watt from 250 watts to 10 kW with a maximum of $35,000) for the installation of a residential photovoltaics systems. The cost of installation of a residential photovoltaics systems can be as high as $80,000. At this price, itis to high for the low and mid income person. I am recommending funds from the American Recovery and Reinvestment Act provide the non-reimbursement amount for installing a residential photovoltaics systems. This will create 1,000s of new jobs in the renewable energy field, improve national security, lower home owners energy costs over the long run, and improve global climate changes for the better. Thank you Joe
Suffolk	Long Island Power Authority Residential Geothermal Systems Program	$9,125,000	NYSERDA	Long Island Power Authority Residential Geothermal Systems Program Long Island Power Authority currently has a Residential Geothermal Systems Program (http://www.lipower.org/efficiency/geothermal.home.html)(Kevin S. Law, President and Chief Executive Officer 1-800-692-2626 or 1-800-490-0025). This Residential Geothermal Systems Program reimburses home owners up to $1,000 for the installation of a residential photovoltaics systems. The cost of installation of a Residential Geothermal System can be as high. The price, is to high for the low and mid income person. I am recommending funds from the American Recovery and Reinvestment Act provide the non-reimbursement amount for installing a Residential Geothermal System. This will create 1,000s of new jobs in the renewable energy field, improve national security, lower home owners energy costs over the long run, and improve global climate changes for the better. Thank you Joe
Suffolk	All-in-one Sollar Cell Fabricating Machine	$1,500,000	NYSERDA	The objective of this program is to develop a working prototype of a single, all-in-one, fabricating machine, which will simultaneously deposit all layers of solar cell materials on a solid substrate (replacing the 12-15 machines currently used to fabricate thin film solar cells). This prototype would reduce the cost of solar cell fabrication in three ways: (1) fewer pieces of equipment to buy, (2) smaller building to hold the equipment, and (3) significantly higher throughout (production) of the solarcells.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Suffolk	Alternative Fuel Quantity Gauging Project	$1,000,000	NYSERDA	This project will develop safe and reliable fuel gauging and management solutions for new biofuels and hydrocarbon-based fuels used in commercial and military jets and ground vehicles. Current fuel gauging systems use the properties of petroleum-based fuels to accurately measure fuel quantity. Next-generation jet fuels do not posess the same properties as petroleum-based fuels and can cause errors or stop the gauging system from working altogether. No gauging technology exists today which permits the use of advanced fuels without impacting vehicle performance, leading to reduced flight range or in-theater time. The lack of a reliable fuel gauging system prevents the widespread use of environmentally-friendly alternative fuels. To faciliate the increased use of advanced fuels, Parker Hannifin will employ its 40 years of fuel gauging expertise to develop and test new gauging systems to accurately measure alternative fuel levels. The project includes analysis of current fuel dynamics, evaluation of militand commercial aircraft and ground vehicles. This new fuel gauging system will remove a major hurdle to the spread of alternative fuels in aircraft and ground vehicles and bring the nation the accompanying environmental benefits from such use.
Suffolk	Community Service Center	$75,000	OCFS	Assist families and individuals experiencing economic hardship through services including comprehensive assessment and case management, job/career counseling, linkages to mental health services, and financial literacy/counseling.
Suffolk	Child Welfare services	$300,000	OCFS	EAC's child welfare services assist victims of abuse and neglect, including advocacy, job placement, mentoring, and victims services.
Suffolk	Child Advocacy Center	$1,000,000	OCFS	We have a shovel-ready construction project for a new Child Advocacy Center. The CAC is a multi-agency project that provides medical exams and forensic interviews, as well as crime victims services, for child sex abuse victims.
Suffolk	Suffolk County Broadband Initiative	$5,000,000	OFT	The County of Suffolk wishes to pursue (2) initiatives for broadband deployment. 1.) Public safety support for evacuation, communication to constituents and personnel for a Category 4/5 hurricane strike. The current emergency management communications capability is not available as per public safety officials and carrier coverage maps to ensure constituents could be reached during this event. 2.) Expansion of broadband to schools, businesses and recreation areas to eliminate the need for prohibitive fixed line costs for Middle Island to East End areas which are primarily agriculture, preserved County, State and Federal lands as well as dedicated open space. The services provided and enjoyed by Western County residents are cost prohibitive to bring to these groups of people because of infrastructure buildouts.
Suffolk	GPS Preemption System (Opticon)	$3,000,000	OFT	For emergency vehicles

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Police Department Dispatch Console	$214,926	OFT	Funds are requested to replace the Village of Southampton Police Department's emergency dispatch console which is over 20 years old and obsolete. It is no longer supported by the manufacturer and parts are no longer in production. It is only a matter oftime before the unit malfunctions and disrupts emergency communications, posing a serious safety hazard for first responders and the general public. The new console will provide reliable service and enhance interoperability of public safety communications with police, fire and EMS agencies in Southampton Village and the surrounding area. Proposed equipment is a Motorola MCC5500 dispatch console, including all hardware and software required for three operator positions, XP workstation, training for staff-- $162,361. Contract labor for installation: $52,565. Should NYS pursue this project the Village of Southampton looks forward to discussing available matching funds. This is a critical public safety project with multiple benefits for the Village and th
Suffolk	Nissequogue Police Mobile Data Terminals	$43,691	OFT	The proposed project will equip the Nissequogue Police Department?s four patrol cars with Mobile Data Terminals (MDTs). MDTs are computers that will be wirelessly linked to the Suffolk County Computer Aided Dispatch system and the National Crime Information Center (NCIC) to enhance patrol efficiency as well as officer and public safety. This department is one of the only (if not the only) department in the county that does not have MDTs. Nissequogue PD is a small department with 3 full time and 18 parttime officers serving a resident population of 1,543 in a four square mile area. Due to extremely limited budget resources the department cannot bear the cost of this equipment, however it is necessary in order to ensure that critical data ? dispatch, identification, vehicle information and other real time field investigation and patrol data ? is available to all officers on the road. The MDTs will offer multiple safety and administrative efficiency benefits. The total project cost is $43,691, which incbear the entire cost of the project.
Suffolk	Sag Harbor Police digital fingerprinting	$30,000	OFT	Funding will be used to purchase a Live Scan digital fingerprint device with booking, mug shot and secure digital messaging capabilities. Currently the Department uses hardcopy inked fingerprint cards to fingerprint arrested individuals. The cards are mailed to the New York State Department of Criminal Justice Services (DCJS) for processing, where wait times for identification, rap sheet, mug shot and similar information can be up to a month. This is an outdated process that is being phased out at the state level in favor of electronic criminal justice information systems. DCJS has announced that as of January 2010 it will no longer accept hardcopy fingerprint cards, and will only accept digital fingerprints. The Department must therefore upgrade to the digital fingerprinting process. Funding for the upgrade is not available from the state and local budget resources cannot support the $30,000 cost.
Suffolk	Firehouse expansion	$1,900,000	OHS	Extension of existing firehouse to provide additional needed space. Two floors with bays on lower level and needed training and office space/
Suffolk	Manorvill Fire Department, Station 2	$3,000,000	OHS	New firehouse substation in area of District that has grown in last decade.Bids have been received and complies with Prevailing wage law of the State of New York
Suffolk	Fire Dept. bldg. Finish and outfit as Incident Mgmt Ctr.	$375,000	OHS	Fire Dept. bldg. Finish and outfit as Incident Mgmt Ctr.
Suffolk	Jamesport Emergency Shleter - Emergency Generator	$250,000	OHS	Jamesport Emergency Shleter - Emergency Generator
Suffolk	Ambulance barn	$3,000,000	OHS	Ambulance barn

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Suffolk	Fire House Traffic Light System Replacement	$250,000	OHS	We seek funding to replace an existing traffic light system that does not adequately protect the public nor firefighters. Our initial thought was to modify the existing system but after discussions with Suffolk County DPW it became evident that a total replacement was necessary. The fire district has approved plans and permits in hand and it has been estimated that the replacement the removal of the existing equipment and installation of the new poles and signals will cost between $200,000.00 and $250,000.00. We seek funding for either the whole project or a portion of the project. Project is currently advertised for bids with a bid opening date of 3/11/09. Thank you for your consideration.
Suffolk	Fair Harbor Fire House Renovation	$2,200,000	OHS	We are writing to ask that you consider our upcoming construction project to build a new firehouse in Fair Harbor, Fire Island, New York, for a distribution of funds when they are delivered to New York State as part of the federal stimulus package. The Fair Harbor Fire Department is an all-volunteer organization with no salaried employees. In a special referendum in October 2008, the citizens of Fair Harbor voted overwhelmingly in favor of a $2.2 million renovation of the department?s 50 year-old structure. Since September 11, the demands on the department have increased, as more training and more equipment has become vital. Five years ago, the department stepped up its readiness with the addition of an Emergency Medical Services unit. With the addition of an ambulance and other custom emergency vehicles, and the urgent need for training space, our already crowded firehouse has become inadequate. Our volunteer district serves the community of Fair Harbor with some 400 homes, as well as the adjoining cother. Most are accessible by narrow plank boardwalks, not asphalt roads. Brush and plants grow densely between structures and tend to get very dry due to harsh ocean winds. These conditions pose a high risk to the rapid spread of fire, with the potentie structures. While there are some year-round residents, our population soars to the thousands in the summer months when there can be as many as fifty fire and/or EMS calls. The FHFD also protects two ferry terminals. The main access?and the only way to
Suffolk	Supported Education	$200,000	OMR	During the economic slow-down, New York State Office of Mental Health has converted 100% State dollars for many prorgams for people with psychaitric disabilities to medicaid funding. This has meant the loss of our Supported Education prorgram which assists people with mental illnesses to successfully pursue college education at local colleges in Suffolk County. With fnding, we can hire professionals and people in recovery (peers) who can help people eager to overcome their disabilities and rebuild lostcareer hopes with side-by-side professional and mentoring assistance that goes right on to local campuses. With funding, we can assist and support at least 50 people per year to attend college -- a ""win/win"" for people and the local colleges since Federal dollars can be brought in to local college in the form of Pell grants and other resour
Suffolk	The Greater Goods	$250,000	OMR	We would like to create a ""consumer-run"" business that markets goods created or organized by people with psychiatric disabilities through a stroefront as well as through electronic media portals. Goods would include 2nd-hand ""everything"" from items that can be displayed to ""e-Bay"" style goods sales...and would include artwork and other items created by artisits with a disability. Employees would be people who have participated in our rehabilitation programs who have interest in marketing a

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Community Arts Education Outreach	$18,479	SED	The Parrish Art Museum seeks to reinstate its Community Arts Education Outreach and its East End Library Programs which have been cut due to the recession. 360 children have lost access to these essential programs which introduce underserved audiences tothe visual arts, fueling minds and nurturing spirits. The Parrish would renew partnerships with organizations specializing in services to economically disadvantaged, and ethnically and racially diverse families: The Bridgehampton Child Care Center whoseHead Start program began in January 2005; Foundation of Youth/Southampton Town Day Care Center offering childcare services to low income families at reduced fees; Shinnecock After School Program of the Indian Education Program; STAR (Social Thinking andReasoning) a summer camp serving low-income children ages 4 to 12. The Parrish?s East End Library Program is a collaborative exchange offering creative workshops to six libraries in Suffolk Country. Reactivation of these programs would reinstate 154 pre
Suffolk	Educational Exhibition Construction	$150,000	SED	1,500 square feet of educational exhibitions designed and constructed to enhance academic curricula, help teachers meet New York State learning standards, and promote literacy levels in Suffolk County. The project will serve over 50,000 children in the region.
Suffolk	21st Century Innovative Educational Centers	$250,000	SED	Center to build self esteem and expand interest in science and technology.
Suffolk	Shinnecock Nation Early Learning / Day Care Project	$2,536,440	SED	This project would construct a much needed early learning / day care center for the Reservation and nearby Southampton community. As well as creating an educational facility, it would provide a significant economic stimulus to the Shinnecock Reservationby creating 40 new jobs. It would enable our children to receive the critically important academic and developmental skills at age 3 - 5, thereby maximizing success in higher education and throughout life. This would benefit not only the children and their parents, but the entire Shinnecock Indian Nation. The facility would focus on serving a 15-mile radius encompassing over 10,000 adding to the economic development feature of the building, as well. $293,000 has already been secured, and there is currently a $50,000 planning project underway.

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Islip Arts Renovation	$4,000,000	SUNY_CC	Islip Arts Renovation
Suffolk	Suffolk CC - Fire Sprinkler System	$11,700,000	SUNY_CC	
Suffolk	Suffolk CC - Site Paving	$17,000,000	SUNY_CC	
Suffolk	Security Notification	$2,500,000	SUNY_CC	More than ever, the safety and security of the College community is of paramount importance, especially in light of the situation at Virginia Tech. The federal government and SUNY have reviewed current campus practices and prepared reports with recommendations set on improving emergency notification and response to enhance the safety and security of college communities. This project seeks to implement the redundant notification recommendations taken from the SUNY report as well as to improve security monitoring at all three College campuses.
Suffolk	Energy Conservation	$5,600,000	SUNY_CC	Replacement of antiquated and inefficient mechanical equipment on all three campuses, including boilers, chillers, cooling towers and electric motors. The project also includes lighting retrofits, outdoor lighting controls, demand control ventilation andother energy saving technologies. These improvements would save approximately $320,000 annually in fuel and electric expenses.
Suffolk	Expand research on biofuels - engineered plant oils and feedstocks	$591,000	Thruway

County	Project	Requested $	State Agency	Additional Detail
Suffolk	Link Center for Nervous System Disorders with Dept of Neurobiology via br	$1,000,000	Thruway	
Suffolk	Biochemistry department renovation	$3,000,000	Thruway	
Suffolk	Expediate transition to the manufacturing stage of pioneering fiber-based se	$1,000,000	Thruway	
Suffolk	Development and commercialization of carbon nanotube icing sensor for ai	$1,000,000	Thruway	
Suffolk	Development of a robust optical instrument for the isolation of cancer stem	$2,000,000	Thruway	
Suffolk	New Marine Laboratory at Stony Brook Southampton Campus	$8,600,000	Thruway	
Suffolk	Flax Pond Marine Laboratory Improvement Project	$300,000	Thruway	
Suffolk	Develop, Install and Operate a Marine Environmental Observing System in	$510,000	Thruway	
Suffolk	Sayville Sewers	$35,000,000	Unassigned	Sayville Sewers
Sullivan	T. of Fallsburg Water District Water Main and Hydrant Replacement	$600,000	CDBG	
Sullivan	Establish a Vacant-Building Program	$3,500,000	CDBG	This strategy would seek to buy up vacant 2-4 family buildings and renovate for management as affordable rental housing by responsible landlords or non-profits in contract for oversight and monitoring by the county. Target areas should be villages of Monticello and Liberty with a developed infrastructure and a high number of absentee landlord properties. A component could be an owner-renter program, where we facilitate rehap or 2-3 family properties to be sold as owner-occupied units with one or two income units. Rental income helps the owner qualify for mortgages or income side.
Sullivan	Construction of a new Highway Barn Facility	$800,000	DASNY	Construction of a new Highway Barn Facility. The Town Highway Superintendent and crew members work from the town barn, a used public building when acquired in 1968 which is not handicap accessible. The barn, which is approximately 90? X 28?, has sufferedthe effects of the yearly spring thaw with multiple foundation leaks and pooling of water within the structure. The structure itself has a roof that leaks, a substandard heating system which is 15 years old (which in the last year used 3500 gallons of fuel oil), and lacks the necessary insulation to keep the inside temperature at a tolerable level to perform work. Considerations have been made to update the heating system, repair the roof, and foundation; however after a Nyserda evaluation, a determination has been made that it would not be cost effective considering the overall condition of the building. The town barn has 2 bay doors that allow the town trucks to enter and exit the building. Unfortunately, when regular maintenance is preformed on thed easy targets for vandalism.
Sullivan	Summitville Fire House	$4,000,000	DASNY	Build a new Fire House with room for all of our equipment and to have up to date training area's and offices.
Sullivan	CAST Building	$15,000,000	DASNY	CAST will be an educational facility on the Sullivan County Community College Campus that would be dedicated to development of a ""Green Workforce"" to support the Green Tech Park and other regional sustainable businesses/initiatives. It will be developed in tandem with G-t
Sullivan	Facility Improvement Project for Energy Efficiency at the Health and family	$1,000,000	DASNY	Proposals for this project have been received and are currently being reviewed; awarded in February 2009. Includes a comprehensive energy audit of the Travis Building (Social Services Administration), the Community Services administration Building, andthe shared Health Clinic, as well as the cost of retrofitting these facilities with materials and equipment to improve the overall efficiency of their energy usage. This includes improvements to the building envelope, improvements to air flow, replacement of boilers and other equipment, and potentially the installation of onsite solar system

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Sullivan	SC Government Center Annex Energy Rehabilitation	$90,000	DASNY	Comprehensive energy audit and retrofit of Sullivan County Government center Annex with equipment and materials to improve energy efficiency.
Sullivan	Sullivan County Adult Care Center Energy Rehabilitation	$1,000,000	DASNY	Comprehensive energy audit and retrofit of Sullivan county Adult Care Center with equipment and materials to improve energy efficiency.
Sullivan	Emergency Training Center Classrooms & Upgrades	$1,000,000	DASNY	This project will include the construction of classrooms, paving of roadways, installation of lighting in training area, and repairs to a road to allow drafting water from pond at the existing Sullivan County Emergency Training Center.
Sullivan	Catskill Regional Medical Center Emergency Room expansion	$1,000,000	DASNY	Catskill Regional Medical Center Emergency room was designed originally in 1977 and is currently outdated in terms of ensuring both optimal emergency clinical services as well as operational efficiency and patient throughput; Total Emergency Room construction expansion project constituting 19,200 GSF comprised of 12,500 GSF new construction and 6700 GSF renovation of current emergency room facilities; Construction project will expand emergency room facility beds from 13 to 20 representing 54% increase in patient capacity.
Sullivan	Center for Discovery School Gymnasium Construction Project	$3,300,000	DASNY	The Center for Discovery already plans to add an additional 254 new jobs during 2009. The Center could add 24 additional permanent jobs and up to 150 construction jobs with the construction of new school facilities. With NY State?s approval The Center has already embarked upon an ambitious effort to build a campus for children with Autism and is nearing completion of the residential component of this project. Phase II is the construction of new educational facilities for these children. This proposal specifically seeks $3,300,000 to complete funding of a new school gymnasium for children with developmental disabilities. The Center already has secured more than $2,000,000 in funding already and has completed construction documents that could be sent outto bid as soon as all funding is in place. This project could begin immediately. It is important to note that The Center for Discovery is largest employer in the Sullivan County and the region. It has a proven track record of job creation growing from 2
Sullivan	Center for Discovery Big Barn Education Center Project	$5,500,000	DASNY	The Center for Discovery already plans to add an additional 254 new jobs during 2009. The Center could add 36 additional permanent jobs and up to 150 construction jobs with the construction of new school facilities. With NY State?s approval The Center has already embarked upon an ambitious effort to build a campus for children with Autism and is nearing completion of the residential component of this project. Phase II is the construction of new educational facilities for these children. This proposal specifically seeks $5,500,000 to complete funding of the Big Barn Education Center with 9 classrooms for children with developmental disabilities. The Center already has secured more than $2,500,000 in funding already and has completed construction documents that could be sent out to bid as soon as all funding is in place. This project could begin immediately. It is important to note that The Center for Discovery is largest employer in the Sullivan County and the region. It has a proven track record of joy job seekers.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Sullivan	Center for Discovery School Energy Projects	$2,000,000	DASNY	The Center for Discovery plans to add an additional 254 new jobs during 2009. Current economic conditions make the prospect of substantially reducing that number very real. It has become obvious that the creation of these jobs is tied to improved efficiencies in The Center?s facilities and operations. By making The Center?s facilities more energy efficient we will not be forced to scale back the number of new jobs created. Improved energy efficiency will directly support job retention and creation. Notonly will these improved efficiencies help to create jobs but they will save New York State significant money in future years. This proposal specifically seeks approximately $2,000,000 to improve the efficiencies of 6 school buildings. In addition to Included in this effort are improved lighting and controls, Geothermal HVAC Systems, Photovoltaic systems, and improvement of building envelopes through insulation and other weatherization projects. It is important to note that The Center for Discovery is lies and generous benefits package, The Center has become the employer of choice among many job seekers.
Sullivan	Center for Discovery School Roofs Project	$500,000	DASNY	The Center for Discovery plans to add an additional 254 new jobs during 2009. Current economic conditions make the prospect of substantially reducing that number very real. It has become obvious that the creation of these jobs is tied to improved efficiencies in The Center?s facilities and operations. By making The Center?s facilities more energy efficient we will not be forced to scale back the number of new jobs created. Improved energy efficiency will directly support job retention and creation. Notonly will these improved efficiencies help to create jobs but they will save New York State significant money in future years. This proposal specifically seeks approximately $500,000 to replace the roofs of 6 school buildings. These roofs have completedtheir useful lives and it is necessary to replace them in order to install a new roof mounted Photovoltaic System. In addition improvements to the building?s insulation will be made. It is important to note that The Center for Discovery is largest employous benefits package, The Center has become the employer of choice among many job seekers.
Sullivan	Hudson River Community Health	$1,300,000	DASNY	Five-Operatory Dental Suites at Monticello Health Center

County	Project	Requested $	State Agency	Additional Detail
Sullivan	Hudson River Health Care Monticello Health Center	$1,300,000	DASNY	Purchase, renovate and equip the building adjacent to Monticello Health Center to provide on-site oral health services through a 5 operatory dental suite, increasing access to dental care and improving the oral helath of the region's low-income population.
Sullivan	Hudson River Health Care Monticello Health Center - support letter	$1,300,000	DASNY	Purchase, renovate and equip the building adjacent to Monticello Health Center to provide on-site oral health services through a 5 operatory dental suite, increasing access to dental care and improving the oral helath of the region's low-income population.
Sullivan	Town Hall Renovation	$100,000	DASNY	Town Of Delaware Municipal Offices and Justice Courts The Town of Delaware is located in the western corner of Sullivan County. It is a small township with a population of approximately 2700 full-time residents. The town has a small tax base and is classified as a national reap zone due to high employment and poverty level. The township offices and justice courts have long been housed in a 1000 square foot building. The courts are located on the second floor of the building; therefore they are not handicapped accessible. The nature of the crimes tried in the court has changed over recent years. The crimes and offenders are more violent and the second floor courtroom does not offer a safe exit for courtroom staff and residents. The population of the town doubles in the summer and weekends,due to a large population of second homeowners, mostly derived from close proximity to metro New York City. Many of these homeowners utilize services such as the town clerk, tax collector and building inspector at theoms for the judges and lawyers which it currently does not have. In addition a separate modular building will be built next to the existing building to house the current offices. This infrastrure improvement will help to retain the eighteen current emploe space for future employees as the the town population continues to grow.
Sullivan	Sullivan County Public Safety Building	$0	DCJS	The Public Safety building would be constructed on the same site as the future Sullivan County Jail. This facility would be constructed to house 911 Emergency center, Emergency Operation Center, Emergency Management Offices, and Probation, in order to facilitate coordination between our emergency service providers and administration.
Sullivan	Emergency Training Center Classrooms & Upgrades	$1,000,000	DCJS	Emergency Training Center Classrooms & Upgrades
Sullivan	Materials Recovery Facility Expansion	$3,000,000	DEC	Includes the addition of 25,000 square feed of building with shredder/grinder (SWMP Compliant)
Sullivan	Materials Recovery Facility Paper Sort Line	$500,000	DEC	
Sullivan	Ferndale Transfer Station Modification	$150,000	DEC	This project is needed to fast track waste exportation
Sullivan	Flood Mitigation - Construction and Remediation	$5,000,000	DEC	These strategies would not only generate contract work but would retain main streets businesses and protect the long-term viability of self-employed business people and secondary job generate related to these enterprises. Downtown hamlets in Sullivan County need additional capital to counteract disinvestment and flood damage to private property. We should also consider this as part of our priorities because when the ACOE watershed study is done we will need to move to the construction and remediationstage based on the ACOE's H&H study.
Sullivan	Livingston Manor Senior Apartments - 28 Units Affordable Rental Housing	$5,402,212	DHCR	
Sullivan	Mountaindale Community	$8,000,000	DHCR	The Mountaindale Community is a 65-unit affordable housing community that will promote green-living and education through a co-operative structure. The project is located on a 300 acre site in Mountaindale, NY. Other benfits include evironmental rehabilitation of the site including a new lake, animal farm, and science center. The project is ready to be built but financing is not currently available in the private sector.
Sullivan	Livingston Manor Senior Apts.	$5,282,940	DHCR	LIHTC 9%

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Sullivan	Expand the Sullivan County Housing Rehab Program	$800,000	DHCR	An existing collaboration with Mamakating and Rural Sullivan Housing Corp. will create a pipeline of applicants and moderate rehab projects for low-income homeowners. Additional funding could continue and expand the pipeline beyond the $428,000 currently allocated. As the program gears up (first quarter of 2009), county could look at expanding the funding stream to other sub-recipients with capacity to deliver on units.
Sullivan	Energy Retrofit for the Sullivan Co Adult Care Center	$1,000,000	DHCR	Energy Retrofit for the Sullivan Co Adult Care Center
Sullivan	Establish a Vacant-Building Program	$3,500,000	DHCR	Establish a Vacant-Building Program

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Sullivan	South Road Improvement Project	$942,750	DOT	SOUTH ROAD IMPROVEMENT PROJECT CONSISTS OF THE IMPROVEMENT OF 2060 LF OF EXISTING VILLAGE STREET INCLUDING 14 CATCH BASINS, 2300 LF OF STORM SEWER, 1200 LF OF WATERLINE AND APPURTENANCES, 4120 LF OF CURBING, 1220 SY OF CONCRETE SIDEWALK, 5495 SY OF ROADMILLING AND ASPHALT IMPROVEMENT, 49,500 SF OF R.O.W. TOPSOIL SEEDING, LANDSCAPING INCLUDING 52 STREET TREES, INSTALLATION OF 5 TRAFFIC CONTROL SIGNS, PAVEMENT MARKINGS AND STRIPING.
Sullivan	High Street Improvement Project Phase I	$620,500	DOT	HIGH STREET IMPROVEMENT PROJECT PHASE I CONSISTS OF THE IMPROVEMENT OF 1800 LF OF EXISTING VILLAGE STREET INCLUDING 12 CATCH BASINS, 1850 LF OF STORM SEWER AND APPURTENANCES, 360 LF OF CURBING, 4800 SY OF ROAD MILLING AND ASPHALT IMPROVEMENT, 36000 SF OFR.O.W. TOPSOIL SEEDING, LANDSCAPING INCLUDING 45 STREET TREES, INSTALLATION OF 1 TRAFFIC CONTROL SIGNS, PAVEMENT MARKINGS AND STRIPING.
Sullivan	High Street Improvement Project Phase II	$333,500	DOT	HIGH STREET IMPROVEMENT PROJECT PHASE II CONSISTS OF THE IMPROVEMENT OF 820 LF OF EXISTING VILLAGE STREET INCLUDING 8 CATCH BASINS, 850 LF OF STORM SEWER AND APPURTENANCES, 1640 LF OF CURBING, 2190 SY OF ROAD MILLING AND ASPHALT IMPROVEMENT, 16425 SF OFR.O.W. TOPSOIL SEEDING, LANDSCAPING INCLUDING 21 STREET TREES, INSTALLATION OF 1 TRAFFIC CONTROL SIGNS, PAVEMENT MARKINGS AND STRIPING.
Sullivan	Highway and Bridge improvements	$24,797,500	DOT	Highway and Bridge improvements
Sullivan	RTE 17 @ PARKSVILLE ELIMINATION OF AT-GRADE INTERSECTIONS	$60,805,000	DOT	
Sullivan	Bridge Painting 15 Locations - Sullivan County	$2,073,000	DOT	
Sullivan	Rockland paving program	$940,000	DOT	15 miles road paving, 20 miles road sealing. After multiple years of severe flooding and exspense our roads and paving program have been set back to a point, that without outside funding, we will not be able to sustain a viable paving plan. This assistance would put us back on track with our paving plan and would allow us to sustain it with our own funds in the future.
Sullivan		$60,000	DOT	
Sullivan	Sewer Rehab Phase 2	$1,530,000	EFC	Rehab of Sewer system, shovel ready and needed
Sullivan	Sanitary Sewer Rehab Phase I	$1,820,000	EFC	We are upgrading our existing sewer system in 4 phases. This would be phase 1. We have the plans and can be ready to go quickly.
Sullivan	Sanitary Sewer Extension East	$3,000,000	EFC	Extend sewer east to Town line in Mongaup Valley.
Sullivan	Sewer Treatment plant upgrades	$800,000	EFC	Kauenonga Lake Sewer District Wastewater Treatment Plant upgrades
Sullivan	Sullivan County Airport Waterline Installation	$4,500,000	EFC	Sullivan County has a shovel ready industrial site located next to the Sullivan County International Airport, with the exception of potable water. This infrastructure would create jobs in its construction and would make the Airport Industrial Park verymarketable. This part could support manufacturing businesses (located directly next to an international airport) and provide much needed jobs to the area.
Sullivan	Solid Waste Facility Construction	$35,000,000	EFC	
Sullivan	Water Main Replacement (Dix Hills Water District)	$950,000	EFC	Water mains in the Dix Hills Water District are reaching the end of useable lifespan. Mains on Ingold Drive and DeForest Road should be replaced during current construction season.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Sullivan	Village of Bloomingburg Watsewater Treatment Facility	$11,360,000	EFC	VILLAGE OF BLOOMINGBURG 650,000 GPD WASTEWATER TREATMENT FACILITY INVOLVES THE CONSTRUCTION OF THE 650,000 GPD WASTEWATER TREATMENT FACILITY TO SERVICE THE EXISTING VILLAGE OF BLOOMINGBURG, CHESTNUT RIDGE, TOWN OF WALLKILL, ROUTE 17K AND ROUTE 17 COMMERCIAL/INDUSTRIAL CORRIDOR, TOWN OF CRAWFORD STONEHOUSE SCHOOL ROAD COMMERCIAL/INDUSTRIAL CORRIDOR. THESE INDUSTRIAL CORRIDORS HAVE THE POTENTIAL OF CREATING 3,000 JOBS ALONG WITH THE CONSTRUCTION OF 2 ½ TO 3 MILLION OF PRIVATE FUNDED DISTRIBUTION AND MANUFACTURING FACILITIES BUT HAVE LACKED THE INFRASTRUCTURE TO SERVICE THESE TYPES OF INSTALLATIONS. THIS PROJECT IS A MULTI-MUNICIPAL AND MULTI-COUNTY BENEFICIAL PROJECT.
Sullivan	Sewerline from Cantrell Road to Melody Lake Sewage Treatment Plant	$3,000,000	EFC	Extend a new 8"" sewerline approximately 10,000 LF along Cold Spring Road from Cantrell Road to Melody Lake. This project would support a large economic development project and a newly proposed housing projec
Sullivan	Expansion to the Emerald Green Sewage Treatment Plant	$15,000,000	EFC	The Emerald Green Sewage Treatment Plant is at, or near capacity. An expansion of the plant is necessary to support the existing and expanded district to serve economic development projects presently pending before the Planning Board.
Sullivan	Replace harris and Ben Moshe Pump Stations	$3,500,000	EFC	Reconstruct the existing Harris and Ben Moshe pump stations that were built in the 1970's. The pump stations are in need of constant repair with pumps, motors and controls requiring replacement.
Sullivan	Infiltration/Inflow Mitigation in all Town Sewer Districts	$2,500,000	EFC	Serious infiltration/inflow problems exist in all sewer districts of the town due to the age and condition of the sewage collection system. it is proposed to perform rehabilitation to the line to remove excessive infiltration/inflow and thereby preservecapacity at various sewage treatment facilities.
Sullivan	Upgrade to Sackett Lake Wastewater Treatment Plant	$750,000	EFC	The Sackett Lake Wastewater Treatment Plant is in a deteriorated condition due to the age and requires major rehabilitation.
Sullivan	Upgrade Melody Lake Sewer Plant	$1,000,000	EFC	The existing Melody Lake Sewer Plant is in need of major rehabilitation and is many times in violation of it's SPDES Permit. The grant would be used to reconstruct the existing outdated facility to support nearby economic development projects.
Sullivan	Sewerline Extension Holiday Mountain Park Project	$1,500,000	EFC	Sewerline extension including pump stations approximately 4000 LF along Holiday Mountain Road to serve a proposed indoor Water Park and Hotel. The system would connect to the existing Rock Hill Sewer District.
Sullivan	Potable Water Infrastructure to the SC International Airport	$3,500,000	EFC	The project entails the installation of a waterline and appurtenances from the Town of Liberty water supply system in Swan Lake along CR 14 and CR 183 to the Sullivan County International Airport. Sullivan County has a shovel ready industrial site located next to the Sullivan County International Airport, with the exception of potable water. This infrastructure would create jobs in its construction and would make the Airport Industrial Park very marketable. This park could support manufacturing businesses (located directly next to an international airport) and provide much needed jobs to the area.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Sullivan	Village Water Improvement Project	$3,297,000	EFC	THE INSTALLATION OF 5635 LF OF 8"" WATERMAIN 995 LF OF 12"" WATERMAIN 26 HYDRANTS 200 SERVICES INCLUDING FITTINGS, VALVING, ASSOCIATED ROAD REPAIR AND EASEMENT REPAIR DEVELOPMENT OF TWO WELLS AND CONSTRUCTION OF A PUMP AND TREATMENT FACILITY INCLDING CHLORONIZATION AND TELEMETER TO SERVICE THE VILLAGE OF BLOOMINGBURG RESIDENTS AND PROVIDE NEEDED ISO FIRE FLOW PROTECTI
Sullivan	AG Industrial Park & USDA Certified Read Meat Processing Facility	$1,890,000	ESD	One of the largest economic sectors in Sullivan County is Agriculture. The AG Industrial Park would provide a designated, shovel ready site that could host businesses to support the region's farms, such as the red meat processing facility
Sullivan	Economic Development Corp. Bldg	$2,000,000	ESD	This project involves the construction of 20,000 sq. ft of office space to house local economic development engines under one roof, creating a ""one-stop-shop"" and coordinating the efforts of these various organizations in growing Sullivan County's economic base and workf
Sullivan	Turnkey Facilities for Farmland Economic and Community Development	$2,600,000	ESD	Construction of turn-key buildings in addition to the red meat, such as a community kitchen, dairy processing, and distribution facility for farmer's goods to be delivered to restaurants and businesses in the county and metropolitan area will encourage business development. The buildings would be available; we would just need the operator's to start production. The need for local processing facilities to help farmers diversify to keep profit local are vital for our farms to survive. This not only would maintain, and increase employment, but would improve our tax base because of the cost of community services as well as creating jobs and businesses. Also buying local stimulates the local economy and is safe, secure and fresher than buying from afar.
Sullivan	Green Technology Park	$1,600,000	ESD	This project includes laying infrastructure, such as water, sewer, roads and utilities to develop a shovel ready site for environmentally and socially responsible businesses for sustainable development
Sullivan	Sullivan Co. Economic Development Corp Building	$3,000,000	ESD	Sullivan Co. Economic Development Corp Building
Sullivan	Agriculture and Light Industrial Park	$2,300,000	ESD	The Agriculture and Light Industrial Park consists of approximately 20 acres in Liberty, New York. The project is strategically positioned off of Exit 100 - New York State Route 17, which is soon to be designated as a federal highway, I-86. The new Agriculture and Light Industrial Park will consist of 5 shovel-ready sites with roads, water, sewer and three-phase power. The project lies within an approved Empire Zone boundary.
Sullivan	USDA Certified Red Meat Processing Facility	$1,660,000	ESD	The Red Meat Processing Facility, which will be an approved USDA processing center, has regional and inter-state economic impact on the local farmers, growers and artisan meat producers. The processing facility will be located within the USDA Regional Economic Area Partnership (REAP) Zone, which is a federally designated area of economic distress. The development of the Red Meat Processing Facility will enhance the local meat producer?s ability to compete in the global marketplace, create and retain rural jobs, enhance and preserve agriculture in the region and supply artisan meats to the NYC Metropolitan area enterprises, restaurants and businesses. Furthermore, the facility will also provide locally raised meats to the local grocers.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Sullivan	Green Technology Park (""G-Tec	$1,600,000	ESD	The northeast segment of the park will consist of six shovel-ready sites and the southwest area will consist of five shovel ready sites. The proposed development will utilize an ?interior street? that runs through each area complete with, water, sewer, three-phase power and fiber optic lines. The Green Tech Park project, which is an eco-industrial park focused on manufacturing sustainable construction products and alternative energy commodities, is fully anticipated to create sustainability for the building and trades industry within the region through training and certification focusing on Leadership in Energy and Environmental Design (LEED) for over two hundred architectural, general construction, electrical, and plumbing firms within the Region described above.
Sullivan	Sullivan County Economic Development Corporation	$3,000,000	ESD	The project includes the construction of a 20,000 square foot building with two major purposes. The first purpose would be to locate all economic development engines of the County, including the Partnership for Economic Development, the Industrial Development Agency, the Visitor?s Association, the Chamber of Commerce, and the Center for Workforce Development, in the same building. This will facilitate economic growth by creating a one-stop-shop for prospective businesses to obtain information and make necessary contacts. The second component of the building will be 10,000 square feet of space to be used as a business incubator. The County will be able to offer entrepreneurial firms a temporary location with office services shared by the tenants. Services would include support staff, office equipment and flexible leases. The goal would be to produce viable freestanding businesses.
Sullivan	Sullivan County Main Street Revitalization	$317,125	MAIN_ST	
Sullivan	New Highway Barn	$2,000,000	NYSERDA	Energy efficient componants for a new Highway Barn. We are shovel ready
Sullivan	Landfill Gas to Energy	$3,500,000	NYSERDA	Consists of two (2) generators/specs and plans ready; Title V air permit required
Sullivan	Sullivan County Government Center Lighting Retrofit	$65,000	NYSERDA	An existing analysis, performed in December 2008/January 2009 by representatives from GE, showed that the Government Center could be fitted with 3 lamp lighting fixtures (as opposed to the current 4 lamp), and replace all 32 watt T-8 lamps with 28 watt T-8 lamps for a cost of $62,000.
Sullivan	Geothermal Heating and Cooling for the Sullivan County Government Cente	$5,000,000	NYSERDA	A previous analysis performed in the mid 90s (1996 showed at the time that a geothermal system on the Government center was not cost effective, though it was thought that the County could see an annual savings of $50K. Given the rising cost of energy and the improvements made in geothermal technology, this imitative is becoming more cost effective and would reduce the County's carbon footprint, which would be progress on the adopted Green Initiative.
Sullivan	Center for Discovery Energy Efficiency Projects	$1,000,000	NYSERDA	The Center for Discovery plans to add an additional 254 new jobs during 2009. Current economic conditions make the prospect of substantially reducing that number very real. It has become obvious that the creation of these jobs is tied to improved efficiencies in The Center?s facilities and operations. By making The Center?s facilities more energy efficient we will not be forced to scale back the number of new jobs created. Improved energy efficiency will directly support job retention and creation. Notonly will these improved efficiencies help to create jobs but they will save New York State significant money in future years. This proposal specifically seeks $1,000,000 to improve the efficiencies of 34 individual residences, 2 medical facilities, and6 programmatic facilities. Included in this effort are improved lighting and controls, improved Heating, Ventilation, and Air Conditioning Systems, and improvement of building envelopes through insulation and other weatherization projects. It is importanardy. Due to its extremely competitive salaries and generous benefits package, The Center has become the employer of choice among many job seekers.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Sullivan	Center for Discovery Plug-in Hybrid Vehicle Project	$240,000	NYSERDA	The Center for Discovery plans to add an additional 254 new jobs during 2009. Current economic conditions make the prospect of substantially reducing that number very real. It has become obvious that the creation of these jobs is tied to improved efficiencies in The Center?s operations. By making The Center?s operations more energy efficient we will not be forced to scale back the number of new jobs created. Improved energy efficiency will directly support job retention and creation. Not only will improving vehicle efficiencies help to create jobs but they will save New York State significant money in future years. This proposal specifically seeks approximately $240,000 to purchase 6 plug-in hybrid vehicles. These vehicles directly support the Center?sprograms for children and adults with disabilities and their use supports its Environmental Policies. In addition to supporting The Center?s programs and job growth, use of these vehicles will save NY State money in future years. It is important to noteto its extremely competitive salaries and generous benefits package, The Center has become the employer of choice among many job seekers.
Sullivan	Center for Discovery Alternative Fueled Vehicles Project	$550,000	NYSERDA	The Center for Discovery plans to add an additional 254 new jobs during 2009. Current economic conditions make the prospect of substantially reducing that number very real. It has become obvious that the creation of these jobs is tied to improved efficiencies in The Center?s operations. By making The Center?s operations more energy efficient we will not be forced to scale back the number of new jobs created. Improved energy efficiency will directly support job retention and creation. Not only will improving vehicle efficiencies help to retain jobs but they will save NY State significant money in future years. This proposal specifically seeks approximately $550,000 to purchase 4 propane powered lift vans and 3 propane powered pick-ups and necessary fueling equipment. These vehicles directly support the Center?s programs for people with disabilities and their use supports its Environmental Policies. Use of these vehicles will save NY State money in future years. This fleet will expand in the future. Itwth in jeopardy. Due to its extremely competitive salaries and generous benefits package, The Center has become the employer of choice among many job seekers. This proposal specifically seeks approximately $400,000 to purchase 4 propane powered lift vansed pick-ups. These vehicles directly support the Center?s programs for people with disabilities and their use supports its Environmental Policies. Use of these vehicles will save NY State money in future years. This fleet will expand to more vehicles in
Sullivan	Sullivan Co. Landfill Gas to Energy Facility	$3,500,000	NYSERDA	Sullivan Co. Landfill Gas to Energy Facility

County	Project	Requested $	State Agency	Additional Detail
Sullivan	New York State Solar Farm	$19,000,000	NYSERDA	New York State Solar Farm Inc, is final stages of permitting with Sullivan County to delelop a 3MW solar farm on the county landfill. This will create 96 construction jobs and 15 fulltime jobs, and lead our country off there dependance of fossil fuels. NEW YORK STATE SOLAR FARM Project Description Background Various economic, political, and environmental factors have created the need for the United States (and New York State) to become environmentally responsible in the search for energy solutions, which accomplish three major objectives. These include: ? Developing a mores sustainable, non-carbon emitting energy base, which will not further the potential for global warming. ? Improving our energy security and interdependence, and reducing our economicdependence on foreign oil. ? Developing alternative localized energy options that provide a stimulus to our current economic situation. ? Reducing respiratory and other health/environmental impacts caused by pollution-generating energy sources. New Yorkltaic (PV) energy generation. Currently, there are no solar farms in New York State, and no firms that have taken the risk to be the first utility-scale provider. It is NYSSF?s intent to be the first utility-scale provider of solar energy in New York StaYork State Public Service Commission adopted a policy to promote renewable energy, known as the Renewable Portfolio Standard (RPS). The RPS set the standard of achieving a goal of 25% renewable energy by 2013. Currently, only 19 percent of New York Stat
Sullivan	Broadband Access to Sullivan County Airport	$40,000	OFT	Broadband access is on its way to becoming as vital to a business's success as traditional infrastructure, such as water and wastewater infrastructure. It is critical to have broadband available to make the Airport Industrial Site competitive.
Sullivan	IP Radio Upgrade	$300,000	OFT	This project is meant to improve communications between our emergency service providers in Sullivan County. The design of this upgrade is complete, vendors are lined up who need to do the work, and now need the Time Warner site approval completed by their field staff and legal department.
Sullivan	Center for Discovery Electronic Medical Records Project	$375,000	OFT	The Center for Discovery plans to add an additional 254 new jobs during 2009. Current economic conditions make the prospect of reducing the number of nurses hired very real. It has become obvious that the creation of these jobs is tied to improved efficiencies in The Center?s operations. By making The Center?s programs for people with disabilities more efficient we will not be forced to scale back the number of new jobs created. Improved efficiency will directly support the continued creation of 4 new nursing positions. Not only will improving efficiencies help to retain jobs but they will save NY State significant money in future years. This proposal specifically seeks approximately $375,000 to implement an Electronic Medical Records System with Telemedicine capabilities. This project will allow The Center to preserve 4 planned nursing positions. Not only will this project make The Center?s record keeping more efficient but it will also greatly improve patient safety and be a model for the rest of NYf growth in jeopardy. Due to its extremely competitive salaries and generous benefits package, The Center has become the employer of choice among many job seekers.
Sullivan	Internet Protocol Radio System	$300,000	OFT	Internet Protocol Radio System
Sullivan	FireHouse	$500,000	OHS	Addition to current building to house apparatus as well as a health center for firefighters. And to be able to provide emergency shelter for a town-wide or greater disaster.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Sullivan	New Fire Station Construction	$400,000	OHS	The Highland Lake FD is a small rural fire department located in Sullivan County. We are comprised of approx. 25 members. We are seeking funding for construction of a new fire station structure. Our current facility is very old and barely fits our fire equipment. The building does not meet existing building codes and due to our lot size limitations cannot be modified. We currently own a building lot that would meet all of our future needs. We receive limited funding from our Township which barely coverbasic costs. We have been trying to raise money through fund raisers for several years, but this is limited. Any funding assistance for us would be greatly appreciated.
Sullivan	Firehouse Construction	$2,500,000	OHS	If we were to receive funding from this grant we would replace our current building which we have been in since 1940. This building despite multiple modifications is no longer able to accomodate the apparatus that is standard in today's fire service. Allof our apparatus has to be customized to fit our building's size constraints leading to higher vehicle costs. With a new building, the money that has been going to make our vehicles fit our building could be better spent elsewhere.
Sullivan	Relocation of Fire Station	$725,000	OHS	The relocation of the Fire Station outside of the flood zone in Roscoe, NY. We have secured a grant to partially fund this project. Unfortunately with the repeated flooding to our community, the taxpayers just cannot afford to fund the remainder of thisproject. The firehouse has suffered significant water damage in which records and equipment were lost. The firefighters had to deal with personal property damage of their own, as well as trying to save what they could at their firehouse with each flood event. The 80 year old firehouse is a building which just does not meet the needs of the town. Trucks are bigger and there is more mandatory equipment used in firefighting. The fire trucks are stacked, one behind another, due to the limited size of the building. This is a significant safety concern in the event of a call because if the first truck doesn?t start, no trucks are responding. Not only will the relocated fire station benefit the firefighters and Auxiliary members by giving them a safe and effe
Sullivan	Sullivan County Jail	$80,000,000	OHS	Sullivan County is mandated to construct a new correctional facility (State mandate). The $80 million cost of the facility includes the design and construction of 146,213 square feet of facility space to accommodate 256 cells, 352, beds and the necessary support facilities such as kitchen's, classrooms, rec areas, etc. The facility will be constructed to accommodate 2 additional housing pods to being the total capacity of the facility to 484 beds, if such expansion is ever warranted.
Sullivan	New Fire Station & Community Center	$4,000,000	OHS	Our Village & surrounding fire protection district is in dire need of a new and larger fire station with an attached community hall. The hall will also be utilized as an evacuation/housing center during any public emergencies and/or disasters.
Sullivan	JFD Recon and Improvement	$233,250	OHS	Reconstruction and improvement to a 60 plus year old fire hall and enlargement of apparatus truck room. The fire hall would include insulating 3,700 sq. ft. concrete block walls and installing wainscoating and paneling, placing a new 5,600 sq. ft. drop ceiling with insulation, Replacing 10 steel- masonary chicken coop type windows with new insulated glass windows,Replacing 2 steel exit doors and associated panic hardware, Adding a propane hot air heating system. A 235 sq. ft. enlargrment of the apparatus truck room, moving a stairway, adding a drop ceiling and a clean air sysem to remove truck exhaust fumes. changing 10 wood frame windows to insulated glass windows. This project will make our building more heat efficient and more accessable for our school children and public during times of natural or national disasters.

Tioga	V. of Waverly Downtown Revitalization Program	$553,000	CDBG	
Tioga	Village of Candor Water Project	$600,000	CDBG	The proposed project fixes serious deficiencies in our water system. Specifically, it replaces 18 inoperable fire hydrants, installs 6 new hydrants, installs one emergency generator, provides electrical systems to control water levels & pump operations,and replaces 5,000 feet of old water main. The Village has applied for this as Community Development Block Grant funds several times in the past without a project award. We are going to complete SEQR shortly and can mobilize to have this work ready to bid in less than 180 days.
Tioga	Drinking Water Supply System Upgrade	$0	CDBG	Upgrades to the Village of Candor's drinking water supply system with essential renovations and additions.
Tioga	New Village Hall	$1,900,000	DASNY	Purchase and renovation of 32 Ithaca St.(former school) for use as Village Administration, Police Dept., Court, Recreation, and Community Room and future space allocated for leasing to other community service providers. Project will include major renovations to the mechanical, plumbing and electrical systems. Will also include roof replacement, insulation, fascia repair, new interior finishes, interior lay out modifications, window upgrades and security improvements to the existing building.
Tioga	Hiring of 2 entry level police officers	$377,000	DCJS	Due to budget cuts and other restraints, the Village of Owego Police operating with seven (7) full time police officers and one chief. This creates a problem with days off, sickness and vacation. We have attempted to fill the gap with part-time officers.In 2008 the Village Board started the intiative to hire additional full time officers over a three year period. this would enable the Village to manage the level of necessary tax increased each year. The requested monies would allow us to hire 2 full time officers (with benefits). The Village is intending to maintain a nine officer's force plus one Chief in the future.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tioga	Fire Figher's Equipment	$129,500	OHS	Purchase 20 sets of turn out gear that is old, heavily worn with holes and burn's. Purchase 10 air packs and bottles that are out of date and some not working properly. 85 pagers to provide critical communication link for the volunteer fire fighters. These pagers are used to notify the firefighters when there is an emergency and need to work properly. 4 Automatic External Defibrillators (AED). The new NFPA standards for 2009 require all fire apparatus to be equiped with AED. We currently have five fireapparatus and only one AED.
Tioga	Fire Training Facility	$2,000,000	OHS	The Fire Training Facility will be used to train fireman and police officers. This facility will have a burn system that will allow training under hazardous conditions. The land has been acquired and the foundation has been poured. The total cost of theproject is $2,250,000.00. The Fire Department raised $125,000.00 and received a $125,000.00 federal. grant. We are requesting the money to complete the project. The contractors will be local and the project will help to stimulate the local economy.
Tioga	New Fire Station1	$280,000	OHS	Construction of a new fire station #1. The Apalachin Fire District has outgrown the current fire station 1. We have no room to allow for future growth. A larger and more modern station will allow us to accommodate these future needs. A new fire station will allow us to provide better service to the residents now and into the future.
Tioga	Electronic Livescan Fingerprint Submission Equipment	$29,440	OHS	The NYS Division of Criminal Justice Services has directed that, effective January of 2010, Law Enforcement agencies must transmit fingerprint submissionsvia livescan/card scan devices which meet minimum standards. The Village of Owego Police Departmentdoes not currently have access to any livescan equipment and does not anticipate having any financial resources available to fund this mandated equipment. If funds are received, Officers and clerical staff will be able to comply with State mandates.
Tioga	Youth Services Officer	$559,500	OHS	The Village of Owego Police Department seeks to expand its Police force by hiring three (3) new officers. One position would be primarily assigned to School Resource, Youth Court, Juvenile intervention activities. The two remaining positions would be assigned to a newly created Nieghborhood Stabilization Unit tasked with maintaining active Community Policing activities in the municipality. We anticipate that the hiring of these three positions would result in an immediate 40-70% reduction in youth violence, and would significantly reduce juvenile quality of life problems while increasing community interaction.
Tioga	Court Security Officer	$12,500	OHS	Due to recent Courtroom related violence, the Owego Police Department, in cooperation with the Village Court seeks to obtain funding for a Court Security Officer. These funds would provide overtime monies allowing the Department to provide one (1) PoliceOfficer stationed in the Courthouse during active Court sessions or special judical events.
Tioga	Historic Building renovation	$350,000	OPRHP	The current Police Department/Justice Building is housed in a building listed as a historic building. This funding would be utilized to bring the structure up to building code compliance. Local construction trades would be utilized for constrution efforts which would focus on ""green technology"" in areas of weatherization, and energy efficiency. It is anticipated that energy cost would be reduced by 50% and that the building would be Americans with Disabilities compli

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tioga	River Walk Project	$100,000	OPRHP	The Village of Owego has secured funding to design and construct the Owego River Walk Project, which involves developing walking trails, stabilizing the river bank, stopping bank erosion and protecting the sewer interceptor line, which runs along the Susquehanna River behind Front Street. The project is shovel ready and in progress. We will be submitting requests for bids by end of March 2009.
Tioga	Tioga Central School District, Nichols Elementary	$1,536,735	SED	
Tioga	Tioga Central School District, K/12 Bldg.(Fmly SHS/MS/Elem)	$7,814,452	SED	
Tioga	Tioga Central School District, Old Garage Building	$304,029	SED	
Tioga	Tioga Central School District, New Bus Garage	$6,344,784	SED	
Tompkins	T. of Dryden Rehabilitation Program	$400,000	CDBG	
Tompkins	T. of Enfield Housing Rehabilitation Program	$400,000	CDBG	
Tompkins	T. of Groton Housing Rehabilitation Program	$400,000	CDBG	
Tompkins	T. of Newfield Housing Rehabilitation	$400,000	CDBG	
Tompkins	City of Ithaca - Public Water and sewer Infrastructure - 510 & 600 First stree	$175,000	CDBG	Install Emergency Generator & Transfer Switch, upgrade electrical service panels, necessary writing, etc.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure- Cornell Street Steel	$300,000	CDBG	Painting & Cathodic Protection System replacement, Miscellaneous Steel Repairs, Access ladder, vent, and overflow replacement. Security fencing.
Tompkins	Town of Ithaca - Public Water and Sewer Infrastructure - Water Tank Repair	$500,000	CDBG	Protect public investment with proper and timely maintenance on water tanks in various areas through the town.
Tompkins	Park and Playground Initiative	$293,900	DASNY	Funding will initiate Phase One of our Recreation Master Plan. The requested funds cover the expense of 4 new playgrounds (old ones are hazardous and need removal/replacement) and the construction of two to three ball fields. Currently, no public fieldsare available to residents. Funds for restroom facilities are included in the request. All construction and improvements will be conducted on land already owned and managed by the Town of Dryden or one if it?s Community Centers. These projects just needto go out to bid to contractors who can break ground as soon as it thaws and put people to work right away. Investing in park infrastructure is vital to the health and well being of communities. This project provides jobs now and will continue to contribute to economic growth in the Town of Dryden. The Town of Dryden is the largest municipality (land wise) in Tompkins County and one of the largest in the State of New York. We need to be able to provide quality of life services in all areas of town to re
Tompkins	Tompkins County - Higher Education - Installation of Electrical Panels - Tom	$1,700,000	DASNY	Replace 69 electrical panels serving the entire TC3 campus. The panels are 30 years old and in need of replacement. Replacement is necessary because the original manufacturer is no longer in business and parts for the panels are difficult, if not virtually impossible to find, and if found they are very expensive.
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Court House Building U	$745,000	DASNY	Court House Improvements Windows and HVAC, funded required by state court system.
Tompkins	City of Ithaca - Public Safety/Emergency Response Facilities - Installation c	$200,000	DASNY	Purchase and installation emergency natural gas generator at the Greater Ithaca Activity Center facility, allowing it to serve as an emergency shelter site.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Ithaca Area Wastew	$1,400,000	DASNY	Building addition to provide adequate space for laboratory, records storage, meeting, and administrative work stations. Project incorporates building energy efficiency and access improvements for persons with disabilities.
Tompkins	Town of Ithaca - Energy Efficiency - Public Buildings - Town Hall Roof Repla	$250,000	DASNY	Replace leaking roof and evaluate photovoltaic potential

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Tompkins	Athletics and Events Center	$67,500,000	DASNY	The Athletics and Events Center is a multiple use facility consisting of a large indoor track and field that can be used for athletic as well as non athletic events such as indoor commencement, concerts and major speakers. The building will also containan aquatics center, which will house the College's only indoor swimming facility. An outside all weather lighted turf playing field and tennis courts will be part of the project as well. The College has literally needed an athletics and events center forthe last forty years, but external funding to make it possible has only recently become a reality.
Tompkins	Job Hall Renovation	$3,500,000	DASNY	Job Hall is one of the College's oldest buildings having been constructed in the early 1960's and will be renovated to become the College's Center for Information Technology Services. It will house personnel and equipment to meet the need for both academic and adminstrative technology services.
Tompkins	Renovation of Dillingham Center	$5,000,000	DASNY	Complete renovation of the College's Center for the Performing Arts. The building is over 40 years old and both the interior and exterior of the building need to be renovated. Work on approximately half of the project was completed in 2008. The remainingportion is shovel ready for work to begin in the spring of 2009.
Tompkins	Town of Danby - Danby Fire Station	$600,000	DASNY	Construction a new addition and make renovations to the Danby Fire Station.
Tompkins	Town of Dryden - Highway Dept. Garage	$84,255	DASNY	install insulation in the roof and replace the water boiler.
Tompkins	City of Ithaca - Public Safety/Emergency Response Facilities - Hire 6 City P	$720,000	DCJS	Two-year funding to hire 6 additional police officers to meet staffing drmands at 60,000 per officer.
Tompkins	City of Ithaca - Public Safety/Emergency Response Facilities - Ithaca Police	$40,000	DCJS	Purchase video-based interactive training system for Ithaca Police Department.
Tompkins	Tompkins County - Solid Waste Recycling - Single Stream Recycling	$2,500,000	DEC	Improve the county's recycling center to allow single stream recycling, enable a 75 % reduction in the amount of waste going to landfills by 2015.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure Watershed Monitoring	$30,000	DEC	Provide the necessary maintenance costs, staffing, and equipment to enhance sampling and analytical methods and procedures for monitoring water quality within the water supply and watershed.
Tompkins	City of Ithaca - Flood Control/Mitigation - Permanent off-shore dewatering s	$5,000,000	DEC	Design and construct a permanent dewatering site/ constructed wetlands to contain the dredged material from the Flood Control Channel and associated waterways. This project would allow for the routine and necessary maintenance of the waterway and wouldprovide additional recreational, environmental, economic and aesthetic benefits to the city.
Tompkins	City of Ithaca - Green Jobs - Finger Lakes Reuse Expansion	$320,000	DEC	Expand Finger Lakes Reuse, Inc. salvage and resale operations, including household goods, building deconstruction and architectural salvage, thereby diverting useful items from the waste stream and creating jobs.
Tompkins	City of Ithaca - Transportation Infrastructure - Cliff St (Rt 96) Retaining Wall	$520,000	DEC	Design and reconstruct aged retaining wall on east side of the lower part of Cliff street (Rt 96).
Tompkins	Village of Groton - Flood Control/Mitigation - Water Release Control	$500,000	DEC	Improve dam and creek streams that cross Pleasant, Williams, and Church streets
Tompkins	Water release control	$500,000	DEC	Water release control

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Tompkins	Finger Lakes ReUse Center & Deconstruction Services	$150,000	DEC	Finger Lakes ReUse, Inc. opened a non-profit ReUse Center in November 2008 and is offering a Deconstruction service to Tompkins County and the Finger Lakes/Southern Tier regions beginning in April 2009. We are committed to reducing waste, teaching job skills with the salvaged materials, and providing material support to low-income families. We are creating living wage green jobs, and have leveraged support from individuals, foundations, and local and federal governmental agencies, although we expect tobe largely self-sufficient through sales of materials and services within 5 years. Since September 2008 we have created 6 FTE jobs, and will provide 6 or more FTE positions before the end of 2009. We received a Deconstruction grant from the Appalachian Regional Commission, and have support from Tompkins County Solid Waste. Although based in Ithaca, we have been active in our outreach to the surrounding areas. Our Deconstruction Coordinator recently returned from Deconstruction training in North Carolina
Tompkins	Weatherization Grant Program	$100,000	DHCR	The Town of Dryden currently operates a weatherization grant program. Current funding levels allow us to assist up to 20 homeowners obtain energy audits and perform weatherization and energy efficiency upgrades to their homes. If the Town of Dryden wereto receive funding for home weatherization under the stimulus package we could increase the maximum grant amount available to applicants from $1500 to $3000 (or more) and substantially increase the number of homeowners and residents served by the program. We would expect this increase in funding to have a positive impact on the employment levels of local contractors and tradesmen.
Tompkins	Fountain Manor	$2,431,341	DHCR	LIHTC 9%
Tompkins	Newfield Garden Apts.	$1,708,313	DHCR	LIHTC 9%
Tompkins	Tompkins County - Low-Moderate Income Housing Construction/Rehabilitat	$50,000,000	DHCR	Construct 200 units of low to moderate income and special needs housing and rehabilitate 200 units of low-income and senior housing based on a 2008 survey of all local housing agencies
Tompkins	City of Ithaca - Energy Efficiency - Housing - Low Moderate Income Housin	$400,000	DHCR	Rehabilitate 16 owner-occupied homes, including energy efficiency improvements and weatherization.
Tompkins	City of Ithaca - Low-Moderate Income Housing Construction/Rehabilitation	$220,000	DHCR	Construct 4 affordable rental housing units for low-income families. ($220,000) to meet HUD determined affordable housing storage/need
Tompkins	City of Ithaca - Low-Moderate Income Housing Construction/Rehabilitation	$140,000	DHCR	Renovate the 11 bed Court street emergency shelter for homeless persons, including energy efficiency improvements
Tompkins	City of Ithaca - Low-Moderate Income Housing Construction/Rehabilitation	$600,000	DHCR	Construct 8 energy star certified affordable rental housing units for low-income households.
Tompkins	City of Ithaca - Low-Moderate Income Housing Construction/Rehabilitation	$600,000	DHCR	Rehabilitate 24 homes owner-occupied homes, including energy efficiency improvements and weatherization.
Tompkins	City of Ithaca - Low-Moderate Income Housing Construction/Rehabilitation	$600,000	DHCR	Construct 12-bed homeless housing SRO with supportive services for this vulnerable population.
Tompkins	Agencies and Authorities within Tompkins County - Protecting The Vulnerab	$650,000	DHCR	Perform energy audits and improve energy efficiency of housing units of low-income households.
Tompkins	Agencies and Authorities within Tompkins County - Protecting The Vulnerab	$3,000,000	DHCR	Perform energy audits and improve energy efficiency of housing units of low-income households.
Tompkins	weatherization/energy efficiency - support letter	$0	DHCR	Cornell Cooperative Extention of Tompkins County energy efficiency/renewable energy education and outreach actions
Tompkins	Tompkins County - Information Technology - Health Information Technology	$225,000	DOH	Implement a full service electronic medical records (EMR) system to further ensure quality clinical care, case management, and day services to our local citizens with mental health challenges. This is a ready-to-go project in that these preliminary steps have been completed: Business Process Analysis of all operations (December 2008); Requests for Quotes from multiple EMR vendors (January 2009); and utilization review of electronic billing, scheduling and progress notes over the past 4 years.

Tompkins	Tompkins County - Airport Infrastructure - Building Expansion	$250,000	DOT	Add operations office on airside of Crash, Fire and Rescue building to allow operations staff to better monitor weather and field conditions
Tompkins	Tompkins County - Airport Infrastructure - Storage Facility	$1,200,000	DOT	Construct sand storage building to replace current limited capacity storage facility that can be strained in major snow events.
Tompkins	Reconstruct or replace 11 bridges and culverts throughout the county that a	$6,180,000	DOT	Reconstruct or replace 11 bridges and culverts throughout the county that are in immediate need of repair.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tompkins	Paint 12 bridges to prevent deterioration	$880,000	DOT	Paint 12 bridges to prevent deterioration
Tompkins	Reconstruct 2 miles of Hanshaw Road as a multi-modal route with bicycle	$4,800,000	DOT	Reconstruct 2 miles of Hanshaw Road as a multi-modal route with bicycle pedestrian and transit facilities
Tompkins	Reconstruct 3.1 miles of Coddington Road	$11,668,000	DOT	Reconstruct 3.1 miles of Coddington Road
Tompkins	Reconstruct 1.4 miles of East King Road	$3,145,000	DOT	Reconstruct 1.4 miles of East King Road
Tompkins	Bring all county road signs on the Federal highway system into compliance	$150,000	DOT	Bring all county road signs on the Federal highway system into compliance with federal reflectivity requireme
Tompkins	Reconstruct 2 miles of Ellis Hollow Road	$4,844,000	DOT	Reconstruct 2 miles of Ellis Hollow Road
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Stewart Avenue Bric	$250,000	DOT	Replace 825-LF of 8"" sewer collector from Edgemoor to Buffalo, including Stewart Avenue Bridge crossi
Tompkins	City of Ithaca - Transportation Infrastructure - Cayuga Waterfront Trail - Pha	$500,000	DOT	Augment construction budget for existing federal-aid transportation project to construct a multi-use trail from the Farmers Market to Stewart Park, the Chamber of Commerce and the Youth & Visitors centers to provide a green alternative to vehicle use. (Total Project Cost Est.: $1,220,000)
Tompkins	City of Ithaca - Transportation Infrastructure - Collegetown Traffic signal Re	$200,000	DOT	Replace and upgrade traffic signal that is the oldest in the city and outmoded at the city's busiest pedestrian intersection at the intersection of college Avenue and Dryden Road. Design and construction pedestrian enhancements at the intersection. city of Ithaca funding included in total project cost. (Total Project Cost Est.: $225,000)
Tompkins	City of Ithaca - Public Water and sewer Infrastructure - 510 & 600 First stree	$910,000	DOT	Stormwater quality improvements for DPW materials storage & handling yard. Pedestrian traffic improvements with sidewalk to be added along the entire 400 Block of Franklin street, to include trees, tree lawn, and plantings.
Tompkins	City of Ithaca - Transportation Infrastructure - American with Disabilities Act	$1,000,000	DOT	Design and construct ADA improvements in various locations on federal-aid eligible streets in the City of Ithaca, notably those lacking curb cuts.
Tompkins	City of Ithaca - Transportation Infrastructure - Aurora St Bridge over Cascac	$1,687,500	DOT	Rehabilitate bridge now on DOT's deficient bridge list and with a condition rating of 4.574.
Tompkins	City of Ithaca - Transportation Infrastructure - Cecil A. Malone Dr. over Floo	$2,800,000	DOT	Replace bridge and widen for commercial truck traffic (only access for industrial park), pedestrian and bicycle use.
Tompkins	City of Ithaca - Transportation Infrastructure - Columbia Street Pedestrian B	$400,000	DOT	Augment construction budget for TEP project to add enhancements to bridge and pedestrian approaches for a significant pedestrian connection that is deteriorating to the point of holes in the walking surface. Note: if TEP funds not awarded, total cost increases to $1.472M. City of Ithaca and Cornell University monies leveraged. (Stimulus Request $400,000 Total Project Cost Est.: $1,472,000
Tompkins	City of Ithaca - Transportation Infrastructure - Cornell St and Giles Street Si	$607,100	DOT	Design and construct sidewalk one block to the north and one block to the south of East State Street (Rte. 79). Pedestrian and bicycle improvements at the signalized intersection. This project would create much requested sidewalks that connect homes topublic schools.
Tompkins	City of Ithaca - Transportation Infrastructure - East State Street Reconstruct	$4,390,100	DOT	Design and reconstruct East State Street (Rt 79), from Mitchell St (Rt 366) to East City Line. Project includes sewer upgrades and widening of street for bicycle lanes and sidewalks.
Tompkins	Floral Ave (Rt 13A) Mill & Pave and Sidewalk Construction	$608,000	DOT	Floral Ave (Rt 13A) Mill & Pave and Sidewalk Construction
Tompkins	City of Ithaca - Transportation Infrastructure - Giles Street Sidewalk and Up	$1,520,000	DOT	Design and construct sidewalk on the south side of Giles street from upper to lower entrance to Wildflower Preserve. Citizens have called for this for years. It is a popular pedestrian route without sidewalks and has significant traffic between East and South.

County	Project	Requested $	State Agency	Additional Detail
Tompkins	City of Ithaca - Transportation Infrastructure - Hector Street Multi-Modal Imp	$2,280,000	DOT	Design and construct sidewalk on east side of Hector Street from Vinegar Hill Rd to west City Line; install uphill bicycle lane and improve bus stops. This key project is located on a busy state route where there are no stops. This key project is located on a busy state route where there are no sidewalks. New housing is being constructed uphill in the town of Ithaca with pressures for pedestrian access that will increase potential for unsafe conditions.
Tompkins	Old Elmira Road Multi-modal Improvements	$921,200	DOT	Old Elmira Road Multi-modal Improvements
Tompkins	City of Ithaca - Transportation Infrastructure - Route 13 Pedestrian Crossing	$400,000	DOT	Augment construction budget for existing federal-aid Transportation Enhancement Program project to cover pedestrian gates at existing railroad crossings. Administrative law hearing required. This is a part of a key project to create pedestrian safe access to very popular destinations across a state highway. (Total Project cost est.: $1,156,000)
Tompkins	City of Ithaca - Transportation Infrastructure - Six Mile Creekwalk Phase 3	$3,898,000	DOT	Design and construct walkway along Six Mile Creek between Cayuga St and Rt 13; design and construct pedestrian bridge over creek near Rt 13.
Tompkins	City of Ithaca - Transportation Infrastructure - South Cayuga Street Bridge c	$2,050,000	DOT	Rehabilitate bridge and replace desk that is in deteriorating condition
Tompkins	City of Ithaca - Transportation Infrastructure - Spencer Road Sidewalk Cons	$8,892,000	DOT	Design and construct approximately 13,000 linear feet of sidewalks, which currently do not exist, on both sides of Spencer Road from the roundabout to Buttermilk Falls.
Tompkins	Steward Avenue Brick Pavement Reconstruction	$880,000	DOT	Steward Avenue Brick Pavement Reconstruction
Tompkins	City of Ithaca - Transportation Infrastructure - Traffic Signal Upgrade Phase	$1,432,600	DOT	Interconnecting 26 traffic signals into one Advanced Traffic Management System (ATMS). This upgrade would synchronize signal timing, thereby reducing vehicle idling and greenhouse gas emissions.
Tompkins	City of Ithaca - Transportation Infrastructure - University Avenue Reconstruc	$2,733,900	DOT	Design and reconstruct University Avenue from Linn Street to Lake Street. Includes pedestrian, bicycle, transit and utility improvements as well as retaining walls for a road that has significant deterioration.
Tompkins	Town of Caroline - Food Control/Mitigation - Box Culvert for Ekroos Road	$500,000	DOT	Construct new box culvert to replace current culvert that is insufficiently sized to mitigate flood problems and prevent hazardous conditions.
Tompkins	Town of Danby - Public Water and Sewer Infrastructure - Danby Highway D	$450,000	DOT	Construct detention area to mitigate ongoing damage to adjacent federal and state wetlands, underlying aquifer, and Upper Buttermilk Creek watershed. State funding limitations related to the Department of Environmental Conservation (DEC) Environmental Protection Fund Water Quality Improvement Program have curtailed our successful application.
Tompkins	Bald Hill and Station Roads are the connecting roads for the hamlet of Danl	$890,000	DOT	Bald Hill and Station Roads are the connecting roads for the hamlet of Danby and west Danby both in the Town
Tompkins	Reconstruct road to match bridge repair replace aged water pipes on Fores	$350,000	DOT	Reconstruct road to match bridge repair replace aged water pipes on Forest Home Drive.
Tompkins	Forest Home Traffic Calming	$300,000	DOT	Forest Home Traffic Calming
Tompkins	Bicycle/Pedestrian Path multipurpose path from Hanshaw to Pleasant Grov	$200,000	DOT	Bicycle/Pedestrian Path multipurpose path from Hanshaw to Pleasant Grove on Blue Grass Lake.
Tompkins	Trumansburg RoadNew Sidewalk	$1,000,000	DOT	Trumansburg RoadNew Sidewalk
Tompkins	Pine Tree to Dryden Town line on Snyder Hill Road Road Reconstruction/Si	$500,000	DOT	Pine Tree to Dryden Town line on Snyder Hill Road Road Reconstruction/Sidewalk
Tompkins	Hanshaw Road Walkway Extension	$200,000	DOT	Hanshaw Road Walkway Extension
Tompkins	Construct box culvert for three small bridges at Baken Avenue South Main	$135,000	DOT	Construct box culvert for three small bridges at Baken Avenue South Main Street and Walpole Road to address
Tompkins	Construct new box culvert for ekroos road Flood Control/Mitigation	$500,000	DOT	Construct new box culvert for ekroos road Flood Control/Mitigation
Tompkins	Improvements to bald Hill and Station roads	$890,000	DOT	Improvements to bald Hill and Station roads
Tompkins	Repl bridge on Yellow Barn road with concrete box culvert	$150,000	DOT	Repl bridge on Yellow Barn road with concrete box culvert
Tompkins	Construct box culvert for 3 small bridges	$135,000	DOT	Construct box culvert for 3 small bridges

County	Project	Requested $	State Agency	Additional Detail
Tompkins	Buttermilk State Park - Bridge Repairs	$500,000	DOT	This Transportation Enhancement Project is supported by NYSDDOT Commissioner Glynn. The project involves the rehabilitation of the main access bridge to Buttermilk Falls State Park, located in Ithaca, NY. The bridge, which is in a deteriorated condition,provides public access (vehicles, pedestrians, and bicycles) to the park including its historic swimming area, gorge hiking trails, and public campground.
Tompkins	Town of Caroline- box culvert	$500,000	DOT	construct box culvert for Ekroos Rd
Tompkins	Town of Danby - road improvements	$890,000	DOT	Improvements to Bald Hill and Station Roads
Tompkins	Town of Danby - Highway Dept salt storage facility	$450,000	DOT	Highway Dept salt storage facility
Tompkins	Town of Dryden - bridge replacement	$150,000	DOT	Repalce bridge on Yellow Barn Rd with a concrete box culvert
Tompkins	Village of Groton - Box culvert	$135,000	DOT	Construct box culvert for three small bridges.
Tompkins	PAVING-RT 79, ITHACA W CTY LN TO W BORDER OF TOMP CO, TOMP	$1,080,000	DOT	
Tompkins	PAVING-RT 79, TIOGA CO LN TO HARFORD RD, TOMPKINS CO	$1,434,000	DOT	
Tompkins	Warren Road Reconstruction (PIN 3753.73)	$5,306,000	DOT	
Tompkins	TOWN OF ITHACA WALKWAY EXTENSION	$120,000	DOT	
Tompkins	ITHACA TRAFFIC SIGNAL UPGRADE	$200,000	DOT	
Tompkins	PAVING - RT 96, ITHACA & ULYSSES, TOMP CO	$535,651	DOT	
Tompkins	City of Hornell, The Crosby Street Reconstruction Project	$1,500,000	DOT	City of Hornell, The Crosby Street Reconstruction Project is approximately 0.5 mile in length and runs from Canisteo Street westerly to the City line in the City of Hornell, Steuben County. The City initiated the project based on the poor condition of Crosby Street, specifically regarding pavement structure, deteriorated water system and drainage system. Important Infrastructure projects for City.
Tompkins		$600,000	DOT	
Tompkins	Collector/Sanitary Sewer	$450,000	EFC	
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Hancock Street to 3	$375,000	EFC	Replace approximately 1500-LF of 8"" collection sewer to replace sections dating back to the turn of the last centur
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Hector Street Trunk	$200,000	EFC	Replacement of 664-LF 6"" sewer main to replace an aging infrastructure from the turn of the last century
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - State Street Intercep	$1,080,000	EFC	Replacement of approximately 3600-LF of 10"" concrete pipe with 12"" PVC. Sewer dates to the 1930's and is in various states of disrep
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure -Valves, Appurtenanc	$535,000	EFC	Provide miscellaneous plant infrastructure improvements to retrofit and repair 100 + year old valves, piping and appurtenances for modernization and autonomy.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Ithaca Area Wastew	$1,900,000	EFC	Replace aging septage receiving station, incorporate enhanced process efficiency, energy savings, renewable energy - oil and grease separation/recovery and reuse, and air quality/odor control measures in new facility.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Downtown Mainstre	$2,000,000	EFC	Rehabilitate 100 year-old water and water pipes under a pedestrian mall/attendant sidewalk repairs.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Elm Street Concrete	$300,000	EFC	Design and construction of system to correct water age and quality issues. Exterior coating. Miscellaneous repairs/replacements including new access ladder, vent, and overflow. Security fencing.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Floral Avenue Interc	$900,000	EFC	Upgrade approximately 3500-LF 12"" sanitary sewe
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Ithaca Area Wastew	$160,000	EFC	Upgrade leachate receiving station to incorporate spill containment, enhanced process, energy savings, and air quality/odor control measures in new facility.

County	Project	Requested $	State Agency	Additional Detail
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Ithaca Area Wastew	$1,750,000	EFC	Chemical Usage Savings & Water Quality Project. Eliminates use of sodium hypochlorite and sulfur dioxide for effluent disinfection. Addresses some emerging contaminates issues.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Miscellaneous Syste	$3,125,000	EFC	Miscellaneous system improvements that include improvements to sludge processing efficiency, rehabilitating monitoring systems, improved storage, emergency accesses to raw main components, and general maintenance.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - New Siphon at Old I	$75,000	EFC	Directional drill 500-LF of redundant siphon connection across Old Inlet at existing siphon location.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Process Modificatio	$2,285,000	EFC	Rebuild and retrofit existing filtration basins, sedimentation basins, provide corrosion inhibition and pre-disinfection modifications to meet mandated disinfection by-product regulations.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - SW Park Area Sanit	$385,000	EFC	Installation of 1,400-LF, 12"" sanitary force main from Cecil A. Malone Drive to gravity interceptor at S. Fulton and W. Green Stree
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - University Avenue C	$400,000	EFC	Reline approximately 3,000-LF of backlots 8-10"" sanitary sewer collection syste
Tompkins	Town of Danby - Public water and Sewer Infrastructure - West Danby Water	$1,355,000	EFC	Improve the 40-year old system's capacities for public water supply and fire protection consistent with Health Department recommendations. This project, to be completed in 3 stages, includes replacing hydrants and valves, refurbishing existing tank to working safe standard, and installing a second wellhead and second tank.
Tompkins	Town of Ithaca - Public Water and Sewer Infrastructure - Pressure Regulatir	$100,000	EFC	Improve safety and water provision with pressure valve upgrade on Remington Road
Tompkins	Town of Ithaca - Public Water and Sewer Infrastructure - Pressure Regulatir	$100,000	EFC	Improve safety and water provision with pressure valve upgrade on Kings Way.
Tompkins	Town of Ithaca - Public Water and Sewer Infrastructure - Pump Station and	$250,000	EFC	Upgrade pump station and water main for assuring water supply on Hungerford Hill.
Tompkins	Town of Ithaca - Public Water and Sewer Infrastructure - Water Main Improv	$2,000,000	EFC	Increase pressure for fire protection and replace aged leaking pipes on East Shore Drive.
Tompkins	Town of Ithaca - Public Water and Sewer Infrastructure - Interceptor Improv	$1,000,000	EFC	Provide increased capacity for a rapidly growing Town node on Hector Street.
Tompkins	Town of Ithaca - Public Water and Sewer Infrastructure - Trumansburg Rd. S	$2,000,000	EFC	Provide increased capacity for a rapidly growing Town node on Taughannock Boulevard.
Tompkins	Town of Ithaca - Public Water and Sewer Infrastructure - Water Main Improv	$750,000	EFC	Increase capacity in a rapidly growing planned Town node on the Danby Road.
Tompkins	Town of Lansing - Public Water and Sewer Infrastructure - Warren Road Se	$2,553,900	EFC	Recent formation of the Warren Road Sewer District will facilitate the construction of approximately 15,000 linear feet of 8-inch PVC gravity sewer pipe, together with a duplex sewage lift station 1,700 linear feet of 4-inch PVC force main and service laterals to serve existing and future parcels abutting Warren Road, Warren drive, Dutch Mill Road, Hillcrest Road, Village Circle and Springbrook Circle. The Service Area includes a large number of multiple unit apartment properties with expansion potential, Cornell University research facilities and a growing number of private sector manufacturing properties in an Empire Zone.
Tompkins	Town of Lansing - Public Water and Sewer Infrastructure - Consolidated Wa	$560,000	EFC	The extension of approximately 7,000 feet of new 8 inch water main along Drake Road and Atwater Road will facilitate shifting a large Town customer base to the Burdick Hill Water Storage Tank pressure grid. A significant reduction in electrical cost isrealized by decreasing the water demand from the Village Circle Tank pressure grid, which presently supplies the majority of Town customers and requires additional pumping. Municipal service will also be provided to 35 existing dwelling units along Drake Road which has historically experienced poor drinking water quality and quantity from their existing well sources.

County	Project	Requested $	State Agency	Additional Detail
Tompkins	Town of Lansing - Public Water and Sewer Infrastructure - Trunk Sewer to \	$29,130,000	EFC	Extend municipal sanitary sewer service within a limited area of the Town (South Lansing) that has experienced sustained growth for many decades. This 10 year-old project goal is to eliminate the threat of ground and surface water pollution posed by inadequate on-site sewage disposal systems. The Service Area includes a collection of new and older residential neighborhoods, local school district facilities, State institutions, commercial business and industry. In addition to pollution control, the availability of public sewer in the targeted Service Area will foster future development in a planned manner consistent with Town and County comprehensive plans. Over 182,000 feet of gravity and force main piping will be installed for the collection and transmission systems. The Village of Cayuga Heights Wastewater Treatment Plant will provide sewage treatment and disposal.
Tompkins	Town of Lansing - Public Water and Sewer Infrastructure - Waste Water Tre	$38,152,000	EFC	Construct a stand-alone sewage treatment plant and collection system to eliminate the threat of ground and surface water pollution caused by inadequate and failing sewage systems. Service area includes the NYS Route 34/34B corridor from North TriphammerRoad to Myers Road, and incorporates critical areas of the nodal core, the local Lansing Central School District, a NYS Office of Family and Children Services campus, and a division of Cargill, Inc. The Town-owned wastewater treatment plant will have an average discharge of 0.5 MGD, as permitted by NYS Department of Environmental Conservation and will be constructed on lands owned by Cargill, Inc. at a location proximate to the Cayuga Lake shoreline. The plant would include an outfall into Cayuga Lake of approximately 400 feet. This project has ""green"" potential because the technology to be used can make the water clea
Tompkins	Town of Ulysses- Public Water and Sewer Infrastructure - Upgrade Sewer I	$3,000,000	EFC	Sewer upgrade along route 89 from the Ithaca town line to Crowbar Point
Tompkins	Village of Dryden - Public Water and Sewer Infrastructure - Sewer Improver	$955,000	EFC	Construct an interceptor line constructed along Freeville Road and Lewis Street to alleviate the existing surcharging along the Routes 13 and 38 (Phase I), thus allowing development in the business district. Phase II of this project include improvementsintended to provide additional capacity for projected growth in various areas located through the Village. Phase I is estimated at $365,000 and Phase II at $590,000
Tompkins	Village of Dryden - Public Water and Sewer Infrastructure - Waste Water tre	$7,455,000	EFC	Upgrade of existing WWTP from 0.4 MGD to 0.6 MGD, as identified by the Village's 2006 Facility Plan. The plant is currently operating at our near design capacity so projected growth within the Village of Dryden and the Town sewer district would exceed the existing plant capacity. As a result, the Village has a moratorium on building and land development until the new Facility is constructed. (Note: This project is also seeking funding through the Environmental Facilities Corporation Clean Water State Revolving Fund and USDA Rural Development.)
Tompkins	Village of Dryden - Public Water and Sewer Infrastructure - Water Storage	$1,000,000	EFC	Construct two new water storage tanks to improve the integrity of the Village's aging water system. The village is in the process of having a Facility Plan prepared to evaluate the water system and determine other recommendations for improvements.
Tompkins	Village of Trumansburg - Public Water and Sewer Infrastructure - Water Sou	$2,000,000	EFC	Construct a second water source for the 1800 residents of Trumansburg as required by both the State Department of Health and Tompkins County Health Department. It is believed that Village water users are at risk without a backup water source, therefore,the County health department has placed a moratorium on the Village until a second source is obtained. As engineering firm has been identified and is developing the plans and design documents for a filtration system to allow the Village to have a second water source by drawing from Cayuga Lake near our current well.

Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tompkins	Agencies and Authorities within Tompkins County - Public Water and Sewer	$1,200,000	EFC	The Commission is a jointly owned municipal organization that supplies potable water to its five member municipalities in Tompkins County. These municipalities are the Towns of Dryden, Ithaca, and Lansing and the Villages of Cayuga Heights and Lansing.The storage tank is required in order for the Commission's existing thirty three year old 1,500,000 gallon water storage tank to be taken off line for rehabilitation. This tank will also provide additional backup storage in the Commission's transmission system and will allow the Village of Lansing to abandon its 500,000 gallon concrete storage tank that has been deemed unsafe by the New York State Department of Health.
Tompkins	Wastewater treatment plant upgrades	$6,500,000	EFC	Wastewater treatment plant upgrades
Tompkins	Construct two new water storage tanks	$1,000,000	EFC	Construct two new water storage tanks
Tompkins	Town of Danby - West Danby water system	$1,355,000	EFC	improvements to water system
Tompkins	Town of Dryden - Waste water Treatment	$6,500,000	EFC	Upgrade Waste Water Treatment plant
Tompkins	Town of Dryden - Water storage	$1,000,000	EFC	Construct two water storage tanks
Tompkins	Town of Dryden - Sewer improvements	$955,000	EFC	Sewer improvements
Tompkins	Village of Groton - Water release control	$500,000	EFC	water release control
Tompkins	Street Parking Upgrades	$200,000	ESD	Street Parking Upgrades
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Green Project	$800,000	ESD	Establish fund to finance growth of private sector companies designing, constructing, distributing, installing, or certifying renewable energy technologies, building retrofits, and other energy efficiency projects.
Tompkins	Tompkins County, Ithaca Farmers Market Community Kitchen Business Inc	$245,000	ESD	Tompkins County, Ithaca Farmers Market Community Kitchen Business Incubator - Renovation and outfitting of commercial kitchen for local production of value-added food products. IFM will collaborate with Cornell CE and AFCU to operate the business incubator/facility - possible joint venture with GreenStar Cooperative grocery store. Business incubator for new business ventures creating locally-produced value-added food products. Increase eonomic viability of local farmers.
Tompkins	Tompkins County, Ithaca Farmers Market Pavillion Expansion and 4-seasor	$320,000	ESD	Tompkins County, Ithaca Farmers Market Pavillion Expansion and 4-season enclosure: 40' x 200' facility expansion. Project will inlcude in-kind labor as a match. Extend selling season to year-round for 30-40 vendors. Expansion will also increase number of booths from 88 to 108 booths to meet waiting list.
Tompkins	Tompkins County, The Finger Lakes Wine Center - 3,300 square foot facility	$350,000	ESD	Tompkins County, The Finger Lakes Wine Center - 3,300 square foot facility in downtown Ithaca to serve as a gateway to the Fingerlakes Wine Region from Ithaca. The FLWC will offer a dedicated tasting area offering visitors the opportunity to sample NewYork State wines. The Center will serve both visitors and area residents as an educational resource, with exhibits as well as regularly scheduled classes and information about Finer Lakes wineries. Supports local agriculture, tourism, and recreation.
Tompkins	Ithaca YMCA Wellness Center project	$133,000	ESD	The YMCA Wellness Center addition is a ""shovel-ready"" construction project that will provide community wellness and health informaiton to individuals and small groups. The primary goal is to improve the public well-being by providing information and support to those individuals who are seeking to improve their health and prevent chronic health problems. The construction project will employ 20 trade contractors constructing a ""green"" addition that will employ 2 FTE personnel and promote numerous collaborative efforts. The construction costs have been confirmed at $400,000 and the construction start is within 30 days based on funding. Documents previously submitted to the NYS

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tompkins	City of Ithaca - Low-Moderate Income Housing Construction/Rehabilitation	$720,000	MAIN_ST	Conversion of underutilized upper stories of downtown buildings to create 12 affordable housing units.
Tompkins	Clean transportation fuel from biomass and organic wastes	$3,552,500	NYSERDA	The conversion of biomass into fuel for transportation is a promising option to replace fossil fuels with an environmentally benign, green-house-gases (GHGs) neutral and renewable energy source alternative. The co-digestion of wastewater treatment residual biomass, organic industrial waste, and food waste from residences and the dinning industry offers the option of creating a viable urban-based distributive fuel production system. Biomass processing through fermentation is a well known technology in the USA, but the production of transportation fuel form biogas in not. The fermentation system at the Ithaca Area Wastewater Treatment Facility, IAWTF, consists of two reactors, 1.2 million gallons each, with an estimated maximum biogas production between121.5 to 162.0 million cubic feet per year, equivalent to 67,300 to 89,600 gallons of diesel per year, after correcting for methane content, i.e., 75%, and a conservative overall-process-efficiency, i.e. 0.5, for the overall biogas upgrading-compressionn sulfide ($1,500,000), (3) biogas liquefaction and fueling station ($1,130,000), and (4) vehicles retrofit to biogas, starting with five units ($37,500). The installation, startup, and operation costs are estimated at $350,000, plus retrofitting costs fty recycling center ($125,000). The overall cost of the project is $4,500,000.00 over three years. In addition to the benefits of using compressed biogas as a vehicle fuel, i.e., reduced emissions of pollutants and GHGs, and using a renewable energy sour
Tompkins	Tompkins County - Energy Efficiency - Public Buildings	$100,000	NYSERDA	Lighting Improvements - Invest in lighting improvements to reduce energy use in county facilities
Tompkins	Tompkins County - Energy Efficiency - Public Buildings - HVAC Upgrade	$50,000	NYSERDA	Install an improved HVAC control system in the County Administration Building (Old Jail).
Tompkins	Tompkins County - Energy Efficiency - Public Buildings - HVAC Upgrade	$350,000	NYSERDA	Install HVAC equipment upgrades in the Tompkins County Courthouse and Administration Building
Tompkins	Tompkins County - Energy Efficiency - Public Buildings - Roof Replacemen	$350,000	NYSERDA	Replace the Ithaca Tompkins County Airport Terminal Roof with a newly highly insulated roof. Replace roofs on the Public Safety Building C, and Mental Health Building with super-insulated, energy saving reflective roofs.
Tompkins	Tompkins County - Energy Efficiency - Public Buildings - Roof Replacemen	$1,200,000	NYSERDA	Replace roofs on the Public Safety Building C, and Mental Health Building with super-insulated, energy saving reflective roofs.
Tompkins	Tompkins County - Energy Efficiency - Public Buildings - Ventilation System	$100,000	NYSERDA	Install energy-saving variable speed drives for ventilation equipment in multiple buildings
Tompkins	Tompkins County - Renewable Energy - Public Buildings - Install photovolta	$2,400,000	NYSERDA	Install photovoltaic arrays on the new Public Health Building (1,200,000), the Human Services Building ($900,000) and the County Airport Terminal ($300,000).
Tompkins	Tompkins County - Renewable Energy - Solar Hot Water	$40,000	NYSERDA	Install solar hot water system in three buildings (Public Works, Human Services, and Main Courthouse).
Tompkins	Tompkins County - Energy Efficiency - Public Buildings - Energy Savings In	$100,000	NYSERDA	Undertake miscellaneous energy saving improvements in multiple County buildings
Tompkins	Tompkins County - Energy Efficiency - Public Buildings - HVAC Upgrade	$200,000	NYSERDA	Install improved HVAC controls in the Public Safety and Mental Health buildings
Tompkins	Tompkins County - Energy Efficiency - Public Buildings - HVAC Upgrade	$850,000	NYSERDA	Upgrade HVAC equipment in the Public Safety and mental Health buildings
Tompkins	Tompkins County -Energy Efficiency - Public Buildings - Roof Replacement	$900,000	NYSERDA	Replace roofs on the County Administration building and Public Works garage and shops with energy saving reflective roofs.
Tompkins	Tompkins County - Renewable Energy - Public Buildings - Install photovolta	$3,400,000	NYSERDA	Install photovoltaic arrays on the Public Safety Building and Public Works Facility
Tompkins	Tompkins County - Public Buildings - Solar Hot Water	$3,510,000	NYSERDA	Install solar hot water systems in the Public Safety Building and Mental Health Building
Tompkins	City of Ithaca - Public Water and sewer Infrastructure - Energy savings and	$120,000	NYSERDA	Provide energy savings enhancements to water treatment plant buildings including insulation and weather-stripping window replacement, ""smart"" climate control, efficient lighting,
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Conversion to Solar	$20,000	NYSERDA	Invest in a solar water heater for Alex Haley Municipal Pool and Solar panels for roof.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Police Dept. Building U	$300,000	NYSERDA	The current Heating and Ventilation system at Ithaca Police Department works poorly. Excessive heat in certain areas results in windows being left open all winter in an effort to control the heat in that room. This is an extreme waste of energy and money. The air conditioning system must be reset manually everyday when it is in use. The system is not designed to operate that way and turning the system on manually presents a hazard to the person doing it.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Ithaca Area Wastew	$3,000,000	NYSERDA	Renewable Energy Projects, Energy efficiency / Savings Projects & Upgrades for both facilities and plant processes. Projects included for Facilities are lighting, HVAC, building envelope, heat recovery, controls, solar, efficient electric motors, etc.Projects included for Processes are cogeneration rehabilitation or replacement, boiler replacement, dissolved oxygen (DO) level controls on aeration equipment, enhanced digester mixing, solar-both photo voltaic and thermal, wastewater heat recovery, effluent reuse, etc.
Tompkins	City of Ithaca - Energy Efficiency - Housing - 24 Unit Downtown Condominiu	$600,000	NYSERDA	Incorporate upgraded energy efficiency technologies in the construction of 24 units of energy efficient, market-rate, for-sale housing downtown at E. Clinton Street.
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Green Project Power G	$400,000	NYSERDA	Capture methane gases generated at the Ithaca Area Wastewater Treatment Plant to co-generate power for commercial greenhouse (Finger Lakes fresh).
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Reducing fossil fuel en	$400,000	NYSERDA	Implement most effective elements of the city's energy efficiency and conservation strategy to reduce fossil fuel emissions in City facilities and operations.
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Streets and Facilities E	$800,000	NYSERDA	Roof replacement with insulation, exhaust duct system, overhead door replacement with energy efficiency, replace radiant heat system.
Tompkins	City of Ithaca - Public Safety/Emergency Response Facilities - City Facility	$468,000	NYSERDA	Acquire and install emergency generators at City Facilities
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Ithaca Area Wastew	$1,750,000	NYSERDA	Renewable Energy Project, entails enhanced biogas production from anaerobic digesters, biogas conditioning, biogas scrubbing, biogas liquification and storage, vehicle fueling station, vehicle retrofits for liquefied biogas fuel.
Tompkins	Town of Caroline - Energy Efficiency - Public Buildings - Energy Conservati	$15,000	NYSERDA	Seal and insulate the crawl space under the town Hall building and change the light fixtures to energy efficient lighting. These energy efficient changes are in addition to a number of energy conservation renovations to the Town Hall that have been completed or are underway.
Tompkins	Town of Caroline - Renewable Energy - Public Buildings - Install Photovolta	$110,000	NYSERDA	Install 10KW to 12KW photovoltaic arrays in new town Office Building that will serve both the new building and the Historic Town Hall. Bids have been secured and construction can begin in the Spring of this year. ($90,000 - $110,000).
Tompkins	Town of Danby - Energy Efficiency - Public Buildings - Town Hall Energy Eff	$35,000	NYSERDA	Insulate, upgrade lighting and weatherize the c. 1865 Town Hall Meeting room; upgrade exit lights throughout building.
Tompkins	Town of Danby - Renewable Energy - Public Buildings - Highway Facility Re	$72,000	NYSERDA	Install supplementary solar heating system
Tompkins	Town of Danby - Energy Efficiency - Public Buildings - Highway Facility Ene	$56,000	NYSERDA	Upgrade insulation, lighting, heating system in 1990 building.
Tompkins	Town of Dryden - Energy Efficiency - Public Buildings - Energy Conservatio	$84,255	NYSERDA	Install insulation in the Highway department's garage roof and replace the water boiler.
Tompkins	Town of Ithaca - Renewable Energy - Public Buildings - Public Works Photo	$300,000	NYSERDA	Install solar panels to increase efficiency at Public Works facility on Seven Mile Drive.
Tompkins	Town of Ulysses - Energy efficiency - Public Buildings - Renovation/Recons	$350,000	NYSERDA	The present facility, built in the 1940's, is essentially an uninsulated cider building, which is too small to effectively house modern-day trucks for repairs. Sometimes the doors have to be left open when repairing a snowplow since the entire plow andtruck are too long to fit in the building. Plans are complete to enlarge the facility with code-insulated construction to allow space for highway equipment. All windows and doors will be of high energy efficient rating, as well as the heating system and lighting systems which will include, where ever possible, renewable energy.
Tompkins	Village of Groton - Energy Efficiency - Housing - Window Replacement	$300,000	NYSERDA	Install energy efficient windows in senior citizen housing

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tompkins	Insulation in highway dept garage roof/replace boiler	$84,255	NYSERDA	Insulation in highway dept garage roof/replace boiler
Tompkins	Install geothermal heating in new town office building	$20,000	NYSERDA	Install geothermal heating in new town office building
Tompkins	Energy efficiency improvements at the Town Hall	$35,000	NYSERDA	Energy efficiency improvements at the Town Hall
Tompkins	Installation of insulation in highway department garage roof	$84,255	NYSERDA	Installation of insulation in highway department garage roof
Tompkins	Creating Employment Opportunities Central Processing Center for Local Pr	$300,000	NYSERDA	Expand current Finger Lakes Fresh hydroponic greenhouse operation owned and operated by Challenge, employing 18 workers with disabilities with annual revenues over $600,000. This project will create a centralized packaging and distribution center for year round produce grown by local farmers using biogas produced by manure digesters and in greenhouses operating on local landfill/wastewater treatment sites that use biogas to provide energy for running the greenhouses. This project will help ensure retention of the existing 24 jobs and create an additional 16 positions for public assistance recipients and individuals with disabilities who will staff the operation. Profits from the expanding business will invested into Challenge's services that support individuals with disabilities and other barriers to employment to work in the community, reducing Challenge?s reliance on public funding.
Tompkins	Town of Caroline - Photovoltaic arrays installation	$110,000	NYSERDA	install photovoltaic arrays in new town hall office building
Tompkins	Town of Caroline - Town Office heating	$20,000	NYSERDA	include geothermal heating in the new town office building
Tompkins	Town of Caroline - Town Hall energy conservation improvements	$15,000	NYSERDA	Town Hall energy conservation improvements
Tompkins	Town of Danby - Highway facility	$128,000	NYSERDA	Energy efficiency improvements and renewable energy improvements
Tompkins	Town of Danby -Town Hall	$35,000	NYSERDA	energy efficiency improvements
Tompkins	Village of Groton - Senior Housing energy efficiency	$300,000	NYSERDA	Install energy efficient windows in senior housing
Tompkins	William George Agency for Children's Services, Inc.	$168,860	OCFS	Renovations to the roof on the Physical Education / Recreation building.
Tompkins	Tompkins County - Information Technology - Broadband Needs Assessmen	$50,000	OFT	Conduct an assessment of needs county wide to determine service capability
Tompkins	Tompkins County - Information Technology - Fiber Optic Connection	$50,000	OFT	Install a fiber optic connection to link the County's Public safety Building, Airport and Public Health Building
Tompkins	Tompkins County - Information Technology - Countywide Broadband	$3,000,000	OFT	Building on the results of the county-wide needs assessment and on efforts in the Town of Danby and the Village of Groton, implement broadband service including use of the County's existing high capacity microwave radio network to other rural areas of Tompkins County. The County's Department of Emergency Response proposes to utilize the infrastructure of the recently constructed Public Safety Communications System to support the deployment of broadband wireless internet service to under-served areas ofTompkins County. The placement of broadband transmitting equipment on several ""high"" towers can be combined with a newly existing high speed, high capacity microwave radio network that extends to each of these sites. The county network will serve asa conduit to potentially hundreds of homes and small businesses back from established or developing private networks. It is envisioned that a public/private partnership will be competitively established for each of a minimum of five communications site

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tompkins	City of Ithaca - Public Safety/Emergency response facilities - Records Mana	$393,320	OFT	The City's Building Department has 12 inspectors that provide housing maintenance inspections, exterior maintenance inspections, electrical inspections and building inspections for the City of Ithaca including the large portion of cornell University thatis located within city limits. In 2007, New York State mandated that all multiple dwellings be inspected every three years and all, dormitories, fraternities and sororities be inspected each year. Aside from having a minimum of $50,000,000 worth of building construction in the City that is required by the State to be inspected each year, inspectors also have to complete maintenance inspections on 3300 housing units each year to meet the mandatory State cycles. The Building Department cannot meet theburgeoning State mandates for inspections unless it receives funding to digitize all its paper files and completes the record management support it needs for its inspection software. The total project estimate to do this work is $402,320 of which $320,
Tompkins	City of Ithaca - Public/Safety/Emergency Response Facilities - Keyless Entr	$60,000	OFT	Install a keyless entry system on all facility doors at GIAC for security purposes.
Tompkins	City of Ithaca - Public Water and Sewer Infrastructure - Security, Communic	$335,000	OFT	Retrofit the plant with miscellaneous improvements to enhance security, emergency response, and communications including the installation of a 300 KW generator, telephone, and general security upgrades.
Tompkins	Town of Danby - Information Technology - Danby Broadband Access Projec	$620,000	OFT	Deploy a rural broadband system in the rural Town of Danby, to reach rural residents and businesses near the greater Ithaca regional area. Build out network, from basic infrastructure to user interface. Coordinate with similar project in adjacent Townof Dryden.
Tompkins	Town of Dryden - Information Technology - Wireless Broadband Access	$1,115,169	OFT	Construct up to 10 monopole wireless antennas to make wireless broadband service available throughout the town to subscribers.
Tompkins	Village of Groton -Information Technology - Broadband	$750,000	OFT	Using the village-operated municipal electric system that distributes low-cost power to its residents and businesses, establish broadband transmission to this rural area via integration with existing electric utility infrastructure. This project is alsoa part of the county-wide broadband needs assessment initiative (see project list for Tompkins County).
Tompkins	Agencies and Authorities within Tompkins County - Protecting the Vulnerabl	$60,000	OFT	Preserve Tompkins County's partnership and investment in statewide 2-1-1 Call Center infrastructure designed to help some of our most vulnerable populations, particularly those hit hard by current economic conditions, to connect to needed vital services.As the recession deepens, increasing number of Tompkins County residents will struggle to make ends meet. Our 2-1-1/Information and Referral center stands ready to assist those who live and work in the county suffering economic hardship due to loss ofjobs or reduction of benefits. Continued funding will ensure that local citizens most at risk receive the guidance needed to address deteriorating situations and possibly prevent the use of more costly interventions.
Tompkins	Village of Dryden Dept. of Police	$145,000	OFT	This project includes the purchase of a Live Scan digital fingerprint terminal, a license plate reader)LPR) and the funding of 75% of a FT officer's salary for the next three years.
Tompkins	Broadband Access Project	$620,000	OFT	Broadband Access Project
Tompkins	Wireless Broadband Access	$1,115,000	OFT	Wireless Broadband Access
Tompkins	Broadband access project	$750,000	OFT	Broadband access project
Tompkins	Town of Danby -broadband access	$620,000	OFT	broadband access
Tompkins	Town of Dryden - broadband access	$1,115,000	OFT	Wireless broadband access
Tompkins	Village of Groton - Broadband Access	$750,000	OFT	Broadband Access
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Ithaca Fire Station Buil	$275,000	OHS	Various repairs to the central fire station, station #5, station #6 and station #9, including entrances, entrance ramps, skylights, ceilings, floors and other energy efficiency improvements.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Tompkins	City of Ithaca - Public Safety/Emergency Response Facilities - Upgrade Fire	$700,000	OHS	Capital projects for four fire stations have only been partially funded by the city/town due to budgetary constraints. Items include energy efficiency, remodeling outdated kitchen/sleeping area, painting and floor surfacing.
Tompkins	Town of Danby - Public Safety/Emergency Response Facilities - Danby Fire	$600,000	OHS	Add two truck bays, enlarge meeting, office and kitchen facilities, provide handicapped-accessible restrooms, all to relieve overcrowding and improve energy efficiency. Replace existing generator with larger one capable of powering entire enlarged facility, to improve operations and enable building use as temporary emergency shelter. (Total project estimate is 1,130,000 of which $530,000 is available.)
Tompkins	City of Ithaca - Energy Efficiency - Public Buildings - Ice Rink Update	$1,185,000	OPRHP	Replace the aging, antiquated and inefficient refrigeration system at the Cass Park Ice Rink with a modern energy efficient ""green"" sy
Tompkins	Nanooze	$50,000	OPRHP	This is an ongoing collaboration between Tamarack Design, a small design/fabrication company, and Cornell University to design and build a traveling museum exhibition to teach Nanotechnology to the public.
Tompkins	City of Ithaca - Protecting The Vulnerable/Vital Services - Head Start	$100,000	SED	Begin a Head-Start program for 12 age appropriate children.
Tompkins	City of Ithaca - Protecting the Vulerable/Vital Services - Academic Mentoring	$100,000	SED	Expand existing academic support and long-term mentoring program for disadvantaged youth, ensuring that all students receive the supports needed to reach high academic standards.
Tompkins	Cornell University, Surging Projects for Fern/aw & Rice	$6,000,000	SUNY	
Tompkins	Cornell University, Barton Hall Ithaca - Ext/Roof Repairs	$6,026,000	SUNY	
Tompkins	Cornell University, Energy Conservation Initiatives	$6,000,000	SUNY	
Tompkins	Cornell University, Barton Hall Exterior/ Roof Repairs	$4,111,880	SUNY	
Tompkins	Tompkins CC, Electric Panel Replacement	$1,600,000	SUNY_CC	
Tompkins	Tompkins County - Higher Education	$2,000,000	SUNY_CC	Classroom Addition Project - Tompkins Cortland Community College - Construct nine new classrooms to accommodate increased enrollment at Tompkins Cortland Community College. The college will renovate two existing areas to develop six new classroom spaces, and expand the existing structure to add three more. Local products and installation methods are being specified in order to follow the LEED silver requirements. The project also includes a photovoltaic array to provide enough power at peak operationto supply more than half of the energy required for lighting the new classrooms.
Tompkins	Cornell Fuel Cell Institute conducts R&D for advanced fuel cells that overco	$5,000,000	Thruway	
Tompkins	Upgrading biomedical research building on East 69th Street, NYC	$1,000,000	Thruway	
Tompkins	Biofuels Research Laboratory (BRL) at Cornell University has brought abou	$10,000,000	Thruway	
Tompkins	Magnetocardiography: a portable instrument to assess cardiac condition	$500,000	Thruway	
Tompkins	Non-contact Respiration monitor: technology & associated device options to	$75,000	Thruway	
Tompkins	CS GRP-PSM - advanced sensor platform	$1,300,000	Thruway	
Tompkins	Mass produce green building material in NY at a significant energy savings.	$5,000,000	Thruway	
Ulster	T. of Marlborough Housing Rehabilitation Program	$400,000	CDBG	
Ulster	T. of Ulster Glenerie Water Tank Project	$600,000	CDBG	
Ulster	T. of Wawarsing Kerhonkson Water Main Replacement Project	$600,000	CDBG	
Ulster	V. of Saugerties Post Street Project	$600,000	CDBG	
Ulster	Town Office Building	$1,000,000	DASNY	The Town of Olive is in dire need of a Town Office building. Currently, the building we occupy is contaminated with black mold and the water is undrinkable. Employees have become sick from this building but our town can not afford to replace it. The buil

County	Project	Requested $	State Agency	Additional Detail
Ulster	Firehouse renovations	$500,000	DASNY	Construct addition to house apparatus. Renovate remaining facility. Our present facility does not allow modern apparatus to fit inside. Other renovations would bring facility to code.
Ulster	Town office/senior center	$2,500,000	DASNY	The shovel ready project will consist of a 21,000 square foot three floor building. Two floors will be to satisfy the Towns office space needs and one floor will be a community meeting area for the seniors and other civic groups to meet.
Ulster	New Fire House Construction	$7,000,000	DASNY	Construct and implement the building of a new 6 bay Fire Station. Building to include training facilities, appratus housing, community meeting facilities, disaster Center/shelter for Town residents, Hasmat facilities for District. Building will include a6 bay appratus roon, officer quarters, and meeting room for Volunteer Firefighters. Property is already acquired and we are shovel ready. New facilities will double current space of current 48 year old building, which will not comply with Handicap accessable regulations. This building will be utilized as a community Center.
Ulster	Stone Ridge Library Building Restoration and Expansion Project	$3,500,000	DASNY	In June 2009, the Stone Ridge Library will celebrate its first one hundred years. To serve the community for the next 100 years and beyond, we are launching a capital campaign to raise $4 million to build a 4,500 square foot addition and renovate the library?s historic buildings dating to 1798 and 1811. Community residents, current library users of all ages, staff, and volunteers have helped us to identify the strong points of our library and the services that need to be updated, upgraded, and improved.Historic preservation specialists have identified the structural deficiencies that threaten both historic buildings. The Stone Ridge Library Foundation has raised funds to commission plans for the new addition and renovation of the two historic buildings from the architectural firm of Butler Rowland Mays. The appearance of the historic buildings will be unchanged, but the structural weaknesses of the buildings and the deteriorating architectural details will be repaired as part of the capital campaign.
Ulster	Clinical Consolidation Infrastructure	$10,367,896	DASNY	New parking garage to be shared by The Kingston Hospital and Kingston City Hall, Consolidation of clinical services not supported by HEAL4 grant including inpatient acute dialysis, endoscopy, chemotherapy infusion and pain treatment, upgrades of hospitalinfrastructure incluidng extension of new emergency generator power throughout the hospital, upgrade fire call back system in elevators and replace antquated fire alarm system. Short term economic stimulus includes use of local contractors, vendors andsuppliers. Long term economic stimulus includes additional clinical jobs and improvement in quality of medical care delivery that is a prerequisite to economic development in the area.
Ulster	proposed new fire station	$1,000,000	DASNY	task force currently looking into adding a third sub-station to fast growing combination commercial-residential area
Ulster	City of Kingston	$4,500,000	DASNY	A parking structure to accommodate the expansion of Kingston Hospital and City hall which are located adjacent to each other and have parking issues at present.
Ulster	Ulster County Information Services Relocation	$5,800,000	DASNY	Information Services will be re-located to an existing building at 318 Wall Street. Approximately 14,000 sq. ft. of space will undergo complete rehabilitation. All major building components will be upgraded with energy efficiency as a guide. New electrical and telephone feeds will be installed. When completed, the building will house a state of the art computer center.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Ulster	Probation Building - Unfinished Space	$1,350,000	DASNY	The unfinished space represents the least cost options for the relocation of county departments to improve functionality or eliminate safety considerations. Priority relocations include: Central Services and Tourism, although others are under consideration. The project would complete interior renovations and install required HVAC, bathrooms, etc. on 4,500 sq. ft. of unfinished space located at an existing building that houses Probation.
Ulster	New Paltz Satellite Goverment Campus	$6,500,000	DASNY	Ulster County currently has various health and human services departments in scattered leased locations in New Paltz and Highland. This arrangement is unworkable for many clients and costly to the County and the county needs a satellite government centerin its fast growing southern portion. The project proposes to co-locate Mental Health, Social Services, Public Health, Probation, and Office for the Aging in a 20,000 sq. ft. facility that would include community space.
Ulster	Ulster County Family Court Relocation	$14,800,000	DASNY	Ulster County currently rents space for its Family Court and is under guidance from the NYS Office of Court Administration that additional court space must be found that cannot be provided at the rental facility. The project renovate 22,000 sq. ft. of the currently unused ?old? Jail for use by the Family Court. The jail would be completely gutted and new court rooms and office space outfitted in accordance with OCA requirements. New energy efficient HVAC would be installed.
Ulster	Dumptruck, equipment replacement; fuel station	$1,500,000	DASNY	Truck and Equipment Replacement Program Fueling Station Replacement
Ulster	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of four residences and one day program in New Paltz, Kingston, Ellenville, and Saugerties.
Ulster	SUNY Ulster Nursing Lab	$212,500	DASNY	The College?s nursing program began in 1970 and the current on-campus nursing lab was constructed in 1991. When the ?new? lab was occupied some of the equipment from 1970 was moved into the facility. In a recent site visit by the New York State EducationDepartment?s Office of the Professions officials were sharply critical of the facility?s inadequacies and urged the College to upgrade, update and modernize the facility and equipment. remodel the 2,110 square foot rectangular room (HAR 134) into a facsimile of an actual nursing floor one would see in either Benedictine or Kingston Hospital. Today?s Nursing education best practices require replicating an authentic clinical setting with updated floor plans, equipment and medical protocols to help ensurethe readiness of new nurses when they enter the hospital setting as licensed professionals.
Ulster	Complete Renovation of Hardenbergh Hall	$11,695,000	DASNY	Hardenbergh Hall was completed in 1969 and has not been repaired or renovated in any way during the past 40 years. Exterior and interior renovation is long overdue. All windows and roof fascia need to be replaced. All flooring, mechanical systems, ceiling tile and lighting need upgrading. A complete renovation has been recommended. The forty year old building is in need of a complete interior and exterior renovation that includes replacing all windows, exterior doors, interior finishes and all buildingsystems (HVAC, electric, data, and plumbing), and reorganizing the building?s interior layout to better serve the College?s needs. The forty year old building is in need of a complete interior and exterior renovation that includes replacing all windows,exterior doors, interior finishes and all building systems (HVAC, electric, data, and plumbing), and reorganizing the building?s interior layout to better serve the College?s needs.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Ulster	Construction of Energy Efficient Student Life Center	$7,631,700	DASNY	The project includes construction of a 13,000square foot addition and renovation of 6,900 square feet of existing space; new furnishings and equipment; an upgrade of the building?s electrical system; replacement of emergency and exit lighting; replacement of the exterior fascia panels and deteriorating ceilings at building entries and associated site work, including the relocation of the bus stop to improve pedestrian safety. Also included in the estimate is the construction of a new boiler plant and associated infrastructure. The new addition will house the following facilities: café; game room; fitness center; conference room; health services; crisis counseling offices; free-weight room; multipurpose room; student lounge; and student government offices.Renovation of Construction of energy efficient Student Life Center
Ulster	Library Expansion Project	$2,000,000	DASNY	The Rosendale Library, which serves the town and surrounding areas, is housed in a historic 130-year-old chapel that is an important part of the character of Rosendale's Main Street. However, the chapel is tiny. The book collection is limited by available space, important local-historical documents must be stored in the basement rather than displayed, and community programming is highly space-restricted. We have drafted plans for a 2,500 square foot addition, and were prepared to begin a capital campaign this summer, but we put the plans on hold due to the difficulty of raising funds from the community in the worsening economic climate. If we are able to secure funds for this project, we intend to use entirely local planning and construction resources.The construction itself will provide community jobs, the enhanced structure will be much more energy efficient, and the improved library will enhance a much-needed community service.
Ulster	Town of New Paltz police	$600,000	DCJS	Renovations for new location for New Paltz police department. Extensive research has been done to find a new adaquate and safe building for our Town Police Department. with funding we would hire local contractors to complete the work, rather than Town la
Ulster	Rosendale Police Projects	$180,000	DCJS	Proposed to hire 1 or 2 officers under the Cops grant, we also in need of replacing two narked patrol units and we need to expand out camera system to help protect our recreation center and transfer staion which can be monitored at police station and inour petrol vehicle, upgrade our vehicle camera system from VHS format to digital, replace our computer server and radar units in patrol vehicle whic h all items we elimated frm our 2009 budget
Ulster	911 Command Center	$2,800,000	DCJS	Ulster County is the only county in the region without a dedicated emergency operations center. The confined space no longer can support emergency management operations.The project would renovate the existing 2,500 sq. ft. center and add 4,000 sq. ft. tothe structure. The County?s Safety Office would be co-located at the new facility. Upgrades to all energy systems are included.
Ulster	911 Command Center	$2,800,000	DCJS	Ulster County is the only county in the region without a dedicated emergency operations center. Confined space no longer can support emergency management operations. The project would renovate the existing 2,500 sq. ft. center and add 4,000 sq. ft. to the structure. The County?s Safety Office would be co-located at the new facility. Upgrades to all energy systems are included.
Ulster	Gardiner Tranfer Site - Rebuilding	$400,000	DEC	Rebuilding of the town's transfer station which was destroyed by an accident in 2007. The new site will improve its safety and the environment.
Ulster	City of Kingston	$1,900,000	DEC	Construction of 1,000 linear feet of bulkhead to support private sector investment in waterfront revitalization and the construction of a public promenade along the Rondout Creek/Hudson River.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

County	Project	Requested $	State Agency	Additional Detail
Ulster	Bulkhead and Waterfront	$3,000,000	DEC	Construction of bulkhead and erosion control measures along the Rondout Creek. The City of Kingston has a Local Waterfrnt Revitalization Implementation Plan that calls for a walkway or promenade all along the Rondout Creek and Hudson River. There are sections of the redevelopment area that need protection from erosion control in order to provide a stable base for the public walkway and stop erosion of shoreline. The City has installed 500 feet of new bulkhead and there is a project that will be out to bid shortly for the construction of 300 more feet of bulkhead and a portion of the paved promenade. That project is funded through Congressman Hinchey's office (FHA-DOT) and the NYS DOS Coastal Program. The cost of providing the bulkhead ranges from $1000per lineal foot to $1,900 per lineal foot. This project would advance the waterfront revitalization efforts, lead to an increase in tax ratables, jobs and tourism. The City has a proposed contract withthe Army Corps of Engineers and is awaiting a DOS EP
Ulster	Hudson River Community Health	$200,000	DOH	Expansion of Oral Health Services at New Paltz Migrant Health Center
Ulster	Institute for Family Health	$1,600,000	DOH	HIT Expansion to Enhance Primary Care Services in New Paltz
Ulster	Health Information Technology Project	$14,000,000	DOH	This project is the creation of a complete Electronic Medical Record System for all the hospitals in the Health Alliance network. It is comprised of a clinical data repository, a clinical decision support system, a computerized provider order entry system, a full pharmacy system with an electronic Medication Administration Record, and a full clinical documentation system. The System will meet all interoperability standards including those defined by the Statewide Health Information Newtwork of New York.
Ulster	A Second Chance: Ex-Offenders Learn Green Trades	$85,000	DOL	Our program for ex-offenders returning to Ulster County is residential and we are now turning our efforts to job training. We have won a $43,000 DEC Environmental Justice grant to train 10 men to become energy auditors. However, we seek an additional $85,000 to hire a coordinator to run this program and to fund its overhead (software, computer, tools, etc.) The men will take two courses at Hudson Valley Community College and become certified by the Building Performance Institute (www.bpi.org). They willperform 18 energy audits under the DEC grant. With a coordinator, they would have adequate supervision to form a small company that would continue to do audits and then perform the renovations, using incentives provided by NYSERDA for work such as air sealing, insulation, electrical reduction, etc. Our county weatherization agency does this work but is seriously backlogged so we know we can enter this marketplace. We estimate the company could perform at least 100 audits a year, making a serious contridentify ex-offenders who could benefit from our program. We are also exploring partnership with our local Workforce Investment Board.

County	Project	Requested $	State Agency	Additional Detail
Ulster	ARP Non-Profit Development Services	$50,000	DOS	In recent years, non-profit organizations across the country have become increasingly important institutions in meeting community needs and helping alleviate social problems. New York State's non-profits are no exception, and in our current unforeseen era of shrinking government resources and highly competitive foundation funding, local non-profits face the daily challenge of ""doing more with less."" As a result, ARP Non-Profit Development has been launched to provide the nonprofit sector with fundraising and organizational development services, with four main aims: 1. Utilizing Amy Poux's twenty-year track record of non-profit organizational development and leadership to provide an efficient, effectual, and economical solution to non-profit's fundraising and organizational development needs, 2. Generating income for non-profit service organizations to support all aspects of the organizational mission, 3. Creating community adoption of local non-profit organizations for their sustenance and ongoing wnon-profit service providers. ARP Development was created to nurture ""social entrepreneurship"" in the local non-profit community and help non-profits sustain their operations. The company has emerged in three, somewhat overlapping phases: First, in Dearing of the current financial recession -- exploratory meetings were held with area foundations, financers and nonprofit organizations, to gauge local interest in sharing a non-profit development professional as a solution to the expense of hiring devel

County	Project	Requested $	State Agency	Additional Detail
Ulster	Reconstruction of Dock Street	$2,000,000	DOT	Reconstruction of 1,300 l.f. City street, Dock Street. Dock Street is one of three main access streets to the Kingston Waterfront. It is a strategically important road that supports the local business district, boaters, tourists and residents. Due to previous construction of a sewer siphon line, new infrastructure and the demolition of a former slaughterhouse, the road is in bad condition and needs to be rebuilt. The City does not have the resources to rebuild the street at this time, and it is an important project that will advance the waterfront revitalization. The City has applied to the Ulster County Transit Council for consideration on the TIP list for DOT purposes. The planning and design process would take approximately 180 days according to ourengineers, and can go out to bid at that time. If it can not make the initial cut, please list it for the next round of project selection.
Ulster	Pavement Resurfacing: Route 28	$2,200,000	DOT	
Ulster	Route 209 Stone Ridge Sidewalks and pavement resurfacing	$3,878,000	DOT	
Ulster	Bridge Replacement: CR 77 Main St / Rondout Creek	$4,700,000	DOT	
Ulster	Bridge Rehabilitation: Beckley Dr / Fantine Kill	$1,125,000	DOT	
Ulster	Bridge Rehabilitation: New Paltz Road / Abandon RR	$2,600,000	DOT	
Ulster	Mohonk Preserve Carriage Roads Reconstruction	$269,000	DOT	
Ulster	Waterfront Walkway - Kingston	$200,000	DOT	
Ulster	City of Kingston Railroad Quiet Zone	$3,000,000	DOT	This project will establish a railroad quiet zone in the City of Kingston. The city os biscted by the CSX river line carry upward of 40 trains per day with significant increase in train traffic predicted. Project will greatly enhance quality of life andprovide incentive for economic development along the rail corridor.
Ulster	Tech City Reconstruction	$8,500,000	DOT	The project would create a road network throughout the site, selectively demolish antiquated buildings, and convert buildings located over the plume to shared covered parking. In addition to providing better access to existing buildings with high reuse potential, the road network offers individual building sites that can easily accommodate an additional 1.4 million sq. ft. of space to meet the needs of various high tech manufacturing entities as illustrated in the new master plan. This is a catalyst public investment to reconfigure a brownfield site for success. Tech City continues to see potential tenants on a regular basis but site configuration, the mixture of old and relatively modern buildings stands in the way of moving forward. The reconfiguration will remove building no longer viable providing better access and visibility to an existing inventory of over one million square feet of light industrial space and create building sites with ready infrastructure to construct 1,4 million sq. ft. of new
Ulster	Sidewalk Replacement	$50,000	DOT	Replace the 35 year old cement sidewalks at our low income senior apartment building. In an effort to keep the sidewalks free from ice and snow we have had to use ice melting chemicals every winter. As the sidewalks age and crack the ice melt just compounds the destruction of the walks. We would like to replace are 400 linear walks wirh new cement walks with buried sensors and heat cables to prevent ice and snow buildup without the use of the harsch chemicals. In addition to snow storms,the snow plows dump snow and ice on our sidewalks , this would prevent any buildup of ice caused by the plows also. Our seniors citizens would be much safer, since many are un-stable walking to start.

Ulster	Infiltration & Inflow Correction, Treatment Plant EXP, Treatment Plant Imp.	$7,120,000	EFC	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Ulster	water/ s. putt corners	$115,000	EFC	Connect water storage tank to S. Putt Water Main to increase pressure, fire flow and system reliability. This would also allow for additional users and insure adaquate fire protection to the high school. This project is ready to go out for RFP, can be co
Ulster	Water/ Cherry Hill	$150,000	EFC	Relocate old primary water main that is presently inaccessable for maintanence and repair. This will relieve the burden of this repair from the water users. This project will utilize local contractors and be completed in 2 months
Ulster	Water Loop N. Putt	$375,000	EFC	Complete water loop for fire protection and provides pressure for additional users in the future. This projec t is ready to notice RFP and will utilize local contractors.
Ulster	Water/ Sewer main st loop and Economic development	$1,150,000	EFC	Loop dead end water line to increase pressure and provide fire protection for future industrial development. This project is ready to go for RFP and will utilize local contractors.
Ulster	208 South Sewer	$500,000	EFC	Submission* No* John*Valk*Town of Shawangunk*Town of Shawangunk Supervisor*14 Central Ave.*Wallkill*New York*12589*8458952900* jvalkjr@hvc.rr.com*208 South Sewer*Infrastructure*Rural Water and Waste Disposal* Additional funding for an existing program ul
Ulster	Gardiner Sewage Treatment Facility	$1,000,000	EFC	This will allow the town to provide sewage for its light industrial zone, and, thereby, increase the number of jobs by 200 - 300 in the industrial zone and increase the tax revenues from businesses by over 100%.
Ulster	Reservoir filtration project	$50,000	EFC	St Cabrini Home, a children's residential facility, maintains a private fresh water source. The County Health Depart. has required the installation of a new filtration system. We must comply to maintain our overall program's operation.
Ulster	City of Kingston	$12,853,775	EFC	Replacement of 100 year old system branches and elimination of Combined Sewer Overflow situations
Ulster	Storage Tank Loop	$115,000	EFC	connect storage tank to S Putt Water Main to increase pressure, fire flow, system reliability
Ulster	Additions & Alterations to the Marlboro Wastewater Treatment Facility	$300,000	EFC	In order to comply with Department of Environmental Conservation Wastewater Treatment regulations for waters discharged into the Hudson River, the Town of Marlborough has to install a chlorination/dechlorination unit to the existing Marlboro Wastewater Treatment Plant. Design work is completed and the contract to go out to bid is ready. The Town of Marlborough is requesting funding to move this project to its final construction phase.
Ulster	Ellenville Waste Water Treatment Upgrade	$4,000,000	EFC	Upgrade of WWTP that hjas outlived its useful life span. Designing a ""green"" facility using; PV, waste heat recovery & high efficiency pumps. Submitted funding applications to: USDA, EFC & NYS ERDA. Village is low income, in Empire Zone & Federal REAPZone. Project will increase capacity from 800,000gpd to 1.1 million gpd. Project design is well under
Ulster	Connect to a Municipal Water System and Upgrade Campus Water Distribu	$3,559,000	EFC	The Stone Ridge Campus was designed and implemented in 1967. In the forty one years that has passed since that time, the system has undergone only minor upgrades and modifications. Despite significant expansion of campus facilities the water system remains not far from its original design. Although two additional wells have been drilled since 1967, neither of them is serviceable and hence the College is still operating on the three original wells. Water acquisition, distribution and consumption on the campus has historically been a major concern to the Ulster County Community College Board of Trustees, administration and the residents of the surrounding community and continues to be so today. This project would allow the College to tie into the publicwater system in High Falls, New York. The water would be piped to the campus approximately two miles away.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Ulster	Kawasaki SWIMO Battery LRV Test Project	$2,600,000	ESD	The City of Kingston and the Trolley Museum of New York have been approached by Kawasaki as a possible site to test their new battery powered light rail vehicle, called SWIMO. Senator Schumer has already been in touch with Kawasaki to 'sell' Kingston asthe site to choose. To support this project, there will need to be infrastructure updates to the existing rail used by the Trolley Museum in Kingston. The City already submitted an 'Obama list' requesting $1.6M for the track upgrade. However, there willbe additional costs to support the project such as staffing, buildings, equipment. This project will be a partnership between Kingston, the Trolley Museum and Kawasaki and touches several aspects of the stimulus package, including alternative energy, transit and infrastructure. If Kingston were to be selected for the Kawasaki project, it would have many positive side effects to the local economy.
Ulster	City of Kingston	$1,800,000	ESD	Access and preparation projects for two sites in the Kingston Business Park - potential construction of up to 100,000 square feet, creation of permanent jobs and additions to the tax base.
Ulster	start up contract maufacturing company	$2,260,000	ESD	our plans are to start a injection molding facility that also does assembly and packaging. Our goal would be to have the facility be green and the material we would use on products be as green as we can have. One customer we have is a green company. We would also seek work from solar companies as well as windmill companies. Please contact me so we can get funding ASAP.. Thanks for your interest and future support. Mick Whitman
Ulster	Kingston Business Park	$1,200,000	ESD	Expansion of a building for a manufacturing company in the Kingston Business Park. Armor Dynamics, a maker of bullet and explosive resistant systems and composite materials is located in the Kingston Business Park with 7 employees. The company is in theprocess of purchasing a manufacturing line for composite materials and the equipment is due this summer. The company needs to build an expansion onto the building to accommodate the new manufacturing line. Armor Dynamics is a young company using pesonaland venture capital. They have funding to purchase the equipment but need the Kingston Business Park to help provide the additional space needed. The site and building has been approved for an expansion of up to 45,000 s.f. and the construction can be fast-tracked. The site is served by municipal water and sewer, natural gas, heavy duty electric and fiber optics. This project can move quickly, and we have had discussions wtih ESD and are waiting for more company information. The jobs are projected at aneking additional resources for their technological and military related needs.
Ulster	Ulster County Economic Development Hub	$650,000	ESD	The project would co-locate economic development agencies with shared reception, conference and technology. Agencies involved include: SBDC, UCDC, Tourism, DOL/OET and Cornell Cooperative Extension. The project will be a One Stop business services location that includes agriculture, a key component of the County?s economy. Shared staffing will reduce overall costs and provide a synergy of technical capabilities.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Ulster	Ulster County Revolving Loan Capitalization	$5,500,000	ESD	This is a recapitalization of an existing revolving loan fund. Ulster County has multiple private sector expansions and attraction projects that require economic development assistance. These include a significant job retention component as well as job creation. The project will allow the fit-up of currently vacant buildings or the conversion of soon-to-be vacant spaces as well as the purchase of necessary equipment.This project provides gap financing for multiple ready-to-go projects. This fund is designed to help expand existing and attract new businesses that can provide immediate job creation to distressed areas.Every potential recipient identified has private sec Food distribution company ($1,000,000), Solar product manufacturer ($1,900,000), Foodproduction($750,000), Agricultural food processing facility ($750,000), Renewable energy component manufacturer ($466,000), Renewable energy manufacturer ($466,000), Main Street ($168,000)
Ulster	Tech City Building 25 Fitup	$3,950,000	ESD	This project would provide the costs to fitup a 300,000 square foot building on the corner of Enterprise Drive and Boices Lane in the Tech City complex in the Town of Ulster. The end use of the building is a Center for Excellence which would contain business accelerator space for the Solar Energy Consortium, the use of space for Ulster County consolidated economic development agencies, Town of Ulster municipal purposes, consolidated space for green technology training programs of SUNY Ulster and UlsterBOCES as well as solar manufacturing tenants.
Ulster	Kingston - Ulster Performing Arts Center & Broadway Redevelopment	$500,000	MAIN_ST	
Ulster	County, Municipal, & State Government Offices, NYPA Blenheim-Gilboa Fa	$114,987	NYPA	
Ulster	City of Kingston	$1,800,000	NYSERDA	Railroad reconstruction - Kawasaki Rail Car as test track for new ""green"" battery operated trolly
Ulster	KAWASAKI RAIL CAR DEMONSTRATION PROJECT	$3,000,000	NYSERDA	This project has been sent to Governor Paterson and his staff. It is supported by Senator Schumer and Congressman Hinchey. The project will result in rebuilding of existing rail corridor of 1.5 miles along the Rondout Creek for potential use by KawasakiInnovative Rail Corp (Yonkers is US Headquarters.) Kawasaki developed a ""green"" battery operated transit car for urban transit system use. There have been four meetings with the company, including officials from Japan, with the aim of having Kawasaki bring one of their battery operated cars to Kingston as a demonstration project. The project can be a demonstration of new battery technology, a way to move people around the Kingston waterfront without using cars and buses, and eliminates the need for overhead trolley wiring, resulting in significant savings. The City of Kingston has a Local Waterfront Revitalization Implementation Plan that was developed with the NYS Department of State and local input. The use of the rail on the waterfront to avoid podriven vehicles. Funding is listed in the FTA Stimulus Funding, the Battery facet could be a NYSERDA grant or the project might be a NYS DOT sponsored demonstration using stimulus fund
Ulster	Energy Efficiency Building Upgrades	$1,300,000	NYSERDA	The project would replace air handling units and install insulation at the County?s Community Corrections and DSS/BRC buildings; replace existing parking lot and street lighting on Golden Hill with solar units (manufactured locally) and install solar panels on a recently constructed salt storage facility in New Paltz.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. County	Project	Requested $	State Agency	Additional Detail
Ulster	Ulster County Mental Health Building Rehabilitation	$7,100,000	NYSERDA	Ulster County?s Mental Health building was constructed in 1987. The building must be renovated to support a change in business practices and to increase the amount of group treatment space. The change in business practice requires a new computer system that enables tracking of managed care authorizations to maximize revenues, allowing the department to sustain current levels of treatment capacity and staffing (treatment positions) The 39,600 sq. ft. Mental Health building will be completely renovated. The project also includes all new energy efficient HVAC Systems. Finally, costs for a new computer case management system are included.
Ulster	Energy Efficiency Building Upgrades	$1,300,000	NYSERDA	The Ulster County Facility Study recommended that multiple County buildings? energy efficiency be improved and in some cases that green energy sources be utilized. The project would replace air handling units and install insulation at the County?s Community Corrections and DSS/BRC buildings; replace existing parking lot and street lighting on Golden Hill with solar units (manufactured locally) and install solar panels on a recently constructed salt storage facility in New Paltz.
Ulster	Persen House Interior Renovations	$2,100,000	NYSERDA	The Persen House is at the intersection of John and Crown Street in the national Historic District of the Uptown Stockade District. This project will complete a rehabilitation project on this highly significant structure that displays the span of Kingston?s history from prehistoric times to the present. Due to a lack of funds to complete the interior work, the building has no HVAC systems, safety, egress, accessibility and other items necessary for occupancy and has been unoccupied since the year 2000.The County intends to utilize the building as offices for Ulster County and as a Heritage Center for visitor and community access. There is great interest in the community: when opened for just 4 hours weekly with limited publicity during the summer of 2008, approximately 1,000 visitors toured the facility.To utilize the facility as a tourism and visitor center, the interior of the building requires full HVAC systems, safety and egress compliance, telecommunications, restrooms, ADA accessibility, code ce integral to the visitor experience: interactive computer kiosks for the heritage education aspects of the facility and to provide details on tourism itineraries and other opportunities; a public assembly space including theater seating and audiovisual/; exhibition cases and panels; furnishings for community and visitor education (e.g., tables, computers, leaflet racks, and reception desk.
Ulster	Biodegradable Packaging Films	$20,000	NYSERDA	The project will enable the manufacture of higher quality and enhanced barrier properties biodegradable packaging films at more economical costs. The requested funds will cover costs of electrical infrastructure which were not included within the scope of the original project's budget.
Ulster	$1 trillion competitive replacement of fossil fuels with solar	$3,000,000	NYSERDA	Move from demo prototype to Mfg. prototype, production methods and locations to start Mfg.. Solar technology with patents pending, prototypes, due dilagence engineering report and business plan, that confirm 5x more energy utilization, 1/4 collector areaand installation cost, 1/20th payback period, 3 cents a kWh for 100% electric and hot water, 60% space heat annually, plus sufficient roof area left for solar electric for two electric vehicles at less than equivalent $0.50/Gal. and competitively replace > 30% of world fossil fuel use with this Solar Tech..

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Ulster	New York State Solar Farm	$39,000,000	NYSERDA	New York State Solar Farm Inc. two years ago NYSSF has aquired two sites for New York's First Solar Farms. each site is twenty five acres totalling 50 acres. each site is in final approval for 3MW on each. the first site is in the Town of Schawangunk, the second site is in the town of Gardiner. Both communities are up and comming in green development. Both farms will create 224 jobs and lead our country off fossil fuels. please visit us at www.NewYorkStateSolarFarm.com. Thank you, Anthony Sicari J.R
Ulster	P25 Compliant Radio System	$2,360,000	OFT	An interoperable radio system for emergency communication will be developed. The system includes new base station antennas, repeaters and consoles. This project is essential to meeting public safety communication needs that enhance coverage and interoperability. The project meets the narrow band radio mandate by FCC (2013).
Ulster	Ulster County Broadband ""Opportunities Progr	$3,000,000	OFT	Ulster County?s broadband project will extend and fund broadband facilities to underserved or unserved areas of the county. The project seeks funding from both the Opportunities and the Rural Broadband Programs. Below is the Opportunities Program Reqest.If funded, the initiative will increase access to resources that are vital to citizens, students and business. The program funding requests were was developed utilizing the following: Connectivity priorities are: 1) Public access and public safety, 2) Access in central business districts and corridors, 3) Home-based access for rural residents and businesses. Level of Service Goals are: 1) Residential/homebased businesses 3-10 Mb/s mg, 2) Business access for urban businesses 10 Mb/s mg with static IP, 3)Private networks (including government and education) of 200 Mb/s mg Opportunities Program Request - $3.0 million: Project Summary 1) Municipal buildings/emergency services/county building private network similar to education network in UC with video cosiness districts (uptown, midtown, waterfront) using Wireless Internet Service Provider (WISP) technology piped to 80211 networks in business locations $300,000 3) Wireless Clouds around BOCES linked schools $700,000 4) Equipment for schools and municipand connection costs $300,000
Ulster	Ulster County Mental Health Department Building Renovation and Electroni	$7,104,523	OFT	Ulster County's Mental Health Building was constructed in 1987. The building must be renovated to support a change in business practices and to increase the amount of group treatment space. The change in business practice requires a new computer system that enables tracking of managed care authorizations to maximize revenues, allowing the department to sustain current levels of treatment capacity and staffing (treatment positions). Otherwise, the department estimates it could lose $1.5 million per yearin Medicaid billing related to managed care visits that go unreimbursed. The new computer system will also satisfy the department's need for an electronic medical record. In addition to renovation of building space, major HVAC components are aging out and must be replaced. Total project costs are $7.1 million in capital improvements to the building and computer software/hardware.
Ulster	Expansion of Wallkill Fire Station	$6,000,000	OHS	Expand fire station from 4 bay to 6 bay; add office space, state of the art training room, community center and evacuation center.
Ulster	Sports Park Rec Facilities	$950,000	OPRHP	Complete final 2 ballfields, playground, volleyball, tennis courts, and concession area at the community's new sports park.

County	Project	Requested $	State Agency	Additional Detail
Ulster	Accessible Parks and Nature Centers Project	$150,000	OPRHP	Despite a growing awareness of both need and regulatory mandate, the majority of nature centers and parks in New York?s Mid-Hudson region do not offer a comprehensive set of accessible programs or services and no directory of accessible parks exists. TheAccessible Parks and Nature Centers Project is designed to help fill this gap by assisting organizations in the development of action plans that will build internal awareness, expertise, and policy related to outdoor opportunities for people with disabilities. It will also fund facilities upgrades that will improve accessibility at each site. The proposed project will establish a network and partnerships to help expand and sustain innovative science, conservation, and environmental education programs.The goal is to work with at least 25 organizations of the region directly leading to improved accessibility and programming for 125,000 persons with disabilities each year.
Ulster	City of Kingston	$3,000,000	OPRHP	Carnegie Library Restoration - convert it into a media center for the school district and public
Ulster	NP Sports Park Entrance and Access Road	$510,000	OPRHP	Complete access road and interior park circulation road and jogging path system
Ulster	NP Sports Park Recretional Facilities Project	$950,000	OPRHP	complete final 2 ball fields, playground, volleyball, tennis courts/concession area at community's new Sports Park
Ulster	Scenic Hudson, Inc. - Franny Reese State Park	$250,000	OPRHP	Park improvement.
Ulster	Scenic Hudson, Inc. - Walkway Over the Hudson Circuit Trail	$40,000	OPRHP	Trail improvements and signage for a trail linking Walkway Over the Hudson with Franny Reese Preserve.
Ulster	UPAC Infrastructure Projects: Shovel Ready, Job Creating and Green	$2,000,000	OPRHP	Recent breakdowns in the HVAC (heating and cooling) plant at UPAC have been alarming. For two years we have not booked shows in the three months of summer because our air conditioning plant is completely unreliable. We thought our heating plant was a bithealthier, however during performances of The Nutcracker in December we had a complete breakdown of our heating plant. We brought in a portable Heat Truck which brought the theater up to 50 degrees, but because it was too loud to run during the show, weturned if off when audiences arrived and simply hoped that the heat of 1000 bodies would keep the theater warm. It did, but the heating emergency threatened to close the theater. It still threatens. We have ready plans for both the renovation of the HVAC system as well as the interrelated renovations to the plumbing and restrooms. These projects replace 80 year old infrastructure with Green alternatives as part of the design plan. The total estimated cost of these renovations is $4 million dollars. Theringing another 12,000 people into mid-town Kingston each year.
Ulster	New Paltz Park Improvements	$1,200,000	OPRHP	Constructed in the late ?70s, the New Paltz Park bath-house, pool and general site infrastructure need improvement. Especially critical are rehabilitation of the shower and bathroom facilities and relining the pool. Bathroom and shower facilities will becompletely reconstructed, new plumbing and electrical will be installed, parking lots will be repaved and the pool relined. The project also includes liners for the creation of an ice skating rink in a parking lot to allow year round use of the facility.
Ulster	Hudson Valley Region	$250,000	OPRHP	Scenic Hudson's request for funding for shovel-ready state park improvement projects - specifically - Franny Reese State Park. Letter of support from Senator Saland.
Ulster	Scenic Hudson, Inc. - Franny Reese State Park	$250,000	OPRHP	Park improvement.
Ulster	Scenic Hudson, Inc. - Walkway Over the Hudson Circuit Trail	$40,000	OPRHP	Trail improvements and signage for a trail linking Walkway Over the Hudson with Franny Reese Preserve.
Ulster	Scenic Hudson, Inc. - Franny Reese State Park	$250,000	OPRHP	Park improvement.SUPPORT LETTER

County	Project	Requested $	State Agency	Additional Detail
Ulster	Pond Monitoring	$1,000	SED	High Meadow School is a progressive independent school serving 120 children in grades Pk-8. Our curriculum and ethos is directed by the belief that in a democracy, education's primary purpose is to nurture future participants in democracy. Thus, ServiceLearning projects that connect subject matter to environmental advocacy, such as the one for which we are seeking funding, are a fundamental part of our curriculum beginning in Pre-kindergarten. While, cross-grade collaborations build strong social and ethical citizens. High Meadow School is also committed, by its very mission, to socioeconomic diversity. Therefore we keep our tuition low and provide many avenues for families to access our school for their children. In order to keep our tuition low andto remain accessible, parents provide vital services, teach, and fundraise. Water, Water Everywhere... The fourth and eighth grades will conduct a longitudinal study of two ponds in the Esopus Watershed; one on the site of High Meadow School, and the othually over the course of the study to provide data for their watershed data collection. The grant will pay for: Test Kits for water health monitoring Partnerships and teacher trainings with environmental educators from Ulster County Waste Recovery Agencyin New Paltz, New York. Field Trips to the test sites as well as to cooperating agencies. In-school presenters.
Ulster	New Paltz College, Res Hall Interior Upgrades (College, Shango & Bouton)	$3,100,000	SUNY	
Ulster	New Paltz College, Student Union Building Addition/Renovation	$2,100,000	SUNY	
Ulster	New Paltz College, Replace Roofs - Various Academic Buildings (4)	$3,200,000	SUNY	
Warren	Snow Removal Equipment & Sand Storage Facility	$1,500,000	DASNY	Construction of a snow removal equipment building and associated sand storage facility for use at he Floyd Bennett Memorial Airport.The existing building was built in 1943 and is an advanced state of deterioration, grossly energy inefficient and providesa poor working environment for the employees. A new building will provide a safe, clean, comfortable and energy efficient alternative to the existing structure.
Warren	Warren County DPW Energy Saving Upgrade	$300,000	DASNY	This project will have numerous benefits to the County when completed. The implementation of these energy saving measures will result in a total guaranteed energy savings of over $850,000 throughout the next 15 years. This will also provide the County with upgraded equipment, increasing the comfort of the facility?s occupants. As energy prices continue to rise, the benefits from these changes will be increasingly valuable. This energy and infrastructure upgrade demonstrates Warren County?s commitment tothe environment and conservation of energy, as well as utilizing alternative sources of energy through the waste oil burner.
Warren	Halfway Brook Danm Stabilization & Repair	$1,219,700	DEC	Improvements are required to maintain City's water supply and to provide flood protection for areas below the dam. Project maintains the capacity of the City's water supply and creates the opportunity for industrial growth and regional cooperation and shared water supply and services. Project is essential for long term economic growth and stability of the region. Engineering is complete, project under review by DEC and can be bid out by 2/09 with a construction start of 3/09. Some local funding committed.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Warren	Wilkie & Keenan Reservoirs	$7,170,600	DEC	This project is the stabilization and repair of the Wilkie & Keenan Reservoirs' dams. It is essential to maintaing the City's water supply and for flood protection for areas below the dams. The improvements are mandated by a DEC Consent Order. County	Project	Requested $	State Agency	Additional Detail
Warren	Alder Brook Road over Trout Brook	$1,500,000	DOT	Alder Brook Road over Trout Brook
Warren	Heath Road Bridge/Patterson Brook BIN 3305470	$0	DOT	Heath Road Bridge/Patterson Brook BIN 3305470
Warren	Peaceful Valley Bridge/Baker Brook BIN 3305390	$0	DOT	Peaceful Valley Bridge/Baker Brook BIN 3305390
Warren	Tannery Bridge/Stony Kill BIN 3305570	$1,429,000	DOT	Tannery Bridge/Stony Kill BIN 3305570
Warren	Bay Street Reconstruction	$2,750,000	DOT	The project is approximately one mile long beginning at the intersection of Washinton St. and ending at the City line. It includes a box out section with new curbing and an asphalt overlay of the majority of the roadway. Selective drainage improvements are proposed to rehabilitate some deteriorated catch basins and to separate stormwater drainage from the sewer system. It also includes approximately 1200 ft of water main replacement. The sanitary work will include replacement of an old deteriorating wastewater force main. This project is a continuation of the Central Business District revitalization effort. The City is the traditional economic center of the region and the central city in the Glens Falls Metropolitan Statistical Area (MSA). The City isthe key component and integral part of the regional economy. This project will serve to continue the Central Business District revitalization and is expected to create an additional 20-30 retail and service sector jobs in the long term.
Warren	Beach Road Lake George Corinth Road Queensbury- improve infrastruct	$20,000,000	DOT	Beach Road Lake George Corinth Road Queensbury- improve infrastructure
Warren	Bridges	$1,428,571	DOT	Milton Street Bridge, Warrensburg- have been found deficient on DOT Inspections and have been engineered and scheduled for replacement or rehabilition.

County	Project	Requested $	State Agency	Additional Detail
Warren	Warren County, South Street Reconstruction & Streetscape Improvements	$500,000	DOT	Warren County, South Street Reconstruction & Streetscape Improvements This project compliments other CBD infrastructure improvements recently completed. These improvements are part of the South Street Revitalization Plan which targets this 3 block areafor comprehensive redevelopment. State funding of $94,000 has been committed to the project. Project includes street reconstruction, curbs, sidewalks, lighting, drainage and water and sewer improvements. Concept plans and preliminary engineering will becompleted by March 2009. Project can be bid in May 2009, with construction start in June 2009. Project is part of a comprehensive plan for revitalization of the 3 block mixed use area which is a part of the Central Business District. NYS Facade and Brownfield funds have already been committed to the project area. Several private redevelopment projects are currently underway. Project is a major component of the CityÆs revitalization effort currently underway.
Warren	Washington County, Access Road Route 149 and Goodman Road, Town of	$1,500,000	DOT	Washington County, Access Road Route 149 and Goodman Road, Town of Fort Ann, Washington County -- The Town of Fort Ann is home to one of the preeminent youth sports destination resorts in the world. While the park has been very successful in its first two years of operation, the large amount of traffic generated by the park needs to be addressed. This proposed access road would provide direct access from Rt. 149 to the park and take all of the traffic off this residential road. There is a lack of attractions and lodging to cater to the parents of players staying at the park. Currently, most families are forced to stay in Lake George while their child is at the soccer park. This situation is not ideal for the parents or the community. Several developers have been contacted regarding placing a hotel and possibly some commercial businesses in this area, and they have stated that an access road of this type would greatly increase their willingness to make that scale of investment in Fort Ann. The Town ocial, hospitality, and service industry expansion in the Town of Fort Ann. There is the possibility that this road could literally create hundreds of jobs in the coming years as teh park expands and brings more and more people to Fort Ann each summer.
Warren	Transit Connection Bus Garage Reconstruction	$400,000	DOT	Transit Connection, a division within the not-for-profit agency Community Work and Independence, transports disabled adults to and from their residences, day programs and employment. The fleet of over 100 vehicles is maintained by a small aging bus garage with inadequate space and one bathroom. The facility is in need of substantial reconstruction or replacement to ensure the ability to continue to maintain the fleet and transport adults with developmental and other disabilities. It is expected that over 20 construction jobs would be created or retained and that this project could commence in 180 days or less.
Warren	Road Projects Milling and Paving	$1,881,000	DOT	Seven roads are in critical need of milling and paving. These projects will make our roads safer for the public as well as provide jobs in the area.
Warren	Tannery Road and Grist Mill Bridge Replacement	$2,862,000	DOT	Two bridges must be replaced or closed. Due to our rural area, closing a bridge creates a big inconveniece to the area residents which includes long travel distances to get to work.
Warren	Lake Luzerne Sidewalk Project	$250,000	DOT	The Town of Lake Luzerne proposes to install 1.5 miles of sidewalk along Route 9N that will assist with connecting the existing Middle School with the new Town Community Center Facility. The sidewalk will extend past the community center to meet future sidewalks that will connect to the High School and the Main Street of Lake Luzerne. The project will benefit residents and tourists by providing easy access to variety of recreational activities. The project will create 5 temporary construction jobs.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Warren	Lake Luzerne Main Street Rehab	$432,000	DOT	The Town of Lake Luzerne proposes the rehabilitation of five Main Street Buildings that include a Grocery Store, Auto Repair Facility, White Water Rafting Facility with an attached Office/Commercial Building and a Restaurant as part of an on-going effortto improve the appearance of Main Street. Theses building all contain vacant space and require significant amount of rehab that is beyond the economical means of the property owners. The rehab of the buildings will allow for additional operational spaceand enhancements to the Main Street for residents and tourists. The project will create 10 jobs and retain 22. The project total is $480,000 where $48,000 will be provided as cash and in-kind services.
Warren	Collector/Sanitary Sewer	$3,100,000	EFC	
Warren	West Brook Stormwater Improvement Project	$1,200,000	EFC	The proposed project has been configured to collect and convey storm water runoff throughout the West Brook watershed into a series of basins/constructed wetland areas designed to remove sediment loading and chemical constituents. The project will reduce
Warren	Staple/Knight St. Sanitary Sewer Replacement	$1,316,000	EFC	This project will eliminate sanitary sewer overflows caused by inadequate, antiquated infrastructure wihich impact the Champlain Feeder Canal and Hudson River. The project is required to bring the City into compliance with a current DEC consent order. The project improves water quality and promotes recreational use of the City waterfront areas. The project has been submitted to NYSDEC for review. Project can be bid out in 3/09 with a construction start of 4/09. Federal and State assistance is required,minimal local funding available but insufficient. The project serves to implement the goals of the City's Local Waterfront Revitalization Plan, which is a joint effort in cooperation with adjacent waterfront communities.
Warren	Water Street Pump Station	$500,000	EFC	This project replaces a sanitary sewer pump station with a history of sanitary sewer overflows. Project includes new pumps, controls, sewage grinder, site work and provision for operations during power outages. This project is required to eliminate sanitary sewer overflfows, improve water quality and meet DEC requirements. It is part of a pending consent order with NYSDEC to eliminate sanitary sewer overflows. The project will also create and promote recreational opportunities, which will serve to boostthe local economy. Design will be completed shortly and bidding and construction can take place in the spring of 2009.
Warren	Sanford Street Pumping Station	$250,000	EFC	This project is for the replacement of the failing sanitary sewer pump station. It will eliminate sanitary sewage overflows and bring the City into compliance with current DEC Consent Order. The design/engineering to be completed in 4/09 with bids sent out in 8/09 and construction starting in 9/09.
Warren	Town of Warrensburg Wastewater and Sewer Plants	$2,080,000	EFC	This project includes three parts; (1) expansion of the Wastewater Treatment Plant (WWTP) (2) installation of Effluent Disinfection for the WWTP and (3) establishment of the Library Avenue Sewer District.
Warren	County Buildings	$2,500,000	EFC	Warren County Social Services Building and Former Warren County Jail- two building are in need of demolition and the site will be prepared for future county structures.
Warren	Airport Construction	$1,200,000	EFC	Equipment Building to replace previous building that was removed to expand the airport- needed to put emergency snow removal equipment in
Warren	Court Renovation and Expansion	$20,000,000	EFC	expand and update the warren county municipal center

County	Project	Requested $	State Agency	Additional Detail
Warren	Warren County, Staple/Knight St. Sanitary Sewer Replacement & Thornber	$1,316,000	EFC	Warren County, Staple/Knight St. Sanitary Sewer Replacement & Thornberry Pump Station Force Main Realignment Project has been submitted to NYSDEC for review. NYS DEC review of this project will be completed 1/09; the project can be bid out in 3/09 witha construction start in 4/09. Federal and state assistance is required, minimal local funding available but insufficient. This project will eliminate sanitary sewer overflows caused by inadequate, antiquated infrastructure which impact the Champlain Feeder Canal and Hudson River. The project is required to bring the City into compliance with a current DEC consent order. The project improves water quality and promotes recreational use of the city waterfront areas. The project serves to implement the goals of the City's Local Waterfront Revitalization Plan, which is a joint effort in cooperation with adjacent waterfront communities.
Warren	Warren County, City of Glens Falls Water/Sewer Dept. Manhole Replaceme	$500,000	EFC	Warren County, City of Glens Falls Water/Sewer Dept. Manhole Replacement Program The City storm and sanitary sewer infrastructure is very old and deteriorated. Collapsing and leaking manholes cause sink holes to form under roads, undermining the roadways and damaging buried utilities. Replacement of 100 manholes is an important component to the on going effort to replace and repair the CityÆs aging infrastructure. This project is considered to be a repair project and requires no permits. It can be implemented as soon as funds are available. Project can commence March 2009. The project is part of the improvements that are required to replace the CityÆs aging infrastructure and which is currently beyond the City financial capability.
Warren	Warren County, Replacement of Water Street Pump Station	$500,000	EFC	Warren County, Replacement of Water Street Pump Station This project replaces a sanitary sewer pump station with a history of sanitary sewer overflows. Project includes new pumps, controls, sewage grinder, site work and provision for operations during power outages. Design will be completed in January 2009. Bidding and construction can take place in the spring of 2009. This project is required to eliminate sanitary sewer overflows, improve water quality, and meet DEC requirements. The project will also create and promote recreational opportunities, which serve to boost the local economy. This project is part of a pending consent order with NYSDEC to eliminate sanitary sewer overflows.
Warren	Wastewater Treatment Plant Expansion	$760,000	EFC	The expansion will increase the plant's treatment capacity to fulfill a critical community need and foster growth.
Warren	Effluent Disinfection Installation	$520,000	EFC	Swimmable Hudson Initiative, a State mandate, requires municipalities to add tertiary treatment to existing wastewater treatment facilities.
Warren	Library Avenue Sewer District Establishment	$800,000	EFC	A plan to expand service to the proposed Library Avenue Sewer District. This new district would provide service to 80 existing households/homes and serve an area where an increased frequency of failure of septic systems has been noted and the replacementof systems is problematic due to small lot sizes.
Warren	Town Water Supply Extension	$800,000	EFC	The project will encompass 7,300 feet of 8"" water main from the hamlet of Chestertown. This will provide a public water source for an industrial park and would be helpful to lure tenants who will provide jobs in this rural are

County	Project	Requested $	State Agency	Additional Detail
Warren	Tech Meadows Light Industrial Park	$1,200,000	ESD	The project consists of developing a 46-acre industrial site into a shovel ready light industrial park. This includes extending sanitary sewer and water and extending and upgrading electric and gas service to lots 3-8. Initial planning and design activities have been completed, including site planning, subdivision apporval, zone changes and enviromental clearances. A Generic Environmental Impact Statement (GEIS) have been completed and adopted by the city of Glens Falls. The GEIS for the project projects that the full build out of the Park would result in 500,000 sq. ft. of development and have a full market assessed value of forty (40) million dollars. The GEIS further concluded that based on other comparable light industrial parks, the median job creation would be one job/500 sq. ft. of new development. This results in 1,000 new jobs. This project is a key component of the City's long range economic development strategy, and will serve to expand the City's tax base and strengthen the City's positionximity to the new AMD manufacturing facility.
Warren	Renovation of Purchased Building for Museum's Permanent Home	$200,000	ESD	The World Awareness Children's Museum is renovating an turn of the century 13,000 sq ft. building in the CBD Redevelopment area of Glens Falls. Through a Capital Campaign the Museum has raised in cash and pledges $1.3 million over 3 years. Renovations have stopped due to a shortfall in funding with the downturn in the economy. Structural enhancement,facade restoration, new windows, a new roof, and an elevator are complete. This project would entail the following additional necessary improvements beforeoccupancy is possible: installation of the HVAC system, electrical wiring, lighting, plumbing, flooring, framing walls and doors and a new roof over a leaking back underground storage room. The building will house the museum's interactive cultural exhibitions, collection of 6000+ pieces of international children's art, 3000+ international artifacts, textiles and costumes used in interactive installations and outreach programs to serve our educational mission of raising an awareness and appreciation forand has had to move twice. All the architectural plans are completed for the remainder of the inside renovations which would put construction workers to work immediately. This is a shovel ready project that would help the slow construction market in thilete an important community project that draws tourists to the area. The Museum will also have a shop and pay sales tax when completed. It is a major educational institution in the region.
Warren	Tech Meadows Light Industrial Park	$1,200,000	ESD	This project consists of the development of a 46-acre industrial site into a shovel ready light industrial park. Initial planning and design activities including site planning, subdivision approval, zone changes and environmental clearances have been completed. A Generic Environmental Impact Statement (GEIS) has been completed and adopted by the City of Glens Falls. Additional activities needed to be completed include extending sanitary sewer and water and extending and upgrading electric and gas service. The City and this Park are strategically positioned to take advantage of the AMD development in Malta, NY. More than 30 companies that are suppliers to AMD are expected to be located in close proximity to the new AMD manufacturing facility.
Warren	Theatre Renovation Project	$2,900,000	ESD	I would like to take this opportunity to express my strong support for the Strand Theater in Plattsburgh, NY and their ongoing renovation project. All the plans are in order for renovation work to begin immediately and be completed within one year. This project would include work for skilled craftsmen not likely to be impacted by other general construction activity in the region.

County	Project	Requested $	State Agency	Additional Detail
Warren	Warren County, Tech Meadows Light Industrial Park, Glens Falls	$1,200,000	ESD	Warren County, Tech Meadows Light Industrial Park, Glens Falls -- Project consists of construction of infrastructure for a 46 acre industrial park that will provide 8 shovel ready five acre parcels. Project is scheduled for construction in spring 2009.Project represents an investment of $1,600,000, of which $400,000 is committed, leaving a $1,200,000 financing gap. Project will position Greater Glens falls as a prime location for AMD spin-off development for customers and suppliers.
Warren	Gore & Whiteface Mt. Infrastructure Improvements	$6,000,000	ESD	The snowmaking infrastructure improvements included the installation of air and water pipe lines and pumping facilities for Gore Mt. and Whiteface Mt. ski centers. The projects have secured all environmental improvements from the NYS Department of Environmental Conservation and the Adirondack Park Agency. The improvements will allow for increased operational efficiencies and energy savings. The projects will ensure economic development for the north county by replacing antiquated infrastructure and installing new infrastructure for increased services
Warren	Balsam House Re-construction	$1,000,000	ESD	Re-construction of a 58,000 sq.ft. resort and conference center. This will provide 8 construction jobs for 6-12 months and 38 jobs thereafter.
Warren	Tech Meadows Industrial Park	$1,200,000	ESD	Final infrastructure components are necessary to complete this 46-acre NYS-certified shovel-ready, light industrial park within the City of Glens Falls. This GEIS site is within ½ mile of the Exit 18 Interchange at I-87. E-Zone incentives are available.Funds totaling 1.2 million are required to match committed funding of $400.000 for water, sewer, gas and electric extension. Estimated new jobs are 1,000. Site suitability for AMD related companies.
Warren	Warren/Washington Co Shared Fire Trianing Ctr.	$6,880,000	OHS	This shared services project, this training facility will be used by all volunteer and professional fire fighters in both Warren and Washington counties to assure they receive proper training
Warren	Group Home Reconstruction	$250,000	OMR	Community Work & Independence is a not for profit agency that provides services including residential group homes for individuals with developmental and other disabilities. Several of these group homes are in need of reconstruction for health and safetyissues, and to improve the quality of life for those individuals among us that cannot always help themselves. This request would create or retain 12 jobs and the work would commence in about 90 days or less.
Warren	Roger's Rock Pier and dock Re-Construction	$400,000	OPRHP	Re-construction of the town pier and docks in Rogers Memorial Park. This project will construct ADA compliant public docks, stormwater management system, a dry hydrant to service fire trucks, and reconstruction of the decking and shelter structure. Sincethe Town of Bolton relies heavily on the tourist industry, this project will provide economic, environmental, and stormwater management for the area.
Warren	Park Renovation	$220,000	OPRHP	Project will rehab park including a new playfield, multi use field construction, excavation, seeding, resurfacing, lighting and Traffic (vehicle & pedestrian) work. This project will have a sustained local and regional impact in terms of economics as well as quality of life.
Warren	Glens Falls City Schools, Big Cross St. Elementary	$326	SED	
Warren	Glens Falls City Schools, Kensington Road Elementary	$2,120	SED	
Warren	Queensbury UFSD, Middle School	$175,000	SED	
Warren	Adirondack CC, New Master Plan	$150,000	SUNY_CC	
Warren	Adirondack CC, Parking Lot Lighting	$82,012	SUNY_CC	
Warren	Adirondack CC, Upgrade Fire Alarm Systems	$326,228	SUNY_CC	
Warren	Adirondack CC, New and Upgraded Elevators	$656,100	SUNY_CC	
Warren	Adirondack CC, Warren Hall Roof Replacement	$54,675	SUNY_CC	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Warren, Washington	Warren-Washington fire training center - Queensbury	$3,000,000	OHS	This project consists of the construction of a state of the art fire training facility to be shared between Warren and Washington Counties. This facility will provide a much needed training venue in the north county.
Washington	T. of White Creek Housing Rehab Program	$400,000	CDBG	
Washington	V. of Whitehall Sewer Lateral Replacement Program	$400,000	CDBG	
Washington	T. of Fort Ann Housing Rehabilitation Program	$400,000	CDBG	
Washington	V. of Hudson Falls Downtown Housing Rehabilitation Program	$400,000	CDBG	
Washington	V. of Fort Edward Broadway Building Improvement Program	$400,000	CDBG	
Washington	Village Water Distribution System Emergency Replacement Areas	$450,000	CDBG	Funding will be used toward 11,762 linear feet of replacement waterlines, fire hydrants and valves. These areas are serviced by 100+ year old waterlines and do not provide the proper pressure required for fire fighting. These lines are constantly rupturing causing expensive emergency repairs and Boil Water Orders from the DOH.
Washington	New Emergency Service Facility	$2,500,000	DASNY	Construction of a new 12,000 sq.ft. Emergency Service Facility to house the combined Cambridge Volunteer Fire Company and the Cambridge-Greenwich Police Headquarters. -Property has been purchased. -Required environmental investigations are complete. -NYSParks archeological investigations are complete. -Preliminary design work is under way, funded by NYS Senate and Assembly member item grants. -Project is ""shovel read
Washington	Village of Greenwich restoration of Village Hall	$500,000	DASNY	Restoration of the Village Hall community center, auditorium and youth bureau.
Washington	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of one day program in Hudson Falls.
Washington	Pember Library & Museum Capital Expansion	$1,400,000	DASNY	The Pember is requesting $1,400,000 for green design and construction of a new wing with complete handicapped accessibility, modernization of infrastructure and creation of a cultural campus. Funds would be used to expand the Pember Library & Museum facilities and integrate the Pember, the Slate Valley Museum and the Mettawee River - Rails to Trails. Across the Mettawee River by footbridge, the Slate Valley Museum interprets the history of the regions? slate industry and cultural heritage. The Pember Library and Museum celebrates 100 years of service to the communities of New York and Vermont. Capital expansion plans will make the 100-year-old Pember fully accessible with a grade level entrance exhibit space and accessible landscaping. The Pember willhave a large capacity elevator to the first and second floor, fire stair and a geothermal climate controlled facility with new HVAC. The Pember will have a new Community Room (capacity approx. 80 people/ on the main floor) for educational classes, commun
Washington	Washington County Sewer District Wastewater treatment plant, Village of F	$1,900,000	DEC	Project would consist of the installation of a 60 ft diameter concrete settling tank to increase the capacity of the existing system and reduce the discharge of nutrients and pollutants to the Hudson River. Also would expand existing coverage area and allow addition of large volume customers.
Washington	Town of Whitehall Troy Shirt Factory	$190,685	DEC	This project consists of the environmental remediation of the old Troy Shirt Factory in the Village of Whitehall. This large building is currently vacant due to asbestos contamination. There is also soil contamination with petroleum and volatile organic compounds. Cleanup will provide a large building fit for commercial or light industrial purposes.
Washington	Resurfacing on Route 372 from Route 29 to CR 74A Towns of Easton and	$7,297,584	DOT	Resurfacing on Route 372 from Route 29 to CR 74A Towns of Easton and Greenwich Village of Greenwich Washin

County	Project	Requested $	State Agency	Additional Detail
Washington	RT. 4: FORT EDWARD-HUDSON FALLS PART 2	$14,400,000	DOT	RT. 4: FORT EDWARD-HUDSON FALLS PART 2 Program update reduced scope from Reconst. which is well under design to a 1R paving project. First code shown is for 1R second is for the reconst. design
Washington	Clinton Avenue over D&H Railroad (BIN 2260060) Saunders/Division Stree	$3,000,000	DOT	Clinton Avenue over D&H Railroad (BIN 2260060) Saunders/Division Streets over D&H Railroad (BIN 2260070) 175515/175656 $0.400M added for drainage on Rte 22
Washington	Truthville Rd. (CR12)/Mettawee	$2,500,000	DOT	Truthville Rd. (CR12)/Mettawee
Washington	Reconstruction of CR 61 Bridge over the Battenkill-Washington County	$1,870,000	DOT	Reconstruction of CR 61 Bridge over the Battenkill-Washington County
Washington	Dewey s Bridge	$4,057,000	DOT	Dewey s Bridge
Washington	Washington Cnty local government pavement preservation program	$11,300,000	DOT	Washington Cnty local government pavement preservation program
Washington	Batten Kill Railroad Phase I	$5,120,000	DOT	Improve entire 18 miles of track to the Cargill plant at East Greenwich to a level of ""good repair"". These tracks are used to move approximately 500 carloads/year of livestock feed and crop fertilizer to plants located in the south central section ofWashington Cou
Washington	Battenkill Railroad phase II	$7,525,000	DOT	The phase II program will improve the track structure and rail bridges to provide service to customers along the 2nd portion of its route structure and open the 100 acre industrial development site at Thomson to development.
Washington	Rehabilitate Historic 1890 Phoenix Truss Over the Mettawee River	$2,308,000	DOT	
Washington	Washington County Trailway -- Bridge Replacement	$200,000	DOT	This Transportation Enhancement Project is supported by NYSDDOT Commissioner Glynn. The project involves the construction of a pedestrian, bicycle, and snowmobile use bridge on the Washington County Trailway, a public rail-trail which is owned and administered by New York State Parks. The bridge is located in the Village of Granville, where the Trailway crosses the Metawee River.
Washington	Clinton Avenue over D&H Railroad (BIN 2260060); Saunders/Division Stree	$3,800,000	DOT	
Washington	Washington County, Batten Kill Railroad Phase I	$5,120,000	DOT	Washington County, Batten Kill Railroad Phase I - Rehabilitate 18 miles of track from Eagle Bridge to East Greenwich and finally on to the Passenger Depot in Salem. In addition, a one-mile spur serving the Salem Passenger Depot and four bridges in dire need of repair will be rehabilitated and brought back to safe operating condition in this project. Agriculture is an important component of Washington County's economy, generating $100 million+ in annual sales revenue of which $70 million comes from theproduction and sale of milk. The project proposes to improve the entire 18 miles of track to the Cargill plant at East Greenwich to a level of ""good repair,"" for the resumption of the Batten Kill Rambler scenic passenger service to boost tourism in thearea. This railroad, and the businesses it supports is an integral part of Washington County's working landscape. Use of this line for freight drastically reduces the amount of tractor trailers on the roads and is far more efficient than truck
Washington	Washington County, Washington County Local Government Pavement Pres	$11,300,000	DOT	Washington County, Washington County Local Government Pavement Preservation Program project involves the resurface/overlay/rehabilitation/ repair of approximately 175 miles of highway pavements in the county that are in the worst condition. The project would be matched with local share of approximately 5% of the federal grant The project would allow the local municipalities to resurface four years worth of projects in one summer. Project will provide economic benefits by making it easier and less expensive for businesses to transport goods into, through, and out of the County by reducing travel time and wear and tear on vehicles.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Washington	Fort Edward Industrial Park Access Road	$750,000	DOT	Fort Edward Industrial Park Access Road -- Project involves ROW acquisition and roadway construction to provide heavy truck access to the Fort Edward Industrial Park, thereby avoiding congested downtown and residential streets. The project is estimatedto require a total investment of $2,500,000, and the Town and Village of Fort Edward have requested $750,000 in support of that budget. The Fort Edward Industrial Park is attractive to many businesses because of the new infrastructure, and its proximityto the major highway I-87. Several companies have expressed interest and noted that they would move in immediately if there were a better truck route into the Park.
Washington	Natural Gas Line Extension	$500,000	EFC	Extend natural gas pipeline approx. 3 miles along Route 29 commercial corridor to provide service to existing businesses and residences, Greenwich-Easton Rescue Squad bldg, Wash. County Fair Grounds, a Fort Miller group manufacturing facility and a 60 acre site
Washington	Washington County Sewer District Alma Ave/Feeder Canal Sewer Rehabilit	$570,000	EFC	This project will rehabilitate or replace approximately 3600 feet of 70 year old sewer main. The deteriorated condition of this section of the system allows groundwater to infiltrate, thus reducing the hydraulic capacity of the remainder of the system.Will allow additional residences to connect and reduce pollution flowing to Hudson.
Washington	Raw water intake and transmission improvement	$1,500,000	EFC	replace the raw water intake at Pine Lake and 2,500' of raw water transmission line and make spot repairs at other locations along the intake line to the treatment plant and then replace and bury a portion of the treated water main along Rt. 22 that waslaid on top of the ground. - Pine Lake and Blue Goose Road
Washington	Village of Whitehall raw water intake and transmission improvement	$2,500,000	EFC	This project proposes to replace the raw water intake at Pine Lake and 2500 feet of raw water transmission line and make spot repairs at other locations along the intake line to the treatment plant and then replace and bury a portion of the treated watermain along rte 22 - this project is necessary to provide the village with safe and reliable water supply.
Washington	Village of Whitehall water main replacement Broadway and Buckley Road	$2,150,000	EFC	This project will replace the water mains under Broadway and Buckley Roads in the Village. The current main is severely tuberculated to the point that effective diameter is down to about 6 inches in most areas. Breaks in the main below US Rte 4 cause large disruptions in truck traffic and NYSDOT has requested that the Village reconstruct the main outside the paved roadway.
Washington	Village of Granville Water Treatment Plant Upgrades	$1,780,465	EFC	The project would consist of drilling four 24 inch diameter gravel packed wells to replace the existing 16 inch diameter wells, constructing new water treatment plant facility with micron filtration and UV treatment as well as update several components of the distribution system. The current well field has been determined by DOH to be ground water under the infuence of surface water and needs to be moved.
Washington	Village of Whitehall sewer system improvements	$7,900,000	EFC	This project is a comprehensive rehabilitation of the Village's wastewater collection and treatment operation. Will replace @3 miles sewer lines; sever connections between the stormwater and sanitary sewer systems; a 1.5 MG equalization tank is needed;rehabilitation of 10 pumping stations; new force mains and extensive lateral replacements must be constructed.
Washington	Village of Whitehall West Street Drainage	$400,000	EFC	This project will alleviate an existing and recurring flooding problem on Broadway in the Village of Whitehall. New drainage would be installed on 300 ft of Broadway, 325 of Chapin Alley and 3000 ft of concrete sidewalk on West St. These improvements were initially included in the NYSDOT replacement of the Saunders St and Clinton Ave railroad bridges but were eliminated due to funding cuts.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Washington	Town of Fort Ann infrastructure expansion	$0	EFC	Will extend water and sewer infrastructure along rte 149 west of the Village and along the proposed access road to the Golden Gate Youth Soccer facility.
Washington	Village of Greenwich water tower and well repair	$1,000,000	EFC	The Village is required by DOH to develop a new water source as their current well is classifed as ground water under direct influence of surface water. Also, the water tank needs repair.
Washington	Town of Fort Ann Chocolate Moose Campground Infrastructure	$0	EFC	This project would provide water and wastewater treatment infrastructure to a proposed RV campground on the south side of State Rte 149 in the Town of Fort Ann.
Washington	Washington County, Water Main replacement Broadway & Buckley Road, V	$2,150,000	EFC	Washington County, Water Main replacement Broadway & Buckley Road, Village of Whitehall, Washington County -- This project will replace the water mains under Broadway and Buckley Roads in the Village. The Broadway main is the 'backbone' of the distribution system and feeds the entire western portion of the Village. The current main is severly tuberculated to the point that effective diameter is down to about 6 inches in most areas. Current main also runs below US Rt. 4. Frequent breaks cause large disruptions to truck traffic, and NYSDOT has requested that the Village reconstruct the main outside the paved roadway. The water main section along Buckley Road serves the public schools as well as several industries, businesses, residences, and working farms. Recent inspections have indicated decreased wall thickness. The village would like to replace this main now to avert increased breaks in the future stemming from deteriorating wall conditions. This project would create 10 jobs during construction. Lcomplete engineering study has been done as well as the adoption of a Water Systems Facilities Plan.
Washington	Washington County, Water Treatment Plant Upgrades, Village of Granville,	$1,780,465	EFC	Washington County, Water Treatment Plant Upgrades, Village of Granville, Washington County -- In February of 2007, the DOH determined that the well field the Village uses as its supply for municipal water is Ground Water Under the Influence of surface water (GWUDI). This determination required the Village to find a new source for their water treatment plant. To date, the Village has completed a hydraulic study of the entire existing water system, identified new groundwater sources, drilled test wells, and submitted a preliminary engineering report to DOH for approval. The proposed project would consist of drilling four (4) twenty-four inch diameter gravel packed wells to replace the existing 16 six inch diameter wells, constructing the new water treatment plant facility complete with micron filtration and UV treatment as well as update several components of the distribution system. This project would create economic benefits for the Village by increasing water capacity that will help promote the Viln, adopted June, 2003, as an important goal. This project is estimated to benefit 2,600 residents, 460 businesses, create 15-20 jobs during construction and 3 jobs post-construction.
Washington	Washington County, Alma Ave./Feeder Canal Sewer Rehabilitation, Hudsor	$570,000	EFC	Washington County, Alma Ave./Feeder Canal Sewer Rehabilitation, Hudson Falls, Washington County -- This project will rehabilitate or replace (as necessary) approximately 3,600' of 70 year old sewer main. The deteriorated condition of this section of thesystem allows groundwater (up to .5 million gallons/day) to infiltrate, thus reducing the hydraulic capacity of the remainder of the system and prevent pollution of the Hudson River. The completion of this project will permit additional residences (manywith failing septic tanks and drain fields) to connect to the sewer system and reduce the amount of pollution flowing into the Hudson River by decreasing combined sewer overflows. The project will prevent pollution of the Hudson River and allow job growth in the District and surrounding areas by increasing the capacity of the existing treatment plant.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Washington	Washington County, Raw water intake and transmission improvement, Villa	$1,500,000	EFC	Washington County, Raw water intake and transmission improvement, Village of Whitehall, Washington County - This project proposes to replace the raw water intake at Pine Lake and 2,500' of raw water transmission line and make spot repairs at other locations along the intake line to the treatment plant and then replace and bury a portion of the treated water main along Route 22 that was laid on top of the ground. The cost of these 2 segments of the village water supply improvement project is $2.5 million. The total cost of the overall project is $9.490 million and is necessary to provide the 2,600 residents in the village with a safe and reliable water supply. The project will provide the village with a safe and reliable water supply.
Washington	Washington County, Secondary Clarifier	$1,900,000	EFC	Washington County, Secondary Clarifier, Village of Ft. Edward, Washington County -- Project would consist of the installation of a 60' diameter concrete settling tank. To date, the connections for influent and effluent are in place. The site has been archeologically cleared, and engineering drawings have been done. In addition, $100,000 of existing funding is in place for this project. This project would benefit the sewer district and the communities it serves by increasing capacity of the existing system and reducing the discharge of nutrients and pollutants into the Hudson River. This project is estimated to positively impact 100 businesses and 15,000 residents. It is anticipated that the project will create 20 jobs during construction and up to 120post-construction through the expansion of the sewer district that will be made possible through this effort. This increased capacity will also allow more residential units to hook into the sewer system thus eliminating additional pollution created by fa as well as the addition of new large-volume customers in the existing coverage area. This will lead to increased economic development and job creation, which will have positive impacts outside the sewer district.
Washington	Milk Processing Plant	$400,000	ESD	Milk processing plant and distribution system for own farm milk production
Washington	Town of Fort Edward Rte 4 industrial park access road	$750,000	ESD	Town of Fort Edward Rte 4 industrial park access road
Washington	Town of Fort Ann commercial development plan	$0	ESD	This project would fund a study of the proposed commercial corridor and develop an informed plan for the town to follow as it seeks to control development related to the Golden Goal Youth Soccer Center.
Washington	Expansion of Irving Tissue Corporation	$1,500,000	ESD	Expansion of Fort Edward Plant
Washington	Irving Tissue Corporation's Fort Edward plant	$1,500,000	ESD	Letter of support for a project that involves a 136,000 square-foot expansion and a new state-of-the-art paper machine at the Irving Tussue Corporation's Fort Edward plant in Washington County.
Washington	Irving Tissue Corporation	$1,500,000	ESD	Letter of support from Senator Little on a major expansion at Irving Tissue Corporation's Fort Edward plant in Washington county. This investment includes a 136,000 sf expansion and a new state of the art paper machine scheduled to be delivered this summer.
Washington	Hudson Falls Main Street Revitalization Program	$325,000	MAIN_ST	
Washington	Village Of Greenwich Main Street Program	$246,766	MAIN_ST	
Washington	Washington County Hampton Rail Terminal - Hampton Alternative Energy P	$1,500,000	NYSERDA	The Hampton Avenue Alternative Energy Park is developing a number of bioenergy and other businesses at a 100 acre site in the Town of Hampton. HAEP and the Washington County Local Development Corporation are pursuing the development of a biodiesel production plant and other bioenergy businesses at the site, including a seed crushing facility (soybeans), a woodchip operation, a biodigester using dairy cow manure to generate heat and electricity, a commercial greenhouse and a green data center. Funds are needed to build tracks, construct a new railcar dock and track, and construct a salt shed near the new tracks.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Washington	Washington County telecommnications inventory & GIS studies	$50,000	OFT	Telecommunications inventory allowing Washington County to understand telecommunications resources available. The study would consist of telecom carrier central offices, points of prosence, telecom providers and the services offered in region, telecom provider areas, telecom fiber optic infrastructures, wireless infrastructure.
Washington	Firehouse Expansion/Renovation	$1,300,000	OHS	The West Fort Ann Vol. Fire Co. is requesting funds to rehabilitate and expand our firehouse. We are a IRS 501(c)3 registered charity who serves a growing rural area of Washington County with a large volume of mixed traffic. The firehouse is an inefficie
Washington	Village of Greenwich new fire house	$750,000	OHS	Construction of new fire house to alleviate crowding and substandard facilities at the current fire dept which shares facilities with the Chamber of Commerce and the Village Offices.
Washington	NEW BUILDING	$1,000,000	OHS	WE ARE ATTEMPTING TO TEAR DOWN OUR EXISTING DILPIDATED BUILDING,AND REPLACE WITH AN ENERGY EFFICIENT, ENVRIOMENTALLT FRIENDLY AND SAFE WORKING ENVIRONMENT FOR OUR STAFF AS THEY PROVIDE EMERGENCY MEDICAL SERVICES TO THE CITIZENS OF WASHINGTON COUNTY AND MORE SPECIFICALLY THE VILLAGES OF HUDSON FALLS AND FORT EDWARD AND THE TOWNS OF KINGSBURY AND FORT EDWARD. AS PART OF THE PROJECT, ASBESTOS WILL BE REMOVED AND WE WILL BE CONNECTING INTO THE MUNICIPAL SEWER SYSTEM. WE WILL BE ABLE TO PROVIDE EMERGENCY SHELTER IN THE EVENT OF DISASTER. WE WILL ALSO BE ABLE TO ACCOMODATE EMT TRAINING CLASSES AND COMMUNITY SAFETY AND FIRST AID TRAINING.
Washington	Day Habilitation Buildings Reconstruction	$750,000	OMR	Community Work & Independence is a not for profit agency that provides services including day habilitation for individuals with developmental and other disabilities. Several of these day program sites are in need of reconstruction for energy efficiency and health and safety issues, and to improve the quality of life for those individuals among us that cannot always help themselves. This request would create or retain 25 jobs and the work would commence in about 90 days or less.
Washington	Washington County Trailway Bridge	$200,000	OPRHP	
Washington	Town of Fort Ann access road rte 149 and Goodman Rd from Golden Goal	$1,500,000	OPRHP	The Golden Goal Youth Soccer Tournament Park in Fort Ann attracts youth soccer and lacrosse teams from across North America and the world. The park generates a large amount of traffic and the only way for cars to access the site is via Goodman Rd, a small, residential road. The proposed access road would provide direct access from rte 149 to the park. An access road would also encourage development of hotels and other amenities in Fort Ann for the families, who currently have to stay in Lake George.
Washington	Granville Central School, High School	$4,474,181	SED	
Washington	Granville Central School, Granville Elem (fmrly Quaker)	$7,907,596	SED	
Washington	Granville Central School, Mary J. Tanner Elementary	$877,262	SED

Wayne	V. of Lyons Waterline Replacement Project	$400,000	CDBG	

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Wayne	Cleaning and Painting of 1.0 MG Water Tank	$757,000	CDBG	Cleaning and Painting of 1.0 million gallon elevated water tank and structural modifications to meet OSHA and AWWA standards
Wayne	Water Street Water Main Replacement	$273,000	CDBG	Water Street Water Main Replacement
Wayne	Elm Street Fire Loop	$165,555	CDBG	Elm Street Fire Loop
Wayne	W Water St Water Services Exchange 6 inch Main Abandonment	$71,710	CDBG	W Water St Water Services Exchange 6 inch Main Abandonment
Wayne	Catherine Street Sanitary Sewer Inflow Elimination	$76,326	CDBG	Catherine Street Sanitary Sewer Inflow Elimination
Wayne	Waterline Replacement	$425,429	CDBG	Waterline Replacement
Wayne	Sohn Alloway Rd	$400,000	CDBG	Creation of waterline to Sohn alloway Rd
Wayne	Village of Wolcott Water Plant Generator	$78,000	CDBG	project proposes purchase and installation of a generator for backup power at our water treatment plant, no backup power source is currently available and in the event of long-term power outage our water supply would be exhausted within 36 hours
Wayne	Repairs, Repainting and Upgrades to Water Storage Tank	$385,000	CDBG	The existing water tank is a 75 foot high, 500,000 gallon, steel water storage tank that has served the Village of Macedon for 45 years. An inspection in the summer of 2008 indicated that the interior and exterior paint had deteriorated significantly andrequires repainting immediately. In addition, a few repairs are required for safety and the Village has been informed by the NYS Health Department that a mixing system should be installed to maintain proper water quality per EPA/NYSDOH regulations. Therepair and repainting work consists of repairing the rusted areas, preparing the surfaces for repainting and then repaint inside and out; upgrading the ladder to conform to OSHA requirements, adding an access port at the bottom to comply with confined space entry requirements for maintenance; and a new vent and overflow repairs. The upgrade consists of adding an internal mixing system to circulate the water to minimize short-circuiting and improving the water quality in the distribution system. This wilork needs to be done within the next 6 months. Approximately 75% of the total cost is labor resulting in 10-11 equivalent full time low to average skill level jobs.
Wayne	Parking Lot Retaining Wall	$135,000	CDBG	The existing retaining wall at one of the Village Parking Lots is deteriorating and there is an existing house within 7 feet of the top of the wall. This project is crucial to the stability of this existing house. This project consists of reconstructingthe retaining wall and providing for the required drainage. The work also requires the relocation and upgrading the existing 4"" waterline. There is no drainage behind the existing wall and that is the main reason for its current condition .To provide the proper drainage a new stormwater system has to be constructed along Erie Street to accept the drainage from the wall. This new drainage system needs to be placed where the current watermain is located, thereby requiring the relocation of the existing waterline. This water main will be upgraded to an 8"" water main when relocated. The new drainage system will also require replacement of most of the curb and sidewalk along this portion of Erie St. Approximately 65% of the total cost is labor resulting i
Wayne	sewer manhole re-lining	$705,000	CDBG	Re-line existing sanitary sewer manholes throughout the village. This proposed work will significantly reduce the infiltration of stormwater into our treatment facility. thank you
Wayne	Village of Newark Wastewater Improvments	$1,500,000	CDBG	The Village is seeking funding for 6 activities to correct/improve its existing wastewater system. These include improvements to the oufall, three pump stations, the installation of a SCADA system and collection system upgrades. Bids for the pump stationupgrades will be opened on March 31st and these activites are READY TO GO. The other components could be under construction within a few months. SEQR/NEPA is complete for these activities

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Wayne	Village of Wolcott Office Building	$166,868	DASNY	renovation to office building which was built in 19th century, building houses offices for all Village departments and does not have adequate records storage space, install elevator to meet ADA compliance, renovation to Justice Court to comply with Office of Court Administration regulations for safety
Wayne	Wolcott Office Building	$92,386	DASNY	Wolcott Office Building
Wayne	Newark-Wayne Community Hospital capital renovation	$10,000,000	DASNY	renovation of the Emergency Dept.
Wayne	Rochester General Hospital's Funding	$10,000,000	DASNY	Capital renovation project, renovating Newark-Wayne Community Hospital Emergency Department
Wayne	Roosevelt Children's Center Roof Replacement	$1,149,138	DASNY	Roosevelt Children's Center (RCC), a division of Wayne ARC, offers a wide variety of diverse services through an experienced, licensed and/or certified staff including early childhood and special education educators, speech pathologists, physical therapists, occupational therapists, psychologists, nurses, family advocates, school counselors, assistive technology providers, music therapists, and teachers of the blind/visually impaired. Our goal as an Early Intervention and Preschool program for childrenages birth to five is to provide the highest quality of service to all children, with and without special needs, in an integrated and natural setting where all children share the same learning environment. The roof on RCC has been deteriorating over thepast few years and it has been cited for health and safety concerns by the Newark Village and repairs must be completed to avoid possible citing by NYS Education Department. It has been patched and repaired several times over, but it has finally been detroject would decrease by 30%.
Wayne	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovations of three day programs and the constructionof one residence in Newark and Clyde.
Wayne	Public Works Garage Cold Storage Addition	$250,000	DASNY	The Village Public Works Department currently stores much of its large and/or seasonal vehicles and equipment outside because the existing garage is not large enough for both storage and workspace. In addition the public works garage site requires improvements to provide an area for washing and maintaining vehicles and equipment where the contaminated wash water and runoff can be controlled to comply with current EPA and NYSDEC stormwater and MS4 regulations. The improvements would consist of constructing a 40 ft x 50 ft cold storage addition and a 50 ft. x 60 ft. concrete pad in front of the addition. Other ancillary improvements are new garage doors in the existing building to provide access from the rear, a new apron in front of the existing garagedoors and miscellaneous drainage improvements. The total cost of this project including all of the above items is $250,000. Approximately 60% of the total cost is labor resulting in approximately 5-6 full time equivalent average skill level jobs.
Wayne	Village of Wolcott Police Department COPS	$436,800	DCJS	requesting funding assistance for 2 full-time officers at 35 hours per week for a three year period, amount requested includes all applicable insurance and benefits costs for full-time employees, previous budgetary constraints resulted in the eliminationof one full-time position
Wayne	Village of Wolcott PD Justice Assistance	$42,000	DCJS	renovations to provide secure location for processing arrests ($7,800); Chevy Trail Blazer for patrol and drug control activies ($30,000); 1 computer for office ($1,200); digital camera for investigation/documentation ($500); CCTV system for security anddocumentation ($2,500)
Wayne	Village of Wolcott Police Department Victim's Assistance	$12,000	DCJS	Hire and retain 1 part-time Victim's Assistance Resource Officer to work 20 hours per week
Wayne	Funding for 3 Police Officers	$681,264	DCJS	Funding for 3 Police Officers

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Wayne	Ridge Road (Fisher Rd to Willimason Hamlet) Pavement Rehabilitation	$600,000	DOT	
Wayne	Ridge Road (Locust St to E. Williamson) Pavement Rehabilitation	$420,000	DOT	
Wayne	County Road 103 (Ridge Road) from Fisher Road to Williamson Pavement	$660,000	DOT	
Wayne	County Road 103 (Ridge Road) from Williamson to East Williamson Pavem	$462,000	DOT	
Wayne	County Road 308/Canandaigua Road (Victor Road to NYS Route 31) Pave	$660,000	DOT	
Wayne	Pierson Avenue from West Maple to West Miller Pavement Rehabilitation	$750,000	DOT	
Wayne	Stebbins Road from Tellier to Whitbeck Resurfacing	$250,000	DOT	
Wayne	Stuart Street from Rt 88 to the Village Line Pavement Rehabilitation	$650,000	DOT	
Wayne	Municipal Parking Lot and Pedestrian Crosswalks Project	$62,000	DOT	7,800 sq ft parking lot needed in the downtown commercial district. The current conditions prevent customers from finding parking and shopping in the downtown. With this new parking lot new merchants will sign a lease because there will be parking available. This means more customers shopping downtown. We have an engineers study confirming the need and the impact it will have on our current economic conditions in the downtown.
Wayne	Circulation, Accessibility, and Parking Project	$640,000	DOT	NYS Route 31 Circulation, Access and Parking Study, through the Genesee Transportation Council, has detailed out the problems with the current infrastructure and can prove the current deteriorating economic status in the target area in direct correlationto the problematic issues of the current infrastructure. The engineers study details it out for funding purposes. This is in the Main Street District.
Wayne	Collector/Sanitary Sewer	$2,500,000	EFC	
Wayne	ny 31/414 watermain replacement	$2,000,000	EFC	Replacement of existing 100 year old watermain(1 mile) under NY 31. This section of main is very problematic, due to its age. The replacement needs to occur prior to NYSDOT reconstructing NY 31 in the Village in 2011.Thank You!!!
Wayne	Clyde wastewater plant upgrades	$1,400,000	EFC	Wastewater treatment plant -mechanics are over 40 years old and in need of replacement, including pumps, blowers, electrical systems, etc. This would increase effficiency and compliance.
Wayne	NY31 sanitary sewer replacement	$310,000	EFC	replace 1250 feet of sanitary sewer main beneath NY 31 These mains are very problematic. Thank you!!!
Wayne	Improvements to the Village Water System	$3,780,000	EFC	Replacement of approximately 21,000 l.f of undersized and antiquated water mains throughout the Village
Wayne	New Water Intake Line for Water Plant	$1,082,000	EFC	Replacement of the existing water intake line in Lake Ontario. Existing line is failing, under constant repair and infested with Zebra Mussels
Wayne	Upgrading of Village Water Treatment Plan	$2,900,000	EFC	Upgrade the Village Water Treatment Plant, originally build in the 1950's. Replace clarifiers and filters, building additions and piping modifications
Wayne	Water Treatment Plant Improvements	$330,000	EFC	Water Treatment Plant Improvements
Wayne	Water In Take Line	$53,210	EFC	Water In Take Line

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Wayne	Wayne/Cayuga County Cooperative Sewer System, Wayne County, Town c	$6,000,000	EFC	Wayne/Cayuga County Cooperative Sewer System, Wayne County, Town of Wolcott: This project will construct 20,000 linear feet of low pressure sanitary sewers from in northwest Cayuga County and in the Town of Wolcott, with discharge into the Wolcott SewerTreatment Plant. Failing septic systems in this area have caused health and environmental problems in the Blind Sodus Bay area of Wayne County. This has had a detrimental impact on tourism (fishing) and related businesses in the area. The project will address the health and environmental issues in this area created by the failing private septic systems and direct discharge. As a result, tourism will be enhanced and jobs retained/created. The project is vitally important to this area, as tourism is oneof the primary businesses here. Permanent jobs will be retained and created, as well as new construction jobs. The project can commence within 4 months.
Wayne	Northeast Quadrant Water Project, Wayne County, Town of Wolcott and Vill	$2,360,000	EFC	Northeast Quadrant Water Project, Wayne County, Town of Wolcott and Village of Red Creek: The project includes construction of aproximately 30,000 ft. of 12 inch water line along Red Creek Rd and Waters Rd in the Town of Wolcott. This will create a loopand provide redundancy to the Red Creek, as well as the Wolcott-Butler Corrrectional Facility. It will also provide the hydraulics and capacity to support further business, residential and institutional growth in the area. The project also includes replacement of the aging water system in the Village of Wolcott and upgrading the line to Electromark (industry). The company has been requesting this improvement for some time. If this occurs the company has indicated that they will expand their facility andcreate an additional 300 jobs (to meet fire protection needs). The project will create 300 permanent jobs in this hard hit rural area, where unemployment has been steadily rising and incomes are low. The Wolcott-Butler Correction Facility would also beportion of rural Wayne County and the limited number of employers that are here (Electromark and the Wolcott-Butler Correctional Facility). It will not only retain them but allow for future growth (up to 300 jobs at Electromark). The project is engineeredy to go. The local community does not have the funds to implement this important project.
Wayne	Clarifier Repairs and Repainting	$65,000	EFC	The final clarifier for the Wastewater Treatment Plant provides the final treatment of the wastewater before it is discharged from the plant. If it is not performing at peak efficiency it will not operate properly and it will not be possible for the village to maintain their SPDES Permit requirements. The repairs consist of straightening and leveling the scraper arms and replacing the flexible bottom edges of the arms that scrape the sludge to the center. The metal skirt around the edge of the tank needs repairs also. In addition the entire circular concrete clarifier tank as well as the steel superstructure require sandblasting and repainting. Approximately 85% of this $65,000 project is labor resulting in the equivalent of 2-3 full time low to average skill level jobs.
Wayne	Village Wastewater Treatment Plant Imp.	$3,500,000	EFC	Improvement to the WWTP built circa 1970. Replace air delivery system, including blowers, air headers,sensory equipment, controls. Construct new solid handling facility for digested sludge, including belt press, polymer system, pumps,controls and building. Construct a new influent building, including mechanical screening, degritting and flow measurement.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Wayne	Indoor auto and scrap metal recycling	$350,000	ESD	Funding would be used to advance AVL Recycling's place in the market. We are a all indoor auto salvage operation. AVL has 4 full time employees. With funding I can grow that to 9 full time employees. At AVL we have a near ZERO impact on the environment,unlike the normal auto salvage yard. AVL phase two is to handle all scrap metal from the community, old water heated, cans, cardboard, wire, etc. This phase would require purchasing 70,000 sq ft building AVL is already renting space in. Funding would also be used to purchase trucks, scales, office equipment, computors, renovation of site, and funding start up of scrap recycling center.
Wayne	Lyons Main Street Revitalization	$500,000	MAIN_ST	
Wayne	Hospitals, Health, Downstate Medical Centers, FINGER LAKES DDSO	$1,669,547	NYPA	
Wayne	Emergency Generator for Wastewater Treatment Plant	$200,000	NYSERDA	Purchase and Installation of a new 230 KW, natural gas emergency generator and transfer switch for the Village/Town Wastewater Treatment Plant. Includes removal of existing (1970) fuel oil generator that needs to be replaced due to its inability to provide proper emergency power for this facility. If the plant does not have sufficient backup power proper treatment may not be able to be provided during a power outage.
Wayne	Wayne Industrial and Sutainability Park (WISP), Wayne County, Town of Or	$7,200,000	NYSERDA	Wayne Industrial and Sutainability Park (WISP), Wayne County, Town of Ontario: The Wayne Industrial and Sustainability Park is located in the northwest corner of the County along Route 104. It is home to several industries that are developing and manufacturing alternative energy systems and products. These include geothermal, wind systems, bio-digesters, etc. The park is expanding and in need of funding to construct new access roads and utilities (water, sewer and electric) to reach new development sites that will target similar alternative energy companies. Additionally the project includes the construction and installation of two active alternative energy projects, including a bio-digester and a wind turbine. Engineering has been completed on both ofthese, permits have been obtained and construction can start within 2 months. This park has been developed to provide sites for alternative energy concerns (solar, wind, geothermal, switch grass, etc.). Currrently there is research and development, des(bio-digester and wind turbine). The projects are engineered, permitted and ready to go. The project is important to Wayne County and the region from several perspectives including providing sites that will accommodate new alternative energy concerns, Ry the two private industry projects are important to the vitality of Park. The projects are engineered, permitted and ready to go. It is anticipated that several hundred new permanent jobs will be created as a result of the industrial expansions and park
Wayne	Village of Wolcott Fire Department Building Addition	$345,000	OHS	construction of addition to present Fire Station and replacement of overhead doors on present Fire Station, addition is for the purpose of a training and meeting facility for the Wolcott Fire Department, as well as to serve as Village of Wolcott Community Center
Wayne	Fire Truck (75 Ft Ladder Truck)	$400,000	OHS	Purchase of a new 75 Ft ladder truck for the Fire Dept.
Wayne	Village of Wolcott Dr. Chan's Garden	$127,000	OPRHP	develop a nature center for educational purposes within the Village of Wolcott for the benefit of students K-12 as well as the community as a whole, nature center will be only such park within the Village as well as the four surrounding Towns
Wayne	Village of Wolcott/Wolcott Falls Park	$210,000	OPRHP	upgrade Wolcott Falls Park with paved parking lot, sidwalks, retaining walls, playground equipment, bathrooms, trails and zip line. Expected outcomes include attracting tourists thus benefiting local businesses and allowing for the retention and creationof jobs. Present parking lot is gravel and not properly handicapped accessible

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Wayne	Erie Canalways Trail, Wayne County, Newark to Clyde	$2,850,000	OPRHP	Erie Canalways Trail, Wayne County, Newark to Clyde: NYS exhausted its trail construction funding and the Canalways Trail coming from the west terminates in Newark, NY. This project would complete the construction for the Newark to Clyde section. Design,environmental reviews and an agreement with the NYS Canal Corporation are either complete or imminent. The construction can be implemented in the Spring of 2009. It will connect Wayne County with the communities to the west, enhancing tourism and historic preservation along this linear route. Tourism was identified in the 2006 ""Wayne County Economic Development Strategic Plan"" as one of the primary and fastest growing industries in Wayne County. The gap in the trail hampers the tourism cluster and Main Streets along the Canal are struggling to survive. It should also be understood that Wayne County has a significant number of Canal historic sites and structures. All are located along or in close proximity to the trail route. The project is ready toion to the construction jobs, new permanent jobs will be created in businesses along the Trail. The multiplier effect of this investment will be felt for many years. The funds do not exist to complete this project. It should be understood that the Erie Critage Corridor is part of the National Park Serv
Wayne	Newark Valley CSD, Newark Valley Senior High	$100,000	SED	
Wayne	Lyons CSD, Junior Senior High	$1,654,000	SED	
Wayne	Marion CSD, Marion Elementary	$955,000	SED	
Wayne	Marion CSD, Jr/Sr High School	$1,432,500	SED	
Wayne	After School Enrichment Programs	$1,280,000	SED	After school enrichment programs in eight impoverished school districts within rural Wayne County, NY will serve 680 low-income children between 2:30pm and 6:00pm. Providing these parents with no/low cost childcare which includes certified teacher tutoring, dance/martial arts instruction, art appreciation, science labs and other enrichment activities will create a total of seventy-six (76) jobs while enabling low-income parents to find jobs and/or continue working. Our agency's reputation in the countyand our experience at providing pre-school and school-aged childcare as prescribed by the NYS Office of children and Family Services will enable us to initiate this project with a minimum of start-up time and to continue to provide effective, high-quality and fiscally responsible service throughout the life of the program. The districts targeted in this proposal are now on a waiting list for this service.
Wayne	New Trail Construction Erie Canal R4	$3,100,000	Thruway	New Trail Construction Erie Canal R4
Wayne	Village of Wolcott streetscape & Mill Street culvert improvement	$0	Unassigned	Replacement of street light poles, replacement of trees, damaged sidewalks, adding sidewalks, curbing and drainage . Also the Mill Street culvert will be expanded.
Wayne	Village of Wolcott water in-take line	$10,000	Unassigned	Cleaning in-take line from lake Ontario that is blocked with ""zebra mussels"" and adding a polyethaline line run the length of the line to prvent future infestat
Wayne	Village of Wolcott West-End storm sewer	$0	Unassigned	replace and upgrade the existing storm sewer system that was found inadequate in a recent study.
Wayne	Village of Wolcott office building	$0	Unassigned	Interior renovation of the second floor of 6015 New Hartford Street to provide 1,000 sq ft of additional office space and provide adaequate space for Village records. An elevator will also be installed.
Wayne	Village of Wolcott Highway Dept storage facility	$0	Unassigned	Expand the Highway department facility to enable it to house all equipment.
Wayne	Village of Wolcott - Dr Chan's Garden	$0	Unassigned	Development and improvement of this park to include bathrooms, an outdoor classroom and hiking trails.
Westchester	ADA Lift Small Aircraft	$40,000	CDBG	ADA Lift Small Aircraft
Westchester	Recoat in and out of 30000 gallon steel tank Cedar Downs	$60,000	CDBG	Recoat in and out of 30000 gallon steel tank Cedar Downs

County	Project	Requested $	State Agency	Additional Detail
Westchester	City Comprehensive Plan	$600,000	CDBG	Development of a Comprehensive Plan and Economic Development Plan for the City of Mount Vernon.
Westchester	Marina Parking Deck Repairs	$3,000,000	DASNY	This project will make necessary repairs to maintain and increase the useful life of this public facility, support increased use of the marina and spur economic activity. Adequate and safe parking is often a necessary component for economic activity. The
Westchester	DPW Maintenance and Operations Center	$25,000,000	DASNY	The Maintenance and Operations Center will be a new state of the art environmentally-friendly facility that will consolidate facilities currently at 235 East Main Street and 40 Pelham Road. The relocation of New Rochelle's public works facilities will ma
Westchester	Skalet Pavillion Expansion	$2,600,000	DASNY	The expansion of the Skalet Pavillion is 90% complete and plans to open in May 2009. We have mortgaged $56 million on our own, but have unforseen costs in capital construction totalling $2.6M. The expansion would create 50-60 new healthcare jobs and prom
Westchester	Department of Public Works Addition/Upgrade	$750,000	DASNY	The purpose of this project is to construct an addition to the existing Department of Public Works facility, which would double the size of the existing garage. The improvement will minimize fleet storage outside thus increasing the life expectancy of th
Westchester	City Hall Rehabilitation	$25,000,000	DASNY	Renovate the 1924 vintage City Hall, demolish existing Annex Building and construct a five story, 50,000 square foot addition attached to the rear. This permits the relocation of the Recreation and Parks, Building and Parking Departments back to City Hal
Westchester	MIXED USE MUNICIPAL STRUCTURE	$13,000,000	DASNY	The VILLAGE OF ARDSLEY IS SEEKING FUNDING TO AID THE CONSTRUCTION OF A MULT-USE STRUCTURE TO REVITALIZE DOWNTOWN IN MULTIPLE WAYS, INCLUDING FOSTERING ECONOMIC DEVELOPMENT, SERVING COMMUNITY NEEDS, AND ALLEVIATING TRAFFIC & PARKING PROBLEMS. THE NEW STRUCTURE WILL INCLUDE 4 LEVELS W/ 230 PARKING SPACES, A NEW ADA-ACCESSIBLE SENIOR AND YOUTH COMMUNITY CENTER, & 4,200 SQUARE FEET OF RETAIL SPACE. THE STRUCTURE WOULD STIMULATE LONG TERM ECONOMIC DEVELOPMENT OF THE DOWNTOWN, ALLEVIATE TRAFFIC, AND AIR POLLUTION FOR 90,000 RESIDNETS OF THE tOWN OF GREENBURGH, AND REPLACE THE OUTDATED COMMUNITY CENTER WHICH SERVICES THE YOUTH, SENIORS, AND OTHERS OF THE 10,000 RESIDENT ARDSLEY SCHOOL DISTRICT AND PROVIDE OPPORTUNITES TO RELOCATE ON STREET PARKING SPACES TO OPEN UP LANES OF TRAFFIC ON ROUTE 9A. CURRENTLY, THE AFFECTED SECTION OF ROUTE 9A HAS BEEN LABELLED THE WORST BOTTLENECK IN WESTCHESTER COUNTY BY THE COUNTY'S OWN DOT.
Westchester	NEW COMMUNITY CENTER	$2,000,000	DASNY	THE VILLAGE OF ARDSLEY IS SEEKING FUNDING TO AID THE RECONSTRUCTION OF A LARGER 5000 SQUARE FOOT COMMUNITY CENTER THAT WOULD BE BENEFICIAL TO ARDSLEY IN MULTIPLE WAYS. THIS NEW ENERGY EFFICIENT ADA-ACCESSIBLE STRUCTURE WOULD PROVIDE FACILITIES FOR SENIORCITIZENS AND YOUTH ACTIVITIES. PROGRAMS COULD BE BROADENED TO INCLUDE SERVICES AND MEETING SPACES FOR VETERAN GROUPS, MERCHANT GROUPS, HOMEOWNER ASSOCIATIONS, AND OTHER ADULT ACTIVITIES. ADDITIONALLY, WE ENVISION A HALF COURT BASKETBALL FACILITY TO COMPLEMENT SOCIAL ACTIVITIES FOR OUR YOUTH DURING INCLEMENT WEATHER AND AS PART OF OUR PROGRAMS TO COMBAT UNDERAGE DRINKING AND DRUG ABUSE.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Westchester	Public Works/Fleet Maintenance Facility	$5,000,000	DASNY	It is the intent of the Village of Bronxville to construct a new state of the art and environmental friendly Public Works/Fleet Maintenace Facilit of approximately 10,000s.f.on Village owned property.The new faciltiy will house existing equipment and provide for fleet maintenance. The intent is to use as much ""Green Technology"" in the construction of such building as possible, including geothermal heating, energy efficient lighting, green roofs and porous aspha
Westchester	Renovation of Campus in South Bronx	$500,000	DASNY	Renovation of Campus in South Bronx: The College of New Rochelle School of New Resources John Cardinal O?Connor Campus in the South Bronx currently serves 1,000 low-income adult students through flexible course scheduling, a liberal arts curriculum thatvalues the life experience of adults and support services designed to help adults balance school, work and family. Recently, CNR has expanded its outreach to enhance access for students for whom English is not their native language. CNR owns the Cardinal O?Connor Campus building at 332 East 149th Street, and has classrooms and programs operating on seven of the eight floors at the campus. CNR now seeks to renovate that additional floor of the building after the departure of a long-term tenant, to create two new technologically up-to-date ?smart? classrooms in this space to better accommodate students who live and work in the South Bronx.
Westchester	Renovation of residence hall	$5,000,000	DASNY	Renovation of Residence Halls: In order to provide students with a more modern residential setting as part of their higher education experience, CNR will renovate existing residence halls. CNR requests funds to renovate one of its residence halls, which has only benefited from critical repairs up to this point. A renovated facility will be more cost-efficient and have less environmental impact, as CNR seeks to incorporate sustainable elements including a new HVAC system. The facility will also include improved dwelling rooms, meeting areas, and study areas, which will improve students' overall residential experience and campus life. CNR believes this will enhance recruitment and retention of traditional-age students who reside on campus.
Westchester	Renovation of science facilities	$2,000,000	DASNY	Renovation of Science Facilities: The College of New Rochelle has been at the forefront of efforts to improve nursing education, to help meet the national nursing shortage and to provide preventative health education in local communities. CNR is also aleader in preparing tomorrow?s teachers to meet the challenges of educating diverse populations. In addition, CNR recognizes the importance of providing all of our students with a solid foundation in science and mathematics in order to keep our nation competitive and to give our students enhanced academic and career options. To build on existing strengths, CNR needs to provide students with state-of-the-art learning environments. Funds are requested for upgrading the infrastructure of CNR?s science facilities and renovating science laboratories, including new technology resources and scientific instruments. Students will benefit from a dramatically enhanced teaching and learning environment that prepares them to use technology in their future roles
Westchester	Elevator Tower	$1,500,000	DASNY	The college will build an external tower containing an elevator which will provide handicapped access to 2 classroom buildings at the same time.
Westchester	Briarcliff Manor Campus Capital Improvements	$16,730,000	DASNY	Capital renovation projects including improved ADA accessibility, energy management systems and other sustainability measures, renovations to student living areas, and safety upgrades
Westchester	Pleasantville Campus Capital Improvements	$28,800,000	DASNY	Capital renovation projects to improve ADA accessibility, improve energy management systems and other sustainability measures, renovations to student living areas, and safety upgrades

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Westchester	Pleasantville Campus Master plan	$60,000,000	DASNY	Develop a plan to improve the building layout to create easier access on campus for students and the external community, build a new student facility to occupy 565 beds, and improve student living on campus
Westchester	White Plains Campus Capital Improvements	$9,680,000	DASNY	Capital renovation projects to improve ADA accessibility access, improve energy management systems and other sustainability measures, and student safety upgrades
Westchester	Structural and Energy Efficiency Bldg. Upgrades	$675,000	DASNY	Structural and Energy Efficiency Bldg. Upgrades
Westchester	Northern Westchester Hospital Generator Building project	$1,909,000	DASNY	A new 2,800 square foot generator building will be constructed to provide emergency power for the new Emergency Department and to house two additional generators, which will allow for the necessary retirement of two existing aged generators servicing themain Hospital.
Westchester	Northern Westchester Hospital Loop Road project	$4,500,000	DASNY	Northern Westchester Hospital Loop Road project
Westchester	Emergency department renovation	$6,500,000	DASNY	The current emergency department, built in 1970 was designed to handle half the capacity it now serves on a daily and annual basis. In 2008 patient volume in the ED almost reached 29,000 visits. Patient volume is expected to increase in volume appproximately 3% in the next ten years. This newly designed green facility has been approved via the certificate of need process (CON). The new staet of the art ED will have 25 private treatment rooms, distinct areas for pediatric, adult and behavioral health patients, improved spaces for family support and enhanced work environment for our doctors, nurses and other healthcare professionals. The new ED will comfortably accomodate 50,000 patient visists each year. Moreover due to the importance of disaster management and surge capabilities the new ED is designed to expand and contract to appropriately address the communities needs.
Westchester	YWCA Residence for Women	$2,600,000	DASNY	The YWCA was awarded Federal Low Income Housing Tax Credits and planned to commence a $23,000,000 renovation of its existing facility in the spring of 2009. However, the condition of the current economy has resulted in a decline in the value of the TaxCredits, creating a $2.6 million gap.
Westchester	Northern Westchester Hospital	$4,512,000	DASNY	233-bed facility serving Northern Westchester, Putnam and Southern Dutchess Counties. The existing facility does not allow for internal traffic circulation and only has emergency vehicle access at one point; a newly constructed loop road will rectify both issues.
Westchester	Hudson River HealthCare - Oral Health Services for Yonkers, NY	$250,000	DASNY	HRHCare is seeking capital funding to support initiation of dental services in Yonkers, NY, a federally designated MUA. Oral health services will be provided in a three-operatory dental suite to increase access to dental care and improve the oral healthof Yonkers' low-income populations.
Westchester	Hudson River HealthCare - Peekskill Redesign and Renovation	$3,000,000	DASNY	Hudson River HealthCare has launched a three phase capital improvement project to address deficiencies and plan for the future at eh again Peekskill facility. The first two phases, commenced in late 2006, addressed services and patient flow. The thirdphase, for which funds are requested, includes the relocation and expansion for the Dental Dept, the creation of a pediatric multi-service center, the creation of a Senior Health Care Center, improvements to the building facade, HVAC redistribution, electrical infrastructure/lighting upgrade, and Solar PV System Installation.
Westchester	Manhattanville College capital projects	$225,000	DASNY	Exterior Building projects - roofing replacement
Westchester	Manhattanville College capital projects	$1,025,000	DASNY	Interior Building projects-renovate bathrooms
Westchester	Manhattanville College capital projects	$1,935,000	DASNY	Interior Building projects - install fire protection sprinkler systems
Westchester	Manhattanville College capital projects	$2,880,000	DASNY	Campus Grounds projects - parking lots and drainage
Westchester	Emergency Department - Loop Road	$4,512,000	DASNY	The existing facility does not allow for internal traffic circulation and only has emergency vehicle access at one point; a new constructed loop road will rectify both issues.

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Westchester	Westchester County	$1,500,000	DASNY	Energy modifications to County Center
Westchester	Westchester County (Michaelian OB)	$500,000	DASNY	Thermal Ice Storage Unit
Westchester	Westchester County (Michaelian OB)	$6,000,000	DASNY	Replace all windows in Michaelian OB
Westchester	College of New Rochelle	$143,000	DASNY	Construction of ""smart"" classr
Westchester	Mercy College	$371,000	DASNY	Sunshine Child Care Center for parent-students
Westchester	Westchester Library System	$212,500	DASNY	Capital projects at 6 libraries
Westchester	St. Vincent's Hospital	$37,600,000	DASNY	Physical Plant improvements, Green technology upgrades
Westchester	St. John's Riverside Hospital	$10,000,000	DASNY	Expand Cochran School of Nursing
Westchester	Town of New Castle	$9,975,000	DASNY	Town Hall renovation
Westchester	Village of Elmsford	$330,000	DASNY	Two new buildings at Public Works facility
Westchester	Repl undersize 50 year old facility Highway Oper Facility	$1,500,000	DASNY	Repl undersize 50 year old facility Highway Oper Facility
Westchester	Highway vehicle wash filtration system recycling system	$50,000	DASNY	Highway vehicle wash filtration system recycling system
Westchester	New public works garage and facility	$12,000,000	DASNY	New public works garage and facility
Westchester	Central Fire House 5 City fire houses infrastructure	$19,000,000	DASNY	Central Fire House 5 City fire houses infrastructure
Westchester	Driveway parking to serve Comm Center Regional Emerg	$0	DASNY	Driveway parking to serve Comm Center Regional Emerg
Westchester	Community Center Regional Emergency Shelter	$0	DASNY	Community Center Regional Emergency Shelter
Westchester	Armory rebovations	$2,000,000	DASNY	Rehabilitation of the city armory structure including a new roof, two new elevators, new flooring, and six bathrooms.
Westchester	New DPW Maintenace Facility and Marina Restoration	$18,800,000	DASNY	Restoration of the Hutchinson River shoreline through the construction of a new city maintenance facility to house Department of Public Works vehicles indoors and reconfigure solid waste handling in order to move these operation from their present site along the banks of the Hutchinson River.
Westchester	Construction of new Ambulatory Surgery Center	$8,500,000	DASNY	This project includes construction of a new Ambulatory Surgery Center in the new Medical Services Building. This Center would replace the older ASC in the main hospital and llow thousands of outpatients to benefit from a state of the art surgery center that was linked to the hospital. The new ASC would also allow Phelps to ultimately expand its pediatric and maternity services by freeing up space in the main hospital. The construction would be 70,000 sq/ft plus a 160 ft connector to the main hospital Operating Suite floor. The ASC would be comprised of 4 Operating Rooms and 6 Endoscopy Procedure Rooms all with private patient rooms and appropriate support space.
Westchester	Expansion of Phelps Day Care Center (DBA Robin's Nest Day Care Center	$1,200,000	DASNY	This project includes the addition of 3,000 sq/ft to the existing day care center that currently provides care for 100 children per day making the Center one of the largest not for profit day care centers in the region. There is a significant waiting list for this highly regarded program and the construction would allow for additional slots to be added. The addition will include 4 new classrooms, ancillary space, a multi-purpose room and upgrade to our HVAC systems capabilities. It would also include anupgrade and expansion of the existing playground areas and provide additional parking for staff and visitors.
Westchester	Somers Community Center	$20,000,000	DASNY	This project, the building of a 47,000 sq. ft. community center was put on hold by the Town after design and environmental reviews were completesd because of the severe downturn in the economy. Funding to undertake this project would provide jobs duringand after construction. The project includes green building techniques like geothermal heating and cooling.
Westchester	Somers Library Expansion	$7,500,000	DASNY	Library building expansion adding 7000 sq. ft. providing both construction jobs and ongoing personel employment. The project includes green building techniques, such as a roof garden and many energy efficiency improvements.

County	Project	Requested $	State Agency	Additional Detail
Westchester	ECDC Renovation	$250,000	DASNY	A renovation of the 40-year old Eastchester Child Development Center (serving 45 local toddlers inc. 17 Head Start recipients) wood frame building on County parkland (50 year lease) is necessary following a Dec '07 fire. Program currently operating in local church facility; program has strong community and civic support as well.
Westchester	town house expansion	$10,000,000	DASNY	Expand Town hall with new buildingon property to supplement the existing Town hall which is a historic building on the national Historic register and is overused with office space.
Westchester	Yonkers Campus Project	$10,000,000	DASNY	Elizabeth Seton Pediatric Center Building a $125 Million Yonkers Campus Overview: Building Project and Funding Request Elizabeth Seton Pediatric Center (the Center) respectfully requests $10,000,000 in funding through the American Recovery and Reinvestment Act in partial support of a $125 million project to build a new and permanent home for a 137-bed specialty pediatric long term care facility on a recently acquired 6.5 acre parcel in South Westchester Executive Park, Yonkers, NY. Construction costs will total $78 million for the planned 165,000 square foot, 4-story, state-of-the-art, LEED-certified facility that will house inpatient, home care and educational services for children with complex medical needs and disabilities. As one of the only majorconstruction projects on line to begin in 2009, this project will have a near-term positive economic impact locally and will create an immediate infusion of construction related jobs. When completed, the new facility will provide critical health and educovals are expected by the end of March 2009 and groundbreaking is anticipated in early summer 2009. The new facility should be ready to occupy by March-April 2011. The architectural firm Perkins Eastman was commissioned to design a child-centered facilitof the children, their families and caregivers. They have custom-designed a Center that is a dramatic improvement over the current space limitations of the 90,000 square foot space in Manhattan. It provides well-conceived space for bedrooms, classrooms,
Westchester	Emergency Department -Generator Building	$1,909,000	DASNY	A new 2,800 square foot generator building will be constructed to provide emergency power for the new Emergency Department and to house two additional generators, which will allow for the necessary retirement of two existing aged generators servicing themain Hospital
Westchester	Emergency Department - Loop Road	$4,512,000	DASNY	The existing facility does not allow for internal traffic circulation and only has emergency vehicle access at one point; a new constructed loop road will rectify both issues.
Westchester	Westchester County infrastructure and TIPS projects - letter of support	$25,000,000	DASNY	New Rochelle DPW maintenance and operations center
Westchester	Northern Westchester Hospital	$4,512,000	DASNY	Loop Road - the existing facility does not allow for internal traffic circulation and only has emergency vehicle access at one point; the loop road would rectify both issues.
Westchester	Northern Westchester Hospital	$1,909,000	DASNY	Generator Building - A new 2800 square foot generator building will be constructed to provide emergency power for the new Emergency Department and to house two additional generators, which will allow for the necessary retirement of two existing aged generators servicing the main hospital.
Westchester	Phelps Memorial Hospital Center	$7,000,000	DASNY	Construction of a new 20,000 sf Ambulatory Surgery Center in our new Medical Services Building. This would replace the older ASC in the main hospital and allow thousands of outpatients to benefit from a state of the art surgery center in our community that was linked to the hospital.
Westchester	Phelps Memorial Hospital Center	$1,500,000	DASNY	A 160 linear foot connector to the main hospital Operating Suite Floor. The ASC would be comprised of (4) Operating Rooms, and (6) Endoscopy Procedure Rooms all with private patient rooms and approximate support space

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Westchester	Town of Eastchester firehouse reconstruction and construction of new emer	$13,600,000	DASNY	Grant request from the Firefighters Assistance Grants program. The 5 firehouses that serve the town of Eastchester, and the villages of Tuckahoe and Bronxville are obsolete - floors are held up by temporary shoring, wiring and plumbing is failing and heating systems, windows and lighting are obsolete; reconstructions and upgrades are needed. Also requesting grant funding from the Robert T. Stafford Disaster Relief and emergency Assistance Act to constuct an emergency operations center while fire headquarters is being rebuilt.
Westchester	GYMNASIUM FLOOR	$85,000	DASNY	Replace badly deteriorated wooden gym floor, remove asbestos as required. Total floor area : 3,825 sq.ft.
Westchester	MASONRY/BRICKWORK REPAIR	$150,000	DASNY	We have badly deteriorating and extensive exterior brickwork and masonry work that requires extensive repair and replacement in and around our 100 year old main building.
Westchester	School Roof	$25,000	DASNY	We have 2 extensive roofing repair items in our 2 old school buildings.
Westchester	Harrsion House	$850,000	DASNY	Westchester Jewish Community Services is seeking $850,000 in funding for a shovel ready retrofit project designed to benefit residents of Harrison House. The NY State Office of Mental Retardation and Developmental Disabilities has approved this project and issued a Prior Property Approval. Bank financing for the project is secured. A Building Permit can be obtained eight weeks after funding approval. Stimulus funding will sustain approximately 25 jobs by allowing previously approved renovations to takeplace. Harrison House serves 7 people with a range of disabilities including severe/moderate mental retardation, autism, and psychiatric disorders. The residence is over 80 years old and was purchased by New York State 27 years ago with the expressed purpose of serving individuals who were being deinstitutionalized. The project is the most cost effective approach to: ? Retro-fit the residence to make it handicapped accessible thus enabling residents with ambulatory difficulties to age safely and emotionre their conditions have and can be most effectively addressed ? Provide a safer and slightly larger living environment
Westchester	Hatsdale Family Mental health Clinic	$730,000	DASNY	Westchester Jewish Community Services is requesting $730,000 in funding for a shovel ready infrastructure project for the agency?s Family Mental Health Clinic in Hartsdale, New York. The interior and exterior components of the site are in a state of significant disrepair, compromising accessibility and safety. All necessary assessments, bids, estimates and workplans from architects, engineers and contractors are complete; They have assessed the building and determined that there is a need for significant infrastructure repairs to adequately address safety issues and stem the escalating state of disrepair. These repairs include extensive roofing work, replacement of HVAC system, window replacement and upgrade, insulation, new fire alarm system, extensive parking lot repair. An estimated 50 jobs will be created/sustained through this project. The Hartsdale Clinic offers programs which include individual mental health counseling, bereavement services, abuse and domestic violence services, outpatient seritical services.
Westchester	Field House	$8,000,000	DASNY	Replacing gym built in 1939, Serving up to 252 male delinquent youth on any given day. Would be used for State required gym classes and particpation in Section One Public School Athletic Association.Would also have a pool which would support orthopedic injuries for health purposes.
Westchester	Security Cameras	$190,000	DCJS	This project will install 20 cameras in sensitive locations throughout the City, including the New Rochelle Transit Center, the Central Business District, and other areas identified by law enforcement. Video will be availabe to cars partrolling the area

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. County	Project	Requested $	State Agency	Additional Detail
Westchester	Food Storage & Distribution Warehouse	$7,400,000	DCJS	This 30,000 sq.ft facility will serve Westchester County as a receiving, staging and distribution point for relief supplies, food, water, etc. during a natural or manmade disaster or large scale emergency. Further, this facility will serve an everyday role as a warehouse to distribute food to the over 190 food pantries, soup kitchens and shelters serving the needy citizens in Westchester County.
Westchester	Taser Program	$30,000	DCJS	The Village of Bronxville proposes to commence a project whereby each sworn member of the Department will be provided with a Taser, which will afford every officer with an alternative to the use of lethal force when encounter dangerous individuals. The resolve of this project is to improve officer safety and address and /or correct potential high-risk encounters with those individuals intent on doing harm to themselves, the officers or innocent third parties. Statistically, many job related injuries ofpolice officers nationwide, are due to physical confrontations with the public. Many of those injuries are a result of the officers utilizing physical force when making apprehensions or encountering emotionally disturbed persons. Similarly, nationwide, many suspects are injured (justifiably) by police officers acting with that amount of force which is necessary under the conditions, to take the violent offender into custody. As a result, the Bronxville Police Department would like to introduce the mostyed when either ?hands-on? use of force or ? deadly physical force? may otherwise be instituted. Currently, this Department has adopted a continuum of force which includes the use of Verbal Direction, Physical Direction, Inflammatory Agent, Impact Weapons. We would propose to institute the Taser into the continuum of force in order to reduce the number of potential workers? compensation claims by officers that are injured subduing violent offenders. In addition, the Taser could potentially reduce injuri
Westchester	Police Headquarters Renovation and Expansion	$2,550,000	DCJS	Rehabiltation the building envelope and HVAC system of the city police headquarters building along with the expansion of the building to include additional space for offices, IT networking equipment, locker areas, and office training areas.
Westchester	Marina Dredging	$2,000,000	DEC	The project is dredge approximately 20,000 cubic yards of material. Marina Dredging is a crucial part to ongoing revitalization and conservation of our natural resources. The project will protect the environment by enhancing bio-diversity, and cleaning t
Westchester	Sheldrake River Drainage Improvement Project	$3,500,000	DEC	Increase storage detention capacity of five existing ponds, construction of spillways, sediment forebays, culvert improvements and bank stabilization. Flooding is re-occuring problem in the densely populated area.
Westchester	Fox Meadow Drainage Improvement Project	$3,120,000	DEC	Frequent flooding damages private and public property along 18,000 feet of the brook that traverses Village property. The project would include the construction of four runoff storage and detention areas with appropriate diversion and delayed release ofrunoff to the Bronx River.
Westchester	Estuary Enhancement Program	$3,300,000	DEC	Estuary Enhancement Program
Westchester	Elmsford Greenburgh Study Saw Mill River Flood watersheds	$30,000,000	DEC	Elmsford Greenburgh Study Saw Mill River Flood watersheds
Westchester	Drainage	$500,000	DEC	Hurd Avenue Drainage between Rt 202 and Hurd Ave replace. Correct drainage problem
Westchester	Erosion Control	$50,000	DEC	Captain Shankey Drive Erosion Control along the banks for Minesceongo Creek
Westchester	Manhattanville College capital projects	$175,000	DEC	Interior Building projects - remove asbestos wrapped equipment
Westchester	Town of Harrison Revitalization District	$1,545,000	DEC	Flood Control Project
Westchester	Village of Larchmont	$14,000,000	DEC	Flood mitigation/infrastructure improvements to Pine Brook basin
Westchester	City of Rye	$100,000	DEC	Lift Station Sewer Pump
Westchester	City of White Plains	$4,000,000	DEC	Drainage Improvements
Westchester	Village of Pleasantville (Eastview Ave)	$125,000	DEC	Project-ready to alleviate drainage issues

County	Project	Requested $	State Agency	Additional Detail
Westchester	Tarrytown-on-Hudson	$1,297,000	DEC	Public Waterfront Recreation Facility Improvements
Westchester	Tarrytown-on-Hudson	$725,000	DEC	Silt Retention Basin Replacements
Westchester	Village of Pelham	$1,570,000	DEC	Flood Remediation/Storm Quality; Pub Works & Fire Dept garages
Westchester	Tarrytown-on-Hudson	$1,667,000	DEC	Park Flood Mitigation Project (drainage & roadway improvements)
Westchester	LI Sound (Mamaroneck)	$0	DEC	Flood Mitigation for LI Sound area
Westchester	Elmsford-Greenburgh Study	$0	DEC	Study of Saw Mill River floods, subsequent construction
Westchester	Town of Greenburgh	$4,000,000	DEC	Taxter Road Leaf Transfer Station
Westchester	Loh Park flood mitigation construct of drainage flooding	$0	DEC	Loh Park flood mitigation construct of drainage flooding
Westchester	Waterfront rec facility improv avbl to public Hudson River	$0	DEC	Waterfront rec facility improv avbl to public Hudson River
Westchester	Replace existing sedimentation Basins Tarrytown Lake	$0	DEC	Replace existing sedimentation Basins Tarrytown Lake
Westchester	Town park water quality and storm water management	$0	DEC	Town park water quality and storm water management
Westchester	Fire dept wtr suply restor at Landt Lane in Scotts Corners	$0	DEC	Fire dept wtr suply restor at Landt Lane in Scotts Corners
Westchester	Fancher Rd Water Quality Basin	$0	DEC	Fancher Rd Water Quality Basin
Westchester	Flood Mitigation: Long Island Sound Area (Mamaroneck-Sheldrake Watersh	$50,000,000	DEC	Flood Mitigation: Long Island Sound Area (Mamaroneck-Sheldrake Watershed) Study
Westchester	stormwater retrofits	$2,000,000	DEC	Somers is a regulated MS4 in the NYC watershed that is required to reduce the total maximum daily load of phosphorus. The Town is currently working in conjunction with other municipalities in the Croton watershed to approach this issue regionally.
Westchester	stormwater director	$125,000	DEC	create and fill position which would provide personnel dedicated to overseeing the Town's MS4 stormwater compliance, including but not limited to retrofit work, ordinance drafting and compliance and filing and paperwork compliance
Westchester	Westchester County infrastructure and TIPS projects - letter of support	$1,600,000	DEC	Town of Eastchester Crawford St storm drainage system
Westchester	West Point Foundry Preserve Habitat Restoration	$312,215	DEC	Will restore four habitat areas of preserve. Part of 87-acre outdoor museum and nature preserve. Remove rubble from brook and create natural streambank, clean out silted pond, trees removed and replanted.
Westchester	Long Dock Beacon Park	$4,420,000	DEC	Reclamation of a 13-acre parcel on a post-industrial brownfield urban site along the Hudson River in the city of Beacon - Phase 1 of an $88 million hotel-conf. center. Park will include rehabilitated wetlands, walking trails, areas for picnicking, passive recreation & fishing and an environmental learning area for river-based environmental education.
Westchester	Lake Waccabuc Eradicate Egeria Project	$45,000	DEC	A new invasive plant has been found in one cove of Lake Waccabuc. We want to suction harvest approximately 2 acres of the cove. Our goal of eradicating the plant, Egeria densa, from Lake Waccabuc should keep it getting into other area lakes and from theNYC reservoir system.
Westchester	Midland Ave/Pondfield Road Storm Water Drain	$8,300,000	DEC	The Village of Bronxville, in conjunction with the Bronxville Union Free School district (UFSD) is proposing a flood mitigation project to relieve chronic flooding in the Midland Valley Drainage Basin, which is part of the larger Bronx River Watershed. The high flood stage effects of the Bronx River impedes the release of runoff through the existing stormwater conveyance network during storm events. The result is an accumulation of property damaging flood waters in the topographically depressed MidlandAvenue Pondfield Road vicinity that includes the Bronxville UFSD school campus. The April 2007 storm event resulted in flood damages in excess of $10 million. The project described in detail in the July 2007 ?Midland/Pondfield Area Stormwater Flooding Report? prepared by J. Robert Folchetti & Associates LLC includes the construction of either a below grade or at grade stormwater detention storage system combined with a stormwater pumping system. The stormwater detention and pumping facilities, as curren

County	Project	Requested $	State Agency	Additional Detail
Westchester	Library sidewalks sewers and flooding control	$300,000	DEC	Excavate affected areas install pumping stations, drywells, raise height of stairwell and run new sewer drainage. Then regrade grass area install new sidewalks and stairwell safety railing and also to include necessary electrical.
Westchester	Quarry Park landscape planning and design services	$500,000	DEC	Complete environmental testing, prepare closure plan pursuant to regulations promulgated by the state DEC.Retain landscape architectural firm to prepare plans, drawings and design documents for the adaptive reuse of this municipally owned 5.5 acre property into a passive recreational area. This site is adjacent to property owned by the state of New York and will become part of an area for hiking and passive recreational opportunities. Presently preliminary environmental testing mapping and surveying have been performed on the site. Are under contract with an engineering firm to continue this work including development of a closure plan. Prepared RFP for selection of landscape architectural firm. Would be prepared to award contract upon Receipt of necessary funds.
Westchester	Townhouse waterproofing	$100,000	DEC	Waterproofing of Town of Pelham public meeting facility called the Townhouse This facility is used for and reserved for public events. Excavation $25,000 water proofing and install sump pumps $30,000 relocating drains $10,000 landscape and regrading $20,000 contingency $15,000
Westchester	Roa Hook Road by Department of Environmental Services - Sanitation Divi	$250,000	DEC	Roa Hook Rd provides the only means of access to a municipal garage owned by the Town of Cortlandt. Unfortunately, because of its low elevation and proximity to the Hudson River, this road floods up to six times a year which creates a serious inconvenience for motorists seeking to also access the five commercial sites on Roa Hook Rd and a safety and security issue for Town employees seeking to gain access to the garage in an emergency. The solution is to raise the roadway approximately six feet near RT6. (A New York State highway)
Westchester	Ashburton Avenue Apartments - 60 Units Affordable Rental Housing	$14,398,000	DHCR	
Westchester	Affordable Housing	$24,890,000	DHCR	The purpose of the Public Housing Redevelopment is to maintain an affordable housing resource in the City of New Rochelle in perpetuity. This will be accomplished by replacing obsolete structures and systems with 228 units of new town house style rental
Westchester	Affordable Housing	$500,000	DHCR	To create affordable housing in partnership with the Town of Lewisboro and the County of Westchester to make available affordable housing to our residents with a priority for or our volunteer first responders a place to live so may we retain these peopleas active responders. In addition to open up the housing to other residents also
Westchester	Ashburton Ave. Apts.	$23,169,004	DHCR	LIHTC 9%

County	Project	Requested $	State Agency	Additional Detail
Westchester	NORMET Patient Safety Institute	$1,000,000	DOH	NorMet has a significant capital project in development, the Patient Safety Institute, the first federally designated Patient Safety Organization (PSO) in New York State, and one of the few hospital-based PSOs in the nation. NorMet works with as many as30 hospitals across the seven county Hudson Valley region outside of New York City. The 2005 Patient Safety Act is the federal legislation which introduced PSOs, thereby affording participating healthcare providers unprecedented protections enabling themto embark upon and achieve significant improvements in quality and safety patient care. The NorMet Patient Safety Institute offers hospitals, citizens, and the state the unique opportunity to more rapidly ascertain and affect improvements in care. Theseimprovements will be focused on discrete projects undertaken one at a time, but throughout a seven county region that serves millions of New Yorkers. The NorMet Patient Safety Institute is a means of furthering the commitment of nearly 30 member hospitaospitals and to identify important care processes, interventions and best practices to transform the hospitals into the safest in the nation.
Westchester	Hudson River HealthCare - Integration of Two New FQHCs	$225,000	DOH	Two new FQHCs, both located in Yonkers, NY, must be integrated into HRHCare's sytemwide information technology systems. Through this request, HRHCare is seeking to ensure interoperable connective of the Yonkers sites with HRHCare's systemwide, centralized network of EHR/electronic health record and practice manage system, EDR/electronic dental record, email. and telecommunications. Specifically, HRHCare is asking to 1. equip each new site with computers, scanners, servers, upgrades and other hardware to meets the standards and capabilities for the new system, and 2. purchase and install a new phone system at the new Yonkers sites and HRHCare's main Peekskill site to allow voice-over IP and 4 digit dialing between sites.
Westchester	Hudson River Community Health	$250,000	DOH	Dental Services in Yonkers
Westchester	Mt. Vernon Neighborhood HC	$1,322,819	DOH	Implementation of Electronic Health Data Exchange
Westchester	Open Door Medical Centers	$150,000	DOH	Renovation of Port Chester and Ossining Facilities to Expand Exam Rooms
Westchester	Open Door Medical Centers	$402,500	DOH	Health Information Systems Enhancements and Upgrades
Westchester	Open Door Medical Centers	$1,240,000	DOH	Renovation of Sleepy Hollow Facility
Westchester	Open Doors Family Medical Center	$1,792,500	DOH	3 separate projects - renovations; new exam rooms; HIT
Westchester	Village of Sleepy Hollow (Senior Center)	$1,900,000	DOH	Construction of low-/moderate-income green senior center
Westchester	PPHP White Plains Health Center Renovation	$250,000	DOH	Interior and exterior renovation of the health center including a new exam room and lab area, erecting a privacy wall in the waiting area, renovating the medical records room, upgrading the fire alarm system, HVAC system improvements, landscaping, and painting.
Westchester	PPHP Electronic Health Information	$500,000	DOH	Purchase and installation of an Electronic Health Records (?EHR?) system consisting of 2 servers, application and database, located centrally at our administrative headquarters, and full installations of hardware (cabling, network switches and communications equipment, tablet PCs, laptops, printers, scanners, etc.) and application software at all 13 of our health centers. These centers service approximately 40,000 unique patients on an annual basis. Once in place, the EHR system will allow PPHP to morequickly and efficiently schedule patient visits, while also collecting critical patient information that may be used individually to track and improve patient outcomes. This proposal supersedes the PPHP project of the same name submitted on 3/13/09.
Westchester	YOUTH EMPLOYMENT INITIATIVE	$1,500,000	DOL	Comprehensive Program to immediately employ youth ages 14-24 in a varietyof different fields. Anticipated to employee approximately 200 or more young people immediately.

County	Project	Requested $	State Agency	Additional Detail
Westchester	SAVE EDUCATION JOBS	$1,000,000,000	DOL	My wife just got a pink slip from Peekskill Middle School where 20 or more other teachers also got pink slips in their district. I know there are many more teachers that are endangered of losing their jobs in other districts as well. I believe Educationis a very important and vitale part of our economy. We have very good teachers that are being let go and these jobs need to be saved. Peekskill especially need help. This is a high needs area where there is not a lot of funding that will help these kidssucceed. My wife comes home stressed out everyday because there are not enough text books and these students do not have enough money to buy calculators for Regional Exams that are required by state law. Please help my wife and the school districts around Westchester to make education a great experience for all students, even in high need areas. Thank you.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Westchester	The Ardsley Salt Shed	$200,000	DOT	The Village of Ardsley is looking to build our first ever salt shed. This shovel ready project has all its approvals in place including site plan, survey, location approvals, soil testing, design, environmental review, etc. The first draft of the bid documents have been prepared. We hope to commence contruction in late summer. For many years the Village salt pile has been located under a bridge where it has been subject to the elements and ""inventory shrinkage."" We suspect it has contributed to some of the deterioration of the underside of the Ashford Avenue bridge as well as many of our neaby parked DPW vehicles. There is also concerns about leaching into the nearby Saw Mill River. The shed would have concrete end walls and stress skin panel frames,wood trusses and frames, and will be able to store 350 tons from the eleme

Westchester	Bridge Rehabilitation: TSP Northbound/Croton Reservoir	$42,656,400	DOT	
Westchester	Pavement Resurfacing: TSP : Route 117 - Route 35	$14,400,000	DOT	
Westchester	Demolition of Battery Place Bridge	$600,000	DOT	The Battery Place Bridge was constructed in 1913 and spans the Metro North tracks. The bridge, which provides the sole means of municipal access to residents of Battery Place Rd., was finally closed in 2002 to vehicular and pedestrian traffic due to itsdilapidated condition. The Battery Place Bridge is jointly owned by the Town of Cortlandt, Metro North and Westchester County. The Town of Cortlandt has hosted numerous meetings in recent years with representatives of Metro North and the County. Everyoneagrees that the bridge has deteriorated to point where it poses a potential threat to the railroad and, therefore, must be demolished immediately.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Westchester	Hudson Valley Healthcare System Franklin Delano Roosevelt V.A. Roadwa	$800,000	DOT	Since the Battery Place Bridge was closed in 2002, residents of Battery Place Rd. have used an existing road, which is owned and maintained by the Veterans Administration to gain access to their property. The owners of the Battery Place Bridge (the Townof Cortlandt, Metro North and Westchester County) have evaluated various options in providing access to Battery Place including rebuilding the existing bridge, constructing a tunnel and building a separate access road along the Metro North ROW. It was concluded that the most cost effective solution to access Battery Place is to use the existing main entrance road to the VA property. This access road provides a linkage to Battery place however the road must be upgraded to address safety concerns and tobring it up to municipal standards. The Town of Cortlandt was able to secure an access easement for the residents of Battery Place to use this road; however, the road needs to be upgraded.
Westchester	Montrose Station Bridge (Deck replacement):	$700,000	DOT	In 2005, after the New York State Department of Transportation issued a safety flag for ?scaling concrete?, the Town hired a consultant to evaluate the structural integrity of the Bridge. It was determined that the concrete slab, which is supported by the steel superstructure, must be replaced. In 2008 another safety flag was issued for the same reason. The bridge, which spans the Metro North tracks, is jointly owned by the Town of Cortlandt, Metro North and Westchester County.
Westchester	Pedestrian Bridge over the rails to replace Battery Place Bridge	$1,000,000	DOT	Since the Battery Place Bridge was closed, pedestrians in this heavily populated section of Cortlandt do not have access to the Hudson River waterfront, which is part of the regional Hudson River Valley Trailway system. This new pedestrian bridge would benefit our residents in having access to the Hudson River
Westchester	Craft Lane Bridge (demolition)	$300,000	DOT	The Craft Lane bridge, which spans the Metro North tracks, is jointly owned by the Town of Cortlandt, Metro North, and Westchester County. This unsafe bridge was closed to vehicular and pedestrian traffic in 2004 after it was determined that rehabilitating the bridge was too costly.
Westchester	Cortlandt Boulevard (Rte. 6)	$3,000,000	DOT	This is the final phase of a three-phase project to enhance the visual appeal of Rt. 6 (now known as ?Cortlandt Boulevard?), improve pedestrian and bicycle access throughout the corridor and enhance safety. The first two phases, which will be funded by area developers and a $1.9 million dollar federal grant, includes the construction of sidewalks, bus kiosks?, signage, lighting and landscaping. The final phase will include the reconfiguration of a dangerous intersection and the addition of center landscape islands which will improve aesthetics by breaking up the wide appearance of asphalt from one side of the Boulevard to the other side and, more importantly, provide vehicular ?stacking? and channelized access to the many businesses long this well traveled corridor. (Ideally all three phases should occur simultaneously.) The design work for all phases will be outsourced.
Westchester		$110,000	DOT	
Westchester		$143,000	DOT	
Westchester		$281,000	DOT	
Westchester	Treatment Plant Imp.	$6,320,655	EFC	
Westchester	Treatment Plant Upgrade [Nutrient Removal (SMO-92)]	$11,656,500	EFC	
Westchester	Treatment Plant Upgrade [Nutrient Removal (SMO-92)]	$43,344,000	EFC	
Westchester	Treatment Plant Upgrade (SBB-91 BNR)	$5,002,000	EFC	
Westchester	Treatment Plant Upgrade (SPC-94 BNR)	$10,308,000	EFC	
Westchester	Treatment Plant Upgrade (SPC-94 BNR)	$67,000,000	EFC

County	Project	Requested $	State Agency	Additional Detail
Westchester	Brownfield, Landfill-CAP (MSW), Remed	$1,936,100	EFC	
Westchester	Sewer Rehab (SYO-85)	$2,000,000	EFC	
Westchester	Sewer Rehab (SYO-85)	$2,000,000	EFC	
Westchester	Drainage Projects: Infiltration and Inflow	$4,750,000	EFC	Drainage Projects: Infiltration and Inflow
Westchester	Conversion and Upgrade of Saw Mill Pump Station and existing infrastructu	$3,000,000	EFC	The Saw Mill pump station is a decades-old facility that serves a resident population of over 10,000, plus a variety of businesses including Northern Westchester Hospital. On average, the pump station handles 1.3 million gallons of effluent per day, but
Westchester	Water Transmission Main	$4,000,000	EFC	This 30ö diameter underground pipeline would complete a connection between the CityÆs Central Avenue Pump Station (CAPS) and the Orchard Street Pump Station (OSPS.) This provides the City with a backup water supply source, in the event that a failure occ
Westchester	Drinking Water Storage Tank	$18,000,000	EFC	Replace the CityÆs nine million gallon, 1928 vintage drinking storage water reservoir (tank) with twin eight million gallon tanks. The aged existing tank (our only one) is at the end of its useful life and its capacity is below the US EPA/NYS DOH require
Westchester	Rehabilitation of Drinking Water Reservoir Dams	$3,000,000	EFC	Rehabilitation of the public water supply reservoir dams. These two (2) dams must be reconstructed to comply with the recent Federal requirements for hazard protection. In addition, major spillway reconstruction is necessary to achieve the required 100 a
Westchester	Sanitary and Stormwater System Rehab	$1,000,000	EFC	Pelham Manor requests $1 million for rehabbing its sanitary and storm water systems. We are under strong regulatory pressure to eliminate storm water infiltration of the sanitary sewer system and to better manage our storm water system. This infiltrationoverloads the sewer treatment plant causing algae blooms and other adverse effects in Long Island Sound. Specifically, we would like to refurbish Pelham Manor's systems by repairing, re-lining and, where necessary, replacing the existing sewer pipes. Bymaintaining the existing structure we can achieve the required functionality at minimum cost and disruption, thereby getting the biggest 'bang for the buck'. We have taken extensive TV footage of our sewers via robot-cameras and gotten reliable cost andtimeline estimates. We can commence construction in 90 days and easily be finished within a year. This capital project scores extremely well against the goals of the stimulus bill and environmental protection: Rebuilding sewers is specifically mentioned
Westchester	Crawford Drainage	$1,600,000	EFC	To increase the size of the Crawford Street storm drain system from Rose Ave. to Siwanoy Golf Course by replacing existing lines with larger pipes.
Westchester	Reeves Newsom Water Supply Station Upgrades	$6,000,000	EFC	Renovate and modernize the primary pumping station for the Village. Modifications to pumps and controllers, heating and ventilation system and needed structural repairs to the building.
Westchester	Village of Haverstraw Dr. Girling Drive Pump Station	$0	EFC	Village of Haverstraw Dr. Girling Drive Pump Station
Westchester	Upgrades Long Island Sound Waste Water Treatment Plants	$235,000,000	EFC	Upgrades Long Island Sound Waste Water Treatment Plants
Westchester	Install Variable Frequency Drives Peekskill Wastewater Plant	$4,100,000	EFC	Install Variable Frequency Drives Peekskill Wastewater Plant
Westchester	Reeves Newsom Water Supply Station Upgrades	$6,000,000	EFC	Reeves Newsom Water Supply Station Upgrades
Westchester	Water Treatment Plant Upgrade	$1,200,000	EFC	The funds requested will be used to replace five filters at the Indian Brook Water Filtration Plant and allow plant to increase the capacity of water it can provide.
Westchester	WATER SUPPLY IMPROVEMENT	$2,000,000	EFC	Rehabilitation and replacement of 10 miles of water mains in the City of Mount Vernon
Westchester	Village of Briarcliff Manor	$20,000,000	EFC	Transmission water main
Westchester	Town of Ossining	$1,370,000	EFC	District pump station with gravity sewer
Westchester	Port Chester	$1,750,000	EFC	Sewer Infrastructure
Westchester	Village of Mamaroneck	$2,500,000	EFC	Renovating Sanitary Sewer System

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Westchester	Sanitary Sewers	$30,200,000	EFC	Sanitary Sewers
Westchester	Peekskill Wastewater Tretment Plant variable frequency drives	$4,100,000	EFC	Peekskill Wastewater Tretment Plant variable frequency drives
Westchester	Continental Village correct low water pressure	$1,200,000	EFC	Continental Village correct low water pressure
Westchester	1 million gallon water tank off Furnace Dock Rd	$2,200,000	EFC	1 million gallon water tank off Furnace Dock Rd
Westchester	Tamarack Sewers	$2,500,000	EFC	Tamarack Sewers
Westchester	Westbrook Drive Sewer Pump Station	$1,300,000	EFC	Westbrook Drive Sewer Pump Station
Westchester	Jerome and Rita Drives Waterline Replace and Sewers	$2,500,000	EFC	Jerome and Rita Drives Waterline Replace and Sewers
Westchester	Improvements to Sanitary Sewer System, Storm Sewer System and Manhc	$1,750,000	EFC	Rehabilitation of segments of the city's sanitary sewer system, storm sewer system and their associated manholes.
Westchester	Kingsland Point Park Sewer Connection	$450,000	EFC	This infrastructure project is the construction of 1500 linear feet of new 3? force main sanitary sewer line and associated equipment to connect an existing historic bathhouse in Kingsland Point Park to the Village of Sleepy Hollow?s sanitary sewer system. A new sewer system is critical to the overall bathhouse renovation project because without restroom facilities, the building will not be able to function as a public amenity. When completed, the Bathhouse will be a key element and crucial connection in Westchester County?s RiverWalk which extends from Yonkers to Peekskill and is expected to be an economic revitalization by becoming a community and tourist destination for water-related recreation for residents and visitors.
Westchester	community water for the Business historic District	$1,000,000	EFC	the Somers Business historic District currently gets its water from individual well supply. The proposed projrect would require the installation of 4600 linear feet of 8 inch water main
Westchester	Construction of new Water Storage Tank	$4,500,000	EFC	The Village of Sleepy Hollow is required by the New York State Department of Health to build a new water storage tank to increase its reserve capacity to meet public health guidelines. Current capacity is dangerously insufficient for fresh water supplyin fire emergency demands.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Westchester	Upgrade Shaft 9 Pump Station	$1,000,000	EFC	The Village of Sleepy Hollow is required to upgrade its Shaft 9 Pump Station in order to keep its residents supplied with clean water during repairs to the Catskill Aqueduct. Currently the Catskill Aqueduct is the Village's sole water source.
Westchester	Westchester County infrastructure and TIPS projects - letter of support	$5,000,000	EFC	Westchester County nitrogen removal and upgrades to Long Island Shore waste water treatment plant
Westchester	Westchester County infrastructure and TIPS projects - letter of support	$1,000,000	EFC	Pelham Manor storm sewer rehab
Westchester	Westchester County Projects	$0	EFC	Waste Water Infrastructure - Environmental Facilities Corp. - Nitrogen Removal and Upgrades to Long Island Shore Waste Water Treatment Plants
Westchester	KW Davis Bathhouse Sanitary Sewer	$2,800,000	EFC	Construction of 1500 lin. Ft. of new main sanitary sewer line and associated equipment to connect and existing historic bathhouse in Kingsland Point Park to the village of Sleepy Hollow's sanitary sewer system.
Westchester	Westchester County Nitrogen Removal & Upgrades to Long Island Sound S	$412,000,000	EFC	Enhance the infrastructure at WWTP that discharge into the Long Island Sound in order to reduce level of nitrogen contained in those discharges. ($235 million). Undertake major construction project at the New Rochelle WWTP to increase the capacity of this facility to 20 million gallons/day and upgrade the facility's secondary treatment and disinfection processes ($177 million)
Westchester	Hardscrabble Road water main extension	$4,025,000	EFC	This project will extend a public water supply to 509 homes. Private wells in this area are unreliable and do not provide a consistant water supply to these homes.
Westchester	Locust Road water system	$7,000,000	EFC	This project will provide water mains, a pump station and a water storage tank to deliver a public water supply to 241 existing homes and fire fighting capability.
Westchester	Choate Lane water main extention	$672,000	EFC	This project will extend a water main to supply 12 existing homes with a public water supply. Private wells in this area are unreliable and do not provide a consistent water supply to these homes.
Westchester	Pleasant Ridge water district consolidation	$500,000	EFC	This project will provide water main connections necessary to consolidate approximately 50 homes with an existing town water district and provide a public water supply to 4 homes which are currently supplied by private wells.
Westchester	Tamarack Sewers	$2,500,000	EFC	This project will provide sewer service to approximately 100 homes near Rt. 202, (a New York State highway) which is an area plagued by inadequate or failing septic systems.
Westchester	Continental Village - Low Water Pressure	$1,200,000	EFC	Fire flow tests conducted in this area revealed dangerously low water pressures. All of the water mains in this area are undersized or are ?closing up? and must be replaced along with the hydrants and valves. This would benefit 150 residential properties
Westchester	A one million gallon water tank off Furnace Dock Road	$2,200,000	EFC	Currently, the Town of Cortlandt has just over one and a half days of potable water storage capacity in its water system. This is well below the recommended days of storage capacity. A water tank with a minimum capacity of one million gallons is needed in the central section of Town where no storage exists. A tank at this location would also help to equalize and improve the pressure distribution in this area.
Westchester	Westbrook Drive Sewer Pump Station	$1,300,000	EFC	The existing receiving gravity sewer system in Westbrook Drive, which services the RT 6 Corridor, (A New York State highway) is at capacity. This existing sewer system is old and experiences backups, which creates a health hazard. The proposed sewer pumpstation will provide sewer service to the region and eliminate the current problems with the existing system. It will benefit both residential and commercial properties.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Westchester	Jerome Drive and Rita Drive Waterline Replacement and Sewers	$2,500,000	EFC	With the addition of the proposed Westbrook Drive Sewer Pump Station (see above), downstream sewer capacity will be available to service this area, which is plagued by inadequate or failing septic systems. Additionally, the existing water mains in this area are old, brittle transite pipe that ruptures frequently and must be replaced with Ductile Iron Pipe. This project will benefit over 100 residential properties.
Westchester	Church/Division Garage	$16,000,000	ESD	This project will support long-term development and investment in the downtown by constructing 840 space parking garage, including 200,000 square-feet of retail on the ground floor in the heart of the City's Downtown Business District.
Westchester	Village of Haverstraw Waterfront Redevelopment Phase 2&3	$18,300,000	ESD	Village of Haverstraw Waterfront Redevelopment Phase 2&3
Westchester	Intelligent Transfer Station/Clean Energy for Cement Plants	$12,000,000	ESD	We plan to build an Intelligent Transfer Station? (ITS) to recycle, through its natural bio-drying system, solid municipal waste into clean, odorless, dry, renewable fuel called Amabilis?. This sustainable technology was developed by ECODECO, a subsidiary of A2A, Italy?s largest environmentally-friendly energy-producing company. The ITS system has been successfully implemented throughout Europe. This proven clean-energy technology is the answer to transform obsolete waste into energy structures. It takes 14 days for the ITS to transform solid waste into Amabilis?, a stable and efficient fuel. Amabilis? can then be used to provide clean renewable energy from dedicated combustion plants (thermal & electrical); in bioreactors to produce biogas, in industrial plants (such as cement plants), as an alternative to coal. The current proposal is to produce Amabilis? as a clean alternative fuel source for local cement plants. ITS facilities currently operate in England (a major ITS is located in the heart of Look forward to introducing the next age of green renewable energy and waste treatment to the United States and are excited to begin in New York
Westchester	MV GREEN INCUBATOR CENTER FOR EDUCATION AND TRAINING	$2,250,000	ESD	1. Renovate the building for use as a green technologies incubator. It is anticipated that the building will include a resource center, conference center, classrooms and offices. 2. Build a partial mezzanine at the First Floor. Ceiling heights will be low (7""-6""). 3. Install new HVAC system which incorporates geothermal heating/cooling solar hot water heating and energy efficient HVAC systems. It is anticipated that the geothermal system will be located in the adjacent lot. 4. Utilize the existing lower as an icon for the Center. Develop the main entry to the building at the base of the tower, via a garden created in the adjacent lot. Light the tower at night and use it on stationary. 5. Acquire/long-term lease the vacant lot to the north to create the building entrance with a garden and one story parking structure for visitors and staff. The garden will function as the transition from the street and/or parking structure to the building. The main entry point will be at the tower. Develop a demonstra
Westchester	AMDeC biomedical research facility	$1,500,000	ESD	Construction of biomedical research facility in Yonkers.
Westchester	Incubator Center For the City of Mount Vernon	$3,150,000	ESD	The purpose of this project is to create an ""incubator,"" which will serve the city as headquarters for the following: education, training, job creation, and economic development focusing on ""sustainability and resiliency"" in its public structures, along with being the center of commerce and manufacturing regarding the new ""sustainable"" energy economy that is needed for the 2
Westchester	Town of Harrison Revitalization District	$19,800,000	ESD	600 car parking garage/Flood Control project
Westchester	Tarrytown-on-Hudson	$2,000,000	ESD	Parking Garage (Metro-North & downtown)
Westchester	City of Yonkers	$321,000,000	ESD	Downtown Redevelopment Project (retail, entertainment, etc.)
Westchester	Boys and Girls Club of New Rochelle	$94,000	ESD	Repair gym floor, replace karate/dance floors

Second Draft List - Project Proposals

Westchester	Downtown Infastructure Redevelopment (to facilitate the sfc development)	$49,939,434	MAIN_ST	The work includes the uncovering (daylighting) of the Saw Mill River at two locations for a total of 1,900 linear feet in downtown Yonkers. This critical city infastructure was covered over in the mid - 1920's due to it's use as an open sewer. This environmental injustice has been corrected and the flows through the underground tunnels have improved in recent years. The daylighting will play a significant role in the revitalization and economic development of more then $3.6 billion in private development for the City. The project will include a realignment of the Saw Mill River and the installation of a flood control bypass tunnel. At one of the locations the river is being relocated in order to facilitate a major development project. At the other location the work includes the relocation of an existing river-bed. The flume is over 80 years old and parking areas and utilities are in need of repair. The utility work includes replacement of over 1175 feet of stormwater piping, 350 feet of new water supp
Westchester	Tarrytown Station Improvement	$40,000,000	MNRR	Rehabilitate/replace all station elements, including overpasses, elevators and stairs, and platforms
Westchester	Croton / Peekskill Station Rehabilitation	$8,400,000	MNRR	Station elements include: overpass, stairs, canopy, and platforms at Peekskill ; roof replacement and platform improvements at Croton-Harmon
Westchester	New Haven Line Stations-Phase II	$39,850,000	MNRR	Continues work begun in current program. Stations include Mount Vernon East, Pelham, New Rochelle, Larchmont, Mamaroneck, Harrison and Wakefield. Work includes improvements to platforms, overpasses/underpasses, stairs, and ramps
Westchester	Substation Bridge 23 - Construction	$30,600,000	MNRR	Construction to replace existing Substation Bridge 23 in Mount Vernon East
Westchester	MTA transit-oriented development (TOD)	$19,200,000	MTA	1st phase of downtown redevelopment is construction of 600 car commuter garage. 2nd phase is retail and residential complex with apts and significant retail space. Catalyst for upgrade of retail business district.
Westchester	Parking garage Metro North Railroad Station	$0	MTA	Parking garage Metro North Railroad Station

County	Project	Requested $	State Agency	Additional Detail
Westchester	Electrical and Window Upgrade for Village Hall	$50,000	NYSERDA	The project would include the weatherization of all windows and doors in the Village Hall (33 windows and 7 doors). By installing new window treatments and energy efficient exterior doors, we will be able to reduce CO2 emissions and decrease our use of h
Westchester	Hybrid Sanitation Vehicles	$390,000	NYSERDA	The purchase of two hybrid sanitation vehicles will assist the American truck manufacturers as well as body manufacturers in retaining present employees. The benefit of providing hybrid units will assist manufacturers in futher developing units that areroad tested and promotes further sales. The enviromental benefit of providing hybrid units is significant and is in keeping with the Presidents move for alternative fuel vehicles.
Westchester	Use of microGreen Vehicle Engine Oil Filter	$1,000,000	NYSERDA	The microGreen oil filter is an energy efficiency product that reduces consumption of engine oil, providing cost savings and environmental benefits. The filter became commercially available in October 2008 and can be implemented within 90 days. The project is for use of the microGreen oil filter in Federal, State, County and municipal fleets and school buses. Funding will enable implementation of the filter on 15,625 vehicles and will extend engine oil use in these vehicles to 24,000 miles. Project willresult in estimated savings of $1,068,750 on oil maintenance costs, reduce oil consumption and recycling by 150,390 gallons, and provide potential fuel savings of $1,250,000. Project cost savings and energy efficiency will significantly exceed funding requirements and will result in the creation of 12 new jobs and retention of 4 existing jobs in New York State.
Westchester	Lighting replacement for parking garages Michaelian Office Bl	$2,000,000	NYSERDA	Lighting replacement for parking garages Michaelian Office Bl
Westchester	Install Anaerobic Digester Gas Fueled Engined Yonkers WWP	$6,200,000	NYSERDA	Install Anaerobic Digester Gas Fueled Engined Yonkers WWP
Westchester	Upgrades to County Building	$4,400,000	NYSERDA	Upgrades to County Building
Westchester	Install computerized energy mgmt systm county bldgs	$8,000,000	NYSERDA	Install computerized energy mgmt systm county bldgs
Westchester	Replace lights various county bldgs.	$200,000	NYSERDA	Replace lights various county bldgs.
Westchester	Energy upgrades to County Center	$1,500,000	NYSERDA	Energy upgrades to County Center
Westchester	Install photovoltaic system in Lowrise Bldg DES Facility	$1,500,000	NYSERDA	Install photovoltaic system in Lowrise Bldg DES Facility
Westchester	Wind generator on Hilltop Hanover Farm	$200,000	NYSERDA	Wind generator on Hilltop Hanover Farm
Westchester	Upgrade the Thermal Ice Storage Unit Michaelian Off Bldg	$500,000	NYSERDA	Upgrade the Thermal Ice Storage Unit Michaelian Off Bldg
Westchester	Lighting upgrade at Playland Park	$500,000	NYSERDA	Lighting upgrade at Playland Park
Westchester	Replace windows in Michaelian Office Bldg.	$6,000,000	NYSERDA	Replace windows in Michaelian Office Bldg.
Westchester	Replace old boilers at various park facilities	$300,000	NYSERDA	Replace old boilers at various park facilities
Westchester	2 Electric Vehicles for Security Ramp Coordinator	$65,000	NYSERDA	2 Electric Vehicles for Security Ramp Coordinator
Westchester	CITY HALL ENERGY EFFICIENCY IMPROVEMENTS	$2,116,000	NYSERDA	1. Take probes of at least four areas at the standing seam roof to investiagate the conditions of the copper and substrate to determine the appropriate course of action (e.g. localized repair at deteriorated joint versus complete replacements). 2. Replace all existing flat roofs and replace with modified Bitumen type of roofs. The entire existing roof should be removed and the substrate repaired. A new Modified Bitumen roof (low maintenance) system should be installed over rigid insulation, with 20 yearmanufactuer's and installer's warranties. Increase the slope of the flat roof at the exterior parapet wall to provide positive drainage to the roof drains. Install ""basket"" type grilles at the roof drains to reduce clogging from the leaves. Install properly detailed flashing where the flat roofs intersect the sloped roofs and the intersect the sloped roofs and the parapet. 3. Install thermostatically controlled air valves at the stream radiators to provide some local control (reduction) of the he

County	Project	Requested $	State Agency	Additional Detail
Westchester	Retro-fitting the Mount Vernon Department of Public Works Motorized Fleet	$0	NYSERDA	Create a pilot program that would feature retro-fitting a selected vehicle with an electric motor, with the objective of boosting miles per gallon from 25-40%, reducing carbon emissions, and improving vehicle maintenance.
Westchester	The Creation of a Model Building in the Development of a Sustainable Com	$0	NYSERDA	Requesting funds for the creation of a zero-carbon, self-sustainable building that would be a model for a future city development. This pilot project would be used to attract venture capital regarding the potential re-vitalization of a section of the city that would be developed into a new self-sustaining community of town houses and stores with access to mass transportation.
Westchester	Manhattanville College capital projects	$1,800,000	NYSERDA	Exterior Building projects - replace windows
Westchester	Manhattanville College capital projects	$250,000	NYSERDA	Interior Building projects- HVAC improvements
Westchester	Manhattanville College capital projects	$1,500,000	NYSERDA	Interior Building projects - replace 40 campus boilers
Westchester	Westchester County	$3,500,000	NYSERDA	Photovoltaic systems in several buildings
Westchester	Westchester County	$2,000,000	NYSERDA	Green Lighting replacement for parking garages
Westchester	Westchester County	$200,000	NYSERDA	New lights and censor system (Green) - county buildings
Westchester	Westchester County	$200,000	NYSERDA	County would install wind generator on Hilltop Hanover Farm
Westchester	Westchester County	$300,000	NYSERDA	Replace boilers throughout the county
Westchester	Town of Greenburgh	$168,750	NYSERDA	Intallation of Solar Hot Water System at Community Ctr
Westchester	Installation of Solar panels on four buildings	$0	NYSERDA	Installation of Solar panels on four buildings
Westchester	Install New City hall windows 99 windows	$148,500	NYSERDA	Install New City hall windows 99 windows
Westchester	Lighting Replacement Program	$2,000,000	NYSERDA	Lighting Replacement Program
Westchester	Replace Obsolete Rooftop HV Units	$4,400,000	NYSERDA	Replace Obsolete Rooftop HV Units
Westchester	Replace T12 with T5 lighting system	$200,000	NYSERDA	Replace T12 with T5 lighting system
Westchester	Replacing oil-fired burners with Energy Star rated dual fuel burners	$1,500,000	NYSERDA	Replacing oil-fired burners with Energy Star rated dual fuel burners
Westchester	Town Hall Energy Conservation Improvements	$905,164	NYSERDA	Town Hall energy efficiency improvements; install energy management syste, modify hot water syste, install lighting controls, install pipe and tank insulation, upgrade lighting, improve motors, improve insulation, install ceiling fans, completly change out old/inefficient HVAC system.
Westchester	vehicle replacement	$150,000	NYSERDA	replace the towns vehicle fleet with hybrid vehicles
Westchester	Town of Lewisboro Structural and Energy Efficiency Building Upgrades	$675,000	NYSERDA	The various Town office buildings are old farmhouses, residential buildings and other structures that are more than 100 years old and are in need of structural improvements and energy efficient upgrades that will allow for more effective and improved useof our buildings for various departments and the many programs and services they provide to the public.
Westchester	Westchester County PV Systems	$3,500,000	NYSERDA	The County would install photovoltaic systems in the Low-rise Building, the DES Equipment Signage Facility, the 375 Executive Boulevard building and Hilltop Hanover Farm and use the renewable energy generated to run each office complex. The proposed project would create 10 new construction jobs and save $162k in energy costs annually.
Westchester	WINDOW REPLACEMENT	$120,000	NYSERDA	Replace very old ,yellow and scratched , energy inefficient PLEXIGLASS windows (originally used for child safety purposes) with energy efficient safety glass. Number of windows :124 units approx. 7' x 4'.
Westchester	Project Power	$750,000,000	NYSERDA	Build a new natural gas fired power plant and a wind farm in downstate new york state. Con Ed charges some of the highest rates for electricity in the country. Why is this necessary? Lower monthly electricity bills for everyone will stimulate the economy. Also, why are westchester rates so high, an not already subsidized, given we have a nuclear plant already sited in our county??

If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Westchester	Immigration Assistance Project	$75,000	OCFS	To assist immigrant families and battered women by providing free immigration legal services and advice. Assist families to obtain work permission where allowable. Assist aliens to avoid removal or deportation where feasible.
Westchester	YOUTH EMPOWERMENT CENTER	$3,000,000	OCFS	Complete outfitting of existing 2-3 story building. State of the art equipment for audio and video recording. Conference rooms and offices for youth meetings with multimedia displays. Programs include career development, performance art and entertainmentindustry training and general job and workforce development training for MV Youth.
Westchester	Phelps Memorial Hospital Center	$1,200,000	OCFS	Robin's Nest Day Care Center - Add 3,000 sf to existing day care center that currently provides care for 100 children per day. Significant waiting list and construction would enable more slots. This will include 4 classrooms, a multi-purpose room and upgrade to our HVAC systems capabilities. Upgrade and expand the existing playground areas and provide additional parking for staff and visitors.
Westchester	patient management/electronic health records integrated system	$600,000	OFT	infrastruction and installation of patient management, electronic health records system for health centers in mt. vernon, southwest yonkers and greenburgh/white plains. The project will result in electronic communications of health records across all sit
Westchester	Secure on Campus	$180,000	OFT	To supplement the College's existing camera security system, an additional 70 networked, vandal resistent, security cameras will be installed in already determined locations on 12 campus buildings, and upgraded multi-location viewing management softwareand computer server capacity will be acquired and activated.
Westchester	Universal Broadband Access	$410,000	OFT	Universal Broadband Access
Westchester	211 Hudson Valley Region	$600,000	OFT	The United Way of Westchester and Putnam as the fiscal agent for 211 Hudson Valley Region, which serves the seven counties of Dutchess, Orange, Putnam, Sullivan, Rockland, Westchester and Ulster is asking for 450K for approximately 40% of staff salariesand fringe necessary to operate, 150K for telecommunications, database expenses, and other mission critical operational costs. NYS 211 infrastructure and operations budget was removed from the NYS budget in the 08-09 funding cycle. This resulted in a netloss of almost 900K for 211 operations in the Hudson Valley Region. While we have been able to maintain our level of operations, and find some additional funding sources, 211 Hudson Valley Region is threatened with an operational deficit of 600K for this year. Additionally, our most of our non-governmental support comes primarily from contracts which require our 24/7 operation. If the lost state funding cannot be replaced, HVR 211 will be unable to operate 24/7, and unable to meet the terms of these cong. 211 has also connected over 12,750 people various financial assistance such as prescription and utility payment assistance, and unemployment insurance, insuring that many of these constituents remain solvent consumers in our marketplace.
Westchester	Radio sys upgrade reprog new radios replace of radios	$99,600	OFT	Radio sys upgrade reprog new radios replace of radios
Westchester	Citywide WiFi system police fire water sewer Dept empl	$2,000,000	OFT	Citywide WiFi system police fire water sewer Dept empl
Westchester	Communications Infrastructure Enhancements	$200,000	OFT	Replacement of the city Police Headquarters building's communications equipment and related comuters along with recording equipment.

County	Project	Requested $	State Agency	Additional Detail
Westchester	Infrastructure Data Center	$290,000	OFT	HRHCare has implemented e-Clinical Works in all of its sites to approximately fifty primary care providers. In order to ensure business continuity and adequate up time availability for our electronic health record system, HRHCare is requesting funding tosupport implementing data center virtualization. Virtualization delivers responsive IT, dynamic, efficient and available. Through the implementation of new servers and virtualization technology, HRHCare will: Implement production server consolidation and containment; Provide advanced business continuity protection at lower cost; Streamline production and test environments; Secure and manage organizational desktops; Simplify infrastructure provisioning; and Allow for adequate support of legacy applications. The modernization of HRHCare?s IT infrastructure environment will have the following impact: Increased current and future hardware utilization; Decreased cost around maintenance while expanding labor cost in critical analytical areas; Improved physie responsiveness to business needs. Ensuring a reasonable operating cost of infrastructure provides a more effective environment in which to budget. Once our environment is scalable and flexible, it will allow the organization to expand and grow adding ners, new staff, and new services. A stable and secure infrastructure is critical to organizational growth.
Westchester	Integrated Medical Equipment Technology	$290,000	OFT	HRHCare has implemented e-Clinical Works in all of its sites to approximately fifty primary care providers. HRHCare seeks to purchase the following medical equipment which directly interfaces with our electronic health record systems: Midmark Spirometer? pulmonary function test; Midmark ECG ? electrocardiogram; Clinitek 50 ? automated urinalysis test; Welch Allyn Spot 420 ? vital sign monitor. This equipment will link to local personal computers. The information obtained from the equipment will be securely transmitted to the personal computer and directly into the patient?s medical record. The purchase of this integrated equipment will provide the following benefits: Improve accuracy of data; Simplified data collection approach; Decreased medical errors; and Improved efficiency and office workflow. Effectively utilizing this equipment will dramatically improve the quality of care delivered to our patients. Improved quality will result in improved performance awards which will provide additional oppor
Westchester	PPHP Electronic Health Records	$200,000	OFT	Implementation of an electronic medical records system in the 13 medical center health system (covering Suffolk, Westchester, Rockland, and Putnam Counties) to replace paper and document based patient records.
Westchester	DPW TRUCK FLEET UPGRADE	$1,600,000	OGS	The City of Mount Vernon's Department of Public Works has not upgraded their truck fleet in over 15 years. Funds requested would be used to either purchase new ""green"" sanitation and pickup trucks or to purchase vehicles that run on an internal combustion engine, but would then have an electrical engine installed under the vehicle that would handle the low-end torque that initiates the motion of the vehicle. This technology saves between 25-40% of gasoline comsumption and the same amount in carbon emissions. In addition, it lenghthens the useful life of the vehicle by reducing wear and tear on the internal combustion engine. The purchase of new vehicles will reduce the City of Mount Vernon's carbon footprint, significantly lessen our dependence on diesel and other fuel, and serve as an example for other municipalities on how they can be more energy efficient and environmentally friendly in areas they may have though were not possible. The $2.1 million would be utilized to fund the purchase of a tota
Westchester	vacuum truck	$200,000	OGS	vacuum truck for catch basin maintenance

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. County	Project	Requested $	State Agency	Additional Detail
Westchester	Fire Department conversion to natural gas sources	$150,000	OHS	This project is to convert the heating systems at three (3) local Fire Department owned by the Village. The proposal is to convert the existing inefficient oil-fired heating systems to natural gas. The following is the schedule of work to be preformed: ò
Westchester	Village Police/Court Facility Renovations	$11,000,000	OHS	The Police/Court facility in the Village of Port Chester is in poor shape and in need of tremendous repairs. The current economic state of the Village will not allow for the funding of this project; however it is crucial that the facility be repaired. The building is approximately 15,838 square ft. plus a 2,348 square ft. vehicle garage. Adjacent to the facility is approximately 3,762 square ft. methadone clinic. The Village Engineer has estimated the project to cost $11,000,000 and will include a complete renovation of both the Justice Court and Police Department. The current state of the facility will allow for little to be salvaged during renovations, as most of it will need to be repaired. Repairing the Police/Court facility is vital to the operations of the Village and is a high priority for funding. This project would also meet one of the goals of the Village?s proposed Comprehensive Plan, which is to ?maintain and, as necessary, construct government buildings and offices to ensure that the admi
Westchester	Fire Station #1 Apparatus Floor Reinforcement Project	$2,000,000	OHS	Visible deterioration of the concrete encasement and steel girders of the apparatus bay and driveway structure prompted the Village to have a structural evaluation. Work is needed to alleviate strutural problems as well as water infiltrations problems. In addition the current vertical height of 9'11"" is inadequate for new apparatus, 14'0"" can be achieved under this proj
Westchester	Security upgrades and renovations to Rutherford Hall	$555,000	OHS	Rotate the layout of Rutherford Hall, install a solid wall or bulletproof glass behind the dais, provide for a prisoner holding cell, and an exit door for the justice adjacent to the dais.
Westchester	Fairview Fire Stations Reconstruction & Modernization Project	$8,497,000	OHS	The Fairview Fire District, whose borders are within the Town of Greenburgh in the County of Westchester in the State of New York, is making this request for consideration regarding funding of the fire district?s proposed phased project as follows: Phase1 - demolition of the existing 5,496 S.F. facility known as Station Two located on the corner of Dobbs Ferry Road and Worthington Road and construction of a new 12,960 S.F. modern state of the art facility; Phase 2 - construction of 6,269 S.F. of additions and alterations to modernize the fire district?s existing 8,325 S.F. headquarters known as Station One located at 19 Rosemont Avenue. The fire district is a political subdivision of the State of New York, independent from the Town of Greenburgh. It was formed in 1927 and is governed by a five-member board of fire commissioners. During 2007 and 2008, the district conducted a study to determine the current deficiencies and future needs of both facilities. This study culminated with the design of the athe project (Please find enclosed for your review the itemized project cost estimate prepared prior to the bond referendum providing detailed cost for the project. The total project cost estimate is shown as $8,996,878.27). The Fire District elected to p$500,000.00 from its cash reserves fund to assist with financing the project, reducing the bond amount to 8.5 million dollars. In March 2008 the project, under a bond referendum, was put before the public. Despite the minimal nature of the bond referend

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Westchester	Vista Fire District #1	$4,000,000	OHS	The project is to renovate and add on to our current firehouse which was built in 1954. With this renovation and addition is to assist the District in enhancing its operations and service to the community we serve and in addition to the surrounding communities as well. Also to bring the building up to the various building codes such as: ADA and to enhance energy saving to name just a couple. At this time the building is in need of repair such as the roof has leaked for years, and there are health concerns that need to be addressed as well such as vehicle exhaust. The building has served us well for over 60 years but as the times, community needs have changed the building needs this project to bring it up to the 21st century and the new challenges we now face.
Westchester	Fire Station 3 Project	$2,500,000	OHS	Fire Station 3 Project
Westchester	Fire Station 1 Project	$2,000,000	OHS	Fire Station 1 Project
Westchester	Fairview Fire Dept. reconstruction of stations	$0	OHS	Reconstruction of 2 firehouses to bring up to standards and enlarge
Westchester	Town of Eastchester firehouse reconstruction and construction of new emer	$13,600,000	OHS	Grant request from the Firefighters Assistance Grants program. The 5 firehouses that serve the town of Eastchester, and the villages of Tuckahoe and Bronxville are obsolete - floors are held up by temporary shoring, wiring and plumbing is failing and heating systems, windows and lighting are obsolete; reconstructions and upgrades are needed. Also requesting grant funding from the Robert T. Stafford Disaster Relief and emergency Assistance Act to constuct an emergency operations center while fire headquarters is being rebuilt.
Westchester	Eastchester Fire Department	$12,000,000	OHS	Rebuild firehouses in Tuckahoe, Bronxville, Eastchester
Westchester	Eastchester Police Department	$172,000	OHS	New officer, new car, new car computer, HQ renovations, initiatives
Westchester	Scarsdale	$11,000,000	OHS	Rehabing emergency services (police, fire, etc.)
Westchester	Fire Headquarters Reconstruction	$7,000,000	OHS	Reconstruction of the city's Fire Headquarters Building (currently unoccupiable) to serve as the fire administation and personnel offices, fire prevention bureau offices, and a fire station for the city.
Westchester	new police officers	$114,000	OHS	Hiring 3 officers for saftey patrolling.
Westchester	Baldwin Place Fire Station	$2,500,000	OHS	building of 5000 Fire Station on land donated to Fire District to provide adequate coverage to the region and affordable rental apartments to volunteer fire personnel.
Westchester	Station 1 Replacement	$12,000,000	OHS	Located in northern Westchester County, New York, the Millwood Fire District is 10 square miles and serves 6,800 residents. Fire District characteristics include: 1) Major roadways (Taconic State Parkway, Routes 100, 133 and 120); 2) 3 public schools, 35commercial properties, and several high occupancy facilities; 3) Industrial facilities such as Con Ed's Transformer Yard/ Capacitor Plant and a Water Treatment Plant servicing several towns; 4) significant portion located within Indian Point's EmergencyPlanning Zone. The current Station #1 located at 60 Millwood Road in Millwood has been in service since 1924 and is in dire need of replacement. The structural and functional shortcomings have been identified in two reports: Helms Report (1990) and theJLN Needs Assessment Study (2008). The Needs Assessment Study concluded that a number of programs and administrative weaknesses are directly linked to the lack of appropriate facilities. The Millwood Fire District needs a safe and efficient structure thait is anticipated a bond referendum will be put before the public late 2009. Please contact the District with questions.

Second Draft List - Project Proposals

County	Project	Requested $	State Agency	Additional Detail
Westchester	Memorial Field Renovation	$10,000,000	OPRHP	Reconstruction of the city's main sporrts / recreation facility including the rebuilding of the football field, soccer field, track, and grandstands for 5000 spectators along with the construction of a new fieldhouse with vending, locker, and public assembly facilities.
Westchester	Woods Auditorium Rehabilitation	$2,500,000	OPRHP	Renovation of the 1700 seat auditorium attached to Thorton High School (currently unable to be used) including, asbestos abatement, lead paint removal, upgrading seating, providing lifts for ADA compliance, renovating bathrooms, dressing rooms and lobbyareas, and installing new curtains, new lighting, new projection and sound systems, and carpeting.
Westchester	Hartley Park ADA Playground Renovation	$100,000	OPRHP	Renovation of the existing playground at Hartley Park to install play equipment that will accomodate children with disablities.
Westchester	Doles Community Center Expansion	$7,000,000	OPRHP	The rehabilitation of the existing theatre, studio and classroom spaces at the Doles Community Center along with its expansion to include an aquatic facility.
Westchester	Citywide Playground Renovations	$2,000,000	OPRHP	Rehabilitation of 15 parks / playground facilites in the city of Mount Vernon.
Westchester	Kingsland Point Park Bathhouse Renovation	$2,800,000	OPRHP	This is an adaptive reuse and renovation of a 1926 bathhouse as a community and environmental education center on the Hudson River waterfront in Kingsland Point Park. Critical renovations include 5,000 square feet of interior repairs, public amenities with low-flow toilets, environmental education class rooms, space for passive water-related recreation organizations, and a 3,265 square foot green roof. The building will be designed for three-season use so doesn?t need building-wide heating and will include operable windows instead of air conditioning, LED light fixtures with energy efficient bulbs and trees landscaped to provide additional cooling of the building. Housing a kayak outfitter and sailing school when completed, it will provide a crucial connection in Westchester County?s RiverWalk which extends from Yonkers to Peekskill and is expected to spur economic revitalization by becoming a community and tourist destination for water-related recreation for residents and visitors.
Westchester	9 acres, Shenorock	$700,000	OPRHP	Cleanup of a park area which dumping occurred on back in the 1950s to restore to parkland.
Westchester	town house sprinkler system	$200,000	OPRHP	the Somers Elephant Hotel is a 200 year old building located on the national Register of Historic Places. It is used as the seat of Town Government nd is located in an area of Town wher eno fire hydrants exist. A sprinkler system would help protect thisvaluable national asset in the unfortunate event of a fire.
Westchester	A Recreation, Educational and Safety Multi-Use Trail	$750,000	OPRHP	Wampus Brook Pathway will facilitate safe opportunities for walking, bicycling, fitness, environmental and historic sites awareness along a hazardous segment of NYS Route 128. It will connect neighborhoods with town and county park facilities and business in the Armonk hamlet including Revolutionary WLAR Site of Maj. John Andre's Containment, Wamlpus Brook Park, The Hergenhan Recreation Center, Wampus and Crittenden Schools, North Castle Library, and Ehrman Recreation Center. The distance is approximately 12,500 feed of pathway/trailway.
Westchester	Hudson Valley Region	$2,400,000	OPRHP	Scenic Hudson's request for funding for shovel-ready state park improvement projects - specifically - Kathryn W. Davis Bathhouse - Letter of support from Senator Saland
Westchester	KW Davis Bathhouse Renovation	$45,000	OPRHP	Reuse and renovation of a 1926 bathhouse as a community and environmental education center on the Hudson River waterfront in Kingsland Point Park - interior repairs, public amenities, class rooms, water-related recreation organization space. Will housea kayak outfitter and sailing school. Will provide crucial connection in Westchester Co. RiverWalk which extends from Yonkers to Peekskill.

March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Westchester	The Andrus Planetarium Digitization Upgrade Project	$997,500	SED	The mission of the Andrus Planetarium is to act as a center for learning in the space sciences, to introduce visitors of all ages to the wonders of the heavens, and strengthen public awareness of the connections between humans and the universe we inhabit. The Hudson River Museum is home to the Andrus Planetarium, Westchester?s only public planetarium and one of the museum?s most recognized resources. It is the only public planetarium between New York City and Albany. The Andrus is a unique teaching facility for schools, children and families. It is also a center for public engagement on the weekends and during public events presenting over 500 programs a year. Stars are projected using the Zeiss M1015 star projector installed in 1987 and capable of projecting 5,000 stars of the Northern and Southern Hemispheres. The Andrus also relies on over 60, now obsolete, special effects projectors including Kodak slide projectors which are no longer manufactured or serviced, film projectors, and homemade specialrequire digital projection. At present, we are limited to material intended for use on a computer screen or TV, and lack an immersive full-dome system which would allow the full exploitation of 3-D astronomical datasets Digitization of the Andrus is essrole in astronomy education, bringing the wonders of space to our audiences. Without this technological upgrade Westchester?s and the Lower Hudson Valley?s only planetarium will fade into obsolescence. Digitization will permit the Andrus to once again b
Westchester	Purchase College, Building #45 Exterior Masonry Repairs	$3,618,000	SUNY	
Westchester	Purchase College, Rehab Central Plaza Deck and Drainage	$21,246,776	SUNY

County	Project	Requested $	State Agency	Additional Detail
Westchester	Westchester County -Operating assistance	$7,000,000	Unassigned	mass stransit operating assistance to maintain (not increase) current bus fare and the current level of services
Westchester	Westchester County - Aviation	$2,255,000	Unassigned	various projects at the Westchester County Airport
Wyoming	T. of Java Public Works Program	$395,890	CDBG	
Wyoming	Department of Social Services Building	$5,000,000	DASNY	Currently the Department of Social Services is housed in two separate buildings, which is a cause of inefficiency in the work process. Additionally, the physical condition of both buildings is extremely poor. With the services and caseloads increasing every year at an alarming rate, the need for expansion is critical not only for the consumers but for the safety of our employees. The County has worked very hard with the engineers to produce plans for an addition to DSS Building #1, a complete renovationof Building #1, and finally to raze Building #2. This was the most cost effective plan. This undertaking is projected to take one year to complete and County workforce will be providing most of the labor on this project. Any contribution to this projectwould be extremely beneficial and would alleviate some of the long term debt burden that the taxpayers will be responsible for.
Wyoming	WCCH - 408 North Main Medical Bldg	$1,500,000	DASNY	The County was offered a unique inexpensive opportunity to acquire and reconstruct a medical building located immediately adjacent to the existing Wyoming County Community Hospital campus. The benefits of this purchase include, 92 ground-level accessibleparking spaces, exits to a traffic signal, and has 18,000 feet of space on two floors with no support walls. The open design structure allows for easy remodeling that will be performed by County workforce in an effort to reduce the project cost. The need for this building is essential to the Hospital as it prepares to undergo a major renovation project. Specifically, the acquired building will provide all repetitive outpatient services (Physical Therapy, Occupational Therapy, Speech Therapy, and Cardiac Rehab) along with a multi-station outpatient laboratory. The patients will have safe and easy access from the main street, ample parking, handicap accessibility, and speedier service by avoiding the main hospital-nursing facility infrastructure. This rhealth services may put the hospital in a position where a County subsidy is not required, saving the taxpayers close to $2M a year.
Wyoming	WCCH - Capital Improvement	$16,000,000	DASNY	The Wyoming County Community Hospital, a federally designated Sole Community Provider, is the largest employer in the County with over 600 employees. A majority of these employees live, work and reside in the County. The hospital serves the entire Countyof over 43,000 residents as well as the surrounding communities. It has become apparent that in order for the hospital to remain competitive, the facility needs to undergo major improvements. The purchase and renovation of the adjacent medical buildingwill allow the existing facility to redesign its core services that will reduce both the size and cost of the project. The community has been working tirelessly to raise the necessary funds through the Hospital Foundation, Capital One Campaign. Unfortunately, the campaign has only reached 20% of its goal to date. Any funding opportunities that become available to support this project would make an incredible impact on Wyoming County residents. These improvements will not only change the delivery of heal
Wyoming	Wyoming County Community hospital	$1,500,000	DASNY	Wyoming County Community hospital
Wyoming	On Behalf of Cornell Cooperative Extension	$400,000	DASNY	On Behalf of Cornell Cooperative Extension

Wyoming	Rt 39 from Castile (North Village Line) to Route246 (In Vill of Perry)	$249,000	DOT	
Wyoming	Rt 354 from Erie County Line to Route 98	$1,014,000	DOT	
Wyoming	CR #59 Bixby Hill Rd. Milling and Resurfacing	$700,000	DOT	
Wyoming	Replacement of the Route 19 bridges over Oatka Creek, Town of Gainesvill	$1,654,000	DOT	
Wyoming	CR #2 (Broughton Road) from Rt 19 to Rt 19A Pavement Rehabilitation	$1,630,000	DOT	
Wyoming	Wyoming County Industrial Rail Initiative, Wyoming County, Arcade to Attica	$1,400,000	DOT	Wyoming County Industrial Rail Initiative, Wyoming County, Arcade to Attica: This project will rehabilitate the short line railroad from Arcade to Attica. Improvements will include track, ballast, ties and a switch/siding at the old Westinghouse Foundryin Attica. Hillcrest Industries is located in this building, however they do not have any rail connection and instead have to off-load at a different site. By installing this siding (to serve Hillcrest) rail will also be available to an adjacent 28 acreindustrial park. It is projected that Hillcrest will create 30 new permanent jobs as a result of the increased production from the rail service. In the south at Arcade a section of the shortline will be relocated to accommodate an expansion at the KoikeAronson plant. Koike currently employs 175 people and it is expected that they will hire more with the new expansion. The project will assist two primary employers with expansions in this rural county. It will also provide rail service to lots in an exibs, and also allow them to expand. It will also make the line more viable for rail freight use (currently a tourist railroad) and allow sites at the industrial park in Attica to have on-site rail. The IDA does not have the funding to accomplish this projengineered and ready to go.
Wyoming	Silver Springs Highway/Rail Bypass, Wyoming County, Silver Springs	$4,000,000	DOT	Silver Springs Highway/Rail Bypass, Wyoming County, Silver Springs: The proposed project would make upgrades to the highway/rail crossing that serves Morton Salt in the Village of Silver Springs. This includes road and rail improvements totaling $4,000,000. Morton is one of the County's largest manufacturers and employers. The shortline railroad has been trying to upgrade the crossing to improve efficiency, lower costs for Morton and improve safety for local residents. The project will allow Morton tohave greater use of the crossing and at the same time provide for improved safety for those travelling on this road. This increased useage could lead to increased production by Morton and therefore new permanent job creation. The project is important tothe safety of Village residents using this crossing. It will also enable Morton to have more reliable and greater use of the crossing. This may allow them to expand and create new permanent jobs. Of course construction jobs will be created. The funding
Wyoming	Collector/Sanitary Sewer, Force Main, Pump Station	$900,000	EFC

County	Project	Requested $	State Agency	Additional Detail
Wyoming	North Street Sewer Line	$2,400,000	EFC	Construction of 7,300 feet of sewer line , 2 lift stations, 2,300 feet of force main and a 250,000 gallon per day addition to an existing wastewater treatment plant. The area is currently unserved by public sewers. Sewer line (and proposed water line) wi
Wyoming	North Street Water Line	$1,225,000	EFC	Construction of 7,300 feet of water line and a 500,000 gallon storage tank to provide clean drinking water and fire protection to currently unserved area. Tank is required to provide adequate pressure and volume for fire protection. Water line will allow
Wyoming	Warsaw Sewer Extension, Wyoming County, Village of Warsaw	$500,000	EFC	Warsaw Sewer Extension, Wyoming County, Village of Warsaw: The Village of Warsaw proposes to construct new sanitary sewer lines along North Main St. It will connect 48 commercial and industrial users. The project will have a beneficial impact on the business operations and capabilities of these companies. The project will allow existing businesses to expand and also present opportunities for new companies. The project will also insure environmental integrity in the community (health). The project willallow existing companies to stay in business and grow. It will also accommodate new expansions. The village does not have the money to implement the project. It is engineered, permitted and ready to go. It has a direct relationship to many existing permanent jobs in the community. It will also allow new ones to be created. Construction jobs will also be created.
Wyoming	Arcade Downtown Revitalization Project	$350,000	MAIN_ST	
Wyoming	Electric System Upgrade	$250,000	NYPA	Our Village has outgrown our outdated electric system. We have a large dairy farm within our system that places an ever-increasing burden on the system. Without upgrades the system will be overloaded by the next heating season thus making it necessary to
Wyoming	Back-up 911 Center	$750,000	OHS	The Wyoming County 911 Center is the backbone of all Fire, EMS and Police agencies in Wyoming County, and provides service to approximately 45,000 residents. Currently, the County does not have a backup 911 Center that we would be able to evacuate to incase of an emergency. This is a very costly venture for a small county such as ours. We have been trying for the past two years to secure state funding for this project. With New York State?s fiscal problems this money is not available. We are asking theFederal Government to assist us in this endeavor. We would like to start this project ASAP with a completion date sometime in 2010. If our County was to face a disaster that would include the evacuation of our 911 Center we would not be able to providethe essential services to our county residents. Without assistance from an outside source this valuable project will not be possible.
Wyoming	Construction of a new fire training tower	$450,000	OHS	Construction of a new fire training tower
Yates	T. of Milo Water District Lateral & Rehab	$164,800	CDBG	
Yates	V. of Penn Yan Brown Street Water Main Improvements	$384,215	CDBG	
Yates	Repair and Paint Water Storage Tanks (2)	$416,200	CDBG	The 320,000 and 500,000 gallon storage tanks would be rehabilitated including repair of weld seams and rivets. The interior and exterior coating would be replaced. In addition, tank mixing systems would be installed.

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. County	Project	Requested $	State Agency	Additional Detail
Yates	Keuka Lake School	$600,000	DASNY	Background: Yates County Chapter, NYSARC, Inc., founded in 1975 with a staff of 220 employees, serves 320 children, adults and their families by providing Vocational, Educational, Residential, Clinical and Day Services to individuals with developmental and other disabilities. Yates County is a rural county in the Finger Lakes area with a per-capita income in the bottom quartile of New York counties. Project: Purchase and renovate an existing, leased structure of 21,000 sq. ft. Purpose: 1) Stabilize educational opportunities for 50 children with disabilities. 2) Preserve jobs for 25 educational staff. 3) Expand capacity to serve an additional 20 children. 4) Provide 10 additional manufacturing jobs due to increased space. Outcomes: 1) Current jobs retained: 25 2) New jobs: 14 3) Construction: 25 jobs over six months 4) Additional service capacity: 20 children
Yates	New Campus Lighting	$75,000,000	DASNY	All external campus lighting which is efficient will be replaced with high pressure sodium lighting. This will: Inprove Security and Safety on Campus; Lower Energy Costs and Reduce Light Pollution and Glare.
Yates	Renovation of Davis and Saunders Residence Halls	$2,600,000	DASNY	Total bathroom renovation and repainting of the halls. The residence halls are dated with gang bathrooms which now need total renovation.
Yates	Weed Center Renovation	$2,100,000	DASNY	Much needed of the main athletic facility on campus. Pool: replace circulation pump - $3,100; Replace/repair deck drains - $5,000; Resurce pool lining - $19,500; Upgrade GFI outlets $2,500. Main Gym: Replace Roof - $120,000; New wood floor - $210,000;Paint high areas - $11,000; Replace interior doors - $12,000; Replace exit doors - $10,000; Install overhead door on west wall - $24,000. Locker Rooms: Complete renovation & reconfiguration - $450,000. Offices & Training Room: Replace lobby doors - $9,500; Renovate public restrooms - $32,000; Misc. carpentry, paint & hardware - $34,000; Trophy case - $7,500. General Building: Repair skylights and plaster - $4,500; Seal all penetrations - $10,000; Repair windows - $15,000; Replace/repair HVAC - $300,000; Upgrade exterior appearance - $75,000; Replace other interior doors - $20,000; Replace other exterior doors - $20,000. Code Compliance and Safety: Emergency Exits - $3,000; Emergency lighting - $3,000; ADA projects - $20,000; Elevator for ADA - $90,at need of renovation and expansion of existing space. Students do not have adequate space for practice and competition. Existing facilities now need renovation to meet the demands of our existing programs. The renovation would pave the way for a newding can be secured in the future.
Yates	Highway Garage Rehab/Replacement	$400,400	DASNY	To tear down the old dairy milk house that the Village is using as a highway garage. Replace with an energy efficincy highway barn fitted towards the highway crews needs.
Yates	Municipal Office Addition	$68,000	DASNY	Addition to the Clerks and Justice Office creating proper Justice chambers and records storage.
Yates	NYSARC	$0	DASNY	NYSARC operates 1,000 residences throughout New York State and are looking to make capital improvements to increase energy efficiency and to better utilize their buildings. This proposal is for the renovation of three residences in Dundee and Penn Yan.

Yates	Yates Community Center Project, Yates County, Village of Penn Yan	$2,000,000	DHCR	Yates Community Center Project, Yates County, Village of Penn Yan: The proposed project is the construction of the Yates Community Center in the Village of Penn Yan. It is being sponsored by the IDA and a non-profit 501,C,3 organization. It will be a 27,000 sq. ft. facility that will be multi-purpose, providing the following services: business mentoring classes, meals for the homeless and low income, health programs, educational programs, a fitness and wellness center, community meeting space and officespace for local non-profits. Enhance the physical, mental and economic well-being of Yates County residents. Residents from every age group will benefit. There is currently insufficient funding to accomplish this project. The project will stimulate development in other sectors of the community. It will also create construction jobs. Unlike urban areas, the community does not have this type of multi-purpose space that is dedicated to the the physical, mental and economic well-being of the local residebegin immediately.

Yates	Penn Yan Village Trail and Rail Line Improvements, Yates County, Penn Ya	$1,300,000	DOT	Penn Yan Village Trail and Rail Line Improvements, Yates County, Penn Yan Village: The Village is proposing two project that have an impact on economic development in the community. One is the repair of a section of the intermunicpal Keuka Trail System (Village portion). The banks along the Outlet need to be stabilized so that the Trail does not slide into the river. The Village also proposes to construct a new railroad siding at Elmwood Ave. It will be available for use by three municipalities and areabusinesses. The Trail project is important to the safety of the many local residents and tourists that use the Keuka Outlet Trail. The railroad siding is important to the economic interests of local businesses (for off loading) and the 3 muncipalities.The project is important to the local economy because of the safety and tourism enhancements (Keuka Outlet Trail) and also business development opportunities that can be realized from the railroad siding. The projects are engineered and ready to go. Th

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
Yates	Penn Yan Utility Upgrades, Yates County, Village of Penn Yan	$4,000,000	DPS	Penn Yan Utility Upgrades, Yates County, Village of Penn Yan: Village of Penn Yan is economically distressed. They provide the primary utiliites (water, sewer, electric) to most of the residences and businesses in the County, including the County's two industrial parks. However, given their financial plight, many of these strategic utilities are now having failures and are in desperate need of upgrades. This is having a detrimental effect on existing businesses as well as prospective new ones. Improvements that need to be made include: Keuka St. sewer and water lines, Seneca St. sewer and water lines, Sheppard St sewer line, Welker Substation upgrade and a new programmable logic controller at the regional water treatment plant. These upgrades are necessary to insure that the existing business community is not further negatively impacted and decides to move away. Additionally, they are needed to allow the community to attract new industry. The project is critical for the residents and businesses of t
Yates	Brown Street Water System Improvements	$390,000	EFC	The Village of Penn Yan is requesting funding to replace deteriorated water lines along Brown Street in the Village. The existing water lines in this area have broken repeatedly and have required numerous repairs. The tenuous condition of the water mains
Yates	Seneca St., Sanitary, Water and Street	$2,456,406	EFC	Seneca St is generally 24 feet in width with open ditches and closed drainage throughtout. There are isolated portions of curbed sections near the Village's central business district and in front of Dundee Foods. Severe rutting and raveling pavement sections was identified on the western portion of Seneca St. When moving closer to the Village center the Street section showed signs of subbase failure which produced alligator cracking and pavement rutting. This condition was most likely caused by heavy truck taffic and higher volumers of commuter traffic from outer areas entering the Village center. The drainage system in this area is lacking subsurface collection of ground water which may have contributed to the weakened road section. There is limited closed drainage with catch basins for collecting surface water runoff, contributing to hazrdous driving conditions during the wet months of the year.Replace Water main along Seneca St. with new 10-inch ductile iron water main. This would increase fore flo
Yates	Union Street, Sanitary, Water and Street	$1,123,316	EFC	To replace water main along Union Street with new 10-inch ductile iron water main. This would supply adequate fire flows to the school and industry. The pavement edge along Union Street is deteriorating in part due to lack of adequate closed drainage androadsie stormwater collection. It was also noted that roadside parking beyond the pavement edge has also contributed to the pavement edge deterioration. The wheel loading and wear beyond the pavement edge contributed to the removal of the pavement backing mateial, weakening and producing cracking along the pavement edge.

County	Project	Requested $	State Agency	Additional Detail
Yates	Keuka Park Water Main Replacment, Yates County, Town of Jerusalem	$1,875,000	EFC	Keuka Park Water Main Replacment, Yates County, Town of Jerusalem: The Town of Jerusalem operates the Keuka Park Water District. This District serves the Keuka Park residents and Keuka College. The Town needs to replace old cast iron mains, many dating from the early 1900's. The propse to replace 14,000 lineal ft of 6 and 8 inch water mains, valves, hydrants and appurtenances in Keuka Park. If this is not accomplished there will be ongoing repair and maintenance problems, directly impacting operations at the College (one of the primary employers) in the County. This project is necessary if the Town is to adequately serve the Park residents and Keuka College with reliable and safe drinking water. The Town does not have the funding to complete the project. The project is engineered, permitted and ready to go. The project is necessary to insure that the College is not detrimentally impacted by water line failures. The College is one of the County's largest employers and brings substantial revenue into
Yates	Broadband Initiative	$1,000,000	OFT	Provide dark fiber network from the Ontario County fiber ring thru the west half of YC including Keuka College & into Penn Yan, the local hospital, school district, county & village govts, library, businesses, wineries & residences. Broadband isn't currently available to all of YC. We have done a broadband study & know where it's needed.
Yates	Yates County Broadband Project, Yates County, North and Central Municipa	$600,000	OFT	Yates County Broadband Project, Yates County, North and Central Municipalities: The Ontario County Broadband Network can be extended to the northern and central towns and villages in Yates County. The County is rural and has many unserved and under-served locations. This is having a detrimential impact on existing businesses and institutions such as the local hospital, Keuka College, high schools, government, and certainly businesses. By implementing this connection there will be fiber optic cable to nearly half of the County with wireless capability for the remaining areas. The lack of broadband capability is an big impediment in rural areas as it stiffles economic development and access to services in numerous ways. Those most impacted in Yates County are the local hospital, Keuka College, schools, government and the business community. Additionally this is a large tourism area and tourists expect access more and more. The project is important to this rural community, possibly even more than urbanis impeded. The County IDA can provide $200,000 for part of this project and is requesting the remaining $600,000

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

Second Draft List - Project Proposals
New York State Economic Recovery and Reinvestment Cabinet
March 25, 2009

Please note: These are projects submitted by municipalities, organizations and individuals throughout New York State. Projects on this list have been reviewed by staff to the Economic Recovery Cabinet and have been forwarded to the appropriate New York State agency (as identified in this listing) for a determination of potential funding eligibility and next steps. **Inclusion in the list in no way implies acceptance, validation or certification of any project.** Further, inclusion does not in any way imply that a project either qualifies for or will receive funding under one or more ARRA programs. Similarly, if you are looking for a particular project and do not find it, that does not mean or imply its rejection. If you have previously submitted a proposal you need to check and make certain it is included. If you have not yet submitted a project proposal but wish to do so, or if you cannot find your proposal on this list, please use our electronic submission form: http://www.economicrecovery.ny.gov/system/proposal.cfm

County	Project	Requested $	State Agency	Additional Detail
	NPPR	$3,000,000,000	DPS	What New York needs are environmentally friendly nuclear power plants that are up to code. Our proposal is to incorporate both infrastructure programs with an energy and environment program. This proposal would include upgrading and modernizing the sixcurrent nuclear power plants in New York. Along with this proposal comes the opportunity to possibly begin construction of a seventh nuclear power plant. Many nuclear power plants have fallen below the standards set by the Energy Policy Act. There are many advantages to nuclear power plants. One is that there is a limited supply of coal and oil and when they become scarce nuclear energy will be able to take their place and provide electricity. The amount of pollutants that contaminate the earth are muchhigher when burning coal and oil then it is when using nuclear power plants for energy. If our nuclear power plants are upgraded properly and ran well, they can release little to no contaminants. The idea of this proposal is not only to create and retai
	Village of Maybrook Economic Stimulus Funding	$5,480,000	EFC	Replace and expand the sewage treatment plant, including replacement of outfall piping, installation of a 60' culvert, dredge existing channel, I & I Study and video taping

County	Project	Requested $	State Agency	Additional Detail
	Elementary Dual Language Proposal	$30,000,000	SED	Madarin Chinese and Spanish are arising as two of the world's most dominate languages. Many foreign schools have realized this reality and have begun to teach their students a second language beginning in elementary school. To ensure the education of future generations and ensure the United States in the world's politics and economy, We would like to propose adding two foreign language teachers to every elementary school statewide. This would gain us 7,000 new teaching jobs as well as retain a total of7,000 middle and high school teaching jobs. This system has been proven to be successful within Europe and Asian countries. Our proposed budget is $30 Million dollars, which will stand for an average salary of 40,000 per year to new teachers and for thecosts of new textbooks and listening supplies. We would like to hire teachers who are proficient to teach two languages, both Madarin Chinese and Spanish so that they have the abilities to offer higher education to our students.
